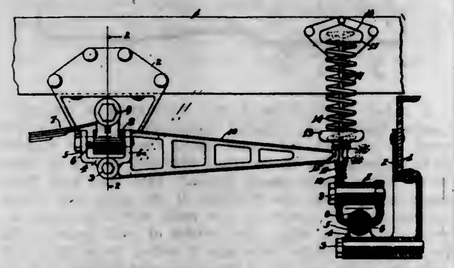
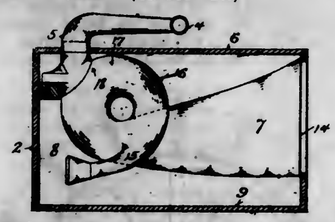
A safety razor blade holder comprising a one piece handle having an integral longitudinal straight-edged head at one end, said head being transversely tapered from its back edge to its front edge and having an elongated recess which opens through said back and front edges and through one flat side of the head, said recess having straight under-cut end walls which converge toward said front edge, the bottom of said recess being provided with means to engage a safety razor blade and hold the latter against shifting on said bottom, and an elongated slide plate free of connection with the head and handle and adapted to be forced into said recess from its back edge toward its front edge, said slide plate being transversely tapered from its back to its front edge and having beveled forwardly converging straight ends for tight wedging contact with the ends of said recess.

1,573,631. ANTISKID CHAIN. JOHN ALBERT CHEAPE, Charlottesville, Va., assignor to Exyon Corporation, Charlottesville, Va., a Corporation of Virginia. Filed Mar. 21, 1925. Serial No. 17,898. 3 Claims. (Cl. 152—14.)



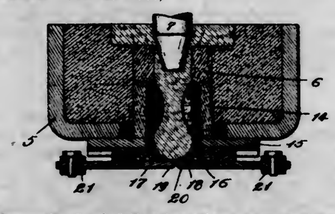
3. A device of the character described including two side chains and connecting cross-chains, one side chain unbroken and continuous, the other side chain having an extension at one end which slides freely through a link in the other end, said extension being non-elastic and having means on its free end for preventing its escape from the link.

1,573,632. PROCESS FOR PRODUCING LIGHT BASIC MAGNESIUM CARBONATE. RUSSELL B. CROWELL, Agnew, Calif., assignor to Western Industries Company, Agnew, Calif., a Corporation of California. Filed June 26, 1925. Serial No. 39,819. 6 Claims. (Cl. 23—67.)



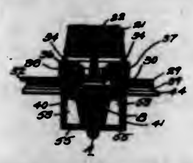
8. In a process of producing light basic magnesium carbonate, the steps which comprise reacting carbon dioxide gas with magnesium oxide in an aqueous medium until the ratio of CO_2 to MgO lies between the limits of 0.8 to 0.9, and heating the reacted mass to a temperature not exceeding 140 degrees Fahrenheit.

1,573,633. SPRING MOUNTING FOR MOTOR VEHICLES. HENRY E. CURTIS, San Jose, Calif., assignor of one-half to John H. Betts, Long Beach, Calif. Filed June 25, 1924. Serial No. 722,328. 9 Claims. (Cl. 267—17.)



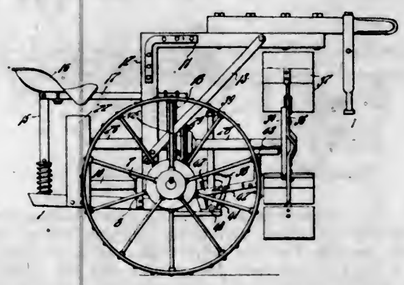
1. A spring mounting for vehicles comprising a lever fulcrumed upon the vehicle frame and slidably connected by its shorter arm to the vehicle spring, and a spring inserted between the vehicle frame and the longer arm of said lever.

1,573,634. SOUND AMPLIFIER. CHARLES J. DODGE, Brooklyn, N. Y. Filed Aug. 18, 1922. Serial No. 582,692. 1 Claim. (Cl. 181—27.)



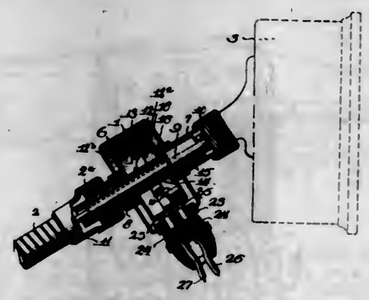
A sound amplifier comprising a horn body, a curved throat communicating therewith, a curved inlet member having its bore communicating with the bore of said throat, said throat at the place of juncture of said inlet member therewith being curved to form a continuation of the curvature of said inlet member, and a second inlet member having its bore communicating with the bore of said throat, said second inlet member being curved and disposed eccentrically within the arc of curvature of said first inlet member.

1,573,635. METHOD OF FEEDING GLASS TO FORMING MACHINES. LEO A. DEBY, St. Louis, Mo., assignor, by mesne assignments, to Ball Brothers Company, Muncie, Ind., a Corporation of Indiana. Original application filed Dec. 14, 1914, Serial No. 877,070, Patent No. 1,146,694, dated July 13, 1915. Divided and this application filed June 28, 1915. Serial No. 36,724. 27 Claims. (Cl. 49—77.)



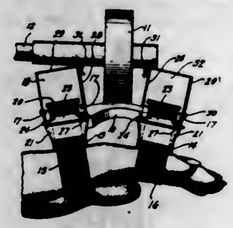
1. The method of delivering glass from a furnace to a mold, which consists in flowing glass on a support which contacts with only a portion of the batch and subjecting the free unsupported remaining portion of the batch to heat.

1,573,636. APPARATUS FOR FEEDING GLASS INTO MOLDS. LEO A. DEBY, St. Louis, Mo., assignor, by mesne assignments, to Ball Brothers Company, Muncie, Ind., a Corporation of Indiana. Filed Oct. 18, 1920. Serial No. 417,765. 6 Claims. (Cl. 49—55.)



3. In an apparatus for gathering molten glass from a continuously flowing stream, comprising a supporting plate having a central opening therethrough, said opening being concentric with the stream of glass, a recess formed in the upper face of said plate, a knife slidably located in said recess, means for operating said knife periodically across said opening for closing the same and severing the oncoming stream of glass, a bottomless cup composed of separable members slidably secured to the underside of said supporting plate, and means for moving said separable members to and from each other when the opening in the supporting plate is closed.

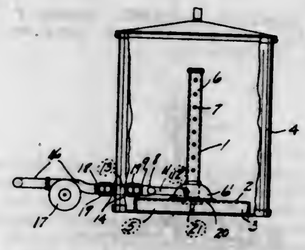
1,573,637. COTTON CHOPPER. FRANK DROZD, Hallettsville, Tex., assignor of one-half to Julius G. Jalufka, Hallettsville, Tex. Filed May 16, 1925. Serial No. 30,780. 1 Claim. (Cl. 97—15.)



In a cotton chopper, a frame, an axle and axle casing mounted in said frame, the axle including supporting wheels, said axle casing including a differential housing provided with a rearwardly extending shaft housing, a shaft in said shaft housing and having a differential connection with the axle, a second shaft above and in parallelism with the first shaft and overlying the axle at right angles thereto and extending forwardly and provided at its rear with operative connections with the first shaft, a shaft housing for the second shaft, the second shaft and its housing comprising two sections respectively with operative universal joints connecting the respective sections, whereby one section of the second shaft may have oscillating movements upwardly and downwardly, a support carried by the axle casing and connected to the casing of the universal joint of the second shaft housing, the oscillating section of the second shaft extending forwardly and provided with a relatively large revoluble chopper on its forward end, links pivotally connected to extensions of said support and extending forwardly and upwardly and having a sliding connection with the housing of the upwardly and downwardly movable section of the first shaft, manually operated means on the frame and provided with a slot and pin connection with the links for moving the links and thereby imparting upward and downward movements to the movable section of the second shaft, and means for holding the manually operated means in different positions.

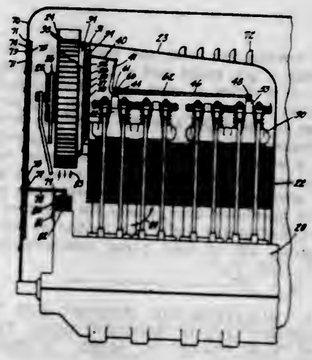
1,573,638. SIGNAL DEVICE FOR MOTOR VEHICLES. HARRY C. EVELYN, Chicago, Ill. Filed Mar. 14, 1925. Serial No. 15,444. 8 Claims. (Cl. 200—80.)

1. A switch for controlling a signal device for vehicles, comprising a rotative body member, means for driving said body member at a speed proportional to the speed of the vehicle, said body consisting of two electrically insulated sections, a circuit closing member mounted on one of said sections and adapted to be shifted by gravity to alternately open and close a circuit through the other section in the rotation of said body member at less than a predetermined speed, and to be actuated by centrifugal force to maintain the circuit open at speeds greater than said predetermined speed.



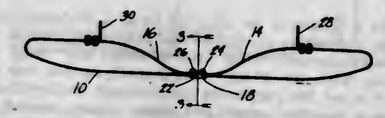
1,573,639. APPARATUS FOR MASSAGING AND THE LIKE. PAUL FISCHER, New York, and WILLIAM ENGLERT, Hempstead, N. Y. Filed Feb. 25, 1924. Serial No. 694,843. 6 Claims. (Cl. 128—35.)

1. In apparatus for massaging and the like, in combination, a driven device adapted to be supported upon the back of the hand, a reserve strip of yielding material carried upon said device, means at one side of said device for guiding the end portion of said strip toward the face of the hand, and means at the other side of said device adapted to receive the end of said strip passing about the face of the hand to retain said device in position thereon.



1,573,640. WASHING MACHINE. ADAM E. FISHER and JAMES A. STORM, St. Louis, Mo. Filed Oct. 25, 1923. Serial No. 670,667. 3 Claims. (Cl. 68—30.)

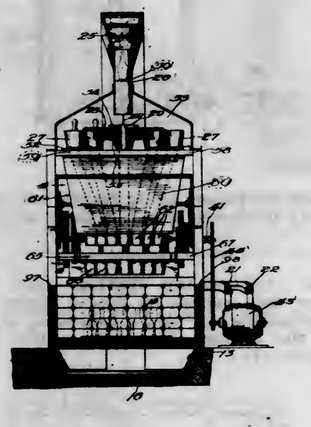
1. In combination with a water boiler and a percolating device mounted therein adapted to percolate water under the action of heat, the said percolating device having normal water intakes and water outlets; means for forcing a percolation of the water independent of the action of heat, said means comprising a returning pipe line leading from and back into the boiler; a pump incorporated in the pipe line; connecting joints for connecting the percolating device with the delivery end of the pipe line; means for closing the said connecting joints; sleeves for releasably connecting the connecting



joints with the delivery end of the pipe line; and means for closing the normal water intakes of the percolating device.

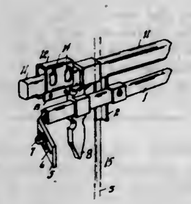
1,573,641. AIR-COOLING SYSTEM. JOHN H. HUNT, Dayton, Ohio, assignor to General Motors Research Corporation, Dayton, Ohio, a Corporation of Delaware. Filed May 26, 1923. Serial No. 641,617. 8 Claims. (Cl. 123—171.)

1. Apparatus for controlling the air cooling of an engine, comprising the combination with means for conducting air to the cylinders and means for conducting air away from the cylinders; of separate and independent temperature responsive devices each for controlling the flow of air through one of said air conducting means.



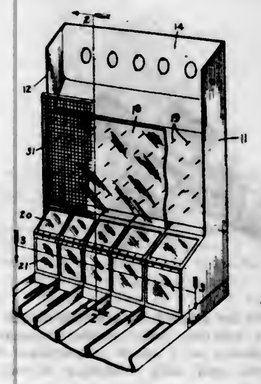
1,573,642. VEHICLE BUMPER. GEORGE A. LOVETT, Detroit, Mich., assignor to General Motors Corporation, Detroit, Mich., a Corporation of Delaware. Filed Aug. 8, 1924. Serial No. 730,861. 2 Claims. (Cl. 293—55.)

2. A vehicle bumper comprising a spring bar extending across the end of the vehicle and looped backwardly at opposite sides of the vehicle to bring these ends into abutting engagement, the abutting ends also lying against



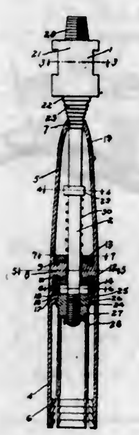
the rear face of the front bumper bar, means holding the ends of the bar in the said position and means to support the bumper on a vehicle.

1,573,643. BOWLING MACHINE. JOSEPH F. PROCH, Chicago, Ill. Filed Mar. 11, 1925. Serial No. 14,665. 9 Claims. (Cl. 273—47.)



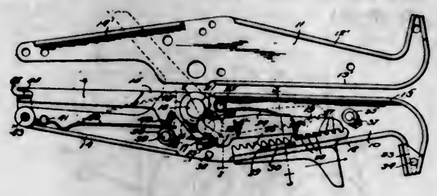
9. The combination with the rear end of a bowling alley having a pin stand and a pit immediately behind the same, of a series of cups above the position of said parts, means for raising the pins from the pit and deliver them to the cups, a series of collars beneath the cups corresponding in position to the frame positions of the pins, a series of vertically movable cups corresponding to the cups aforesaid, means for releasing pins from the first mentioned cups, means for releasing pins from the second mentioned cups, means for sweeping the pins into a pit, and means under the control of the operator for actuating all of said parts, substantially as described.

1,573,644. MULTIPLE-ROD SUPPORT FOR WINDOW HANGINGS. LULA H. ROBINSON, Dallas, Tex. Filed May 12, 1925. Serial No. 29,662. 2 Claims. (Cl. 156—23.)



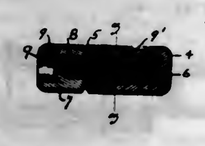
1. In a hanger of the type set forth, a horizontal supporting rod, slides carried by the rod, cleats formed for vertical securement to a window frame and being engageable with the slides, a horizontal curtain rod arranged above the supporting rod, vertical window frame engaging members, upper and lower collars carried by said vertical members and receiving the supporting rod and curtain rod respectively therethrough, shade hangers carried by the supporting rod, a collar slidable on each end of the curtain rod, and a series of curtain rod hooks on each collar.

1,573,645. AMUSEMENT DEVICE. NEWMAN LE ROY ROGERS, Los Angeles, Calif. Filed June 4, 1925. Serial No. 34,897. 8 Claims. (Cl. 273—103.)



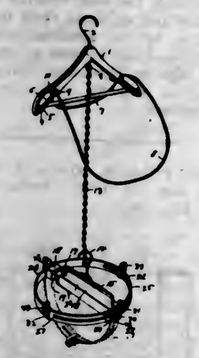
1. An amusement device comprising a plurality of targets, a container below each of said targets, balls adapted to be thrown at the targets, and means providing tortuous passages between the targets and the containers whereby balls thrown at a target and missing it will be caused to drop into any of said containers.

1,573,646. FISHING TOOL. CHARLES SCHIEFFERLE, Los Angeles, and JULIUS SCHIEFFERLE, Inglewood, Calif. Filed July 9, 1925. Serial No. 42,462. 12 Claims. (Cl. 294—116.)



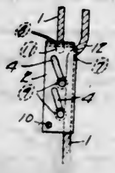
1. A fishing tool comprising in combination a plurality of longitudinal fingers, a jarring rod, means slidable on the jarring rod and situated between the upper and lower ends of each finger to retain them in relative position around a circle, means rigidly secured to the jarring rod to positively clamp the fingers with the lower ends expanded and the upper ends contracted, and means on the jarring rod to force the upper ends outwardly and to retract the lower ends of the fingers to grip an object.

1,573,647. MULTIPLE-PURPOSE QUICK-ACTING IMPLEMENT. BENJAMIN F. BROOKS SEWELL, Chula, Va. Filed Nov. 13, 1922. Serial No. 600,523. 3 Claims. (Cl. 81—89.)



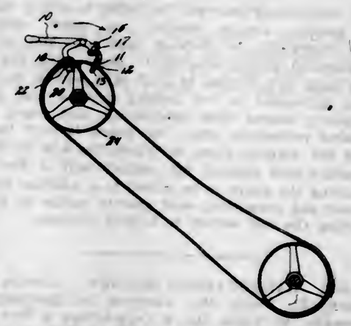
1. An implement comprising a body having spaced side walls, a lever pivoted between the side walls upon a pivot fixed relative to said walls, a jaw slidable relative to the walls and provided with a rack, a pawl, means pivoting the pawl to the lever eccentric of the pivot, and means carried by the pawl for engaging the pivot of the lever for throwing the pawl ont of engagement with the rack.

1,573,648. CONTAINER. JOSEPH H. SHEELY, St. Louis, Mo. Filed Feb. 24, 1925. Serial No. 11,234. 1 Claim. (Cl. 128—269.)



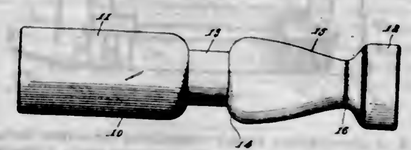
A paraffine container comprising a solid base, having its outer end countersunk and having a brush permanently secured at its other end, a cap, said cap secured to said base with a breakable joint.

1,573,649. GARMENT HANGER. BRYANT SIMPSON, Washington, D. C. Filed Apr. 27, 1925. Serial No. 26,233. 3 Claims. (Cl. 223—62.)



1. A suit hanger having eyes on its opposite faces adjacent to the arms thereof, wire members having their ends pivotally secured to the eyes, said wire members being looped and from thence bowed outwardly at opposite angles, hooks on the sides of the hanger for engaging with the bowed portions of the wire members, and one of said wire members being of a greater length than the other.

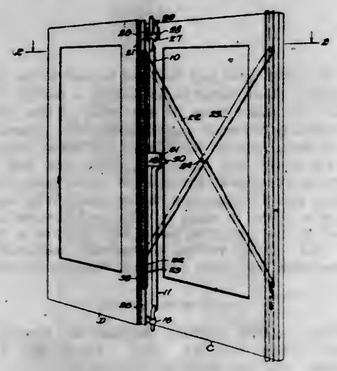
1,573,650. ANTISKID-CABLE AND FASTENER. CHARLES I. SIGNER, Olympia, Wash. Filed Jan. 19, 1924. Serial No. 687,176. 1 Claim. (Cl. 24—134.)



An anti-skid cable end fastener formed of an elongated, rectangular sheet metal blank having a medial cable slot at one end, cable holes at the sides of the cable slot, and obliquely directed roller slots with enlarged inner ends at each side of the blank; the blank being folded upon its medial line to form a cable way, and the free corners of the blank carrying the cable holes being bent inwardly and overlapped with the cable holes registering with each other to form a cable end locking means, a portion of the cable slot being left open as a cable run way; and clutch rollers operatively mounted in the fastener with their ends journaled through the said roller slots.

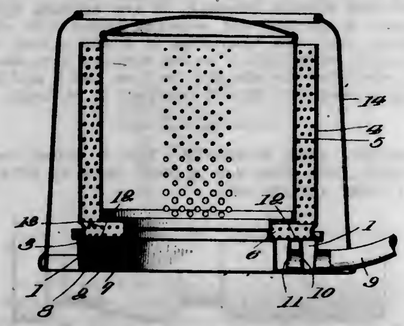
1,573,651. BELT TOOL. ERNEST A. SMITH, Barry, Iowa. Filed Jan. 13, 1925. Serial No. 2,187. 4 Claims. (Cl. 64—51.)

1. A tool of the character described comprising a lever, a hook-like element secured to one end of the lever and projecting laterally therefrom, an arm arranged transversely of the lever and projecting beyond both sides thereof, said arms terminating to provide a hook arranged in juxtaposition to the first mentioned hook, means for associating the arm with the lever, and a hook-like element carried by the arm at a point in its length.



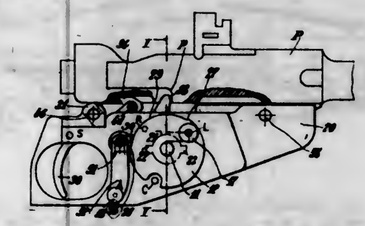
1,573,652. ARCH RESTORER. EARL S. SNYDER, Long Beach, Calif. Filed Mar. 24, 1923. Serial No. 627,449. 1 Claim. (Cl. 128—57.)

An orthopedic appliance consisting of an elongated roller having cylindrical end portions constituting bearing surfaces and guides, said roller having a greatly reduced cylindrical intermediate portion and a tapered compound curved portion leading from said intermediate portion to one of said cylindrical end portions, said compound



curved portion having its maximum diameter at a point spaced slightly from its juncture with the intermediate cylindrical portion, and tapering toward said last named cylindrical end portion and merging thereinto along a curved line.

1,573,653. SELF-LOCKING DOOR BOLT. JOHN H. STEWART, Rutherford, N. J. Filed Feb. 11, 1925. Serial No. 8,469. 7 Claims. (Cl. 292—39.)

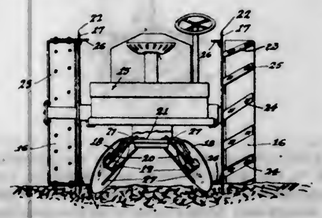


1. A self-locking door bolt including a sliding bolt section, gravity means tending to move said bolt section upwardly to locking position, and a movably mounted guard adapted to move over the upper end of said bolt section to hold said section restrained against movement to the locking position and prevent said gravity means from functioning, said guard having a member projecting, when the guard is over the bolt, beyond the vertical plane in which the bolt is disposed to position said member for contact with a door lintel for causing the guard to be moved to a position releasing said bolt and permitting said gravity means to function in moving the bolt section to locking position.

1,573,654. HYDROCARBON BURNER. ARTHUR STOCKSTROM, St. Louis, Mo., assignor to American Stove Company, St. Louis, Mo., a Corporation of New Jersey. Filed June 12, 1925. Serial No. 36,595. 10 Claims. (Cl. 158—87.)

5. A hydrocarbon burner comprising concentric troughs connected at their upper adjacent walls by a transverse perforated web, a combustion section above the said troughs, the lower end of the combustion section enlarged laterally to embrace both of the said troughs, the side wall of the outer combustion section provided with openings opposite the enlargement, the parts arranged for the purpose described.

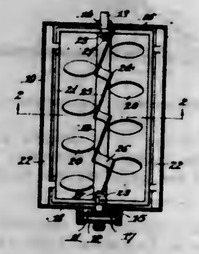
1,573,655. FIRING REGULATOR FOR AUTOMATIC FIREARMS. CHARLES SUTTER, Suresnes, France, assignor to Societe Anonyme des Anciens Etablissements Hotchkiss et Compagnie, St. Denis, Seine, France. Filed Feb. 20, 1925. Serial No. 10,641. 14 Claims. (Cl. 89—2.)



6. A firing regulator for automatic firearms, comprising in combination a casing a trigger in said casing, a fly-wheel mounted in said casing, said fly-wheel having a recess, a reciprocating member adapted to rotate said fly-wheel and a catch actuated by the trigger for locking said fly-wheel.

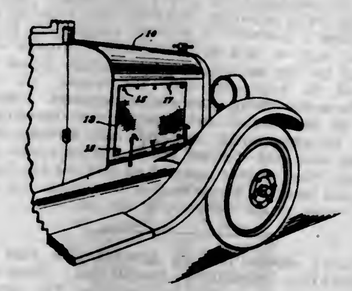
1,573,656. AIR FILTER. ROYAL E. TERHUNE, Clifton, N. J. Filed Aug. 20, 1923. Serial No. 658,472. 1 Claim. (Cl. 183—44.)

A device of the character described comprising an integral oblong box-like housing, said housing being formed with oppositely disposed open sides, a straight shoulder defining each of said open sides, said shoulders each being set within the box and spaced relative to the defining edge of its respective open side, a gasket carried by each of said shoulders, a filtering element mounted in each of said open sides and with the gaskets adapted to form a closure therefor, and spaced apart bolts passing through the said filtering elements to regulate their tension and maintain them in position on the gasketed shoulders of the housing, and a filtered air outlet thimble at one end of said housing, said thimble consisting of a tubular extension having a stream-line bore communicating directly with the space between said filtering elements.



1,573,657. BEET PULLER. OSCAR A. THOMAS, Oxnard, Calif. Filed Aug. 11, 1923. Serial No. 656,769. 4 Claims. (Cl. 55—106.)

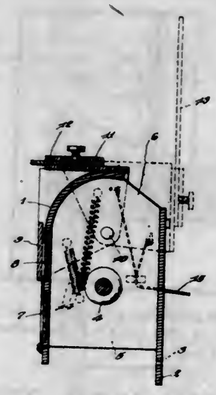
1. A beet pulling device, comprising an annulus adapted to be secured to a vehicle wheel and having a continuous cutting edge, a convex disc arranged in converging rela-



tion to the annulus and mounted for rotational movement, and means carried by one of the elements for preventing clogging of earth between the elements.

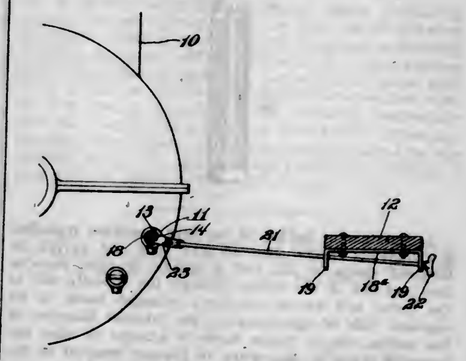
1,573,658. MIXING AND EJECTING MECHANISM. EMERY THOMPSON, New Rochelle, N. Y. Filed May 29, 1925. Serial No. 33,744. 2 Claims. (Cl. 259—41.)

1. A mixing and ejecting element comprising a plurality of blades, means for effecting the attachment of the blades consisting of apertured lugs, the apertures in said lugs being in axial alignment, said blades being disposed in parallelism with respect to each other and in spaced relationship, and the said blades being connected together by portions arranged respectively between adjacent blades.



1,573,659. ENGINE-HOOD-VENT COVER. HENRY L. THOMPSON, Philadelphia, Pa. Filed Mar. 5, 1923. Serial No. 622,972. 1 Claim. (Cl. 180—69.)

A side vent cover for an automobile hood comprising a curtain, fasteners connecting one edge of the curtain to the hood above the vents, straps depending from certain of said fasteners and disposed between the hood and curtain, additional fasteners adapted to detachably connect the lower edge of the curtain with the hood at a point below the vents and fasteners on the outer ends of said straps adapted to cooperate with some of the fasteners at the upper edge of the curtain to support the curtain in a raised position relative to said hood vents.

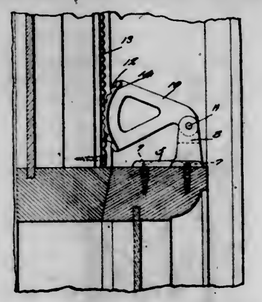


1,573,660. AUTOMOBILE SIGNALING DEVICE. THOMAS E. THOMPSON, Chicago, Ill. Filed May 29, 1925. Serial No. 33,767. 8 Claims. (Cl. 116—42.)

1. In combination a casing supporting a display plate and provided with an opening, a bulb within the housing, a shutter for covering and uncovering said plate, means for giving such movement to said shutter and a signal element associated with said shutter so that when the

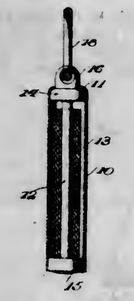
shutter is in position to uncover said plate, said signal element will be in displaying position and receiving light rays from the bulb through said opening.

1,573,661. PET-COCK-OPERATING DEVICE FOR AUTOMOBILES. BURNIEB A. WALBRIDGE and CHARLES E. WALBRIDGE, Ihlen, Minn. Filed Dec. 15, 1925. Serial No. 75,554. 2 Claims. (Cl. 137—139.)



1. In combination with a vehicle including an engine having an oil control pet cock provided longitudinally of the vehicle and a running board likewise extending longitudinally of the vehicle, a member having depending arms spaced transversely of the vehicle and secured to the under surface of the running board, said arms having openings formed therein, a rod directed through said openings, a member secured to the operating element of the pet cock and a universal connection between the inner end of the rod and the member.

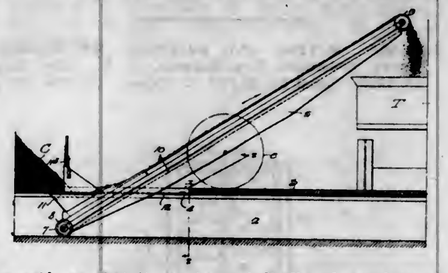
1,573,662. WINDOW LOCK. ROBERT V. WARGA, St. Louis, Mo. Filed May 13, 1925. Serial No. 30,045. 1 Claim. (Cl. 292—238.)



A device of the character described comprising a serrated bar to be secured to one of the rails of a vertically movable sash, an L-shaped plate to be secured to the upper face of a lower sash, a pair of upstanding ears

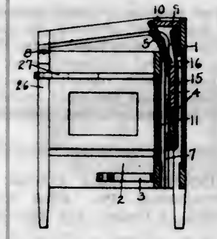
formed on the plate, a triangular shaped toothed segment pivotally supported between the ears in a manner to engage with the toothed bar whereby to lock the two

sashes in various positions with respect to each other by the engagement of the teeth of the segment with the teeth of the bar.



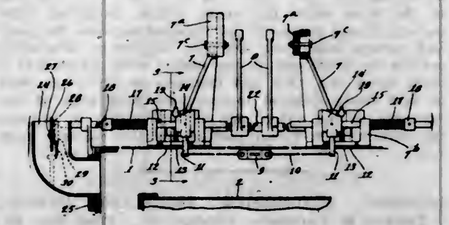
1,573,663. POCKET LICENSE CONTAINER OR HOLDER. WILLIAM WARREN, Newport, R. I., assignor of one-half to Bernard Richards, one-fourth to William Warren, and one-fourth to Charles Cohen, all of Newport, R. I. Filed Mar. 10, 1925. Serial No. 14,518. 1 Claim (Cl. 40—19.)

A container or holder of the type described including a cylindrical casing open at both ends and having an inturned flange at one end, a spindle or stem movable into and out of the casing through the opposite end of the latter and having annularly enlarged heads at its opposite ends of approximately the internal diameter of the casing, one of which heads is adapted to abut the inturned flange of the casing to prevent removal of the spindle through the flanged end of the casing, said last named head of the spindle having a reduced axial extension projecting exteriorly through the adjacent end of the casing and provided with an opening, and a split spring ring through the said opening serving as an attaching means for the casing or container as a whole, and also functioning to normally prevent removal of the spindle or stem through the first mentioned end of the casing.



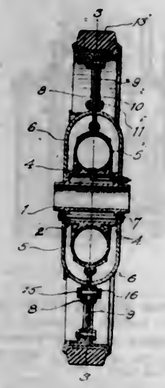
1,573,664. STORAGE AND RECLAIMING SYSTEM. RICHARD WAYNE WETHERILL, Philadelphia, Pa. Filed Oct. 6, 1925. Serial No. 60,843. 17 Claims. (Cl. 214—10.)

1. In a storing and loading system, the combination with a floor, of means forming a trench below the floor level, a series of transversely extending narrow cover sections for the trench flush with the floor and adapted to be separately removed to uncover different parts of the trench, and an elevating conveyor having its receiving end adapted to extend into the said trench below the floor level and underneath the cover section at the end of the said series, the said conveyor being bodily



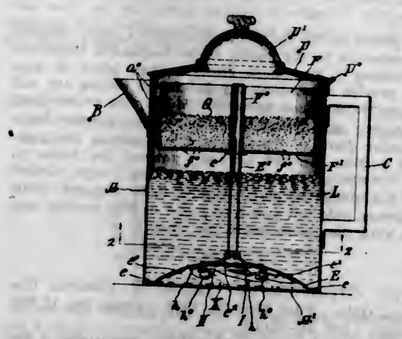
movable so that it can be periodically advanced as an entirety along the trench as successive cover sections are removed from the end of the said series.

1,573,665. DESK. GEORGE P. WIGGINTON, Kalamazoo, Mich., assignor to Kalamazoo Loose Leaf Binder Co., Kalamazoo, Mich. Filed Sept. 26, 1921. Serial No. 503,124. 3 Claims. (Cl. 45—92.)



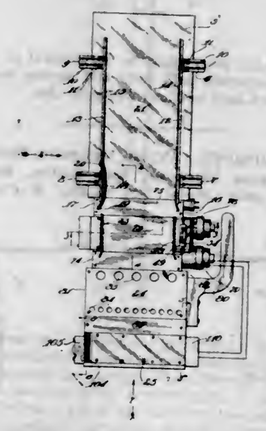
1. The combination in a desk comprising a back wall and end walls extending forwardly therefrom, of a top comprising a plurality of sections hinged edge to edge, angular ways on said end walls, rollers disposed at the ends of the top sections, the intermediate rollers being disposed in alignment with the hinges, the intermediate section being otherwise unsupported, a rod disposed at the rear of and adjacent the angles of said ways, sprocket wheels on said rod, sprocket chains running over said sprocket wheels and connected to the top, and coiled springs mounted on said rod and engaged with said sprocket wheels so that the springs are placed under stress on the collapsing of the top.

1,573,666. DOOR-CLOSING MECHANISM FOR DRY-CLEANING WASHING MACHINES. GEORGE W. WILSON, Reading, Ohio, assignor to The American Laundry Machinery Company, Cincinnati, Ohio, a Corporation of Ohio. Filed May 25, 1923. Serial No. 641,527. 7 Claims. (Cl. 220—89.)



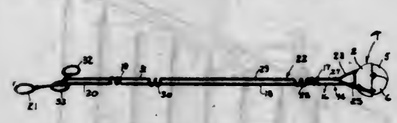
1. In a machine of the class described, the combination of a container for inflammable material, said container having an opening, a door for said opening, and thereby controlled means including actuating cam means located outside of said container for automatically closing said door in case of fire.

1,573,667. WHEEL. OTTO E. WILSON, Peru, Ind. Filed May 2, 1924. Serial No. 710,611. 1 Claim. (Cl. 152—42.)



A resilient wheel comprising a hub, a pneumatic member carried thereby, a two-part casing connected with the hub and having parallel flanges at its outer circumference which are spaced apart, a one piece disc passing through the space between the flanges, shoes connected with the inner circumference of the disc and engaging the pneumatic member, said disc having holes therein, bolts of smaller diameter than the holes passing through the same and being carried by the flanges, a tire connected with the outer circumference of the disc, each flange of the casing having a hole therein and the disc having a slot therein, bosses carried by the flanges having their bores registering with the holes, a pin passing through the slot and the holes with its ends resting in the bosses and screw caps engaging the bosses.

1,573,668. PERCOLATOR COFFEEPOT. MOSES LINDLEY WOOD, Washington, D. C. Filed Nov. 2, 1925. Serial No. 66,303. 7 Claims. (Cl. 53—3.)

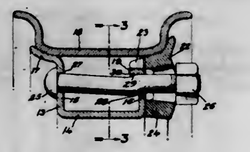


1. In a coffee pot, the combination with a cylindrical container, and a cover therefor, of a cupped annular plate provided with a hollow stem, said plate fitting in said container and being provided with openings spaced apart from said stem, and said stem being provided with an abutment thereon, an annular percolator cup adapted to slip over said stem and to be supported on said abutment, and a cupped valve plate made of thin resilient metal secured beneath said first mentioned plate and having resilient arms terminating in flap valves registering with said openings.

1,573,669. PACKAGE-SEALING DEVICE. CHARLES W. H. BOLINGBROKE, Los Angeles, Calif. Filed Feb. 19, 1924. Serial No. 693,913. 3 Claims. (Cl. 93—2.)

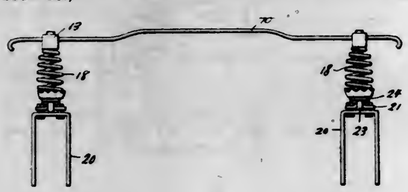
1. A package wrapping and sealing device comprising a frame, means forming a flat hot plate at the forward end of the frame, a working board extending backwardly from the hot plate, two hot plates back of the working board vertically and yieldingly mounted and facing each other, means for adjusting the distance between the vertical hot plates, a cooling table extending backwardly from the vertical hot plates and having sides adjustably mounted, and a series of bowed springs attached to the forward end of one side to press against the ends of a package as it passes to the cooling table.

1,573,670. BAIT DEPOSITOR FOR RODENTS. CHARLES J. BARNES, Redlands, Calif. Filed Apr. 30, 1925. Serial No. 26,006. 6 Claims. (Cl. 43—124.)



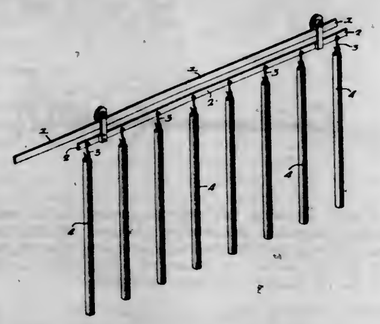
1. A bait depositor for rodents comprising a device adapted to enclose a suitable bait to pass the bait into a gopher hole or the like and release the bait in the hole and a flexible means to insert the said device and a second flexible means to actuate the device.

1,573,671. WHEEL ASSEMBLY. LLOYD BLACKMORE and LOUIS M. SPENCER, Highland Park, Mich., assignors to General Motors Corporation, Detroit, Mich., a Corporation of Delaware. Filed Jan. 9, 1922. Serial No. 527,879. 7 Claims. (Cl. 301—20.)



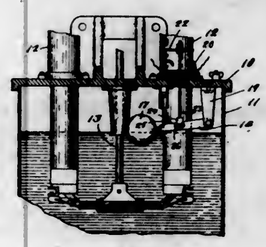
1. In a wheel, a channel felly having laterally bent portions on one flange of said channel, a rim engaging

the other flange thereof, rim wedge bolts extending through said flanges and engaging beneath said portions for reinforcing the same and having means for engaging



said portions for preventing the withdrawal of said bolts, and wedges engaging said bolts and having members engaging between said portions and said rim.

1,573,672. BUMPER. CYRILL BRIGNOLO, THONY AMARI, and GIUSEPPE BRIGNOLO, East Boston, Mass. Filed Oct. 13, 1925. Serial No. 62,282. 5 Claims. (Cl. 293—55.)



1. A bumper for use upon motor vehicles comprising anchoring brackets arranged at appropriate points thereon, U-bolts supported upon the forward portion of the anchoring brackets, plates secured to the bumper at appropriate points in the length thereof, and springs having their respective end convolutions secured to the U-bolts and plates providing a combined universal joint and shock absorber for the bumper.

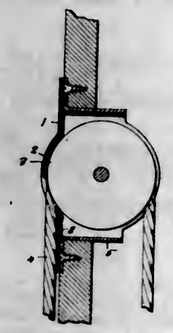
1,573,673. METHOD OF DRYING FINELY-DIVIDED MATERIALS. JESSE B. BRONSTEIN, Allentown, Pa., assignor to Trojan Powder Company, New York, N. Y., a Corporation of New York. Filed Oct. 23, 1919. Serial No. 332,714. 4 Claims. (Cl. 34—24.)

4. The process of drying nitrostarch, which comprises filling a tubular fabric bag of length relatively great as compared to its width with a slurry of the nitrostarch, and exposing the bag to a drying atmosphere until the evaporation of the moisture from the surface of the bag has reduced by capillarity the moisture content of the contained nitrostarch to the desired extent.

1,573,674. ELECTRICALLY-OPERATED ELECTRIC SWITCH. GEORGE A. BURNHAM, Saugus, Mass., assignor, by mesne assignments, to Condit Electrical Manufacturing Corporation, Boston, Mass., a Corporation of Massachusetts. Filed Sept. 9, 1921. Serial No. 499,406. 9 Claims. (Cl. 175—375.)

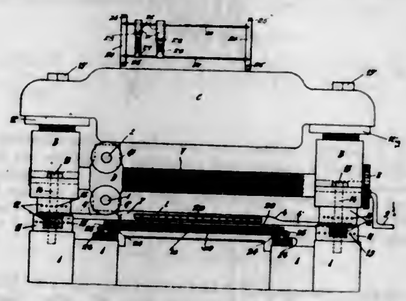
1. An oil immersed electric switch having associated with it an auxiliary switch arranged to be governed by the level of oil within said oil immersed switch, and means governed by the auxiliary switch to control the operation of the oil switch.

1,573,675. GARTER. ALBERT CARLSON, Swanton, Vt. Filed July 13, 1925. Serial No. 43,286. 1 Claim. (Cl. 24—243.)



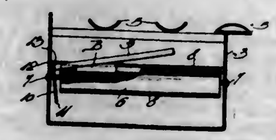
In a garter of the character described, a clasp adapted to be connected to the garter to be suspended therefrom and including a loop made from a single piece of wire bent to provide a substantially flat frame having one end turned outwardly and upwardly to form a broad hook bill overlying said frame in close relation thereto for a considerable distance thereof, said bill having its intermediate portion directed inwardly toward the frame to form a constricted portion, and a locking tongue formed from a flat elongated plate adapted to be engaged crosswise between said bill and frame and having flexible connection with the garter above the clasp.

1,573,676. COVER PLATE. SAMUEL W. CARROLL, Cincinnati, Ohio. Filed Mar. 28, 1925. Serial No. 17,760. 1 Claim. (Cl. 16—211.)



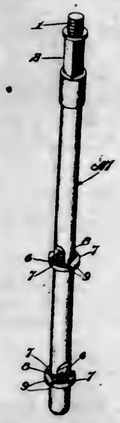
A cover plate for sash cord pulleys, comprising a flat member having a central outwardly bulged portion, said member designed to rest upon the side of a window casing and the bulged portion thereof designed to receive the sash cord pulley therein, a compressible strip on the inner face of the said member also arranged in the bulged portion thereof, said member having a transverse slot communicating with its bulged portion and its bulged

portion having an opening extending downwardly from the slot, and through which opening the sash cord passes, the compressible member being slitted, and having an



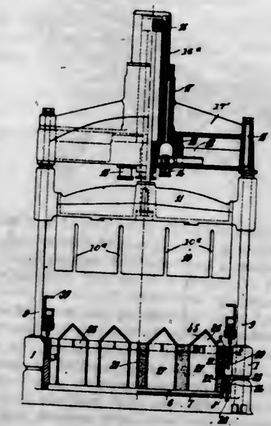
opening aligning with the opening in the bulged portion and said member being held in sustained position by contacting engagement with the sash cord therewith.

1,573,677. MACHINE FOR THE MANUFACTURE OF TICKETS OR LABELS. EDMOND CAUDRELIER, Paris, France. Filed Apr. 14, 1924. Serial No. 706,417. 11 Claims. (Cl. 101—3.)



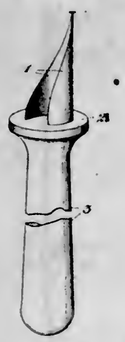
1. In a stamping machine, a base, a cooperating pressure head, an interposed carrier, a series of independent pressing keys between said carrier and base, and means for moving said carrier over said keys.

1,573,678. ASH RECEIVER. GEORGE E. CRAWFORD, San Francisco, Calif. Filed June 11, 1925. Serial No. 36,468. 4 Claims. (Cl. 131—51.)



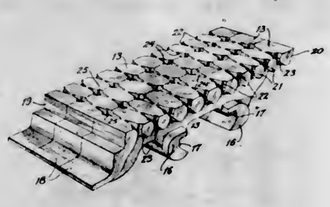
1. An ash receiver and butt extinguisher comprising a tray having an opening in its bottom, a hollow base with which said opening communicates, a cigarette butt support rotatably mounted in said opening, a normally raised butt-pressing member movably mounted adjacent said butt support and adapted to be moved downwardly to force a butt against said support to thereby extinguish the butt, and means for rotating said support when the pressing member is again raised, thereby depositing the extinguished butt in the hollow base.

1,573,679. PARAFFIN CLEANER. ARTHUR SMITH CROSBY, Mariand, Okla., assignor of two-thirds to American Iron & Machine Works, Inc., Tonkawa, Okla., a Corporation of Oklahoma. Filed Sept. 30, 1924. Serial No. 740,782. 4 Claims. (Cl. 166—18.)



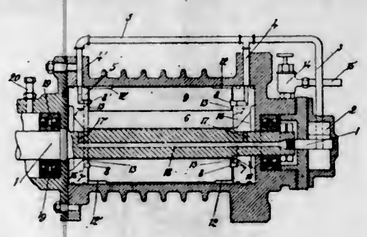
4. A scraper for a tubing or casing of an oil well comprising an elongated member provided with attaching means and having an opening therethrough, the bottom wall of said opening being substantially at right angles to the longitudinal axis of the member, the top wall having its end portions reversely beveled, scraping wings arranged at opposite sides of the member and provided with inwardly disposed arms extending with the opening, and means for pivotally connecting the inserted end portions of said arms with the member for free swinging movement, said scraping wings being substantially semicircular in form and substantially surrounding the elongated member when in their lowermost positions.

1,573,680. AGGLOMERATING MACHINE. PIERRE ANSELME IGNACE CUVELIER, Haubourdin, France. Filed Feb. 29, 1924. Serial No. 696,027. 21 Claims. (Cl. 25—41.)



1. An agglomerating machine comprising in combination a mould, means for delivering a charge of material to said mould, means for imparting a jigging motion to said mould and means for ramming said material in said mould, all said means being actuated by compressed air.

1,573,681. TROCAR. JORGE GASC DAIREAUX, Buenos Aires, Argentina. Filed June 18, 1924. Serial No. 720,803. 1 Claim. (Cl. 128—347.)



An instrument for making punctures in bound animals, comprising a handle provided at one end with an enlargement having a flat face at right angles to the longitudinal axis of the handle, and a cutting blade secured thereto projecting centrally from the face of the enlargement and in line with the handle, said blade being curved transversely and having its edges gradually inclined to form a pointed end, said edges being sharpened to form cutting edges extending throughout their length, whereby the flat face of the enlargement of the handle forms a stop to limit the puncture and provision is made for making a curved incision which is greater than a semicircle and facilitates closing of the wound.

1,573,682. GRATE. FRANCIS DE GRUCHY, Newark, N. J. Filed May 10, 1924. Serial No. 712,386. 1 Claim. (Cl. 110—40.)

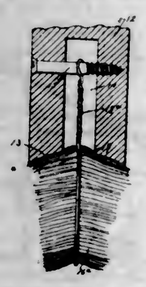
In combination with the grate bar of a stoker grate, a plurality of grate sections arranged side by side, means for removably securing said sections to said grate bar, each grate section including a head and a longitudinal web depending centrally therefrom, the web of one grate section co-acting with the web of the next adjacent grate section to define pockets, vertical slots diametrically arranged on the side faces of said head, the upper and lower walls of said slots being bevelled in opposite directions the slots of one grate section co-acting with the slots of the next adjacent grate sections to define openings in communication with said pockets and the upper surface of the grate sections, and grooves formed in the upper face of the head and leading from the upper bevelled walls of said slots toward the center but terminating short thereof substantially as and for the purpose specified.

1,573,683. ROTARY PUMP. EUGÈNE ARSÈNE DIFFINGER, Paris, France, assignor of one-half to Etablissements P. Colombier Fils, Paris, France. Filed Jan. 30, 1924. Serial No. 689,488. 5 Claims. (Cl. 230—30.)

1. In a rotary pump, a cylinder, a rotor therein, and blades formed of a plurality of joined plates reduced at their opposite ends to provide channels extending to the outer edge of the blades, said edge being recessed at each end to communicate with said channel.

1,573,684. SEALABLE PACKAGE TIE. JOHN L. DINSMOOR, New York, N. Y. Filed Sept. 18, 1924. Serial No. 738,342. 4 Claims. (Cl. 24—30.5.)

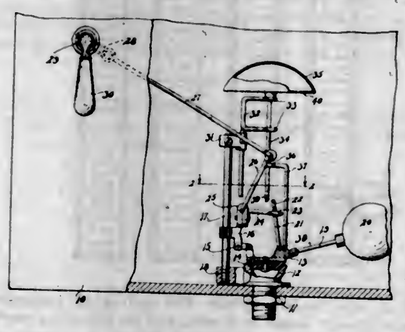
1. A sealable package tie including in combination a flexible annulet adapted for encircling a package, an eye formed therein by twisting a bight thereof, said annulet being adapted for being drawn taut about the package by said twisting, and means passing through said eye and about a single portion of said annulet for sealing the tie.



1,573,685. SEALABLE PACKAGE TIE. JOHN L. DINSMOOR, New York, N. Y. Filed Sept. 20, 1924. Serial No. 738,748. 3 Claims. (Cl. 24—30.5.)

1. A sealable package tie including in combination a flexible member having an eye formed in each end thereof, said member being adapted for encircling a package and being drawn taut thereabout by twisting together the portions thereof adjacent said eyes, and sealing means comprising a strip of material passed through said eyes and about a single portion of said member and means for sealing the strip of material.

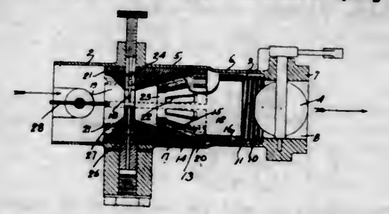
1,573,686. METHOD OF MAKING MOPS. PETER C. DONAHUE, Cambridge, Mass. Filed Dec. 8, 1924. Serial No. 754,627. 2 Claims. (Cl. 300—21.)



1. The herein described method of making a mop which comprises providing a handle having at one end a recessed seat and a bore opening into the seat, providing a ligature of an elongated loop form, expanding the loop at one end, inserting a mass of filaments in said expanded portion of the loop fixedly securing the unexpanded end of the loop in the handle bore, and rotating the mass of filaments relative to the handle to intertwist the members of the loop and bind the filaments on the seat.

1,573,687. MALT SIRUP AND PROCESS OF PREPARING THE SAME. HARRY E. DUBIN, New York, N. Y., assignor to Herman A. Metz, New York, N. Y. Filed Apr. 16, 1923. Serial No. 632,535. 7 Claims. (Cl. 195—24.)

1. Process which comprises subjecting wort containing diastase to a mild treatment with a solid adsorbent decolorizing agent sufficient to decolorise the wort but insufficient to substantially reduce its enzyme activity.

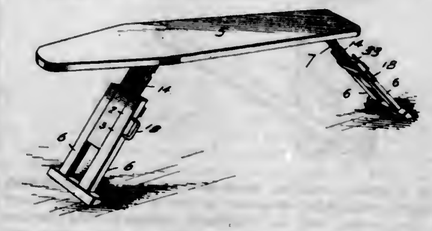


1,573,688. VALVE. ALBERT DUMONT, Maple City, Mich. Filed Feb. 4, 1925. Serial No. 6,840. 2 Claims. (Cl. 4—63.)

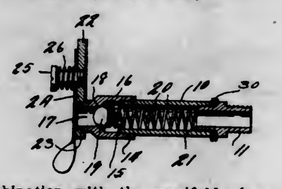
1. The combination with a container having a discharge outlet, a normally closed valve for controlling the outlet, manually operated means to open the valve, a vertically movable stem, a guide for the stem, a float carried by the stem and a link having one end pivotally connected to the valve and its opposite end slidingly connected with said stem to open the valve when liquid within the container reaches a predetermined level.

1,573,689. CARBURETOR. PAUL ALEXANDER DUMARESE, Milford, Conn. Filed Sept. 19, 1921. Serial No. 501,628. 1 Claim. (Cl. 261—63.)

A carburetor, comprising a casing, a venturi positioned in the casing formed with a tapering bore merging into a cylindrical inner slotted end, the slots in said slotted end merging into passage-ways extending to the opposite end of the venturi, a cone coacting with said venturi formed with a foraminous tapering section adapted to engage the walls of said tapering bore, a solid cylindrical section normally fitting into said cylindrical inner end and closing said slots, and a central bore extending entirely through the cone, a spring for normally holding the cone so that the tapering section is engaging the walls of said tapering bore, and means for supplying fuel to the point of smallest diameter of the venturi.

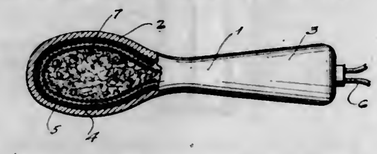


1,573,690. AIR MOISTENER. CHARLES EMMETT EDWARDS, Galion, Ohio. Filed Sept. 19, 1921. Serial No. 501,590. 5 Claims. (Cl. 261—121.)



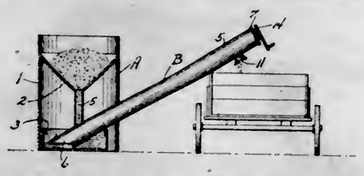
1. A device of the character described including a bracket having a head provided with an outlet passage, a container, an air intake fitting carried by the container for supplying air thereto, a clamping band surrounding the container coacting with said fitting for securing the fitting upon the container, and means supporting the container to sustain said fitting coacting with the head, the container being in communication with said passage.

1,573,691. IRONING BOARD. SIMON EICHBERG, Chicago, Ill. Filed June 11, 1925. Serial No. 36,411. 2 Claims. (Cl. 68—10.)



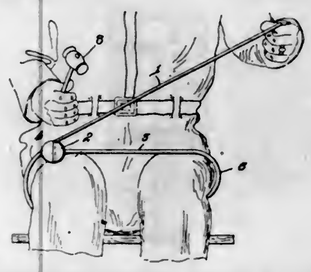
1. An ironing board comprising a body, legs hingedly connected thereto and consisting of upper sections having tongues and lower sections of U-shaped formation having sides positioned at opposite edges of said upper sections and being formed with grooves slidably receiving said tongues, said tongues being notched, U-shaped locking devices carried by said U-shaped sections and adapted to be extended into said notches of said tongues to hold the sections in adjusted positions, the bight portions of said lower sections being extended beyond the sides of the lower sections to provide supporting bases.

1,573,692. AUXILIARY AIR CONTROL FOR INTERNAL-COMBUSTION ENGINES. ELMER A. EKLUND, Spencer, S. Dak. Filed July 21, 1925. Serial No. 45,115. 1 Claim. (Cl. 277—24.)



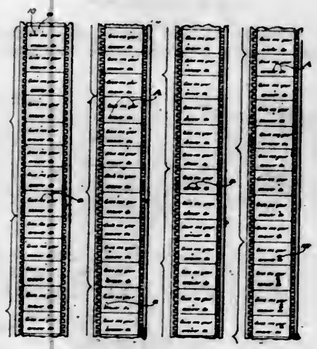
The combination with the manifold of an engine, of an air valve casing connected to the manifold, a valve therein opening upon suction within the manifold, a spring normally holding the valve closed, manually operable means for controlling the amount of air passing through said valve including a plate having an inlet opening leading to the valve, a blade-like valve oscillatably mounted upon the plate, and a spring urging said blade-like valve against the plate, said blade-like valve being formed at one end with a finger hold and at its opposite end with a pointer, the face of the plate being formed with a scale over which said pointer moves.

1,573,693. ELECTRIC FACIAL DEVICE. GEORGE E. ENGSTROM, Deerfield, Ill. Filed Apr. 23, 1923. Serial No. 654,065. 3 Claims. (Cl. 128—254.)



1. An electrical device for facial massage or heat treatment having absorbent properties shaped to provide a body portion having a curved surface, a handle for the body and an electrical heating coil arranged within the body around the entire inner surface in close proximity to the wall thereof to provide uniform heating of the body.

1,573,694. GRAIN PICKLER AND LOADER. ALFRED ESPESETH, Prospy, Alberta, Canada. Filed Feb. 21, 1924. Serial No. 694,404. 4 Claims. (Cl. 83—28.)



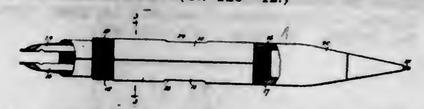
1. A grain treating mechanism comprising a casing, a liquid containing reservoir mounted in the lower end of the casing and an angularly disposed tube having one end extending through one side of the casing and projecting into the receptacle and provided with an opening adjacent its inner end, such inner end of the tube being disposed in close proximity to the bottom of the receptacle and having its under face cut away whereby an unrestricted inlet will be provided, and a grain receiving hopper supported in the casing, a discharge tube leading therefrom, and communicating with the opening in the first mentioned tube, and a conveyor means mounted in the first mentioned tube for conveying the grain to a point remote from the casing after the latter has passed into the lower end of such tube.

1,573,695. MUSICAL INSTRUMENT. CLARENCE M. FIELDS and WALTER WORRICK, Bellefontaine, Ohio. Filed Jan. 31, 1925. Serial No. 6,095. 2 Claims. (Cl. 84—403.)

1. A musical device, comprising a supporting part having curved ends for engaging the legs of the user when the supporting part is set in the lap of the user, a base connected with the supporting part and a blade member having one end connected with the base.

1,573,696. SONG-MOTION-PICTURE FILM. MAX FLEISCHER, Brooklyn, N. Y., assignor to Out of The Inkwell Films, Inc., New York, N. Y., a Corporation of New York. Filed June 4, 1925. Serial No. 34,990. 10 Claims. (Cl. 88—19.5.)

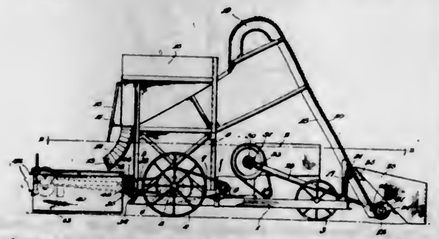
1. A song motion picture film having on successive frames thereof words of a song, and an indicating mark, said mark occupying, in certain frames of a group of frames, various lateral positions along said words, and positions indicating a recession and approach of the mark from and to the line of the words.



1,573,697. DENATURED ALCOHOL. HENRY C. FULLER, Washington, D. C. Filed June 6, 1921. Serial No. 475,478. 8 Claims. (Cl. 195—6.)

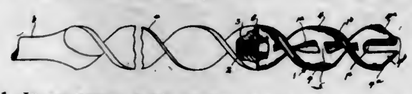
1. Denatured alcohol comprising ethyl alcohol and a halogen containing ester of glycerine.

1,573,698. DENATURED ALCOHOL. HENRY C. FULLER, Washington, D. C., assignor to Union Carbide and Carbon Research Laboratories, Inc., Long Island City, N. Y., a Corporation of New York. Filed June 21, 1922. Serial No. 569,951. 4 Claims. (Cl. 195—6.)



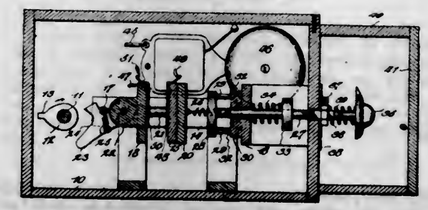
1. Denatured ethyl alcohol comprising ethyl alcohol and a halogen fatty acid ester of a polyhydric alcohol.

1,573,699. FOUNTAIN PEN. WILLIAM J. GIOVANNETTI, Brooklyn, N. Y. Filed Mar. 31, 1925. Serial No. 19,660. 4 Claims. (Cl. 120—42.)



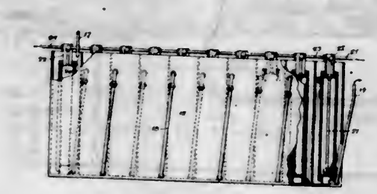
1. A fountain pen, which comprises a plurality of separate independent semi-circular sections each having a pen and a reservoir, and means permitting the slidable engagement of one section with the other to form a complete circular whole.

1,573,700. MACHINE FOR USE IN REPAIRING ROADS. EDWARD C. GLEDHILL, Galion, Ohio. Filed Feb. 21, 1924. Serial No. 694,423. 6 Claims. (Cl. 94—44.)



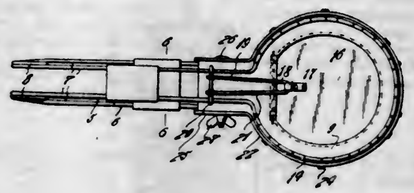
1. An apparatus for the purpose set forth comprising a truck, a bin mounted on the truck, a gage box carried by the truck below and in rear of the bin, transversely shiftable means for effecting spreading discharge of material from the bin into the gage box, a hopper supported upon the front side of the truck, and means for effecting upward travel of the hopper and dumping of the same to discharge material therein into the bin.

1,573,701. AUGER BIT. WILLIAM HENRY GOWDRIDGE, Rossiter, Pa. Filed Dec. 3, 1923. Serial No. 678,306. 2 Claims. (Cl. 255—69.)



1. In an auger, a bit portion, and a tip member detachably secured to the end of the bit portion, said tip member being provided with openings between the convolutions thereof.

1,573,702. CIRCUIT CLOSER. JAMES JOSEPH GRAMMA, New York, N. Y. Filed Jan. 17, 1921. Serial No. 437,860. 1 Claim. (Cl. 200—52.)

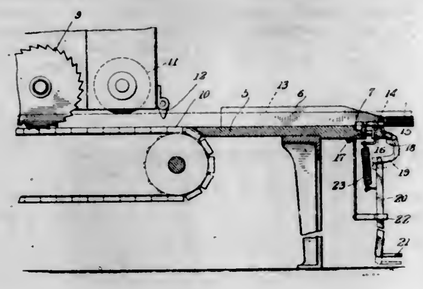


A device of the class described comprising a cam mounted on the shaft of an automobile, a frame, a carriage mounted on said frame and slidable thereon, a trigger mounted on said carriage and operable by said cam, a contact mounted on said carriage, a stationary contact mounted on said frame, a collar mounted on said frame and a manipulative member including a plurality of pins for co-action with a plurality of apertures provided in the collar whereby the contacts are rendered operative and inoperative upon tripping of said trigger.

1,573,703. RECOVERY OF CAUSTIC HYDROXIDES FROM WASTE SOLUTIONS. FRANK H. GRIFFIN, Wawa, Pa., assignor to The Viscose Company, Marcus Hook, Pa., a Corporation of Pennsylvania. Filed June 27, 1923. Serial No. 648,032. 10 Claims. (Cl. 23—252.)

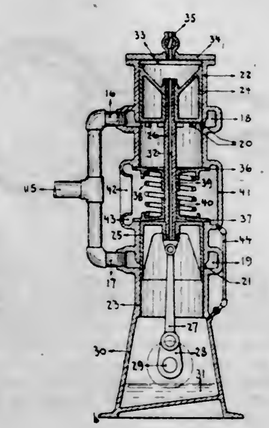
1. Dialytic apparatus, comprising a series of compartments, means for flowing a solvent therethrough in one direction in series, in combination with a corresponding series of dialytic cells arranged in said compartments, and means for flowing the impure solution therethrough counter-current to the solvent, said cells having associated means for compensating the varying specific gravity of the impure solution as it passes through the series of cells.

1,573,704. TRAP. JOHN H. GROVE, Cascade Locks, Oreg. Filed Nov. 10, 1924. Serial No. 748,979. 3 Claims. (Cl. 43—81.)



1. A trap comprising a pair of opposed spring urged jaws, a plate carried by the bottom-most jaw, and having an opening therein, a pivoted platform normally closing the opening and adapted to move into an animal burrow, a catch carried by the platform, a pivoted trigger carried by the other jaw and adapted to engage the plate and catch whereby to hold the jaws in open position, the pivotal movement of the platform permitting the jaws to move into gripping relation.

1,573,705. EDGING GAUGE. ANDREW C. HAUCK, Brooklyn, N. Y., assignor to Williamsburg Wood Heel Company, Brooklyn, N. Y., a Corporation of New York. Filed July 10, 1923. Serial No. 650,595. 3 Claims. (Cl. 143—168.)



1. The combination with a saw and means for feeding the work in a straight line past said saw, of a front edge gauge positioned substantially on the line of the saw cut and located closely adjacent the automatic feeding means and an automatically disappearing gauge for prelimina-

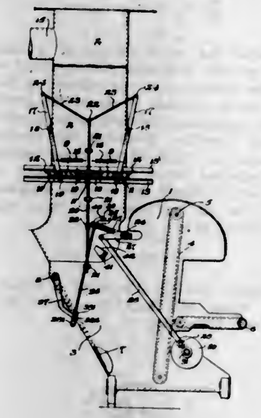
rily positioning the rear edge of the work, said rear edge gauge being located at a point removed from the feeding means and provided both with means for automatically retracting the same out of the plane of the work and with means for momentarily projecting the same into gauging position, whereby upon the operation of said

mechanism, a board to be edged may be positioned at both ends against said gauges before entering the grip of the feeding means and on release of said projecting mechanism, the rear edge gauge will automatically retract out of the path of the board so as not to interfere with the straight passage of the board in the grip of the feeding means.

1,573,706. LUBRICATION SYSTEM. OTTO HAENTJENS, Hazleton, Pa. Filed July 14, 1925. Serial No. 43,582. 6 Claims. (Cl. 184—18.)

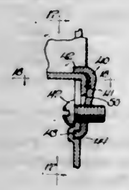
6. A cylinder closed at one end, a piston working in said cylinder, a crank case, a piston rod having a passage opening therethrough from the crank case to the chamber between the closed end of the cylinder and the piston, a regulating valve in said closed end for varying the depression in said chamber incident to the operation of the piston, and lubricant in the crank case passing through the piston rod to said chamber under the influence of such depression.

1,573,707. STEEL GOLF-CLUB SHAFT. WILLIAM FERDINAND HOERLE, Torrington, Conn., assignor to Union Hardware Company, Torrington, Conn., a Corporation of Connecticut. Filed Nov. 18, 1924. Serial No. 750,516. 4 Claims. (Cl. 273—80.)



2. A torsionable seamless tubular golf club shaft formed of low carbon steel rolled longitudinally, carbonized to increase carbon content at the surface, heat treated and tempered.

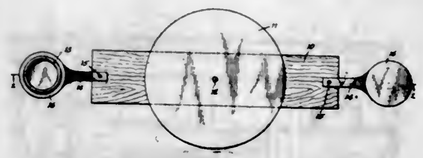
1,573,708. MANUFACTURE OF GOLF-CLUB SHAFTS. WILLIAM FERDINAND HOERLE, Torrington, Conn., assignor to Union Hardware Company, Torrington, Conn., a Corporation of Connecticut. Original application filed Nov. 18, 1924, Serial No. 750,516. Divided and this application filed July 2, 1925. Serial No. 41,229. 9 Claims. (Cl. 148—12.)



1. The process of forming a golf club shaft which comprises working and tapering a seamless steel tube having a carbon content of .10 to .40 percentum, carbonizing the tapered tube to increase the carbon content to about six tenths to one percentum, then heat treating, hardening and tempering said tube.

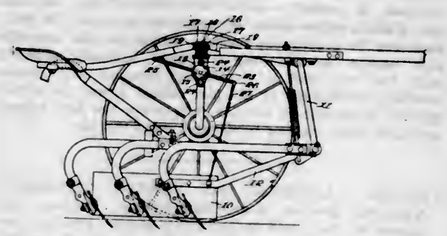
1,573,709. SUPPLY-CONTROLLING MEANS FOR TEXTILE-PREPARING MACHINERY. AUGUSTINE F. HORMAN, Andover, Mass. Filed Sept. 6, 1923. Serial No. 661,179. 8 Claims. (Cl. 19—69.)

2. Supply-controlling means for textile preparing machinery comprising, in combination with a hopper in connection with said machinery and a trunk supplying fibrous material to the said hopper, a cut-off normally occupying a position in which such material is arrested within said trunk, an actuating rod operatively combined with the cut-off, an actuating member, and means governed by the quantity of fibrous material within the hopper to bring about engagement between said member and the actuating rod to actuate the latter so as to open the cut-off and thereby release the arrested material.



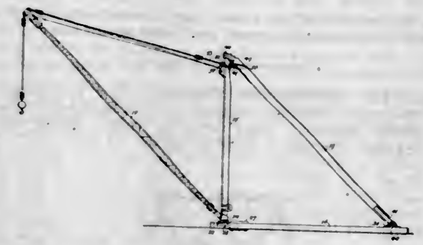
1,573,710. ELECTRICAL SWITCH INCLOSURE OR CABINET. BRYSON D. HORTON, Detroit, Mich., assignor to Square D Company, Detroit, Mich., a Corporation of Michigan. Filed June 16, 1922. Serial No. 568,877. 14 Claims. (Cl. 247—1.)

1. In a device of the character described, in combination, a U-shaped trough, the wall of a switch inclosure comprising, a U-shaped trough knock-out, an indenture extending into the side of said wall from the edge of said U-shaped knock-out, and means extending through said indenture which serves to fasten said trough to said wall.



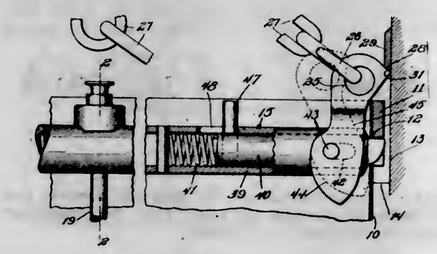
1,573,711. GAME. LOUIS CHÉRIE HOULE, West Pittsburgh, Pa. Filed Oct. 14, 1925. Serial No. 62,462. 2 Claims. (Cl. 273—100.)

1. A game apparatus including a base plate, a platform member of greater width than the base plate, arranged centrally thereon, a stake rising from the center of the platform member, spring fingers having their ends fixed to the ends of the base plate, said fingers including enlarged free extremities for supporting annular



projectile members whereby the projectile members may be catapulted toward the stake when the fingers are manually depressed and released.

1,573,712. FENDER CONTROL. ARTHUR L. HUNT, Ravenwood, Mo. Filed Nov. 8, 1924. Serial No. 748,728. 2 Claims. (Cl. 97—188.)

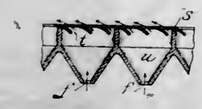


1. The combination with a cultivator and fenders adjustably secured thereto, of an adjusting rod, means connecting said rod and fenders, a substantially U-shaped bracket, means whereby the bracket may be secured to the cultivator, opposed pivotally movable bearing blocks carried by the bracket for engagement with the rod, means to releasably clamp the blocks in engagement with the rod to adjust the rod longitudinally and means providing an engagement between the bracket and blocks whereby the latter may be moved pivotally to regulate the position of the fenders.

1,573,713. DERRICK. FAY HUNT, New York, N. Y. Filed Feb. 21, 1925. Serial No. 10,912. 8 Claims. (Cl. 217—58.)

1. In a derrick, sills at an angle to each other, means to support a mast adjacent the convergent ends of the sills, and pintles adjacent the convergent ends of the sills and disposed in pairs to permit of engaging the sills with various ones of the pintles for disposing the sills in various positions about the mast supporting means.

1,573,714. ICE-MAKING APPARATUS. ARTHUR H. HUTCHINSON, Atlanta, Ga. Filed Apr. 19, 1924. Serial No. 707,687. 9 Claims. (Cl. 62—157.)

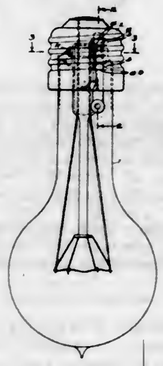


1. In refrigerating apparatus, the combination with a water can adapted to be partially submerged in cooling fluid in a walled compartment, of a bar extending transversely of the can having withdrawable means engaging the can to prevent relative movement of the can and bar, withdrawable means engaging the walls of the compartment to prevent upward movement of the bar, the first named means being normally partially engaged with the can, and a connection between said means whereby withdrawal of the last named means to permit upward movement of the bar fully seats the first named means so that the can is elevated with the bar.

1,573,715. ADDITION TO SEWING THIMBLES. CHARLES EDWARD ILES, Birmingham, England, assignor of one-fourth to Frederick Henry Amsden, one-fourth to Llewellyn Charles Hoy, both of London, England, and one-fourth to Thomas Frederick Thirlby, Birmingham, England; Emily Anne Iles and Charles Edward Iles executors of said Charles Edward Iles, deceased. Filed Mar. 7, 1925. Serial No. 13,875. 3 Claims. (Cl. 223—36.)

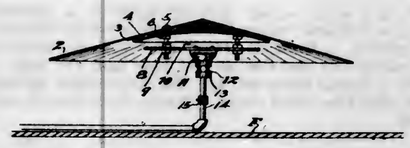
2. A thimble having its outer side formed with a flattened portion, and a needle threader pivoted adjacent to the open end of the thimble and rotatable for engagement with the said flattened part when not in use.

1,573,716. SUSPENSION VESSEL. ISAK ISAACHSEN, Christiania, Norway, assignor to A/S Krystal, Christiania, Norway. Filed July 3, 1924. Serial No. 724,156. 5 Claims. (Cl. 23—273.)



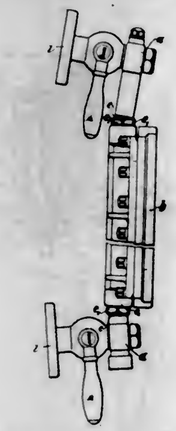
1. Suspension vessel of the kind wherein a layer of material located above a perforated bottom within the vessel is maintained in suspension in a liquid passing through the perforations of the said bottom, characterized by this that through the bottom at least one vertical section showing more than two perforations can be laid and further that the ratio of cross sectional areas S/F is less than

$$\frac{1}{5-\frac{b}{1}+\frac{a-3}{7}}$$



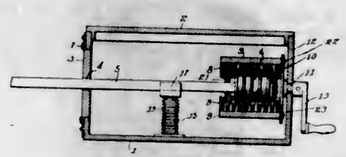
wherein S means the cross section of a hole with a circular cross section and with well rounded edges and having the same resistance to the current as the perforations of the bottom, further F means the greatest cross section of the suspension compartment perpendicularly to the current direction, b means the average width, 1 means the average length of the cross sections of the perforations measured where the latter have their least cross section, and a means the average distance between these perforations in cm. measured from longitudinal axis to longitudinal axis.

1,573,717. LAMP LOCK. CHARLES KILLARS, Stonington, Conn. Filed Aug. 5, 1922. Serial No. 579,921. 8 Claims. (Cl. 176—31.)



1. A lock for incandescent lamps, comprising a lamp shell, a transversely positioned sharp spur normally projecting from the wall of the shell, and a longitudinally movable bar having means normally holding the spur in projected position and having means engaging the filament terminal of the lamp to sever said filament when partially withdrawn to release the spur.

1,573,718. GAS BROODER. FRANK R. KIMBLE, Van Nuys, Calif. Filed Aug. 24, 1925. Serial No. 52,067. 5 Claims. (Cl. 119—32.)



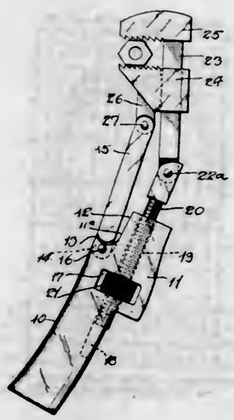
1. A chicken brooder including a hood, a crown spaced under the center of the hood, and a burner on which the crown is supported and from which gas for combustion is delivered up against the crown.

1,573,719. WATER-LEVEL INDICATOR. RICHARD KLINGER, Gumpoldskirchen, Austria, assignor to the Firm of Rich. Klinger Ges. m. b. H., Gumpoldskirchen, Austria, a Corporation of Austria. Filed Oct. 26, 1922. Serial No. 597,225. 2 Claims. (Cl. 73—54.)

2. A water level indicator comprising a sight glass member having sockets in its ends, each socket being formed with a spherical seat, a pair of cock shells for attaching the indicator to a boiler, each shell having a nipple projecting into one of the sockets of said member and formed with a terminal peripherally projecting flange having spherically constructed upper and lower surfaces complemental with the seat of such socket, and means for forcing the flange of each nipple towards its seat to produce a fluid-tight joint.

1,573,720. PLUNGER CLEANING DEVICE. EDWARD CHESTER LAMPSON, Jefferson, Ohio. Filed Feb. 4, 1924. Serial No. 690,593. 4 Claims. (Cl. 15—21.)

1. A plunger cleaning device, which includes a dustproof casing having an apertured removable end portion through which the shaft of a plunger is adapted to extend, a rotatable brush-supporting frame mounted on the opposite end of the casing and adapted to engage with the head of the plunger, means for rotating said brush-supporting frame exterior of the casing, and a saddle resiliently supported within the casing and adapted to support the shaft of the plunger intermediate the head and the removable end portion.

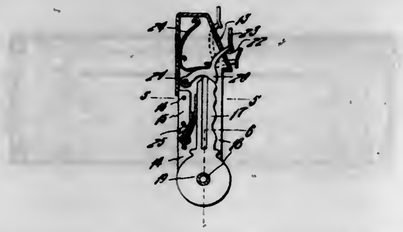


1,573,721. COLLAPSIBLE BAG. CHARLES H. LOEFFLER, Brooklyn, N. Y. Filed Aug. 24, 1925. Serial No. 52,246. 3 Claims. (Cl. 150—49.)

1. A collapsible device of the character described, including a body having a flexible wall, upper and lower frames secured to the body, two pairs of pivoted links located at opposite sides of the body connecting the frames and located in vertical alinement when holding the device expanded, a coil spring connecting the links of the respective pairs and exerting pressure in a direction to pivot the links and collapse the device, laterally movable catches on one of the frames normally

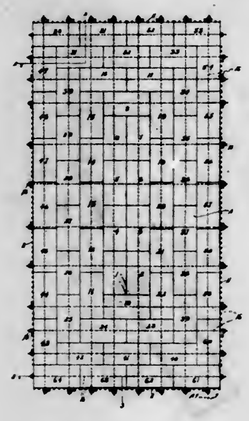
engaging the links and holding them against movement by the springs, and said catches adapted to be manually moved laterally to release the links and allow the springs to collapse the device.

1,573,722. MONKEY WRENCH. HENRY A. LOGAN, Cedar Grove, La., assignor of one-fourth to Mack D. Logan, Shreveport, La. Filed May 28, 1925. Serial No. 33,524. 3 Claims. (Cl. 81—91.)



1. A wrench of the character described comprising a handle, a screw-threaded rod having longitudinal movement within the handle, a nut engaging the rod and the handle whereby the rod may be shifted longitudinally relative to the handle, a jaw shank pivotally connected to the rod and carrying a jaw at its outer end, a sliding jaw mounted upon the shank and shiftable longitudinally thereon, a link pivotally connected to the handle and to the sliding jaw whereby when the jaws grasp an object and the handle is shifted in one direction the handle and jaw shank will take an angular relation and cause the jaws to move relatively toward each other and means for limiting the movement of the link toward the handle and into parallel relation therewith.

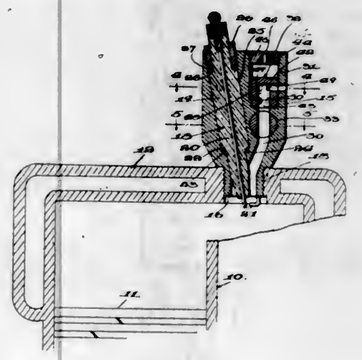
1,573,723. KEY HOLDER. LOUIS LONG, Parsons, Kans. Filed Feb. 19, 1925. Serial No. 10,433. 6 Claims. (Cl. 59—96.)



2. A key holder comprising a container adapted to receive a plurality of keys, means for securing one end of

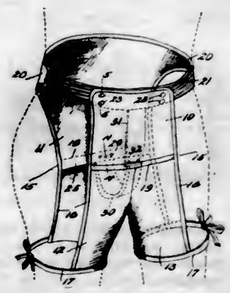
the keys within the container, releasable means engaging the keys for retaining the other ends of the keys within the container and indicia carrying means upon the out-

side of the container for operating the key retaining means and means for ejecting one end of the keys when the retaining means is released.



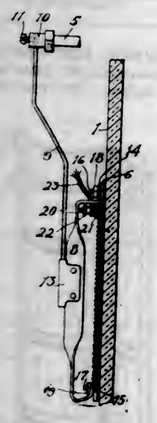
1,573,724. FLOOR CONSTRUCTION. CLAUDE MORRIS LOWE, LINCOLN ROSS LOWE, and CECIL WAYNE LOWE, Kansas City, Mo. Filed Apr. 16, 1924. Serial No. 706,967. 1 Claim. (Cl. 20—8.)

A floor structure of the class described comprising a plurality of sections, each consisting of a number of joists and flooring connected with the same, some of the joists having tongues formed on the ends of the joists and other sections having recesses formed in the ends of the joists for receiving the tongues so that the sections can be locked together.



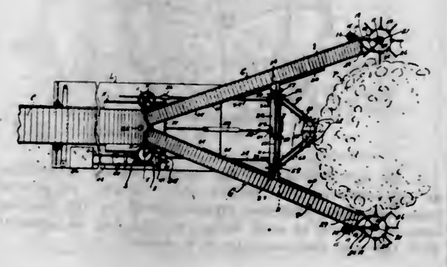
1,573,725. TIRE-INFLATING DEVICE. JOHN FRANKLIN MACDONALD, Hillsboro, New Brunswick, Canada. Filed July 30, 1924. Serial No. 729,166. 2 Claims. (Cl. 123—198.)

1. In a tire inflater of the character described, in combination with an engine having a cylinder and a piston operating therein, a casing mounted on the cylinder, said casing having a passage communicating with the interior of the cylinder, means for controlling communication of said passage with said cylinder, said casing having a valve chamber communicating with the cylinder when said passage is open, said casing having an intake port leading from the atmosphere into the valve chamber, said casing also having an outlet port leading from said valve chamber, a pressure operated piston valve fitted in the valve chamber and having ports therein alternately cooperatable with the intake and outlet ports of the casing under the influence of the



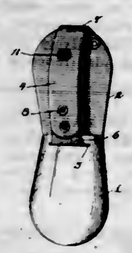
piston of the cylinder, cooperating means between the piston valve and the casing for constraining the piston valve to rectilinear movement, and a vented plug threaded into the casing and affording a stop for one end of said piston valve.

1,573,726. SANITARY PROTECTOR. BARNETT MADOFF, Scranton, Pa. Filed Oct. 24, 1924. Serial No. 745,678. 1 Claim. (Cl. 128—287.)



A form fitting protector of the class described comprising in combination front and rear body fitting portions and right and left leg fitting portions, the leg fitting portions being secured together by means of a single seam which follows the contour of the crotch and each such portion being secured to both front and rear body portions by seams running transverse to the crotch seam the lower edge of the rear body fitting portion being doubled back so that a transverse loop of cloth depends from the rear transverse seam for the convenient attachment of a sanitary napkin, belt means connecting the tops of the front and rear body fitting portions and a leg encircling means associated with each of the leg fitting portions.

1,573,727. HEATING DEVICE FOR AUTOMOBILE WINDSHIELDS. WARREN C. MAGRANIS, Northampton, and FRED G. CHASE, Mittineague, Mass. Filed May 2, 1925. Serial No. 27,482. 3 Claims. (Cl. 219—19.)

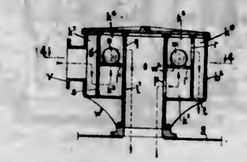


1. The combination, in a heating device of the class described, with a spindle, of a radially perforated coupling mounted on the front end of said spindle, and provided with a radial screw to bind said coupling to said spindle, an arm having one terminal inserted in the perforation in said coupling, the latter also being provided with a screw to bind said arm thereto, a frame secured to said arm, a heating-unit secured to said frame, and an electrical conductor connected with said heating-unit.

1,573,728. LOADING APPARATUS. JOHN E. MANNING, Beckley, W. Va. Filed Nov. 28, 1923, Serial No. 677,444. Renewed July 16, 1925. 8 claims. (Cl. 198—9.)

1. A loading mechanism comprising a main conveyor, gathering conveyors discharging thereon, means for supporting said gathering conveyors for lateral movement one relative to the other, and gathering means positioned between the conveyors and discharging thereon.

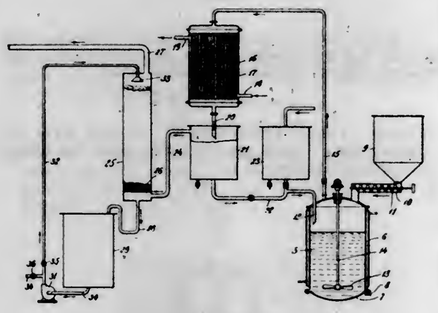
1,573,729. SHOEHORN. HARRY MARTIN, New York, N. Y. Filed Mar. 10, 1925. Serial No. 14,490. 5 Claims. (Cl. 132—7.)



5. A shoe horn, comprising a rigid foot receiving member, and a flexible handle member connected thereto, said members adapted to fold one upon the other.

1,573,730. VALVE ATTACHMENT. HUBERT MAYS, Okmulgee, Okla. Filed Apr. 18, 1925. Serial No. 24,176. 1 Claim. (Cl. 152—20.)

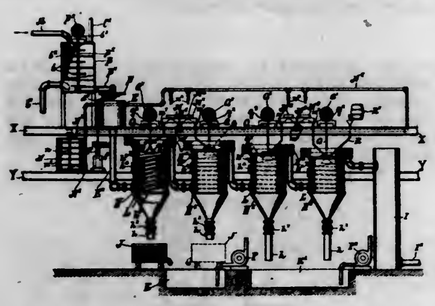
A pad for preventing entrance of moisture through the valve stem hold of a rim of a pneumatic tire, including a cone shaped body, a flexible rectangular shaped base with an opening passing centrally through the pad to receive the valve stem, said pad being positioned to span the space between the beads of a tire.



1,573,731. RECEPTACLE CONTAINING VOLATILE OR INFLAMMABLE LIQUIDS SUCH AS BENZENE AND OTHER HYDROCARBONS. MARTINUS ADRIANUS MEIJER, The Hague, Netherlands, and RICHARD VOM FELD, Brunswick, Germany. Filed Aug. 15, 1924. Serial No. 732,325. 1 Claim. (Cl. 277—61.)

In a valve construction of the class specified, the combination with a container for highly volatile and combustible liquids, of an annular chamber divided into upper and lower portions and having a central pipe communicating respectively with the lower chamber and the upper chamber, the two chambers being provided with

valves and valve seats controlling communication between the said upper and lower chambers, the upper chamber also communicating with a supplemental chamber having an outlet and the lower chamber communicating with a supplemental chamber having an inlet, said supplementary chambers respectively permitting exit of gas from the container and admittance of gas thereto.

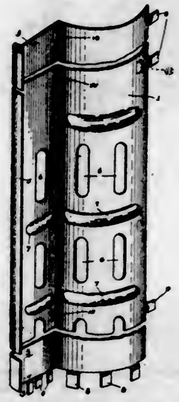


1,573,732. METHOD OF MAKING CALCIUM CYANIDE AND PRODUCT THEREOF. FLOYD J. METZGER, New York, N. Y., assignor to California Cyanide Company, Inc., New York, N. Y., a Corporation of Delaware. Filed Nov. 23, 1925. Serial No. 70,914. 42 Claims. (Cl. 23—79.)

1. The method of preparing cyanogen compounds of alkali forming metals, which comprises treating their carbides with hydrocyanic acid.

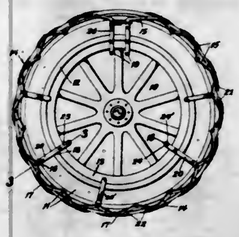
20. As an article of manufacture, a composition of matter containing more than fifty per cent of calcium cyanide.

1,573,733. PROCESS FOR CLARIFYING SACCHARINE LIQUORS. IRVING H. MORSE, New Orleans, La., assignor of one-fourth to Ernst R. Theriot, Ashton, La., and one-fourth to Demas Moresi, Jeanerette, La. Filed June 29, 1925. Serial No. 40,344. 9 Claims. (Cl. 127—46.)



1. The process of treating saccharine solutions which consists in imparting a swirling motion to a vertically ascending cylindrical column of the liquid, causing it to form a thin annular film, and in continuously spraying into this film while in motion a chemical reagent in solution.

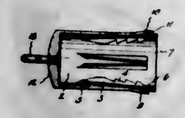
1,573,734. ARTICLE OF MANUFACTURE. ISAAC NAYLOR, San Francisco, Calif. Filed Oct. 23, 1923. Serial No. 670,343. 1 Claim. (Cl. 106—30.)



As a new article of manufacture a hard rigid, solid, fire-resisting, impervious, homogeneous, silicated wood substitute consisting of an inherently contracted and inherently solidified non-cracking dough-like mass of comminuted and silicated waste vegetable fibrous material.

1,573,735. CONCRETE REENFORCEMENT. GEORGE M. NELSON, Monterey, Calif. Filed May 5, 1924. Serial No. 711,075. 5 Claims. (Cl. 72—109.)

1. A concrete reenforcement comprising a series of interlocked arched metal plates, said plates being perforated and having means for interlocking along their edges to form a continuous corrugated structure.

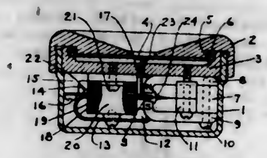


1,573,736. ANTISKID DEVICE. HERMAN NEUMANN, New York, N. Y. Filed Nov. 3, 1921. Serial No. 747,598. 3 Claims. (Cl. 152—14.)

1. An anti-skid device for vehicle wheels comprising an extensible member formed of a plurality of pivoted links, oppositely disposed straps carried by the meeting ends of certain of said links for clamping engagement with the tire, rim and felly of a wheel.

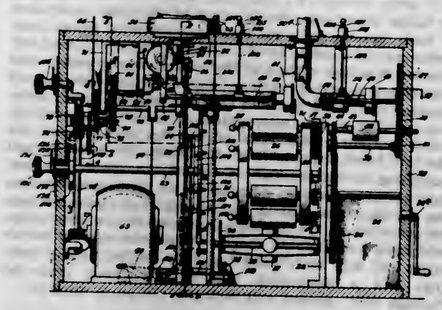
1,573,737. ROPE-END STOPPER. WILFRED G. NORMAN, New York, N. Y. Filed Apr. 6, 1925. Serial No. 21,161. 4 Claims. (Cl. 24—123.)

1. An attachment for rope ends comprising a cylindrical metal member adapted to receive a rope end, fingers cut from the metal member and extending longitudinally of the axis of said member, and teeth projecting inwardly from the side edges of the fingers, means adapted to receive the metal member and force the fingers and likewise the teeth into engagement with the rope end, and a



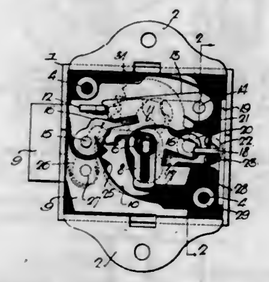
square shoulder on the receiving means for the metal member adapted to engage the free ends of the fingers to lock said vehicles and metal members from displacement of said means.

1,573,738. PREPARATION OF ORGANIC DERIVATIVES OF TIN. CARL OECHELIN, Paris, France, assignor to Etablissements Poulenc Freres, Paris, France. Filed Sept. 4, 1924. Serial No. 735,870. 8 Claims. (Cl. 260—11.)



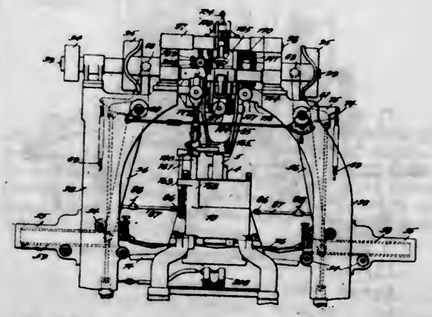
1. The process which comprises treating a chlorhydrin with stannous chloride in the presence of an alkali metal hydroxide.

1,573,739. TELEPHONIC DEVICE. JOHN HUGH O'NEILL, Springfield, Mo. Filed Oct. 2, 1922. Serial No. 591,895. 4 Claims. (Cl. 179—108.)



4. In an electro-magnetic telephonic device, an inflexible electro-magnet core armature with one end free to vibrate, the vibrating end supported by a flat spring, said spring straight in central position, and curved surfaces cooperating to progressively shorten the effective spring length as the spring is bent from the central position.

1,573,740. TELEGRAPHONE. JOHN C. PAPADOPOULOS, now by judicial change of name known as John Paulas, New York, N. Y. Filed July 10, 1923. Serial No. 650,621. 11 Claims. (Cl. 179—6.)

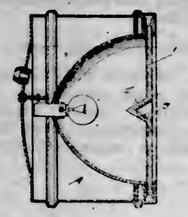


1. In a telegraphone of the type adapted to be connected with a subscriber's telephone set and having means for recording an incoming message and reproducing an outgoing message, a rotatable record, means to rotate said record, controlling means, means actuated by the signalling current of the telephone circuit to actuate said controlling means, and connections between the receiver hook of the telephone set and said controlling means to cause said receiver hook to be raised by the actuation of said controlling clamp adapted to be detachably engaged with said receiver hook.

1,573,741. LOCK. WILLIAM EARL PARENT, Philadelphia, Pa., assignor, by mesne assignments, to The Yale & Towne Manufacturing Company, Stamford, Conn., a Corporation of Connecticut. Filed May 25, 1922. Serial No. 563,637. 3 Claims. (Cl. 70—70.)

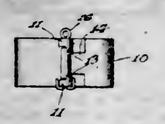
1. The combination in a lock, of a casing; a key post at the face of the lock; a bolt; means for engaging the bolt; a slotted tumbler pivoted to the bolt; a sliding stump mounted in the casing and arranged to be moved into alignment with the slot in the tumbler; a pawl for locking the stump in the position in which it is adjusted; and a key post at the back of the lock to receive a key for actuating the stump mechanism.

1,573,742. FEEDING MOLTEN GLASS. KARL E. PEILER, West Hartford, Conn., assignor to Hartford-Fairmont Company, Hartford, Conn., a Corporation of New York. Filed Nov. 25, 1925. Serial No. 71,369. 37 Claims. (Cl. 49—55.)



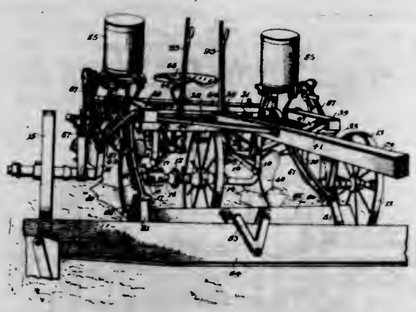
16. Apparatus for separating molten glass into mold charges, including a container for the glass having an outlet, severing means operating periodically beneath the outlet, means for timing the suspension of successive gathers of glass beneath the outlet in timed relation to the operation of the severing means, and means for varying the time of beginning of the suspension period relative to the time of severing.

1,573,743. LIGHT DEFLECTOR. BENJAMIN PORTER, Fullerton, N. Dak. Filed July 11, 1925. Serial No. 42,956. 1 Claim. (Cl. 240—48.4.)



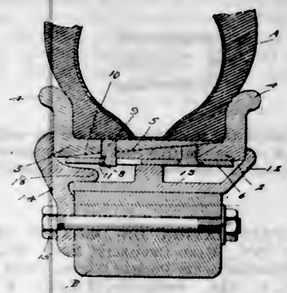
A lens for a headlamp having a number of inwardly extending ribs thereon arranged centrally of the lens,

each rib being of V shape in cross section with its outer faces coated with reflective material for preventing rays



of light from passing through the rib and reflecting to other parts of the lens above and below the central portion thereof.

1,573,744. LEG BAND. FRANK W. RHINES, Lamont, Iowa. Filed Feb. 26, 1925. Serial No. 11,806. 3 Claims. (Cl. 40—8.)



1. A leg band comprising a strap having transversely alined loops at one end, with the confronting edges of the loops cut away at the rear to form flanges in line with the forward sides of the loops, and having a head at the opposite end to fit between the said loops, said head having opposite end portions projecting to engage behind the flanges at the forward sides of the loops.

1,573,745. LISTER PLOW. TURNEY B. ROBERTS, Memphis, Tex. Filed Dec. 8, 1924. Serial No. 754,596. 3 Claims. (Cl. 97—82.)

1. In an implement of the character set forth, an inverted substantially U-shaped member having the ends of the sides thereof turned at right angles outwardly in alignment and constituting axles, a wheel on each axle, a second inverted substantially U-shaped member having the end of one leg turned outwardly to provide an axle, a wheel on said axle, a bearing upon the end of the other leg and in alignment with said last mentioned axle, a stub axle carried in said bearing, a universal connection between said stub axle and an axle of said first mentioned member, frame elements extending rearwardly from said members, trailer caster wheels carried by said frame elements, and a plow unit secured to and depending from each frame element and extending forwardly through the adjacent U-shaped member.

1,573,746. DEMOUNTABLE WHEEL RIM. LEO R. ROSENBAUM, Campbellsport, Wis. Filed Oct. 25, 1920. Serial No. 419,285. 1 Claim. (Cl. 301—35.)

In a tire rim, outer and inner sections disposed in overlapping relation, pins carried by the outer section, the inner section having slots accommodating said pins, the pins having surfaces inclined inwardly of the pins from the outer ends thereof, and hooks pivoted to the inner section and having portions inclined similarly to and engaging with the inclined surfaces of said pins.

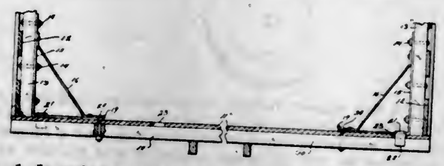
1,573,747. RENEWABLE MATCH BOOK. SIDNEY ROSENSTEIN, New York, N. Y. Filed Mar. 18, 1925. Serial No. 16,458. 1 Claim. (Cl. 206—29.)

A match book, comprising a strip of folded material, said strip having two fold lines whereby when the strip is folded the intermediate portion of the strip constitutes a back member and the two end portions front members, one of said front members being appreciably shorter than the other and the longer front member constituting a covering member, a strip of matches located between the back member and the shorter front member, a strip having match striking material thereon located in front of the strip of matches and between the shorter front member and the strip of matches and extending above the end of the shorter front member, said covering member adapted to be interposed between the match striking strip and the shorter covering member to enclose the matches and match striking strip, said back portion, said shorter front portion, said match strip, and said match striking strip having alined openings and a designedly removable fastener projected through said opening and securing the parts together.

1,573,748. PLACE CARD. SIDNEY ROSENSTEIN, New York, N. Y. Filed May 18, 1925. Serial No. 31,180. 1 Claim. (Cl. 206—29.)

A place card matchbook, including a strip of matches, a cover adapted to enclose the matches and also adapted to be opened to expose the matches, a pair of integral

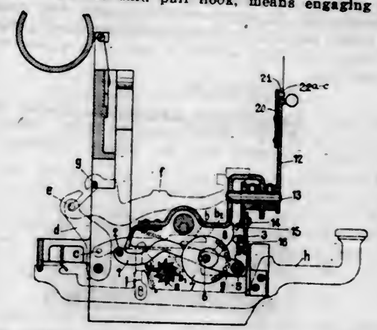
props projecting from the outer edges of the back portion of the cover, spaced from the edge of the cover, and foldable against the back of the cover or at right angles



thereto, and when in said last-named position cooperating with the lower edge of the matchbook to hold the matchbook in an inclined position when on a support.

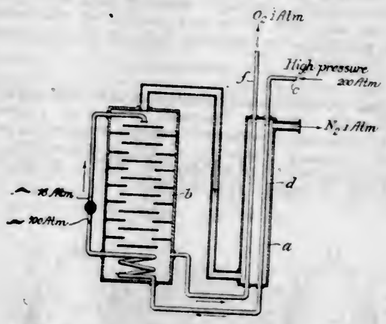
1,573,749. DENTAL APPLIANCE. JAMES H. ROSS, Jr., Chicago, Ill., assignor of one-half to William A. Ribbeck, Chicago, Ill. Filed Feb. 11, 1921. Serial No. 444,137. 1 Claim. (Cl. 128—239.)

A device of the class specified, comprising a member of tooth brush shape having a handle or shank portion, and also having a curved portion the concave face of which is provided with inwardly opening apertures adapted to form a spray, said member being provided with a longitudinally extending passage communicating with said apertures and opening at the end of said shank portion, and a flexible hose connected with the end of said shank portion and communicating with said longitudinally extending passage.



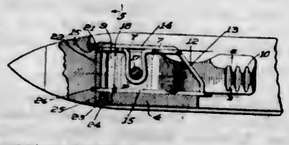
1,573,750. COMBINED HAYRACK AND HOGRACK. ARTHUR F. SCHREADER, Flandreau, S. Dak. Filed June 12, 1924. Serial No. 719,591. 2 Claims. (Cl. 296—12.)

1. In a hay rack having a floor, of upright walls for the hay rack, brackets detachably holding said walls to the floor, each of said brackets comprising an angularly bent iron to provide an upright portion and a horizontal portion, the horizontal and upright portions being connected by a diagonal brace, walls to which the vertical portions of the irons are connected and eye-bolts passing through the floor of the hay rack body, said floor being formed with slots adjacent the ends and inward of the ends, the horizontal portion of each bracket being formed adjacent the upright portion with a downwardly extending lug adapted to pass through said slots and at the extremity of the horizontal portion with an upwardly curved tongue adapted to engage in the eye of the corresponding eye-bolt.



1,573,751. POWER-OPERATED TYPEWRITER. MAX SCHULZE, Thuringen, Germany, assignor to Mercedes Büro-Maschinen- und Waffen-Werke, Benshausen, Thuringia, Germany. Filed Jan. 23, 1925. Serial No. 4,311. 9 Claims. (Cl. 197—17.)

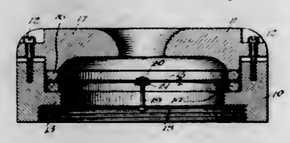
1. In a typewriter, a type bar, a key lever, a rotatable drive shaft, a pull hook linked to said type bar, an operative connection between said key lever and said pull hook, means on said pull hook for engaging said drive shaft upon the actuation of said key lever, a rotatable abutment cam for said pull hook, means engaging said



cam for retaining it in selective positions, said cam and said engaging means being held in operative relation by spring pressure.

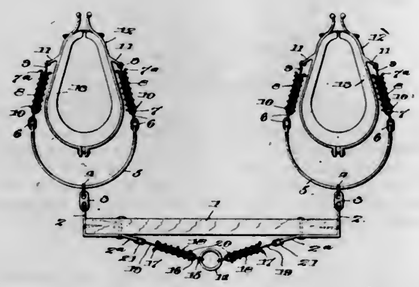
1,573,752. METHOD FOR LOW-TEMPERATURE COOLING, LIQUEFACTION, AND SEPARATION OF NOT EASILY CONDENSABLE GASES. ARTHUR SELIGMANN, Bremen, Germany. Filed Mar. 3, 1924. Serial No. 696,595. 3 Claims. (Cl. 183—115.)

1. Method of low temperature cooling, liquefaction and separation of gases by throttling which consists of inducing the major portion of the decrease of pressure by causing the gases to flow at relatively great velocity through pipes in which the decrease of pressure is consumed by friction of the gases occurring over the entire length of the walls of the pipes.



1,573,753. AUTOMATICALLY FILLING REPLENISHING SHUTTLE FOR LOOMS. WALLACE I. STIMPSON and HARRY A. DAVIS, Hopedale, Mass., assignors to Draper Corporation, Hopedale, Mass., a Corporation of Maine. Filed Oct. 6, 1925. Serial No. 60,724. 12 Claims. (Cl. 139—207.)

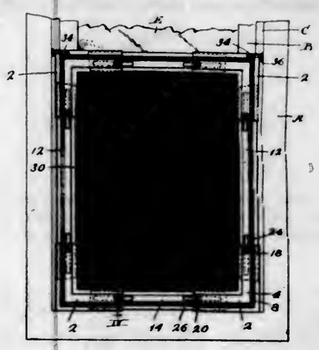
1. An automatically replenishing shuttle having a bobbin holder comprising a shank portion and bobbin holding jaws of equal width, the curved portions of the bobbin holder connecting the shank and bobbin holding



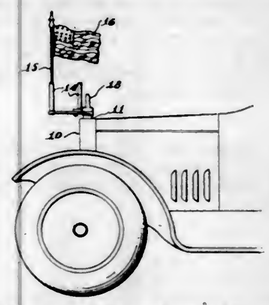
jaws and constituting the spring element of the jaws being recessed or reduced in width to distribute and confine the spring of the jaws to the said curved portion, a through-bolt passed vertically through the shank of the bobbin holder, and a transverse bolt passing through the shank at right angles to and at one side of the through-bolt.

1,573,754. TELEPHONE RECEIVER. DAVID WALD, Brooklyn, N. Y. Filed June 30, 1922, Serial No. 572,044. Renewed Dec. 31, 1925. 1 Claim. (Cl. 179—116.)

A telephone receiver which includes a cuplike shell or casing having an inwardly extending annular flange, a steel diaphragm bearing against the lower face of said flange, a flexible gasket disposed against the upper face of said flange, a mica diaphragm bearing on said gasket, a rigid connection between the steel diaphragm and the mica diaphragm, a flexible gasket disposed on top of and along the edges of the mica diaphragm, a cover plate for said casing, a dependent flange on said cover plate extending into said casing and bearing on the second gasket, and means for adjustably fastening the cover plate on to the casing.



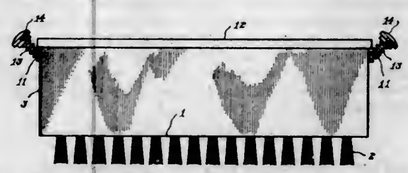
1,573,755. TONGUE-SUPPORTING GEAR FOR DRAFT ANIMALS. ROBERT CHAPMAN WORKMAN, Camden, S. C., assignor of one-half to Shand Engineering and Sales Company, Columbia, S. C., a Corporation of South Carolina. Filed May 22, 1924. Serial No. 715,173. 1 Claim. (Cl. 54—59.)



Tongue supporting gear comprising a breast yoke and a pair of bow-shaped neck yokes attached to the ends thereof at their middle, draft hames having lugs adjacent their upper portions, and elastic tension devices connecting the ends of said neck yokes with said lug, whereby the said neck yokes are resiliently suspended.

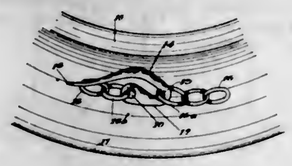
1,573,756. WINDOW SCREEN. WILLIAM LATHROPE WRIGHT, Kansas City, Mo., assignor of one-half to William Walter Eakman, Missouri Valley, Iowa. Filed Feb. 12, 1923. Serial No. 618,497. 1 Claim. (Cl. 156—38.)

A frame consisting of elbows having inturned margins and outwardly projecting intermediate portions, side and end strips capable of longitudinal adjustment in said elbows but held from lateral displacement by said inturned margins, and retaining strips similar in cross section to the side and end strips and adapted to hold a screen in said frame.



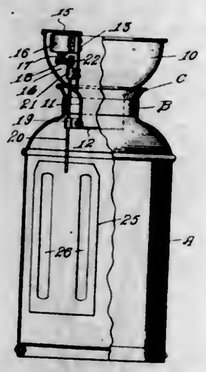
1,573,757. FLAG HOLDER. ST. ELMO W. ACOSTA, Jacksonville, Fla. Filed June 29, 1925. Serial No. 40,407. 3 Claims. (Cl. 220—24.)

1. A flag support for use on automobiles comprising a threaded attachment to be substituted for the radiator cap, an arm extending laterally therefrom, and a tubular holder on the arm to receive a flagstaff said threaded attachment being open at the upper end and having threads to receive a cap or the like, substantially as set forth.



1,573,758. BRUSH. SARKIS T. ATTARIAN, Philadelphia, Pa., and BEDROS T. ATTARIAN, Brooklyn, N. Y. Filed July 14, 1924. Serial No. 725,984. 3 Claims. (Cl. 15—138.)

1. In a brush, a perforated brush back, bristles carried thereby, a plurality of reservoirs supported from the back in close proximity thereto, a depending extension on each of said reservoirs having a partition therein, each partition being provided with a valve seat, said depending extensions provided with openings to permit fluid to flow from the extension through certain

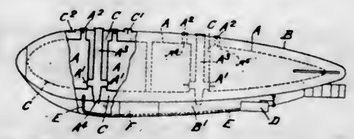


of the bristles in the brush back, said extensions disposed at remote positions one with respect to the other whereby the fluid from the respective reservoirs will engage the bristles at remote points.

1,573,759. COMBINED METAL HOOK AND LEVER. CHARLES HENRY BENNETT, Oakhurst, Brisbane, Queensland, Australia. Filed July 21, 1925. Serial No. 45,139. 1 Claim. (Cl. 24—69.)

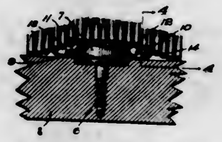
A combined hook and lever for levering together two links of a chain or like fixing comprising a body formed from a single piece of metal including an enlarged terminal provided with an eye adapted for engagement with one of the links, a straight portion continuing therefrom, the body being sent backwardly and upwardly from the straight portion and lying substantially parallel with the enlarged eye to provide a hook adapted for engagement with the other link, and a lever portion continuing from the hook at a slight angle and terminating at a distance equal to the distance between the eye and the bend of the hook and in substantial alignment with the eye and the hook, substantially as and for the purposes set forth.

1,573,760. MILK COOLER. WILLIAM MACKIE BLACK, Lansing, Mich. Filed Aug. 31, 1925. Serial No. 53,715. 1 Claim. (Cl. 259—122.)



In combination with a milk can or other receptacle, a funnel member adapted to be mounted thereon and having an extension extending thereinto and provided with a screen in its bottom to serve as a strainer, a shaft journally supported by the funnel member, an agitating member carried by the shaft and located within the milk can, a partition within the funnel member defining a separate compartment having a closure and motor mechanism mounted within said compartment and operatively connected with said shaft for driving the same.

1,573,761. HEATER FOR PERMANENT HAIR WAVING. ARNOLD HENRY BONGERS, London, England, assignor of one-half to Gaston Boudou, London, England. Filed Mar. 22, 1924, Serial No. 701,154. Renewed Dec. 5, 1925. 7 Claims. (Cl. 132—36.)

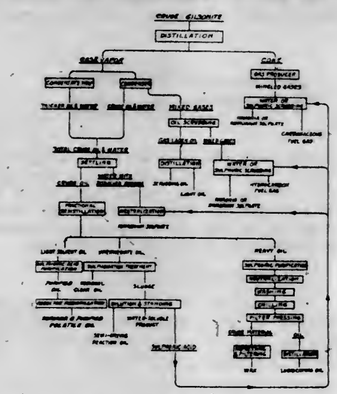


7. An appliance of the kind set forth, comprising a metallic tubular hair receiving chamber, a heating device therefor, and mechanical means including a fixed member and an adjustable member adapted for conducting heat from the heating device by separate paths to different portions of the length of said chamber.

1,573,762. PROTECTION OF AIRSHIPS AGAINST FIRE. FREDERICK LEWIS MAITLAND BOOTHBY, Tilford, near Farnham, England. Filed Feb. 2, 1924. Serial No. 690,205. 3 Claims. (Cl. 244—3.)

1. Means for protecting airships against fire comprising a plurality of gas-bags, an envelope surrounding the same, and means for introducing cooled but moist gas derived from the engine exhaust to said envelope.

1,573,763. FASTENER. FRED S. CARR, Newton, Mass., assignor to Carr Fastener Company, Cambridge, Mass., a Corporation of Maine. Filed Nov. 18, 1922. Serial No. 601,829. 2 Claims. (Cl. 16—4.)

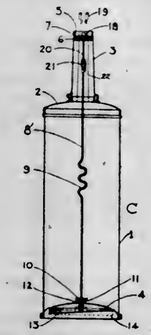


1. A fastener socket for application to a carpet or the like comprising, in combination, a socket including a lower member presenting an aperture to receive the head of a stud, resilient means partially intersecting said aperture releasably to grip a stud entered therein, and a spring-holding member secured to said lower member, said lower member and spring-holding member together constituting a casing, the outer edge of said lower member having upwardly extending prongs adapted to be bent downwardly and inwardly to engage over the warp of the carpet while concealed from view by the pile of the carpet.

1,573,764. PROCESS OF TREATING GILSONITE. CHARLES N. FORREST, Rahway, N. J., assignor to The Barber Asphalt Company, Philadelphia, Pa., a Corporation of West Virginia. Filed Aug. 19, 1919. Serial No. 318,536. 18 Claims. (Cl. 196—50.)

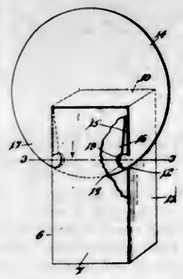
4. A process which comprises heating and coking gilsonite within such limits of maximum temperature as to retain nitrogen of the gilsonite in the coke unfixed, and treating the coke to release such retained nitrogen as ammonia.

10. A process which comprises heating and thereby decomposing and distilling gilsonite at increasing temperatures eventually exceeding materially 550° F. for



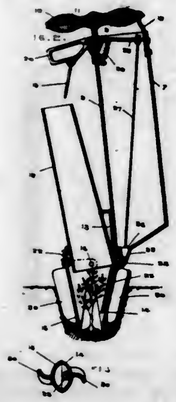
the vapor over the undistilled residue, materially reducing the application of heat, however, as such vapor temperature approaches and passes that figure.

1,573,765. GILSONITE PRODUCTS. CHARLES N. FORREST, Rahway, N. J., assignor to The Barber Asphalt Company, Philadelphia, Pa., a Corporation of West Virginia. Continuation of application Serial No. 318,536, filed Aug. 19, 1919. This application filed Sept. 19, 1922. Serial No. 589,269. 5 Claims. (Cl. 196—149.)



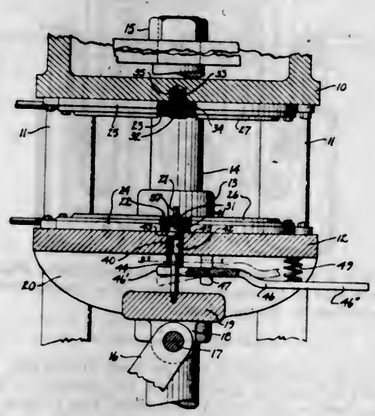
5. A gilsonitic oil of pungent odor; containing nitrogen and unsaturated hydrocarbons in high proportions as compared with petroleum; and yielding, by redistillation and refinement with sulphuric acid, oil with terpene odor more marked than that of refined petroleum.

1,573,766. LIQUID-DISPENSING DEVICE. FRANK A. HOWARD, Elizabeth, N. J., and DOUGLASS G. TOMKINS, New York, N. Y., assignors to Standard Development Company, a Corporation of Delaware. Filed Apr. 25, 1924. Serial No. 708,954. 9 Claims. (Cl. 271—45.)



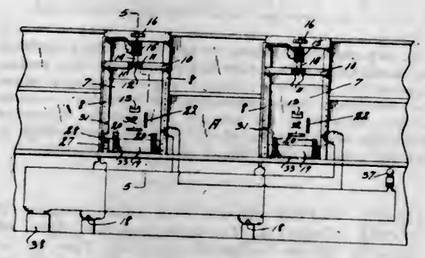
1. In a liquid-dispensing device, the combination of a container having a spout provided with an internal valve-seat and a bottom provided with a vent-opening, a valve-seat internally of said vent-opening, a valve for coacting with said spout valve-seat, means on said spout-valve whereby the valve may be held unseated, a vent-valve for coacting with the vent valve-seat, a compensating valve-rod carrying both said valves and projecting through said vent-opening, an external cam-ridge on the bottom about said vent-opening and having diametrically-spaced depressions, and a holding bar swivelly mounted on said valve-rod so as to ride with its inner face on said cam-ridge.

1,573,767. DISPLAY DEVICE. GEORGE S. HURST, Glastonbury, Conn., assignor to The J. B. Williams Company, Glastonbury, Conn., a Corporation of Connecticut. Filed July 27, 1923. Serial No. 654,174. 5 Claims. (Cl. 40—7.)



1. A display device comprising a body having slots therein arranged to provide a central support and side supports located on opposite sides of the central support, said side supports having tongues projecting from the inner edges thereof for engagement in slots in a supporting structure to prevent disengagement of the central support from said supporting structure.

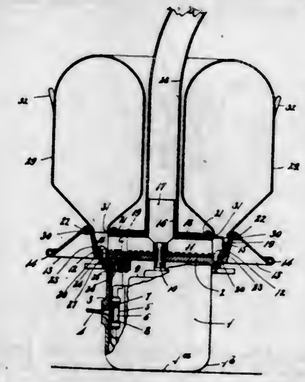
1,573,768. HAND TRANSPLANTING MACHINE. CHARLES KENNEDY, Mays Lick, Ky., assignor of one-third to H. C. Galbreath, Brooksville, Ky. Filed Feb. 5, 1924. Serial No. 690,818. 2 Claims. (Cl. 111—6.)



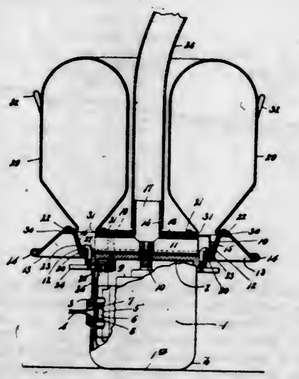
1. A device of the character described comprising shovels to enter the ground and to swing open, and scoops on the backs of the shovels for drawing the dirt inwardly by the rotation of the shovels in the ground, the lower portions of said scoops being curved rearwardly with reference to the direction of rotation to pack the dirt downwardly by screw action.

1,573,769. PRESS. JOHN FLETCHER, New York, N. Y. Filed June 22, 1921. Serial No. 479,635. 4 Claims. (Cl. 18—5.3.)

1. In a press, a die, a pin adapted to project from or retreat into an opening in the die, a slide behind the pin, a guide for said slide, and a lever for actuating said slide, said lever being slotted to straddle said guide.



1,573,770. PROTECTING SHIELD FOR BANK AND OTHER WINDOWS. JOSEPH C. LUCAS, Blandinsville, Ill. Filed Apr. 4, 1925. Serial No. 20,751. 8 Claims. (Cl. 268—2.)

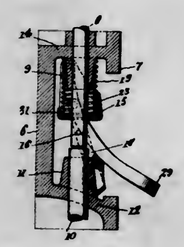


1. The combination with a wall opening, of a vertically slidable bullet-proof shield adapted to be shifted to a position to close said opening and urged to said position, the advance end of the shield being formed with a hinged section, and means normally holding the hinged section open but releasing the hinged section to permit it to close when the shield has reached its closed position.

1,573,771. VACUUM CLEANER. STANLEY MCCLATCHIE, Cambridge, Mass. Filed June 5, 1920. Serial No. 386,905. 12 Claims. (Cl. 15—16.)

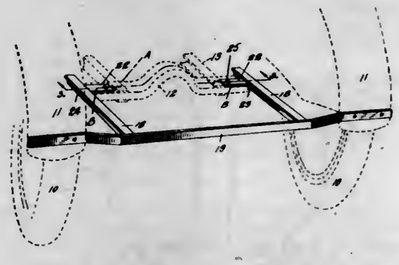
4. A vacuum cleaner comprising, in combination, a hose, a hollow casing secured to one end of said hose and having an enlargement at the end from which the hose projects, a fan and motor in said casing, and a working tool at the other end of said hose, said casing shaped to roll bodily on the floor while the cleaner is in use and said hose constituting the handle for said casing.

1,573,772. VACUUM CLEANER. STANLEY MCCLATCHIE, Stuttgart, Germany. Filed June 5, 1920, Serial No. 386,906. Renewed Mar. 8, 1924. 20 Claims. (Cl. 183—36.)



1. Vacuum cleaning apparatus, comprising a rotary fan, an axial induct to said fan, and an educt therefrom disposed about the periphery of the fan, a tubular dust-collecting bag adapted to fold telescopically within itself, one end of said bag detachably secured around one side of said peripheral fan educt, the other end similarly secured around the other side of said educt, the bag adapted to be unfolded to straight tubular form when detached from said educt.

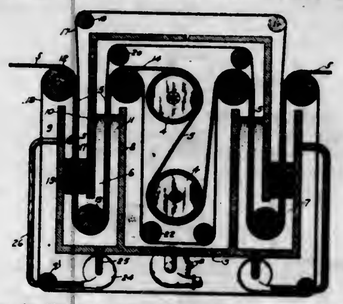
1,573,773. VALVE LIFTER. OTTO MAURER, Great Falls, Mont. Filed Apr. 4, 1925. Serial No. 20,799. 1 Claim. (Cl. 29—86.3.)



An improved valve lifter comprising a single flat strip bent to provide a pair of substantially parallel spaced legs with their flat sides facing each other and having an intermediate portion of the strip arched backwardly between the legs to provide a connecting bar to engage

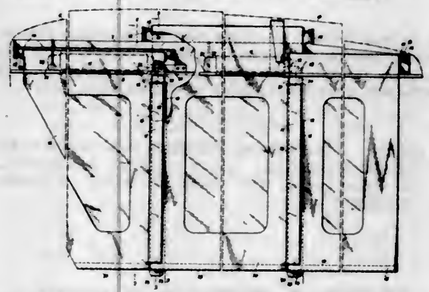
about a push rod bushing, the flat connecting bar being bent into semi-frusto-conical form and being curved in an endwise direction downwardly to conform to the configuration of the bushing and to provide upper and lower

spaced pivot points for the legs, lever arms pivoted to the upper ends of the legs, and a swinging carrier pivoted to said lever arms and adapted to engage the spring and spring seat.



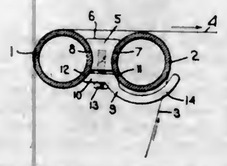
1,573,774. **FASTENER FOR SUPPORTING ARMS FOR BUMPERS.** ALGOT W. NORDGREN, St. Paul, Minn., assignor to Marquette Manufacturing Company, St. Paul, Minn. Filed Oct. 27, 1924. Serial No. 746,104. 2 Claims. (Cl. 293—55.)

1. The combination of a channel shaped automobile cross brace having its connecting web horizontally disposed and its flanges vertically disposed and extending downwardly from the connecting web and a supporting arm having a horizontal flange and a vertical flange, with an angular fastener for securing the supporting arm to the cross brace, the edge of the horizontal flange of the supporting arm resting against the edge of the connecting web of the cross brace and having its under surface flush with the under surface of said web, said angular member resting against the horizontal and vertical flanges of the supporting arm and extending into the channel shaped cross brace and resting against the under side of the connecting web and a single element for securing the angular member to the cross brace.



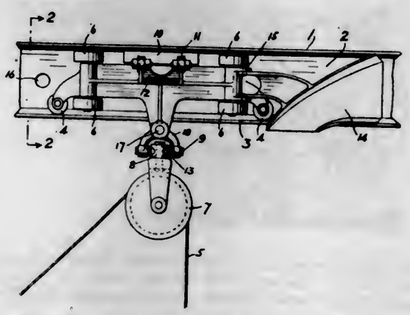
1,573,775. **DRYING APPARATUS FOR SHEET MATERIAL.** WILLIAM G. O'BRIEN, Akron, Ohio, assignor to The Goodyear Tire & Rubber Company, Akron, Ohio, a Corporation of Ohio. Filed July 31, 1922. Serial No. 578,745. 16 Claims. (Cl. 34—48.)

5. An apparatus for drying sheet material comprising a container having a plurality of openings therein for the passage of sheet material, means for sealing said openings comprising two oppositely disposed resilient members having fluid confined therein arranged within each opening, and two endless belts both adapted to pass through the container and between the two resilient



members in the openings, one of said belts being disposed on each side of the sheet material while passing through the openings in the container.

1,573,776. **FASTENING MEANS FOR CURTAINS.** EDWARD J. THURBER, New Orleans, La., assignor to Thurber, Perkins and Cook, Incorporated, New Orleans, La., a Corporation of Louisiana. Filed July 29, 1924. Serial No. 728,929. 8 Claims. (Cl. 296—143.)

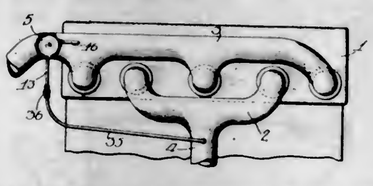


1. In a curtain fastening means of the class specified, the combination with a vehicle top and body, of a curtain organization including curtains having adjacent edges, and fastening means consisting of clamping members movably secured to the top and disposed for movement of the side edge portions of the curtains therethrough to hold the latter in close joined overlapping relation.

1,573,777. **CENTER BRACE FOR DRAG ROLLS OF LOOMS.** EUGENE L. TINKHAM, Hopedale, Mass., assignor to Draper Corporation, Hopedale, Mass., a Corporation of Maine. Filed July 18, 1925. Serial No. 44,450. 7 Claims. (Cl. 139—97.)

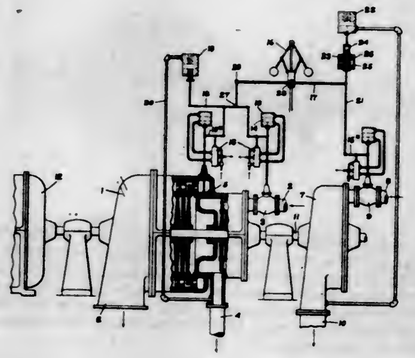
1. A drag roll construction for looms comprising a plurality of parallel rolls supported at their ends and rigid bracing means supported by said rolls and located etween the rolls intermediate of the length of rolls acting to stiffen said rolls against flexure by warp sheet as it is dragged over said rolls in its passage from the warp beam to the shed.

1,573,778. **TAILBLOCK EQUIPMENT.** ROBERT H. BEAUMONT, Radnor, Pa., assignor to R. H. Beaumont Co., Philadelphia, Pa., a Corporation of Pennsylvania. Filed Nov. 6, 1925. Serial No. 67,286. 4 Claims. (Cl. 105—154.)



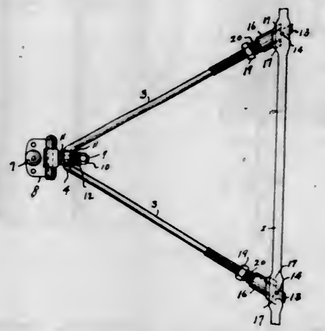
1. Tail block equipment comprising a rail structure arranged above the ground and having a generally horizontal portion and a generally vertical portion, a carriage having generally horizontal wheels arranged to run on the generally vertical portion to resist cable pull and having generally vertical wheels adapted to run on the generally horizontal portion, and a balanced swivel sheave carried by the carriage and projecting laterally therefrom.

1,573,779. **ANTISLIPPING MEANS.** FRED GUSTAF BROMAN, Philadelphia, Pa. Filed Nov. 17, 1924. Serial No. 750,350. 3 Claims. (Cl. 36—65.)



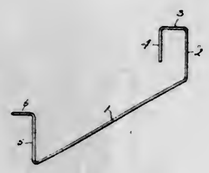
1. An anti-slipping means comprising a body adapted to underlie the sole of a shoe, a flange at each end adapted to embrace the edge of the shoe sole, and calks mounted in said body and arranged to be brought into contact with the bottom of said shoe sole to clamp the device in place.

1,573,780. **VAPOR-FEED MEANS.** IRVING COWLES, Chicago, Ill. Filed Apr. 7, 1922. Serial No. 550,260. 11 Claims. (Cl. 123—25.)



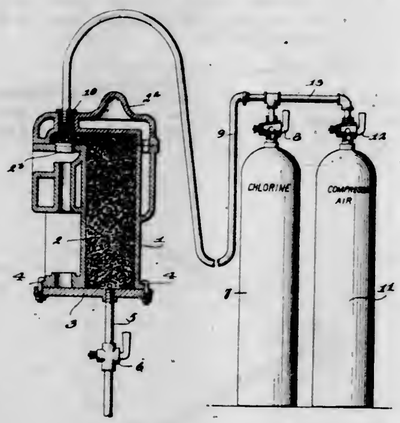
1. A vaporizer for use in conjunction with an internal combustion engine, comprising a closed metallic casing adapted to be mounted on a portion of the engine to be heated thereby, the casing having an inlet for fluids at its upper part and an outlet at its lower part, the outlet adapted to be connected to the intake manifold of the engine, baffle walls arranged in the upper part of the casing adapted to form a plurality of liquid traps therein, and baffle walls in the lower part of the casing forming an elongated passage without traps through which gases passing through the device must flow to reach the outlet, as and for the purpose specified.

1,573,781. **GOVERNING MECHANISM FOR TURBINES.** WALTER KIESER, Charlottenburg, Germany, assignor, by mesne assignments, to Allgemeine Elektricitäts Gesellschaft, Berlin, Germany, a Corporation of Germany. Filed Nov. 13, 1923. Serial No. 674,528. 8 Claims. (Cl. 137—158.)



1. In combination, a main turbine, an auxiliary turbine operating on the extraction plan, said turbines being arranged to drive a common load, admission valves for the turbines, a speed governor which successively controls said admission valves, and a regulator responsive to a condition of the fluid extracted from the auxiliary turbine which normally controls its admission valve, and which also modifies the action of the governor on the admission valve of the main turbine in such manner as to cause said valve to move in the opposite sense to the valve of the auxiliary turbine.

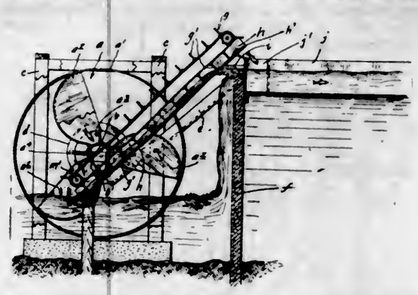
1,573,782. **RADIUS ROD.** JAMES A. PORTIS, Daisetta, Tex., assignor of one-fourth to A. L. Barrow, Liberty County, Tex. Filed May 29, 1924. Serial No. 716,604. 4 Claims. (Cl. 267—66.)



1. The combination with a motor and axle of a motor vehicle, of a radius rod formed with diverging arms, a yoke having a bearing connecting said arms at one end, a forwardly extending pintle hinged to the motor and working through said bearing, means preventing the detachment of the yoke from the pintle, integral hooks into which the other ends of the arms are formed, which engage with said axle and means for securing said hooks in engagement with said axle.

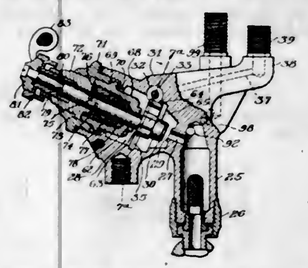
1,573,783. CLIP FOR FASTENING EXPANDED-METAL LATHS. JOHN S. RAYNOR, Philadelphia, Pa. Filed May 7, 1924. Serial No. 711,521. 3 Claims. (Cl. 72—120.)

2. In combination with a furring bar and metal lathing, a series of clips, each of said clips comprising a body portion coacting with the lathing, a locking leg embracing the bar, and a stay leg supported by said bar, the locking legs of each succeeding clip engaging the body of the preceding one to hold the stay leg of said preceding clip in place against the bar.



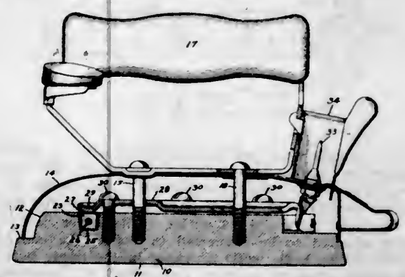
1,573,784. PROCESS OF TEMPERING METALS AND OTHER MATERIALS. JAMES W. VAN METER, San Rafael, Calif. Filed June 9, 1922. Serial No. 567,096. 18 Claims. (Cl. 148—17.)

4. Method of tempering, consisting in heating the work in a non-oxidizing atmosphere, excluding the same from the outer air, and subjecting the same to the action of cyanogen under pressure.



1,573,785. FISH LADDER. JOHN F. ALBRIGHT, Oregon City, Oreg. Filed Aug. 13, 1925. Serial No. 50,021. 1 Claim. (Cl. 61—21.)

In a fish ladder of the character described, lifting devices comprising a rotatable fish wheel having an axially arranged discharge, and a peripherally arranged inlet, an inclined chute, said discharge emptying into



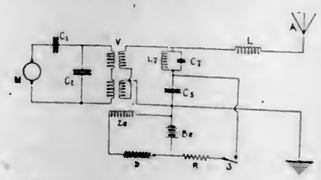
said inclined chute, the latter having conveying mechanism therein, the upper end of said chute extending a substantial distance upstream, for the purpose described.

1,573,786. VALVE. ALPHONSE F. PIEPER, Rochester, N. Y. Original application filed Sept. 20, 1923, Serial No. 663,892. Divided and this application filed Apr. 18, 1924. Serial No. 707,496. 8 Claims. (Cl. 277—7.)

1. A valve head comprising an inlet, a plurality of outlets, valve means controlling said inlet, independent valve means selectively controlling said outlets, a single manipulative device for actuating both of said valve means and a part cooperating with said head and device and threadedly engaged with one thereof for actuating said device.

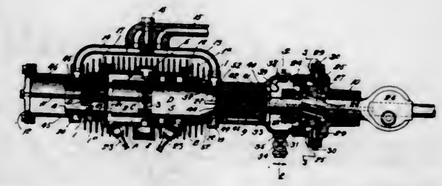
1,573,787. ELECTRIC HEATER. CHARLES P. RANDOLPH, Oak Park, Ill., assignor to Edison Electric Appliance Company, Incorporated, Chicago, Ill., a Corporation of New York. Filed May 25, 1925. Serial No. 32,529. 3 Claims. (Cl. 219—25.)

1. The combination with a mass of heat conducting material provided with a substantially flat-bottom groove, of a heating unit encased in a continuous unbroken



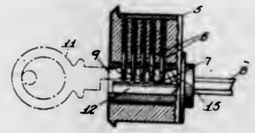
metallic sheath clamped in said groove, said sheath being formed with a substantially flat surface held in engagement with the bottom of said groove in good thermal relation therewith.

1,573,788. CLOTH. OTTO C. WIESE, Brooklyn, N. Y., assignor to Salomon Fromm, Brooklyn, N. Y. Filed Nov. 3, 1922. Serial No. 598,824. 4 Claims. (Cl. 66—4.)



1. A cloth, comprising a body, and an inserted straw yarn looped into the body at spaced intervals while the body is stretched whereby more of said inserted yarn will be on one face of the body than on the other and whereby the inserted yarn will be crushed somewhat together when the body is not under tension.

1,573,789. TRANSMITTING ARRANGEMENT FOR WIRELESS SIGNALING. MENDEL OSNOS, Berlin, Germany, assignor to Gesellschaft für Drahtlose Telegraphie m. b. H. Hallesches, Berlin, Germany, a Corporation of Germany. Filed July 11, 1923. Serial No. 650,861. 9 Claims. (Cl. 250—17.)



1. A transmitting arrangement for wireless signaling comprising a high frequency generator, a static frequency transformer having its input circuit arranged in circuit with the generator, an aerial circuit coupled with the output circuit of the transformer, a parallel circuit connected with the aerial circuit and arranged in parallel with said output circuit, said parallel circuit comprising a protecting circuit and a condenser arranged in series, a circuit arranged in parallel with said condenser, and means for controlling the current in the last-mentioned circuit.

1,573,790. GASOLINE ROCK DRILL. JOHN V. RICE, Jr., Bordentown, N. J., assignor to Rice Portable Rock Drill Corporation, Wilmington, Del., a Corporation of Delaware. Filed June 15, 1922. Serial No. 568,568. 12 Claims. (Cl. 123—7.)

1. In a gasoline rock drill, the combination of a cylinder, a piston therein having twin interior chambers, a free member reciprocating through one end of the cylinder and provided with means for carrying a drilling or cutting tool, and means arranged in connection with said free member to impart a partial rotation thereto at each reciprocation in one direction, while permitting it to pursue a rectilinear movement only during the reciprocations in the other direction, said rotating means consisting essentially of a ratchet wheel mounted on a free rod and connected therewith by a tongue and groove connection, and a series of one or more pawls engaging the teeth of said ratchet to prevent reverse movement.

1,573,791. COMBINATION KEY. EMIL ROETHLISBERGER, New York, N. Y. Filed Apr. 30, 1923. Serial No. 635,446. 14 Claims. (Cl. 70—93.)

1. A combination key for tumbler locks, said key being composed of separate interlocking and cooperative parts positioned one above the other and edge to edge, and one of said parts constituting a key part for actuating the tumblers of the lock.

Patents Nos. 1,573,792 to 1,574,740.

THE

OFFICIAL GAZETTE

OF THE

United States Patent Office.

Vol. 343—No. 4. TUESDAY, FEBRUARY 23, 1926. Price—$5 per year.

The OFFICIAL GAZETTE is mailed under the direction of the Superintendent of Documents, Government Printing Office, to whom all subscriptions should be made payable and all communications respecting the Gazette should be addressed. Issued weekly. Subscription, $5.00 per annum; single numbers, 10 cents each.

PRINTED COPIES OF PATENTS are furnished by the Patent Office at 10 cents each. For the latter, address the Commissioner of Patents, Washington, D. C.

CIRCULARS OF GENERAL INFORMATION concerning PATENTS or concerning TRADE-MARKS, PRINTS, and LABELS will be sent without cost on request to the Commissioner of Patents, Washington, D. C.

Notice—Disclaimers—Allegation that Claim of More than that to Which the Patentee was Entitled was Made "Without Any Fraudulent or Deceptive Intention."

U. S. PATENT OFFICE, *Washington, Feb. 8, 1926.*

Section 4917 provides for a disclaimer when the patentee had claimed more than that of which he was the original or first inventor "through inadvertence, accident, or mistake" and "without any fraudulent or deceptive intention," and section 4922 has a similar limitation.

A disclaimer in order to be recordable in this Office should therefore contain not only the allegation that the matter to be disclaimed was included "through inadvertence, accident, or mistake," but also the allegation that it was included "without any fraudulent or deceptive intention."

If a disclaimer is filed which does not include the latter allegation, the party filing it will be notified that the disclaimer can not be recorded until that allegation is included.

THOMAS E. ROBERTSON,
Commissioner.

Disclaimer.

1,147,727.—*Fred O. Howe*, New Haven, Conn. LAMPS. Patent dated July 27, 1915. Disclaimer filed February 5, 1926, by the assignee, *Albert I. Appleton*.

Hereby enters this disclaimer and disclaims from the scope of claim 7 of said Patent No. 1,147,727 any lamp in which said "support-operating shaft" moves angularly about any other axis than its long axis for the purpose of turning the support for the lamp.

Changes in Classification.

Order No. 2,944, February 5, 1926, provides:

In *class 235, Registers* (Division 23), establish the following subclass and definition, the patents contained in this subclass having been taken for the most part from class 235, Registers, subclass 61, Calculators:

Calculators

61.5 Ordnance control data.

61.5. CALCULATORS, ORDNANCE CONTROL DATA. Mechanisms capable of rapidly solving those mathematical problems pertaining to the training of ordnance upon targets in air, on land and in water, where the accurate setting of the gun is dependent on the results of solution of problems involving range, rate of change of range, relative velocities, acceleration, azimuthal and zenithal angular positions and rate of change thereof, time of flight and drift of projectile, corrections for wind, etc.

Search Class—

89—ORDNANCE, subclass 41, Mounts, Training mechanisms.

In *class 255, Earth Boring* (Division 38), abolish the following subclass, with its definition, the patents formerly contained therein having been placed in class 308, Machine Elements, Bearings and Guides, subclass 4, Guide or slide, Cylindrical, and in class 255, Earth Boring, subclasses 69, Drills, bits, and augers, Screw, and 72, Drills, bits, and augers, Core, and class 287, Rod Joints or Couplings, subclass 125, Socket, Screw, and cross-referenced into class 308, subclass 4:

Rigs

Rods

29 Guides.

Class 66, Textiles, Knitting (Division 21), has been reclassified, with the subclasses indicated in the new loose leaf now being published for insertion in the Manual of Classification.

Lists of subclasses with definitions may be seen in the Classification Division, room 165.

ADJUDICATED PATENTS.

(D. C. N. Y.) The Ornstein patent, No. 1,142,861, for process for antiseptic izing water with chlorine, claims 4, 5, 6, 8, and 10 *Held* valid and infringed. *Electro-Bleaching Gas Co.* v. *Paradon Engineering Co.*, 8 F. (2d) 890.

Condition of Applications Under Examination at Close of Business February 12, 1926.

Room No.	(Total number of applications awaiting action, excluding Trade-Mark Division, 40,686: Trade-Mark Division, 2,121. Oldest new case, Aug. 1, 1925; oldest amended, July 31, 1925. The dates given are 1925 except where † indicates 1926.) Divisions, Examiners, and Subjects of Inventions.	Oldest new application and oldest action by applicant awaiting office action. New.	Amended.	No. of applications awaiting action.
112	1. LOEFFLER, F. A., Closure Operators; Fences; Gates; Harrows and Diggers; Plant Husbandry; Plows; Planting; Scattering Unloaders.	Nov. 17	Nov. 20	567
126	2. HADEN, C. F., Bee Culture; Dairy; Preserving; Presses; Tobacco.	Oct. 17	Sept. 8	502
331	3. RICH, WM. J., Electric Heating; Electrochemistry; Heating; Metal Founding; Metallurgical Apparatus; Metallurgy; Metal Treatment; Plastic Metal Working.	Nov. 11	Nov. 12	702
234	4. MERRITT, A. D., Conveyers, Chutes, Skids, Guides, and Ways; Conveyers, Fluid Current; Conveyers, Power Driven; Excavating; Handling—Hand and Hoist-Line Implements; Material or Article Handling; Pushing and Pulling Implements; Traversing Hoists.	Nov. 7	Nov. 19	522
108*	5. MACNAB, J. F., Harvesters; Jewelry; Music; Acoustics; Sound Recording and Reproducing; Tying Cords or Strands.	Sept. 12	Sept. 17	855
318	6. LEWERS, A. M., Bleaching and Dyeing; Chemistry; Chemistry—Carbon Compounds; Explosive, Pyrotechnic, and Match Compositions; Fertilizers; Substance Preparation; Hides, Skins and Leather; Sugar and Starch; Concentrating Evaporators.	Nov. 13	Nov. 3	1,021
106	7. JARBOE, C. G., Amusement and Exercising Devices; Toys; Optics; Photography	Nov. 27	Nov. 25	776
133	8. HENRY, C. C., Beds; Chairs and Seats; Furniture; Kitchen and Table Articles; Store Furniture	Nov. 20	Nov. 23	1,077
221	9. TRYON, F. M., Air and Gas Pumps; Hydraulic Motors; Injectors and Ejectors; Motors, Fluid; Motors, Fluid Current; Pumps.	Nov. 3	Oct. 23	573
118	10. HUNTER, O. F. (Acting), Motor Vehicles; Land Vehicles—Animal Draft Appliances, Bodies and Tops, Dumping.	Oct. 21	Nov. 4	981
143*	11. ARMSTRONG, H. C., Boot and Shoe Making; Boots, Shoes, and Leggings; Button, Eyelet, and Rivet Setting; Harness; Leather Manufactures; Nailing and Stapling; Whips and Whip Apparatus; Cutting and Punching Sheets and Bars; Driven, Headed, and Screw-Threaded Fastenings.	Nov. 27	Nov. 14	756
380	12. PIERCE, P. P., Machine Elements	Nov. 6	Nov. 17	660
154*	13. CLIFT, J. W., Bolt, Nail, Nut, Rivet, and Screw Making; Chain, Staple, and Horseshoe Making; Gear Cutting, Milling, and Planing; Metal Drawing; Metal Forging and Welding; Metal Rolling; Metal Working; Needle and Pin Making; Turning.	Nov. 13	Dec. 8	648
102*	14. BRUMBAUGH, N. J., Compound Tools; Farriery; Metal Bending; Metal Tools and Implements, Making; Sheet-Metal Ware, Making; Tools; Wire Fabrics and Structure; Wire Working; Metal Working, Assembling, and Blanks and Processes.	Oct. 16	Nov. 10	863
329	15. REDROW, W. L., Glass; Paper Making; Plastic Block and Earthenware Apparatus; Plastics	Nov. 16	Nov. 19	612
242*	16. SPENCER, C. J., Batteries; Resistances and Rheostats; Telegraphy; Telephony	Oct. 9	Oct. 9	941
307	17. RAFTER, G. S., Label Pasting and Paper Hanging; Nut and Bolt Locks; Ornamentation; Paper Manufactures; Printing; Type Casting; Sheet-Material Associating or Folding; Sheet or Web Feeding or Delivering; Type Setting.	Nov. 4	Nov. 5	373
229	18. PORTER, M. E., Motors, Expansible-Chamber Type; Power Plants; Speed-Responsive Devices	Oct. 10	Oct. 12	794
236	19. GLASCOCK, E. S., Furnaces; Heating Systems; Liquid and Gaseous Fuel Burners; Stoves and Furnaces.	Oct. 15	Dec. 5	553
179	20. GROVE, S. D., Miscellaneous Hardware; Closure Fasteners; Locks and Latches; Safes; Undertaking.	Nov. 23	Nov. 23	767
212	21. THURBER, W. L., Winding and Reeling; Textiles; Cloth Finishing	Nov. 3	Nov. 25	474
244*	22. COLWELL, J. H., Aeronautics; Amusement Devices, Games; Firearms; Ordnance; Ammunition and Explosive Devices; Ammunition and Explosive-Charge Making; Air Guns, Catapults, and Targets; Boats and Buoys; Ships; Marine Propulsion.	Dec. 2	Dec. 5	525
217	23. GROESBECK, W. D., Coin Handling; Recorders; Registers; Horology; Time-Controlling Mechanism.	Oct. 2	Sept. 29	284
147*	24. DURAS, C. O., Apparel; Apparel Apparatus; Garment Supporters; Sewing Machines	Nov. 13	Dec. 1	500
314	25. LIGHTFOOT, J. H., Agitating; Butchering; Centrifugal-Bowl Separators; Cutlery; Mills; Threshing; Vegetable and Meat Cutters and Comminutors; Gas Separation.	Nov. 21	Nov. 14	748
228*	26. HODGES, J. S., Electricity, Generation; Motive Power; Prime-Mover Dynamo Plants	Aug. 19	Aug. 25	747
214	27. ANDERSON, L. S., Brush, Broom, and Mop Making; Brushing, Scrubbing, and General Cleaning; Laundry; Washing Apparatus.	Dec. 14	Dec. 7	514
225	28. BENSON, A. R., Internal-Combustion Engines	Dec. 12	Dec. 12	603
160*	29. MORRIS, B. N., Abrading; Boring and Drilling; Button Making; Chucks or Sockets; Cooperage; Tool-Handle Fastenings; Wheelwright Machines; Wood Sawing; Wood Turning; Woodworking; Woodworking Tools.	Aug. 1	July 31	1,064
248	30. SULLIVAN, M. R., Automatic Temperature and Humidity Regulation; Illuminating Burners; Illumination; Typewriting Machines; Thermostats and Humidostats.	Nov. 13	Nov. 12	816
312	31. HOLMES, W. N., Alcohol; Ammonia, Water, and Wood Distillation; Charcoal and Coke; Gas, Heating and Illuminating; Hydraulic Cement and Lime; Mineral Oils; Oils, Fats, and Glue.	Dec. 18	Dec. 17	735
240	32. BARTHOLOMEW, J. A., Gas and Liquid Contact Apparatus; Heat Exchange	Oct. 14	Oct. 16	561
152	33. WYMAN, W. L., Bridges; Hydraulic and Earth Engineering; Masonry and Concrete Structures; Metallic Building Structures; Roads and Pavements; Roofs; Wooden Buildings.	Dec. 12	Dec. 14	617
304	34. SIMPSON, G. R., Electricity-Transmission to Vehicles; Pneumatic Dispatch; Railways; Railway Rolling Stock; Railway Switches and Signals; Railways, Surface Track; Railway Wheels and Axles; Store Service; Track Sanders; Vehicle Fenders.	Sept. 14	Sept. 12	717
116*	35. REYNOLDS, E. C., Buckles, Buttons, Clasps, Etc.; Card, Picture, and Sign Exhibiting; Signals and Indicators; Toilet.	Oct. 9	Dec. 30	492
105	36. MORTON, G. L., Automatic Weighers; Geometrical and Measuring Instruments; Force Measuring	Oct. 28	Nov. 11	1,074
224*	37. TAYLOR, E. C., Electricity, Circuit Makers and Breakers	Nov. 11	Nov. 10	837
145	38. IDE, G. R., Animal Husbandry; Earth Boring; Fishing, Trapping, and Vermin Destroying; Mining, Quarrying, and Ice Harvesting; Stoneworking; Wells.	Aug. 31	Sept. 22	872
220	39. COWLES, A. W., Fluid-Pressure Regulators; Multiple Valves; Valves; Water Distribution	Nov. 17	Nov. 24	484
269	40. OBERLIN, J. J., Baggage; Bottles and Jars; Cloth, Leather, and Rubber Receptacles; Deposit and Collection Receptacles; Metallic Receptacles; Package and Article Carriers; Paper Receptacles; Special Receptacles and Packages; Wooden Receptacles.	Nov. 5	Nov. 7	1,074

DECISIONS IN PATENT AND TRADE-MARK CASES.

Commissioner's Decision.

Ex parte O'Rourke.

Decided February 21, 1925.

TOOL SUPPORT.

Appeal to Examiners in Chief—New Reference Cited in Examiner's Answer—Election to Prosecute Appeal.

Where an applicant has elected to prosecute his appeal before the Examiners in Chief after the citation of a new reference by the Examiner in his answer to the appeal, the case is not open for amendment before the Examiner after the appeal has been decided.

Application for Patent.

On petition.

Mr. Horace L. Rockwell for the applicant.

Kinnan, *First Assistant Commissioner:*

The applicant has petitioned "that the Examiner be instructed to enter the amendment of January 13, 1925, and consider the same."

The record discloses that after a final rejection by the Examiner, he was, after petition to the Commissioner, directed to consider informally any amendment or argument which applicant submits, and should such amendment or argument satisfy the Examiner that he should allow any of the claims he may admit such amendment; but an appeal should be filed covering any claims still denied patentability, and such appeal must be filed within one year from April 14, 1922.

Thereafter petitioner presented an amendment directing the cancellation of all of the finally-rejected claims and substituting therefor an equal number of similarly-numbered claims. The appeal was filed within the limit set.

There was some uncertainty, when the Examiners in Chief took up the case for decision, as to whether the amendment canceling the finally-rejected claims and substituting the new claims had been admitted in the case. The Examiners in Chief, however, correctly decided that such an amendment should have been entered, and considered the claims contained in it, dismissing the appeal as to the claims which such amendment directed to be canceled.

In the Examiner's answer to this appeal he cited for the first time a new reference, the British patent to Taylor. The petitioner did not seek, under the practice set forth in *Ex parte Mevey*, 56 O. G. 805, or *Ex parte Dolan*, 99 O. G. 2321, to return to the Primary Examiner and seek to overcome this new reference, but prosecuted the appeal to the Examiners in Chief. After the decision of that tribunal affirming the rejection of the Examiner as to all of the rejected claims save 1 petitioner presented an amendment to these rejected claims together with an argument as to their patentability as amended. This amendment was refused entry under the provisions of rule 140. It is from this refusal to enter this amendment that the instant petition is brought.

Petitioner seems to think that a case having been decided by the Examiners in Chief on appeal is still open for amendment before the Examiner. This is clearly contrary to the established practice and to the rule above noted. The conditions are in no wise changed by reason of petitioner having elected to prosecute his appeal before the Examiners in Chief after the citation of the new reference by the Examiner.

This case has been pending in this Office over seven years and has been many times reviewed by the Examiner. It is believed ample opportunity has been given applicant to present and have considered any and all claims that he desired and that he has had opportunity to make such showing as to the new reference as, under the practice, he could demand.

The petition is denied.

Court of Appeals of the District of Columbia.

Buckwalter *v.* Pratt.

Nos. 1,790, 1,791. Decided January 4, 1926.

Interference—Reduction to Practice—Simple Invention—Drawings.

Where B. urged that his conception in 1917 was followed in that year by a drawing which, owing to the simple character of the invention, should be regarded as a reduction to practice, his contention was overruled by the Commissioner of Patents, and the court agreed with that ruling upon the record before them.

Appeals from the Commissioner of Patents. Affirmed.

Mr. H. A. Dodge and *Mr. Joseph G. Denny, jr.*, for Buckwalter.

Mr. J. B. Macauley for Pratt.

Before Martin, Chief Justice, Robb, Justice, and Smith, Judge U. S. Court of Customs Appeals.

Martin, *C. J.:*

These appeals have been taken by Buckwalter, the junior party, from decisions of the Commissioner of Patents in two interference proceedings, awarding priority of invention to Pratt, the senior party. The appellant comes to this court with three concurring decisions of the Patent Office against him.

The issues of the respective interferences are as follows:

A self adjusting roller bearing comprising inner and outer race rings, one of which is formed with a spherical curved race and the other with a co-operating race, and rollers having axially convex surfaces and whose greatest diameter lies nearer to one end of the roller than the other end.

In a bearing of the class described, an outer bearing member having a spherical inner surface, an inner bear-

ing member having an outer bearing surface which is concave longitudinally and of greater diameter at one end than the other, rolls between the bearing surfaces of greater diameter at one end than at the other and a frustro-conical roll retainer engaging said rolls.

Pratt's applications were filed on October 27, 1918. He took no testimony in the proceedings, but relied upon his filing date for a constructive reduction to practice.

Buckwalter's applications were filed on July 11, 1919. He alleged conception prior to May 22, 1917, and an actual reduction to practice on June 15, 1919, which date is later than Pratt's filing date. In his preliminary statement Buckwalter alleged no definite date of reduction to practice prior to June 15, 1919, nevertheless he urges that his conception in 1917 was followed in that year by a drawing, which owing to the simple character of the invention should be regarded and considered as a reduction to practice. This contention was overruled below, and upon the present record we agree with that ruling.

Buckwalter introduced evidence with reference to his diligence or excuse for want thereof, from a time prior to Pratt's entry into the field and extending up to the date of his own reduction to practice. Upon this subject the Examiners in Chief found as follows:

There is no evidence of diligence whatever but it is contended that Buckwalter and the Timken Roller Bearing Co. of which he was chief engineer were so busily engaged in war work that he could not spare time to develop this bearing. Without going further into the matter we adopt the analysis of the Examiner of Interferences and agree with his conclusion that there was no controlling obstacle to the reduction to practice or the filing of an application and that Buckwalter was not diligent. Buckwalter also attempts to raise the question of nonpatentability of the issue but this question is not appealable under rule 130.

Upon a review of the evidence we are satisfied that these conclusions are correct (see also *Lecroix* v. *Tyberg*, 148 O. G. 831; 33 App. D. C. 586), and that the decision of the Commissioner of Patents awarding priority to Pratt, should be, and it is, affirmed.

ADVERSE DECISIONS IN INTERFERENCE.

In interferences involving the indicated claims of the following patents final decisions have been rendered that the respective patentees were not the first inventors with respect to the claims listed:

Pat. 1,486,919, J. R. Quinlan, Internal-combustion engine, decided January 16, 1926, claims 1 and 2.

Pat. 1,490,623, Miller and Schweitzer, Automatic train-control apparatus, decided January 18, 1926, claims 1 to 5, inclusive.

Pat. 1,524,900, G. A. Yanochowski, Telephone system, decided January 11, 1926, claims 3, 4, 17, 19, 21, 22, and 23.

Pat. 1,526,108, H. F. Adams, Wall board and joint therefor, decided January 11, 1926, claims 1, 2, 4, 5, and 6.

Pat. 1,583,616, Shipley and Given, Lacquer and lacquer enamel, decided January 16, 1926, claims 1, 2, 3, 5, 12, 13, 14, 16, 18, 21, and 22.

Pat. 1,554,219, F. T. Kitchen, Electric atomizer heater, decided January 16, 1926, claim 4.

PATENT SUITS.

[Notices under sec. 4921, R. S., as amended Feb. 18, 1922.]

892,603, Luther & Volck, Process for the manufacture of arsenate of lead, decree for plaintiff Dec. 26, 1925, perpetual injunction issued; order vacating injunction Jan. 4, 1926, D. C., N. D. Ohio (W. Div.), Doc. E 338, *California Spray Chemical Co.* v. *The Toledo Rex Spray Co.*

U. S. PATENT OFFICE, *Washington, Jan. 25, 1926.*

Bidart Machinery Corporation, its assigns or legal representatives, take notice:

A cancellation proceeding having been instituted by this Office upon the application of Kimberly-Clark Company, of Neenah, Wis., to effect the cancellation of trade-mark registrations No. 98,455, dated July 21, 1914, and No. 102,015, dated January 26, 1915, to American Rotogravure Company, of No. 432 Fourth Avenue, New York, N. Y., and it appearing by the statement of the president of the said American Rotogravure Company, made under oath in response to interrogatories addressed to it, that the title to the trade-marks concerned no longer remains in the said American Rotogravure Company, but has been transferred to the Bidart Machinery Corporation, and it further appearing that the said Bidart Machinery Corporation, of New York, N. Y., has been substituted to defend the registrations concerned and that the Office has failed to secure proper service on the said Bidart Machinery Corporation notice is hereby given that unless said Bidart Machinery Corporation, its assigns or legal representatives, shall enter an appearance therein within 30 days from the first publication of this order the cancellation will be proceeded with as in case of default. This notice will be published in the OFFICIAL GAZETTE for three consecutive weeks.

WM. A. KINNAN, *Acting Commissioner.*

Interference Notice.

U. S. PATENT OFFICE, *Washington, Jan. 27, 1926.*

Devon Manufacturing Company, Inc., its assigns or legal representatives, take notice:

An interference having been declared by this Office between the application of Lindeke, Warner & Sons, Incorporated, Fourth and Broadway, St. Paul, Minn., for registration of a trade-mark and trade-mark registered November 7, 1922, No. 161,114, to Devon Manufacturing Company, Inc., 24 Boerum Street, Brooklyn, N. Y., and a notice of such declaration sent by registered mail to said Devon Manufacturing Company, Inc., at the said address having been returned by the post office as undeliverable, notice is hereby given that unless said Devon Manufacturing Company, Inc., its assigns or legal representatives, shall enter an appearance therein within 30 days from the first publication of this order the interference will be proceeded with as in case of default. This notice will be published in the OFFICIAL GAZETTE for three consecutive weeks.

WM. A. KINNAN, *Acting Commissioner.*

TRADE-MARKS

OFFICIAL GAZETTE, FEBRUARY 23, 1926.

[VOL. 343. No. 4.]

The following trade-marks are published in compliance with section 6 of the act of February 20, 1905, as amended March 2, 1907. Notice of opposition must be filed within thirty days of this publication.

THE AMERICAN MERCURY

Particular description of goods.—Periodical Publication.
Claims use since January, 1924.

Ser. No. 225,823. (CLASS 6. CHEMICALS, MEDICINES, AND PHARMACEUTICAL PREPARATIONS.) ARBELLA MFG. CO., New York, N. Y. Filed Jan. 12, 1926.

ARBELLA

Particular description of goods.—Dandruff Remedy.
Claims use since August, 1925.

Ser. No. 225,826. (CLASS 6. CHEMICALS, MEDICINES, AND PHARMACEUTICAL PREPARATIONS.) E. FOUGERA & CO. INC., New York, N. Y. Filed Jan. 12, 1926.

Fougerol

Particular description of goods.—Liniment and Analgesique used Externally.
Claims use since Dec. 28, 1925.

Ser. No. 225,827. (CLASS 6. CHEMICALS, MEDICINES, AND PHARMACEUTICAL PREPARATIONS.) E. FOUGERA & CO. INC., New York, N. Y. Filed Jan. 12, 1926.

Fougol

Particular description of goods.—Liniment and Analgesique used Externally.
Claims use since Dec. 28, 1925.

Ser. No. 225,845. (CLASS 6. CHEMICALS, MEDICINES, AND PHARMACEUTICAL PREPARATIONS.) E. C. RICH, INC., New York, N. Y. Filed Jan. 12, 1926. Under ten-year proviso.

RICH'S

Particular description of goods.—Jujubes Made of Menthol and Eucalyptus, of Menthol and Glycerin, and of Pure Glycerin; and Clear Gums Made of Menthol and Eucalyptus, of Menthol and Glycerin, and of Pure Glycerin.
Claims use since 1890.

Ser. No. 225,847. (CLASS 6. CHEMICALS, MEDICINES, AND PHARMACEUTICAL PREPARATIONS.) E. C. RICH, INC., New York, N. Y. Filed Jan. 12, 1926.

L-L-M's

Particular description of goods.—Cough Lozenges.
Claims use since June, 1921.

Ser. No. 225,848. (CLASS 6. CHEMICALS, MEDICINES, AND PHARMACEUTICAL PREPARATIONS.) E. C. RICH, INC., New York, N. Y. Filed Jan. 12, 1926. Under ten-year proviso.

GIBSON'S

Particular description of goods.—Cough Lozenges.
Claims use since 1887.

Ser. No. 225,859. (CLASS 6. CHEMICALS, MEDICINES, AND PHARMACEUTICAL PREPARATIONS.) BAKER DRUG COMPANY, Portland, Oreg. Filed Jan. 13, 1926.

FLU-ZONE

Particular description of goods.—Lung, Throat, and Bronchial Medicine.
Claims use since Oct. 24, 1925.

Ser. No. 225,860. (CLASS 31. FILTERS AND REFRIGERATORS.) THE BARBER ASPHALT COMPANY, Philadelphia, Pa. Filed Jan. 13, 1926.

Particular description of goods.—Refrigerators and Refrigerating Machines.
Claims use since Dec. 21, 1925.

Ser. No. 225,861. (CLASS 31. FILTERS AND REFRIGERATORS.) THE BARBER ASPHALT COMPANY, Philadelphia, Pa. Filed Jan. 13, 1926.

IROQUOIS.

Particular description of goods.—Refrigerators and Refrigerating Machines.
Claims use since Dec. 21, 1925.

Ser. No. 225,866. (CLASS 6. CHEMICALS, MEDICINES, AND PHARMACEUTICAL PREPARATIONS.) DR. PAUL BOMMARITO, Detroit, Mich. Filed Jan. 13, 1926.

Goitre-I-G-O

Particular description of goods.—Composition for the Treatment of Goitre.
Claims use since Nov. 1, 1925.

Ser. No. 225,905. (CLASS 38. PRINTS AND PUBLICATIONS.) JOSEPH ADELMAN, doing business as Supreme Publishing Co., New York, N. Y. Filed Jan. 14, 1926.

SUPREME FLASH

Particular description of goods.—Periodical.
Claims use since Oct. 1, 1925.

Ser. No. 225,907. (CLASS 6. CHEMICALS, MEDICINES, AND PHARMACEUTICAL PREPARATIONS.) ALLEN B. ARD, Iron City, Ga. Filed Jan. 14, 1926.

A. B. A.

Particular description of goods.—Insecticide.
Claims use since Nov. 21, 1925.

Ser. No. 225,949. (CLASS 38. PRINTS AND PUBLICATIONS.) BOB EDWARDS PUBLISHING CO., Minneapolis, Minn. Filed Jan. 15, 1926.

EYE OPENER

Particular description of goods.—Monthly Publication.
Claims use since Jan. 4, 1926.

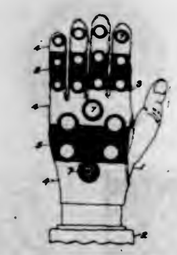
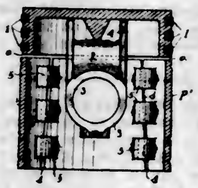
REISSUES



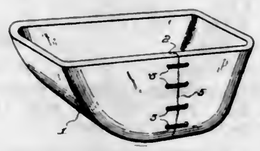
FEBRUARY 23, 1926.

16,271. METHOD AND APPARATUS FOR VULCANIZING HOLLOW ARTICLES. ABRAM E. FALOR, Akron, Ohio, assignor to The B. F. Goodrich Company, New York, N. Y., a Corporation of New York. Filed Jan. 11, 1926. Serial No. 80,681. Original No. 1,481,802, dated Jan. 29, 1924, Serial No. 536,172, filed Feb. 13, 1922. 11 Claims. (Cl. 18—53.)



8. The method of making a hollow article having an insert extending through the wall thereof which comprises placing the insert within the interior of the article, vulcanizing the article with the insert therein, and thereafter mounting the insert in the wall of the article.

16,272. SIGNAL. DAVID H. GREEN, San Francisco, Calif. Filed Feb. 11, 1925. Serial No. 8,573. Original No. 1,513,287, dated Oct. 28, 1924, Serial No. 611,560, filed Jan. 9, 1923. 2 Claims. (Cl. 88—1.)

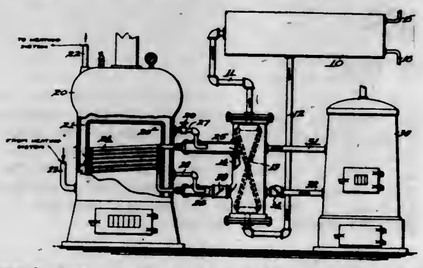


1. A traffic signal, comprising a thumbless glove having white and black cross-stripes positioned alternately on the entire back thereof, and the same studded with colored brilliants for the purpose set forth.

16,273. PISTON FOR ENGINE CYLINDERS. ROLAND M. HOWDESHELL, Elsberry, Mo., assignor, by mesne assignments, to The Cleveland Trust Company, Cleveland, Ohio, a Corporation of Ohio. Filed Aug. 20, 1925. Serial No. 51,529. Original No. 1,473,283, dated Nov. 6, 1923, Serial No. 383,519, filed May 22, 1920. 23 Claims. (Cl. 74—108.)

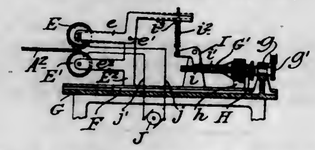
1. A piston of the class described including a head comprising an end portion and wall portion, a sectional skirt portion, hood members connecting the sections of said skirt portion, and rib members integrally connecting the sections of the skirt with the end of the head member.

16,274. METHOD OF WELDING METALLIC STRUCTURES. ROYAL MATTICE, Bethlehem, Pa. Filed Jan. 15, 1926. Serial No. 81,572. Original No. 1,515,692, dated Nov. 18, 1924, Serial No. 691,640, filed Feb. 9, 1924. 19 Claims. (Cl. 219—10.)



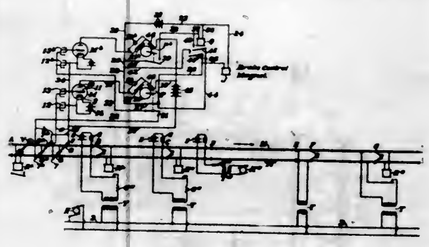
1. The method of connecting abutting metallic members which are subjected in use to comparatively wide fluctuations of temperature, which involves forming an opening in each of said members, said openings being disposed in spaced relation on opposite sides of the abutting faces of said members, assembling with said members a metallic connecting element having angular projections respectively adapted to enter said openings, said projections being entered in said openings, and securing said connecting element in assembled relation to said members so as to retain said projections in said openings.

16,275. INDIRECT WATER-HEATING APPARATUS. CHETWOOD SMITH, Worcester, Mass., assignor to Stack Heater Company, Boston, Mass., a Corporation of Massachusetts. Filed Mar. 26, 1923. Serial No. 627,887. Original No. 1,379,581, dated May 24, 1921, Serial No. 295,219, filed May 6, 1919. 13 Claims. (Cl. 122—33.)



4. A water heating apparatus comprising an indirect heating chamber, a main water heater, an auxiliary heat-

ing device capable of heating water to a higher temperature, upper and lower passages connecting said auxiliary heating device to said indirect heating chamber and

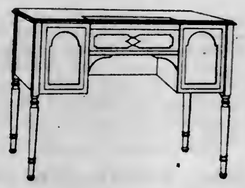


branch pipes connecting said passages to said main water heater, said pipes being extended into and along said passages in a direction away from said auxiliary heating device.

16,276. METHOD OF WELDING. SPENCER C. CARY, Brooklyn, N. Y., assignor to Cary Manufacturing Co., Brooklyn, N. Y., a Corporation of New York. Filed Oct. 27, 1920. Serial No. 420,019. Original No. 1,326,912, dated Jan. 6, 1920, Serial No. 89,289, filed Apr. 6, 1916. 5 Claims. (Cl. 219—10.)

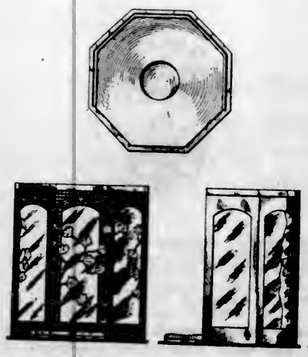
1. The process of welding metallic sheets to form a continuous sheet, consisting in sand blasting both sides of the edges of the sheets, lapping the edges of the two sheets, pressing the lapped edges and passing a current through the sand blasted portions of the sheets to continuously weld the lapped portions.

16,277. RAILWAY-TRAFFIC-CONTROLLING APPARATUS. LEMUEL F. HOWARD, Edgewood, Pa., assignor to The Union Switch & Signal Company, Swissvale, Pa., a Corporation of Pennsylvania. Filed July 21, 1920. Serial No. 398,028. Original application filed Sept. 6, 1916, Serial No. 118,632. Renewal application filed May 20, 1918, Serial No. 235,695. Continued and application filed June 25, 1918, Serial No. 241,733. Original No. 1,341,982, dated June 1, 1920. 33 Claims. (Cl. 246—41.)



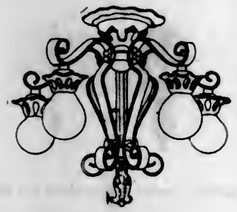
1. Railway traffic controlling apparatus comprising governing means on a vehicle arranged to retard the vehicle except when affected by traffic controlled means in the trackway, a portion of track equipped with such traffic controlled means and a portion of track not so equipped, and means adjacent the entrance end of the unequipped portion of track for rendering said governing means ineffective to retard the vehicle while the latter is passing through the unequipped portion of track.

DESIGNS



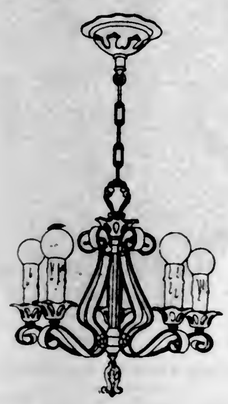
FEBRUARY 23, 1926.

69,470. RADIO CONSOLE CABINET. CYRUS L. ADLER, Louisville, Ky. Filed Apr. 29, 1925. Serial No. 13,257. Term of patent 3½ years.



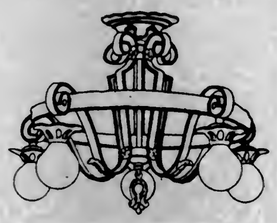
The ornamental design for a radio console cabinet, substantially as shown.

69,471. COMBINED STAND AND HOLDER FOR PERFUME BOTTLES. BLANCHE STEVENS ARVOY, née RENEAUX, Paris, France, and CHARLES LIONEL MARCUS, New York, N. Y. Filed Dec. 12, 1924. Serial No. 11,687. Term of patent 3½ years.



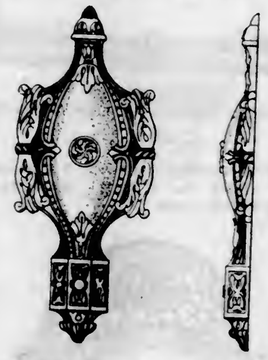
The ornamental design for a combined stand and holder for perfume bottles, as shown and described.

69,472. ELECTRIC-LIGHT FIXTURE. JOSEPH JOHN BALK, Buffalo, N. Y., assignor to Markel Lighting Fitments, Inc., Buffalo, N. Y., a Corporation of New York. Filed Oct. 28, 1925. Serial No. 15,274. Term of patent 3½ years.



The ornamental design for an electric light fixture, as shown.

69,473. ELECTRIC-LIGHT FIXTURE. JOSEPH JOHN BALK, Buffalo, N. Y., assignor to Markel Lighting Fitments, Inc., Buffalo, N. Y., a Corporation of New York. Filed Oct. 28, 1925. Serial No. 15,275. Term of patent 3½ years.



The ornamental design for an electric light fixture, as shown.

69,474. ELECTRIC-LIGHT FIXTURE. JOSEPH JOHN BALK, Buffalo, N. Y., assignor to Markel Lighting Fitments, Inc., Buffalo, N. Y., a Corporation of New York. Filed Oct. 28, 1925. Serial No. 15,276. Term of patent 3½ years.

The ornamental design for an electric light fixture, as shown.

69,475. WALL PLATE FOR ELECTRIC-LIGHT FIXTURES. JOSEPH JOHN BALK, Buffalo, N. Y., assignor to Markel Lighting Fitments, Inc., Buffalo, N. Y., a Corporation of New York. Filed Oct. 28, 1925. Serial No. 15,277. Term of patent 3½ years.

The ornamental design for a wall plate for electric light fixtures, as shown.

69,476. HEADLAMP BEZEL. HARRY H. BASSETT, Flint, Mich. Filed Nov. 19, 1923. Serial No. 7,822. Term of patent 14 years.

The ornamental design for a headlamp bezel substantially as shown.

69,477. BRIDAL CROWN. MICHAEL J. BEDACK, Brooklyn, N. Y. Filed Jan. 8, 1926. Serial No. 16,010. Term of patent 3½ years.

The ornamental design for a bridal crown, as shown.

69,478. BUMPER. DONALD L. BENTON, Los Angeles, Calif., assignor to American Chain Company, Inc., Bridgeport, Conn., a Corporation of New York. Filed Dec. 7, 1925. Serial No. 15,671. Term of patent 14 years.

The ornamental design for a bumper as shown.

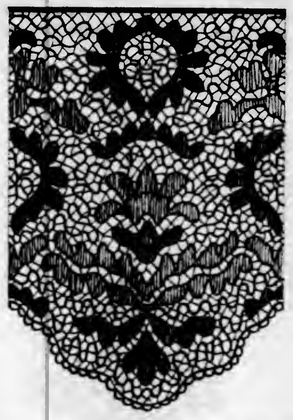
69,479. BRIDAL CROWN. MICHAEL J. BEDACK, Brooklyn, N. Y. Filed Jan. 8, 1926. Serial No. 16,008. Term of patent 3½ years.

The ornamental design for a bridal crown, as shown.

69,480. BRIDAL CROWN. MICHAEL J. BEDACK, Brooklyn, N. Y. Filed Jan. 8, 1926. Serial No. 16,009. Term of patent 3½ years.

The ornamental design for a bridal crown, as shown.

69,481. PLATE FOR LIGHTING FIXTURES. NATHAN I. BERGER, New York, N. Y., assignor to Sandow Tool Co., U. S. A., New York, N. Y., a Corporation of New York. Filed Dec. 15, 1925. Serial No. 15,764. Term of patent 3½ years.



The ornamental design for a plate for lighting fixtures, as shown.

69,482. PLATE FOR LIGHTING FIXTURES. NATHAN I. BERGER, New York, N. Y., assignor to Sandow Tool Co., U. S. A., New York, N. Y., a Corporation of New York. Filed Dec. 15, 1925. Serial No. 15,765. Term of patent 3½ years.

The ornamental design for a plate for lighting fixtures, as shown.

69,483. LACE. CHARLES WILFRED BIRKIN and EDWIN THOMAS SANDS, Broadway, Nottingham, England, assignors to Birkin and Company, Nottingham, England. Filed Jan. 2, 1926. Serial No. 15,942. Term of patent 3½ years.

The ornamental design for lace substantially as shown.

69,484. LACE. CHARLES WILFRED BIRKIN and EDWIN THOMAS SANDS, Broadway, Nottingham, England, assignors to Birkin and Company, Nottingham, England. Filed Jan. 2, 1926. Serial No. 15,943. Term of patent 3½ years.

The ornamental design for lace substantially as shown.

69,485. CASING FOR A VENDING MACHINE. RICHARD C. BRADLEY, New York, N. Y., assignor to Emery Automatic Chain Stores, Inc., New York, N. Y., a Corporation of New York. Filed Dec. 11, 1924. Serial No. 11,666. Term of patent 3½ years.

The ornamental design for a casing for a vending machine as shown.

69,486. BOTTLE. WILLIAM H. BRAUN, Cincinnati, Ohio, assignor to Fallis Inc., Cincinnati, Ohio, a Corporation of Ohio. Filed Sept. 19, 1925. Serial No. 14,823. Term of patent 7 years.

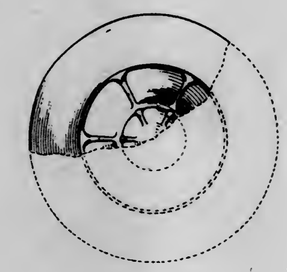
The ornamental design for a bottle, as shown.

69,487. TEXTILE FABRIC. JOHN S. BOYD, Williamstown, Mass., assignor to John S. Boyd Co., Inc., Williamstown, Mass., a Corporation of Massachusetts. Filed Apr. 10, 1923. Serial No. 5,754. Term of patent 7 years.

The ornamental design for a textile fabric, as shown.

69,488. CANDLE CUP. FRANK J. CAESAR, La Grange, Ill., assignor to R. Williamson & Co., Chicago, Ill., a Corporation of Illinois. Filed Dec. 8, 1925. Serial No. 15,621. Term of patent 3½ years.

The ornamental design for a candle cup, as shown.

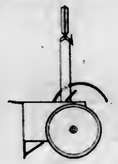


69,489. BALL-LAMP ADAPTER. FRANK J. CAESAR, La Grange, Ill., assignor to R. Williamson & Co., Chicago, Ill., a Corporation of Illinois. Filed Dec. 8, 1925. Serial No. 15,622. Term of patent 3½ years.

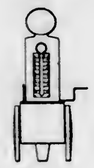
The ornamental design for a ball lamp adapter, as shown.

69,490. CANOPY FOR LIGHTING FIXTURES. FRANK J. CAESAR, La Grange, Ill., assignor to R. Williamson & Co., Chicago, Ill., a Corporation of Illinois. Filed Dec. 3, 1925. Serial No. 15,623. Term of patent 3½ years.

The ornamental design for a canopy, for lighting fixtures, as shown.



69,491. CANOPY FOR LIGHTING FIXTURES. FRANK J. CAESAR, La Grange, Ill., assignor to R. Williamson & Co., Chicago, Ill., a Corporation of Illinois. Filed Dec. 3, 1925. Serial No. 15,624. Term of patent 3½ years.



The ornamental design for a canopy for lighting fixtures, as shown.

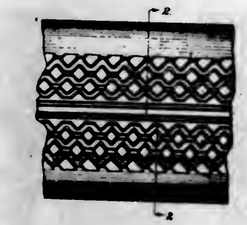
69,492. TOY FILLING STATION. JULIUS CHEIN, New York, N. Y. Filed July 30, 1924. Serial No. 10,319. Term of patent 3½ years.

The ornamental design for a toy filling station, as shown.

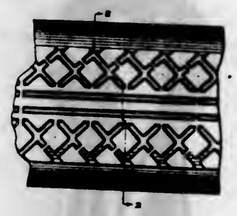
69,493. BOTTLE. FRANK CIARDI, Dover, N. J. Filed Dec. 24, 1925. Serial No. 15,874. Term of patent 3½ years.

The ornamental design for a bottle, as shown.

69,494. CAKE OF SOAP OR SIMILAR ARTICLE. LEON COHN, Paris, France. Filed July 21, 1925. Serial No. 14,161. Term of patent 14 years.

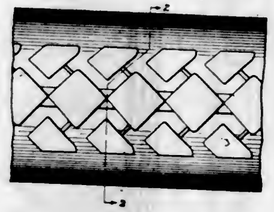


The ornamental design for a cake of soap or similar article substantially as shown.

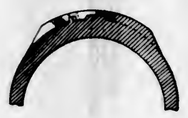


69,495. TIRE. ASA B. COOLEY, Hubbard Woods, Ill., assignor to Montgomery Ward & Co., Incorporated, Chicago, Ill., a Corporation of Illinois. Filed Nov. 17, 1924. Serial No. 11,389. Term of patent 14 years.

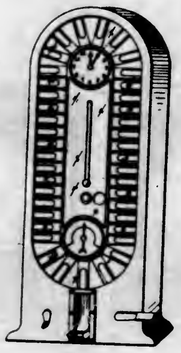
The ornamental design for a tire, as shown.



69,496. TIRE. ASA B. COOLEY, Hubbard Woods, Ill., assignor to Montgomery Ward & Co., Incorporated, Chicago, Ill., a Corporation of Illinois. Filed Nov. 17, 1924. Serial No. 11,390. Term of patent 14 years.



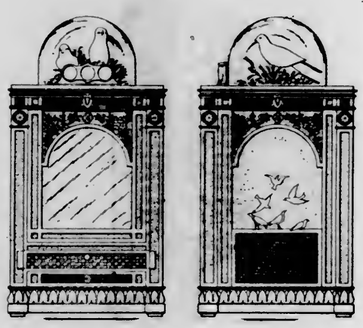
The ornamental design for a tire, as shown.



69,497. TIRE. ASA B. COOLEY, Hubbard Woods, Ill., assignor to Montgomery Ward & Co., Incorporated, Chicago, Ill., a Corporation of Illinois. Filed Nov. 17, 1924. Serial No. 11,391. Term of patent 14 years.

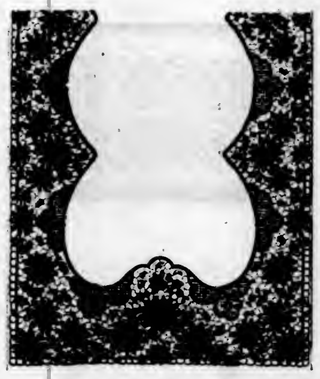
The ornamental design for a tire, as shown.

69,498. VENDING-MACHINE CASING. WILLIAM G. CUTLER, Glendale, Calif. Filed Sept. 2, 1925. Serial No. 14,694. Term of patent 7 years.



The ornamental design for a vending machine casing as shown.

69,499. FOUNTAIN PEN. DAVID L. DAVIS, Fort Madison, Iowa, assignor to W. A. Sheaffer Pen Company, Fort Madison, Iowa, a Corporation of Delaware. Filed Oct. 10, 1924. Serial No. 11,013. Term of patent 3½ years.

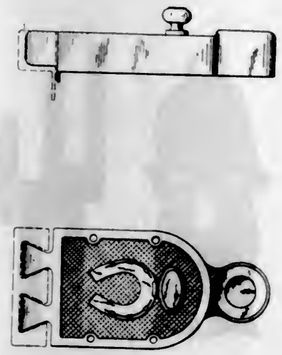


The ornamental design for a fountain pen, as shown.

69,500. VENDING-MACHINE CASING. ALBERT E. DEBUS, Chicago, Ill. Filed Oct. 27, 1925. Serial No. 15,268. Term of patent 7 years.

The ornamental design for a vending-machine casing, as shown.

69,501. LACE TRIMMING FOR DOILY OR SIMILAR ARTICLE. LAWRENCE DINKELSPIEL, West New York, N. J., assignor to Harnapp, Dinkelspiel & Co. Inc., a Corporation of New York. Filed Jan. 7, 1926. Serial No. 15,990. Term of patent 3½ years.



The ornamental design for lace trimming for doily or similar article, as shown.

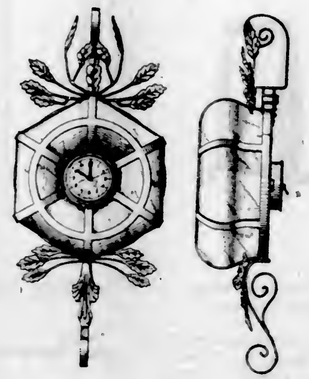
69,502. BOOK END. JEANNE LOUISE DRUCKLIEB, New York, N. Y. Filed Nov. 5, 1925. Serial No. 15,360. Term of patent 7 years.

The ornamental design for a book end, as shown.

69,503. DOORLOCK. SAMUEL EDELSON, New York, N. Y. Filed May 27, 1924. Serial No. 9,720. Term of patent 14 years.

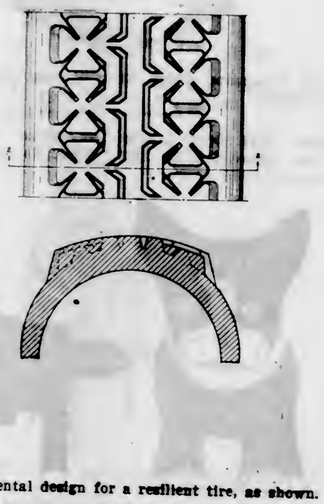
The ornamental design for a doorlock, as shown.

69,504. TEXTILE FABRIC. LAWRENCE E. ELLIS, New York, N. Y. Filed Dec. 7, 1925. Serial No. 15,669. Term of patent 7 years.



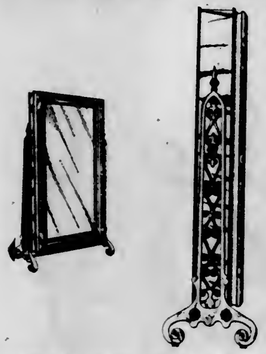
The ornamental design for a textile fabric substantially as shown.

69,505. PERFUME CONTAINER. JOSEPH A. FIELDS, New York, N. Y. Filed July 22, 1924. Serial No. 10,221. Term of patent 7 years.



The ornamental design for a perfume container as shown.

69,506. CLOCK CASE. MAUD C. FOX, New York, N. Y. Filed July 18, 1925. Serial No. 14,138. Term of patent 3½ years.

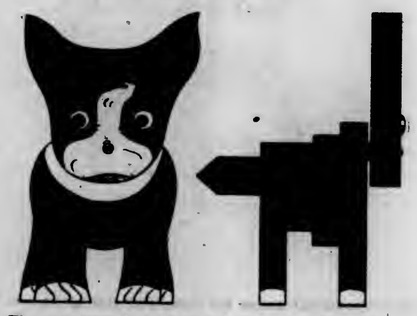


The ornamental design for a clock case, as shown.

69,507. RESILIENT TIRE. WADE S. GALVIN, Akron, Ohio, assignor to The Akron Standard Mold Company, Akron, Ohio, a Corporation of Ohio. Filed Nov. 20, 1925. Serial No. 15,481. Term of patent 14 years.

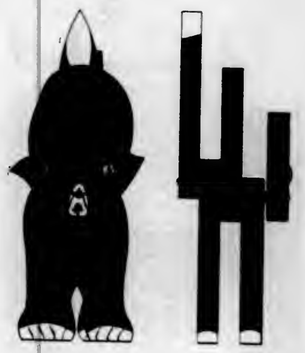
The ornamental design for a resilient tire, as shown.

69,508. ADVERTISING FRAME. VICTOR GERARD, Los Angeles, Calif., assignor to Mystic Mirror Inc., Los Angeles, Calif., a Corporation of Nevada. Filed Dec. 2, 1925. Serial No. 15,611. Term of patent 14 years.



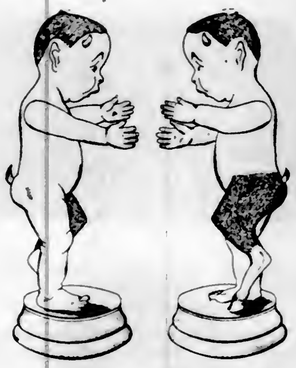
The ornamental design for an advertising frame substantially as shown.

69,509. LIGHTING FIXTURE. EDGAR A. GILLINDER, Philadelphia, Pa. Filed Oct. 4, 1923. Serial No. 7,395. Term of patent 3½ years.



The ornamental design for a lighting fixture showing my design.

69,510. TOY DOG. ARODD LEE GOULD, Long Beach, Calif. Filed Oct. 22, 1925. Serial No. 15,219. Term of patent 3½ years.

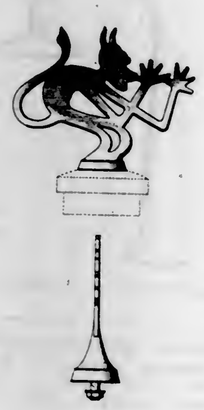


The ornamental design for a toy dog, as shown.

69,511. TOY CAT. ARODD LEE GOULD, Long Beach, Calif. Filed Oct. 22, 1925. Serial No. 15,220. Term of patent 3½ years.

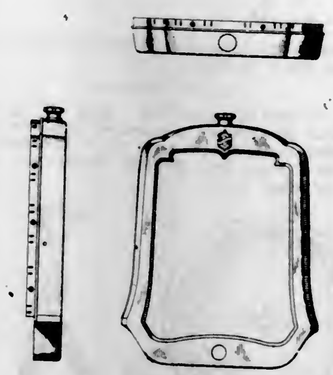
The ornamental design for a toy cat, as shown.

69,512. STATUETTE. GERHART HAMMER and HARALD K. BERSETH, Colfax, Wis. Filed Dec. 31, 1925. Serial No. 15,919. Term of patent 14 years.



The ornamental design for a statuette, as shown.

69,513. ORNAMENT FOR MOTORMETERS. MILLICENT HOGO and JOSEPH C. DE HAVEN, Los Angeles, Calif. Filed Sept. 28, 1925. Serial No. 14,920. Term of patent 3½ years.

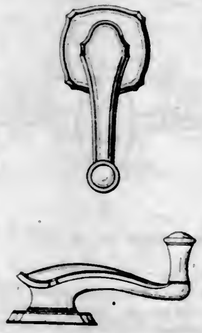


The ornamental design for an ornament for motormeters, as shown.

69,514. RADIATOR-CAP ORNAMENT. WILLIAM F. HOLEKA, San Francisco, Calif. Filed May 2, 1925. Serial No. 13,305. Term of patent 3½ years.

The ornamental design for a radiator cap ornament, as shown.

69,515. RADIATOR SHELL FOR AUTOMOBILES. ROBERT K. JACK, Lansing, Mich. Filed July 20, 1925. Serial No. 14,144. Term of patent 14 years.

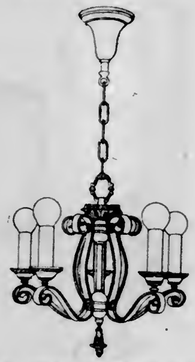


The ornamental design for a radiator shell for automobiles as shown.

69,516. BIRDCAGE SUPPORT OR SIMILAR ARTICLE. SIMON KLEIN, Brooklyn, N. Y. Filed Sept. 25, 1925. Serial No. 14,907. Term of patent 3½ years.

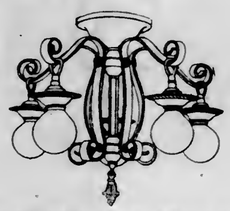
The ornamental design for a birdcage support or similar article, as shown.

69,517. HANDLE. ARCHER L. KNAPP, Detroit, Mich., assignor to Packard Motor Car Company, Detroit, Mich., a Corporation of Michigan. Filed Feb. 7, 1925. Serial No. 12,291. Term of patent 3½ years.



The ornamental design for a handle, as shown.

69,518. CHAIR. NICHOLAS L. KUHNEN, Elkhart, Ind. Filed Nov. 19, 1925. Serial No. 15,465. Term of patent 3½ years.



The ornamental design for a chair, as shown.

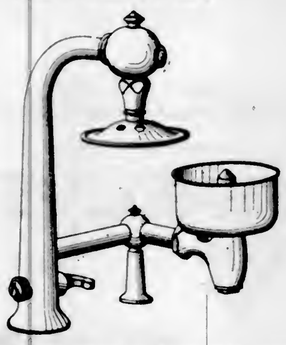
69,519. ELECTRIC-LIGHT FIXTURE. CHARLES W. LOGAN, Kenmore, N. Y., assignor to Markel Lighting Fitments, Inc., Buffalo, N. Y., a Corporation of New York. Filed Oct. 28, 1925. Serial No. 15,270. Term of patent 3½ years.

The ornamental design for an electric light fixture, as shown.

69,520. ELECTRIC-LIGHT FIXTURE. CHARLES W. LOGAN, Kenmore, N. Y., assignor to Markel Lighting Fitments, Inc., Buffalo, N. Y., a Corporation of New York. Filed Oct. 28, 1925. Serial No. 15,271. Term of patent 3½ years.

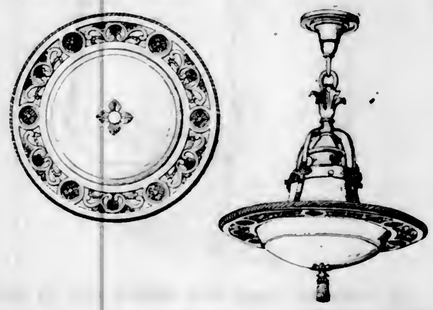
The ornamental design for an electric light fixture, as shown.

69,521. WALL PLATE FOR ELECTRIC-LIGHT FIXTURES. CHARLES W. LOGAN, Kenmore, N. Y., assignor to Markel Lighting Fitments, Inc., Buffalo, N. Y., a Corporation of New York. Filed Oct. 28, 1925. Serial No. 15,272. Term of patent 3½ years.



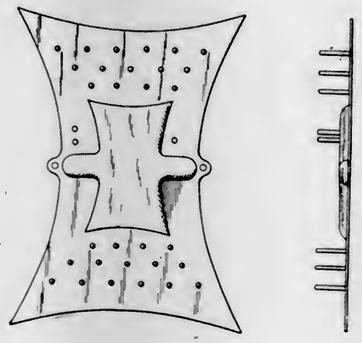
The ornamental design for a wall plate for electric light fixtures, as shown.

69,522. PRESSURE-LIQUID VALVE. BERNARD LUTSKY and SIMON KREISBERG, Brooklyn, N. Y. Filed Sept. 1, 1925. Serial No. 14,681. Term of patent 3½ years.



The ornamental design for a pressure liquid valve, as shown.

69,523. COMBINED PRESSURE-LIQUID VALVE AND RINSER. BERNARD LUTSKY and SIMON KREISBERG, Brooklyn, N. Y. Filed Sept. 1, 1925. Serial No. 14,682. Term of patent 3½ years.

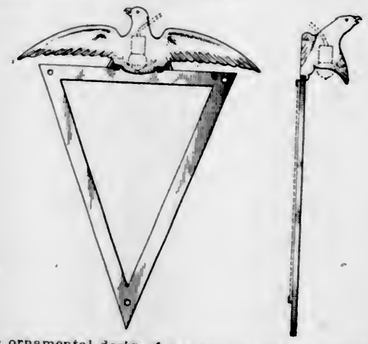


The ornamental design for a combined pressure liquid valve and rinser, as shown.

69,524. LIGHTING FIXTURE. JOHN C. METTLER, Evanston, Ill., assignor to Beardslee Chandelier Manufacturing Company, Chicago, Ill., a Corporation of Delaware. Filed Oct. 6, 1925. Serial No. 15,037. Term of patent 7 years.

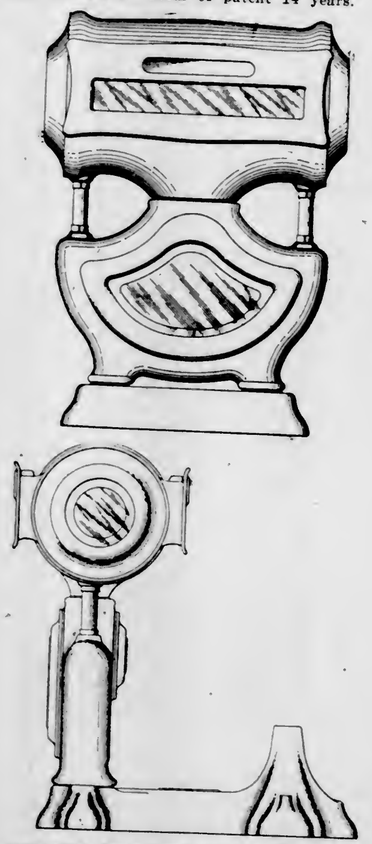
The ornamental design for a lighting fixture as shown.

69,525. COMBINED SPOOL HOLDER AND PINCUSHION. FRANCES PAUKER, New York, N. Y. Filed Dec. 8, 1925. Serial No. 15,693. Term of patent 7 years.



The ornamental design for a combined spool holder and pincushion as shown.

69,526. PEDESTAL-MOUNTED RADIOREPRODUCER. ALBERT O. PRICE, Coshocton, Ohio. Filed Dec. 24, 1925. Serial No. 15,847. Term of patent 14 years.

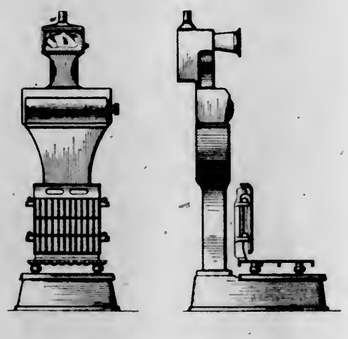


The ornamental design for a pedestal mounted radio reproducer as shown.

69,527. VEHICLE RADIATOR ORNAMENT. JULIAN RANKIN, Louisa, Ky. Filed May 2, 1925. Serial No. 13,304. Term of patent 7 years.

The ornamental design for a vehicle radiator ornament, as shown.

69,528. SCALE CASING. ORWELL C. REEVES, Toledo, Ohio, assignor to Toledo Scale Company, Toledo, Ohio, a Corporation of New Jersey. Filed June 20, 1924. Serial No. 9,918. Term of patent 14 years.



The ornamental design for a scale casing as shown.

69,529. CHANDELIER OR ARTICLE OF SIMILAR NATURE. ISIDOR ROSENBLATT, New York, N. Y. Filed Dec. 28, 1925. Serial No. 15,881. Term of patent 3½ years.

The ornamental design for a chandelier or article of similar nature as shown.

69,530. SCALE. HARRY C. SCHAPER, St. Louis, Mo., assignor to The Weight-O-Graph Company, St. Louis, Mo., a Corporation of Missouri. Filed July 21, 1923. Serial No. 6,822. Term of patent 3½ years.

The ornamental design for a scale, as shown.

69,531. PLATE OR SIMILAR ARTICLE. URASABURO TOMITA, New York, N. Y., assignor to Morimura Bros. Inc., New York, N. Y., a Corporation of Japan. Filed Aug. 10, 1925. Serial No. 14,373. Term of patent 7 years.

The ornamental design for a plate or similar article, as shown.

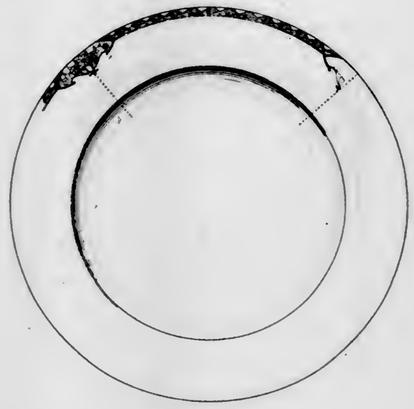
69,532. PLATE OR SIMILAR ARTICLE. URASABURO TOMITA, New York, N. Y., assignor to Morimura Bros. Inc., New York, N. Y., a Corporation of Japan. Filed Aug. 10, 1925. Serial No. 14,374. Term of patent 7 years.

The ornamental design for a plate or similar article, as shown.

69,533. PLATE OR SIMILAR ARTICLE. URASABURO TOMITA, New York, N. Y., assignor to Morimura Bros. Inc., New York, N. Y., a Corporation of Japan. Filed Aug. 10, 1925. Serial No. 14,375. Term of patent 7 years.

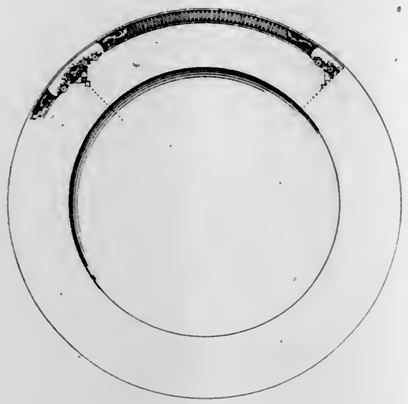
The ornamental design for a plate or similar article, as shown.

69,534. PLATE OR SIMILAR ARTICLE. URASABURO TOMITA, New York, N. Y., assignor to Morimura Bros. Inc., New York, N. Y., a Corporation of Japan. Filed Aug. 10, 1925. Serial No. 14,376. Term of patent 7 years.



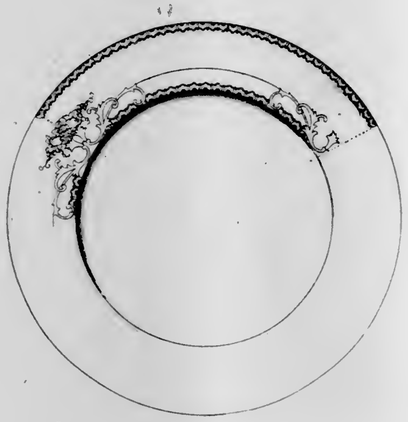
The ornamental design for a plate or similar article, as shown.

69,535. PLATE OR SIMILAR ARTICLE. URASABURO TOMITA, New York, N. Y., assignor to Morimura Bros. Inc., New York, N. Y., a Corporation of Japan. Filed Aug. 10, 1925. Serial No. 14,377. Term of patent 7 years.



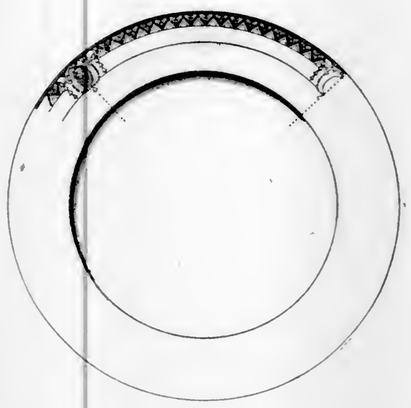
The ornamental design for a plate or similar article, as shown.

69,536. PLATE OR SIMILAR ARTICLE. URASABURO TOMITA, New York, N. Y., assignor to Morimura Bros. Inc., New York, N. Y., a Corporation of Japan. Filed Aug. 10, 1925. Serial No. 14,378. Term of patent 7 years.



The ornamental design for a plate or similar article, as shown.

69,537. PLATE OR SIMILAR ARTICLE. URASABURO TOMITA, New York, N. Y., assignor to Morimura Bros. Inc., New York, N. Y., a Corporation of Japan. Filed Aug. 10, 1925. Serial No. 14,379. Term of patent 7 years.



The ornamental design for a plate or similar article, as shown.

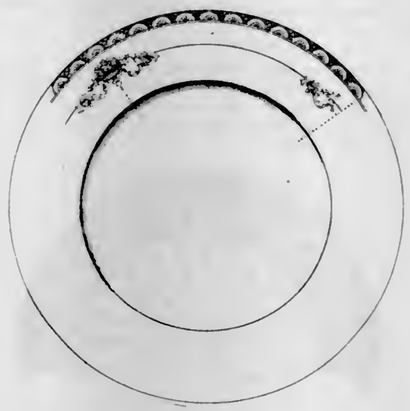
69,538. PLATE OR SIMILAR ARTICLE. URASABURO TOMITA, New York, N. Y., assignor to Morimura Bros. Inc., New York, N. Y., a Corporation of Japan. Filed Aug. 10, 1925. Serial No. 14,380. Term of patent 7 years.

The ornamental design for a plate or similar article, as shown.

69,539. PLATE OR SIMILAR ARTICLE. URASABURO TOMITA, New York, N. Y., assignor to Morimura Bros. Inc., New York, N. Y., a Corporation of Japan. Filed Aug. 10, 1925. Serial No. 14,381. Term of patent 7 years.

The ornamental design for a plate or similar article, as shown.

69,540. PLATE OR SIMILAR ARTICLE. URASABURO TOMITA, New York, N. Y., assignor to Morimura Bros. Inc., New York, N. Y., a Corporation of Japan. Filed Aug. 10, 1925. Serial No. 14,382. Term of patent 7 years.

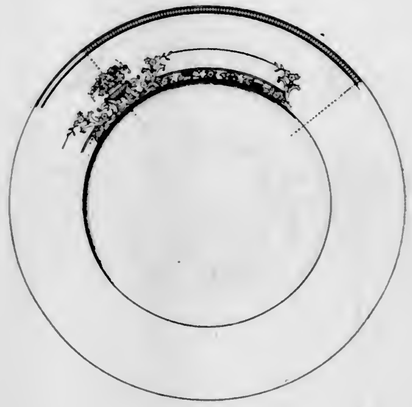


The ornamental design for a plate or similar article, as shown.

69,541. PLATE OR SIMILAR ARTICLE. URASABURO TOMITA, New York, N. Y., assignor to Morimura Bros. Inc., New York, N. Y., a Corporation of Japan. Filed Aug. 10, 1925. Serial No. 14,383. Term of patent 7 years.

The ornamental design for a plate or similar article, as shown.

69,542. PLATE OR SIMILAR ARTICLE. URASABURO TOMITA, New York, N. Y., assignor to Morimura Bros. Inc., New York, N. Y., a Corporation of Japan. Filed Aug. 10, 1925. Serial No. 14,384. Term of patent 7 years.



The ornamental design for a plate or similar article, as shown.

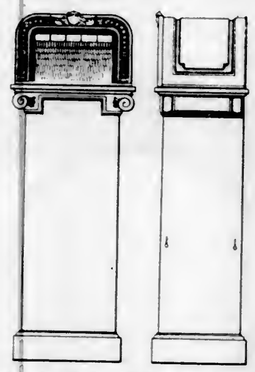
69,543. PLATE OR SIMILAR ARTICLE. URASABURO TOMITA, New York, N. Y., assignor to Morimura Bros. Inc., New York, N. Y., a Corporation of Japan. Filed Aug. 10, 1925. Serial No. 14,385. Term of patent 7 years.

The ornamental design for a plate or similar article, as shown.

69,544. PLATE OR SIMILAR ARTICLE. URASABURO TOMITA, New York, N. Y., assignor to Morimura Bros. Inc., New York, N. Y., a Corporation of Japan. Filed Aug. 10, 1925. Serial No. 14,386. Term of patent 7 years.

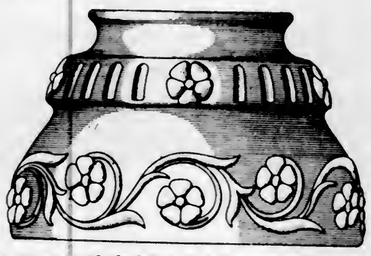
The ornamental design for a plate or similar article, as shown.

69,545. PLATE OR SIMILAR ARTICLE. URASABURO TOMITA, New York, N. Y., assignor to Morimura Bros. Inc., New York, N. Y., a Corporation of Japan. Filed Aug. 10, 1925. Serial No. 14,387. Term of patent 7 years.



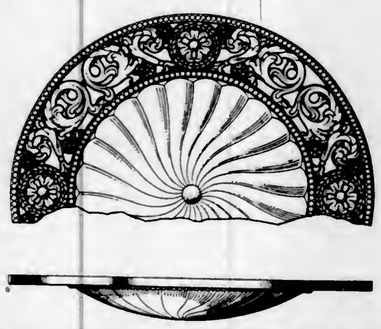
The ornamental design for a plate or similar article, as shown.

69,546. PLATE OR SIMILAR ARTICLE. URASABURO TOMITA, New York, N. Y., assignor to Morimura Bros. Inc., New York, N. Y., a Corporation of Japan. Filed Aug. 10, 1925. Serial No. 14,388. Term of patent 7 years.



The ornamental design for a plate or similar article, as shown.

69,547. MOTION-PICTURE-PROJECTING CABINET. RODRIGUE JOSEPH ANTOINE TRIANA, ANDRÉ ELIE LAURENT TRIANA, and JUAN ORTIZ ESCOFET, Paris, France. Filed July 11, 1925. Serial No. 14,061. Term of patent 3½ years.

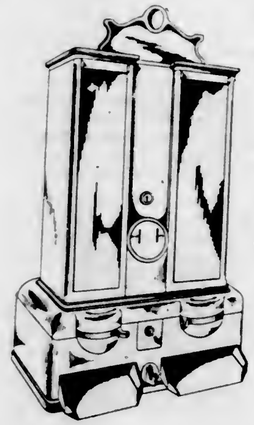


The ornamental design for a motion picture projecting cabinet as shown.

69,548. LAMP SHADE OR SIMILAR ARTICLE. GUSTAVE E. VILLARET, Leonia, N. J., assignor to The Phoenix Glass Company, Pittsburgh, Pa., a Corporation of West Virginia. Filed Nov. 10, 1925. Serial No. 15,394. Term of patent 3½ years.

The ornamental design for a lamp shade or similar article, as shown.

69,549. PLATE FOR LIGHTING FIXTURES. LESTER R. WELLMAN, Chicago, Ill., assignor to Friedley-Voshardt Co., Chicago, Ill., a Corporation of Illinois. Filed Mar. 3, 1925. Serial No. 12,543. Term of patent 3½ years.

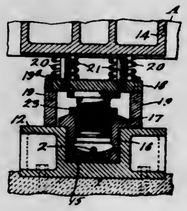


The ornamental design for a plate for lighting fixtures, as shown.

69,550. LANTERN. LESTER R. WELLMAN, Chicago, Ill., assignor to Friedley-Voshardt Co., Chicago, Ill., a Corporation of Illinois. Filed Mar. 24, 1925. Serial No. 12,866. Term of patent 7 years.

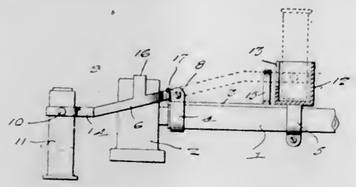
The ornamental design for a lantern, as shown.

69,551. VENDING-MACHINE CASING. FRED L. WILKE and WILLIAM BURNS, Chicago, Ill. Filed Oct. 24, 1925. Serial No. 15,248. Term of patent 3½ years.



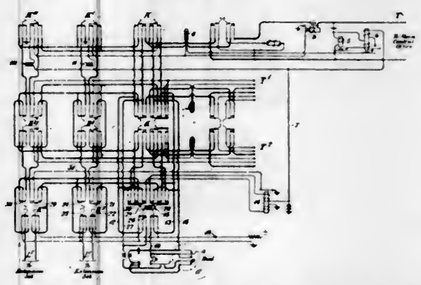
The ornamental design for a vending machine casing, as shown.

PATENTS



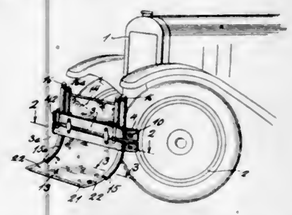
GRANTED FEBRUARY 23, 1926.

1,573,792. CONDENSER SUPPORT. ROBERT W. ALLERTON, South Orange, N. J., assignor to Worthington Pump and Machinery Corporation, New York, N. Y., a Corporation of Virginia. Filed Apr. 8, 1924. Serial No. 704,914. 4 Claims. (Cl. 60—95.)



2. The combination with a condenser, its base, and spring supporting units for said condenser, of separate movable members on which the respective units are mounted, a fluid pressure operated jack for each unit including pressure indicating mechanism arranged to cooperate with said base and said movable members for indicating the pressure imposed on the separate units, and means for supporting the movable members when the jacks are removed.

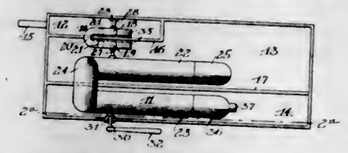
1,573,793. AIR-PRESSURE-GAUGE ATTACHMENT FOR INFLATING HOSE. ARTHUR G. ANDERSON, Osage, Minn. Filed Feb. 3, 1925. Serial No. 6,586. 6 Claims. (Cl. 248—20.)



6. An air gauge attachment for an inflating hose comprising a bar supported on said hose adjacent the usual inflating valve head carried on the free end of the hose, a yoke member pivotally supported at one end on the forward end of said bar, a forkshaped member carried by the opposite end of said yoke, means associated with said fork shaped member for supporting an air gauge in a vertical position, an open top holder supported on the inner end of said bar and adapted to receive said air gauge when the same is in an inoperative position and the yoke is disposed over said bar, means for holding said yoke member against upward swinging movement when disposed in an inoperative position, said yoke member adapted to be swung over said valve head whereby the air gauge is disposed in an operative position, a cross seat associated with the yoke and engaging the top of the valve head when the air gauge is in an operative position for limiting the downward swinging movement of the yoke member, and means for preventing the upward swinging movement of the yoke member when said air gauge is in operative position.

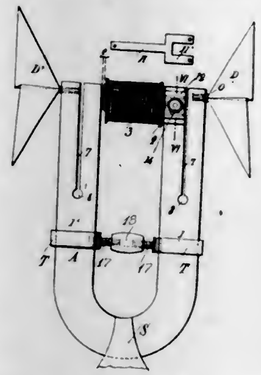
1,573,794. TELEPHONE-EXCHANGE SYSTEM. RAND S. BAILEY, Montclair, N. J., assignor to American Telephone and Telegraph Company, a Corporation of New York. Filed Nov. 12, 1923. Serial No. 674,301. 3 Claims. (Cl. 179—42.)

1. In a private branch exchange comprising a plurality of subscribers' extensions, a plurality of transmission circuits for interconnecting said extensions, switching means associated with each transmission circuit at each extension for connecting a calling extension and transmission circuit, a ringing key for each extension, and means responsive to the operation of a ringing key at a called extension for connecting such extension with a calling extension.



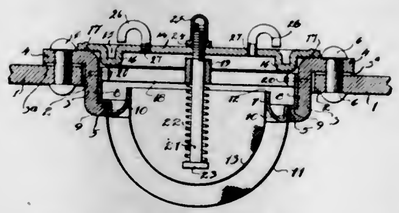
1,573,795. AUTOMATIC SAFETY PICK-UP DEVICE FOR AUTOMOBILES. JOSEPH S. BALL, Denver, Colo., assignor of one-half to Alice T. Moore, Denver, Colo. Filed Sept. 24, 1925. Serial No. 58,288. 3 Claims. (Cl. 293—25.)

1. An automatic safety pick up device for automobiles comprising, in combination, a roller, means for securing said roller in horizontal position in front of an automobile, a flexible fabric having one end secured to the roller and adapted to be rolled thereonto and therefrom, the other end of said fabric being secured to a bar, means for guiding said bar towards and away from said roller, spring means for urging said bar away from the roller, means for holding it in collapsed position and means for rendering the holding means inoperative.



1,573,796. LIQUID-TRANSFER MEANS. JOSEPH A. BARR, Coldwater, N. Y. Filed Aug. 19, 1925. Serial No. 51,271. 10 Claims. (Cl. 4—42.)

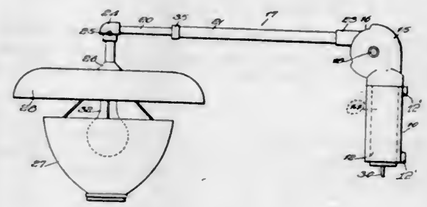
1. The combination with receiving, supply and discharge receptacles and a liquid supply source connected with the receiving receptacle, of an adjustable siphon for transferring from the receiving to the supply receptacle, a second siphon for transferring from the supply to the discharge receptacle operatively connected with the first for moving the latter to a predetermined position, the



second mentioned siphon being adapted upon delivering a predetermined charge to be returned to normal position by the first mentioned siphon when moving from said predetermined position.

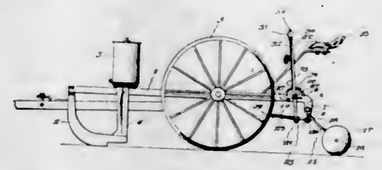
1,573,797. ELECTROVIBRATOR. PIERRE EMILE BEAL and LOUIS LUCIEN EDOUARD FANET, Levallois-Perret, France. Filed Oct. 28, 1925. Serial No. 65,413. 15 Claims. (Cl. 179—109.)

13. An electro-vibrator comprising, in combination, a horse shoe magnet having branches each provided with an elongated slot extending from an intermediate portion through the end thereof, an electric coil operatively interposed between the branches and a diffusor carried by at least one of said branches of the magnet.



1,573,798. AUTOMATIC SAFETY EMERGENCY VALVE FOR OIL TANKS AND OTHER CONTAINERS OF INFLAMMABLE FLUIDS. VICTOR J. BOGGIANO, Chicago, Ill. Filed Nov. 30, 1923. Serial No. 677,737. 5 Claims. (Cl. 220—88.)

1. A member provided with a plurality of horizontal annular flanges, an additional member provided with an annular flange adapted to rest on the lower one of the first named annular flanges, in combination with a plurality of hemispheres respectively provided with a plu-

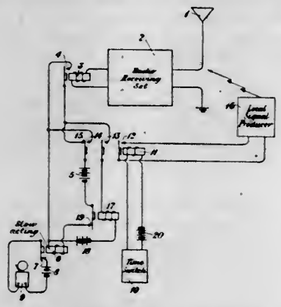


rality of perforations and attached to said additional member, a rigidly mounted member provided with apertures and with a central aperture, a bolt longitudinally movable in said central aperture, a cover arranged to rest on said first named member when in normal position, an aperture in said cover through which said bolt extends, a nut on said bolt on the upper side of said cover, and a spring on said bolt below said apertured member arranged to yieldingly hold said cover in said normal position, a goose neck tube mounted on said cover, and a check valve in said goose neck arranged to permit air to flow from the atmosphere therethrough.

1,573,799. LIGHT BRACKET. HARRY J. BOSWORTH, Chicago, Ill., assignor to Harry J. Bosworth Company, Chicago, Ill., a Corporation of Illinois. Filed Dec. 29, 1924. Serial No. 758,517. 3 Claims. (Cl. 240—73.)

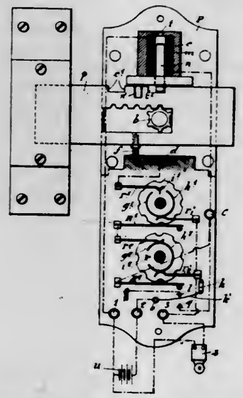
1. In a lighting fixture, a support, an arm mounted on said support, said arm comprising a pair of telescoping tubes, a block member mounted in one tube, a block member mounted in the other tube, a light on said arm, and a conductor for said light, said conductor extending through said tubes and coiled helically between said block members and means mounted upon one of said block members and co-operable with the other block member for limiting the extension of said tubes.

1,573,800. MULCHING DEVICE FOR PLANTERS. JOHN BOULLION, GEORGE BOULLION, and PAUL BOULLION, Conde, S. Dak. Filed Sept. 7, 1923. Serial No. 661,408. 3 Claims. (Cl. 97—56.)



1. The combination with a planter, of a cross bar rotatably secured to the planter frame, arms adjustably secured upon the ends of said cross bar, curved axles connected intermediate the ends thereof to said arms, inclined opposing disks mounted upon said curved axles, and means upon said arms to rotatably adjust said curved axles to vary the inclination of said disks to govern the extent of mulch.

1,573,801. TROUBLE-ALARM SYSTEM FOR RADIO RECEIVING SETS. RALPH BOWN, East Orange, N. J., assignor to American Telephone and Telegraph Company, a Corporation of New York. Filed Oct. 5, 1923. Serial No. 666,824. 7 Claims. (Cl. 250—20.)

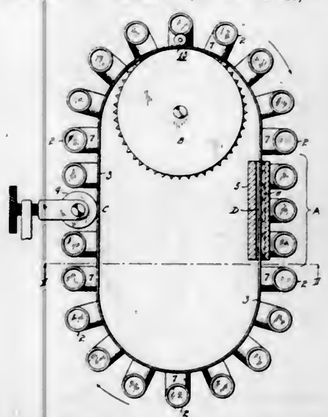


1. In association with a radio receiving set, a signal producer designed to transmit a local signal to the receiving set, a slow acting relay, means controlled by said

slow acting relay for giving an alarm, means for periodically setting in operation said signal producer and simultaneously therewith setting in operation means for

actuating said slow acting relay, and means—responsive to the local signal when the receiving set is in operative condition—for preventing the actuation of said slow acting relay.

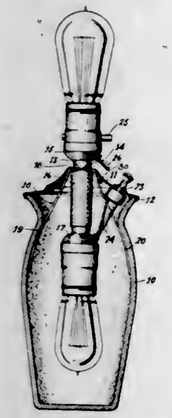
1,573,802. ELECTRIC SAFETY COMBINATION LOCK. LOUIS CADENEL, Paris, France. Filed Jan. 15, 1923. Serial No. 612,843. 3 Claims. (Cl. 70—63.)



1. In a safety lock of the type described, the combination of a sliding bolt provided with two recesses, one corresponding to the open, and the other to the closed position of the lock, an electromagnet having a movable armature adapted when current is not passing through the coil of the magnet to engage in either of the said recesses, mechanism for operating the bolt by means of a knob from the outside, a plurality of commutators, each of said commutators being provided with a metallic wheel with symmetrically disposed notches around its periphery, the said wheel being insulated from the casing and being carried by a spindle adapted to be operated by means of a knob on the outside, a spring conducting arm provided with a stud adapted to engage the said notches, a conducting finger mounted upon each commutator wheel, an insulated broken ring also mounted upon the said wheel, conducting brushes adapted to come into contact with the said finger and the said ring, means for setting the commutator wheel so that the finger only comes into contact with the corresponding brushes after a determined number of notches of the commutator wheel have been passed, a source of electric energy, an alarm bell and suitable electric connections so arranged that when the fingers of all the commutators coincide with their contact brushes, the current passes to the magnet to enable the lock to be operated, whilst when both the brushes of a commutator rest upon the conducting ring the current passes to the alarm bell and the magnet is not operated, a notched dished disc in connection with the mechanism through which a hook attached to the cover is adapted to pass when the figure combinations are in the correct positions for opening the locks, all substantially as and for the purposes set forth.

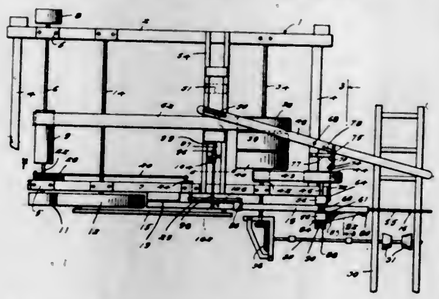
1,573,803. UNCOUPLING DEVICE FOR RAILWAY CARS. PERCY B CAMP, Maywood, Ill., assignor to Universal Draft Gear Attachment Company, a Corporation of Illinois. Filed Apr. 12, 1923. Serial No. 631,640. 6 Claims. (Cl. 213—166.)

1. A locking pin lifting element, comprising a member having one end bent to form an attaching eye and its other end bent to form a loop, and a second member having one end bent to form an eye and its other end bent to form a loop threaded through the loop of said first named member, the planes of said loops being arranged at an angle to each other and one of said member being provided with means for engaging the other for preventing relative pivotal movement of said members.



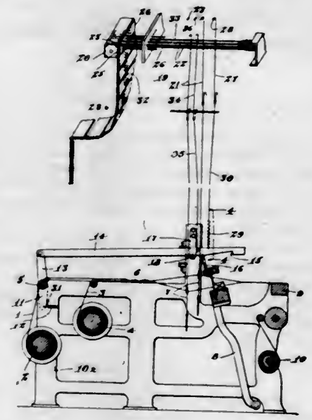
1,573,804. MOVING-LENS CINEMATOGRAPH APPARATUS. CHARLES WILLIAM REA CAMPBELL, Driehoek, and FRANK GOWYNE ALFRED ROBERTS, Johannesburg, Transvaal, South Africa. Filed Dec. 20, 1923. Serial No. 681,683. 11 Claims. (Cl. 88—16.8.)

1. The combination of a thin spring band of naturally circular form, a series of lens mounts thereon, means constraining one part of the band against outward move-



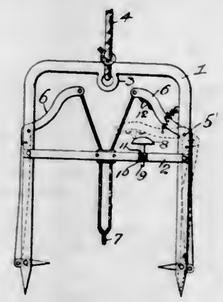
ment, means constraining the band at another part by inward pressure only to form a natural straight section at said other part, and means for driving the band.

1,573,805. LAMP STRUCTURE. MELBERT B. CARY, New York, N. Y. Filed May 22, 1924. Serial No. 715,013. 5 Claims. (Cl. 240—52.)



1. A lamp structure adapted for use with a receptacle, comprising a cover adapted to fit on the upper end of the receptacle, a spindle carried by the cover, a weight carried by the spindle and extending downwardly into the receptacle when the structure is mounted thereon, a lamp socket secured to the lower end of the spindle and a lamp socket secured to the upper end of the spindle.

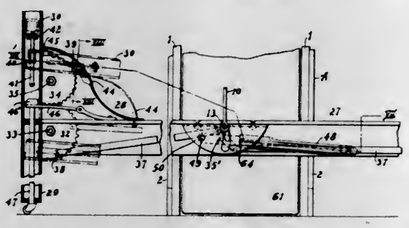
1,573,806. LOG-SAWING MACHINE. ORVILLE L. CHANDLER, Stamford, N. Y. Filed Aug. 6, 1923. Serial No. 656,005. 4 Claims. (Cl. 143—63.)



4. A log sawing machine comprising in combination with the frame, a driving mechanism, a reciprocatory saw, a vertically swinging guide for said saw, means for reciprocating said saw, a log feeding means, a lever pivoted on said frame and having a portion disposed in the path of the log and adapted to be engaged thereby, a belt shifting mechanism adapted to be operated by said pivoted lever, means controlled by said belt shifting mechanism for placing said saw reciprocating mechanism in operation, a primary mechanism for holding said saw guide and saw in elevated inoperative position, comprising a member having a shoulder disposed beneath said saw guide, a pivoted detent on said pivoted lever, interlocking means between said member and said detent, and means for automatically disengaging said interlocking means upon the release of said primary holding mechanism, a secondary holding means for counterbalancing the weight of the saw guide and saw, including interlocked disengageable members, one of said disengageable members being connected with a counterbalance, and a log engaging member connected with the other of said disengageable members and adapted to release said counterbalance upon contact of said second disengageable member with the leg.

1,573,807. FABRIC AND IN LOOM EMPLOYED IN THE MANUFACTURE THEREOF. CHARLES BORDEN CHASE, Fall River, Mass. Filed Nov. 6, 1924. Serial No. 748,059. 4 Claims. (Cl. 139—24.)

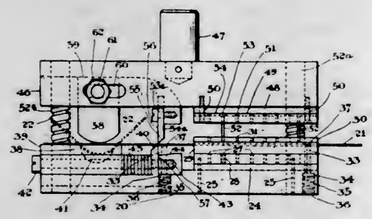
1. In a loom, a lay; a warp beam; a vibrator to tighten and to loosen the warp, to weave a crinkle fabric; an operative connection between said lay and said vibrator, that may be broken or completed when desired to change from a crinkle to another weave, or vice versa.



1,573,808. HAYFORK SIGNALING DEVICE. JOHN HENRY CLIFT, Fredonia, Ky. Filed Sept. 22, 1925. Serial No. 57,896. 6 Claims. (Cl. 116—67.)

5. In a hay fork signaling device, the combination of a frame provided with an eye, a trip lever pivotally mounted on the side of said frame and adapted to move towards the center of the frame, a two section stem hingedly connected together and threaded into said eye, a bell supported upon the lower end of said stem, a striker device including a curved plate and a striker on one

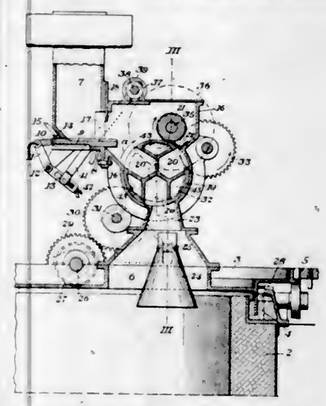
edge of said trip lever, said plate provided with an elongated slot, and a screw in said slot and threaded into said trip lever whereby the striker device is adjusted to a nicety with respect to the bell for striking the bell when the trip lever is swung upon the frame.



1,573,809. FOLDING BED. WILLIAM CRAMER, St. Louis, Mo. Filed Oct. 12, 1922. Serial No. 594,034. 6 Claims. (Cl. 5—179.)

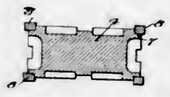
1. In a folding bed, a bedstead provided with a foldable leg depending from and entirely supported by the bed, a locking member adapted to hold said leg in its unfolded position, and a bed-supporting device cooperating with said locking member to retain the latter in its operative position.

4. In a folding bed, a bedstead comprising side members, brackets at the ends of said side members, endboards pivotally mounted in said brackets, said brackets having openings at the top to permit pivotal movement of said endboards, and movable closures for said openings, said closures being movable with the respective endboards.



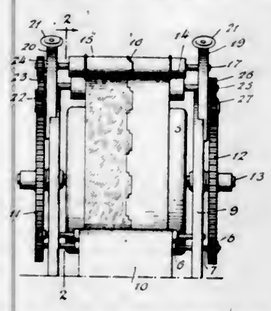
1,573,810. APPARATUS FOR MAKING SHOE SHANKS. CHRISTOPHER C. CUNNINGHAM, Montreal, Quebec, Canada, assignor to A. G. Mooney Limited, Montreal, Quebec, Canada. Filed Jan. 19, 1924. Serial No. 687,271. 7 Claims. (Cl. 113—42.5.)

1. An apparatus of the character described comprising upper and lower die members, bending, shearing and punching elements adjustably carried by each die member and cooperating with the complementary elements of the other die member, means for rigidly securing the elements of each set to the die member when said elements are in the desired position of adjustment, the arrangement being such that the bending, shearing and punching operations are accomplished simultaneously by movement of one of said die members in the direction of the other die member.



1,573,811. FUEL FEED FOR GAS PRODUCERS. REINHARDT DAAE, Youngstown, Ohio. Filed June 7, 1923. Serial No. 643,908. 10 Claims. (Cl. 214—35.)

1. In a fuel feed for gas producers, a chute, a casing, fuel feeding means at the lower end of the chute for delivering fuel to one side of the casing, mechanism for operating said fuel feeding means to periodically deliver predetermined quantities of fuel thereby, a rotary feeder in the casing having a pocket which is brought to filling position relative to the feeding means, the feeder being

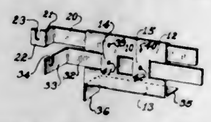


so positioned that fuel which projects beyond the pocket will fall back toward the feeding means, substantially as described.

1,573,812. PLUNGER. CLYDE C. DALLEY, Terra Cotta, D. C., assignor to Allan Scott Wolfe, Washington, D. C. Filed Aug. 14, 1925. Serial No. 50,157. 3 Claims. (Cl. 25—102.)

1. In a brick molding machine a table provided with molding cavities therein, plungers reciprocable in said cavities each of said plungers being longitudinally grooved along its edges, bearing strips seated in said grooves and means for detachably securing said bearing strips in place in said grooves.

1,573,813. METHOD OF AND MEANS FOR CUTTING PAPER. SAMUEL F. DAMM, Niagara Falls, N. Y., assignor to Niagara Wall Paper Company, Niagara Falls, N. Y., a Corporation of New York. Filed Jan. 14, 1925. Serial No. 2,273. 8 Claims. (Cl. 164—28.)

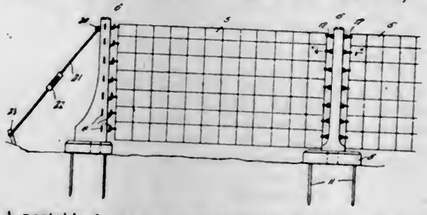


1. A method of cutting paper consisting of rolling a cutting surface over one side of a strip of moving paper at the same rate of peripheral speed as the travel of the paper and normally moving a cylindrical surface on the opposite side of the paper at a different rate of travel than that of the paper.

1,573,814. METHOD OF PREVENTING FROTH ON PAPER MACHINES. JUDSON A. DE CEW, Mount Vernon, N. Y., assignor to Process Engineers, Inc., New York, N. Y., a Corporation of New York. Filed Dec. 14, 1921. Serial No. 522,341. 2 Claims. (Cl. 92—38.)

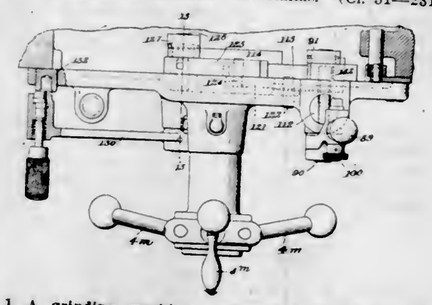
1. A method of decreasing the frothing properties of a paper pulp which has been treated with rosin size and alum, which consists in precipitating soluble frothing ingredients by means of a treatment with a soluble iron salt.

1,573,815. COMBINATION SHADE BRACKET. MORTIMER DORAN, Waterbury, Conn. Filed Oct. 16, 1924. Serial No. 744,049. 3 Claims. (Cl. 156—24.)



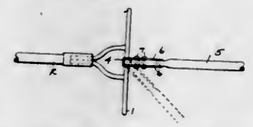
3. In a combination window shade and curtain holding fixture, a bracket adapted to be attached to the side of a window frame, said bracket having a pair of guiding members struck up from the metal thereof, said bracket having a pair of adjustable members slidable in said guiding members for supporting the ends of a window shade roller and of a curtain rod respectively, and said bracket having an angular flange adapted to fit in the corner of the window frame between the molding strip and the window frame, said guiding members having portions alternately bent in opposite directions at the centre of said bracket.

1,573,816. CHAIN GRATE. WILLIAM M. DUNCAN, Alton, Ill. Filed Aug. 18, 1921. Serial No. 493,198. 11 Claims. (Cl. 110—40.)



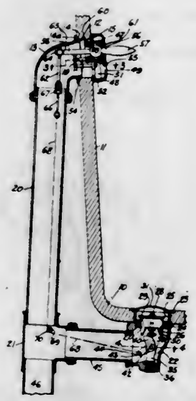
3. A grate link having an upper longitudinal baffle at the upper edge of one of its side faces, and a lower longitudinal baffle at the upper portion of its other side face.

1,573,817. PORTABLE FENCE. BEAUREGUARD EDWARDS, Brunswick, Ga. Filed Apr. 18, 1923, Serial No. 632,847. Renewed Oct. 21, 1925. 1 Claim. (Cl. 256—27.)



A portable fence including a plurality of base elements of enlarged flat form having vertical openings in the central portions thereof, each base being provided with a plurality of anchoring elements extending below the base for engagement in the ground and arranged in spaced relation with each other around and spaced from the central opening, post elements removably mounted in the openings in said blocks for support thereby, latches for locking the posts to their respective blocks, said posts having a plurality of hooks carried thereby, and fence sections secured by said hooks between the posts for providing a readily removable fence.

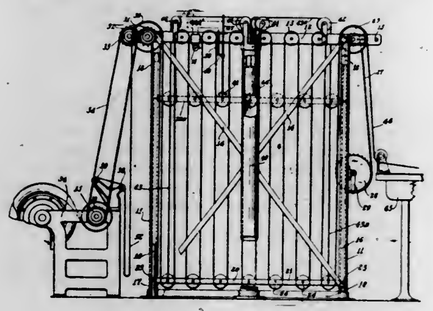
1,573,818. SHOCK-ABSORBING MOTOR ACCELERATOR. SOL EINSTEIN, Cincinnati, and HERMAN R. ISLER, Norwood, Ohio, assignors, by mesne assignments, to The Cincinnati Milling Machine Company, Cincinnati, Ohio, a Corporation of Ohio. Filed Oct. 25, 1923. Serial No. 670,774. 26 Claims. (Cl. 51—231.)



1. A grinding machine combining a work-carrier; a slow-motion transmission for advancing said work-carrier; a by-pass transmission adapted to transmit motion more rapidly than said other transmission and to overrun the same without interference; resilient means for enabling said by-pass transmission gradually to speed up; and clutch mechanism for rendering either transmission operative.

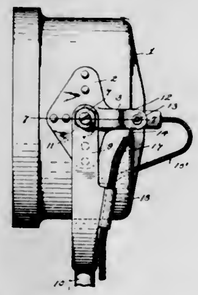
1,573,819. RAKE. IGNATIUS P. FRIEBURGER, Fort Wayne, Ind. Filed Sept. 2, 1925. Serial No. 54,017. 4 Claims. (Cl. 94—45.)

1. A rake consisting of a head member, a handle rigidly secured to the head and a second handle pivoted to the head for universal movement thereon.



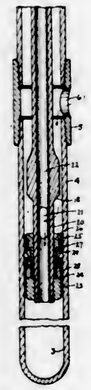
1,573,820. WASTE AND OVERFLOW FIXTURE FOR BATHTUBS. SAMUEL GADE, New York, N. Y. Filed Sept. 19, 1925. Serial No. 57,385. 6 Claims. (Cl. 4—203.)

1. In a waste and overflow fixture for bath tubs, a waste chamber having a water passage in communication with the bottom of a bath tub, an overflow housing, a clamping member at the inside of the tub, fixedly securing



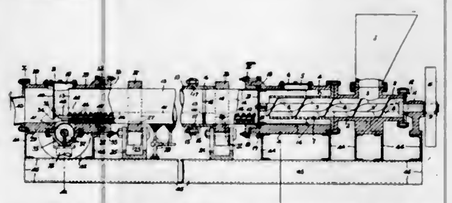
the said housing to an outer side wall of the said tub around an overflow opening, pipes leading from, respectively, the said waste chamber and the said overflow housing to an outlet pipe, a valve to close the water passage between the said tub and waste chamber, and an overflow shield carrying mechanism for operating the said valve, detachably secured at the inside of the said wall of the tub and around the said overflow opening directly to the overflow housing, independently of the said clamping member.

1,573,821. FESTOONING RACK. JOHN R. GAMMETER, Akron, Ohio, assignor to The B. F. Goodrich Company, New York, N. Y., a Corporation of New York. Filed June 27, 1921. Serial No. 480,678. 4 Claims. (Cl. 154—9.)



1. A festooning rack comprising an upper set of rollers journaled in fixed positions, a lower set of floating rollers adapted to be threaded by the work in alternation with those of the upper set, bearing members for said floating rollers, a counterweight substantially lighter than said set of floating rollers and their appendages, a plurality of lines operatively connecting said bearing members with said counterweight, and sheaves suitably journaled for said lines, said counterweight and its connections to said floating rollers being adapted constantly to equalize the movement of the latter from and toward said upper set of rollers as the work is fed into and withdrawn from the rack.

1,573,822. VEHICLE LIGHT. ROBERT F. GATCH, Columbus, Ohio. Filed June 14, 1924. Serial No. 719,988. 2 Claims. (Cl. 240—61.)

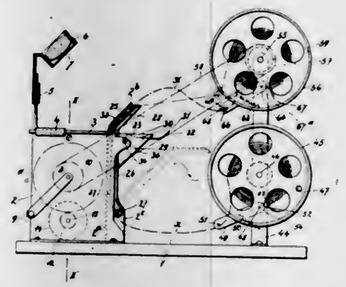


1. In a vehicle lamp, a vertically tiltable lamp casing, plates secured to said casing upon opposite sides of the same and reinforcing said casing at the pivotal pointa thereof, one of said plates being provided with a laternlly disposed crank extension having the outer end thereof terminated in spaced apertured ears, a pin arranged to be positioned in the apertures of said ears, and an operating wire for tilting said casing having one end thereof secured to said pin between said ears and serving to lock the pin in its operative position.

1,573,823. PUMP. ELLSWORTH GRAY, Houston, Tex. Filed Sept. 28, 1925. Serial No. 59,068. 7 Claims. (Cl. 103—189.)

1. In a pump a pump barrel closed at its lower end and having a lateral opening thereto between its ends, a pump plunger adapted to reciprocate in said pump barrel, packing means on said plunger above said opening, said plunger having openings therein adjacent the lower end, a valve sleeve slidable on said plunger, means to limit the sliding of said valve and a valve at the upper end of said plunger.

1,573,824. APPARATUS FOR DISTILLING CARBONACEOUS MATERIALS. CHARLES ALBERT GRIFFITHS, Johannesburg, Transvaal, South Africa. Filed May 31, 1924. Serial No. 717,169. 2 Claims. (Cl. 202—15.)

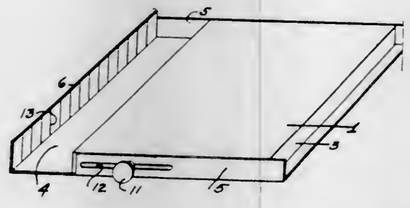


1. Apparatus for distilling carbonaceous materials, including a revolvable tubular retort of small diameter, having a thin wall to which the heat is applied externally, means for heating the retort, and a freely rolling metallic brush arranged inside the retort and unconnected with the retort, and rotated only by frictional contact with the walls thereof, and of a diameter considerably less than the internal diameter of the retort, for cleaning the internal wall thereof and for distributing the heat throughout the mass of the material under treatment, as set forth.

1,573,825. APPARATUS FOR VIEWING CINEMATOGRAPHIC FILM BANDS. ALFRED GRÜNFELD, Vienna, Austria. Filed Apr. 8, 1925. Serial No. 21,619. 26 Claims. (Cl. 88—17.)

1. An apparatus for viewing cinematographic filmbands, comprising in combination a casing, a film carrying and feeding means mounted in said casing, a film-

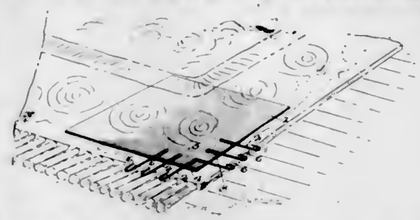
guide mounted on said casing, the said guide being formed by two branches of a plate bent at an angle and forming the rear wall of the said casing, and a flap



hinged to one of the said walls of the casing, the filmband being adapted to pass through the clear space between the said rear wall and flap.

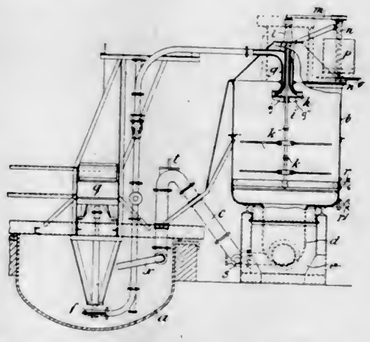
1,573,826. METHOD OF ATTACHING LABELS TO ALUMINUM WARE. AARON MARTIN HAGEMAN, Bloomfield, N. J., assignor to Westinghouse Lamp Company, a Corporation of Pennsylvania. Filed June 29, 1921. Serial No. 481,210. 15 Claims. (Cl. 216—62.)

1. The method of firmly affixing a label to aluminum ware which comprises heating a portion of the surface of the ware to roughen it for the purpose of retaining an adhesive and applying a label thereto after cooling.



1,573,827. PILL TILE. HUBERT L. HAMILTON, Louann, Ark. Filed Mar. 12, 1925. Serial No. 15,168. 6 Claims. (Cl. 107—46.)

2. The combination with a tray, having a bottom, sides and at least one end extending upward from said bottom, of a pill tile slidably mounted in said tray, said tile comprising a mixing slab having depending ends and sides, said sides being longitudinally slotted, racks disposed parallel to said sides and secured to the under surface of said tile, pinions, one engaging each of said racks, a pinion shaft disposed in said slots carrying and secured to said pinions and means for turning said shaft.



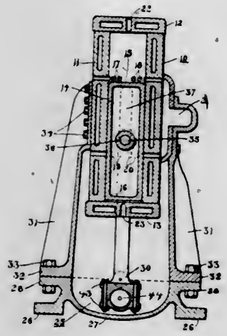
1,573,828. STIFFENING AND PROTECTING DEVICE FOR RUGS. JAMES L. HAMILTON, Red Bluff, Calif. Filed June 7, 1924. Serial No. 718,599. 1 Claim. (Cl. 154—49.)

A stiffening means for the corners of rugs comprising a flat plate having a plurality of wire prongs secured to a face of the plate and projecting beyond the adjacent edges of the plate and disposed in a plane above the surface plane of the said plate, said prongs having bent portions forming hooks returned upon said prongs and spaced above said face of the plate, the free ends of the hooks terminating short of the adjacent edges

of the plate, said hooks being located parallel to the plate and adapted to be inserted in a rug and between the upper end lower faces of the rug.

1,573,829. APPARATUS FOR REFINING OR SEPARATING METALS. HENRY HARRIS, London, England. Filed Dec. 8, 1922. Serial No. 605,597. 16 Claims. (Cl. 266—34.)

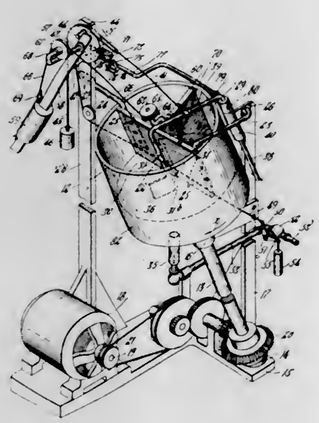
1. In apparatus for treating molten metal, the combination of a pot for the molten metal, a stationary container for molten reagent located at one side of the pot and having a well at its lower end for containing a sufficient quantity of molten metal to seal the lower end of the container, means for conveying the metal from the pot to the container, and a discharge pipe extending upwardly from the well a sufficient height to maintain the desired depth of molten metal for sealing the lower end of the container.



1,573,830. REFINING LEAD. HENRY HARRIS, London, England. Filed July 8, 1924, Serial No. 724,899. Renewed Oct. 20, 1925. 16 Claims. (Cl. 75—15.)

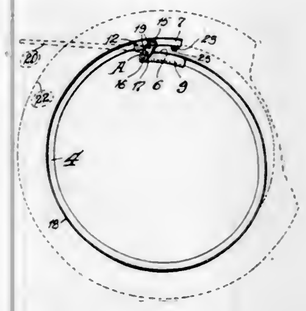
1. Process of refining lead which comprises bringing molten lead while maintained at a temperature not exceeding about 500° C. into intimate contact with a molten reagent comprising molten caustic alkali, and gradually adding an oxidizing agent in such limited quantity that substantially no lead oxide or alkali oxysalt of lead is found in the resulting melt.

1,573,831. DIESEL ENGINE. HERBERT T. HERR, Merion, Pa., assignor to Westinghouse Electric and Manufacturing Company, a Corporation of Pennsylvania. Filed Feb. 28, 1921. Serial No. 448,374. 1 Claim. (Cl. 123—61.)



The combination with a double-acting internal combustion engine having a vertically disposed cylinder closed at both ends and a piston arranged to recipro-

cate therein and providing combustion chambers at each end of the cylinder, of piston-controlled inlet and exhaust ports in the cylinder at the inner portions of each combustion chamber, and a supporting frame se-



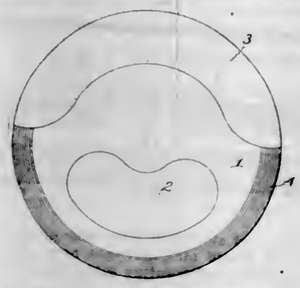
cured to the cylinder centrally between the two ports whereby the periods of opening and closing the ports will be uniformly timed under all conditions of expansion of the cylinder.

1,573,832. MACHINE FOR PREPARING CHOCOLATE FOR CONFECTION COATINGS. PERLEY A. HILLIARD, Wollaston, Mass. Filed May 6, 1925. Serial No. 28,530. 8 Claims. (Cl. 126—343.5.)

1. A chocolate-preparing machine comprising a rotary kettle having an inclined axis, means for heating the kettle, means for rotating the kettle, and a fixed divider subdividing the kettle into a higher and a lower compartment, the divider being separated at one side of the axis from the kettle, so that melted chocolate may flow from the higher to the lower compartment, and in contact with the kettle at the opposite side of the axis, so that melted chocolate is prevented from returning to the higher compartment and is automatically stirred, the lower compartment being adapted to permit the dipping of centers therein.

1,573,833. COMBINED CONTRACTOR AND EXPANDER FOR AUTOMOBILE TIRE RIMS. ALBERT C. HOECKER, Collinsville, Ill. Filed June 6, 1921. Serial No. 475,504. 1 Claim. (Cl. 301—30.)

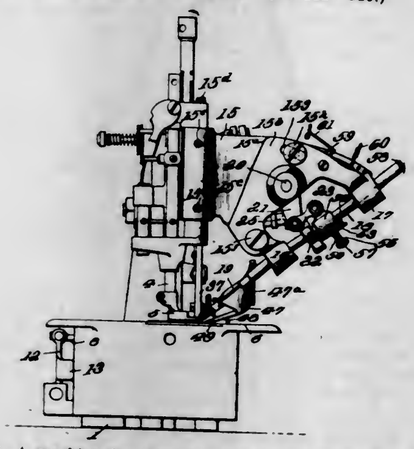
A tire rim transsplit so as to provide ends thereto, a channel member underlapping each of said rim ends and secured thereto, one of said members overlapping the transsplit of the rim, linkage secured to the adjacent side portions of each of said members, and means provided on the linkage for cooperable engagement with an operating tool.



1,573,834. DRAINING DEVICE FOR METER CASINGS. ABRAM G. HOLMES, Pittsburgh, Pa. Filed Oct. 14, 1922. Serial No. 594,520. 5 Claims. (Cl. 73—167.)

3. A meter casing comprising a body, a recessed cover having a drainage aperture formed in the recessed portion thereof and a re-entrant body-engaging flange formed thereon and projecting into the confines of the recess, a member engaging said body and said flange and located opposite to said drainage aperture and within said recess, and a plug for closing said drainage aperture.

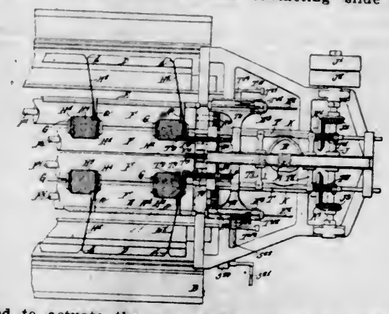
1,573,835. DEVICE FOR USE WITH HEADLIGHTS. EDGAR T. HORSEY, Cleveland, Ohio. Filed Dec. 5, 1921. Serial No. 519,920. 2 Claims. (Cl. 240—48.4.)



1. A device of the character described comprising a disk-like member adapted for association with the open end of a reflector said disk having an opening through it which opening lies below the transverse center line of the disk said opening having a curved periphery at the portion which is remote from the center of the disk and having a compound curved periphery at the portion

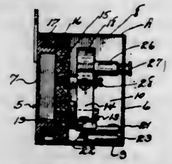
which is adjacent the center of the disk, the portion of the disk surrounding the opening being translucent but not transparent, said disk having an arc-shaped band

and a portion thereof which is oppositely disposed with respect to the opening, said arc-shaped band being opaque to the passage of light.



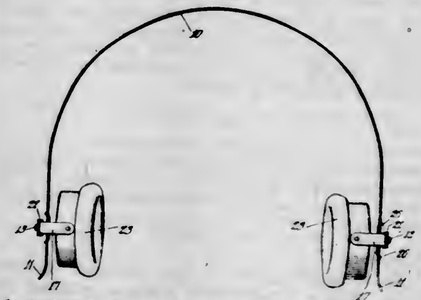
1,573,836. MACHINE FOR FORMING CONCEALED STITCHES. ROBERT R. HUGHES, Jr., Utica, N. Y., assignor to Union Special Machine Company, Chicago, Ill., a Corporation of Illinois. Filed July 11, 1919. Serial No. 310,073. 25 Claims. (Cl. 112—140.)

1. A machine for stitching fabrics and concealing the stitches from view on the right or face side of the fabric, including in combination, a work support, stitch forming mechanism including a reciprocating needle operating in a path forming an obtuse angle with the plane of the work support, complemental stitch forming mechanism cooperating with said needle, means for folding and guiding the edge portion of a fabric around the path of the needle, a presser foot having a fabric engaging surface in rear of the needle, a feeding mechanism for feeding the fabric underneath the presser foot, said guiding means being disposed relative to the needle and the presser foot so as to direct the inturned portion of the fabric across the path of the needle whereby said inturned portion is stitched to a fabric section underneath the same.



1,573,837. BOBBIN-WINDING MACHINE. GEORGE JUER, Hopewell, Va., assignor to Tubize Artificial Silk Company of America, a Corporation of Delaware. Filed Apr. 28, 1925. Serial No. 26,346. 13 Claims. (Cl. 242—43.)

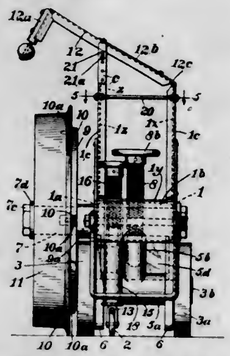
1. In a bobbin winding machine having means for rotating the bobbin and a reciprocating yarn carrier for guiding the yarn to the bobbin, means for reciprocating the yarn carrier through progressively shorter distances as the yarn is wound consisting of a drum cam of variable throw, a cam contacting slide con-



nected to actuate the yarn carrier, means for rotating the cam and means for progressively shifting the cam with relation to the contacting slide to shorten the throw of the slide as the bobbin is wound.

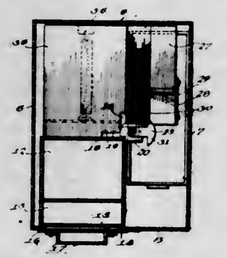
1,573,838. THERMOSTAT. JOSEPH KELLER and HENRY KÜNSTLICH, New York, N. Y. Filed Feb. 21, 1924. Serial No. 694,437. 1 Claim. (Cl. 200—142.)

In a fire alarm, a closed casing, a face plate of insulating material rigidly secured in the casing in spaced relation to the front wall thereof, a lever rockably mounted at one end on said face plate intermediate the face plate and the front wall, a head formed on the free end of the lever, a stationary electric conducting bracket disposed in the path of said head carried by said face block, an outwardly extending removable socket carried by said head, the front wall of the casing being provided with an opening, and a fusible plug arranged to fit in the opening and in said socket for holding the free end of the lever in a raised position above said bracket, the outer end of the alloy pin extending outwardly of the casing.



1,573,839. RECEIVER MOUNTING. OSCAR M. LEICH, Genoa, Ill., assignor to Leich Electric Co., Genoa, Ill., a Corporation of Illinois. Filed June 2, 1922. Serial No. 565,407. 6 Claims. (Cl. 179—156.)

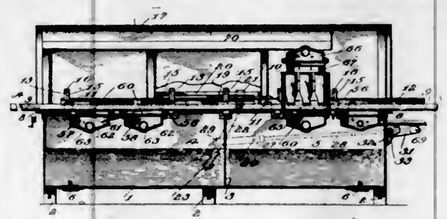
1. A device of the character described, comprising a head band of flexible material, a receiver supporting member non-rotatably mounted directly thereon to project



laterally therefrom, and a receiver pivotally mounted on said member, the axis of said pivots extending at a fixed oblique angle to said head band.

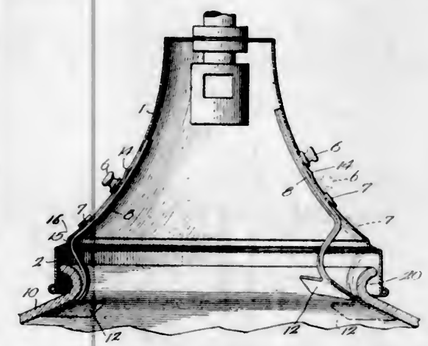
1,573,840. FOUNDRY TRUCK. JOHN LYDAY, Kansas City, Kans. Filed Mar. 21, 1925. Serial No. 17,329. 10 Claims. (Cl. 214—65.)

1. In combination, a truck frame having suitable supporting wheels, a carrier axle projecting from one side of the frame, and gravity actuated latch means for detachably holding a car wheel thereon.



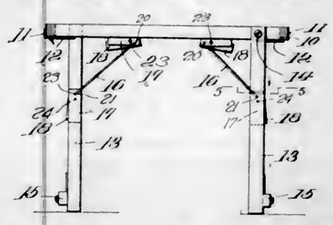
1,573,841. VENDING MACHINE. HILIARY B. MCREE, Palmetto, Fla., assignor, by direct and mesne assignments, to Automatic Sales Corporation, Fort Valley, Ga., a Corporation of Delaware. Filed Sept. 17, 1924. Serial No. 738,209. 7 Claims. (Cl. 194—58.)

4. In a vending machine, the combination of a casing, a delivery drawer, a vertically disposed pivoted lever having one end normally engaging a recess in said drawer, a coin receiver carried by said drawer disposed on a horizontal plane in alinement with the upper end of said lever, said receiver having its side nearest the lever open whereby the coin will contact with the upper end of the lever, rocking it on its pivot to release said drawer when the latter is moved forward.



1,573,842. BOTTLE-WASHING MACHINE. ROY A. MANNING, Rutland, Vt., assignor to Manning Manufacturing Company, Rutland, Vt., a Corporation of Vermont. Original application filed June 30, 1920, Serial No. 400,007. Divided and this application filed Dec. 31, 1920. Serial No. 434,276. 3 Claims. (Cl. 198—221.)

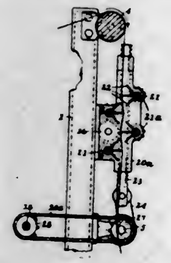
1. In an apparatus of the kind described, the combination with a longitudinally disposed guideway for supporting articles to be moved, of slidably mounted rails arranged above said guideway, pivoted gravity dogs carried by said rails for engaging the members in said guideway and moving said members in one direction, rocker levers having a slidable and pivotal connection with said rails, said rocker levers having spaced fingers



on the edges and slotted pitmans embracing said rocker levers having spaced pins arranged between said fingers for intermittently reciprocating said rails.

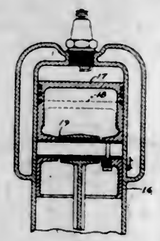
1,573,843. LIGHTING FIXTURE. MYER M. MARKS, Chicago, Ill. Filed Nov. 2, 1923. Serial No. 672,412. 4 Claims. (Cl. 240—133.)

1. A shade holder flaring outward and downward in general and having a depending flange at the lower rim, the shade holder having slots arranged in vertical planes in the flaring portion, and independently movable shade supports having handles projecting out through the slots, said shade supports being slidably mounted upon the inner flaring surface and passing obliquely downward and outward a slight distance below the lower edge of the flange for retaining the shade rim within said flange and for passing to a point under the shade rim, said shade supports having circumferential extensions for steadying the shade.



1,573,844. CLOTHES-DRYING RACK. ARTHUR F. MARVIN, Highland Park, Mich. Filed Feb. 19, 1923. Serial No. 620,019. 7 Claims. (Cl. 68—34.)

1. A clothes drying rack of the character described comprising a rectangular frame, a pair of legs pivoted to the inside of said frame near one end, a pair of legs

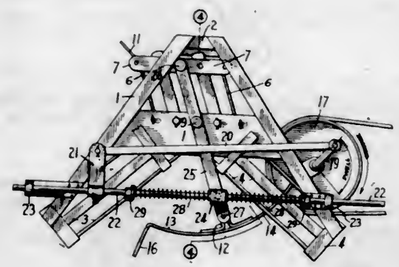


pivoted to the outside of said frame near the other end, spring locking devices each on one side of a leg, and brace rods each pivoted to the under side of a side bar of said frame and each having its free end shaped to engage one of said locking devices.

1,573,845. FABRIC-RUBBING MACHINE. ARTHUR C. MASON, Hawthorne, N. J. Filed Sept. 8, 1924. Serial No. 736,536. 4 Claims. (Cl. 26—27.)

1. In combination, means to hold the fabric stretched, separate fabric rubbing members revoluble on individual axes, and means to oscillate said members on their axes and in rubbing contact with the fabric in relatively opposite directions substantially simultaneously.

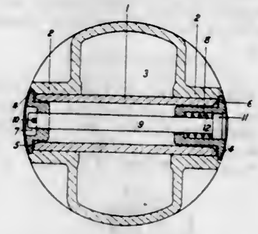
1,573,846. METHOD AND MEANS FOR USING MOTOR FUELS. THOMAS MIDGLEY, Jr., Dayton, Ohio, assignor, by mesne assignments, to General Motors Corporation, Detroit, Mich., a Corporation of Delaware. Filed Apr. 15, 1922. Serial No. 553,270. 21 Claims. (Cl. 44—9.)



1. A fuel for internal combustion engines comprising a low compression motor fuel, and a volatile compound of a metal adapted to increase the critical compression pressure of the motor fuel.

21. A fuel for internal combustion engines comprising gasoline; and tetraethyl lead.

1,573,847. RECEPTACLE-DISTRIBUTING DEVICE. EARL W. MORTER, Washington Court House, Ohio. Filed Feb. 15, 1923. Serial No. 619,169. 23 Claims. (Cl. 193—31.)

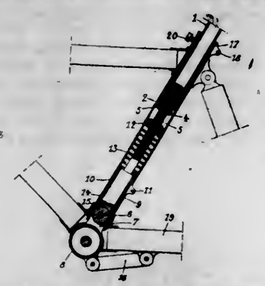


1. In a mechanism of the character described, a main chute, two branch chutes, means to cause said branch chutes to be alternately connected with said main chute, a cut-off pivotally mounted adjacent to the upper ends of said branch chutes comprising a movable member extending downwardly between said branch chutes, parts carried by said member and arranged to move into the respective branch chutes through the inner sides thereof, to control the outlets of said chutes, and means for actuating said movable member in synchronism with the first mentioned means.

4. In a mechanism of the character described, a main chute, two branch chutes, means to cause said branch chutes to be alternately connected with said main chute, a single controlling device pivotally supported adjacent to the upper ends of said branch chutes for movement toward and from the same and having parts adapted to enter the respective branch chutes to control the outlets thereof, each of said parts having an abutment to engage an article in one of said branch chutes and interrupt the movement of said device when said branch chute is full of articles, and yieldable means for actuating said devices.

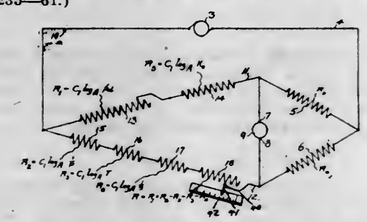
5. In a mechanism of the character described, a main chute, two branch chutes, a movable connecting device having two passageways arranged to connect the respective branch chutes alternately with said main chute, and means to actuate said connecting device.

1,573,848. GUDGEON-PIN MOUNTING FOR PISTONS. THOMAS BLACKWOOD MURRAY, Glasgow, Scotland. Filed Nov. 23, 1925. Serial No. 70,933. 2 Claims. (Cl. 74—108.)



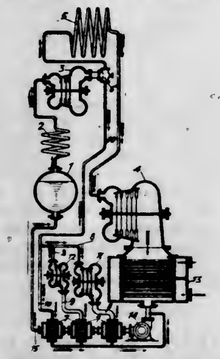
1. In a gudgeon pin mounting for pistons, in combination with a piston having recesses at diametrically opposed points on the periphery thereof, a tubular gudgeon pin located in register with said recesses, gudgeon pin heads seated in said recesses and serving to confine said gudgeon pin axially, one of said heads having a pocket, a tie rod concentric with said pin and passing through said heads, said tie rod having a head at one end and a retaining device at its other end, and a compression spring located between the head on said rod and the bottom of said pocket.

1,573,849. ELASTIC SUSPENSION FOR BICYCLES. CHARLES NAGOT, La Plaine St.-Denis, France. Filed Jan. 3, 1925. Serial No. 378. 5 Claims. (Cl. 208—68.)



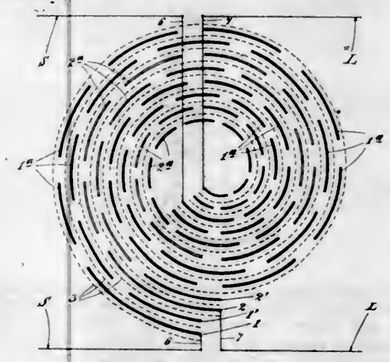
1. In a bicycle the combination of a rod adapted to slide longitudinally through the saddle frame tube, a

socket clamped within said tube, a stop piece on said rod, a spring adapted to balance the rider's weight and supported between said socket and said stop piece and



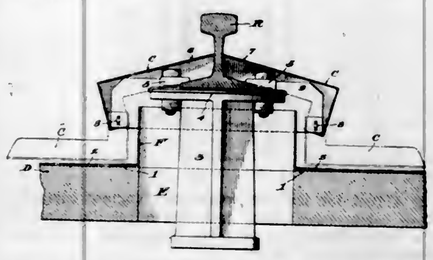
a saddle tube and a movable crank axle bracket respectively carried by the upper end and the lower end of said rod.

1,573,850. LOGARITHMIC RESISTANCE CIRCUIT FOR MEASURING COMBINATIONS OF DIFFERENT FACTORS. JULIUS M. NAIMAN, Chicago, Ill. Filed Dec. 24, 1921. Serial No. 524,809. 6 Claims. (Cl. 235—61.)



1. A method of measuring the product of several variable factors consisting of, making different electrical resistances respectively proportional to the logarithms of different variable factors multiplied by any constants and then measuring the sum of these resistances connected in series.

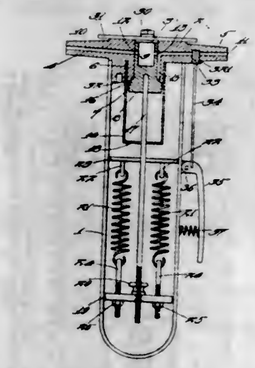
1,573,851. STEAM-TURBINE INSTALLATION. HANS NYFFENEGGER, Zurich, Switzerland, assignor to the Firm of Aktiengesellschaft der Maschinenfabriken Escher Wyss & Cie., Zurich, Switzerland. Filed Apr. 29, 1925. Serial No. 26,706. 6 Claims. (Cl. 60—95.)



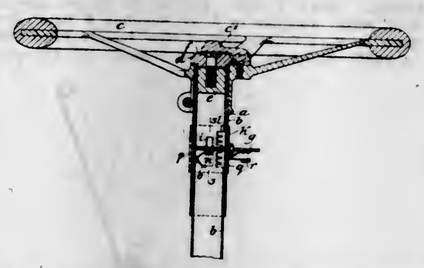
1. A steam-turbine installation, including in combination a feed-water heater having several stages and adapted to be heated by steam-tapped at a single point on the turbine installation, conduits arranged in parallel and leading said tapped steam to the stages of said feed-water heater, and appliances requiring heat adapted to utilize different heat drops and interposed at least in those of said conduits which lead the bleeder steam to the initial and subsequent preheater stages up to the second last stage.

1,573,852. HIGH-FREQUENCY-OSCILLATION DEVICE. WILLIAM J. O'LEARY, Montreal, Quebec, Canada. Filed Apr. 5, 1920. Serial No. 371,537. 11 Claims. (Cl. 250—16.)

1. A device for modifying electrical energy comprising primary and secondary inductive elements formed of segmented conductors separately insulated, with conductors of the primary and secondary elements alternating in juxtaposition and disposed in spiral convolutions.



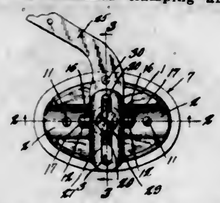
1,573,853. WEATHERPROOF RAIL STAND FOR TRACK SCALES. JOHN WILSON ORROCK, Montreal, Quebec, Canada. Filed May 4, 1925. Serial No. 27,895. 10 Claims. (Cl. 265—71.)



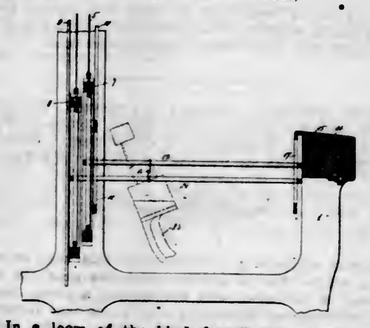
1. In a weatherproof rail stand for track scales, the combination with the deck structure having an opening therein, and a rail stand pedestal projecting through said opening, of a flashing circumferentially surrounding the opening, and a cover unit supported above and surrounding said flashing and including members adapted to be moved laterally and outwardly away from the rail stand.

1,573,854. AUTOMATIC AIR-PRESSURE SIGNAL DEVICE. ARCHIBALD W. PARQUETTE, Watertown, Mass. Filed May 9, 1925. Serial No. 29,232. 4 Claims. (Cl. 50—8.)

1. An automatic signal device having a valve body with a passage adapted to communicate at one end with a source of compressed air and at its other end with an article into which compressed air is to be introduced, said passage having an outlet port through the valve body intermediate the two ends of said passage, a piston which controls said intermediate outlet, a rod connected with said piston, a spring connected at one end with a member carried by said rod and connected at its other end with a member which is adjustable for varying the force of the spring, said spring being adapted to normally hold the piston in position to close said intermediate port until the air pressure is sufficient to overcome the resistance of the spring, a rotatable shaft having a worm portion which engages with a threaded aperture in said adjustable connecting member for the spring, the rotation of said shaft on its axis being adapted to adjust the said spring connecting member to vary the force of the spring and thereby vary the amount of air pressure required to unseat the piston.



1,573,855. LOCKING DEVICE FOR MOTOR CARS, MOTOR CYCLES, AND CYCLES FOR PREVENTION OF THEFT. WALTER PARTRIDGE, Chadwell Heath, England. Filed Nov. 22, 1924. Serial No. 751,427. 4 Claims. (Cl. 70—127.)



1. The combination with a steering column comprising two concentric tubes rotatably supported with respect to each other, and a hand operated steering device secured to one of said tubes, said tubes being provided with vertical registering slots for the insertion of a key, and laterally disposed registering slots for the reception of locking bits on the key, to lock said tubes together when the key is inserted and turned.

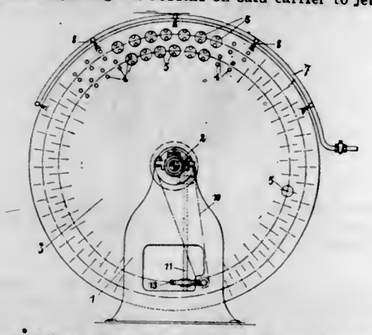
1,573,856. TRUSS PAD. ISAAC MERRICK PEASE, Cincinnati, Ohio. Filed Sept. 14, 1923. Serial No. 662,727. 2 Claims. (Cl. 128—124.)

1. In a device of the class described, a pad, a shaft, a rocker movable in the shaft, a stem longitudinally adjustable in the rocker, means carried by the shaft for holding the stem in longitudinally adjusted positions in the rocker, and a combined clamping and pivotal connection between the shaft and the pad, said connection engaging the rocker to hold the rocker against movement in the shaft.

1,573,857. FILLING-TENSION DEVICE. PETER PELLETIER, Lawrence, Mass. Filed Apr. 17, 1925. Serial No. 23,942. 4 Claims. (Cl. 139—194.)

1. In a loom of the kind described having a shuttle and a breast beam, two harnesses and means for reciprocating them in opposite directions, each harness carrying a pair of rods extending horizontally therefrom across the path of the shuttle in the direction of the breast beam whereby when reciprocated vertically they will engage the shuttle thread and take up the slack therein.

1,573,858. CARDING DEVICE FOR ARTIFICIAL TEETH. LAFAYETTE PICKERING, Columbus, Ohio, assignor to The Columbus Dental Manufacturing Company, Columbus, Ohio, a Corporation of Ohio. Filed Sept. 13, 1924. Serial No. 737,537. 6 Claims. (Cl. 211—34.)



1. A mounting for artificial teeth comprising a base, holding studs on said base, locking members on said base adjacent said studs, and means permitting of relative adjustment between said locking members and studs to effect the securing of a tooth in connection with said base.

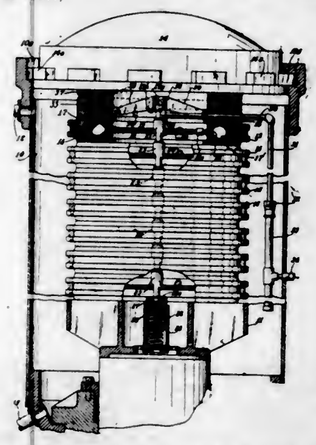
1,573,859. PROCESS AND APPARATUS FOR WASHING ARTIFICIAL SILK. ADRIEN PINEL, Rouen, France. Filed Apr. 26, 1923. Serial No. 634,867. 5 Claims. (Cl. 18—8.)

1. A process for treating artificial silk product consisting in alternately washing and drying the same a successive number of times, the washing being effected by spraying and the drying by centrifugal action.

2. An apparatus for washing and drying artificial silk product consisting of a rotary bobbin-carrier, spraying means for subjecting the bobbins on said carrier to jets of

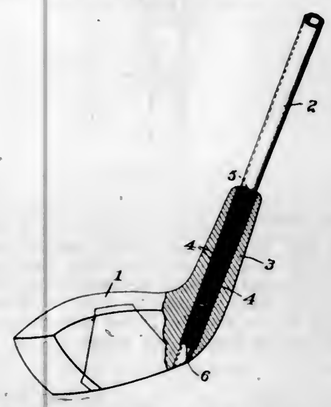
water, operating means for rotating said carrier slowly for a washing operation and means for rotating said carrier rapidly for a centrifugal drying operation.

1,573,860. BUTTON. FORREST G. PURINTON, Waterbury, Conn., assignor to The Patent Button Company, Waterbury, Conn., a Corporation of Connecticut. Filed Oct. 22, 1924. Serial No. 745,158. 1 Claim. (Cl. 24—90.)



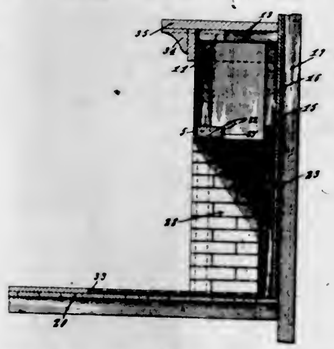
A button comprising a metal head, said head provided with a central hub of greater thickness than the mean thickness of the head, said hub having a recess portion thus providing an upstanding rim, a sub-base formed of a metal disc, cup-shaped in cross section and its exposed surface being curved throughout, said sub-base being fitted within the recess portion and the peripheral edge of its downwardly extending walls contacting with the bottom of the said recess portion, an eyelet secured in said sub-base and the metal rim swedged to anchor the said base within said button and the rim when swedged extending in a plane above the surface of the button and substantially in the same plane as the curved upper surface of the sub-base, the swedged rim and the upper surface of the sub-base providing a space between the button head and the material to which it is to be fastened.

1,573,861. SEAL OR TAG AND METHOD OF APPLYING THE SAME. FORREST G. PURINTON, Waterbury, Conn., assignor to The Patent Button Company, Waterbury, Conn., a Corporation of Connecticut. Filed May 26, 1925. Serial No. 32,934. 5 Claims. (Cl. 40—20.)



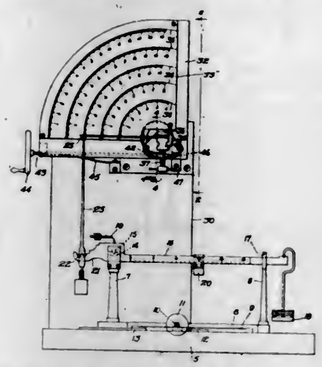
1. A seal for meats comprising a button provided with an aperture, a metal shank of limited ductility having its upper end swedged within said aperture, the joint formed by said swedging being relatively insecure, and the shank initially straight, the lower end of the shank adapted to be curled to pull the seal tightly in position, the ductility of the shank being such that the curl will break if straightened while the button will pull from the shank if the said shank is subjected to a retrogressive movement.

1,573,862. VULCANIZING APPARATUS. NELSON E. RABER, Akron, Ohio, assignor to The B. F. Goodrich Company, New York, N. Y., a Corporation of New York. Filed Aug. 31, 1922. Serial No. 585,336. 12 Claims. (Cl. 18—17.)



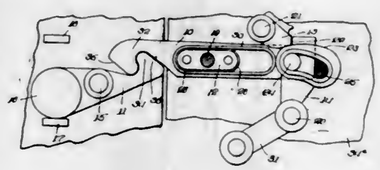
2. Vulcanizing apparatus comprising a mold and means for conducting pressure fluid into a hollow article contained therein, said means comprising an inlet stem projecting from said mold and a fluid-supply pipe connected therewith, the connection comprising male and female fluid-conducting members mated in telescoped relation, and a lip-gasket acting transversely of the conduit to form a seal between said members.

1,573,863. GOLF CLUB. MILTON B. REACH, Springfield, Mass., assignor to A. G. Spalding & Bros., New York, N. Y., a Corporation of New Jersey. Filed June 24, 1925. Serial No. 39,268. 4 Claims. (Cl. 273—80.)



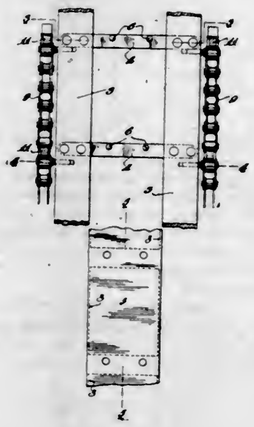
4. In combination, a golf club head, a shaft having transverse spaced notches, a cord wound spirally around the shaft and at intervals entering the said notches, said cord being adhesively secured to the interior wall of the socket of the head.

1,573,864. PORTABLE COMBINED MANTEL, FIREPLACE, AND HEARTH UNIT. PAUL REUTER-LORENZEN, Detroit, Mich. Filed May 8, 1925. Serial No. 28,900. 5 Claims. (Cl. 126—120.)



1. A unit of the class referred to comprising a frame, an asbestos sheeting arranged around the inner edges at the intermediate portion of the front of the frame, a metallic lathing secured throughout to the front of the frame further connected to said asbestos sheeting, said metallic lathing further extended into the intermediate portion of the frame to provide a fireplace, a covering of a magnesite compound throughout the outer face of the lathing, a coating of a magnesite composition applied to the outer face of said covering and of the color of mortar, a suitably colored furrowed coating of magnesite composition applied to the outer face of the first mentioned coating, a head element mounted on the frame, and coupling members carried by the frame for the passage of hold-fast devices therefor.

1,573,865. METHOD OF AND APPARATUS FOR TESTING THE ELASTIC PROPERTIES OF METALS. CHARLES W. ROBBINS, La Grange, Ill., assignor to Western Electric Company, Incorporated, New York, N. Y., a Corporation of New York. Filed June 12, 1920. Serial No. 388,454. 8 Claims. (Cl. 265—16.)

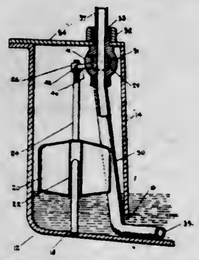


1. The method of testing the elastic properties of materials, which consists in fixing one end of a strip of material of uniform cross section and given length and deflecting said strip out of a normal plane by gradually increasing known amounts in response to pressures applied at the free end, noting the deflection pressures required and permanent set for each amount, and continuing the readings beyond the point where the sample first begins to show a permanent set.

1,573,866. LATCH CONSTRUCTION. JAMES B. ROGERS, Chicago, Ill. Filed May 23, 1921. Serial No. 471,538. 5 Claims. (Cl. 292—113.)

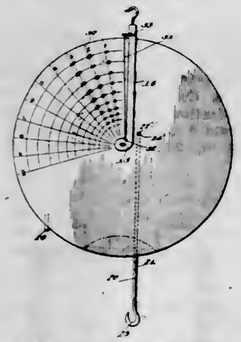
1. A latch construction comprising a hook member, a pivoted hook operating member, means for mounting said hook for pivotal and sliding movement about a support eccentric of the axis of the pivoted hook operating member, said hook operating member having a pivotal connection with the hook member eccentric to the axis of the hook operating member.

1,573,867. MACHINE FOR APPLYING CREAM AND LIKE MATERIALS TO BISCUITS AND THE LIKE. LAURENT RONDOLIN, Bermondsey, England, assignor to Peek Frean & Company Limited, London, England. Original application filed Sept. 18, 1924, Serial No. 738,375. Divided and this application filed May 9, 1925. Serial No. 29,179. 3 Claims. (Cl. 198—193.)



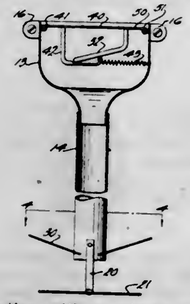
1. In a machine of the kind herein referred to, a carrier belt comprising two relatively thick but narrow endless runs, transverse metal ties holding the said runs in spaced relationship and a thinner midrun supported between the spaced runs aforesaid by the metal ties, substantially as described.

1,573,868. ENGINE-BASE OIL RESERVOIR. AUGUSTIN ROUSSELLE, Montreal, Quebec, Canada. Filed Mar. 14, 1925. Serial No. 15,556. 2 Claims. (Cl. 184—108.)



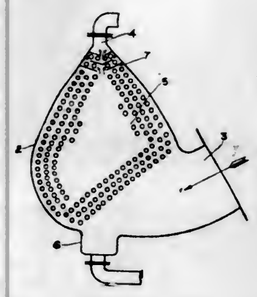
1. An engine base oil reservoir comprising an engine base, having its bed and walls extended at diagonally opposite-points to form wells, valve casings in said wells

respectively forming primary and secondary inlets and discharge, a tubular connection between said casings, an oil supply tank connected to said primary inlet, valves



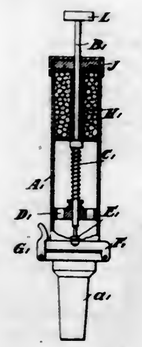
in said casings having operating stems extending through said casings and floats in said wells, having rods therefrom operatively connected with said stems.

1,573,869. WEIGHING SCALE. WILLIAM M. SANDERS, Eagle Creek, Oreg. Filed Mar. 23, 1925. Serial No. 17,743. 2 Claims. (Cl. 265—36.)



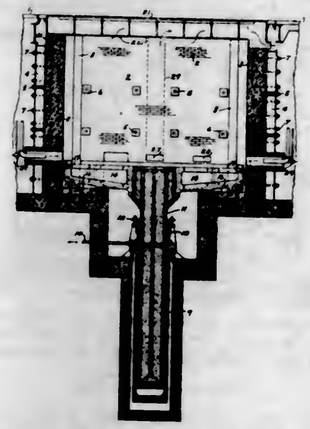
1. In a weighing scale, a pair of disks, a shaft, said disks being connected at their centers to the shaft, a hanger coacting with the shaft to support the same for oscillating movement, weights connected to the disks, and suspension means for the articles to be weighed eccentrically connected to the disks, said suspension means including a T-shaped rod having a shank provided with a hook, and a cross arm having its ends pivotally connected to the disks.

1,573,870. MATERIAL RECEPTACLE. HENRY SANFORD, New York, N. Y. Filed Oct. 24, 1921. Serial No. 509,928. 5 Claims. (Cl. 4—275.)



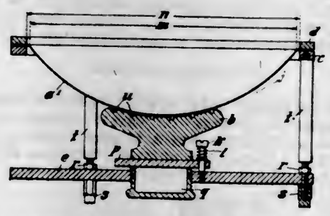
1. The combination with a vehicle employing inflammable liquid, of an ash receiver in the vehicle and a platform beneath the vehicle freely open and exposed, with a passage from receiver to platform, and a fan shaped deflector over said platform extending in the direction of movement of the vehicle for directing a current of air across the platform when the vehicle is in motion.

1,573,871. CONDENSER. HENRY F. SCHMIDT, Swarthmore, Pa., assignor to Westinghouse Electric & Manufacturing Company, a Corporation of Pennsylvania. Filed Feb. 20, 1920. Serial No. 360,190. 2 Claims. (Cl. 257—43.)



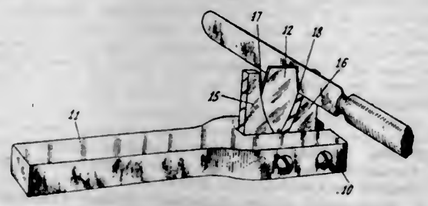
1. A condenser comprising a shell having upwardly converging side walls and provided with a fluid inlet adjacent the bottom thereof, a non-condensable-fluid offtake adjacent the point of convergence of the side walls, a nest of tubes disposed between the converging side walls and in the path of fluid flowing from the fluid inlet to the fluid offtake, baffles disposed adjacent the said offtake for directing the non-condensable fluids past the uppermost tubes of the said nest, and means for withdrawing condensate from the bottom of the shell.

1,573,872. PORTABLE HEATING DEVICE. ALFRED SCHWARTZ, Schlachtensee, near Berlin, Germany. Filed Jan. 22, 1925. Serial No. 4,036. 8 Claims. (Cl. 126—263.)



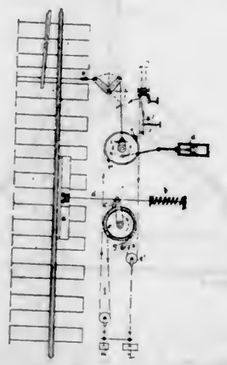
4. A pocket heating device comprising a barrel having a heat generating material associated therewith; means in said barrel for igniting the heat generating material, said means being adapted to be operated from the outside of said barrel in order to prevent the flames and gases from reaching the atmosphere; and means for absorbing the gases resulting from the reaction of the heat generating material.

1,573,873. PROCESS OF AND OVEN FOR HEAT TREATING OBJECTS. CHARLES EDW. SEARCH, Milwaukee, Wis. Filed Apr. 17, 1922. Serial No. 553,454. 22 Claims. (Cl. 25—143.)



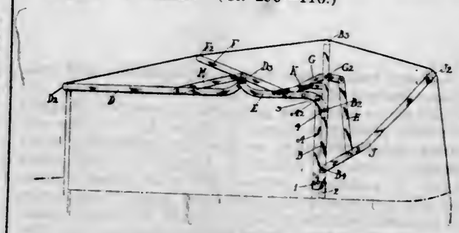
1. An oven comprising a platform vertically adjustable to different levels and having its upper limit of adjustment adjacent the floor level, and a stationary beam extending across said platform at the floor level.

1,573,874. APPARATUS FOR THE REPRODUCTION OF SOUNDS. GEORG SEIBT, Berlin-Schoneberg, Germany. Filed July 23, 1923. Serial No. 653,396. 5 Claims. (Cl. 181—31.)



1. In a sound reproducer, a base plate, a diaphragm supporting ring, means for supporting said ring on said plate and for adjusting it parallel thereto, an extremely thin cup-like diaphragm having a marginal flange whose inner diameter is but slightly less than said ring, a clamping ring to hold said flange on the first ring and electrical vibrating means on said base plate.

1,573,875. KNIFE SHARPENER. JAMES E. SHAW, Germantown, Pa. Filed Aug. 21, 1924. Serial No. 733,356. 4 Claims. (Cl. 76—88.)

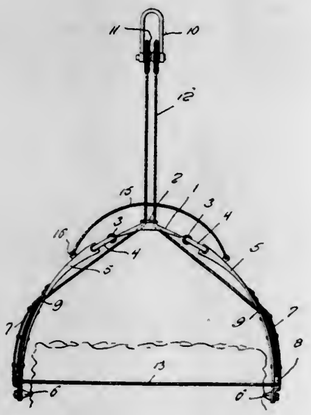


1. A sharpener comprising a guide member with inclined edged surface and a cutting plate provided with a concave surface extending downwardly from its upper extremity, said concave edge crossing the vertical or inclined surface of the guide member, so as to form a notch concaved on the cutting side and straight on the guide side.

1,573,876. MEANS FOR OPERATING AND CONTROLLING RAILWAY POINTS, SIGNALS, BARRIERS, AND THE LIKE. ALEKCEI EVGENEVITCH SHEREMETEFF, Osnabruck, Germany. Filed May 22, 1923. Serial No. 640,634. 5 Claims. (Cl. 246—264.)

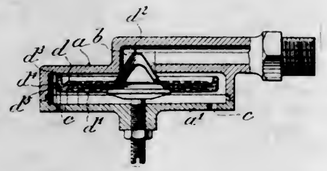
1. In combination with a railtrack of a vehicle, a power accumulator consisting of a suspended weight, a power receiving member extending along a rail and arranged to be subjected to the direct impact-action of a wheel of a passing vehicle, a spring interposed between said power receiving member and said power accumulator for absorbing the impact-action of a wheel imparted upon said power receiving member and permitting the charging of said accumulator by the energy of the said spring only, and means for controlling from a distance the power stored in the accumulator.

1,573,877. COLLAPSIBLE TOP. ARTHUR VINCENT SMITH and FREDERICK GEORGE WILLIAM DUPREE, Coventry, England. Filed July 16, 1924. Serial No. 726,366. 7 Claims. (Cl. 296—116.)



1. In a hood for a vehicle, the combination of a pillar pivoted at its lower end, linkwork forming the hood framework connected with said pillar, and a second pillar connected with the aforesaid framework adapted to have its edge lie flat against the edge of the first mentioned pillar when the hood is fully erected, thereby to form a stop, substantially as set forth.

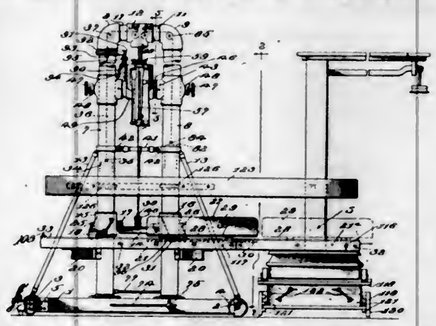
1,573,878. HOISTING SLING. ELDEN L. SMITH, Marshfield, Oreg. Filed Apr. 25, 1925. Serial No. 25,845. 3 Claims. (Cl. 294—74.)



1. In a sling structure of the class described, a plate having an opening, a pair of jaws having openings piv-

otally mounted on the ends of the plate, sheaves journaled on the extremities of the jaws, a clevis, sheaves supported in the clevis, and an endless cable trained

over the sheaves in the clevis, through the openings in the jaws, and over the sheaves on the jaws for forming sling portions.

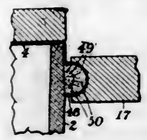


1,573,879. STEAM TRAP. ERNEST HENRY STILL and ANDREW GEORGE ADAMSON, London, England. Filed May 28, 1925. Serial No. 33,493. 1 Claim. (Cl. 297—9.)

A steam trap capsule containing expansible fluid comprising opposed circular corrugated metallic plates; one of said plates having its peripheral portion bent abruptly outwardly and then inwardly so as to form an outwardly extending hollow marginal rim terminating in an inwardly extending peripheral flange; the other plate having its peripheral portion bent in an opposite direction and terminating in a peripheral flange fitting within the inwardly extended peripheral flange of the first named plate, whereby the two plates are brought closely together to form a narrow liquid containing chamber; the flanges of the two plates being sealed together.

1,573,880. FILLED-BAG-CLOSING MACHINE. CHARLES S. THOMPSON, Park Ridge, and WILLIAM B. LONG, Chicago, Ill., assignors to Union Special Machine Company, Chicago, Ill., a Corporation of Illinois. Filed Oct. 28, 1922. Serial No. 597,615. 54 Claims. (Cl. 112—11.)

1. A filled bag closing machine including in combination, a supporting frame, a sewing head mounted thereon having means for feeding the mouth of a filled bag, a carrier, supporting means carried by said frame and on which said carrier is adapted to be moved, said carrier being adapted to be moved along said supporting means by the feed of the sewing machine operating upon the

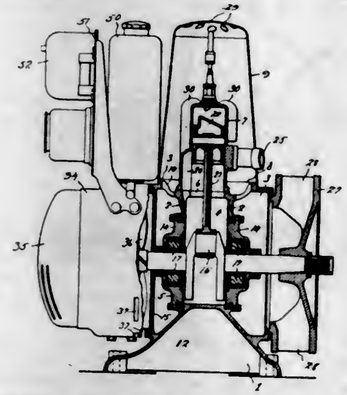


filled bag mounted on the carrier, and means for automatically returning the carrier to normal position for loading after the filled bag has been removed therefrom.

1,573,881. METHOD OF MAKING RESILIENT HEEL LIFTS. WILLIAM J. TOMPKINS, Mount Vernon, N. Y. Filed June 10, 1921, Serial No. 476,421. Renewed Aug. 1, 1924. 2 Claims. (Cl. 18—55.)

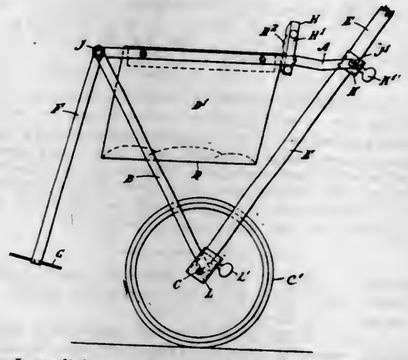
1. A method of manufacturing resilient heel lifts which consists in first flattening a concavo-convex resilient lift having concentric attaching and tread surfaces, then removing from the tread surface of the flattened lift all stock protruding beyond a horizontal plane coinciding with the perimeter of the tread surface, then detaching the lift and making mold dies in accordance with the curvatures of the concave and convex surfaces of the modified lift and then producing resilient lifts by means of the mold dies, having convex surfaces conforming to the corresponding surfaces of the modified lift.

1,573,882. METHOD AND APPARATUS FOR SEALING CONTAINERS. SIDNEY C. VESSY, Cleveland, Ohio, assignor to The Star Seal & Closure Company, Cleveland, Ohio, a Corporation of Ohio. Filed Oct. 28, 1918. Serial No. 259,975. 16 Claims. (Cl. 226—87.)



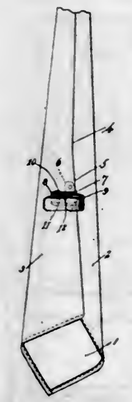
1. The method of forming hermetic seals on glass containers and the like, which method comprises providing a container having a peripheral wall adjacent the mouth thereof; providing a metal cap with an angular bead in the skirt thereof; providing a gasket within said bead, then placing said cap in position over the mouth of said container; and then changing the angular character of said bead into a substantially smooth curved form in cross-section by spinning inward the angularly disposed portions of said bead whereby the gasket is compressed between the skirt of the cap and the side wall of the container.

1,573,883. DYNAMO-ELECTRIC PLANT. MERRITT A. VINING, Elyria, Ohio. Filed June 2, 1921. Serial No. 474,339. 9 Claims. (Cl. 290—1.)



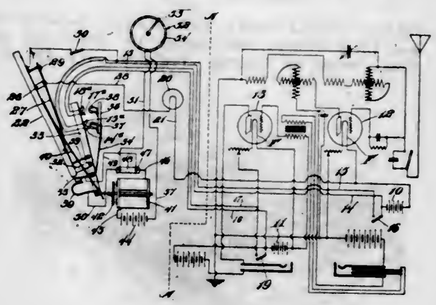
1. In a device of the character described, the combination with an engine having a crank case and base and including inner and outer walls arranged in spaced relationship, said inner and outer walls being provided

each with a pair of oppositely disposed openings therein, bearing caps closing each of the openings in said inner walls, means closing one of said openings in the outer walls, and a fly wheel rotatably mounted in the other of said openings.



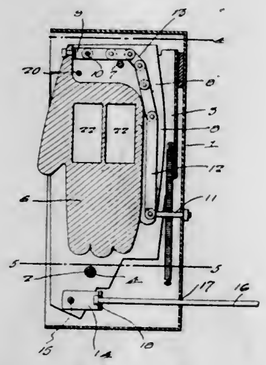
9. In a device of the character described, the combination with an engine having a crank case and base and including inner and outer walls arranged in spaced relationship, said outer walls being provided with a pair of oppositely disposed openings, a crank shaft extending through said openings, a combined fly wheel and fan mounted on one end of said crank shaft and rotatably mounted in one of said openings, said fan being adapted to create an air draft between said inner and outer walls, an electric machine comprising an armature and a field frame operatively connected to the opposite end of said crank shaft and normally closing the other of said crank case openings, and means for circulating an air draft through said electric machine independent of said engine draft.

1,573,884. LIGHT, PORTABLE, COLLAPSIBLE BABY CAR. REGINALD DIXON WEATHERELL, London, England. Filed Aug. 26, 1924. Serial No. 734,264. 4 Claims. (Cl. 280—36.)



1. In a light portable collapsible baby car, the combination with two longitudinal seat carrying members, a transverse member connecting the forward ends of said longitudinal members, a wheel carrying axle, two supporting members pivotally and permanently connected to said transverse member and to said axle, and a supporting and propelling member detachably connected to the axle and to said seat carrying members for maintaining the seat carrying members and the supporting members in proper spaced relation.

1,573,885. NECKTIE. EDWARD J. WEISBAUM, Cincinnati, Ohio. Filed Oct. 24, 1923. Serial No. 670,569. 1 Claim. (Cl. 2—145.)

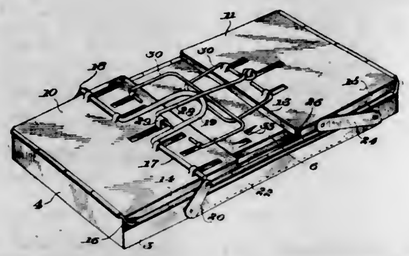


A necktie of the four-in-hand type having an outer end portion adapted when tied to lie over an inner end portion, aligning means secured to said outer end portion on the inner side thereof, said aligning means permanently secured to said outer end portion, and maintained in fixed position with relation thereto, and having spaced apart folds with the spaces between said folds open in opposite directions, the nearer of said folds adapted to retain an inner end portion of said tie, and the farther of said folds adapted to engage an outer pleat of a shirt front opening.

1,573,886. CHECK-OPERATED RADIO RECEIVING SET. ERNEST E. WESSON, Blair Station, Pa., assignor of one-sixth to Abraham H. Johnson, Blair Station, Pa., and one-sixth to Fleming H. Jackson and one-sixth to Roy L. Gissendanner, both of Clairton, Pa. Filed Apr. 23, 1925. Serial No. 25,285. 12 Claims. (Cl. 194—9.)

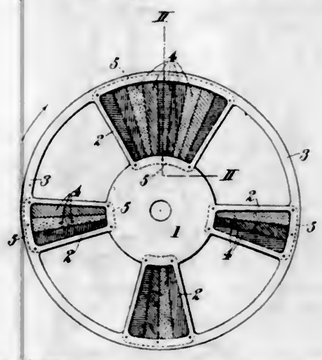
1. In combination with a radio receiving circuit including an audion bulb, an open filament-lighting circuit for the bulb and check controlled means for closing the filament circuit, including a check chute for the simultaneous reception of a plurality of checks, a signal element and means for rendering the signal element operative when the filament circuit of the audion is closed and but a single check remains in the check chute.

1,573,887. AUTOMOBILE SIGNAL. HENRY NEWTON WESSON, Attalla, Ala. Filed Jan. 17, 1925. Serial No. 3,146. 3 Claims. (Cl. 116—54.)



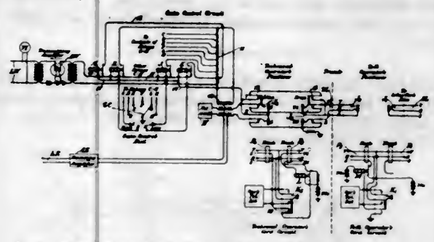
1. An automobile signal comprising a casing open at its side, a substantially U-shaped arm pivotally supported adjacent its outer lower end in said casing, a signaling hand pivotally supported at its inner end in the upper portion of said arm and normally disposed therein, a lever slidably supported in the closed side of the casing, the outer end thereof being secured to the lower outer end of the arm for swinging the same outwardly of the casing, means for moving said signaling hand outwardly to an operative position during the outward swinging movement of said arm, means for limiting the upward swinging movement of said hand with respect to said arm, and means for returning the arm and the signaling hand to their normally inoperative positions.

1,573,888. HIGH-TEMPERATURE CEMENT. PAUL G. WILLETTS, Berlin, Conn., assignor to Hartford-Empire Company, Hartford, Conn., a Corporation of Delaware. Filed Nov. 13, 1925. Serial No. 68,917. 8 Claims. (Cl. 106—9.)



1. A cement containing barium sulphate, silica and silicate of soda.

1,573,889. COLLAPSIBLE EGG CRATE. ORION WISER and ARLIE KEMPER, Martinsville, Ill. Filed Aug. 25, 1924. Serial No. 734,024. 7 Claims. (Cl. 220—7.)

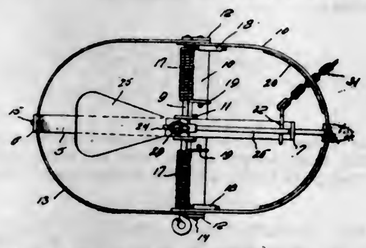


1. In a knockdown box having its ends hinged to the bottom, means for drawing the ends toward each other comprising a crank lever mounted on one end of the box and means connecting said crank lever with the other end of the box.

1,573,890. CINEMATOGRAPH PROJECTION APPARATUS. FREDERICK WILLIAM WOODWARD and ARTHUR ROBERTSON BUTTERY, Sheffield, England, assignors to Mabel Alice Buttery, Walkley, Sheffield, England. Filed Feb. 28, 1922. Serial No. 539,926. 7 Claims. (Cl. 88—19.3.)

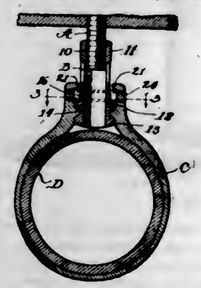
1. In a shutter for motion picture projection apparatus, a plurality of spaced blades, each including transparent non-refracting colored sectors of substantially equal size-density, the colors of said sectors including the chief components of all the colors of the spectrum of the light with which the shutter is to be used.

1,573,891. GAIN-CONTROLLING CIRCUITS. SUMNER B. WRIGHT, East Orange, N. J., and JOHN T. SCHOTT, Brooklyn, N. Y., assignors to American Telephone and Telegraph Company, a Corporation of New York. Filed Apr. 30, 1925. Serial No. 27,001. 6 Claims. (Cl. 179—170.)



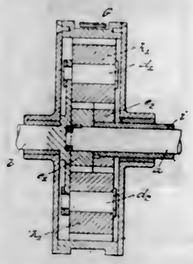
1. In a signaling system, an amplifier, means to control the gain of said amplifier, a cord circuit for establishing connections to said amplifier, an operator's telephone set associated with said cord circuit, and means whereby when said operator's telephone set is connected in circuit the existing gain adjustment of said amplifier will be disabled and the amplifier will be adjusted to the requirements of said operator's telephone set.

1,573,892. ANIMAL TRAP. PETER G. YELM, Genoa, Nebr. Filed Sept. 16, 1925. Serial No. 56,692. 3 Claims. (Cl. 43—82.)



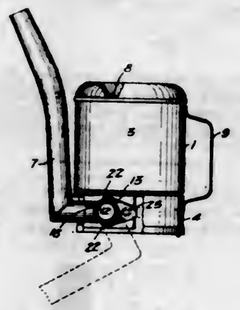
1. A trap of the class described including a longitudinally extending base bar having its ends terminating in upright ears, a transverse bar having its intermediate portion fixed to an intermediate portion of the base bar and its ends terminating in upright ears, a U-shaped member having its intermediate portion fixed to the intermediate portion of the base bar and its sides extending upwardly, a bolt extending through the sides of the member, and disposed in spaced parallelism to the transverse bar, a fixed U-shaped jaw having its extremities fixed to the upright ears of the transverse bar and its intermediate portion fixed to one upright

ear of the base bar, said bolts extending through the ends of said fixed jaw, a movable U-shaped jaw having its ends pivotally receiving the bolt, coil springs about the bolt, one extremity of each coil spring attached to the



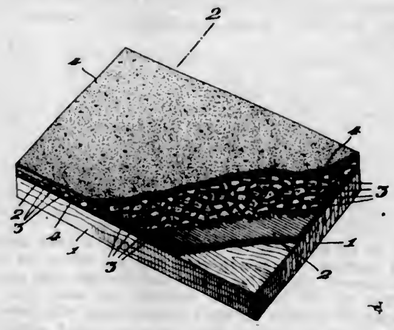
movable jaw and the other extremity to the transverse bar for normally holding the movable jaw closed in the fixed jaw, and trip means for holding the movable jaw in a set position.

1,573,893. ADJUSTABLE PIPE HANGER. LOTHAR R. ZIFFERER, Columbia, Pa. Filed June 9, 1924. Serial No. 718,680. 6 Claims. (Cl. 248—31.)



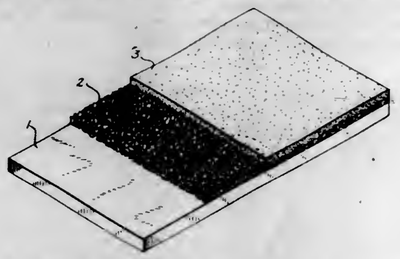
6. In a pipe hanger, the combination with a threaded sleeve having a swiveled connection with a carrier, of a pair of lugs upstanding from the carrier adjacent the sleeve, each lug having an inturned lip at its upper extremity, a yoked plate slidably arranged between the two lugs and confined thereby, and means on the plate and sleeve adapted to interlock when the plate is in one longitudinal position and to disengage when the plate is in another longitudinal position, the plate thereby serving at times to hold the sleeve against rotation relative to the carrier, substantially as described.

1,573,894. CHANGE-SPEED GEAR FOR MOTOR VEHICLES. VÁCLAV ZIMA, Horice, Czechoslovakia. Filed Apr. 1, 1924. Serial No. 703,405. 4 Claims. (Cl. 74—34.)



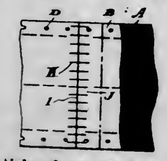
1. A change speed gear comprising two or more concentrically arranged planet wheels, spindles carried on the driven shaft and carrying said planet wheels, two concentric central wheels having equal diameters and arranged side by side and both simultaneously in mesh with the same planet wheels and one of said central wheels being secured to the driving shaft, a hollow shaft rotatable on the driven shaft and secured to the other central wheel, and means for turning the two central wheels to a greater or less extent relatively to each other according to the speed of rotation.

1,573,895. SPRING VALVE FOR SWINGSPOUT MEASURES. SCOTT E. ALLEN, Los Angeles, Calif., assignor to Swingspout Measure Co., a Corporation of California. Filed Aug. 13, 1923. Serial No. 657,027. 6 Claims. (Cl. 221—26.)



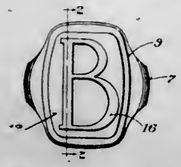
1. In a spring valve swingspout measure, a swingspout outlet valve comprising: an inner fixed member; an outer movable member disposed on said inner member, the ends of said inner member extending beyond the ends of said outer member; engagement means extending around said inner member and engaging an end of said outer member; and means for regulating the pressure of engagement of said engaging means with an end of said outer member.

1,573,896. METHOD OF APPLYING PLASTER AND STUCCO. WILLIAM H. ALTON, New York, N. Y., assignor to R. T. Vanderbilt Company, New York, N. Y., a Corporation of New York. Filed July 7, 1925. Serial No. 41,947. 7 Claims. (Cl. 72—123.)



1. Method of plastering surfaces which comprises applying thereto a viscous coating consisting in a water emulsion of bituminous plastic, embedding therein granular material to provide a rough surface, permitting the coating to harden and applying plaster thereto.

1,573,897. METHOD OF APPLYING PLASTER OR STUCCO. WILLIAM H. ALTON, New York, N. Y., assignor to R. T. Vanderbilt Company, New York, N. Y., a Corporation of New York. Filed Aug. 13, 1925. Serial No. 49,941. 3 Claims. (Cl. 72—123.)

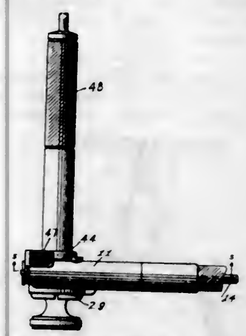


1. A method of plastering surfaces which comprises applying thereto a viscous coating containing a mixture of bituminous plastic and granular material to provide a rough surface and applying plaster thereto.

1,573,898. ADVERTISING MEDIUM. FRANCIS EDWIN ARMSTRONG, Toronto, Ontario, Canada. Filed Feb. 11, 1924. Serial No. 691,946. 2 Claims. (Cl. 40—125.)

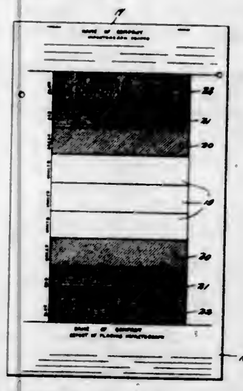
1. As a new article of manufacture, a laminated advertising medium of flexible sheet formation comprising a weather and wind-proof light passing backing layer, a weather and windproof advertisement carrying layer coextensive with the backing layer and formed of light passing material, and means for connecting the layers along spaced lines which are distributed over the entire area of the medium whereby slight relative movement of the layers between said lines will be permitted when the medium is folded or rolled.

1,573,899. ARTICLE OF JEWELRY. GEORGE A. ARMSTRONG, Providence, R. I., assignor to William C. Greene Company, a Corporation of Rhode Island. Filed Apr. 29, 1925. Serial No. 26,633. 3 Claims. (Cl. 63—29.)



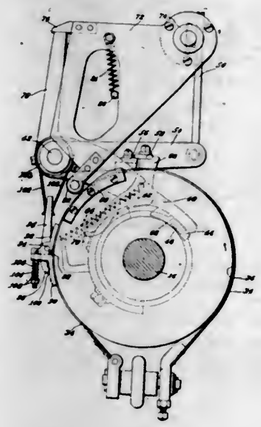
3. In an article of the type set forth, a head portion with opening, a stone in said opening having its rear face exposed, and having a hole therethrough with lateral cavities in its front face opening into said hole, an ornamental member having a tubular post with internal threads and an oblong plate forming radial elevations registering in correspondingly shaped cavities, an attaching screw engaging said threads the same serving to retain the ornamental member tightly against said stone and preventing accidental displacement and circular movement of the ornament upon the face of the stone.

1,573,900. LOCOMOTIVE FRAME. WILLIAM O. ASHE, St. Louis, Mo., assignor to Commonwealth Steel Company, St. Louis, Mo., a Corporation of New Jersey. Filed Jan. 20, 1925. Serial No. 3,585. 11 Claims. (Cl. 105—44.)



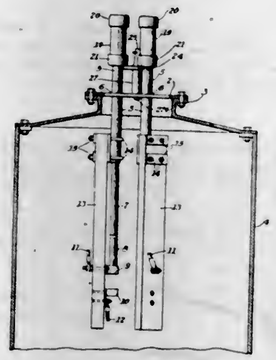
6. An integral locomotive frame including driving box pedestals, brake hanger lugs, a front end boiler support, and a foot plate having a double drawbar pocket therein.

1,573,901. UTILITY TOOL. FREDERICK J. BAHNI, Peoria, Ill. Filed Sept. 24, 1923. Serial No. 664,638. 2 Claims. (Cl. 77—15.)



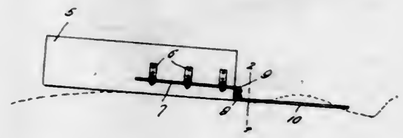
1. In a utility tool, comprising a driving member, a tool portion connected thereto, said connection including a worm on the cable member and a gear on the tool portion, said tool portion having its operating end located at a point substantially removed from the connecting means and mechanism permitting removability and engagement of plural tool members comprising a member passing through the gear member.

1,573,902. RECORD SHEET. JOHN B. BASKERVILLE, Roanoke, Va. Filed July 25, 1925. Serial No. 46,126. 2 Claims. (Cl. 283—1.)



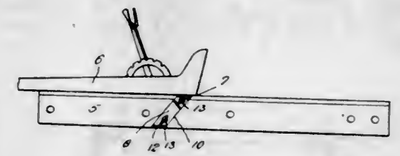
1. A record receiver for freight car impactographs including a sheet having indicia at the top and bottom and intermediate spaces captioned with the names of different colors.

1,573,903. PRESS. ARTHUR BATES and JOSEPH GOULDBOURN, Leicester, England, assignor to United Shoe Machinery Corporation, Paterson, N. J., a Corporation of New Jersey. Filed May 19, 1920. Serial No. 382,550. 42 Claims. (Cl. 192—144.)



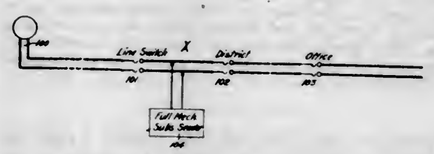
12. In a machine of the class described, a work supporting bed, a presser member, power means for moving the presser member toward and from the work supporting bed, manually operable means for controlling said power means and movable to initiate one or a plurality of pressure applying operations, and means under the control of the operator for determining the extent of movement of the manually operable means so that the number of pressure applying operations of the pressure member may be predetermined at the will of the operator.

1,573,904. SWITCH-ACTUATING MECHANISM. CHRISTIAN N. BERGMANN, Pittsburgh, Pa., assignor to The Packard Electric Company, Warren, Ohio. Filed Feb. 23, 1922. Serial No. 538,721. 11 Claims. (Cl. 200—50.)



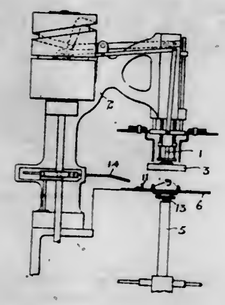
3. In combination, a supporting plate provided with rigidly connected tubular guides extending on opposite sides thereof, a plurality of reciprocable stems mounted in said guides and having laterally projecting handle portions, and a rotatable centrally arranged locking disk extending inwardly beyond said abutments and provided with a clearance recess for one of said handle members.

1,573,905. ROAD SHOULDER AND WEED ATTACHMENT FOR ROAD SCRAPING MACHINES. JOHN A. BLACK, Stephen, Minn. Filed Sept. 9, 1924. Serial No. 736,734. 3 Claims. (Cl. 37—143.)



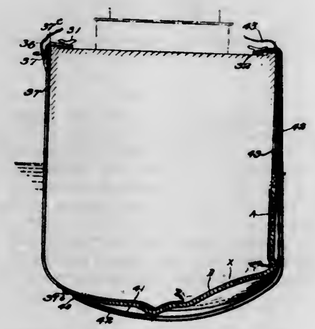
1. In an attachment for road scraping machine blade, a bar secured in horizontal position upon the blade adjacent the outer end thereof, and a cutter blade carried by the outer end of the bar in offset horizontal alignment therewith.

1,573,906. SAWMILL-HEAD-BLOCK CLEANER. CHARLES D. BLAKE, Glens Falls, N. Y. Filed Sept. 28, 1923. Serial No. 665,294. 2 Claims. (Cl. 143—124.)



1. An improvement in saw mill head block cleaners comprising a conventional base plate, and a work feeding knee slidable along the upper face of the base plate; said improvement consisting of forming a transverse diagonal groove in the base plate, said groove extending entirely across the upper face of the base plate, a scraper plate lying in said groove and twisted laterally at its upper end to extend diagonally across and in contact with the adjacent face of said knee, and means adjustably and removably securing said plate in the groove.

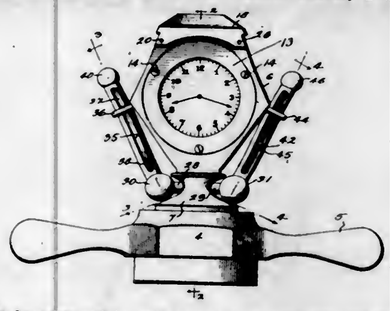
1,573,907. TELEPHONE-EXCHANGE SYSTEM. WILLIAM G. BLAUVELT, New York, N. Y., assignor to American Telephone and Telegraph Company, a Corporation of New York. Filed May 20, 1925. Serial No. 31,659. 15 Claims. (Cl. 179—27.)



1. In a telephone exchange system, a register sender, a plurality of translators divided into groups in accordance with classification of service, and means for selectively associating said sender with an idle translator of a particular one of said groups.

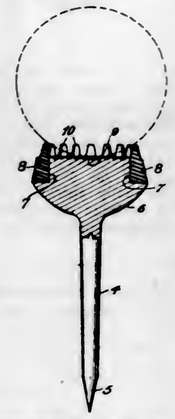
1,573,908. EXTENSION-BOX-COVER MACHINE. HENRY BLUGERMAN, Toronto, Ontario, Canada. Filed Oct. 8, 1925. Serial No. 61,283. 6 Claims. (Cl. 93—55.)

1. In an extension box cover machine, the combination with the plunger bar and cover holding block thereon, of a plate arranged below said block and having means thereon for locating a sheet of paper board in relation to the block.



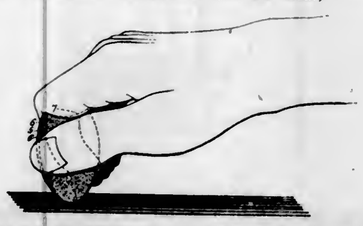
1,573,909. EMERGENCY APPARATUS FOR DAMAGED SHIPS. RALPH BLUMBERG, Baltimore, Md. Filed Mar. 10, 1921. Serial No. 451,178. 17 Claims. (Cl. 114—229.)

1. The combination with a ship, of a comparatively light cable normally passing around the same, heavier cables secured to the ends of said light cable and normally anchored to the ship, a pulley block adapted to be secured to one of said heavier cables, a mattress carrying cable passing through said pulley block, and means operating through said heavier cables for shifting said pulley block to a point below the water line.



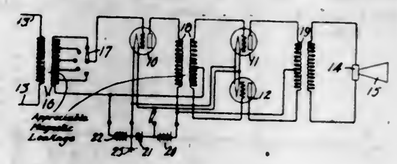
1,573,910. ATTACHMENT FOR MOTOR VEHICLES. OSCAR F. BRINKMAN, Lancaster, Pa., assignor of one-half to Morris Klivansky, Lancaster, Pa. Filed Dec. 11, 1924. Serial No. 755,348. 5 Claims. (Cl. 224—29.)

1. An attachment for motor vehicles comprising a member having a depending tubular extension adapted to be secured to the filling opening of a radiator, of a motor vehicle, said member being provided with a recess extending inwardly from one face, and being further provided with a passage extending from the top of said recess through the top of said member whereby a watch



may be arranged in said recess with the stem projecting through said passage, and means for retaining the watch in said recess.

1,573,911. GOLF TEE. WILLIAM A. BUDROW, Pittsfield, Mass. Filed Dec. 28, 1925. Serial No. 77,907. 4 Claims. (Cl. 273—33.)



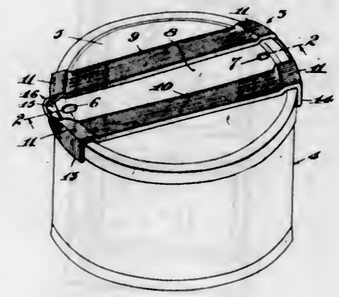
1. A golf tee comprising a pin having a head provided with a top surface on which the ball rests and a row of upstanding lugs surrounding the surface and spaced apart sufficiently to permit the ball to rest on said surface.

1,573,912. HAND PICK FOR STRING INSTRUMENTS. AARON BURDWISE, Baltimore, Md. Filed Aug. 14, 1925. Serial No. 50,291. 2 Claims. (Cl. 84—322.)

1. A pick or plectrum comprising a plate of relatively hard and stiff and springy material, and two plates of relatively soft and pliable material embracing the first said plate therebetween and secured thereto, all these plates terminating in the extremity of the picking point of the pick or plectrum, so these plates have their edges flush at the extremity of said picking point.

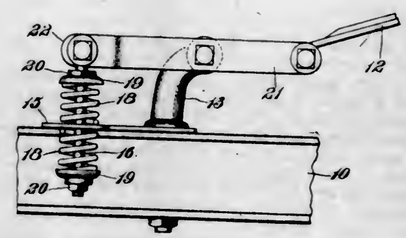
1,573,913. TRANSMISSION CIRCUITS. WILLIAM L. CASPER, Brooklyn, N. Y., assignor to Western Electric Company, Incorporated, New York, N. Y., a Corporation of New York. Filed May 23, 1922. Serial No. 563,081. 8 Claims. (Cl. 178—44.)

1. In combination, a loud speaking receiver having a falling characteristic over a given range of speech frequencies, and a transformer in circuit therewith having a rising transmission characteristic over said range.



1,573,914. FUSE. ALBERTO CIMOROSI, Elkton, Md. Filed June 9, 1925. Serial No. 35,871. 4 Claims. (Cl. 102—24.)

1. A fuse including a tube; combustible material in the tube; a rigid stud connected to one end of the tube and having a passage leading outside the tube; a plunger guide detachably connected with the stud and providing a cavity adapted to receive an explosive cap; a plunger slidable in the guide and having a head adapted to engage the cap, and a fuse connected with the passage in the stud and with the combustible material at the flame end of the tube.

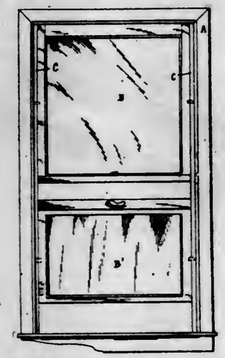


1,573,915. SPOUT AND SEAL FOR CONTAINERS. ROBERT M. CLAPP, Alhambra, Calif. Filed Apr. 28, 1924. Serial No. 709,432. 2 Claims. (Cl. 221—23.)

1. A device of the character described, comprising a strip adapted to seat on the end of a can, said strip being formed with curved down-turned end flanges adapted to conform to the margins of a can end, said strip being formed with an opening to expose holes

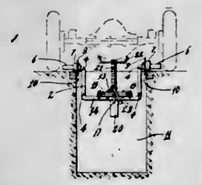
punched in the can top, and a spout formed integral with the strip in continuation with one of the flanges and along the margin of the opening in the strip.

1,573,916. SPRING MOUNTING FOR VEHICLES. THOMAS F. M. CRISP, North Uvalde, Tex., assignor of one-half to George W. Johnson, North Uvalde, Tex. Filed Mar. 24, 1925. Serial No. 18,011. 2 Claims. (Cl. 267—17.)



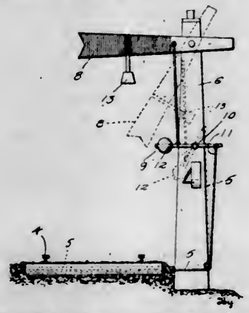
1. In a spring mounting for vehicles having an axle and a semi-elliptic spring overlying the axle, a plate carried by the axle, a perch extending upwardly from the axle adjacent the plate, a lever mounted intermediate its ends upon the perch and having means at one end for receiving an end of the vehicle spring and having at its opposite end a shaft directed through said plate, spring seats carried by the shaft in spaced relation to the plate and springs surrounding the shaft at opposite sides of said plate and between the plate and said spring seats, said perch securing said plate in position upon said axle.

1,573,917. SWINGING-WINDOW STRUCTURE. HARRY A. DE HAAS, Mount Lebanon Township, Allegheny County, Pa. Filed Apr. 23, 1925. Serial No. 25,254. 5 Claims. (Cl. 20—49.)



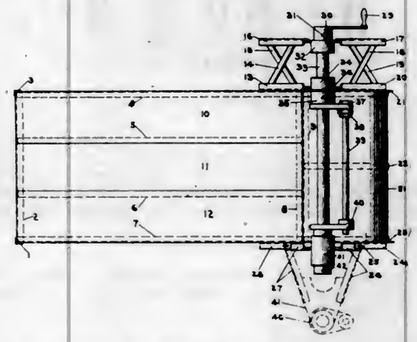
1. In a sliding and swinging window structure the combination with a window frame, of a pair of sash-bars mounted to slide vertically in said frame and a window sash interposed between said bars, of a horizontally disposed journal member sunk into each of said sash-bars, a horizontally disposed stud extending from each ver-

tical edge of said sash and journaled in the corresponding journal member, said studs having threaded bores, washers bearing against the ends of said journal mem-



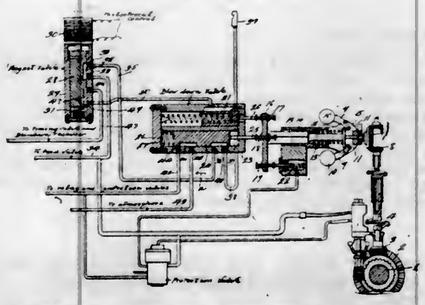
bers and studs, and screws extending through said washers and screwed into the threaded bores of said studs.

1,573,918. PIT TOOL. WALTER J. DEWHIRST, Los Angeles, Calif. Filed Nov. 9, 1925. Serial No. 67,836. 8 Claims. (Cl. 254—2.)



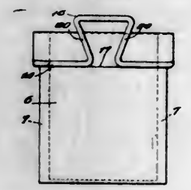
1. In a device of the class described, the combination of a U shaped frame, upper extensions on the said frame, wheels journaled on the said extensions, a carriage supported on the said frame on the lower extension thereof, a screw threaded through a gear supported by said carriage, a cradle supported by the screw, and means for rotating the gear to raise or lower said cradle on the screw.

1,573,919. RAILWAY-TRAIN-STOPPING DEVICE. SORABJI DHUNJIBHOY, Marha Tal, India. Filed Aug. 20, 1924. Serial No. 733,228. 1 Claim. (Cl. 246—203.)



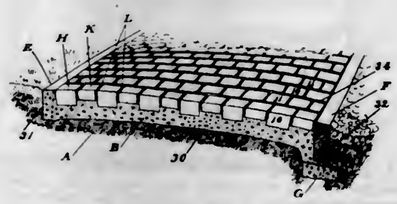
A train stopping device comprising in combination with a track and a post adjacent the track, a signal arm pivoted to the post and arranged to swing over the track, a trip member carried by said arm and located at a point between the pivot of the arm and that end edge thereof which may be disposed over the track, said trip member extending below the lower edge of the arm, a second arm pivoted to the post at a point below the first mentioned arm, a weight mounted upon one end portion of the second mentioned arm, a cable connected with the other end portion of the second mentioned arm and adapted to be extended along the track, and a rod connecting the weighted end portion of the second mentioned arm with the first mentioned arm at a point between the pivot of the first mentioned arm and the trip.

1,573,920. MACHINE FOR WRAPPING BED MATTRESSES. HENRY L. DISMER, Davenport, Iowa. Filed Mar. 16, 1925. Serial No. 16,077. 3 Claims. (Cl. 242—85.)



1. A machine for folding and wrapping mattresses comprising a bed, an extended fixed support secured to the bed, at one side thereof carrying a pair of widely spaced bearings secured thereto, and a relatively narrow hinged support secured to the opposite side thereof, the hinged portion of said suport carrying a suitable bearing, a head having an arm formed integral therewith revolvably mounted in the bearing of the hinged support, a main shaft having one end rotatably mounted in the bearings of the fixed support and its oposite end adapted to enter the head secured in the bearing of the hinged support when in vertical position, a fixed arm secured to the main shaft adjacent the fixed bearings thereof, an auxiliary shaft having one end secured in the fixed arm and its opposite end adapted to enter the arm of the head secured in the hinged bearings and means for rotating the main shaft secured near the fixed bearings thereof.

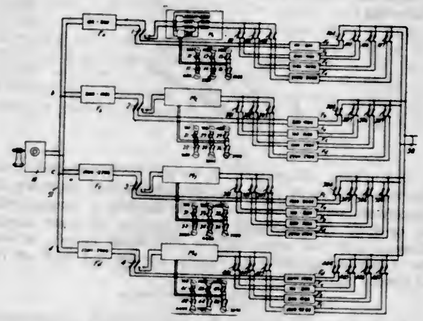
1,573,921. TRAIN-CONTROL SYSTEM. GEORGE W. DODGE, Knoxville, Tenn. Filed Apr. 8, 1925. Serial No. 21,600. 7 Claims. (Cl. 303—18.)



1. The combination with a train control system having a magnet valve and a speed governor, of valve means operated by said speed governor and cooperating with ports in communication with ports in the magnet valve and forming means whereby when a predetermined speed is substantially obtained a signal will be given and upon exceeding the predetermined speed brakes will be set.

1,573,922. BATTERY CELL AND HANDLE. WILLIAM H. DUGGAN, Chicago, Ill., assignor of one-half to Benjamin Clarke, Chicago, Ill. Filed Feb. 9, 1925. Serial No. 7,777. 10 Claims. (Cl. 16—114.)

1. In combination, a battery container having downwardly facing shoulder means thereon, said shoulder means being interrupted about the container, a band having handle means thereon and spreadable portions along said shoulder means adapted to be sprung over said shoulder means into position therebeneath and upwardly facing abutment means on the container along the interrupted part of said first shoulder means for limiting the movement of the band onto the container.

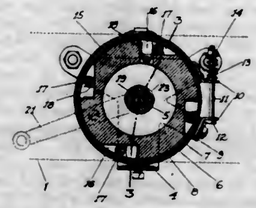


1,573,923. PAVEMENT AND PROCESS OF MAKING. HEARRAT E. FLETCHER, Westford, Mass. Filed Mar. 28, 1923. Serial No. 628,382. 8 Claims. (Cl. 94—6.)

4. The process of making monolithic pavements, which consists of depositing on a foundation of compact earth, a thoroughly mixed dry concrete composed of aggregate, sand and hydraulic cement, then imbedding therein paving blocks of various depths so that the dry concrete will fill the spaces beneath the shallow blocks between the deep blocks, then ramming or rolling the blocks to bring their top faces to an even surface, then sprinkling the mass with sufficient water to cause the initial set to the hydraulic cement, then while the mass is still wet, filling the spaces between the blocks with a grout composed of hydraulic cement, sand and water.

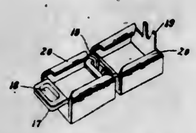
1,573,924. SECRET SIGNALING. HARVEY FLETCHER, New York, N. Y., assignor to Western Electric Company, Incorporated, New York, N. Y., a Corporation of New York. Filed July 31, 1923. Serial No. 654,803. 9 Claims. (Cl. 178—44.)

5. In a signaling system, a two-way transmission circuit, means to impress waves having a band of frequency components upon said circuit, means interposed in said circuit for sub-dividing the waves being transmitted in either direction over said circuit into a plurality of sub-bands of frequency components, means for



interchanging the positions of the sub-bands in respect to the frequency ranges which they occupy, and means to impress the shifted sub-bands on said circuit.

1,573,925. SOLDERING IRON. DAVID H. FRANKE and NICKOLAS G. DE VRIES, Brooklyn, N. Y. Filed July 11, 1924. Serial No. 725,517. 1 Claim. (Cl. 219—26.)

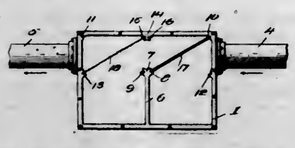


An electrically heated soldering iron comprising a handle of insulating material, a copper sleeve let in the handle and projecting therefrom, said sleeve having its bore flared inwardly at the outer portion thereof, a carbon soldering point having an enlarged body which is flared to be received in and frictionally engage with the flared wall of the copper sleeve, and an insulated conductor passing through the rear end of the handle and removably secured tn the sleeve.

1,573,926. SHOCK ABSORBER. WILLIAM H. FRAZINE, Modesto, Calif. Filed Oct. 15, 1924. Serial No. 743,689. 4 Claims. (Cl. 267—10.)

1. A shock absorber for motor cars comprising a bracket adapted to be fixed on the frame of a car and having a central hub, a drum turnable on the hub, a rotatable element turnable on the hub independent of the drum and fitting into the latter, means enabling said element to be connected to an axle of the car whereby with the reciprocation of the axle relative to the frame said element will be rotated, one way clutch means between said element and the drum, friction means applied to the drum to resist rotation thereof, and a common means applied to the bracket for removably holding the drum and rotatable element from longitudinal movement on the bracket hub.

1,573,927. CHAIN CONSTRUCTION. LESTER EARL FULFORD, Edgewood, R. I., assignor to Fulford Mfg. Co., Providence, R. I., a Corporation of Rhode Island. Filed Feb. 12, 1924. Serial No. 692,288. 4 Claims. (Cl. 59—80.)



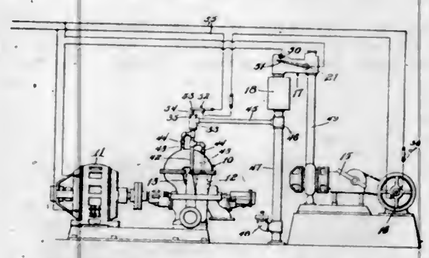
1. A chain comprising a series of box-shaped links having a top wall, side and end walls bent downwardly therefrom, one of the end walls having a tongue with an opening therethrough and extending at right angles thereto and the other of the end walls having a stud for interlocking with the tongue of the end wall of the adjacent link.

1,573,928. AGE-RESISTING RUBBER COMPOUND AND METHOD OF MAKING THE SAME. EVERETT W. FULLER, Springfield, Mass., assignor to The Fisk Rubber Company, Chicopee Falls, Mass., a Corporation of Massachusetts. Filed Apr. 27, 1925. Serial No. 26,300. 7 Claims. (Cl. 18—53.)

1. A method of making rubber products having improved ageing qualities which comprises adding an alkali or alkaline earth salt of alpha-nitroso-beta-naphthol to a vulcanizable rubber compound and vulcanizing the mixture.

1,573,929. STRAINER. WILLIAM F. GALL, Russellton, Pa. Filed Apr. 17, 1925. Serial No. 23,924. 1 Claim. (Cl. 210—165.)

A device of the class described comprising a substantially rectangular shaped casing open at its front side, a cover plate therefor, said casing being provided with an inlet in the upper portion of one end thereof, and an outlet in the upper portion of the opposite end, a transversely extending vertical partition arranged in the intermediate portion of the casing, the upper edge of said partition being spaced from the top of the casing, an enlargement formed on the upper edge of the partition, and provided with obliquely disposed guide grooves, a transversely extending rib formed on the bottom face of the top of the casing in vertical alignment with said partition, said rib being also provided with obliquely disposed guide grooves, said casing being provided with guide grooves in the upper corners thereof and additional guide grooves at points below the inlet and outlet respectively, said guide grooves being adapted to be disposed in pairs, and strainer elements removably suported in certain pairs of said guide grooves, the lower edge of one of the strainer elements being adapted to be supported in one of the obliquely disposed guide grooves formed in the enlargement on the upper edge of the partition.

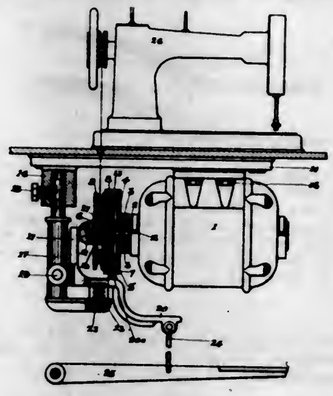


1,573,930. LOUVER. MILLARD GILMORE, Oak Park, Ill. Filed July 13, 1922. Serial No. 574,776. 3 Claims. (Cl. 189—60.)

1. In combination, a wall having an opening, a plurality of shutters extending across and adapted for closing said opening, the upper and lower ends of said shutters being turned in opposite directions and the upper ends of each adapted for overlapping the lower ends of adjacent shutters, a pivot for each shutter disposed above the center of the vertical dimensions thereof and adjacent the bases of the upper turned out ends on

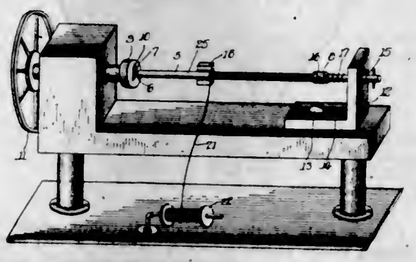
the side of the shutter opposite that toward which the adjacent end of the shutter is turned, and means attached to the upper ends of the shutter adjacent said pivots for swinging the shutters open.

1,573,931. PRIMING SYSTEM FOR CENTRIFUGAL PUMPS. CHARLES H. GOYNE, Ashland, Pa., assignor to Goyne Steam Pump Co., Ashland, Pa., a Corporation of Pennsylvania. Filed Aug. 20, 1925. Serial No. 51,449. 7 Claims. (Cl. 103—113.)



3. In a priming system for centrifugals and in combination with a centrifugal, a priming pump therefor, a connection between a high point of the centrifugal and the priming pump including a valve automatically segregating the centrifugal and priming pump when the centrifugal is primed and before it is started, means in said connection between the centrifugal and valve automatically segregating the centrifugal and valve when the centrifugal is started and placing that portion of the connection between said means and valve in communication with the atmosphere and means operative to drain said portion of the connection when placed in communication with the atmosphere, the first named valve operating as an unloader valve for the priming pump when said portion of the connection is drained.

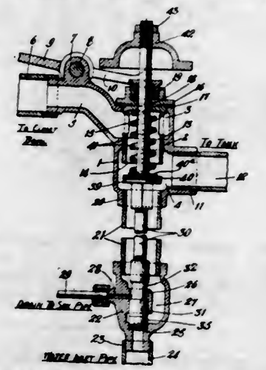
1,573,932. MOTOR ATTACHMENT FOR SEWING MACHINES. BARNET GROSSBARD, San Francisco, Calif. Filed Apr. 13, 1925. Serial No. 22,757. 5 Claims. (Cl. 192—17.)



1. A motor attachment for sewing machines comprising, in combination with a motor, a wheel secured to the shaft of a motor, having a gripping pad attached thereto, a fly wheel revolvably attached to the first mentioned wheel, a gripping pad secured to the inside surface of the fly wheel, a disc revolvably attached to the

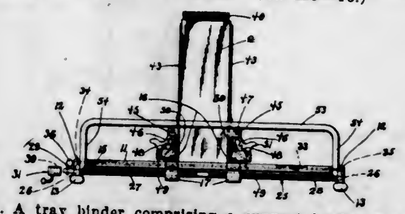
fly wheel and located between said pads, a knob secured to the fly wheel, a lever pivoted on a bar secured to a supporting base and engageable with the knob, means

located on the lever for stopping the fly wheel from revolving, and means for moving the lever upward or downward whereby the device may be thrown into or out of operation.



1,573,933. METHOD AND MEANS FOR WINDING. WARD R. GUEST, Chicago, Ill., assignor to Ward Manufacturing Company, Chicago, Ill., a Corporation of Illinois. Filed Feb. 9, 1924. Serial No. 691,581. 19 Claims. (Cl. 242—7.)

1. A method of winding fine wire on small elements having a relatively soft surface, comprising, rotating the element, manually placing a half-nut against said element in such a manner that the threads thereof are engaged by the soft surface to feed the half-nut along the rotating element, and carrying by the half-nut a wire which is secured to the rotating element.

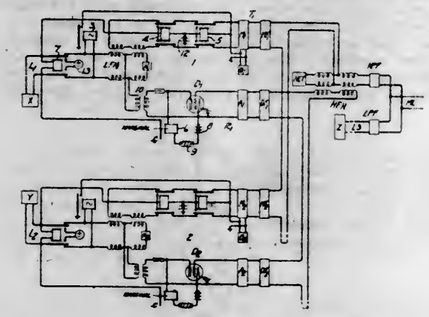


1,573,934. FROSTPROOF CLOSET VALVE. PHILIP HAAS, Dayton, Ohio. Filed May 22, 1924. Serial No. 715,010. 8 Claims. (Cl. 277—13.)

3. In a frost proof flushing valve mechanism, the combination with a valve casing, comprising an upper casing provided with a partition having a threaded aperture therein, a tank connection below said partition and a flushing passage above said partition, a removable sleeve threaded into said partition and provided with portions for closing the upper end of the casing, the lower end of said sleeve being provided with apertures above the partition communicating with the flushing passage and having a valve seat at its lower end below said partition, the lower portion of the valve casing being provided with a water inlet having a horizontal valve seat surrounding the same, a main passage in axial alignment with said seat, a by-pass extending around said main passage, and a drain passage connected with the main passage, of a valve stem extending vertically through said casing and sleeve, and provided with a normally open valve below the valve seat thereof, said valve stem being provided with a plunger engaging the main passage adjacent to said drain passage, and provided below the same with a normally closed combined inlet and check valve engaging the valve seat of the water inlet and connected to the valve stem by means permitting said stem to move upwardly,

independently thereof, the parts being so constructed that the normal movement of the valve stem to close said first mentioned normally open valve upon the seat at the lower end of the sleeve, will not lift the inlet valve from its seat, and a spring engaging said valve stem and pressing it normally downwardly into contact with the combined inlet and check valve to hold the latter normally upon its seat, whereby said sleeve may be removed and the valve stem may be bodily withdrawn from the valve casing, together with the valves connected therewith, including the combined inlet and check valve.

1,573,935. TRAY BINDER. CHARLES R. HADLEY, deceased, late of Los Angeles, Calif., by Frank D. Barnhill and Pacific Southwest Trust & Savings Bank, executors, Los Angeles, Calif., assignors to Charles R. Hadley Company, a Corporation. Filed Aug. 25, 1924. Serial No. 734,129. 5 Claims. (Cl. 129—16.)

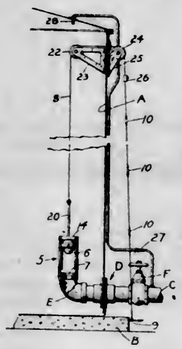


1. A tray binder comprising a support having a slot, clamping means on the support, rods connected with the support and positioned beneath the slot, a block slidably mounted on the rods and connected with one of the clamping members, and means loosely connected with the block to move it into different positions along the rods.

1,573,936. SYSTEM OF CARRIER-WAVE SIGNALING. RALPH V. L. HARTLEY, East Orange, N. J., assignor to Western Electric Company, Incorporated, New York, N. Y., a Corporation of New York. Filed Oct. 11, 1920. Serial No. 416,058. 9 Claims. (Cl. 178—44.)

1. A carrier transmission line, an oscillator for normally supplying unmodulated oscillations thereto, a modulator between said oscillator and said line, means

for impressing speech currents upon said modulator to modulate said oscillations, a low frequency terminal circuit, means responsive to such modulated oscillations

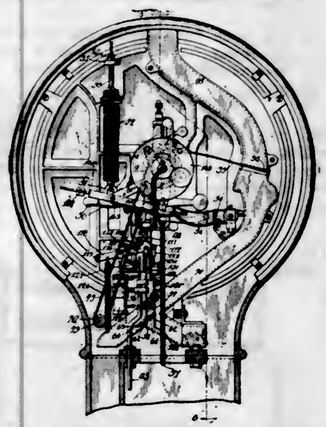


to transmit speech currents over said low frequency circuit, and means responsive to the withdrawal of the unmodulated oscillations from said transmission line to transmit a call signal over said low frequency circuit.

1,573,937. METHOD OF PRODUCING CAST IRON. JOHN CLIFTON HENDERSON, New York, N. Y., assignor to Driver-Harris Company, Harrison, N. J., a Corporation of New Jersey. Filed Apr. 22, 1925. Serial No. 25,119. 4 Claims. (Cl. 75—45.)

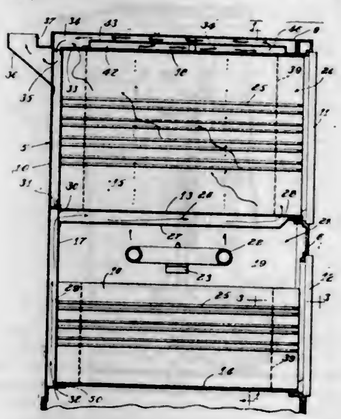
1. The method of producing cast iron containing definite quantities of nickel and chromium which consists in forming an alloy of nickel, chromium and iron, high in carbon so as to have a relatively low melting point, the nickel being in excess of the chromium and iron taken together, introducing said alloy, in solid form, and molten iron into a ladle, and producing thereby a molten alloyed mass having the desired pouring temperature.

1,573,938. STORAGE-TANK EMERGENCY VALVE. VINCENT M. HENRIETTA and BRONSON B. TELLEY, San Francisco, Calif. Filed Feb. 24, 1925. Serial No. 11,164. 5 Claims. (Cl. 220—89.)



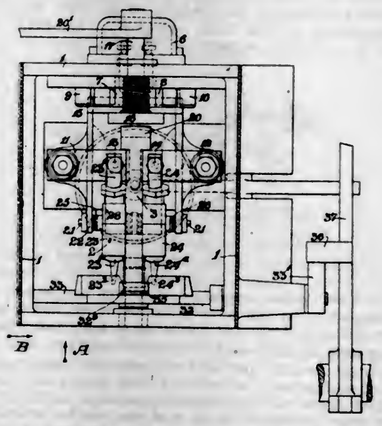
1. In combination, a storage tank, a pipe beginning interiorly and terminating exteriorly of the same, a valve on the pipe within the tank, a thermo-control exteriorly of the tank for closing the said valve, said pipe also having a manually operable valve exteriorly of the tank, and a relief tube connecting with the pipe in advance of the manually operable valve and the top of the tank.

1,573,939. SHOE SHANK. WILLIAM A. HERMANN, Auburn, Me., assignor to MacLaughlin-Sweet, Inc., Auburn, Me., a Corporation of Maine. Filed Feb. 9, 1923. Serial No. 617,932. 2 Claims. (Cl. 36—76.)



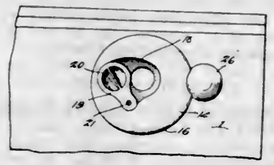
2. In a shoe structure, an outer sole having a longitudinally split heel and shank, a stiffener comprising a flattened heel and shank piece disposed thereon and a second shank piece disposed in said split, said shank pieces being each fastened to said interposed sole and covered by the flap of the split sole molded thereto and secured in place over it.

1,573,940. COIN-RETURN WEIGHING SCALE. GUSTAV F. HOCHRIEM, Chicago, Ill. Filed May 17, 1922. Serial No. 561,631. 12 Claims. (Cl. 194—1.)



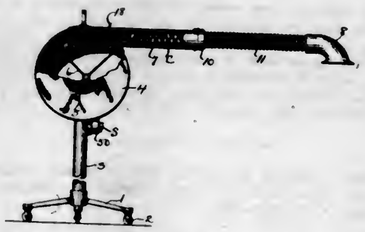
1. In a scale of the character described, comprising weighing means which include a platform, a dial having weight-indicating graduations, two pointers independently movable relative to said graduations, one pointer being a weighing pointer and movable by the weighing means and the other being a guessing pointer and movable by hand, and means including coin-actuated mechanism for causing the weighing pointer to indicate weight on said graduations when a weight is on said platform and a coin is deposited in the device, the combination therewith of means for returning the coin to the operator when the weighing pointer indicates substantially the same weight as does the guessing pointer on said graduations, said last-mentioned means including a device operable by the weighing mechanism to assume a relative position according to the weight upon said platform, a device mounted to assume a relative position according to the position of the guessing pointer when said guessing pointer is moved by hand, said two devices having means respectively adapted to coact with each other to provide a path of movement for a part carried by one of said devices and mounted to move in such path when said pointers indicate the same weight and to provide an obstruction to the movement of said part when said pointers indicate substantially different weights, a part carried by one of said devices and mounted to move in such path when said pointers indicate the same weight, and coin-deflecting means operable through the movement of said last-mentioned part.

1,573,941. OVEN CONSTRUCTION. PETER I. HOLLMAN, Rockford, Ill., assignor to Geo. D. Roper Corporation, Rockford, Ill., a Corporation of Illinois. Filed Sept. 28, 1925. Serial No. 59,035. 12 Claims. (Cl. 126—39.)



1. In an oven construction, the combination of a closed oven space, burners therebeneath, flue ducts for conducting the products of combustion around the sides of the oven space out of communication with said space, top flue ducts for receiving said combustion products for passage back and forth for indirect discharge thereof, a stack vent for the ultimate discharge of said combustion products, a fresh air flue duct for said oven, inlets for the fresh air at the bottom of the oven at one side thereof, and outlets for the air at the top of the oven at the opposite side thereof from the inlets, said outlets leading in common with the top flue ducts for waste combustion products to said stack vent.

1,573,942. AUTOMATIC WEFT-REPLENISHING LOOM. DENIS MACHELL HOLLINS, Blackburn, England, assignor to Draper Corporation, Hopedale, Mass., a Corporation of Maine. Filed Oct. 30, 1924. Serial No. 746,725. 10 Claims. (Cl. 139—232.)

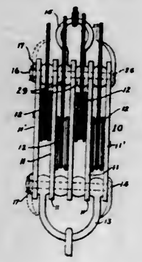


1. Automatic weft replenishing mechanism for shifting shuttle-box looms comprising an electric circuit having a feeler branch with a feeler therein and transfer branches corresponding to the magazines containing weft carriers to be delivered to the respective shuttles, a selector switch operable by the box-shifting mechanism to select the transfer branch corresponding to the active shuttle, a single solenoid common to all of said branches operable, when momentarily energized by detection of exhaustion of filling upon the weft carrier of the active shuttle, to condition the selected transfer branch and means operable upon completion of the circuit through said transfer branch to initiate the action of the transferring mechanism.

1,573,943. LOCK FOR INKWELLS. GEORGE FRANKS IVEY, Hickory, N. C. Filed June 20, 1924. Serial No. 721,335. 1 Claim. (Cl. 120—58.)

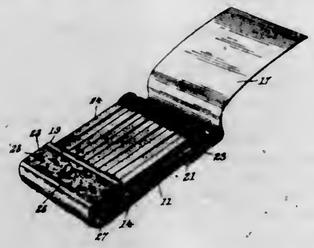
A device of the class described comprising in combination, a support having a well opening and having an opening adjacent thereto, a well positioned within the opening, a cover having a flange connected with the well, a locking bolt positioned in the second mentioned opening and having a head formed with an overhanging lip adapted to engage the flange of the cover, said bolt having a notch formed in the side thereof, and a lock controlled bar adapted to move into the notch to lock the bolt against movement.

1,573,944. SWITCH CONTROL FOR ELECTRIC HAIR DRIERS. BENNO F. JANCKE, New York, N. Y., assignor to Hallwell Electric Co., Inc., New York, N. Y., a Corporation of New York. Filed May 18, 1925. Serial No. 30,931. 3 Claims. (Cl. 219—42.)



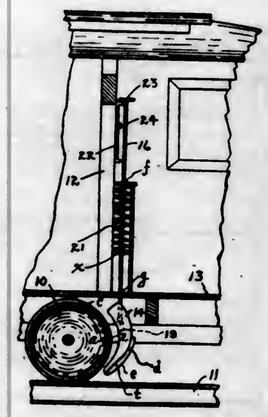
1. In an electric hair drier the combination of a motor adapted to drive a fan for producing an air current, electric heating means adapted to heat the said air current, one terminal of said motor and one end of said electric heating means being adapted to be directly connected to one lead of an electric power line, and a switch embodying five switch terminals, said terminals including a first switch terminal which is adapted to be connected to the other electric power line lead, and a second switch terminal which is adapted to be connected to the other end of said electric heating means, additional switch means adapted to make and break the connection between the last mentioned switch terminal and the said electric heating means, each of the remaining three switch terminals being connected to the other motor terminal by resistance coils having different resistances, the said switch embodying a revoluble member having a plurality of blades and adapted to be moved into four different positions, the said blades being adapted in each of said four positions to always connect the said first switch terminal to the said second switch terminal and to also

connect one of the remaining three switch terminals to the said first switch terminal and the said second switch terminal.



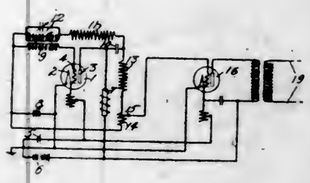
3. An electric hair drier according to claim 1 in which the first switch terminal is nearer the base of said switch than the other terminals, and the second switch terminal is further from the base than the other terminals, the remaining three switch terminals being all of the same distance from the base and being located in a plane between the first switch terminal and the second switch terminal, the blades of the said revoluble member comprising a first set of three blades adapted to make contact only with the second switch terminal, and a second set of four blades, three of which are adapted to contact only with the first switch terminal, the fourth blade of the second set being further away from the base of the switch than the other three blades of the second set, and being adapted to contact with all the said switch terminals except the first and the second.

1,573,945. DEFLECTOR FOR SHEAVE BLOCKS. BURT STANLEY MINOR, Los Angeles, Calif., assignor to Regan Forge & Engineering Company, San Pedro, Calif., a Corporation of California. Filed Apr. 14, 1924. Serial No. 706,323. 2 Claims. (Cl. 254—192.)



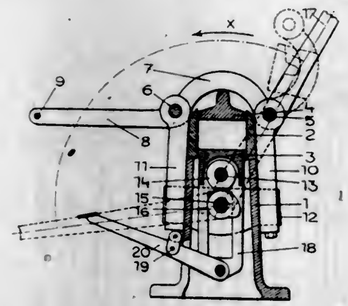
1. A deflector for sheave blocks, comprising a flat metallic member adapted to be secured to the outer surface of one of the side frame portions of a sheave block, the upper end of said member being bent transversely, and means formed on said member and engaging the sheave frame to prevent a shifting movement after the same has been secured to said block.

1,573,946. MATCH HOLDER. JULIUS STERN, Brooklyn, N. Y. Filed Apr. 15, 1924. Serial No. 706,643. 8 Claims. (Cl. 206—29.)



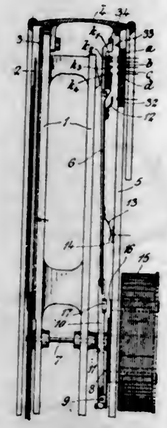
1. An article of the character described comprising a base formed from a strip of material, matches disposed at opposite sides of said base, means for retaining said matches in position on said base, and covering means formed from said strip of material and serving to enclose said base and the matches thereon, substantially as specified.

1,573,947. EMERGENCY BRAKE. WILLIAM LOUIS SUCHA, Omaha, Nebr. Filed Jan. 19, 1925. Serial No. 3,326. 1 Claim. (Cl. 188—36.)



In an emergency brake for a carrier including a support and having wheels for engaging track rails, a pair of shoes each being provided with a convexed wall having a rectilinear part and a concaved wall non-concentric with said convexed wall, a horizontal link rigidly connected with said shoes, an upright control bar traversing said support and pivotally connected with said link and being movable to permit the rectilinear parts of the shoes to engage the track rails, a latch normally engaging the control bar for maintaining the shoes in disengaged relation with the wheels and track rails, and resilient means on the control bar tending to move said bar and link for moving the shoes into engagement with the track rails, said control-bar having a projection for engaging said support when the bar is disengaged from the latch and while the rectilinear parts of the shoes engage the track rails.

1,573,948. MEANS FOR PRODUCING OSCILLATIONS. DONALD M. TERRY, Brooklyn, N. Y., assignor to Western Electric Company, Incorporated, New York, N. Y., a Corporation of New York. Filed Nov. 21, 1923. Serial No. 676,037. 8 Claims. (Cl. 250—36.)

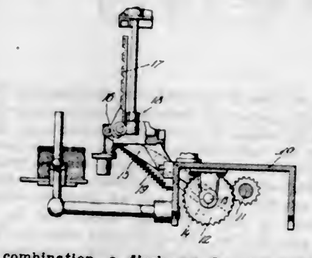


1. An oscillation generator comprising an electric discharge device having a cathode, an anode and a grid, input and output circuits connected in feed back relation to generate oscillations of constant frequency, said output circuit having a plurality of oscillating current paths, one of said paths constituting a feed back path coupled to said input circuit, means included in each of the oscillating current paths of said circuits for stabilizing the operation of the oscillator, and adjustable coupling means for varying the value of the constant frequency oscillating energy available at the output terminals of the oscillator for transmission to a load circuit.

1,573,949. HAND PRESS. ARMIN TETTELBNI, Budapest, Hungary. Filed Mar. 13, 1925. Serial No. 15,300. 6 Claims. (Cl. 25—85.)

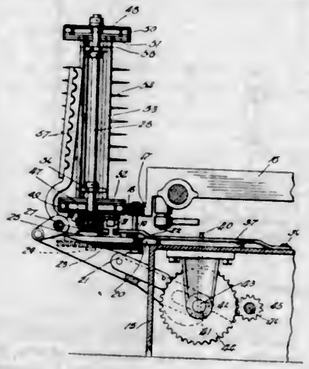
1. A hand press for the manufacture of rectangular bodies particularly building elements, comprising a cover plate pivotally mounted with respect to the press plunger and producing a preliminary compression of the material to be pressed, and a locking device comprising a yoke on said plate adapted to be engaged over a lower transverse support of the press.

1,573,950. AUTOMATIC SCALE. CARL TORGERSEN, Stabaek, near Christiania, Norway. Filed Sept. 6, 1924. Serial No. 736,330. 3 Claims. (Cl. 235—92.)



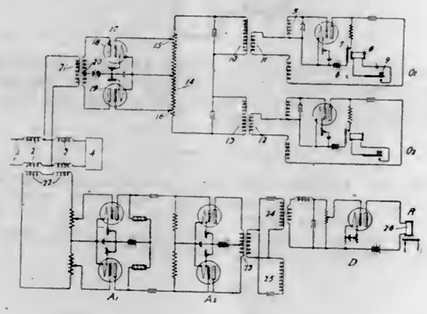
1. A device for adapting an automatic scale for recording the amount indicated by the pointer comprising an indicating pointer in combination with a contact arm that is adapted to oscillate synchronously with said pointer, electrical contacts corresponding with the graduations on the scale, over which the contact arm moves, means for swinging the contact arm in a plane perpendicular to the oscillating plane so that it is brought into contact with one or more of the said electrical contacts, locking electro-magnets, numeral discs, adjusting means therefor and electric means whereby the swinging of the contact arm closes electric circuits that energise the electro-magnets for adjusting the numeral discs to the same numerals as those indicated by the pointer on the scale.

1,573,951. SMOKE TRAP. EDWARD P. TREBE, Bay City, Mich. Filed Mar. 15, 1924. Serial No. 699,427. 3 Claims. (Cl. 126—190.)



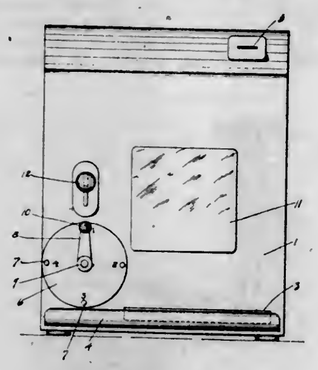
1. The combination with a furnace having an elongated fuel entrance passage leading thereto a flat door mounted within said passage to swing entirely therein, and forming a closure for said passage.

1,573,952. SLICING MACHINE. CORNELIS FRANCISCUS MARIA VAN BERKEL, Rotterdam, Netherlands, assignor to U. S. Slicing Machine Company, La Porte, Ind., a Corporation of Indiana. Filed May 15, 1924. Serial No. 713,394. 13 Claims. (Cl. 146—94.)



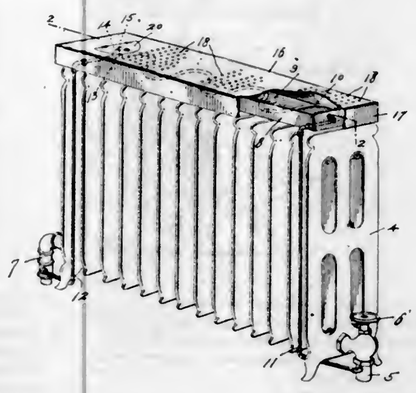
1. In combination, a discharge fly of a slice stacking machine, and a cushioning device for controlling the movement of said fly, said cushioning device being arranged to exert retarding force on said fly prior to the time in its discharge movement when it reaches discharge position.

1,573,953. STACKER FOR SLICING MACHINES. CORNELIS FRANCISCUS MARIA VAN BERKEL, Rotterdam, Netherlands, assignor to U. S. Slicing Machine Company, La Porte, Ind., a Corporation of Indiana. Filed May 15, 1924. Serial No. 713,396. 18 Claims. (Cl. 146—94.)



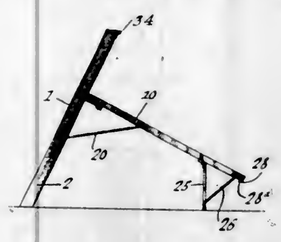
1. In a slicing machine, the combination with a slicing knife, of a slice conveyer for receiving slices formed by said knife, and means for imparting successive intermittent movements to said slice conveyer in the same direction, each movement beginning where the previous one was discontinued.

1,573,954. CURRENT-WAVE TRANSMISSION. HAROLD J. VENNES, Montreal, Quebec, Canada, assignor to Western Electric Company, Incorporated, New York, N. Y., a Corporation of New York. Filed May 26, 1919, Serial No. 299,749. Renewed Apr. 15, 1925. 15 Claims. (Cl. 178—51.)



1. In a system of current transmission, a line for simultaneously conveying currents of different frequencies, a plurality of means for producing currents of different frequencies for said line, a selective circuit associated with each of said means, a collecting circuit common to said plurality of means for receiving currents from the individual selective circuits, and an amplifier having its input coupled to said collecting circuit and its output coupled to said line for amplifying said currents of different frequencies and for impressing them upon said line.

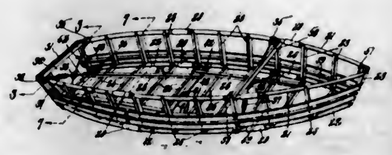
1,573,955. PENCIL-VENDING MACHINE. WILLARD WALDRON, Bay City, Mich. Filed Jan. 2, 1923. Serial No. 610,194. 4 Claims. (Cl. 211—8.)



1. In a pencil vending machine comprising a case, having a plurality of spring tensioned shafts journaled therein and formed to nest or cradle a single pencil, cranks on the ends of the shafts, a transversally disposed shaft adjacent the said cranks, and a spider slidably mounted thereon, means for rotating the spider to selectively engage one of the said cranks, and means for sliding the spider on the shaft to engage a crank and rock the shaft to discharge or eject a pencil therefrom.

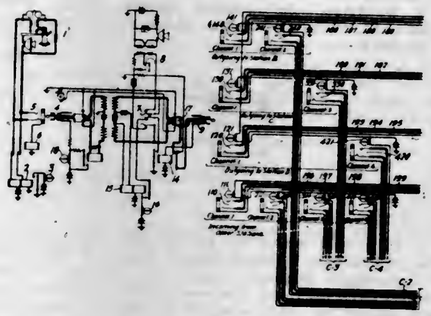
1,573,956. AIR-MOISTENING DEVICE. MICHAEL F. WEIDENBACH, Minneapolis, Minn., assignor to National Air Moistener Company, a Corporation of Minnesota. Filed Jan. 6, 1923. Serial No. 611,030. 2 Claims. (Cl. 237—78.)

1. An air moistening device comprising an evaporating pan having a transversely corrugated bottom and a removable perforated cover, and a water-heating pipe extended longitudinally within said pan, bent zigzag in a horizontal plane and resting on the crowns of the corrugations of said pan bottom.



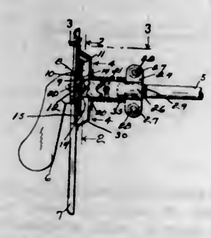
1,573,957. LADDER KIDDIE SLIDE. FRANKLIN G. WEST, Deerfield, Kans. Filed Sept. 27, 1924. Serial No. 740,301. 1 Claim. (Cl. 228—2.)

In a device of the character described, a step section, a connecting board, said step section and connecting board having bearing members, a slide section, strap irons carried by the slide section, said strap irons adapted to be positioned adjacent to the bearing members, pintles adapted to extend through the bearing members and strap irons to pivotally connect the step section and slide section, and connecting board, said pintles adapted to be moved towards each other to disconnect the step section and slide section, and means for restricting inward movement thereof.



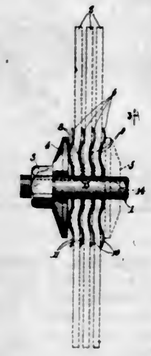
1,573,958. FOLDING BOAT. RICHARD A. WHALL, Athol, Mass. Filed Nov. 9, 1925. Serial No. 67,798. 10 Claims. (Cl. 9—2.)

1. A folding boat frame composed of separable sections, and including when erected, a flat sectional bottom portion, curved sectional side portions converging to the bow, a transverse stern portion interposed between the rear ends of the side portions, and contractible transverse tension members connecting the side portions, to



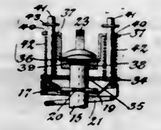
prevent lateral spreading of the frame and adapted to confine the rear ends of the side portions against the stern portion.

1,573,959. CARRIER-WAVE COMMUNICATING SYSTEM. SAMUEL B. WILLIAMS, Jr., Brooklyn, N. Y., assignor to Western Electric Company, Incorporated, New York, N. Y., a Corporation of New York. Filed June 20, 1922. Serial No. 569,584. 35 Claims. (Cl. 179—15.)



1. In a carrier wave system, three or more stations arranged to communicate with each other, and a plurality of frequency selective channels each having an incoming connection terminal at each station and an outgoing connection terminal at each station for each other station adapted to be reached over said frequency selective channel.

1,573,960. CONTROL-SHAFT MOUNTING. ROBERT K. WINNING, Wauwatosa, Wis., assignor to Clum Manufacturing Company, Milwaukee, Wis. Filed Dec. 5, 1925. Serial No. 73,464. 11 Claims. (Cl. 74—39.)

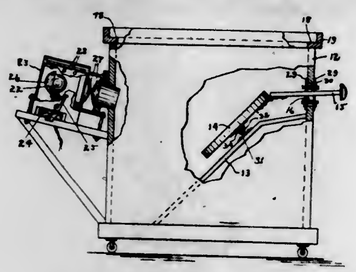


1. The combination with an actuating member, of a driven shaft fitting provided with a laterally disengageable connection with said member, and an axially yieldable annulus encircling a portion of said member and a portion of said fitting and adapted to secure said fitting and said member against disengagement.

1,573,961. BUFF WHEEL AND SPACING DEVICE THEREFOR. HENRY L. ZUCKER, Matawan, N. J., assignor to A. P. Munning & Co., New York, N. Y., a Corporation of New Jersey. Filed Sept. 26, 1921. Serial No. 503,465. 15 Claims. (Cl. 51—198.)

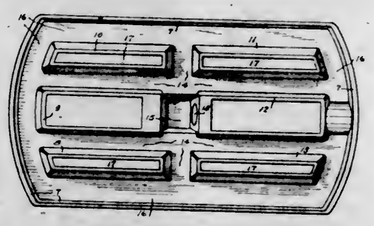
1. In combination a spindle, buff wheel sections carried thereby and a spacing device interposed between said sections, said spindle having a recess opening into the space between said sections to supply air thereto, and said spacing device having means permitting outward circulation of air between the sections from said recess.

1,573,962. SILENCER FOR GAS-ENGINE-VALVE MECHANISM. GEORGE H. CHARNOCK, Buffalo, N. Y. Filed Feb. 9, 1923. Serial No. 618,145. 8 Claims. (Cl. 123—90.)



4. A silencer for the valve operating mechanism of a gas engine having a valve stem provided with a collar, and a rocker arm at the end of said stem, comprising an inner cross piece adapted to rest on said collar, an outer cross piece arranged between said stem and said arm, and yielding means interposed between said cross pieces.

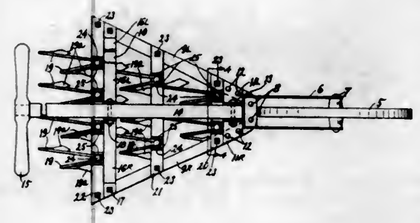
1,573,963. DUPLICATING ROLL OR SHEET AND PROCESS OF MAKING SAME. ALBERT ISAACS, New York, N. Y., assignor to The Beck Duplicator Company, a Corporation of New York. Filed May 5, 1923, Serial No. 636,970. Renewed Aug. 29, 1925. 6 Claims. (Cl. 41—38.6.)



1. A duplicating roll or sheet adapted for use upon duplicating machines or the like, comprising in combination a backing sheet, a layer of material thereon having a comparatively low melting point, and a layer of material on said first named layer having a comparatively high melting point.

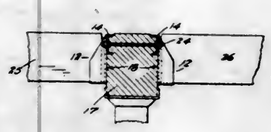
1,573,964. TESTING APPARATUS. JOHN A. JOHNSON, College Springs, Iowa. Filed Dec. 12, 1924. Serial No. 755,418. 6 Claims. (Cl. 99—6.)

6. In a testing apparatus, a casing having an apertured side wall and an opening in its top and provided with ledges at said opening, a screen removably disposed in said opening upon said ledges and having numerous concaved, apertured depressions for supporting objects to be tested, a reflector element having a universal joint mounted in the casing, a lamp for directing rays of light to the reflector element to be reflected to the apertures of said depressions, an operating-bar in the aperture of said side wall hingedly connected with said reflector element and adapted to be reciprocated longitudinally and to be moved transversely for adjusting the reflector element, and resilient means normally tending to control the movements of the operating-bar.



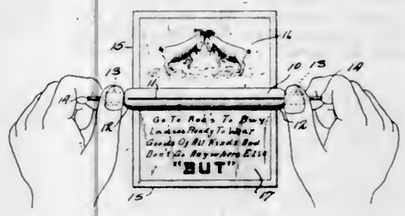
1,573,965. HYDROCARBON BURNER. PETER B. JOHNSON, Seattle, Wash. Filed Aug. 10, 1925. Serial No. 49,168. 2 Claims. (Cl. 158—116.)

2. In a burner of the class described, a burner body, means forming a fuel receiving well in the center of said burner body, a fuel inlet pipe connected with said well, a plurality of spaced integral subdividing elements extending upwardly from the bottom of said burner body and disposed lengthwise thereof, each of said subdividing elements being formed of spaced walls that leave draft openings therebetween, said subdividing elements forming a continuous marginal passageway around said burner body and forming longitudinal and transverse passageways that extend between said marginal passageway and said fuel receiving well, a cover plate having draft openings that register with the draft openings at each side of the center line of the burner, and perforated burner tips in said cover plate above said passageways.



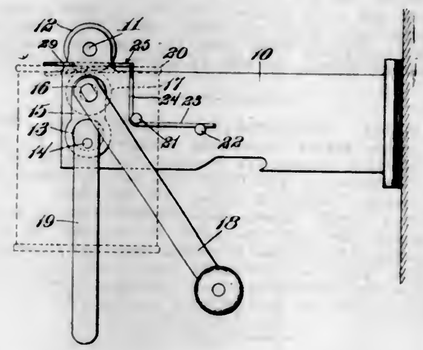
1,573,966. CULTIVATOR. JOHN G. JONES, Marine on St. Croix, Minn. Filed July 14, 1924. Serial No. 725,787. 1 Claim. (Cl. 97—198.)

In a cultivator, the combination with a frame adapted to be drawn over the ground and having transverse horizontal bars with pairs of integral ribs across their tops, of cultivator teeth formed in pairs, one tooth at each end of a metal bar, said bar having intermediate



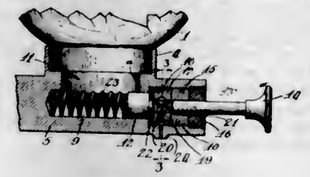
its ends an approximately U-shaped bend with a bolt through it and the frame bar to secure it thereto between a pair of the ribs.

1,573,967. JOIST-SUPPORTING STIRRUP. HENRY KAUFFMAN, deceased, late of Seattle, Wash., by Minette R. Kauffman, administratrix, Seattle, Wash. Filed Mar. 12, 1925. Serial No. 14,882. 4 Claims. (Cl. 20—92.)



1. In a joist supporting stirrup, the combination of two substantially U-shaped hangers formed of angle-bars, a horizontally disposed channel bar secured to said hangers to rigidly couple the same in side-by-side relations, said channel bar being arranged to have the flange elements thereof extend rearwardly of the hangers and adapted to seat within recesses provided within a supporting beam.

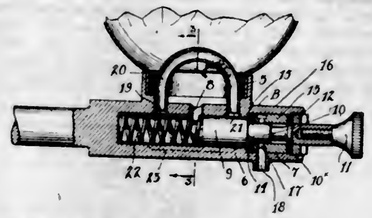
1,573,968. MOVING-PICTURE TOY. THOMAS A. KILLMAN, Nashville, Tenn., assignor of one-half to Thomas G. Watkins, Nashville, Tenn. Filed June 13, 1925. Serial No. 36,888. 4 Claims. (Cl. 88—16.)



2. A toy of the character described comprising a shaft carrying a plurality of radiating vanes, the vanes carrying upon their faces a series of consecutive pictures showing objects in motion, the shaft at its ends being formed to provide opposite spindles, each spindle being relatively narrow in one dimension to provide two opposed relatively wide flat faces and two opposed relatively narrow faces intermediate the wide flat faces and the spindles carrying gudgeons projecting beyond the spindles.

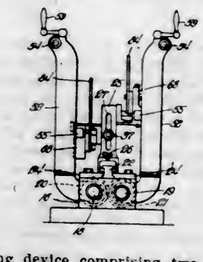
1,573,969. CAN OPENER. THOMAS A. KILLMAN, Nashville, Tenn. Filed July 2, 1925. Serial No. 41,116. 6 Claims. (Cl. 30—3.)

1. In combination with a can opener including feeding and cutting rollers and means for moving one of said rollers toward and away from the other of the rollers, a spring associated with the rollers and engaging a can disposed between the rollers to force the same into operative engagement with the feeding roller.



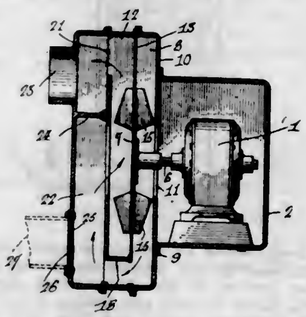
1,573,970. SOAP-DISPENSING APPARATUS. LOUIS KOOPERSTEIN, New York, N. Y., assignor to West Disinfecting Company, New York, N. Y., a Corporation of New York. Filed Apr. 3, 1925. Serial No. 20,344. 3 Claims. (Cl. 221—102.)

3. In soap dispensing apparatus, a valve casing provided with two longitudinal chambers, a piston normally disposed between the two chambers, a push-rod formed with a duct having an inlet and an outlet in said rod, the said rod being connected in the piston, a valve sleeve surrounding said rod and the duct, a nozzle in the valve body, and a communication between said nozzle and the valve sleeve duct.



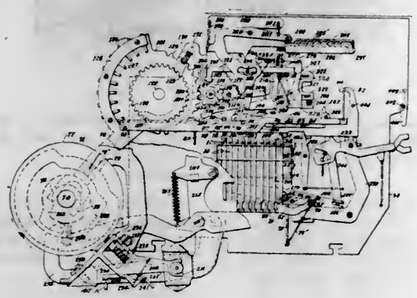
1,573,971. SOAP-DISPENSING APPARATUS. LOUIS KOOPERSTEIN, New York, N. Y., assignor to West Disinfecting Company, New York, N. Y., a Corporation of New York. Filed Apr. 3, 1925. Serial No. 20,345. 5 Claims. (Cl. 221—102.)

1. A soap dispenser having, in combination, a valve body provided with an inlet and an outlet, a piston, a duct extending from opposite sides of the inlet, the outlet, end of said duct being normally closed by the piston and means for imparting endwise movement to the piston whereby the inlet is closed and thereafter



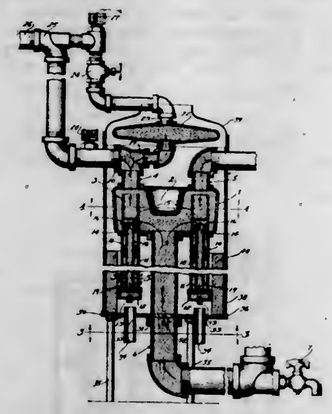
the outlet is opened, the continued movement of the piston forcing liquid through said duct and into the discharge outlet.

1,573,972. COIL-FORMING MACHINE. ALEXANDER H. KOPPRASCH, Chicago, Ill., assignor to Electric Service Supplies Co., Philadelphia, Pa., a Corporation of Pennsylvania. Filed May 6, 1924. Serial No. 711,405. 1 Claim. (Cl. 153—17.)



A coil holding device comprising two parallel levers; a frame to which said levers are pivoted intermediate their ends; a rotatable shaft supported by said frame between said levers; two cams secured to said shaft, one on each side of said pivotal point, having their operative surfaces in planes at right angles to each other, one cam operable to separate the levers when said shaft is rotated and the other cam operable to bring said levers toward each other upon subsequent rotation of said shaft.

1,573,973. TURBINE FOR ORGANS OR THE LIKE. ANTOINE LAMONTAGNE, Montreal, Quebec, Canada. Filed Sept. 12, 1925. Serial No. 55,970. 7 Claims. (Cl. 230—11.)

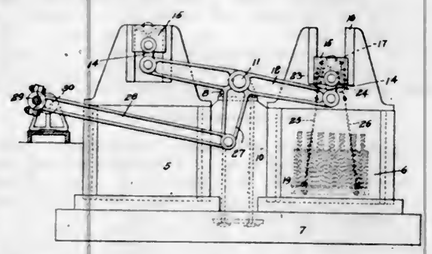


1. In combination with a rotor, a partition lying in a plane parallel to a diameter of the rotor and bisecting the rotor blades radially, and means of communication from one side of the partition to the other.

1,573,974. ACCUMULATOR RECIPROCATOR FOR TABULATING MACHINES. WILLIAM W. LASKER, Brooklyn, N. Y., assignor, by mesne assignments, to Powers Accounting Machine Corporation, New York, N. Y., a Corporation of Delaware. Original application filed Mar. 28, 1917, Serial No. 158,142. Divided and this application filed Apr. 3, 1918. Serial No. 226,498. 45 Claims. (Cl. 235—58.)

5. In an apparatus of the character described, the combination of a plurality of actuating members; an accumulator adapted to be moved into and out of operative relation with the members; an accumulating movable member and a total taking movable member pivotally adapted the one to the exclusion of the other to be operatively connected to said accumulator for moving cumulator adapted to be moved into and out of operacams adapted to reciprocate last named members respectively for accumulating or taking totals.

1,573,975. WATER HEATER. WILLIAM F. LAUTENSCHLAGER, Cincinnati, Ohio. Filed Apr. 22, 1922. Serial No. 556,095. 5 Claims. (Cl. 122—319.)

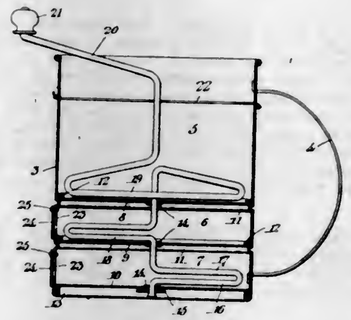


1. A drum, having an inwardly directed centrally disposed hollow projection defining an annular pocket at the upper portion of said drum, outlet pipes leading from said pocket, an inlet pipe leading to the bottom of said drum centrally thereof and below said projection, a plurality of circulation units detachably secured to and in communication with the interior of said drum and surrounding said intake pipe, each unit providing concentric down and up-passages communicating respectively with the lower, and pocketed portions of said drum, a hollow baffle element disposed above said drum, said baffle having an intake and an outlet pipe connected with an outlet pipe of said drum, respectively at points adjacent and a substantial distance therefrom, said baffle and drum relatively disposed to form a space therebetween, means for heating said units, and means surrounding said units, drum and baffle, for confining heat and directing the same against the surfaces thereof.

1,573,976. TRANSFER-INK COMPOSITION. WINTHROP STANLEY LAWRENCE, Brooklyn, N. Y., assignor to Kaumagraph Company, New York, N. Y., a Corporation of New York. Filed Sept. 29, 1924. Serial No. 740,520. 6 Claims. (Cl. 134—36.)

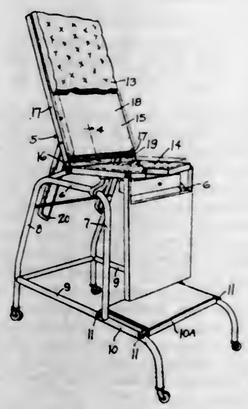
1. A fusible transfer ink releasable from a paper transfer base under the action of heat, said ink embodying a fusible base, a coloring agent, and an emulsifying agent, said emulsifying agent being adapted to cause the emulsification of said coloring agent when said ink is acted upon by an alkaline washing fluid.

1,573,977. PICKLING MACHINE. LEIF LEE, Youngstown, Ohio. Filed Sept. 9, 1924. Serial No. 736,717. 8 Claims. (Cl. 266—7.)



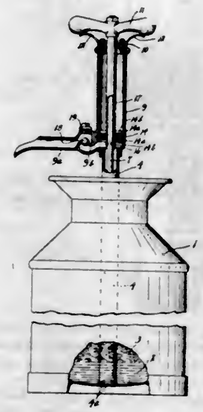
8. The combination with two pickling baths of an oscillatory shaft positioned between said baths, a slide-head positioned above the end of each of said baths, parallel walking beams secured one at each end of said shaft for reciprocating said slide-heads, a pocket formed in the top of each slide-head, a rod adapted to extend longitudinally above each bath and to rest in the pockets of the associated slide-heads and means for resiliently supporting a container from each of said rods for immersion in the associated bath.

1,573,978. ELECTRIC INSULATING TAPE. IRVING W. LEVINE, Westmount, Quebec, Canada. Filed Aug. 30, 1924. Serial No. 735,199. 4 Claims. (Cl. 154—43.)



3. An insulating tape comprising a foundation strip fabric, said fabric being waterproof, one side of said strip being coated first with a layer having air curing properties, and then with a second layer having non-air curing properties, the other side of the strip being provided with a face coat having high dielectric resistance and greater air-curing properties than the first named layer.

1,573,979. SIFTER. CAROLYN M. LIGHT, Los Angeles, Calif., and LOUISA ARCHER, Rochester, N. Y. Filed Dec. 3, 1923. Serial No. 678,156. 2 Claims. (Cl. 209—358.)

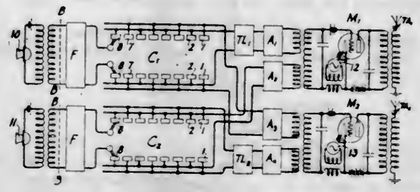


1. In a sifter, a barrel, a plurality of screens arranged in spaced parallel relation in said barrel and each having a central opening, a shaft rotatably supported in said openings, the said shaft being bent upon itself above each screen to provide a pair of spaced upper and lower arms extending radially of the screens, the upper arm of each pair being disposed a substantial distance below the screen above the same to break up particles of material forced through said screen and to aerate said material, and the lower arms lying close to their respective screens to form sweeps therefor to force material through said screens.

1,573,980. PHYSICIAN'S EXAMINING TABLE. JOHN M. LIPTAY, New York, N. Y. Filed Jan. 29, 1925. Serial No. 5,425. 1 Claim. (Cl. 45—50.)

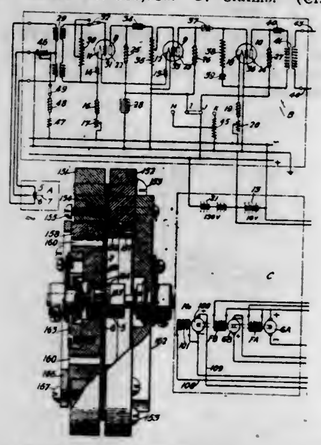
A physician's table comprising a seat, a back hinged thereto, leg members associated with said seat, a lower ground engaging frame, one end of which extends beyond the leg members to increase the base area of the table, a step removably disposed on said lower frame, a cushion associated with the seat and the back, and a rod passing through said back and through said cushion to hold the latter in place on said table.

1,573,981. DEVICE FOR REMOVING WATER FROM CREAM. DEDRICK A. MAANUM, Minneapolis, Minn. Filed July 3, 1924. Serial No. 724,047. 5 Claims. (Cl. 103—153.)



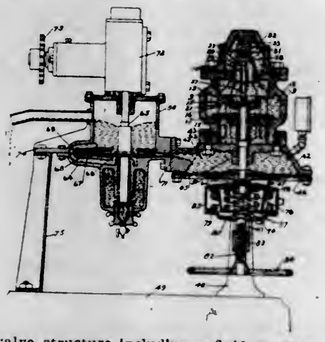
1. A device for removing water from the bottom of a cream can, comprising hollow means adapted to be projected through said cream to the bottom of the can, means adjacent the lower end of said hollow means for closing the same during said projection and means above said hollow means for raising and discharging the water through said means at a point above the can.

1,573,982. TEXTILE BELT. JOHN MACADAM and WILLIAM BERRY, Wilmington, Del. Filed Aug. 11, 1922. Serial No. 581,240. 2 Claims. (Cl. 91—68.)



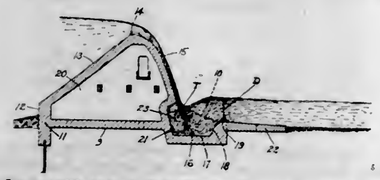
2. A transmission clutch lining having the characteristic structural qualities of cotton belting and having its friction surface impregnated with cellulose.

1,573,983. SECRET SIGNALING. ROBERT C. MATHES, New York, N. Y., assignor to Western Electric Company, Incorporated, New York, N. Y., a Corporation of New York. Filed Aug. 8, 1923. Serial No. 656,343. 15 Claims. (Cl. 250—9.)



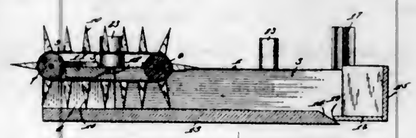
1. The method of wave transmission comprising separating the waves into successive portions and simultaneously transmitting the successive portions over different respective transmission paths.

1,573,984. RADIO BROADCASTING EQUIPMENT. JOSEPH P. MAXFIELD, Maplewood, N. J., assignor to Western Electric Company, Incorporated, New York, N. Y., a Corporation of New York. Filed June 9, 1922. Serial No. 566,981. 17 Claims. (Cl. 250—6.)



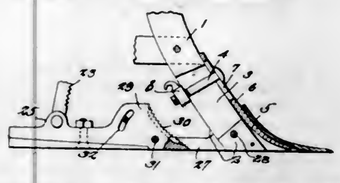
3. A radio broadcasting equipment comprising in combination a distortionless, air-damped transmitter, a multistage audio-frequency amplifier, and a radio transmitter.

1,573,985. VALVE STRUCTURE. ADOLPH F. MEYER, St. Paul, Minn. Filed June 20, 1921. Serial No. 479,080. 8 Claims. (Cl. 137—139.)



1. A valve structure including a fluid passage, a main valve adapted to close the passage, a by-pass around said main valve, a second valve to close the by-pass, and controlling means to move the main valve to open and close position and adapted, upon further movement after closure of the main valve, to open the by-pass valve.

1,573,986. SPILLWAY. ADOLPH F. MEYER, St. Paul, Minn. Filed Jan. 5, 1925. Serial No. 615. 12 Claims. (Cl. 61—18.)

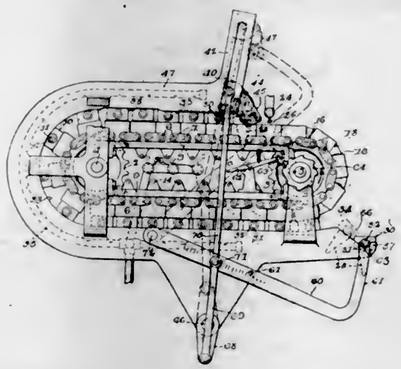


1. In a spillway of the adherent nappe type, a hollow bucket having a portion extending upstream underneath the downstream face of the spillway.

1,573,987. WAVE MOTOR. ISAAC MILES, Bonesteel, S. Dak. Filed July 17, 1922. Serial No. 575,505. 1 Claim. (Cl. 253—13.)

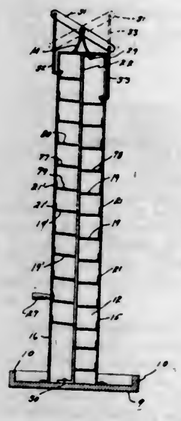
A wave motor including a float, said float including converging walls defining a sluice, a horizontal board connecting the site walls of the sluice and arranged in vertical spaced relation with the bottom of the float, the forward edge of the board being beveled to direct water downwardly, drums operating at the ends of the sluice, an endless belt operating under the drums, buckets carried by the endless belt, said bockets being of lengths to engage the bottom of the sluice, and means for admitting water to the sluice.

1,573,988. PLOW. JAMES W. MONTGOMERY, Thomasville, Ga., assignor to W. J. Burnett, Thomasville, Ga. Filed May 29, 1922. Serial No. 564,391. 1 Claim. (Cl. 97—133.)



In a plow the combination with a stock, of an angularly adjustable runner having a forked end straddling and pivotally connected to the stock, an upwardly projecting portion on the runner between the ends thereof, there being a series of transverse teeth upon the front face of the upwardly projecting portion, said series extending downwardly into the forked portion of the runner, a toothed member adjustably mounted on the toothed face of said upwardly projected portion, and a sweep secured to and extending across the front of the toothed member and back of the stock.

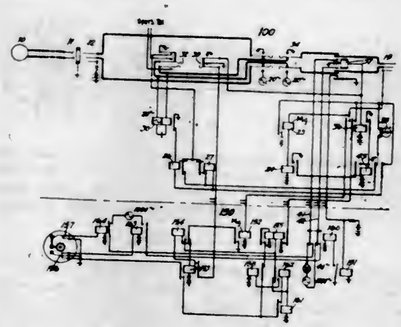
1,573,989. MACHINE FOR MAKING ICE-CREAM CONES. JOHN MUCK, Milwaukee, Wis. Filed Sept. 30, 1920. Serial No. 413,772. 19 Claims. (Cl. 107—58.)



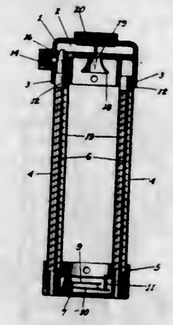
1. The combination with a matrix carrier including a set of matrices provided with pastry receiving cavities, of means for delivering pastry to the matrices successively, sliding means adapted to carry a plunger and operable to deliver said plunger into each matrix following the delivery of a quantity of batter thereto, means for heating the matrices and plungers, and means for inverting the matrices and allowing the plungers to drop therefrom by gravity after a predetermined heating period.

5. The combination of a matrix carrier adapted to convey pastry containing matrices, a set of plunger dies cooperative with the matrices, trackways for supporting the matrices and holding the plungers therein, an associated heater, means for delivering material into the matrices successively as they approach the heater, and means for subsequently delivering plungers into the matrices to shape the material into the desired contour, said carrier being adapted to invert the matrices while the plungers are held in position therein, whereby they are permitted to drop by gravity from the matrices upon leaving the trackways, each plunger having a head piece provided with doweling devices adapted to engage the matrix walls to position the plunger within the matrix during the heating period.

10. The combination with a set of horizontal shafts provided with sprockets wheels, of an endless chain mounted upon said sprocket wheels, and including a series of juxtaposed matrices, trackways for holding the matrices in horizontal planes between the front and rear sprockets wheels, means for delivering material to the matrices as they pass rearwardly from the forward sprocket wheel on the upper side, means for delivering plungers to the matrices after they receive such material, means for holding the plungers in the matrices until they return to the vicinity of the forward sprocket wheel on the under side, and means for heating the matrices and plungers while in the vicinity of the rear sprocket wheel, each matrix having one movable wall adapted to separate from the remainder of the matrix while the latter is traveling about a sprocket wheel to allow the plunger to drop from the matrix when the latter is inverted.

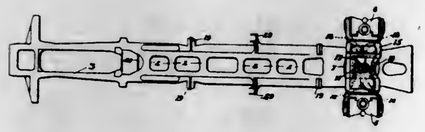


1,573,990. TOY. LEONARD J. MUELLER, Detroit, Mich. Filed Oct. 27, 1922. Serial No. 597,239. 4 Claims. (Cl. 46—37.)



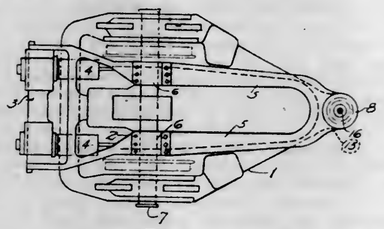
1. A toy of the class described comprising a frame; a spacing element mounted in said frame; a set of runways slidably mounted in said frame on opposite sides of said element; and means for changing the relative position of said sets.

1,573,991. SIGNALING SYSTEM. PAUL B. MURPHY, Nyack, N. Y., assignor to Western Electric Company, Incorporated, New York, N. Y., a Corporation of New York. Filed Dec. 17, 1924. Serial No. 756,396. 10 Claims. (Cl. 179—27.)



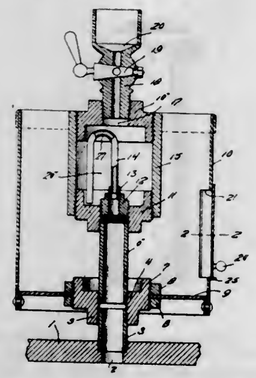
1. In a telephone system, the combination of subscribers' station with a toll line terminating in means for extending the line automatically to a subscriber's station, means at the terminating end of said line for transmitting back over the line high frequency alternating currents periodically at a certain rate actuated when an automatic connection has been extended to a subscriber's station, signaling means at the originating end of the line repsonsive to said alternating currents to indicate that the subscriber's station has been reached, means at the originating end for transmitting over said line a call signal, signaling means at the terminating end for calling the connected subscriber's station, means at the terminating end responsive to said call signal for discontinuing the transmission of alternating currents to the originating end and then actuating the signaling means at this end of the line, and means for continuing the transmission of alternating currents to the originating end when the call signal ceases.

1,573,992. CIGAR LIGHTER. LEWIS PENGILLY, Stockton, Calif. Filed Mar. 6, 1923. Serial No. 623,212. 7 Claims. (Cl. 219—32.)



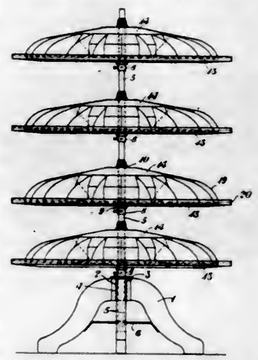
1. A cigar lighter comprising a cup connected to a suction means and adapted to receive one end of a cigar therein, an electric heating element in alinement with the cup and with which the other end of the cigar is adapted to engage, said element and cup being relatively movable to and from each other whereby cigars of different lengths may be accommodated therebetween and means whereby the element will be heated and the suction means enabled to communicate with the cup only when the element is moved away from the cup.

1,573,993. LOCOMOTIVE BED. HARRY M. PFLAGER, St. Louis, Mo., assignor to Commonwealth Steel Company, St. Louis, Mo., a Corporation of New Jersey. Filed Apr. 13, 1925. Serial No. 22,818. 27 Claims. (Cl. 105—172.)



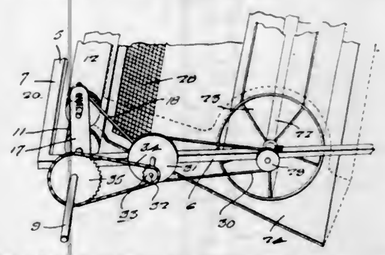
24. A locomotive bed comprising side frames and a plurality of steam cylinders formed integrally with said side frames and located between them, and steam supply chambers for said cylinders formed integrally therewith.

1,573,994. BOOSTER-MOTOR SUPPORT. HARRY M. PFLAGER, St. Louis, Mo., assignor to Commonwealth Steel Company, St. Louis, Mo., a Corporation of New Jersey. Filed Jan. 22, 1924. Serial No. 687,843. 16 Claims. (Cl. 105—133.)



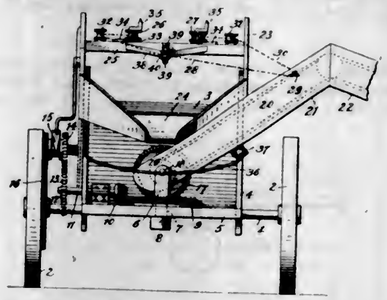
1. In a locomotive, a main frame, a trailer axle having pivotal movement relative to said frame, a horizontal member secured near one end to said frame, supported intermediate its ends on said axle and pivoting therewith, and a booster motor carried by said member near its opposite end.

1,573,995. GASOLINE-ENGINE-STARTING DEVICE. WILLIAM O. PIGORS, Ferney, S. Dak. Filed Feb. 25, 1924. Serial No. 695,009. 2 Claims. (Cl. 123—180.)



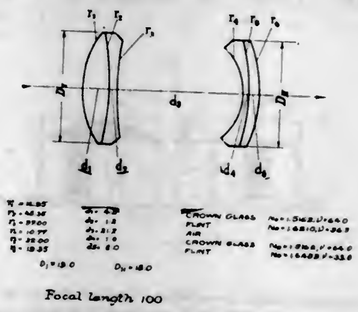
2. A priming device for internal combustion engines comprising a member mounted on the cylinder of said engine having a chamber communicating with the combustion chamber of said engine, means for restricting the passage between the chamber of said member and the combustion chamber of said internal combustion engine, a valve controlled inlet to said chamber to permit the filling thereof with priming fluid, and a jacket member surrounding said first mentioned member and carried thereby for receiving a supply of heating fluid ignitible for heating said member to vaporize the priming fluid therein for supply to the combustion chamber of said engine.

1,573,996. ROTARY FILING DEVICE. GEORGE H. PREDDEY, San Francisco, Calif. Filed June 23, 1922. Serial No. 570,452. 2 Claims. (Cl. 45—3.)



1. A device for filing cards comprising a supporting shaft, a series of substantially circular shelves mounted thereon in vertical spaced relation, means whereby said shelves may be rotated on said shaft independently of each other, an outer flange on each shelf for retaining filing cards, an inner circular wall on each shelf against which the edges of the card may abut, said wall having a diameter approximately half that of the shelf, and a series of partitions of approximately uniform thickness extending radially between said inner wall and outer flange, said partitions being spaced at their inner ends a substantial distance apart and being spaced farther apart at their outer ends to form compartments in which groups of cards may be filed in a vertical position radially of said shelf.

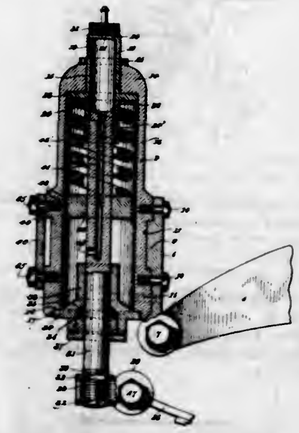
1,573,997. INSECT-DESTROYING MACHINE. FRANK E. REED, Glenwood, Minn. Filed May 5, 1925. Serial No. 28,131. 1 Claim. (Cl. 43—140.)



In a machine of the class described, a wheeled frame, a shaft for the wheels of the frame extending transversely from the frame, a roller on said shaft to be rotated therewith, a pair of standards having openings at their lower ends for receiving the shaft, brace rods connected to the upper ends of the standards and to the frame, a second shaft journaled in the standards, means urging the second shaft toward the first shaft, a roller on the second shaft normally engaged with the first roller, gearing between the two shafts, and suction means associated with the rollers for leading insects thereto, so that they may be crushed therebetween.

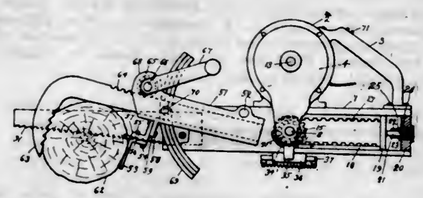
1,573,998. STONE GATHERER. EDGAR S. RIBBANS, Hampton, N. J. Original application filed Dec. 23, 1921, Serial No. 524,486. Divided and this application filed Sept. 10, 1924. Serial No. 736,989. 4 Claims. (Cl. 198—100.)

1. A stone gatherer including a supporting frame, a conveyor connected to the frame for horizontal swinging movement, and a track secured to the frame and adapted to support the conveyor, the ends of the track secured to the frame being on a higher plane than the intermediate portion thereof thereby normally tending to direct the conveyor towards the center of the track.



1,573,999. TELEOBJECTIVE. ROBERT RICHTER, Berlin-Friedenau, Germany, assignor to Optische Anstalt C. P. Goerz Aktiengesellschaft, Berlin-Friedenau, Germany. Filed June 6, 1925. Serial No. 35,339. 1 Claim. (Cl. 88—57.)

A tele-objective constituted by a converging front member and a diverging rear member at a fixed distance from the front member each of both members made of two lenses cemented together, the rear member having the shape of a meniscus with its concave surface facing the front member its cement surface being of diverging quality and curved in the same direction as the outer surfaces having however a radius of curvature which is greater than the outer convex surface but not larger than five times the radius of curvature of the concave face of the rear member.

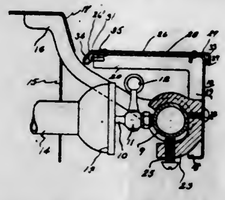


1,574,000. SHOCK ABSORBER. CHARLES R. ROBERTS, Ashland, Oreg. Filed July 16, 1925. Serial No. 43,976. 6 Claims. (Cl. 267—65.)

1. In a shock absorber of the type described, a closed cylinder, a piston head in said cylinder, means connected to said head and projecting out of the cylinder by means of which the head may be reciprocated, a compressible substance in the cylinder on both sides of the head, a by-pass around said head for permitting the substance to escape from one side to the other of said head when the latter is reciprocated, means independent of said head for closing the by-pass after the head has reciprocated a predetermined distance in either direction from its normal position, a compression spring on one

side of the piston head for determining the said normal position of the latter, and means for simultaneously changing the location of said normal position and changing said predetermined distance the head may move before the by-pass is closed.

1,574,001. SAWING MACHINE. JOSEPH J. ROGACH, Brooklyn, N. Y. Filed Nov. 25, 1924. Serial No. 752,137. 2 Claims. (Cl. 143—68.)



2. In a sawing machine, the combination with a housing, a sliding member in said housing, a saw blade attached to said sliding member, an electric motor on said housing, a shaft passing transversely through said housing, an operative connection between said shaft and said motor, pinions on said shaft, racks on the upper and on the lower sides of said sliding member adapted to be engaged by said pinions, clutches on said shaft adapted to alternately engage said pinions, a shifting member for said clutches, means to operate said shifting member from said sliding member, and means to accelerate the movement of said shifting member for the extreme positions of said sliding member.

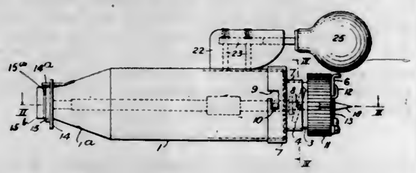
1,574,002. GAS-COCK SHIELD. SAMUEL ROLLAND, Flint, Mich. Filed May 2, 1925. Serial No. 27,496. 5 Claims. (Cl. 126—42.)

1. A gas cock shield of the class described, comprising a vertically extending supporting plate having a vertically extending and a horizontally projecting flange at opposite ends; a supporting member for mounting said plate on the feed pipe of a gas stove; and a cover plate, adapted, when in inoperative position, to extend parallel to and in

close relation with said supporting plate and when in operative position, for extending horizontally in close engagement with said horizontally projecting flanges; and

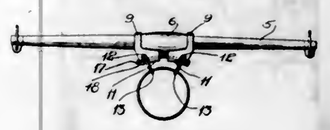
means for mounting said cover plate on said flanges for permitting the swinging of said cover plate into operative or inoperative position.

1,574,003. SPINNING MACHINE. HENRY RYDER, New York, N. Y., assignor to Wire Fibrous Products Company, New York, N. Y., a Corporation of New Jersey. Filed Nov. 29, 1922. Serial No. 603,992. 6 Claims. (Cl. 117—34.)



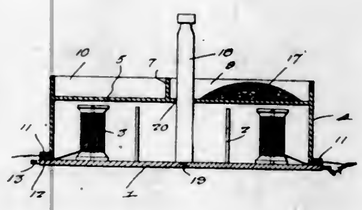
1. In a machine of the type described, means for feeding straight fibres, a spool-holder adapted to hold a plurality of spools for feeding yarns, means for rotating said spool-holder, means cooperating with said spool-holder to form a core of parallel yarns, means for preventing the yarns from turning about their respective axes when the spool-holder revolves, and means for spinning said fibres parallel to each other spirally around said yarns.

1,574,004. MULTIPLE-WIRE FIBROUS YARN. HENRY RYDER, New York, N. Y., assignor to Wire Fibrous Products Company, New York, N. Y., a Corporation of New Jersey. Filed Nov. 29, 1922. Serial No. 603,993. 4 Claims. (Cl. 117—52.)



1. A rope structure, comprising a core of yarns in parallel relation, and a covering of fibres spun above said core.

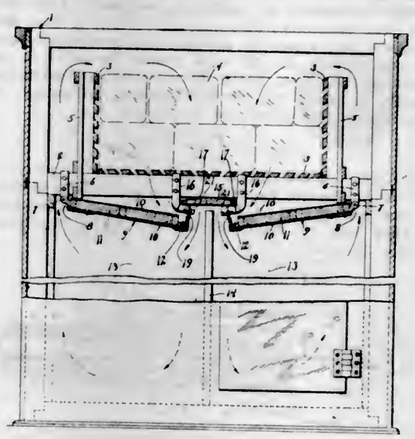
1,574,005. STEAMING TUBE. PETER SARTORY, Bayswater, London, England. Filed June 15, 1925. Serial No. 37,357. 10 Claims. (Cl. 132—33.)



1. In combination, a steaming tube, a closure for the root end of the tube an axial member connected to said closure and extending through said tube beyond the tip end thereof, a shoulder on the axial member at the tip end thereof, a closure for the tip end adapted to be pushed on to the tube and including an independently rotatable crown, the crown having a central aperture to pass over said shoulder on the axial member and means causing engagement of said crown and axial member when the aperture is behind said shoulder, so that on rotation of the crown the latter moves axially, pushing with it said axial member to force the closure thereon steam tight on the root end of the steaming tube.

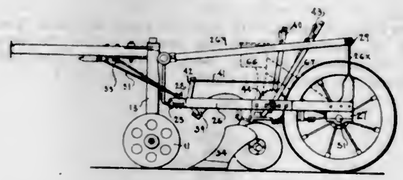
1,574,006. NECK YOKE. ALBERT E. SCHRUTH, EDWARD SCHRUTH, and JOHN SCHRUTH, Pepin, Wis. Filed Feb. 2, 1925. Serial No. 6,359. 3 Claims. (Cl. 278—121.)

1. A neck-yoke having an enlarged portion at its center with shoulders at the ends of said enlarged portion, members having rings applied to said neck-yoke, the said members and rings being shaped to the configuration of the shoulders and the surface of the said enlarged portion, means for drawing the members toward each other with the rings in engagement with the shoulders, and a pole ring connected to said members.



1,574,007. SEWING CABINET. CLYDE M. SCHWANTES, Winfield, Kans. Filed Oct. 21, 1924. Serial No. 744,927. 1 Claim. (Cl. 223—53.)

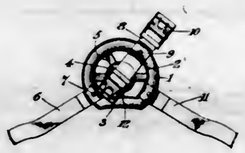
A sewing cabinet comprising a base provided on its top and adjacent one edge with an apertured strip, a hollow casing removably supported on the base and bearing against said strip, a spool holder carried by the base and located in the casing, the thread carrying spool being adapted to be placed rotatably upon said holder and the free ends of the threads to be passed through the aperture in said strip and beneath the bottom of the adjacent wall of said casing to permit said wall to be pressed against the thread for placing tension thereon, and a handle secured to the base and extending upwardly therefrom through an opening in the top of said casing.



1,574,008. ICE CHEST. FRANK W. SCHWIND, Los Angeles, Calif., assignor to Weber Showcase & Fixture Company, Los Angeles, Calif., a Corporation of Delaware. Filed Mar. 25, 1925. Serial No. 18,165. 1 Claim. (Cl. 62—47.)

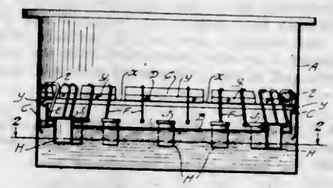
A storage chest comprising an ice receiving chamber having slotted sides and a slotted bottom, a plurality of normally inclined insulated air circulating plates hingedly supported at their outer edges and means at their inner adjacent edges for adjusting the inclination of the said plates, said means including a plurality of arms, a plurality of perforations formed in the said arms, a plurality of curved supporting arms having slots formed therein through which the first said arms are adapted to fit, and

means adapted to be simultaneously positioned in the said perforations for securing the first of said arms to the said supporting arms in predetermined and adjusted positions.



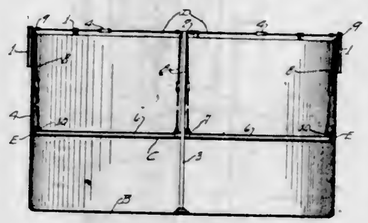
1,574,009. COMBINATION LISTER, CULTIVATOR, AND RIDGE WORKER. ORVEN A. SCOGIN, Wichita, Kans. Filed Mar. 22, 1923. Serial No. 626,850. 1 Claim. (Cl. 97—23.)

In an agricultural implement, a frame structure including a plurality of frame elements; a transverse shaft forward of said frame elements; rear wheel elements supporting said frame structure; vertical bearings, each having a web-like element adjustably supported on the transverse shaft, forward wheel elements and shafts therefor, each shaft housed in one of said vertical bearings; a tie bar connecting between an upper portion of a web-like element and a rear portion of a frame element; and a hook element projecting from the base of a web-like element in engagement with a forward clamping device of an adjacent frame element, the rear ends of the frame elements being adjustable toward and from each other; and soil treating tools adjustably carried by each frame element.



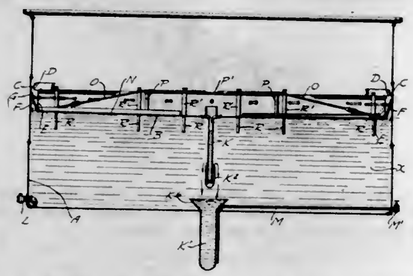
1,574,010. SUPPORT. JAMES WEST, Balston Spa, N. Y. Filed Feb. 9, 1923. Serial No. 617,950. 2 Claims. (Cl. 128—100.)

2. A device of the character described including in combination, a support formed in one piece of yielding material such as rubber and comprising an annular member, a holding member in the form of a button less in diameter than the annular member centrally located therein, and a plurality of yielding members connecting said annular member and said holding member, said yielding members being spaced apart substantial distances and being less



in thickness than the other parts of said support and suspension means connected to said annular member in the spaces between said yielding members.

1,574,011. FLOATING DECK FOR LIQUID-STORAGE TANKS. JOHN H. WIGGINS, Bartlesville, Okla. Filed Dec. 14, 1923. Serial No. 680,773. 3 Claims. (Cl. 220—26.)

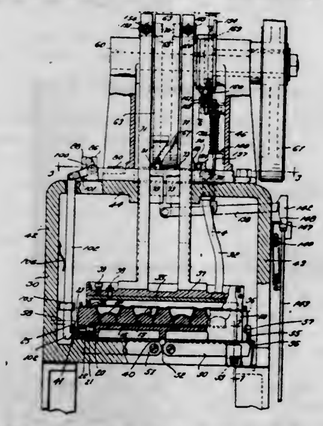


1. A floating deck for liquid storage tanks, comprising a portion that floats upon the liquid in the tank and covers the major part of the surface of the liquid, pontoons or buoyant devices removably mounted in openings in said portion arranged adjacent the outer edge of same, and means for preventing the liquid in the tank from escaping upwardly through one of said openings when the pontoon that co-operates with said opening is removed.

1,574,012. LIQUID-STORAGE TANK. JOHN H. WIGGINS, Bartlesville, Okla. Original application filed May 19, 1922, Serial No. 562,107. Divided and this application filed Feb. 16, 1924. Serial No. 693,397. 2 Claims. (Cl. 220—26.)

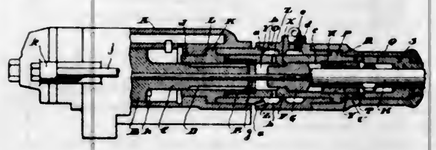
1. A liquid storage tank provided with a side wall formed by a vertically-disposed, cylindrical member open at its upper end, a vertically-disposed mast or upright at the center of the tank, devices projecting upwardly above the top edge of said side wall, radially-disposed tension member connected at their inner ends to said mast and at their outer ends to said devices, and a floating deck supported by the liquid in the tank and provided with a shoe whose upper edge portion slides upon said upwardly-projecting devices under certain conditions.

1,574,013. FLOATING DECK FOR LIQUID-STORAGE TANKS. JOHN H. WIGGINS, Bartlesville, Okla. Filed Apr. 30, 1924. Serial No. 710,097. 12 Claims. (Cl. 220—26.)



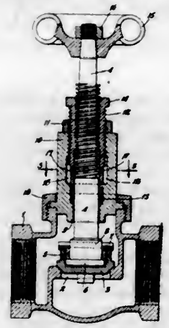
1. A floating deck for liquid storage tanks, comprising a central body portion that normally floats upon the liquid in the tank, shoe members arranged in sliding engagement with the side wall of the tank with their lower edge portions submerged in the liquid in the tank, and a supporting means for said shoe members carried by the central body portion of the deck and so constructed and arranged that gravity tends to hold said shoe members in parallel relationship with the side wall of the tank and in snug engagement with said side wall.

1,574,014. ANTISKID CHAIN. JOSEPH G. ALLMON, Melrose, Mass. Filed Nov. 4, 1924. Serial No. 747,823. 5 Claims. (Cl. 152—14.)



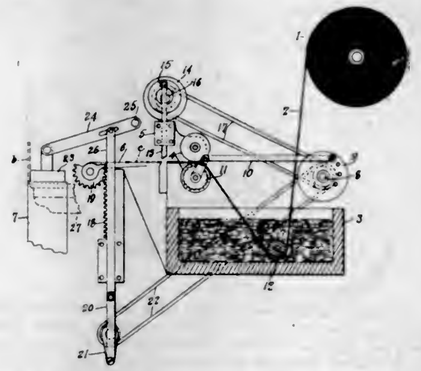
1. In an anti-skid chain having a pair of side chains formed of interconnected links, and a plurality of interconnecting link cross chains laterally directed anti-skid barbs carried by the side links of said cross chains, substantially as described.

1,574,015. APPARATUS FOR FORMING HOLLOW ARTICLES OF PLASTIC MATERIAL. ALBERT H. BATES, Cleveland Heights, Ohio, assignor to Paramount Rubber Consolidated, Incorporated, Little Falls, N. J., a Corporation of Delaware. Filed Aug. 20, 1923. Serial No. 658,271. 22 Claims. (Cl. 18—19.)



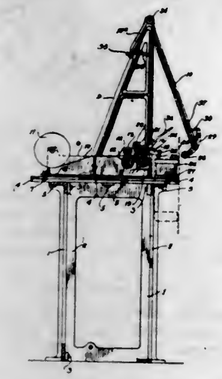
22. The combination of a cavitary mold, a chamber having a closed top and open bottom of such dimensions relative to the mold that it may coact with the mold face outside of the cavity, said mold having a vent from the cavity and having an openable and closable valve for controlling said vent, a conduit leading to said chamber, and an openable and closable draining valve in said conduit, mechanism for moving the chamber to coact with the mold, mechanism then acting to hold it in that position, and mechanism for automatically opening the valve in said conduit and for then closing the valve in the mold vent and then closing the valve in the conduit and thereby releasing the internal pressure, all during the time the holding mechanism is acting.

1,574,016. ROCK-DRILL FRONT END. LEWIS C. BAYLES, Easton, Pa., assignor to Ingersoll-Rand Company, Jersey City, N. J., a Corporation of New Jersey. Filed Mar. 12, 1925. Serial No. 14,950. 2 Claims. (Cl. 121—32.)



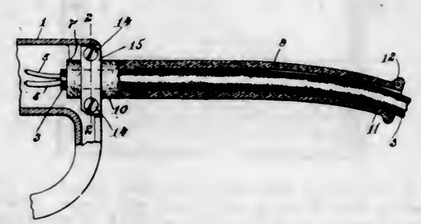
1. In a rock drill, the combination of a cylinder and piston, of a front cylinder washer having a flange bearing against a shoulder in the cylinder, a front cylinder extension extending within the cylinder against the flange of the cylinder washer, a chuck within the cylinder extension having an external flange adapted to bear against the extension, a front head having a shoulder bearing against the said external flange for holding the chuck in position, and a loose chuck jaw within the forward end of the front head and clutched to the chuck.

1,574,017. VALVE. DANIEL S. BEATTIE, New York, N. Y., assignor to Nathan Manufacturing Company, a Corporation of New York. Filed May 15, 1924. Serial No. 713,410. 7 Claims. (Cl. 251—50.)



5. In a valve assembly, an interiorly threaded gland; an exteriorly threaded spindle movable therein; a packing chamber between the threaded portions of gland and spindle and the valve chamber, the packing wherein is compressed against the spindle by the gland alone; and atmospheric communicating means located between the threaded portion of the gland and the packing, and communicating with the space between the gland and spindle.

1,574,018. MEANS AND METHOD FOR MAKING ADHESIVE JOINTS AND THE LIKE. SAMUEL BERGSTEIN, Middletown, Ohio, assignor to The Interstate Folding Box Company, Middletown, Ohio. Filed July 11, 1924. Serial No. 725,401. 15 Claims. (Cl. 93—41.)

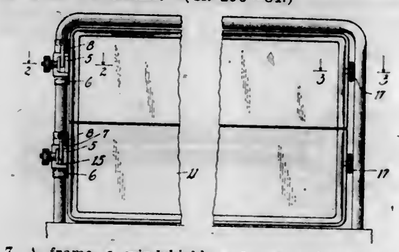


1. The herein described method of forming adhesive joints, consisting in passing a web of material through an adhesive substance, as liquid glue, whereby said material will become glue-coated, in severing the web into measured lengths and causing the severed portions to be positioned in relation to parts of an article adapted to coact one with another and with said glue-coated portion to form an adhesive joint, in folding said parts one relative to another, and in applying pressure to the folded portions to effect said joint.

1,574,019. PAPER-BOX-MAKING MACHINE. SAMUEL BERGSTEIN, Middletown, Ohio, assignor to The Interstate Folding Box Company, Middletown, Ohio. Filed Jan. 23, 1925. Serial No. 4,200. 8 Claims. (Cl. 93—41.)

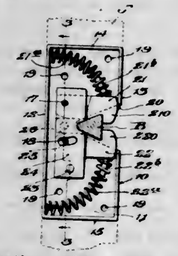
1. The herein described method of making paper boxes consisting in positioning a box to effect foldings of portions thereof, in folding certain of said portions, in supporting a supply of adhesive tape coated on both sides, in drawing the tape forward, in moistening and severing the same into measured lengths, and disposing the severed portions over the folded portions of the box, and in folding other portions of the box over the adhesive to effect a joint.

1,574,020. ELECTRIC-CORD PROTECTOR. SAMUEL DUNCAN BLACK and ALONZO GALLOWAY DECKER, Baltimore County, Md., assignors to The Black & Decker Manufacturing Company, Towson, Md., a Corporation of Maryland. Filed May 19, 1922. Serial No. 640,034. 1 Claim. (Cl. 173—322.)



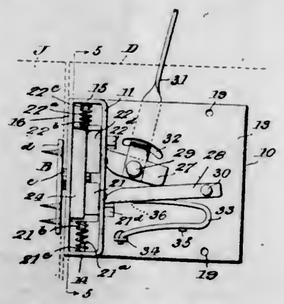
The combination with a conducting cord and a portable electric tool to which the conductor is connected, of a cord protector consisting of an elongated tube of flexible material enclosing and fitting loosely about the cord, permitting the cord to slide freely in the tube, the tube having a gradual taper, the thickness of the walls of the tube increasing toward the tool, the larger end of the tapered protector being inserted in the tool casing which has an opening to receive the same, and clamping means for rigidly securing the large end of the protector tube in the tool casing, so that it forms a substantially rigid extension of the tool casing gradually increasing in flexibility to the free end portion, which is relatively thin and reinforced to prevent tearing, the increased flexibility at the end permitting the protector at this point to conform to the direction of the cord, the protector presenting a graduated resistance to lateral stresses, causing the portion of the cord within the tube to assume a smooth curved line continuous with the direction of the remainder of the cord.

1,574,021. PERCOLATOR. LAWRENCE BONELL, Chicago, Ill. Filed Nov. 1, 1924. Serial No. 747,150. 7 Claims. (Cl. 53—3.)



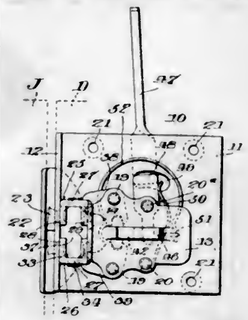
1. A device of the class described comprising a casing to be inserted in and enclosed by a container, a reticulated metallic member mounted across an open end of said casing, a cloth strainer mounted outward of said member, and a perforated cover mounted over said member and strainer, said member and cover forming reinforcing means for said strainer, and said member and strainer and cover being readily removable and separable in order to be cleaned.

1,574,022. WINDSHIELD. EDWARD R. BUCHANAN, Pittsburgh, Pa. Filed Aug. 23, 1922. Serial No. 583,741. 8 Claims. (Cl. 296—84.)



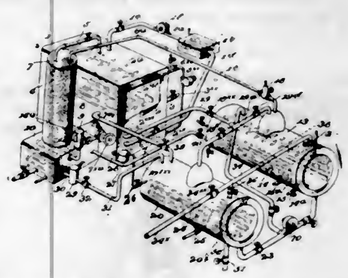
7. A frame, a windshield, and means detachably connecting said shield to said frame, said means comprising a bearing block detachably mounted in said frame, one end of said shield being rotatably connected to said block and yielding means holding said block in its normal position in said frame.

1,574,023. LATCH OR KEEPER MEANS. EDWIN CROMPTON and CHARLES L. CROOKS, Pueblo, Colo., assignors to The Positive Lock Company, Pueblo, Colo., a Corporation of Colorado. Filed Oct. 12, 1921. Serial No. 507,190. 27 Claims. (Cl. 292—24.)



1. The combination, with a bolt, of clamping members acting substantially at right angles to one another adapted when the bolt is moved between the same to automatically engage the bolt and substantially prevent rattling thereof.

1,574,024. LATCH. EDWIN CROMPTON and CHARLES L. CROOKS, Pueblo, Colo., assignors to The Positive Lock Company, Pueblo, Colo., a Corporation of Colorado. Filed Oct. 5, 1922. Serial No. 592,497. 20 Claims. (Cl. 292—25.)

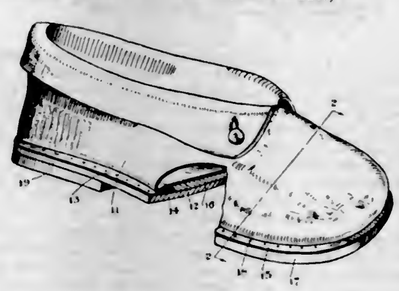


1. The combination with a bolt, of latch members separable one from the other and adapted to receive a bolt therebetween, and means for operating said latch members comprising opposed members pivoted to swing transversely of the latch members.

1,574,025. LATCH. FRANCIS M. VANDERVOORT, Pueblo, Colo., assignor to The Positive Lock Company, Pueblo, Colo., a Corporation of Colorado. Filed Nov. 8, 1923. Serial No. 673,532. 28 Claims. (Cl. 292—45.)

1. Latch means comprising latch members separable one from the other and adapted to receive a bolt therebetween, opposed members pivoted to swing transversely of said latch members for operating said latch members, and slidable means engaging and operating said opposed members.

1,574,026. PROCESS FOR MAKING PAPER PULP. FREDERICK K. FISH, Jr., Windsor Mills, Canada, assignor to Wood Products & By Products Corporation, a Corporation of Nevada. Filed Nov. 5, 1920. Serial No. 421,970. Renewed May 22, 1925. 15 Claims. (Cl. 92—2.)



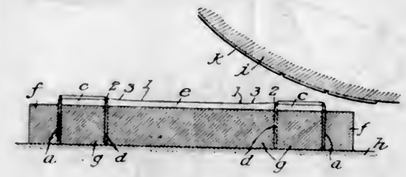
1. The process of making paper pulp from plant substances, consisting in subjecting the plant substance to a heated medium containing added volatile extractives from the plant substance, then submerging the plant substance in superheated liquid charged with volatile extractives of the plant substance, then removing the liquid from around the plant substance, and thereafter further digesting the plant substance in a separate chemical solution.

1,574,027. RAILWAY SWITCH. FRANK M. FREEBURG, Philadelphia, Pa. Filed Apr. 25, 1925. Serial No. 25,807. 30 Claims. (Cl. 246—432.)

2. In a railway switch, the combination of a main rail, a branch rail leading therefrom, a vertically and longitudinally movable switch rail adapted to control the passage of a car wheel relatively to the main rail and the branch rail, and a member pivotally associated with the switch rail adapted for swinging the switch rail in a vertical plane into the raised and lowered positions relatively to said rails.

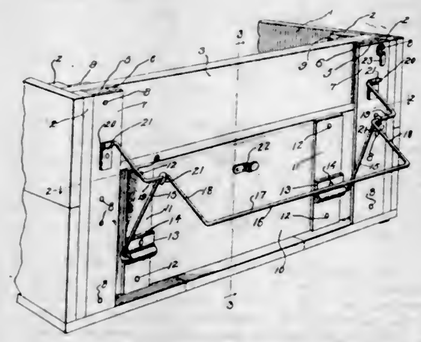
1,574,028. CUSHION SOLE. HARVEY J. GRABER, Kitchener, Ontario, Canada. Filed Dec. 12, 1923. Serial No. 680,204. 1 Claim. (Cl. 36—117.)

An article of foot wear comprising an upper having inturned bottom edges, an insole having inturned bottom edges coinciding with the edges of the upper and resting upon the latter, a narrow leather welt, underlying the upper with its inner edges coinciding with the edges of the upper and the insole, a row of vertical stitching joining the upper, insole and welt near said edges, a felt cushion fitted snugly in the space bounded by the edges of the upper, welt and insole, and underlying the latter, and an outer sole cemented to the welt and to the underside of the cushion and a row of vertical stitching passing through the welt and outsole and positioned between the wall of the upper and the outer edge of the welt.



1,574,029. LOCOMOTIVE FIRE BOX. CHARLES GILBERT HAWLEY, Chicago, Ill., assignor to Locomotive Fire-Box Company, Chicago, Ill., a Corporation of Delaware. Filed May 13, 1922. Serial No. 560,655. 3 Claims. (Cl. 122—68.)

1. In combination with a locomotive fire box having a stay bolted crown sheet provided with an elongated opening therein, between adjacent rows of the stay bolts, a thermic siphon positioned in the fire box and having a flangeless top end extending through said opening and beyond the top surface of the crown sheet and to which said flangeless top end of the siphon is autogenously welded.

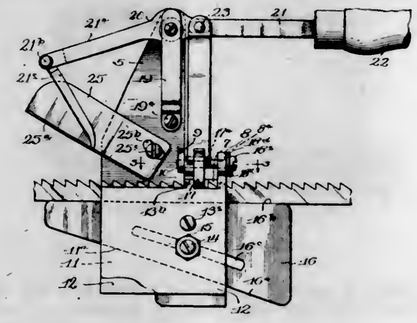


1,574,030. BOX-BLANK CUTTING AND SCORING FORM AND METHOD OF PREPARING THE SAME. CHARLES G. HAYES, Chicago, Ill., assignor to Chicago Carton Company, Chicago, Ill., a Corporation of Illinois. Filed June 7, 1924. Serial No. 718,425. 8 Claims. (Cl. 93—58.)

1. A folding-box-blank cutting and scoring form for cylinder presses, comprising margin and flap-forming knives, and relatively high and low, transverse and longitudinal score-forming rules, the latter having end sections

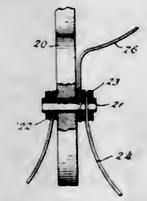
gradually increasing in height to substantially that of the transverse rules, substantially as described.

1,574,031. END GATE. FRED J. HECHT, Lytton, Iowa. Filed Aug. 27, 1925. Serial No. 52,867. 1 Claim. (Cl. 296—52.)



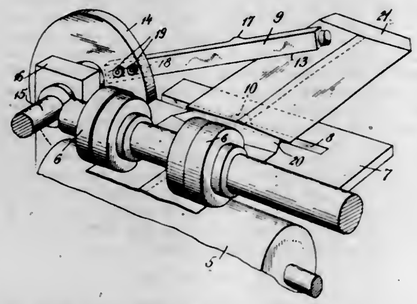
An end gate comprising an upper section, vertical supports beneath the end portions of said upper section with their upper ends engaging the lower edge thereof, said supports defining a discharge opening, bars extending along the outer faces of said supports and across said upper section in spaced relation to the ends thereof, bracing strips extending along the inner faces of said supports and across the end portions of said upper section, strips extending along the inner and outer faces of said bars and projecting beyond the inner side edges thereof and cooperating therewith to form tracks, said upper section, supports, bars and strips being secured together to form a unitary structure, a lower section slidably mounted between said bars and the projecting portions of said inner and outer strips for vertical movement into and out of closing relation to the discharge opening, and means for moving said lower section into and out of a closed position.

1,574,032. SAW SET. SOREN HERNES, Chicago, Ill. Filed July 18, 1925. Serial No. 44,483. 10 Claims. (Cl. 76—63.)



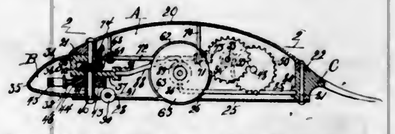
2. A saw-set comprising a plurality of oppositely moving bending members in combination with a mounting provided with a slot to receive and locate the saw in

coactive relation with said bending members, and an operating lever linked to said bending members, said



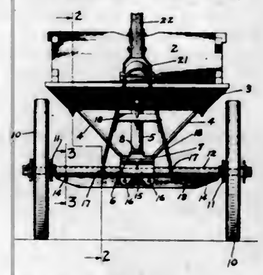
operating lever being extended beyond its pivoted mounting and provided with a pawl for feeding the teeth of the saw, to be operated upon, to the bending members.

1,574,033. VIOLIN TONE VIBRATOR. ISIDOR HESSEL, Brooklyn, N. Y. Filed June 5, 1923. Serial No. 643,521. 5 Claims. (Cl. 84—294.)



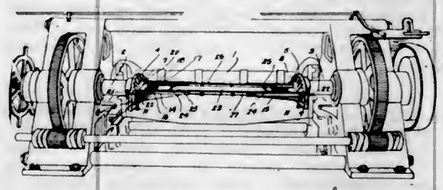
1. The combination with a violin or the like, of a plurality of coils of spring wire mounted within the sounding box and means to secure one end of said coils to the sounding box comprising a hollow metallic tube to which outer end of said coils is secured while the inner end of said coils is free to vibrate.

1,574,034. ENVELOPE MACHINE. GEORGE FRANCIS HOGAN, Chicago, Ill. Filed Feb. 14, 1923. Serial No. 618,912. 4 Claims. (Cl. 93—33.)



1. In an envelope machine, the combination of means for advancing a continuous web through the machine and severing means having two cutting edges in spaced relation to simultaneously shear the web, one of the cutting edges having a projection adapted to notch the web.

1,574,035. TOY. JOHN HOLTZMAN, New York, N. Y., assignor of one-half to Max E. Bernhardt, New York, N. Y. Filed Apr. 3, 1922. Serial No. 549,321. 8 Claims. (Cl. 46—45.)



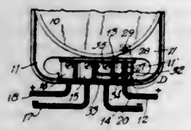
1. In a toy the combination of a body portion, a motor in the body portion, a head with openings pivoted to the body portion, a tail pivoted to the body portion, a spool having a cam groove and a pair of rollers journaled in the body portion, said rollers extending out of said body portion, connections between the motor and said spool to turn the said rollers and thereby move the toy, an element extending from the head coacting with said cam groove to move said head, an element extending from the tail coacting with said cam groove to move said tail, a disc with an abrasive material journaled in the toy, a sparking material bearing against said material and means interposed between the motor and said disc to turn the latter and thereby generate sparks from the sparking material, said sparks being discharged through the openings in the head.

1,574,036. WAGON AXLE. ARTHUR O. HUBBARD, Minneapolis, Minn.; Nellie H. Hubbard, executrix of said Arthur O. Hubbard, deceased, assignor to Puffer-Hubbard Manufacturing Company, Minneapolis, Minn., a Corporation of Minnesota. Filed Apr. 14, 1922. Serial No. 552,470. 5 Claims. (Cl. 301—129.)

5. The combination with an axle, of a plate of sheet metal folded around the axle and having its abutting edges secured together to form a longitudinal truss flange to resist downward thrust on the axle and a block seated on said plate and having a depending web secured to said flange below said axle.

1,574,037. OFFSET CHUCK AND ADJUSTABLE STAY LOG. CLARENCE A. KESSLER, Kansas City, Mo., assignor to Penrod Walnut & Veneer Company, Kansas City, Mo., a Corporation of Missouri. Filed Aug. 2, 1924. Serial No. 729,820. 2 Claims. (Cl. 144—214.)

1. In combination, a veneering machine including chuck spindles, chucks on the spindles having radial recesses, brackets having lugs in the recesses, slotted wings on

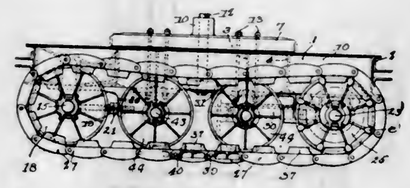


the side edges of the brackets, radial adjusting screws in the chucks in threaded engagement with the lugs, bolts passing through the slots into the chucks, and a stay log supported by the brackets.

1,574,038. SHELF AND DRAWER SUPPORT. CHARLES E. KEW, Chicago, Ill. Filed July 1, 1925. Serial No. 40,798. 2 Claims. (Cl. 45—77.)

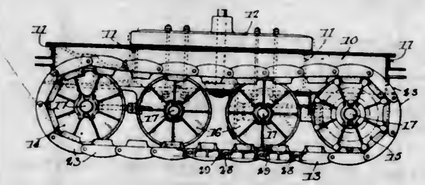
2. In combination with a casing to receive a drawer provided with spaced recesses in a common plane, a drawer and a support having studs adapted to enter said recesses and spring connections extending between said studs formed to create tension between said studs and the respective recesses with which they are assembled, said spring connections being bowed to create pressure between said drawer and said casing.

1,574,039. THEFTPROOF DEVICE FOR WATT HOUR METERS. FRANK A. KOLB, Hammond, Ind., assignor of one-half to Morse Dellplain, Hammond, Ind. Filed May 23, 1924. Serial No. 715,398. 12 Claims. (Cl. 171—34.)



1. In an electric meter, a device of the character described comprising a bushing with terminal members therein insulated from each other, and means for connecting one of said members to a point in said meter of different potential than the other of said terminal members, to prevent theft of current from said meter.

1,574,040. DRILL. ALFRED W. LASHER, Oakland, Calif. Filed Nov. 13, 1924. Serial No. 749,710. 10 Claims. (Cl. 255—4.)

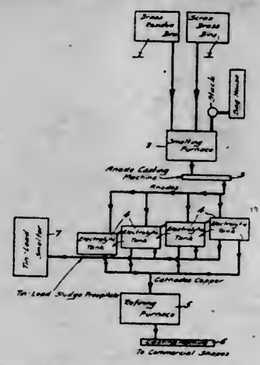


1. A drill of the character described, an annular chamber, means for causing the latter to travel downwardly with the drill and means for discharging material from the bottom of the said chamber to the outside thereof for building up a lining in the hole drilled during the drilling operation, the said chamber having means associated therewith allowing water to circulate therethrough to the bottom of the hole without coming in contact with the lining material.

1,574,041. CREEPING TRACTION MECHANISM. SVANTE R. W. M. BAGER and WERNER LEHMAN, South Milwaukee, Wis., assignors to Bucyrus Company, South Milwaukee, Wis., a Corporation of Wisconsin. Filed Feb. 7, 1921, Serial No. 443,164. Renewed Jan. 21, 1926. 7 Claims. (Cl. 180—9.1.)

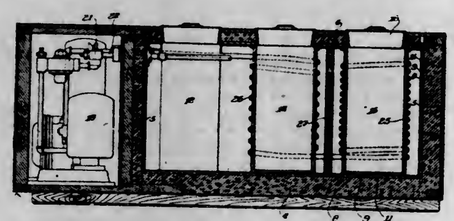
1. In a creeping traction mechanism, a supporting frame including a pair of side bars, a plurality of transverse connecting bars, a superstructure track mounted on said bars, and tie bolts extended through said track and engaged with certain of said transverse bars, brackets extending outwardly of the side bars of the frame and having their inner ends secured by said tie bolts, said ends forming tie plates for the latter, supporting axles carried by the frame and having their ends extended beyond the side bars, endless tread belt receiving wheels on the ends of the axles, an endless tread disposed around each cooperating pair of wheels, and rollers on said brackets for engaging intermediate stretches of the belts.

1,574,042. CREEPING TRACTION TREAD AND COOPERATING TUMBLER. SVANTE R. W. M. BAGER and WERNER LEHMAN, South Milwaukee, Wis., assignors to Bucyrus Company, Milwaukee, Wis., a Corporation of Wisconsin. Original application filed Feb. 7, 1921, Serial No. 443,164. Divided and this application filed Oct. 10, 1921, Serial No. 506,630. Renewed Oct. 31, 1925. 7 Claims. (Cl. 305—8.)



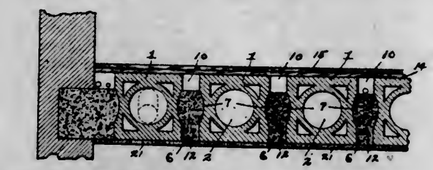
5. In a creeping traction mechanism the combination of a tread belt comprising a series of connected links, each comprising an integral casting having a relatively broad tread surface, a relatively narrow flat centrally disposed wheel engaging surface and upstanding wheel guiding flanges, load sustaining wheels disposed between said flanges, a driving tumbler disposed between said flanges, and lateral lugs on said tumbler disposed for driving engagement with said flanges.

1,574,043. PROCESS FOR THE SEPARATION AND RECOVERY OF THE COPPER, TIN, AND LEAD CONTENT OF BRASS OR BRONZE SECONDARY METALS AND THEIR RESIDUES. TANNIE LEWIN, St. Louis, Mo., assignor of one-half to William Lewin, St. Louis, Mo. Filed Aug. 24, 1925. Serial No. 52,220. 8 Claims. (Cl. 204—57.)



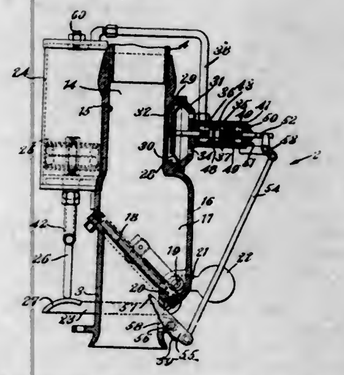
1. The process of treating brass or bronze secondary metals or their residues for the separation and recovery of their copper content, which comprises treating the

material to effect removal of both its iron content and its nonmetallic and other impurities, then casting the remaining material directly into forms adaptable for use



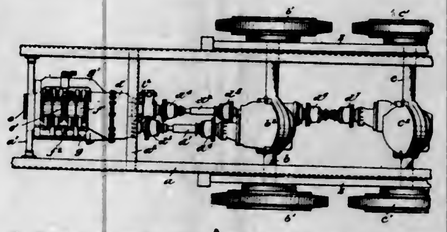
as anodes, and then utilizing the same as anodes in an electrolytic bath, whereby the copper content is electrolytically extracted and deposited upon the cathodes.

1,574,044. HEAT-EXCHANGE APPARATUS. CARL E. L. LIPMAN, Beloit, Wis., assignor to Lipman Refrigeration Company, Beloit, Wis., a Corporation of Delaware. Filed Jan. 21, 1924. Serial No. 687,465. 4 Claims. (Cl. 257—22.)



2. A heat exchange apparatus comprising a cast metal shell shaped to provide a plurality of chambers in contiguous relation each adapted to contain produce to be cooled and being peripherally grooved, and a refrigerating coil having convolutions about said shell wound in said grooves.

1,574,045. FLOOR, CEILING, AND ROOF CONSTRUCTION. WILLIAM MCILROY, Springfield, Ohio, assignor of two-fifths to Daniel Maloney, Springfield, Ohio. Filed Dec. 13, 1923. Serial No. 680,372. 3 Claims. (Cl. 72—66.)

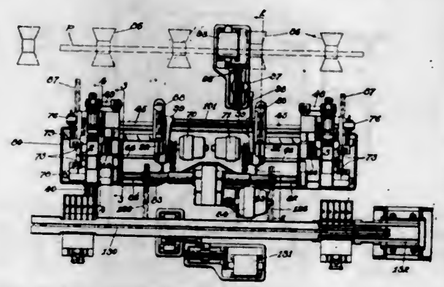


1. In a structure of the character described, the combination of precast blocks and a concrete filling formed between said blocks containing an excess amount of water, the blocks being substantially rigid but of such cellular character as to be capable of conducting from the concrete filling and through the block any excess amount of water at a rate such that in the predetermined time required for the concrete to set sufficient excess water will be removed from the concrete to improve the strength and character of the beam.

1,574,046. PNEUMATIC-DISPATCH APPARATUS. JAMES G. MACLAREN, Syracuse, N. Y., assignor to The Lamson Company, Syracuse, N. Y., a Corporation of Massachusetts. Filed Jan. 23, 1925. Serial No. 4,215. 13 Claims. (Cl. 243—28.)

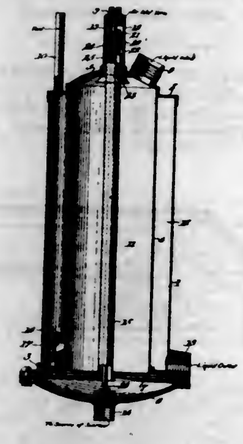
8. In a pneumatic dispatch apparatus, a tube terminal device including a normally closed inlet valve biased to move to open position, pneumatic means normally retaining the valve in closed position, controlling means including an auxiliary valve and a trip member, the trip member being actuable by a carrier inserted in the terminal device to shift the auxiliary valve thereby causing the pneumatic means to release the inlet valve and permit it to open, and spring means operative to restore the auxiliary valve to normal position when the carrier moves out of engagement with the trip member thereby to cause the inlet valve retaining means to return to normal position after a predetermined period of time.

1,574,047. DRIVE FOR MOTOR VEHICLES. GABRIEL MIDBOE, Brooklyn, N. Y., assignor to International Motor Company, New York, N. Y., a Corporation of Delaware. Filed Feb. 29, 1924. Serial No. 695,891. 5 Claims. (Cl. 180—22.)



1. In a dual rear axle drive, a differential mounted upon the chassis, differentials mounted upon the respective rear axles, propeller shafts between the respective rear and the first mentioned differentials, means in the forward rear differential housing providing a journal for the rear propeller shaft and means in the respective propeller shafts for permitting relative movement between the respective differentials.

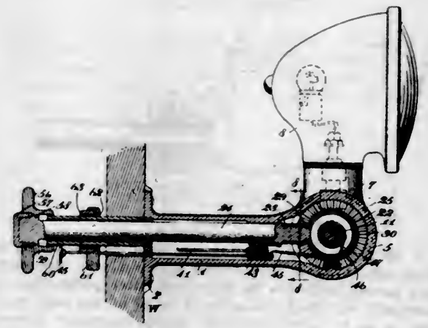
1,574,048. PIPE-CUTTING MACHINE. ERIK W. MIKAELSON, Easton, Pa., assignor to Treadwell Engineering Company, Easton, Pa., a Corporation of Pennsylvania. Filed Feb. 8, 1922. Serial No. 534,909. 56 Claims. (Cl. 82—2.)



1. A pipe cutting machine comprising, in combination, tools for simultaneously cutting off opposite ends of a length of pipe, means for holding a length of pipe for

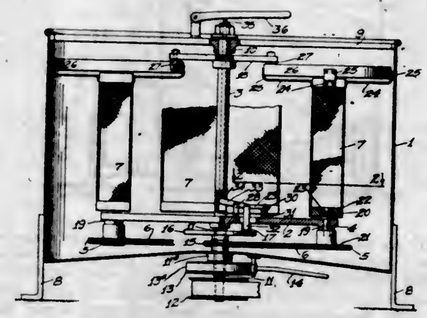
said cutting operation, mechanism for presenting lengths of pipe one at a time to said holding means, mechanism for ejecting the lengths of pipe from said holding means

after the ends of the pipe have been cut off, and automatic means for relatively moving said tools and said holding means to effect said cutting operation.



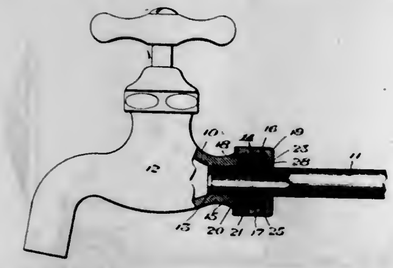
1,574,049. VACUUM FUEL-FEEDING APPARATUS. HENRY A. MILLER and ROBERT H. RHOADES, New York, N. Y., assignors to Vaco Manufacturing Corporation, New York, N. Y., a Corporation of Delaware. Filed Feb 11, 1924. Serial No. 692,085. 9 Claims. (Cl. 103—236.)

1. A vacuum fuel feeding apparatus, comprising a liquid fuel receiving chamber, means to create a vacuum in said chamber and to break said vacuum, and a liquid fuel delivery chamber surrounding the receiving chamber, a valve arranged at the lower end of the receiving chamber and opening by hydrostatic pressure to establish communication between the two chambers, a liquid outlet from the delivery chamber, and a base on which these chambers are erected.



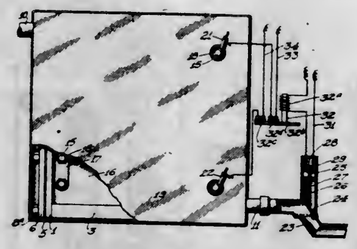
1,574,050. AUTOMOBILE SPOTLIGHT. HUGH E. MONTGOMERY, Chicago, Ill. Filed Mar. 31, 1924. Serial No. 703,203. 17 Claims. (Cl. 240—61.)

1. A spotlight comprising a lamp, a standard by which it is carried, a fixed standard upon which the lamp standard is movably mounted, a single operating shaft, a lamp shaft having a pinion, a ring having a gear with which it constantly meshes, a clutch engageable with the same gear teeth to keep the gear from turning, a second gear on said ring engaged by a pinion on the operating shaft, means by which the clutch is keyed to the movable standard causing a rocking of the standard



and lamp in one plane upon mere turning of the operating shaft, and means by which the clutch is displaced to disengage the first teeth upon pushing the operating shaft, subsequent turning of the shaft revolving the lamp independently on the movable standard through the ring and first mentioned pinion.

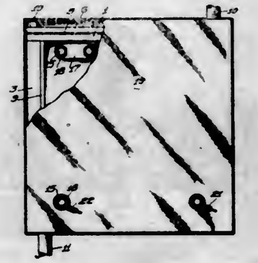
1,574,051. HONEY EXTRACTOR. GEORGE L. MORRIS, Bonsall, Calif. Filed Dec. 15, 1921. Serial No. 522,674. 3 Claims. (Cl. 210—65.)



1. A honey extractor, consisting of a case, honeycomb cages revolubly mounted in said case, means for whirling said cages in an orbit, means for rotatably mounting said cages on said means for whirling said cages, means for rotating said cages relative to their orbit of revolution, means for stopping the rotation of said cages and holding them tangential to their orbit comprising sprocket wheels operatively connected with said cages, a sprocket wheel operatively connected with said means for whirling, a brake operatively connected with said last named sprocket wheel, a clutch releasably connecting said means for whirling with said last-named sprocket wheel, and a sprocket chain operatively connecting said first-named sprocket wheels with said last-named sprocket wheel.

1,574,052. SLIP-JOINT COUPLING. PHILIP MUELLER, Decatur, Ill., assignor to Adolph Mueller, trustee, Decatur, Ill. Filed Nov. 12, 1919. Serial No. 337,486. 6 Claims. (Cl. 285—166.)

1. In a slip joint coupling, an outer pipe member, an inner pipe member, and a ring between said pipe members having means on its inner and outer peripheries for positively engaging the opposed walls of the pipe members so as to prevent relative rotary movement between said pipe members.

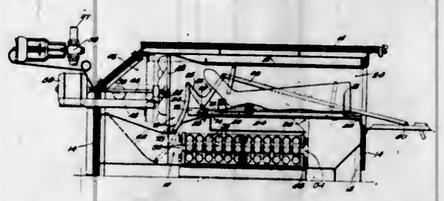


1,574,053. ELECTRIC WATER HEATER. SAMUEL D. NESMITH, San Diego, Calif., assignor, by direct and mesne assignments, of thirty per cent to A. S. Bridges, San Diego, Calif.; ten per cent to Roger Welles, ten per cent to R. R. Richardson, two per cent to E. J. Callahan, Guadalajara, Mexico; five per cent to J. B. Osborn, San Diego, Calif.; five per cent to (Mrs.) Kathryn Osborn, five per cent to J. H. Bulmer, San Diego, Calif.; and thirty-three per cent to (Mrs.) Mary E. Nesmith (wife), San Diego, Calif. Filed Oct. 8, 1923. Serial No. 667,221. 9 Claims. (Cl. 219—39.)

1. An electric water heater, including separate spaced apart vertical supporting members, a plurality of water tubes extending between and through said supporting members, and end members positioned on the outer sides of said supporting members, and extending across the end of all of said tubes, there being provided hollow portions between said supporting and said end members for connecting the ends of certain of said water tubes with each other.

1,574,054. ELECTRIC WATER HEATER. SAMUEL D. NESMITH, San Diego, Calif., assignor, by direct and mesne assignments, of thirty per cent to A. S. Bridges, five per cent to J. B. Osborn, five per cent to (Mrs.) Kathryn Osborn, five per cent to J. H. Bulmer, thirty-three per cent to (Mrs.) Mary E. Nesmith, all of San Diego, Calif.; two per cent to E. J. Callahan, Guadalajara, Mexico.; ten per cent to Roger Welles and ten per cent to R. R. Richardson. Filed Feb. 11, 1924. Serial No. 691,953. 7 Claims. (Cl. 219—39.)

1. An electric water heater, including spaced apart horizontal supporting members, a plurality of flattened vertical water tubes extending between and through said supporting members, and other members positioned on the outer sides of said supporting members, there

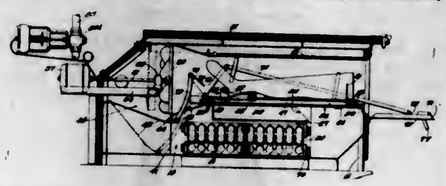


being provided continuous hollow portions between said supporting and said other members for connecting the ends of all of said water tubes with each other.

1,574,055. FABRICATION OF METAL SHEETS BY ELECTRODEPOSITION. ARTHUR Z. PEDERSEN, West Orange, N. J., assignor to Madsenell Corporation, New York, N. Y., a Corporation of New York. Filed May 15, 1920. Serial No. 381,557. 10 Claims. (Cl. 204—14.)

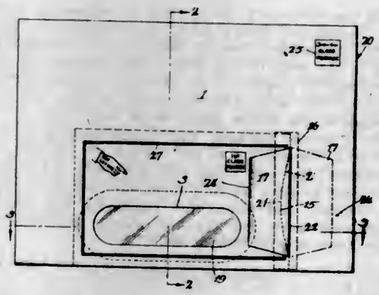
1. The method of making a plurality of separable sheets of an anodically corrosive metal by electrodeposition which comprises reversing the direction of the flow of current between successive depositions.

1,574,056. METHOD OF DRYING HOSIERY. EARLE C. POWERS, Stratford, N. J., assignor to B. F. Sturtevant Company, Boston, Mass., a Corporation of Massachusetts. Filed Apr. 12, 1922. Serial No. 552,013. 8 Claims. (Cl. 34—24.)



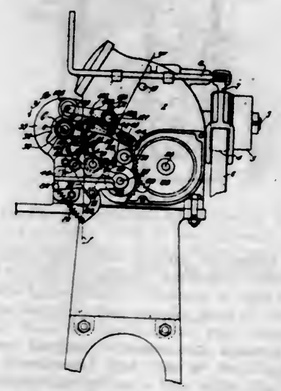
5. The method of drying hosiery and the like which consists in providing a circulating flow of drying air, dividing such flow for a portion of its circulation into a plurality of separated streams, subjecting lots of hosiery one to each of the streams, cutting off the flow of each stream successively and replacing each lot successively while the other lots are being subjected to the other streams, and simultaneously withdrawing a portion of the air and introducing fresh air into each separated stream while the lot of hosiery for such separated stream is being replaced.

1,574,057. HOSIERY DRIER. EARLE C. POWERS, Stratford, N. J., assignor to B. F. Sturtevant Company, Boston, Mass., a Corporation of Massachusetts. Filed Apr. 12, 1922. Serial No. 552,014. 37 Claims. (Cl. 34—40.)



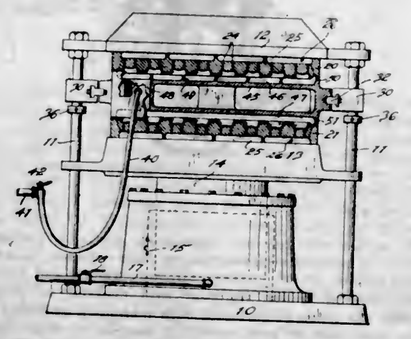
36. A hosiery drier comprising a cabinet having a horizontal partition forming an upper drying compartment and a lower heating chamber, the partition being interrupted at its front and rear to form front and rear passages for the circulation of air, a fan for circulating

the air, heating means in the heating chamber, a door in the drying compartment adjacent the front air passage and means movable into and out of the drying compartment when the door is open for supporting the hosiery,



said means when in position within the drying compartment overlying the front air passage and having its bottom open at its front end to permit the passage of air therethrough and through the front air passage.

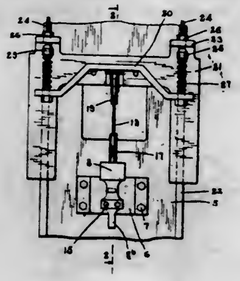
1,574,058. DUPLEX MAILING ENVELOPE. JOHN C. REDINGTON, Quincy, Ill., assignor to Du-Plex Envelope Corporation, Quincy, Ill., a Corporation of Illinois. Filed Dec. 24, 1923. Serial No. 682,373. 5 Claims. (Cl. 229—72.)



1. That improvement in duplex envelopes which contemplates sufficient enlargement and special formation and location of the small compartment sealing flaps thereof, when a plurality of such envelopes are arranged in a row in overlapping relation to permit moistening thereof by wiping a sponge over the row of flaps, comprising means forming a plurality of compartments, one of said compartments being relatively small and within the area of the larger compartment, the smaller compartment being formed upon the inner surface of the front wall of the larger compartment, and a sealing flap of substantial length on the face of the envelope for the smaller compartment, which flap is of sufficient size and location to extend close enough to the edge of the envelope to permit several envelopes of this kind to be arranged in overlapping relation with the adhesive sides of their sealing flaps exposed and facing upward, and with the back or non-adhesive side of each flap facing downward but raised a distance from the address side of its allotted envelope, so that the free edge of each flap is nearer the edge of its envelope than the entrance to the smaller compartment, whereby the flaps which are larger than is necessary for merely sealing purposes may all extend in the same direction in said row and in sufficiently raised position for wiping lengthwise of the envelopes and parallel with the addresses thereof to moisten the adhesive sides of the flaps, by means held in one hand while the other hand is pressed down on the envelopes at one side of the line of wiping motion, with the flaps thereby close together to minimize the wetting of the front surface of the envelopes during the operation of wiping the said flaps thereof, the envelopes presenting a substantial area forming a wide margin at one side of said row of flaps, upon which to exert pressure to hold the envelopes down while wiping the flaps, thereby preventing any obstruction to or interference with the wiping motion, and whereby the envelopes are filled and wiped and closed and stamped without turning them around, each flap when sealed adhering directly to said front wall of the larger compartment, which is the front wall of the envelope itself.

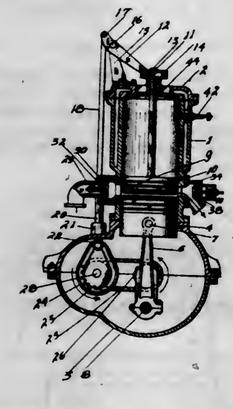
1,574,059. COIL-WINDING MACHINE. CHARLES D. REYNOLDS, Cranston, R. I., assignor to Universal Winding Company, Boston, Mass., a Corporation of Massachusetts. Filed Jan. 14, 1924. Serial No. 686,170. 37 Claims. (Cl. 242—10.)

1. In a coil-winding machine, the combination with the winding-mandrel and means for guiding the conductor onto the mandrel, of means for inserting sheets of insulating-material into the coil at intervals of the winding comprising a pair of feed-rolls between which the insulating-material feeds, one of said rolls being continuously driven from the winding mechanism of the machine, and means controlled from the winding mechanism to cause the paper to be periodically gripped between and fed by the rolls at predetermined intervals of the winding.



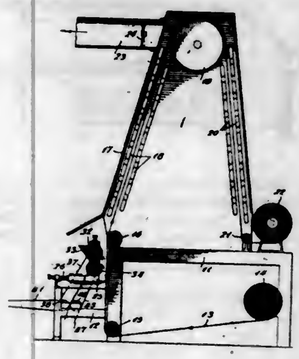
1,574,060. METHOD FOR MAKING HOLLOW RUBBER ARTICLES. FRED THOMAS ROBERTS, Philadelphia, Pa., assignor to Paramount Rubber Consolidated, Inc., Tuckahoe, N. Y., a Corporation of Delaware. Filed July 8, 1921. Serial No. 483,285. 17 Claims. (Cl. 18—56.)

1. The method of making hollow articles of plastic material comprising seating sheet stock in mold cavities and against an adjacent portion of the mold around the cavities by fluid pressure higher than atmospheric which



is exerted uniformly on the stock opposite the cavities and opposite such adjacent regions, thereafter removing such pressure and joining such stock while it is still seated to other stock.

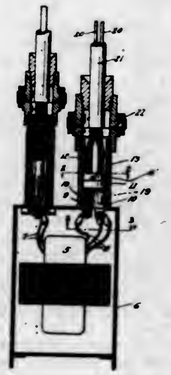
1,574,061. AUTOMATIC NAILING DEVICE. JOHN ALBRECHT, Kewaunee, Wis. Filed Oct. 3, 1921. Serial No. 504,907. 1 Claim. (Cl. 1—10.)



In an automatic nailing device the combination of a reciprocating cross-head having a pair of overhanging apertured lugs, a hammer, a transversely extending member secured to said hammer and provided with apertures in alignment with the apertures in said lugs, bolts extending through the respective aligned apertures, said bolts being fixed to said lugs respectively, a collar on each of said bolts, and a spring surrounding each bolt interposed between the collar thereon and said member, for the purpose specified.

1,574,062. TWO-CYCLE GAS ENGINE. RUDOLPH J. BOEHMER, Portland, Oreg. Filed Oct. 5, 1922. Serial No. 592,655. 1 Claim. (Cl. 123—65.)

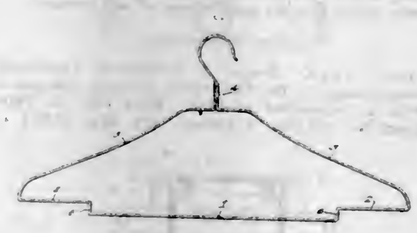
In a two-cycle internal combustion engine, a cylinder, a pair of pistons reciprocating in said cylinder, packing rings carried by said pistons, circular exhaust and intake ports located in the walls of said cylinder at points within the range of travel of both pistons, a plurality of bars positioned in said ports and secured at their opposite ends to the cylinder to extend in the direction of travel of the pistons whereby damage to said rings while passing the ports will be eliminated, and means for actuating said pistons.



1,574,063. METHOD AND MACHINE FOR DECORATING FABRICS. ERNEST CADGÈNE, Englewood Cliffs, and GEORGE DUPONT, Paterson, N. J. Filed May 16, 1925. Serial No. 30,652. 20 Claims. (Cl. 101—114.)

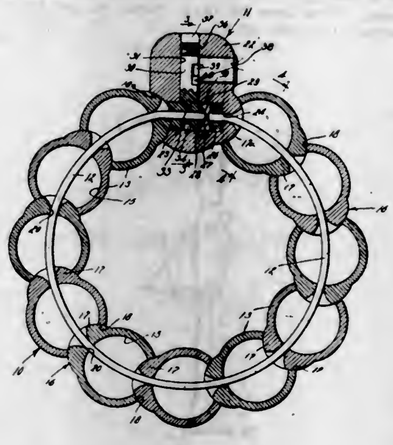
1. In the textile art, the method of implanting a decorative composition upon a fabric which consists in spraying the composition toward said fabric, interposing a stencil in the path of the spray, and continuously moving said stencil relative to the fabric to present different portions of the stencil to the spray to vary the characteristics of the design produced on the fabric.

6. In a textile machine, the combination of a roller to which a composition is fed, means for removing the composition from said roller and projecting the same in the form of a spray on to a fabric to produce a stipple effect thereon, and means for regulating the distance between said fabric and the first named means to vary the character of said stipple effect.



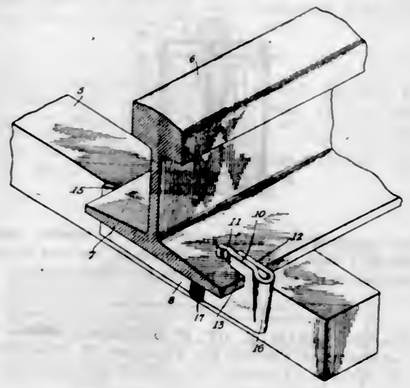
1,574,064. ELECTRICAL CONNECTION FOR TRANSFORMERS AND THE LIKE. GEORGE L. CHAMBERLAIN, Chicago, Ill. Filed July 21, 1922. Serial No. 576,564. 5 Claims. (Cl. 173—338.)

1. An electrical connection comprising one member having three slip connections thereon; a cooperating member having three mountings thereon registering with the connections on said other member; two slip connections in said mountings and cooperating with the slip connections on said other member; means facilitating the



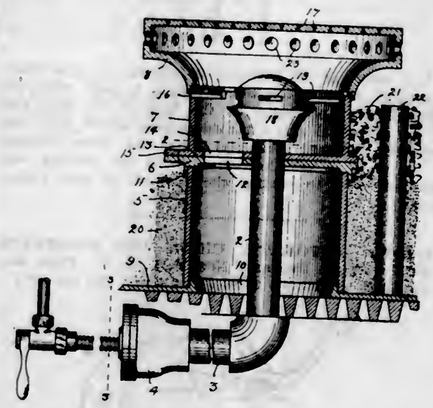
shifting of one of said slip connections from one of said mountings into the said unoccupied mounting; and means compelling association of said members always in the relation, substantially as described.

1,574,065. GARMENT HANGER. JAMES D. CONEY, Detroit, Mich., assignor to Star Service Hanger Co., Detroit, Mich., a Corporation of Michigan. Filed July 1, 1925. Serial No. 40,754. 2 Claims. (Cl. 223—62.)



1. In a garment hanger, a single piece of wire fashioned to form shoulder portions and a suspension hook, and a transverse member connecting said shoulder portions and provided with a depressed trouser supporting portion set in from the shoulder portions so as to prevent trousers from laterally sliding in said hanger, the depressed trouser supporting portion of said transverse member being disposed in a plane parallel to the plane of the remaining end portions of said transverse member and affording a large uninterrupted opening to facilitate placing the trousers on the depressed supporting portion.

1,574,066. CHAIN. CORNELIUS J. CONNORS, Los Angeles, Calif. Filed Mar. 20, 1923. Serial No. 626,332. 3 Claims. (Cl. 152—14.)

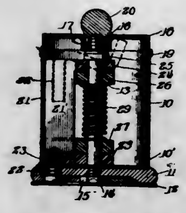


1. A chain including a tie, a plurality of hollow spherical blocks carried on the tie, and means protecting the tie at the points of joinder of the blocks.

1,574,067. ONE-PIECE RAIL ANCHOR. ADONIRAM J. COOK, Westerlo, N. Y. Filed Oct. 5, 1925. Serial No. 60,488. 5 Claims. (Cl. 238—330.)

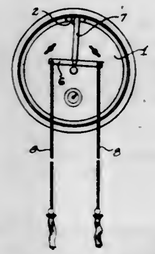
5. A rail anchor of resilient metal having a projection at one end and two jaws at the opposite end, the metal being bent upon itself on an oblique line to bring the jaws into parallel planes with the gripping edges of the jaws disposed in oblique lines.

1,574,068. GAS BURNER. WILLIAM D. CRITES, Duluth, Minn. Filed July 18, 1924. Serial No. 726,738. 3 Claims. (Cl. 158—99.)



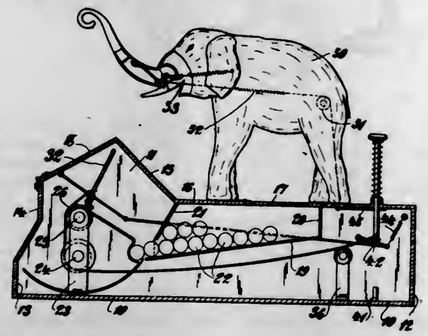
1. A gas burner of the type described comprising an upright three-part rotatably adjustable cylinder having an axial gas burner therein, portions of said cylinder being adjustable about the burner as an axis to regulate the air passing through the cylinder to the burner, the upper portion of said cylinder being outwardly flared and provided with discharge ports, some of said ports occurring below the flared portion and some above the flared portion.

1,574,069. AUTOMATIC FEED TOOTHPICK HOLDER. GEORGE DEKOFF, Chicago, Ill. Filed Apr. 18, 1925. Serial No. 24,035. 4 Claims. (Cl. 206—21.)



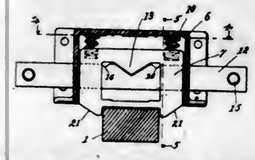
1. In an automatic feed toothpick dispenser, the combination of a round upright cup-shaped container having a cover formed with a delivery opening between the center and periphery thereof, a central fixed shaft in

said container, a fixed post formed with an abutment face underlying said opening, a fixed cam at the lower end of said abutment face, a follower formed with hinge



lugs mounted on said shaft, and a torsion spring encircling said shaft and anchored at one end to said post and at its other end to said follower.

1,574,070. ARTICLE OF FURNITURE. PETER DEMETROPOULAS, Chicago, Ill. Filed Nov. 15, 1924. Serial No. 750,060. 1 Claim. (Cl. 58—16.)

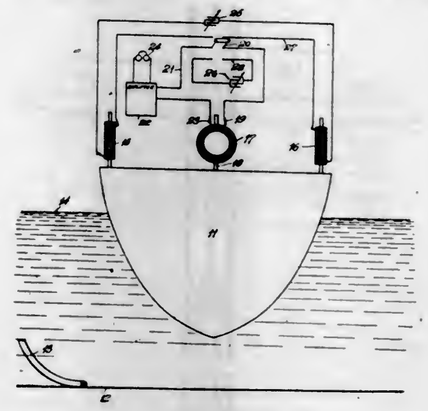


In a device of the character described, an alarm clock, a support therefor, an alarm switch in said clock, an operated lever pivoted upon the back of the clock and having a vertical arm attached to said switch lever and oppositely disposed horizontal arms, and cables attached to the ends of said horizontal arms for shifting said operated lever to control the position of said switch lever.

1,574,071. AUTOMATIC CIGAR AND CIGARETTE BOX. FRANK DVORSKY, New York, N. Y. Filed May 13, 1925. Serial No. 29,864. 1 Claim. (Cl. 211—8.)

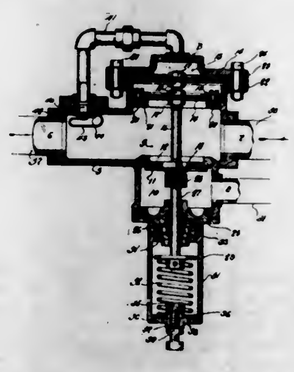
A dispensing container comprising a casing, a figural object on the cover of said casing, said object having a single elongated member pivoted to the body, terminating in a normally coiled flexible element, means in said object to normally retain said member in a raised position, an article holding receptacle engaged in said casing, said casing having a filling door, a hinged delivery door disposed in the path of said member, means for opening said delivery door, means for delivering a single article from said receptacle to the door, a plunger operatively engaged with the delivery door opening means and with said article delivering means, operative connections between said plunger and the pivoted member of said figural object, to lower said member, means actuated by said plunger to uncoil said flexible element and thereafter permit it to engage an article on said delivery means, and means for retaining all of said parts to their initial position upon release of said plunger.

1,574,072. LOCK. ROBERT A. ENDEBROCK, Cincinnati, Ohio, assignor to The Trailmobile Company, Cincinnati, Ohio, a Corporation of Ohio. Filed Feb. 10, 1919. Serial No. 276,108. 2 Claims. (Cl. 280—33.55.)



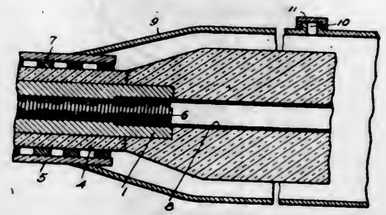
1. In a lock for trailer draft bars, in combination with a draft bar, a casing secured to the frame, a latch plate shiftable vertically in said casing to engage and lock the draft bar, springs to enforce such engagement, and a transversely shiftable operating bar mounted in said latch plate, a depending V-shaped projection on the latch plate, and a corresponding recess in the operating bar to receive said projection and to permit the springs to hold the draft bar in locked position and whereby the transverse movement of the actuating bar will shift the locking plate to release the draft bar and an additional V-shaped recess in the operating bar to engage the latch whereby the bar will be held out of operative position.

1,574,073. LOCKING DEVICE FOR SCALES. FREDERICK J. ENGLEN, Omaha, Nebr., assignor to Toledo Scale Company, Toledo, Ohio, a Corporation of New Jersey. Filed June 30, 1919. Serial No. 307,787. 12 Claims. (Cl. 265—55.)



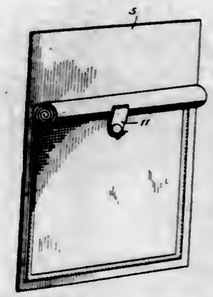
1. In a scale, in combination, weighing mechanism, including a steelyard rod, and clamping means engagable with said steelyard rod to hold said rod in any weighing position.

1,574,074. CHANNEL PILOT. REGINALD A. FESSENDEN, Chestnut Hill, Mass. Filed Mar. 21, 1921. Serial No. 454,057. 2 Claims. (Cl. 177—385.)



2. The method of determining the location of a current carrying cable with respect to a piloted vehicle which consists in generating at two spaced points on said vehicle currents which are in phase but opposite in direction and which preponderate in potential according as to which point is nearer to the cable, causing said currents to oppose each other in a common circuit, introducing into said circuit a potential variable in direction and amount, varying the potential so as to neutralize the preponderating effect of one coil over the other to reduce the current in the circuit to zero and producing an indication corresponding in direction and amount to the amount of change in potential required to reduce the current to zero to give a corresponding indication as to the relative position of the vehicle and cable.

1,574,075. WATER TEMPERATURE REGULATOR AND PRESSURE-CONTROL VALVE. JOSEPH C. FISCHER, Milwaukee, Wis. Filed Aug. 27, 1923. Serial No. 659,618. 10 Claims. (Cl. 236—80.)

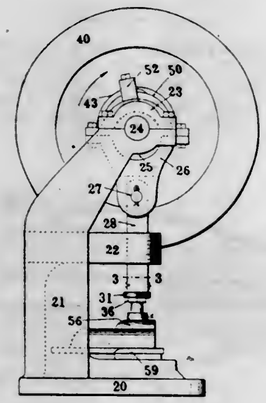


1. In a device of the character described, a member having an inlet, a main outlet and an auxiliary discharge outlet, valve means normally closing said auxiliary discharge outlet, said inlet and main outlet communicating whereby fluid may flow from the inlet to the main outlet, means in said member and sensitive to temperature changes, and means operable upon the temperature of the fluid flowing through said member exceeding a predetermined degree to open said valve means and permit the fluid to flow through said auxiliary outlet.

1,574,076. HIGH-VOLTAGE CABLE AND METHOD OF MAINTENANCE. HENRY W. FISHER, Perth Amboy, N. J., assignor to Standard Underground Cable Company, Pittsburgh, Pa., a Corporation of Pennsylvania. Filed Feb. 5, 1925. Serial No. 6,925. 8 Claims. (Cl. 173—264.)

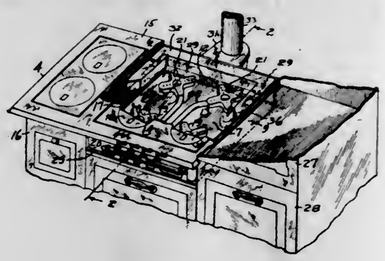
1. In a cable structure the combination of a conductor, an envelope of permeable insulation surrounding the conductor, an impermeable sheath surrounding the whole, the opposite surfaces of the envelope of insulation being accessible to a stream of liquid insulating material, a conduit for liquid leading to the envelope of insulation over one of the opposite surfaces thereof, and a body of liquid insulating material under pressure filling the said envelope of permeable insulation and the approach thereto through said conduit.

1,574,077. WATERPROOF POCKET. ERNST FRANTZ, Newark, N. J. Filed Apr. 13, 1925. Serial No. 22,532. 3 Claims. (Cl. 2—252.)



1. A pocket for garments including front and back portions, a flap formed on one of said portions, and a normally coiled resilient plate carried by said flap and extending coincident with a part of the latter portion for causing said flap and said part to normally assume a coiled condition to form a rolled closure for the opening in said pocket.

1,574,078. SHOE-WORKER'S PRESS. ALBERT F. FROUSSARD, St. Louis, Mo. Filed Mar. 14, 1924. Serial No. 699,195. 11 Claims. (Cl. 12—51.)



1. In a device of the class described, the combination with a plunger provided with a recess in its lower end,

of mechanism for intermittently actuating said plunger, an internally threaded collar rotatably mounted in said recess, means for preventing the longitudinal movement

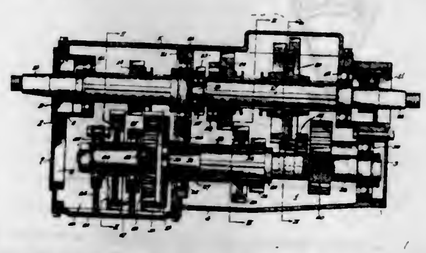
of said collar relative to said plunger, a threaded stem engaging said collar, and means for preventing the rotation of said stem relative to said plunger.

1,574,079. AIR FEED AND VENT FOR CLOSED-TOP GAS STOVES. JOSEPH B. GARDNER, Oakland, Calif., assignor to Hammer-Bray Company, Oakland, Calif., a Corporation of California. Filed May 11, 1925. Serial No. 29,365. 9 Claims. (Cl. 126—39.)

1. In a stove provided with a closed top-gas-burner chamber, front and rear top-gas-burners in said chamber, means at the front and rear of said chambers, through which fresh air may be introduced into the chamber, and means through which the burned gases from said chamber may be discharged therefrom intermediate the front and rear of the chamber.

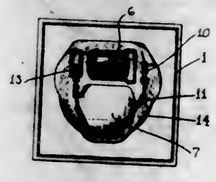
1,574,080. APPARATUS FOR PUMPING DEEP WELLS. LEROY G. GATES, Bakersfield, Calif., assignor to Standard Oil Company, San Francisco, Calif., a Corporation of California. Filed Feb. 25, 1925. Serial No. 11,483. 10 Claims. (Cl. 103—179.)

1. An apparatus for pumping wells comprising a member adapted to be positioned within a well and having a fluid passage extending therethrough; a pump separably associated with said member and adapted to draw the well fluid through said passage and to discharge it into a column of fluid extending upwardly from said member; a valve in said passage for supporting said fluid column



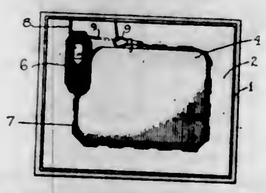
above said member when the pump is separated therefrom; and means for automatically opening said valve when the pump is associated with said member.

1,574,081. APPARATUS FOR PUMPING DEEP WELLS. LEROY G. GATES, Bakersfield, Calif., assignor to Standard Oil Company, San Francisco, Calif., a Corporation of California. Filed Feb. 25, 1925. Serial No. 11,484. 8 Claims. (Cl. 103—179.)



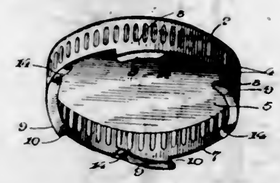
1. An apparatus for pumping oil wells, comprising a tubing string positioned within a well and adapted to conduct the pumped oil to the surface, a member connected with the lower end of said tubing string and having a substantially vertically disposed passage therethrough, supporting means carried by said member for releasably gripping the well casing, a pump separably associated with said member and adapted to draw the oil through said passage and to discharge it into said tubing string, and a valve carried by said member for supporting the column of pumped oil within said tubing string when the pump is separated from said member.

1,574,082. TWO-RANGE TRANSMISSION MECHANISM. JOHN C. HAGGART, Jr., Alma, Mich., assignor, by mesne assignments, to Detroit Patents Holding Company, Detroit, Mich., a Corporation of Michigan. Filed May 19, 1924. Serial No. 714,250. 5 Claims. (Cl. 74—58.)



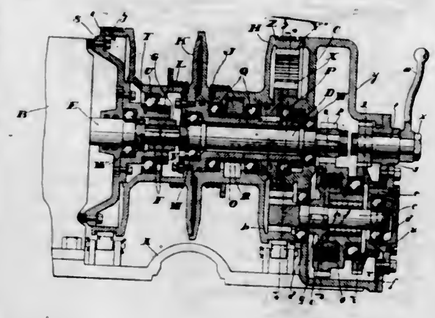
1. In a power transmission, change speed and reverse gear mechanism wherein a plurality of speeds are attainable, a gearing comprising a driven shiftable gear, drive gears, and a compound gear having internal and external gear portions, one of said drive gears meshing with the internal portion of said compound gear, and said shiftable gear being adapted to mesh with the other drive gear or the external portion of said compound gear.

1,574,083. DISPLAY RECEPTACLE. HARRY A. HAMILTON, Rochester, N. Y., assignor to Hickok Manufacturing Company, Inc., Rochester, N. Y., a Corporation of New York. Filed Dec. 11, 1923. Serial No. 680,053. 3 Claims. (Cl. 211—28.)



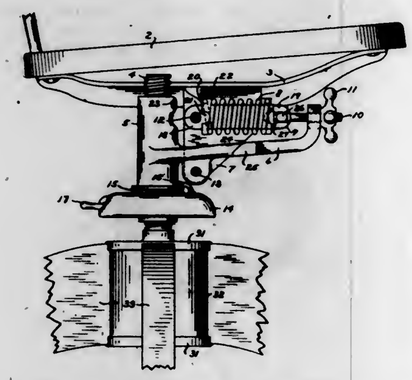
1. The combination with a box member, a post rigid with and rising from the bottom of said structure in spaced relation to the sides thereof, a base member supported on the post in spaced relation to the bottom of the box and projecting beyond the sides of the latter, and means for securing a belt buckle to said base member.

1,574,084. DISPLAY RECEPTACLE FOR A BELT SLIDE WITH AN ATTACHED CHAIN. HARRY A. HAMILTON, Rochester, N. Y., assignor to Hickok Manufacturing Company, Inc., Rochester, N. Y., a Corporation of New York. Filed Dec. 11, 1923. Serial No. 680,054. 2 Claims. (Cl. 211—28.)



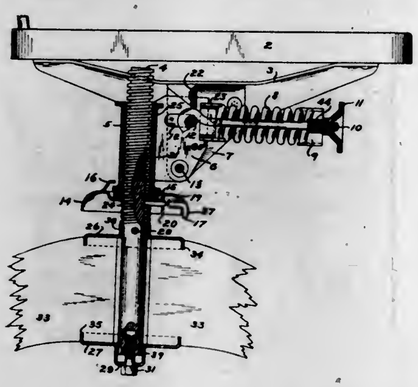
1. A display receptacle for a belt slide with chain attached, comprising a horizontal base member, a projection rigid with and rising from the base member, means for securing to the base member the free end of a chain passed about the projection, and means for securing the slide to the base member to one side of the projection.

1,574,085. METAL CAP. CHARLES HAMMER, Hollis Court Boulevard, Queens County, N. Y. Filed Feb. 2, 1925. Serial No. 6,197. 4 Claims. (Cl. 215—44.)



1. A metal cap or closure comprising a top having a depending skirt provided at intervals with depending wedge-shaped extensions having a part thereof bent inwardly to form inwardly extending locking lips, each inclined in the direction of its length throughout the major portion thereof with the forward entering end spaced from and below the edge of the skirt and its rear end terminating at the edge of the skirt, the rear end of a locking lip terminating in a stop face.

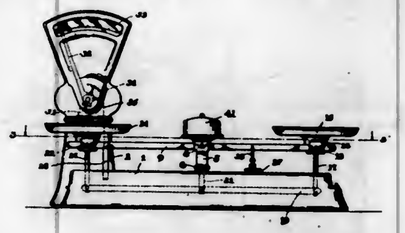
1,574,086. DOUBLE-DRUM HOIST. CHARLES C. HANSEN, Easton, Pa., assignor to Ingersoll-Rand Company, Jersey City, N. J., a Corporation of New Jersey. Filed Sept. 16, 1925. Serial No. 56,652. 3 Claims. (Cl. 254—185.)



1. In a hoist, the combination of a frame, a driving shaft supported at one end by the frame, drums rotatable about said driving shaft, one of said drums supporting the other end of said driving shaft, a motor adapted to run in only one direction and connected to the driving shaft, drum drivers in the form of spur gears carried by the drums and rotatable in the same transverse plane, main drivers constantly meshing with the drum drivers, friction disc clutches associated with the main drivers, and manually operable oscillatory means for tightening one clutch to connect one of the drums with the driving shaft and simultaneously releasing the other clutch for disconnecting the other drum from the driving shaft.

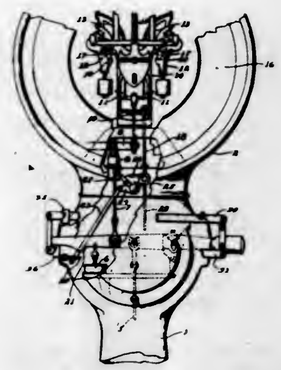
1,574,087. CHAIR SPRING. OSWALD H. HANSEN, Port Washington, Wis., assignor to Gilson Manufacturing Company, Port Washington, Wis., a Corporation of Wisconsin. Filed Apr. 16, 1921. Serial No. 461,929. 12 Claims. (Cl. 155—77.)

1. A spring for tilting chairs comprising, a helical compression spring having substantially circular coils, and a tension member engaging each end coil of said spring, each of said members abutting an extreme end of said spring to prevent rotative movement of said spring about its longitudinal axis.



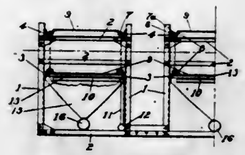
1,574,088. CHAIR. OSWALD H. HANSEN, Port Washington, Wis., assignor to Gilson Manufacturing Company, Port Washington, Wis., a Corporation of Wisconsin. Filed Nov. 28, 1921. Serial No. 518,244. 10 Claims. (Cl. 155—77.)

1. In a chair, an upright post, a yoke comprising a hub freely rotatable about said post and a plate extending away from said hub, said hub being formed in sections one of which is formed integral with said plate, and a seat supported on said plate.



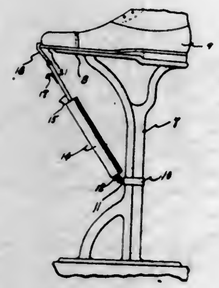
1,574,089. SCALE. CLARENCE H. HAPGOOD, Toledo, Ohio, assignor to Toledo Scale Company, Toledo, Ohio, a Corporation of New Jersey. Filed Apr. 5, 1920. Serial No. 371,403. 7 Claims. (Cl. 265—62.)

1. In a scale, in combination, a frame, a single laterally extending lever fulcrumed thereon, a commodity-receiver and a poise-receiver on said lever on opposite sides of its fulcrum, automatic load-counterbalancing mechanism connected to said lever, a chart at the rear of and facing



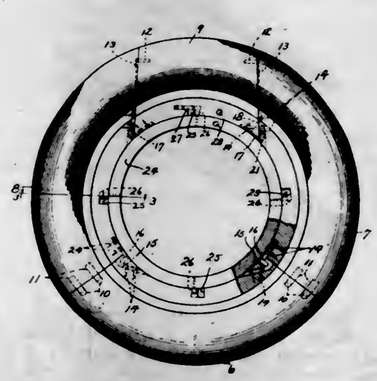
said commodity-receiver, and an indicator connected to said load-counterbalancing mechanism and movable over said chart.

1,574,090. WEIGHING SCALE. HALVOR O. HEM, Toledo, Ohio, assignor to Toledo Scale Company, Toledo, Ohio, a Corporation of New Jersey. Filed June 13, 1921. Serial No. 477,150. 11 Claims. (Cl. 265—62.)



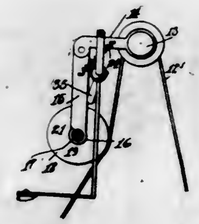
1. In a weighing scale, in combination, automatic weighing mechanism, a beam lever connected thereto, beams mounted upon said beam lever, and adjustable means for varying the height of said beams with respect to said beam lever.

1,574,091. APPARATUS FOR MAKING CARBON OR LAMPBLACK. OLIVER D. HORTON, Erie, Pa. Filed Dec. 30, 1922. Serial No. 609,815. 5 Claims. (Cl. 134—60.)



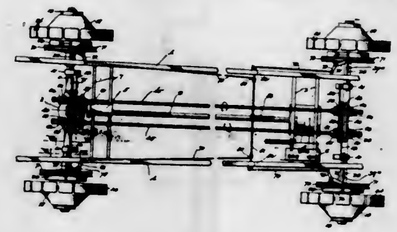
1. In a carbon or lamp black making apparatus, the combination of an endless carrier; comprising deposit surfaces; a plurality of burners directing their flame against said surfaces; and a plurality of scrapers, one scraper between each burner operating on the surfaces.

1,574,092. SHOE-PEDESTAL ATTACHMENT. VALGENE HOWARD, Flint, Mich. Filed Apr. 6, 1925. Serial No. 21,007. 2 Claims. (Cl. 15—207.)



1. A shoe pedestal attachment of the class described comprising a sleeve closed at one end; a spiral spring mounted in said sleeve and having one end projected through said closed end of said sleeve said projected end having a hook formed thereon; means on said pedestal for engaging said hook in pivotal relation; a stem slidably mounted in said sleeve and attached at its inner end to the other end of said spring; a collar fixedly mounted on said stem, normally positioned in said sleeve and adapted for engaging with its periphery the inner surface of said sleeve, the outer end of said stem being bifurcated; a yoke pivotally mounted between said bifurcations, the ends of the arms of said yoke being angularly turned to form gripping members and adapted for engagement with the sole of the shoe placed on said pedestal for exerting downward pressure on said sole.

1,574,093. TIRE CORE. VICTOR H. HURT, Fort Madison, Iowa. Filed July 2, 1921. Serial No. 482,113. 10 Claims. (Cl. 18—45.)

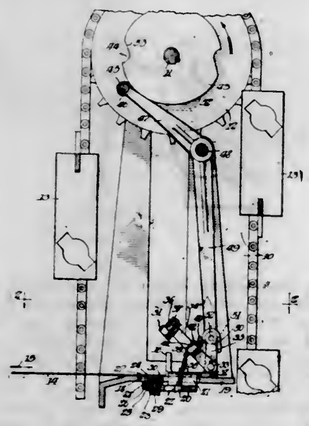


1. A tire core comprising a plurality of arc-shaped members in abutting relations, interlock hooks rigidly attached to adjacent ends of said sections locking the latter in annular form, and means disposed in adjacent ends of said arc-shaped members for restraining lateral movement of such members relative to each other at the outer periphery of said tire core.

1,574,094. WINDSHIELD CLEANER. CLYDE E. ILER, Avon, N. Y. Filed June 17, 1924. Serial No. 720,637. 1 Claim. (Cl. 74—21.)

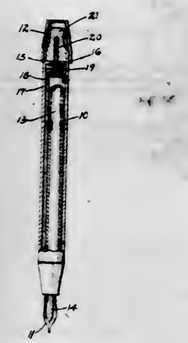
A power transmitting device, in combination with a power shaft and its supporting bracket, of a clamp mounted on the bracket, a depending arm movably mounted on the clamp, the power shaft having a belt, a belt engageable wheel on the outer end of the depending arm, a spring between the arm and clamp whereby to normally maintain the wheel engaged with the belt, a standard adjacent the arm, a rock shaft carried by the standard, means for rocking the shaft, and a radial arm on the rock shaft disposed for engagement with the depending arm whereby to swing said arm and disengage the wheel from the belt.

1,574,095. ELECTRIC GENERATOR FOR MOTOR VEHICLES. JOHN JOKISCH, Detroit, Mich. Filed May 4, 1925. Serial No. 27,658. 8 Claims. (Cl. 180—54.)



1. The combination of a vehicle chassis, front and rear axle assemblies, each axle assembly including axles, an electric motor adapted to drive the axles of the rear axle assembly, storage batteries adapted to supply electrical energy to said motor, wheels on the axles of each assembly, radially shiftable tread members carried by each wheel, a reciprocable casing in each wheel adapted to be reciprocated by movement of said tread members, an electric generator adapted to supply electric energy to said motor and storage batteries, longitudinal shafts extending from the rear axle assembly to the front axle assembly and adapted to operate said generator and ratchet mechanisms at the front and rear axle assemblies actuated by the reciprocable casings of said wheels adapted for driving said shafts.

1,574,096. PACKAGE-IDENTIFICATION APPARATUS. EMIL G. JURGENS, Chicago, Ill., assignor to Peters Machinery Company, Chicago, Ill., a Corporation of Illinois. Filed Oct. 10, 1921. Serial No. 506,623. 7 Claims. (Cl. 101—297.)

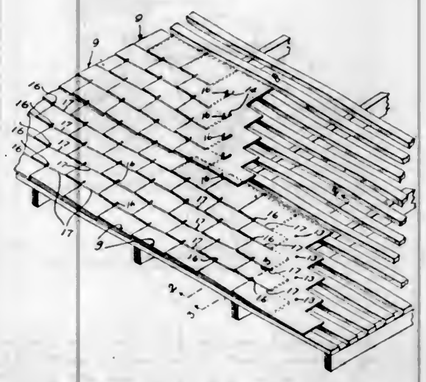


1. A carton-forming machine provided with means for forming a carton from a single blank, an anvil member

having marking devices on one face thereof and a hammer member co-acting with the operative face of said anvil

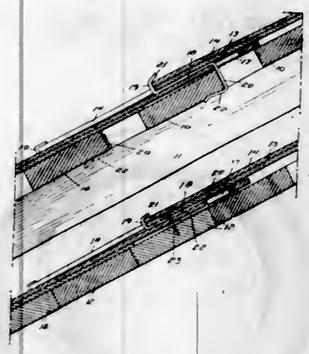
to operate upon a portion of the carton, said anvil member being equipped with changeable indicia, and means for actuating said hammer.

1,574,097. FOUNTAIN PEN. HARRY MITCHELL KOENIG, Milwaukee, Wis. Filed May 17, 1924. Serial No. 714,066. 4 Claims. (Cl. 120—46.)



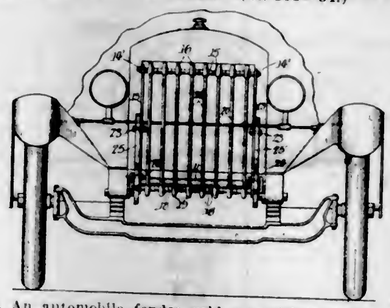
1. In a fountain pen a casing, a flexible ink reservoir in said casing, a compressor in said casing, said casing being formed with a slot through which said compressor extends, said compressor being formed with a bifurcated diverging portion adjacent said slot whereby a longitudinal displacement of said compressor causes it to engage said reservoir.

1,574,098. ROOFING MATERIAL. BERNIE C. KRIDLER, Chicago, Ill., assignor to Campbell Wire Specialty Works, South Bend, Ind., a Corporation of Indiana. Filed Aug. 21, 1924. Serial No. 733,279. 3 Claims. (Cl. 108—8.)



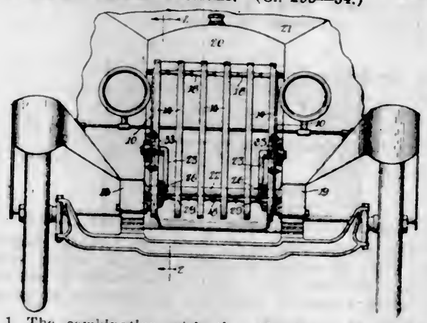
1. Roofing material comprising a plurality of roofing sections, said sections having shingle-like exposed edges

cent in inner angles and disposed in inclined relation to the horizontal plane of the roof, said sections having perforations for receiving fastening members, said per-



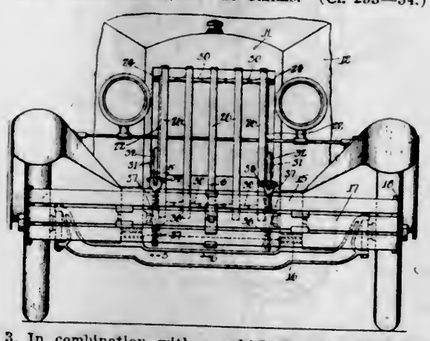
forations being disposed to coincide with the inner angles of the exposed edges of the roofing section to be superimposed upon said perforated section.

1,574,099. SHINGLE. BERNIE C. KRIDLER, Chicago, Ill., assignor to Campbell Wire Specialty Works, South Bend, Ind., a Corporation of Indiana. Filed Mar. 21, 1925. Serial No. 17,344. 1 Claim. (Cl. 108—8.)



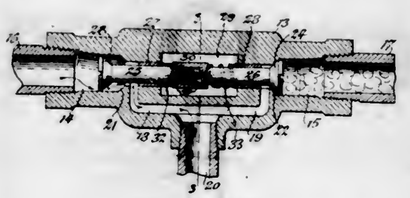
In a roofing construction, a series of shingle strips having a straight upper edge and a plurality of spaced overlaps extending from the weather edge with valley therbetween having flat bottoms parallel with the upper edge of said strip, said strips being provided with relatively long transverse elongated slots in the upper portions thereof and spaced inwardly of the upper edge of the strips, said slots being disposed exactly in the median plane of each overlap, and a series of fastening clips adapted for extension through said slots with their major portions lying between adjacent shingle layers and formed at opposite ends for engagement with a roof section and a plurality of upper successive shingle layers.

1,574,100. FRONT GUARD FOR AUTOMOBILES. ROBERT ROY MCGREGOR, Chicago, Ill. Filed May 7, 1925. Serial No. 28,537. 9 Claims. (Cl. 293—54.)



2. An automobile fender grid comprising vertical side bars, horizontal rods connecting the upper and lower ends of said bars and each formed centrally thereof with a transversely disposed socketed lug, and rods mounted at their upper and lower ends in said lugs.

1,574,101. FRONT GUARD FOR AUTOMOBILES. ROBERT ROY MCGREGOR, Chicago, Ill. Filed May 23, 1925. Serial No. 32,305. 5 Claims. (Cl. 293—54.)



1. The combination with the side frame bars of an automobile chassis, and a rod connecting and spacing the forward end portions thereof, of a substantially rectangular automobile fender grid, and a pair of rigid supporting arms attached at their upper ends to the side frame members of said grid and at their lower ends non-rotatably mounted on said rod.

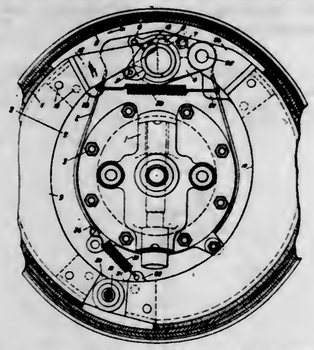
1,574,102. RADIATOR FENDER FOR AUTOMOBILES. ROBERT ROY MCGREGOR, Chicago, Ill. Filed May 25, 1925. Serial No. 32,578. 10 Claims. (Cl. 293—54.)

3. In combination with a vehicle bumper, a radiator fender horizontally hinged at its lower portion on said bumper, and means supporting said fender upright against thrusts tending to tilt the same rearwardly.

1,574,103. AUTOMATIC DRAINING DEVICE. WARREN E. MICHAEL, Buffalo, N. Y. Filed Dec. 31, 1924. Serial No. 759,212. 1 Claim. (Cl. 121—134.)

An automatic draining device for opposite ends of a steam engine cylinder, comprising two outlet chambers each adapted to be connected with one end of the engine cylinder and each provided with an outlet port and a valve seat around said outlet port, valves arranged in said chambers and each movable toward and from the respective valve seat for closing and opening the corresponding outlet port, a connection between said valves for causing one of said valves to open while the other closes consisting of valve stems arranged axially in line on said valves and projecting through said chambers to the exterior thereof and toward each other, a coupling sleeve having a screw connection with the outer ends of said stems, and springs each surrounding one of said stems and bearing at one end against said coupling sleeve and at its other end against the adjacent part of the corresponding outlet chamber.

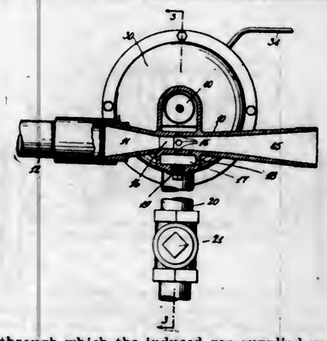
1,574,104. AGITATING DEVICE. JAMES MILES, Los Angeles, Calif. Filed Apr. 14, 1923. Serial No. 632,009. 2 Claims. (Cl. 259—134.)



2. An agitating device for mixing paint or the like in an open metallic receptacle, comprising a shaft devoid of guiding means, provided with means at its upper end for holding it up and rotating it on its axis, the lower end of said shaft being blunt to engage with, without penetrating, the bottom of the receptacle and having a blade pivotally mounted at its center of gravity to the lower end of the shaft, the pivotal connection of the blade operating to enable the blade to rotate on the axis of the pivotal connection when the shaft is held and rotated in a position inclined to the plane of the bottom of the receptacle, so as to maintain itself substantially in engagement with the bottom of the receptacle during the entire revolution of the shaft, and another blade pivotally secured to the shaft above the first named blade and disposed in a plane transverse to the plane of the lower blade, said blades cooperating to maintain the lower end of the shaft in a more or less central position in the receptacle.

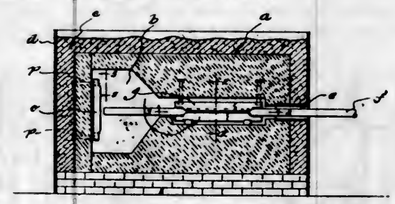
1,574,105. RIM-CUT TIRE CLAMP. AARON B. OVERHOLT, Three Rivers, Mich. Filed Sept. 23, 1925. Serial No. 58,143. 3 Claims. (Cl. 301—44.)

2. A device for preventing a blow-out in a rim cut tire including a pair of clamping members engaged with the sides of the tire at the cut, and means carried by the clamping members for drawing the members together whereby to exert transverse and vertical pressure on the tire.



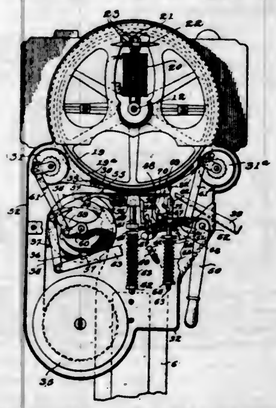
1,574,106. VEHICLE WHEEL BRAKE SHOE. HENRI PERROT, Paris, France. Filed Apr. 15, 1924. Serial No. 706,928. 15 Claims. (Cl. 188—250.)

5. A brake shoe having spaced parallel flanges at its end, and a separate part extending between the flanges and having oppositely-extending thrust shoulders engaging the ends of the flanges.



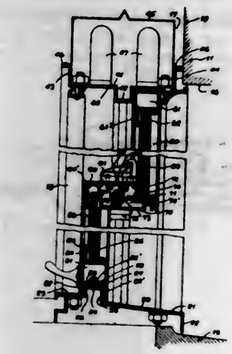
1,574,107. METHOD OF AND APPARATUS FOR MIXING AND PROPORTIONING GASES. ARTHUR W. PETERS, New York, N. Y., assignor to The Surface Combustion Co., Incorporated, New York, N. Y., a Corporation of New York. Filed Dec. 7, 1921. Serial No. 520,490. 5 Claims. (Cl. 158—119.)

1. The method of producing and supplying a mixture of gases in substantially constant proportions, which comprises supplying one of the gases under a relatively high pressure to serve as the inducing gas, changing some of the pressure energy of said gas to velocity energy with reduction of pressure and causing said gas flowing at low pressure and high velocity to pass from a passage of relatively small cross-section into a passage of gradually increasing cross-section wherein velocity energy of the gas is changed back into pressure energy, admitting the other gas supplied at a relatively low pressure to the edge of the stream of inducing gas at a point of relatively high velocity and low pressure slightly beyond the minimum cross-section of the passage through an inlet opening of excess size so that said other gas is drawn into the passage by induction, maintaining the pressure under which the induced gas is supplied substantially constant, varying the proportions of the inducing and induced gases in the mixture by adjusting a flow controlling



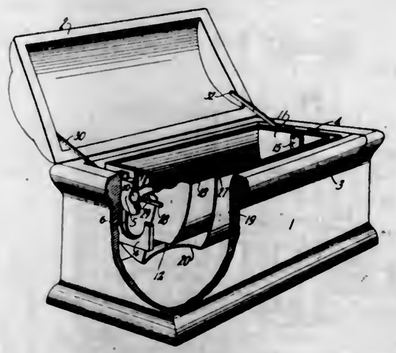
orifice through which the induced gas supplied under such constant pressure flows to said inlet opening, and varying the quantity of mixture supplied by varying the supply of the inducing gas.

1,574,108. ELECTRIC FURNACE. FREDOLF J. PETERSON, Detroit, Mich. Filed Mar. 16, 1925. Serial No. 15,795. 15 Claims. (Cl. 204—64.)



5. A heating element for an electric furnace, comprising a bar of resistance material provided with a longitudinal U-shaped groove running lengthwise of said bar in which a piece of stock may be positioned in spaced relation to be heated.

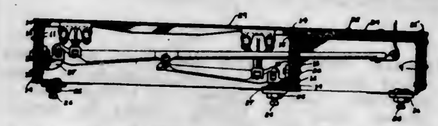
1,574,109. WEIGHING SCALE. ELMER C. POOL, New Castle, Pa., assignor to Toledo Scale Company, Toledo, Ohio, a Corporation of New Jersey. Filed Mar. 29, 1918. Serial No. 225,475. 4 Claims. (Cl. 265—37.)



1. A scale having a rotary indicating element resting on bearings in the framework of the scale, and electromagnets energized by alternating current arranged to relieve the bearings of a portion of its weight, whereby the alternations of the current tend to vibrate the indicating element.

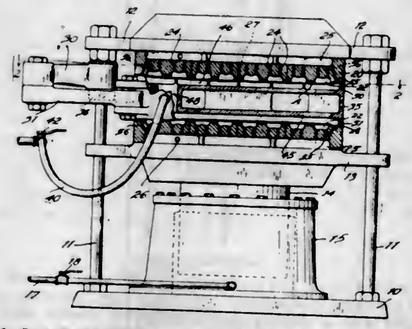
1,574,110. WINDOW CONSTRUCTION AND THE LIKE. JACOB A. RAPPAPORT, Brooklyn, N. Y., assignor to Reliance Fireproof Door Company, Brooklyn, N. Y., a Corporation of New York. Filed Oct. 26, 1922. Serial No. 596,986. 9 Claims. (Cl. 189—72.)

1. In a metal window frame, a window jamb comprising a main central web portion provided with a substantially centrally disposed channel one lateral wall of which is outwardly inclined, and an outer extension in the form of a transversely disposed flange provided with a channel in the inner face thereof.



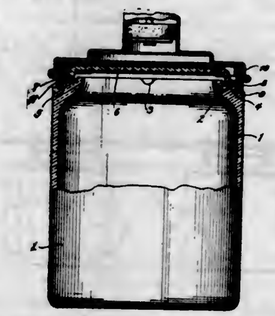
1,574,111. WATERROOF CONTAINER FOR BURIAL CASKETS. ELMER B. RARDON, Columbus, and HENRY H. RARDON, Newark, Ohio. Filed Nov. 25, 1922. Serial No. 603,323. 22 Claims. (Cl. 27—16.)

1. A burial casket comprising a rotatable corpse receiving member positioned within the casket.



1,574,112. FRAME. ORWELL C. REEVES, Toledo, Ohio, assignor to Toledo Scale Company, Toledo, Ohio, a Corporation of New Jersey. Filed Oct. 20, 1922. Serial No. 595,763. 8 Claims. (Cl. 265—71.)

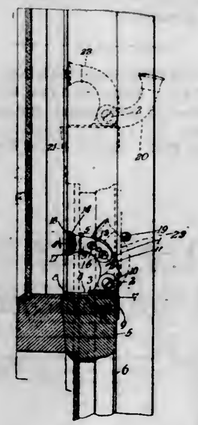
1. In a device of the class described, in combination, a plurality of connected walls each constructed of spaced sheets of metal, the space between the sheets of each wall being filled with concrete-like material, the upper edge of each wall being provided with a cover plate, said cover plate being retained in place by bolts passing



therethrough and having their shanks embedded in the concrete-like material, and gusset plates secured to said walls at their intersections.

1,574,113. APPARATUS FOR MAKING HOLLOW RUBBER ARTICLES. FRED THOMAS ROBERTS, Yonkers, N. Y., assignor to Paramount Rubber Consolidated, Inc., Tuckahoe, N. Y., a Corporation of Delaware. Filed Aug. 26, 1921. Serial No. 495,489. 32 Claims. (Cl. 18—19.)

1. In an apparatus for making hollow articles of plastic material, a mold having a mold cavity therein, a member having an open ended chamber adapted to be brought opposite the stock, said member having means for clamping the stock in a circuit about the mold indepndently of the edges of the cavity and means for supplying fluid pressure higher than atmospheric to the chamber to seat the stock in the cavity without wrinkling.

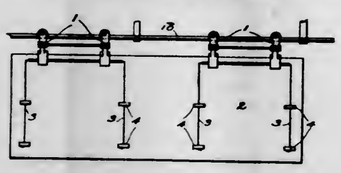


1,574,114. FRUIT JAR. SIDMOOR S. SAGER, Buffalo, N. Y. Filed May 20, 1924. Serial No. 714,579. 1 Claim. (Cl. 215—1.)

A container of the class described comprising a body portion having an annular surface constituting a sealing ring seat, a sealing ring seated on the annular surface constituting its seat, and a cover having a depending annular flange adapted to co-act with the sealing ring, the

body having a shoulder constituting a pump seat below the sealing ring seat and outside the exterior periphery of the cover, whereby a pump may be applied to said jar for exhausting the air therefrom.

1,574,115. WINDOW LOCK. MICHAL J. SASGEN and LOUIS SIMONSEN, Chicago, Ill., assignors to Grand Specialties Company, Chicago, Ill., a Corporation of Illinois. Filed July 2, 1923. Serial No. 649,031. 7 Claims. (Cl. 292—194.)

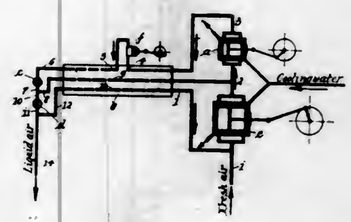


1. A window lock comprising a stiff strut adapted to be pivotally mounted upon the lower sash, the strut provided with a yielding pad for frictional contact with a part above the lower sash for preventing the free raising of the sash, and said strut being changeable as to length for fitting different windows.

1,574,116. PROCESS FOR MANUFACTURING IMPROVED VAT DYES. HERMANN SCHÖPFER, Graz, Styria, Austria, assignor to Felice Bensa, Genova, Italy. Filed Apr. 9, 1925. Serial No. 21,975. 2 Claims. (Cl. 260—56.)

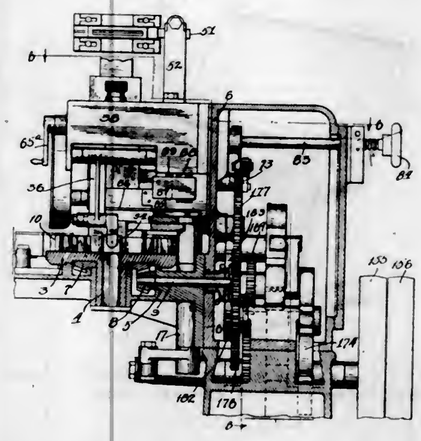
1. A process for manufacturing vat dyes consisting in that nitro derivatives of perylene are heated with aluminum chloride.

1,574,117. SPACER FOR PLASTER WALL BOARD. JOHN SCHUMACHER, Los Angeles, Calif. Filed Dec. 16, 1924. Serial No. 756,235. 5 Claims. (Cl. 34—26.)



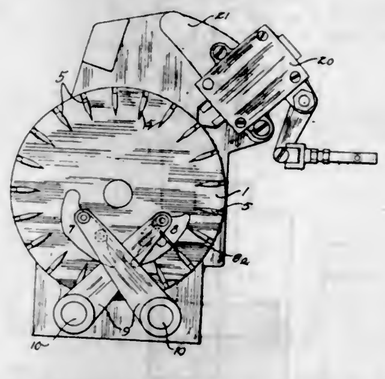
5. A spacing device for suspended sheets comprising a rod having a lateral bent at its upper end adapted to enter a holding socket, said bend being centrally enlarged transversely to form pivoting contacts with the socket whereby the spacer rod may automatically adjust itself transversely to hang centrally between the sheets, and spacing members carried by said rod.

1,574,113. PROCESS FOR THE PREPARATION OF INSECTICIDES. WILLIAM K. SCHWEITZER, Cleveland, Ohio, assignor to The Grasselli Chemical Company, Cleveland, Ohio, a Corporation of Ohio. Filed Sept. 29, 1924. Serial No. 740,634. 9 Claims. (Cl. 23—53.)



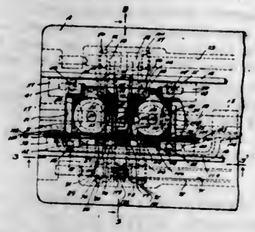
1. Process which comprises digesting an aqueous slurry containing dimanganoarsenate and a substantially non-alkaline metal compound capable of reacting with dimanganoarsenate to form only less soluble arsenates.

1,574,119. METHOD FOR THE LIQUEFACTION AND SEPARATION OF GASES WITH THE AID OF EXTERNAL WORK. ARTHUR SELIGMANN, Bremen, Germany. Filed Feb. 21, 1924. Serial No. 694,273. 2 Claims. (Cl. 183—115.)



1. A method for liquefaction and separation of gases with the aid of external work performance in which the total quantity of gas circulating in the apparatus is at first preliminarily cooled in counter current, then partly expanded in a machine in performing work, cooled further in counter current and finally completely expanded by simple throttling.

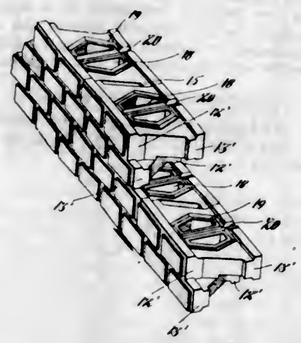
1,574,120. CARAMEL-WRAPPING MACHINE. WALTER H. SERGENT, Middletown, N. Y., assignor to Ideal Wrapping Machine Company, a Corporation of New York. Filed Jan. 9, 1922. Serial No. 527,828. 11 Claims. (Cl. 93—7.)



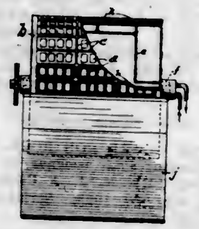
1. In a candy wrapping machine, the combination with a caramel wrapping wheel, of ejector mechanism therefor, a shaft for supporting said wheel, a Geneva gear on said shaft, a Geneva gear driver, a shaft for supporting said driver, a spur gear on said shaft, a cam gear meshing with said spur gear and having a cam groove, a cam lever operatively associated with said groove, means connecting said cam lever and ejecting mechanism, said cam gear operating said lever and Geneva gear driver in timed relation.

1,574,121. FORMING MECHANISM. WALTER H. SERGENT, Middletown, N. Y., assignor to Ideal Wrapping Machine Company, a Corporation of New York. Original application filed Jan. 9, 1922, Serial No. 527,828. Divided and this application filed Dec. 28, 1923. Serial No. 683,139. 6 Claims. (Cl. 107—21.)

2. In a caramel wrapping machine, a cutter disk, and a presser foot cooperating therewith, provided with a fiber insert, for the purpose described.



1,574,122. SHUTTLE-SHIFTING MEANS FOR SEWING MACHINES. RALPH M. SHARAF, New York, N. Y., assignor to R. M. Sharaf Machine Co., Boston, Mass., a Corporation of Massachusetts. Filed Apr. 2, 1917. Serial No. 159,060. Renewed Nov. 3, 1921. Serial No. 512,571. 14 Claims. (Cl. 112—163.)



1. An adjustment means for sewing machines, comprising a plurality of looper hooks, saddles therefor having slots, bolts supported by the frame of the machine passing through the slots of the said saddles, means on the said bolts supporting said saddles adjacent to the frame, said means permitting movement of said saddles, and means for tightening the engagement of said last named means with said saddles to secure the said saddles against movement.

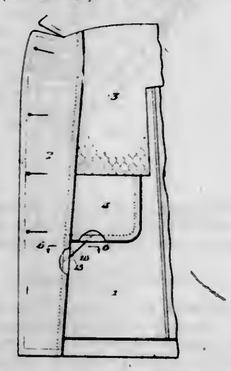
1,574,123. INTERLOCKING MULTIPLE BRICK. HARRY SHARPE, Watertown, Mass. Filed June 7, 1923. Serial No. 643,861. 4 Claims. (Cl. 72—41.)

1. A block having its faces at its ends presenting step formations, the step formation adjacent to opposite side faces at the same end being reversed, and end faces inclined in reverse directions in the upper and lower portions of the block joining said step formations, said inclined faces being set inwardly from said step formations thus to provide a pair of diagonally arranged projecting portions at each end of said block, said projecting portions at opposite ends being of substantially the same size.

1,574,124. PROCESS AND APPARATUS FOR MAKING GASKETS. CHARLES FREDERIC SHERWOOD, San Francisco, Calif., assignor of one-half to Lyndon E. Adams, Philadelphia, Pa. Filed Oct. 25, 1922. Serial No. 596,733. 4 Claims. (Cl. 92—42.)

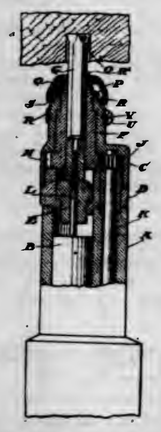
1. The process of manufacturing gaskets of the type described which comprises flowing a sludge, containing a liquid constituent and a solid constituent, against a mold surface, in part wholly impermeable and in part permeable by only the liquid constituent under the influence of vacuum, whereby the solid constituent builds up only on the permeable surface, thereby shaping the material into the form of a finished gasket, releasing the vacuum, and then forcibly passing air through the relatively moist gasket thus formed to drive off liquid from and consolidate the solid material.

1,574,125. WEFT CARRIER. OLIVER SHIMWELL, Gawsworth, England. Filed Sept. 2, 1924. Serial No. 735,432. 3 Claims. (Cl. 139—125.)



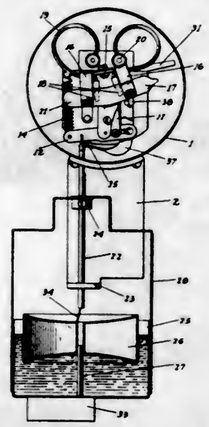
1. A weft carrier for shuttleless looms, comprising a body part, two weft thread engaging hooks facing in opposite directions secured to the upper surface of the said body, and means whereby the thread engaged by said hooks is directed beneath the said body and pressed upon it by its under surface.

1,574,126. WATER-LAID FELT. HENRY PHILIP SHOPNECK, Dorchester, Mass., assignor to John J. Daly, West Newton, Mass. Filed Nov. 4, 1925. Serial No. 66,860. 6 Claims. (Cl. 92—3.)



1. A box toe material, consisting of a fibrous pulp and a relatively longer vegetable fibre of the class described distributed throughout the mass in felted relation therewith and impregnated with a thermo-plastic binder.

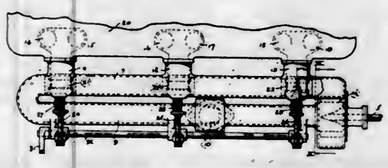
1,574,127. WEARING APPAREL. JACOB SIEGEL, Philadelphia, Pa. Filed Aug. 26, 1925. Serial No. 52,519. 6 Claims. (Cl. 2—93.)



2. A garment of the class described, comprising an outer fabric structure, an inner fabric structure arranged to be engaged with said outer fabric structure and having an angular corner formed therein, and a triangular reinforcement disposed in the angle of said corner and having two of its sides secured to said inner fabric structure and its free side secured to said outer fabric structure.

1,574,128. WATER GUARD FOR ROCK DRILLS. FRED M. SLATER, Easton, Pa., assignor to Ingersoll-Rand Company, Jersey City, N. J., a Corporation of New Jersey. Filed Sept. 10, 1923. Serial No. 661,791. 1 Claim. (Cl. 121—6.)

A rock drill comprising a cylinder, a hammer piston within the cylinder, a front head for the cylinder, a chuck within the front head adapted to receive a drill steel, said chuck being grooved at its ends, a shroud in the form of a disk placed over the end of the chuck beneath said groove, a split ring in the groove holding the shroud in place, a removable water guard in the form of a split cap having rearwardly directed apertures in its sides, located over the end of the front head, whereby the stroud within the cap may be removed by removing the cap.

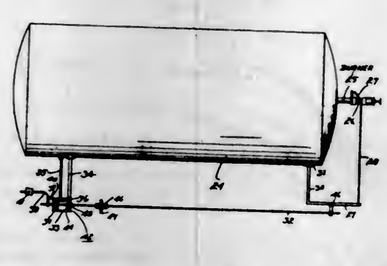


1,574,129. SAFETY SWITCH FOR OIL-BURNING SYSTEMS. IRA EDWARD SMITH, Stockton, Calif. Filed May 11, 1925. Serial No. 29,386. 14 Claims. (Cl. 200—84.)

1. A safety switch for oil burners comprising a bowl to receive excess oil, switch contact means, means removably supporting the bowl in freely suspended relation, and means between said supporting means and the contact means, whereby when the bowl is empty the contact means will be closed; and when said bowl either contains a certain amount of oil or is removed from the supporting means, the contact means will be opened.

9. A safety switch for oil burners comprising a bowl arranged for vertical movement and adapted to receive excess oil, switch contact means, means for mounting the bowl in connection with the contact means, means whereby when the bowl is empty the contact means will be closed, and when the bowl moves down with the added weight of an amount of oil therein the contact means will be opened, a float in the bowl, and means actuated by the rising of the float in the bowl for opening the contacts and functioning only when the bowl is held from downward movement.

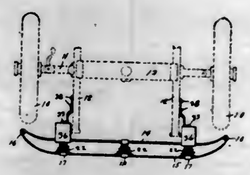
1,574,130. MANIFOLD AND METHOD OF SUPPLYING EXPLOSIVE MIXTURES TO INTERNAL-EXPLOSION ENGINES. JAY M. SMITH, San Francisco, Calif. Filed Aug. 20, 1923. Serial No. 658,211. 3 Claims. (Cl. 123—52.)



1. In combination with an internal explosion engine an inlet manifold having a return passage adapted to continuously circulate explosive mixture and inlet and outlet connections to said passage an impeller interposed into said passage to force the circulation of said mixture

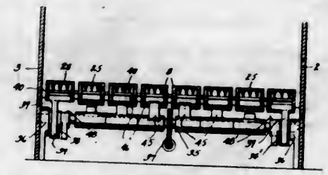
independent of the engine demands, inlet and outlet connections to said manifold and throttling means interposed in said outlet and operating connections for said throttling means and a constricted throat located within said passage adapted to deliver circulating mixture at increased velocity adjacent the said inlet.

1,574,131. METHOD OF MAKING STEEL, IRON, AND OTHER METAL PLATES. SAMUEL T. G. SMITH, St. Louis, Mo. Filed June 1, 1925. Serial No. 34,170. 3 Claims. (Cl. 148—4.)



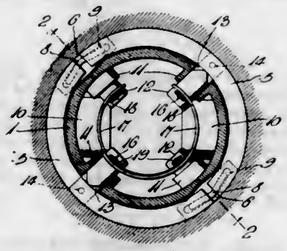
3. The method of preventing adhesion of metallic plates or sheets which consists in placing a quantity of barytes upon the surfaces of the plates or sheets when the plates or sheets are being rolled or annealed.

1,574,132. TEMPERATURE REGULATOR. ELMER D. SMYSER, Fellows, Calif. Filed Nov. 5, 1923. Serial No. 672,988. 3 Claims. (Cl. 236—20.)



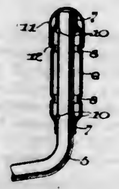
1. A device of the character described in combination with burner heated apparatus including a valve for controlling the burner and a container for a fluid which is heated by the burner, which container is subject to expansion and contraction, means of connection between the container and valve providing for closing and opening of the valve on expansion and contraction of said container and means acting coincident to variation in the pressure of the fluid in said container to operate said means of connection and open and close the valve.

1,574,133. AUTOMOBILE BUMPER. JOHN W. STAFFORD, Portland, Oreg. Filed Mar. 25, 1925. Serial No. 18,098. 5 Claims. (Cl. 293—55.)



1. In an automobile bumper, the combination of a single spring back bar; a double spring front bar hinged at its ends to said back bar; helical springs between said front and rear bars; brackets slidably supporting said bumper in front of an automobile, said brackets having compression springs mounted thereon adapted to urge said bumper forwardly and of greater strength than the combined strength of said spring bars and said helical springs.

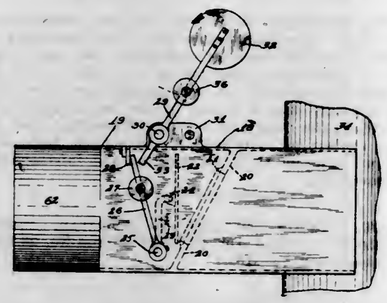
1,574,134. GRATE. JOSEPH S. STOGDALE, Dunbar, Pa., assignor of one-half to James M. Raine, Rainelle, W. Va. Filed Feb. 4, 1924. Serial No. 690,400. 3 Claims. (Cl. 126—152.)



1. The combination with a fire box and transversely located grate supporting beams of a grate comprising a plurality of parallel fire bars mounted on the supporting beams for longitudinal shifting, a cam shaft, cams in said shaft for shifting the two outside bars forwardly and rearwardly, means carried by the two outside bars for moving the intermediate bars forwardly after a certain amount of movement of the outside bars and means on the cam shaft for shifting the intermediate bars rearwardly.

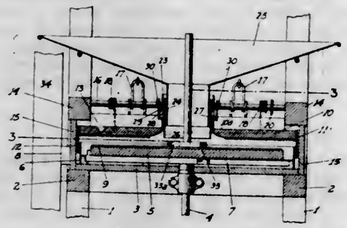
1,574,135. PISTON. MICHAEL H. SULLIVAN, Poughkeepsie, N. Y. Filed Apr. 29, 1925. Serial No. 26,758. 2 Claims. (Cl. 74—109.)

1. In a piston construction, the combination of a hollow piston provided with a packing ring groove in its outer wall, hollow bosses extending inwardly from the inner wall of said piston, said bosses being diametrically disposed and communicating with said groove, a packing ring disposed in said groove and composed of sections, plungers disposed in said bosses and connected to the sections of said ring, and a curved spring following the inner contour of said cylinder and having its ends connected to the inner ends of said plungers.



1,574,136. TOOL GRIP. HERBERT TAUTZ and FRANK E. DION, Milwaukee, Wis., assignors to American Grinder Manufacturing Company, Milwaukee, Wis., a Corporation of Wisconsin. Filed May 15, 1922. Serial No. 561,030. 1 Claim. (Cl. 145—66.)

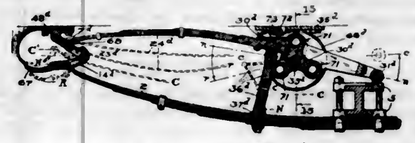
The combination, with a tool handle, of a pressed metal tubular one-piece hand-grip rotatably mounted on the handle and provided with reduced tubular end portions and an annular groove adjacent one end, a cap in



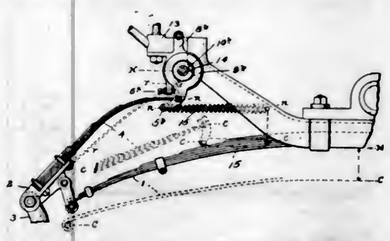
end thrust engagement with said handle and having an annular edge extending into said groove, and spaced stop projections on the handle and disposed within the grip adjacent said end portions for positioning said grip on the handle.

1,574,137. METHOD OF AND APPARATUS FOR COLLECTING, REFINING, AND UTILIZING BY-PRODUCTS FROM METALS TREATED IN RETORTS. HENRY W. TUTTLE, Chicago, Ill. Filed Sept. 5, 1922. Serial No. 586,061. 15 Claims. (Cl. 266—19.)

1. The process of recovering by-products from retort gases and fumes which consists in collecting and directing the gases and fumes from the retorts through a gas filter and passageway closed to the admission of air, depositing the precipitated solid content from the gases and fumes in said filter and withdrawing the gases from the filter and passageway without oxidizing the gases and fumes by mixing with air.



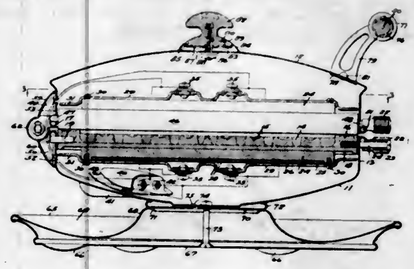
1,574,138. ALMOND HULLER AND SHELLER. LOUIS K. VAUGHAN, Woodland, Calif. Filed Sept. 23, 1924. Serial No. 739,295. 5 Claims. (Cl. 83—37.)



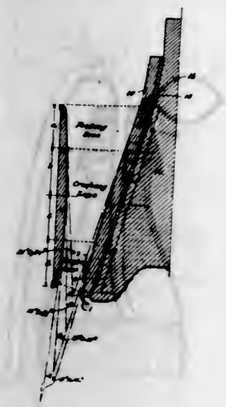
1. A huller including vertically spaced discs between which the produce to be hulled passes, spring means acting to force the upper disc toward the lower one, flexible members under tension secured to said upper disc independent of the springs and resisting the action of the springs, and means for raising and lowering said members at will.

1,574,139. SPRING SUSPENSION FOR VEHICLES. FRANK L. O. WADSWORTH, Pittsburgh, Pa. Filed Feb. 21, 1921. Serial No. 446,579. 40 Claims. (Cl. 267—9.)

1. A shock absorber organization for two relatively movable members which comprises a primary spring unit, a secondary spring unit, and means conjoining said members with said springs whereby the latter may act successively in series and in parallel to elastically resist movement in either direction from static balance.

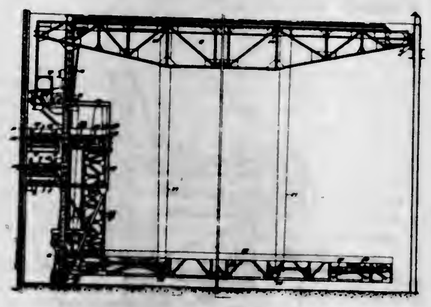


1,574,140. SHOCK-ABSORBING SUSPENSION SYSTEM. FRANK L. O. WADSWORTH, Pittsburgh, Pa. Filed Apr. 11, 1922. Serial No. 551,674. 18 Claims. (Cl. 267—9.)



1. In a suspension system for two relatively movable members the combination of an arm flexibly connected to one of the said members, a link support pivotally mounted on the other member, a spring operatively connected at one end to the said arm and at the other end to the said link, and a stop for holding the link in fixed position with respect to its mounting when the said members are separated beyond normal load position.

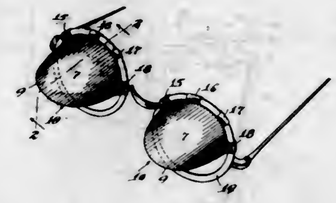
1,574,141. WAFFLE IRON. WILLIAM W. WEIR, Alameda, Calif., assignor to Majestic Electric Appliance Company, Incorporated, San Francisco, Calif., a Corporation of California. Filed Feb. 21, 1924. Serial No. 694,232. 13 Claims. (Cl. 219—19.)



5. In an electric cooking utensil, a receptacle, a hollow double-walled metallic base for said receptacle, the upper wall of said base having a projection serving as a support for said receptacle, and a plate on said projection having a thin band of contact with the projection, said plate having a curved portion arranged to contact with the bottom of the receptacle, whereby only a thin band of contact is provided between the plate and the receptacle.

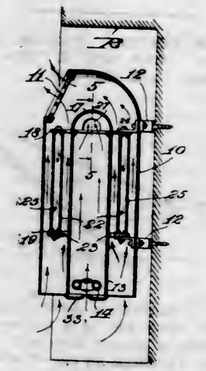
1,574,142. GYRATORY CRUSHING MACHINE. WILLIAM S. WESTON, Columbia, S. C. Filed Mar. 15, 1923. Serial No. 625,357. 3 Claims. (Cl. 83—10.)

1. In a gyratory crushing machine, in combination, a sleeve-like concave and a substantially frustro-conical crushing mantle within the concave, the crushing surfaces of the concave and mantle being convex in vertical section.



1,574,143. CONVEYER SYSTEM. CLARENCE WHITE, San Francisco, Calif. Filed Apr. 1, 1925. Serial No. 19,981. 27 Claims. (Cl. 198—81.)

1. In a conveyer system, a main conveyer, a distributor conveyer, a horizontally adjustable frame on which said distributor conveyer is mounted, a trailer, means associated with said trailer for removing articles from said main conveyer, apd means connected to said trailer and said frame for conveying articles between said trailer and said distributor conveyer.

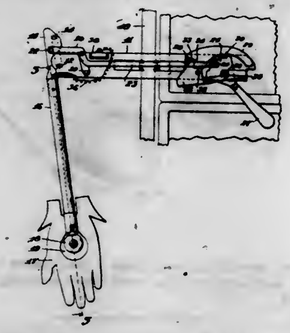


1,574,144. EYE SHADE. OLIVER C. WHITE, Gardena, Calif. Filed Oct. 10, 1922, Serial No. 593,526. Renewed Jan. 16, 1926. 1 Claim. (Cl. 2—13.)

In an eye shade, a support having a curved upper edge, a visor formed of resilient sheet material having an inner edge formed on a curvature less than that of the margin of said support, and integral hooks on the inner edge of said visor engageable with the margin of said

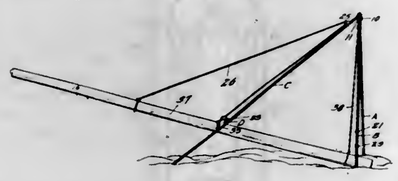
support on spreading said visor; said hooks adapted to clamp on said support and said visor exerting a pull on said hooks.

1,574,145. WALL FURNACE. JOHN S. ANDREWS, Hollywood, Calif. Filed Apr. 17, 1924. Serial No. 707,104. 2 Claims. (Cl. 126—90.)



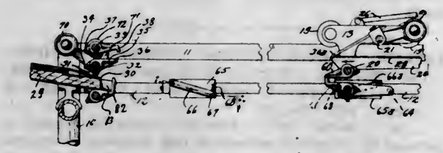
1. In a wall furnace, a vertically disposed housing, open top and bottom, upper and lower plates horizontally disposed within said housing and spaced apart from the walls thereof, spaced walls arranged between said plates so as to form a passageway between said walls and a passageway between the outer one of said walls and the housing, a heating tube disposed within the space within the inner wall, a burner at the lower end of said heating tube and a hollow dome-shaped member arranged on top of the upper plate for establishing communication between the upper end of the chamber in the heating tube and the end portions of the chamber between the spaced walls.

1,574,146. MOTOR-VEHICLE DIRECTION-INDICATING SIGNAL. WILLIAM J. DAVIS, Redondo Beach, Calif. Filed July 7, 1925. Serial No. 41,965. 8 Claims. (Cl. 116—54.)



1. In a motor vehicle direction indicating signal, a horizontally disposed support, a link pivotally connected to the outer end of said support, a signaling arm pivotally connected to said link, a bell crank having one end pivotally connected to the signaling arm and the other end pivotally connected to the intermediate portion of said bell crank and lying substantially parallel with the support, an operating handle pivotally connected to the inner end of said support and to which the inner

end of the operating arm is connected, said operating handle being provided at one end with a series of notches, a gravity detent for engaging said notches to

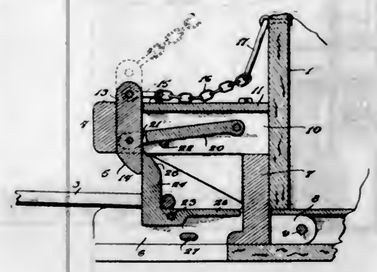


hold the handle in different positions and manually operable means for disengaging said detent from the notched portion of the handle.

1,574,147. POLE SETTER. WILLIAM E. FRANKLIN, Earlham, Iowa. Filed Oct. 6, 1924. Serial No. 741,965. 1 Claim. (Cl. 254—145.)

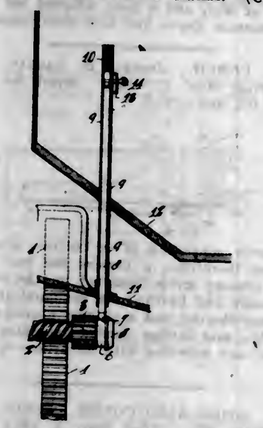
A pole setter comprising a device having three legs secured at their upper end to a common member and each being capable of pivotal movement relative to the common member, a windlass on one of said legs, a pulley positioned near said common member, a flexible element secured to said windlass extending around said pulley and adapted to have its free end secured to the pole to be set and a second flexible element secured to the three legged device for anchoring to the butt end of the pole to be set for maintaining the three legged member in upright position.

1,574,148. SLIP-SHEETING DEVICE. HENRY WAGNER DE JARNETTE, Des Moines, Iowa. Filed June 15, 1925. Serial No. 37,234. 18 Claims. (Cl. 84—1.)



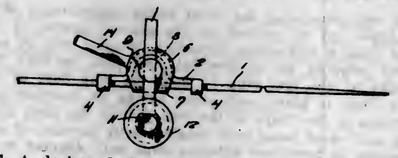
1. In a machine of the class described, the combination of means for advancing a printed sheet to a predetermined position and to then return to starting position, and means for gripping one edge of the sheet when it reaches such predetermined position, and for holding it during the return movement of said first means.

1,574,149. CREAM DIVIDER. HENRY HOMPES, Lincoln, and GEORGE L. DE LONG, Havelock, Nebr. Filed Jan. 24, 1924. Serial No. 688,189. 1 Claim. (Cl. 137—20.)



A cream divider including a flexible and resilient inverted cup shaped closure for the mouth of a milk bottle, said closure being provided with a plurality concentric and superposed grooves on its inner surface, each of the grooves having an abrupt slope in its lower portion and a gradual slope in its upper portion, and a siphon passing through said closure, said siphon having a horizontal inlet and a vertical outlet.

1,574,150. CAR COUPLING. AUDDLEY HOYES, Belle Vernon, Pa. Filed Sept. 24, 1923. Serial No. 664,565. 2 Claims. (Cl. 213—191.)

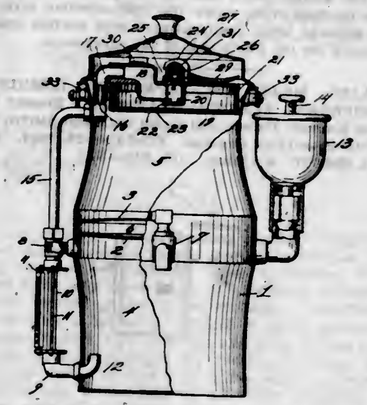


1. In a car coupling a drawhead comprising upper and lower spaced parts and a rear connecting wall, the upper and lower parts having longitudinal slots, the slot in the upper part being closed at its outer end, a dog disposed within the slot of the lower part and having an arm projecting upwardly at a right angle therefrom and pivoted adjacent the dog within the slot, means for supporting the dog in horizontal position, a vertical latch supported against the closed end of the slot in the upper part forwardly of the arm projecting from the dog, and a carrier within the slot in the upper part and pivoted to the latch and to the said upper part of the drawhead.

1,574,151. AUTOMOBILE LOCK. EDWARD J. B. IRVING, Trail, British Columbia, Canada. Filed May 16, 1924. Serial No. 713,796. 5 Claims. (Cl. 70—90.)

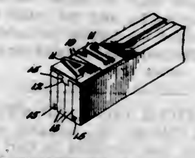
1. An anti-theft device for an automobile, comprising the combination with the driving pinion of the starting mechanism, of means, releasable with a key, for retaining the pinion in the out of mesh position in relation to the geared wheel of the engine shaft.

1,574,152. SAW GUIDE FOR UNDERCUTTING. JOSEPH M. JENNINGS, Centralia, Wash. Filed May 22, 1925. Serial No. 32,078. 2 Claims. (Cl. 143—163.)



1. A device of the class described including a spike adapted to be driven into a log, a plate slidable on the spike and having its intermediate portion spaced therefrom, a bolt extending between the intermediate portion of the plate and the adjacent portion of the spike, washers on the bolt having extensions disposed under the spike, a nut on the bolt, a bracket arm slidable through the bolt so that when the nut is tightened up, said arm is held in adjusted positions in relation to the bolt, and a wheel journaled on the end of the arm.

1,574,153. JETTY. HENRY FREDERICK KELLNER, Silver Lake, Kans. Filed Mar. 20, 1923. Serial No. 626,342. 1 Claim. (Cl. 61—3.)

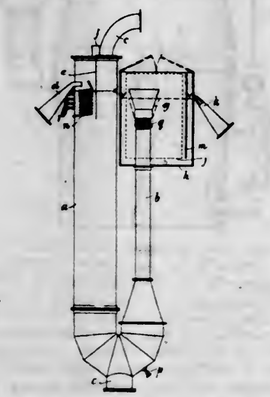


A jetty composed of a plurality of frames, each of said frames composed of a pair of spaced perforated triangular metal bands of angle iron construction and an intermediate triangular band of similar construction, spaced angle iron bars rigidly connected to the triangular bands and spaced at 120° apart, a plurality of spaced flexible strands inserted through the perforations in the metal bands, and extended beyond the ends of the frames and having other spaced frames connected together by said flexible strands, with the strands passing through perforations in each of the triangular shaped bands of the frames so that the jetty will be composed of spaced rigid frames connected together by a plurality of flexible strands arranged in triangular formation.

1,574,154. COFFEEPOT. HENRY D. KELLY, Kansas City, Mo. Filed Aug. 6, 1923. Serial No. 656,017. 3 Claims. (Cl. 53—3.)

1. A coffee pot provided with boiler and beverage chambers separated by a vacuum chamber, a ground-coffee container in the beverage chamber, having a filter-controlled discharge, a cover secured on the container, provided with a passage having jet orifices to discharge into the container, a pipe-way communicating with the lower part of the boiler chamber and the passage in said cover a yieldingly-closed relief connection for the boiler chamber; and said chamber having a vent connection at its upper end.

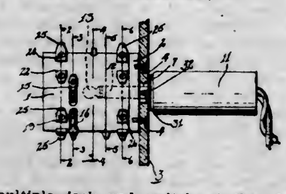
1,574,155. TYPE. WILLIAM M. KELLY, Westfield, N. J. Filed Aug. 4, 1923. Serial No. 655,628. 2 Claims. (Cl. 101—381.)



1. A printing arrangement comprising, in combination, relatively thin type plates each having a character on one side thereof and a rib on the other side, a base for said plates comprising a plurality of separate and unconnected metal strips of standard thickness used in printing arranged beneath said plates and completely underlying the same, the combined thickness of said strips being equal to the length of said plates whereby the ends of said plates are flush with the sides of said base, two of said strips having notches along one edge thereof which cooperate to form a groove to receive and tightly clamp the ribs on said type plates and hold the same in position when the arrangement is locked up in a holder, said strips and type plates together forming an arrangement which is of standard type height.

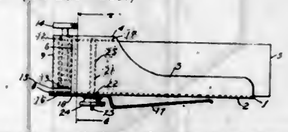
1,574,156. PROCESS FOR MANUFACTURING PHOTOGRAPHIC GLASS PICTURES AND THE LIKE WITH COLORED BACKGROUND. WERNER KIESLING, Berlin-Neukolln, Germany, assignor to N. V. Handelmaatschappij, "Mercator," Zandvoort, Netherlands. Filed Dec. 18, 1924. Serial No. 756,827. 3 Claims. (Cl. 41—21.)

1. A process for the photomechanical manufacturing of glass pictures and the like with colored background,



wherein the transparent plate or the like is coated with a thin layer of chromate glue soluble in the cold, the coated side of the plate being exposed under a reticle negative, the unaltered glue being then removed from those portions of the plate which were protected from light during the exposure under the reticle negative, the exposed portions being then colored with a dye solution, and the entire coated side of the plate and especially those portions from which the light-sensitive layer has been removed being finally painted with another coloring substance for the production of the background.

1,574,157. **MEANS FOR SEPARATING LIQUIDS OF DIFFERENT SPECIFIC GRAVITIES.** ROBERT CLIFTON KNIGHT, Pinner, and HUGH DUNFORD SMITH, Newcastle-upon-Tyne, England. Filed Feb. 29, 1924. Serial No. 696,067. 6 Claims. (Cl. 210—51.)

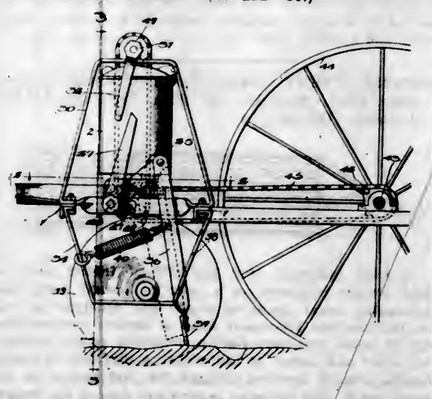


1. Apparatus for separating liquids of different specific gravities comprising a substantially U-shaped tube, one leg of said tube being of larger cross-sectional area than the other and the bend being of substantially the same cross-sectional area as that of the larger leg, said larger leg having an inlet and an outlet thereto, said inlet being at the top of the leg and the outlet distanced from the top, said smaller leg having an outlet at the top thereof, and a baffle positioned in said larger leg between the inlet and the outlet thereof.

1,574,158. **MULTIPLE JACK AND SWITCH.** LADDIE ALOIS KREJCI, Chicago, Ill., assignor of one-third to Charles J. Norre and one-third to Carl G. Rolin, both of Chicago, Ill. Filed Apr. 20, 1925. Serial No. 24,678. 3 Claims. (Cl. 200—51.)

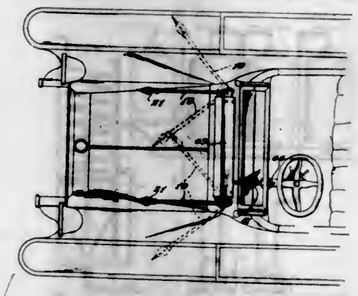
2. A multiple jack and switch of the character described, comprising a casing of insulating material adapted for mounting upon an instrument panel, a rotor rotatably mounted within said casing, a jack sleeve disposed on the axis of said rotor and partially projecting through said casing, a plug contact member carried by said rotor, contact members mounted on said rotor and electrically connected with said jack sleeve and said plug contact member, switch blades carried by said casing and being arranged for engagement with certain of said contact members selectively on said rotor as said rotor is rotated, an additional contact member carried by said rotor, additional switch blades carried by said casing and adapted to engage with the additional contact member of said rotor, whereby a plurality of circuits may be opened and closed at will, and a plug adapted for engagement with said contact sleeve and said plug contact member.

1,574,159. **PUNCH.** JOSEPH B. LARKIN, Palo Alto, Calif. Filed Mar. 17, 1925. Serial No. 16,215. 3 Claims. (Cl. 164—119.)



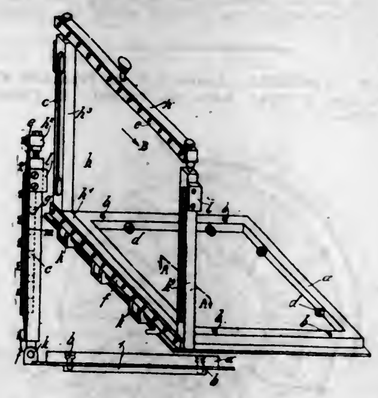
1. A punch consisting of a bottom element having sides rising therefrom, a closure for one end of said holder, a plunger guide mounted on the outer surface of said closure and having open communication with the inner surface thereof, and a plunger operatively mounted in said guide, said bottom element extending beyond said end closure and provided with an orifice to receive said plunger.

1,574,160. **STOOL-RING COVER.** EDWIN R. LINEHAN, River Falls, Wis. Filed Mar. 3, 1924. Serial No. 696,549. 1 Claim. (Cl. 4—243.)



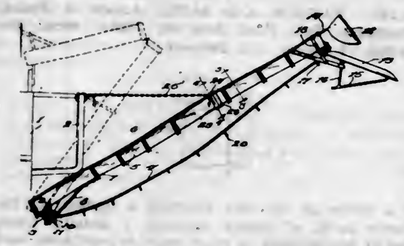
A seat ring cover for toilet bowls comprising a sheet of paper cut to conform to the general outline of the seat ring, a rearwardly extending, integral flap on said cover adapted to be inserted and held between the hinges of the seat ring to hold the rear part of the ring cover in place; said sheet having an aperture conforming to the shape of the rear part of the bowl opening, said sheet being split longitudinally forward of said aperture to form two adjacent flaps both adapted to be bent downwardly and horizontally under the seat ring and there engaged between the bowl and said seat ring, substantially as and for the purpose set forth.

1,574,161. **MARKER FOR CORN PLANTERS.** JOHN H. LONG, Ashtabula, Ohio. Filed Dec. 28, 1923. Serial No. 683,223. 1 Claim. (Cl. 111—30.)



In a planter, a checker shaft, a frame having U-shaped bracket supported beneath the frame, a slot in said bracket, an arm on the checker shaft, a shank carried thereby passing through said slot, a spade carried by said shank, and means including a spring holding the shank in engagement with a portion of the slot, said spring having one end attached to one leg of said bracket and the opposite end to said shank.

1,574,162. **TRAFFIC SIGNAL.** WILLIAM LOUIS MERRICK, Halifax, Canada. Filed Jan. 9, 1924. Serial No. 685,266. 7 Claims. (Cl. 116—47.)

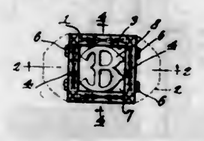


1. In a traffic signal for vehicles, the combination of a fixed cross rod to extend transversely of the vehicle, forwardly extending horizontal signal arms swiveled at their inner ends upon the ends of said rod and movable to project toward either one side or the other of the vehicle, means coupling said arms to swing in unison, and means for swing said arms.

1,574,163. **METHOD AND APPARATUS FOR THE PRODUCTION OF PRINTS.** ALFRED CARL OHMM, ALFRED SYREN, and OTTO HENTSCHEL, Leipzig, Germany, assignors to the Firm Emil Gerasch G. m. b. H., Leipzig, Germany. Filed Aug. 16, 1923. Serial No. 657,778. 3 Claims. (Cl. 101—130.)

1. A method of producing prints in an ordinary lithographic hand-press, consisting in tightly stretching the rubber cloth evenly in all directions in the part of the frame adapted to hold it, bringing the stretched cloth over but not into contact with the form, thereupon pressing the cloth into contact with the form by means of the vertical pressure of a scraper along the edge of the scraper and running the carriage with the frame through the press under the scraper, as and for the purpose set forth.

1,574,164. **EAR CONVEYER FOR CORN-HUSKING MACHINES.** THEODORE H. OPPENHEIM and BERNARD SELHORST, Coldwater, Ohio, assignors to New Idea Spreader Co., Coldwater, Ohio, a Corporation of Ohio. Filed Nov. 21, 1924. Serial No. 751,354. 1 Claim. (Cl. 198—173.)



An ear conveyer for corn-husking machines comprising a sheet metal trough including two alined sections each having integral bottom and sides, reinforcing beads formed along the upper edges of the sides, reinforcing channels secured on the under surfaces of the bottom and the sides at intervals, reinforcing bands secured on the under surface of the bottom and sides at the meeting ends of the sections of the trough and having their upper ends extending outwardly at the edges of the sides of the trough, hinges secured upon the outwardly extending ends of the bands and connecting the sections of the trough whereby the upper section may fold over onto the lower section, an endless belt having its upper run passing through the trough, and means for supporting the trough on the end of a corn-husking machine for swinging the movement in a vertical plane.

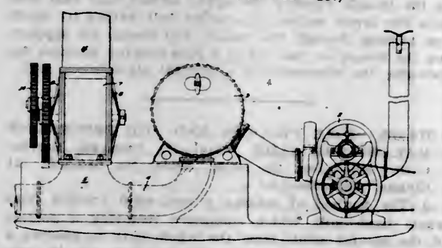
1,574,165. **MILK PRODUCT AND THE PROCESS OF MAKING THE SAME.** DAVID D. PEEBLES, Eureka, Calif. Filed Dec. 24, 1923. Serial No. 682,585. 11 Claims. (Cl. 99—11.)

9. The method of making a semi-solid product from whole fresh milk which comprises removing a portion of the non-fat solids from the whole milk to produce a product in which the fats and non-fats are in substantially equal proportion, and condensing the product thus formed to a semi-solid mass containing approximately 20% water.

10. The method of making a semi-solid product from whole fresh milk which comprises removing a portion of the non-fats solids from the whole milk to produce a product in which the fats and non-fats are in equal proportion, pasteurizing the product and condensing the product to approximately 80% total solids content.

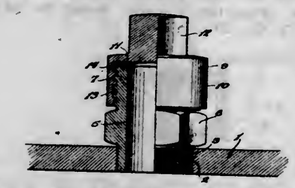
1,574,166. **RING OR THE LIKE.** HENRY W. PETERS, Boston, Mass. Filed Oct. 7, 1925. Serial No. 61,050. 3 Claims. (Cl. 63—29.)

1. The combination with an article of jewelry including a box having an open face and an open side, there being inwardly extending flanges at the open face of the box, there being recesses within the box adjacent the open face, of a member insertable into the box to position within the open face thereof, means extending from said member to be seated within the recesses, a stone insertable into the open side of the box to position back of



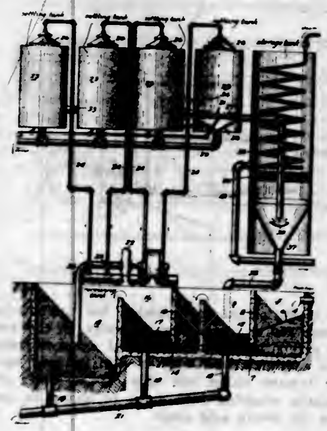
the inserted member to hold the projecting portions of the member within the recesses, and means movable to position across the open side of the box for retaining the stone within the box.

1,574,167. WINDOW AND SASH. ALBERT E. READE, Petersburg, Va. Filed July 29, 1924. Serial No. 728,962. 1 Claim. (Cl. 296—44.)



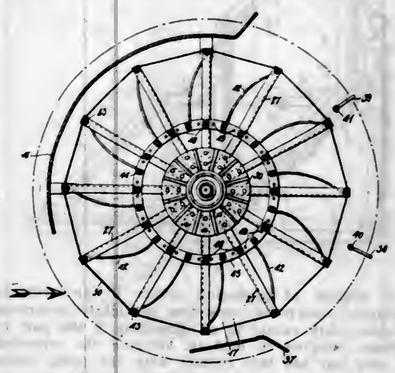
In a device of the class described a transparent imperforate panel of flexible material, a metallic frame formed of four sections in which panel is positioned, each section comprising a base portion extending throughout the length of the section and side walls of shorter length than the section, one side wall terminating short of one end of the section and the other side wall terminating short of the other end of the section, and rivets uniting the ends of adjacent sections.

1,574,168. CHARGER. CLAUDE REES, San Francisco, Calif., assignor to Rees Blow Pipe Manufacturing Company, San Francisco, Calif. Filed Dec. 24, 1923. Serial No. 682,490. 12 Claims. (Cl. 302—49.)



1. A charger comprising a casing having inlet and discharge openings, a pocket wheel in said casing disposed between said openings, said wheel having two series of pockets spaced apart axially of the wheel, the pockets in one series leading the pockets in the other series, the corresponding pockets in the two series being in communication at their inner ends.

1,574,169. CLEAN-OUT PLUG. HARRY N. REYNOLDS, Detroit, Mich. Filed Mar. 17, 1924. Serial No. 699,937. 2 Claims. (Cl. 220—46.)

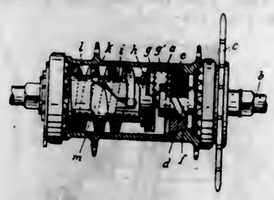


2. A plug for tanks or boilers comprising a threaded bushing and a correspondingly threaded closure cap, one of which is provided with an annular seating groove dove-tail in cross section and having its bottom wall provided with spaced seats, and a packing gasket having a dovetail anchoring rib fitting within the groove and provided with spaced projections engaging the seats whereby to prevent rotative movement of the gasket in said seating groove, the free end of the gasket by engagement with the adjacent surface of the plug serving to form a tight joint between the bushing and closure cap when said closure cap is screwed home.

1,574,170. SYSTEM FOR RECOVERING USED LAUNDRY MATERIALS. FRANK L. ROSENAU, San Francisco, Calif. Filed Nov. 6, 1922. Serial No. 599,447. 5 Claims. (Cl. 210—44.)

1. An apparatus for recovering laundry materials from solutions resultant from laundering operations comprising a filter through which the solution passes upwardly, a receiving tank, a plurality of settling tanks, means for passing the solution from the receiving tank to any desired settling tank, means for aerating the solution as it discharges into the settling tank, a storage tank to which the solution passes from the setting tank and a filter in the storage tank through which the solution passes.

1,574,171. WINDMILL. JAMES T. RYAN, Frankfort, Ky. Filed Apr. 2, 1924. Serial No. 703,691. 11 Claims. (Cl. 170—15.)

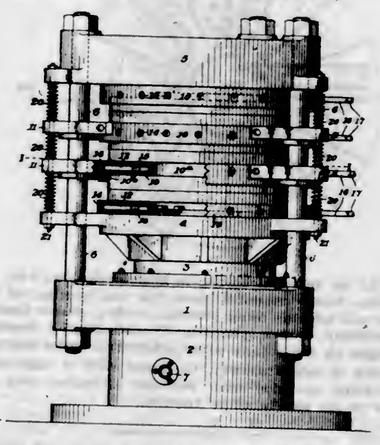


1. A windmill comprising a vertical shaft, a rotor carried thereby comprising flexible blades mounted to vary their curvature, with the angle presented to the wind during rotation, said rotor having a clear annular passage about the axis within the inner edges of said blades, and a shield to prevent action of the wind upon blades moving counter to its direction.

1,574,172. ROTARY PUMP OR THE LIKE. JAMES T. RYAN, Frankfort, Ky. Filed Oct. 25, 1924. Serial No. 745,843. 12 Claims. (Cl. 103—140.)

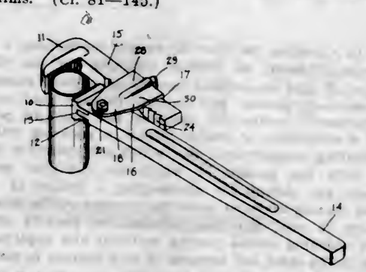
1. In a device of the class described a cylinder, a rotor eccentrically mounted therein and having a piston-receiving recess, an arcuate piston seating in said recess and adapted to be projected therefrom by centrifugal force, and a piston rod extending transversely of said recess acting to retain said piston therein.

1,574,173. FREE-WHEEL HUB. JOSEF SCHALL, Berlin-Neukolln, Germany, assignor to Berlin-Karlsruher Industrie-Werke A. G., Berlin, Germany. Filed July 28, 1925. Serial No. 46,680. 2 Claims. (Cl. 192—6.)



1. A free-wheel hub and back-pedalling mechanism, comprising in combination a fixed axle, a hub rotntable thereon, a sleeve within the hub, capable of axial and rotary motion relative to the axle, a coupling member within the hub slidable relatively to the axle, inclined cam surfaces on the sleeve and corresponding cam surfaces on the axle and a helical braking spring within the hub capable of being unwound by bearing against the forwardly running hub, the helical spring having one end fixed to a stationary part of the hub mechanism and the other end in engagement with the said sleeve, whereby, on back-pedalling taking place, the sleeve is axially displaced and turned along the inclined surfaces on the axle, so as to unwind the braking spring in the direction of rotation of the hub, as and for the purpose set forth.

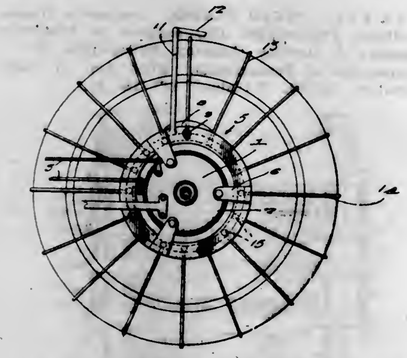
1,574,174. DEHYDRATED LIGNITE AND PROCESS OF PRODUCING SAME. EUGENE P. SCHOCH, Austin, Tex. Filed Aug. 18, 1924. Serial No. 732,782. 13 Claims. (Cl. 44—1.)



1. The process of treating lignite which comprises heating the same in contact with a hydrocarbon oil to drive off the moisture present and to cause a portion of said oil to enter the lignite, removing the oil not absorbed by the material; and still further removing a portion of the absorbed oil.

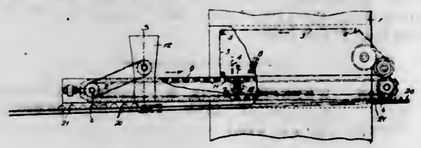
1,574,175. STEAM PLATEN. FREDERICK GEORGE SCHRANZ, Philadelphia, Pa., assignor to Southwark Foundry & Machine Company, Philadelphia, Pa., a Corporation of Pennsylvania. Filed Apr. 11, 1925. Serial No. 22,460. 7 Claims. (Cl. 18—17.)

1. A disk-like heating platen having a continuous passage for the circulation of a heating medium, comprising a series of substantially radially disposed holes, and passages substantially tangential to the arc of a circle struck from the axis of said plate connecting said substantially radial holes.



1,574,176. WRENCH. JOHN R. SIEGER, Minneapolis, Minn. Filed Dec. 18, 1924. Serial No. 756,680. 3 Claims. (Cl. 81—145.)

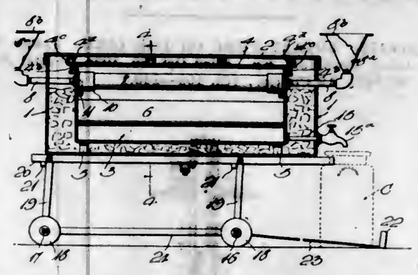
1. A wrench comprising a fixed jaw, a movable jaw, a shank attached thereto, ratchet teeth formed on said shank, a dog pivoted to said fixed jaw adapted to engage said ratchet teeth, a U-shaped guide enveloping said shank and secured to said fixed jaw, said guide being formed with a pair of inwardly extending grooves communicating with an opening in said guide at the ends of said grooves remote from said jaw, a U-shaped release surrounding said shank being positioned within said grooves and lying between said shank and the walls of



said guide with the end thereof protruding through said opening, said dog being formed with outwardly-facing similarly situated slots and inwardly-extending hooks formed on said release adapted to engage within said slots.

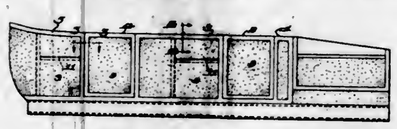
1,574,177. ANTISKID DEVICE FOR VEHICLE WHEELS. DANIEL E. SNYDER, Roseland, Nebr. Filed June 4, 1925. Serial No. 34,873. 4 Claims. (Cl. 301—46.)

1. In an anti-skid device, in combination, an axle, an annulus fixedly mounted upon the end portion of the axle, said annulus being provided with a groove forming a trackway, and a plurality of anti-slipping members provided on inner ends with anti-friction roller bearings movable in said trackway, the outer ends of said members being provided with portions extending over the tread of the tire to afford traction.



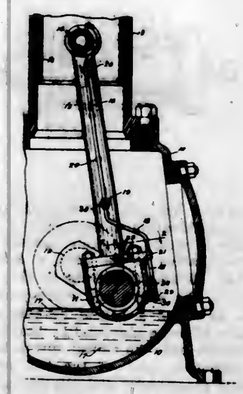
1,574,178. COATING MACHINE. CARL STRÄSING, Burlington, Iowa. Filed Apr. 9, 1925. Serial No. 21,925. 3 Claims. (Cl. 91—3.)

1. In a coating machine for cluster confections, a coating compartment, an endless conveyor for the cluster fillings of said confections having an endless succession of openwork pockets and passing through said coating compartment, means for charging the conveyor pockets with a succession of cluster fillings, a pocketed roller in the coating compartment over which said conveyor passes and with the pockets of which the conveyor pockets engage, and means for discharging a stream of warm liquid coating material upon the charges of the conveyor pockets to coat the tops thereof, the pockets of said roller catching excess coating material and applying the same to the sides and bottoms of said charges to complete the coating thereof.



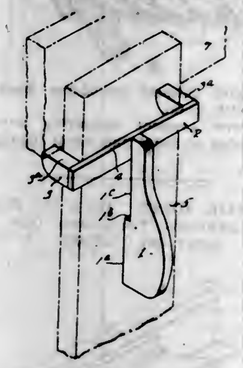
1,574,179. MILK COOLER. SHELBY STRANG and JAMES A. DOLAN, Dover Plains, N. Y. Filed Mar. 28, 1925. Serial No. 17,775. 5 Claims. (Cl. 257—178.)

1. A milk cooler comprising an ice containing casing, a milk container mounted in said casing in spaced relation with the walls thereof, a horizontally extending milk chilling tube in said milk container communicating with said casing to receive ice therefrom, and milk inlet means for the container positioned to direct the incoming milk downwardly onto the chilling tube whereby the



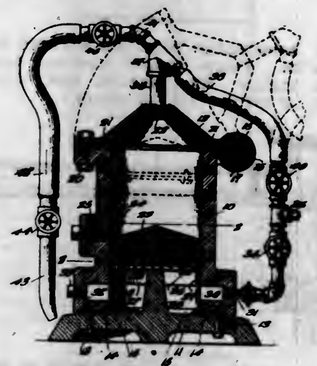
milk may run by gravity in a thin film around the exterior of the tube before running therefrom into the container.

1,574,180. AUTOMOBILE BODY. JOSEPH B. STRAUSS, Chicago, Ill. Filed Sept. 2, 1921. Serial No. 497,878. 4 Claims. (Cl. 296—31.)



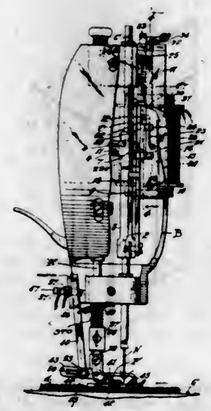
1. An automobile body comprising a series of metal frames, concrete sections extending across the open spaces of said frames so as to fill the spaces therein, the concrete being thicker at the edges of the sections than at the remaining portions, the metal frames of the concrete sections forming the floor and walls of the body, and doors at intervals in said body, said doors comprising metal frames fitting into the metal frames of the body and movably connected thereto, said frames fitted with wire netting imbedded in concrete, the concrete thickened at the edges where it joins the metal frame.

1,574,181. LUBRICATION PUMP. CHESTER A. BAKER, Omaha, Nebr. Filed Oct. 13, 1924. Serial No. 743,371. 4 Claims. (Cl. 184—11.)



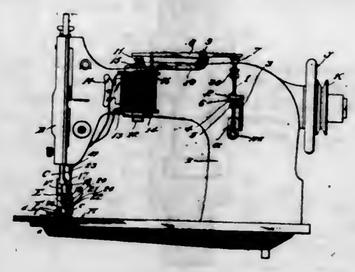
1. The combination with a crank and connecting-rod arranged to dip into an oil reservoir, of a pump-body mounted fixedly upon the connecting-rod, a piston reciprocable in said pump-body, and a plate connected with said piston and arranged externally of the pump-body to engage the oil in the reservoir and be thereby actuated to drive the piston.

1,574,182. MARKING GAUGE. EMIL G. BALSTAD, East Cleveland, Ohio. Filed Feb. 24, 1925. Serial No. 11,056. 5 Claims. (Cl. 33—32.)



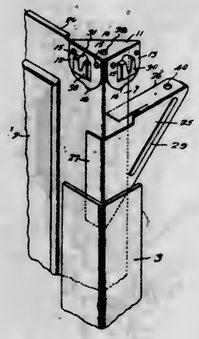
1. A marking gauge for the frames of door casings and the like comprising a marking bar having a marking edge and a pair of projections carried by said bar and adapted to be applied to opposite edges of the board to be marked and to project beyond said board thereby to engage the edge of the board or object to which the first mentioned board is to be fitted, a handle pivoted centrally of said bar having a cutaway portion for allowing the handle to be folded to a position parallel to the marking edge.

1,574,183. SPRAYING APPARATUS. HOWES BOWDISH, Philadelphia, Pa., assignor to Co-Operative Utilities Co., Inc., Philadelphia, Pa., a Corporation of Delaware. Filed Dec. 17, 1924. Serial No. 756,541. 6 Claims. (Cl. 91—45.)



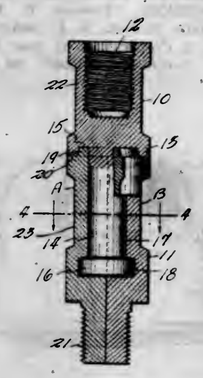
1. In a sprayer for plastic material, the combination of a casing having an inlet for pressure fluid at one end, a cone-shaped closure for the other end of said casing having a centrally disposed outlet, a piston mounted in said casing between said inlet and outlet and guided along by the walls of said casing, pressure means connected to said inlet, pressure means connected to act upon material discharged from said outlet, and separate control means for said pressure means.

1,574,184. SEWING MACHINE. EDWARD F. BRIGHAM and JAMES N. DANIELS, Newark, N. J., assignors to Benjamin & Johnes, a Corporation of New Jersey. Filed Feb. 6, 1923. Serial No. 617,229. 7 Claims. (Cl. 112—2.)



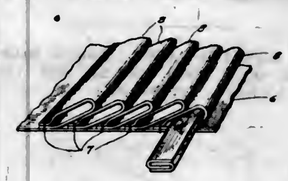
1. In a sewing machine, a stitch-forming mechanism including a needle, means for actuating said needle, work-feeding means, and a presser-foot, means for automatically interrupting action of said needle, and a trip mechanism for controlling said interrupting means and including a trip finger to constantly yieldingly engage the surface of said work and actuated by variations in the work surface, said trip mechanism being mounted on said presser-foot for relative movement thereto whereby said presser-foot may be raised and lowered without affecting the relation of said trip mechanism to the surface of the work.

1,574,185. AUTOMATIC WORK-FEED CONTROL FOR SEWING MACHINES. EDWARD F. BRIGHAM and JAMES N. DANIELS, Newark, N. J., assignors to Benjamin & Johnes, a Corporation of New Jersey. Filed Sept. 8, 1923. Serial No. 661,562. 25 Claims. (Cl. 112—203.)



1. In a sewing machine, stitch-forming mechanism including a needle, means for actuating the same, and work-feeding means, the movements of said work-feeding means and said needle having a normal definite relation, means for varying the movements of said work-feeding means independently of the movements of said needle, electromagnetic means for operating the last-mentioned means, and electric switch mechanism actuated by variations in the work surface for controlling said electromagnetic means.

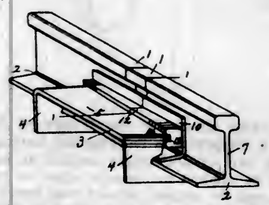
1,574,186. SHEET-METAL CONSTRUCTION. LEE S. CHADWICK, Shaker Heights Village, Ohio, assignor to Perfection Stove Company, Cleveland, Ohio, a Corporation of Ohio. Filed Jan. 27, 1922. Serial No. 532,228. 7 Claims. (Cl. 126—304.)



1. In a construction of the character set forth, the combination of three walls disposed at a given angle one to the others, a corner bracket having three parts correspondingly related, one of said parts being arranged to engage the inner surface of one wall while the other two parts are arranged to overlie the adjacent surface of the other walls, and means connecting the first mentioned part to the wall whose inner surface it engages, the other two parts having portions interlocking with portions of the walls which said parts overlie.

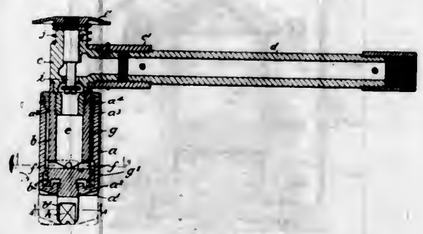
1,574,187. SWIVEL JOINT. CHARLES S. CRICKMER, Dallas, Tex., assignor to The Guiberson Corporation, Dallas, Tex., a Corporation of Delaware. Filed May 15, 1924. Serial No. 713,408. 6 Claims. (Cl. 287—91.)

5. In a rod joint, a swivel member having a rod coupling member at one end and a mandrel at its opposite end surrounded by a flange fixed relatively to the mandrel and extending parallel to its axis to form a recess, and a cooperating member formed in separable sections and with means to enter the recess of the swivel member and means engaging with said mandrel, the opposite end of said cooperating member being adapted to receive a rod coupling to prevent lateral displacement of the sections.



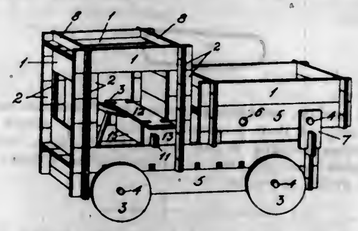
1,574,188. PROTECTING DEVICE. JACOB H. FRIEDMAN, New York, N. Y. Filed Dec. 18, 1924. Serial No. 756,664. 8 Claims. (Cl. 89—36.)

6. A protective garment embodying wood pulp wool impregnated with metal.



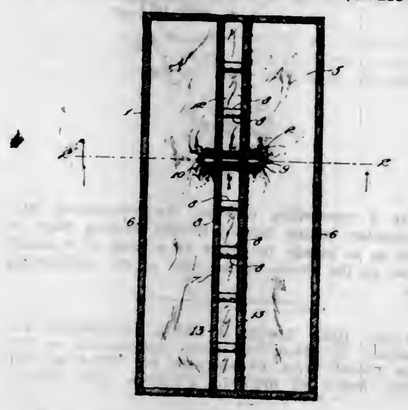
8. A protective garment embodying interlocked and overlapping strips of metal and metal impregnated wood pulp wool.

1,574,189. RAIL JOINT. DAVID A. FRAMPTON and GEORGE E. DENNISON, Youngstown, Ohio. Filed Nov. 10, 1924. Serial No. 748,832. 1 Claim. (Cl. 238—260.)



In a device of the class described, a yoke formed of flat iron or steel having ends turned downwardly at right angles after desired inner portion has been cut out forming a seat for the bases of ordinary rails, two fish plates having outwardly extending base flanges, a projection formed on one of said fish plates for the purpose of functioning with an opening in the end of the neck of a rail, a tapered wedge having a channeled edge, said wedge functioning between the oppositely disposed edge of the central portion of the yoke and one of the fish plates, substantially as described for the purpose set forth.

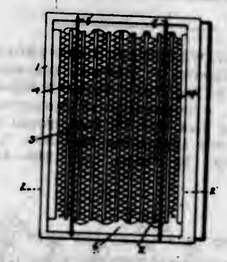
1,574,190. PERCUSSIVE TOOL FOR SCALING BOILER SURFACES. PERCY GILBERT HANDOLL, Lewisham, London, England. Filed Mar. 30, 1921. Serial No. 457,129. 3 Claims. (Cl. 15—104.07.)



1. An improved percussive tool operated by fluid pressure and comprising an inner member adapted to be held firmly against the work, an outer member forming the percussive body mounted to reciprocate longitudinally on the inner member and forming with the inner member an annular pressure chamber or space, against the opposite ends of which the pressure fluids act to effect the forward and return strokes of the percussive body, and means controlling the supply, distribution and exhaust of the pressure fluid substantially as described.

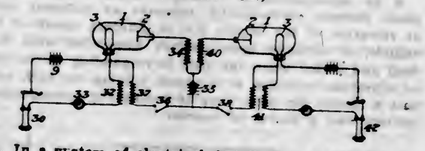
1,574,191. BUILDING BLOCKS. RAY H. GROVES, Portland, Oreg., assignor to Bonnie J. Groves, Portland, Oreg. Filed July 31, 1923. Serial No. 654,801. 1 Claim. (Cl. 46—35.)

A toy of the character described, formed from flat, rectangular structural members, having transverse notches in their edges, certain of said members having perforations near one edge, cylindrical structural members adapted to be inserted in said perforations, wheel-shaped structural members adapted to be pressed on the ends of certain of the cylindrical members, certain of the flat rectangular structural members having perforations near one end to receive the ends of certain of said cylindrical members, whereby said structural members may be assembled to form a toy of the character shown in Fig. 9.



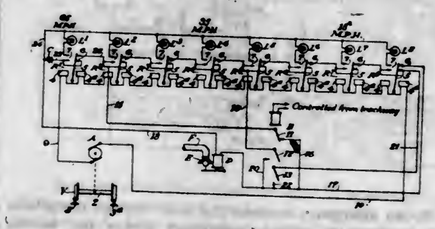
1,574,192. DISPLAY PAD FOR BARRETTES AND THE LIKE. SOL GUTTERMAN, Brooklyn, N. Y. Filed Feb. 21, 1925. Serial No. 10,834. 5 Claims. (Cl. 211—28.)

1. A display pad comprising a body consisting of a soft flexible facing and a relatively stiff textile backing and a cushion layer between said facing and backing, and a holding strip secured to said facing upon a portion of the body where the facing and backing and cushion layer are free from one another transversely of the pad, whereby the cushioning effect of the cushion layer upon an article mounted on the pad is independent of the attachment of the holding strip.



1,574,193. ELECTRIC PAINT BURNER. WARREN W. HASLETT and JAMES BLAIR, Baltimore, Md. Filed July 3, 1924. Serial No. 723,923. 2 Claims. (Cl. 219—29.)

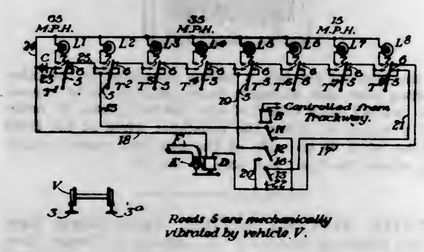
2. An electric paint burner, comprising a box, a piece of non-conducting material within said box extending across the front and one side thereof, resistance wires secured to the outer surface of the front of said conducting material, resistance wires secured to the outer surface of the side of said non-conducting material, a contact plate connected to the resistance wires at the front of the box, a contact plate connected with the resistance wires at the side of the box, two binding posts one of which is connected to the resistance wires



at the front of the box, a switch connected to the other binding post and having a blade adapted to be thrown into contact with either of said contact plates to establish a circuit to either the resistance wires at the front or the wires at the side of the box, and guides extending across the front and side of the box.

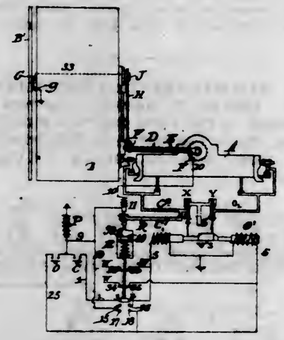
1,574,194. ELECTRIC SWITCH. PETER COOPER HEWITT, Ringwood Manor, N. J., assignor to Cooper Hewitt Electric Company, Hoboken, N. J., a Corporation of New Jersey. Filed Mar. 17, 1916. Serial No. 84,785. 2 Claims. (Cl. 179—81.)

1. In a system of electrical distribution a switch comprising an evacuated container and electrodes therein, a direct current source leading to one of the electrodes through a transformer primary and leading in the opposite direction through the secondary of a second transformer into connection with a separate circuit having a primary cooperating with the secondary of the original circuit and included in a circuit having a source of direct current and a transmitting and a translating device, the source of direct current being connected to one of the electrodes so as to heat the same.



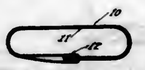
1,574,195. RAILWAY-TRAFFIC-CONTROLLING APPARATUS. LEMUEL F. HOWARD, Edgewood Borough, Pa., assignor to The Union Switch & Signal Company, Swissvale, Pa., a Corporation of Pennsylvania. Filed May 26, 1924. Serial No. 715,870. 38 Claims. (Cl. 246—187.)

10. In combination, a railway vehicle, means thereon for generating a periodic current the frequency of which is proportional to the speed of the vehicle, a plurality of receivers supplied with said periodic current and



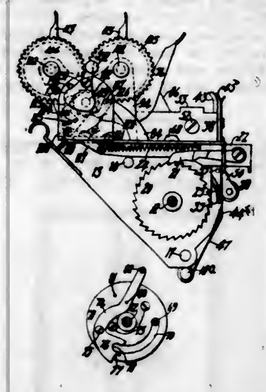
tuned to respond to different frequencies, a normally open contact associated with each receiver and arranged to be closed when the receiver is responding to the frequency for which it is tuned, and indicating means controlled by said contacts.

1,574,196. RAILWAY-TRAFFIC-CONTROLLING APPARATUS. LEMUEL F. HOWARD, Edgewood Borough, Pa., assignor to The Union Switch & Signal Company, Swissvale, Pa., a Corporation of Pennsylvania. Original application filed May 26, 1924, Serial No. 715,870. Divided and this application filed Nov. 7, 1925. Serial No. 67,549. 10 Claims. (Cl. 246—182.)



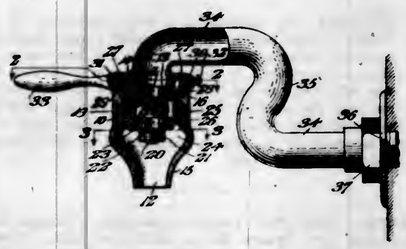
8. In combination, a railway vehicle, a plurality of reeds thereon mechanically resonant at different rates of vibration of the vehicle due to different speeds of the vehicle, a normally open contact associated with each reed and closed when the reed is responding to the rate of vibration to which it is tuned, a lamp for each reed, and a circuit for each lamp including the corresponding contact and a source of current.

1,574,197. DOOR-ENGINE CONTROL. LEE P. HYNES, Albany, N. Y., assignor to Consolidated Car-Heating Company, Albany, N. Y., a Corporation of West Virginia. Filed Mar. 6, 1920. Serial No. 363,750. 34 Claims. (Cl. 105—341.)



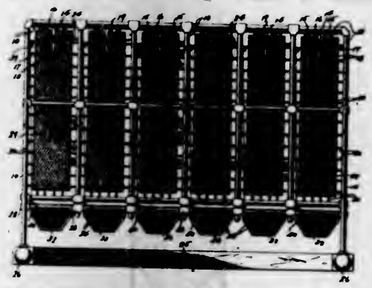
1. An emergency reverser for door engines comprising an engine-valve shifter, emergency means for moving said shifter in one direction, automatically controlled means for moving the said shifter in the other direction, and means for temporarily retarding the operation of said automatically controlled means.

1,574,198. NECKTIE. HENRY JAMES JONES, Sydney, New South Wales, Australia. Filed Apr. 7, 1925. Serial No. 21,294. 2 Claims. (Cl. 2—146.)



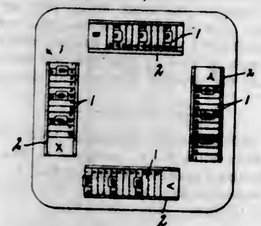
1. A necktie, comprising two strips of material united along both of their longitudinal edges by a single line of stitches forming a pair of flattened tubes, one of said tubes and the line of stitches being entirely enclosed within the other tube.

1,574,199. TYPEWRITING MACHINE. ALFRED G. F. KUROWSKI, Brooklyn, N. Y., assignor to Underwood Typewriter Company, New York, N. Y., a Corporation of Delaware. Filed Mar. 5, 1923. Serial No. 622,909. Renewed May 1, 1925. 23 Claims. (Cl. 197—135.)



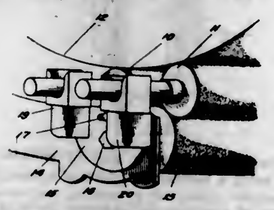
1. In a typewriting machine, the combination with a cylindrical platen having thereon feeding rings so spaced as to engage the edges of a card, of a handle secured to the platen at one side of the card-feeding rings.

1,574,200. BIB. ALFRED B. LEWIS, Philadelphia, Pa., assignor, by direct and mesne assignments, to William Russell Stott, Philadelphia, Pa. Filed Jan. 11, 1922. Serial No. 528,367. 2 Claims. (Cl. 251—8.)



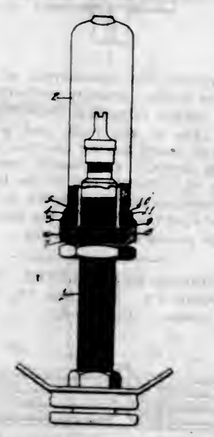
1. In a bib, a head having an inlet port opening into a recess of greater diameter, a valve member arranged to fit within said recess for free sliding movement to open or close said inlet port, a nozzle threaded to said head and having a chamber of larger diameter than said recess located on the discharge side of said valve member and communicating with the outlet of said nozzle, the periphery of said valve member comprising a plurality of axially disposed ribs to provide paths to subdivide the flowing liquid into a plurality of streams, and means cooperating with said head for controlling the movement of said valve member.

1,574,201. AMUSEMENT DEVICE. EDWARD M. LYNCH, Bloomfield, N. J. Filed June 25, 1925. Serial No. 39,480. 7 Claims. (Cl. 273—103.)



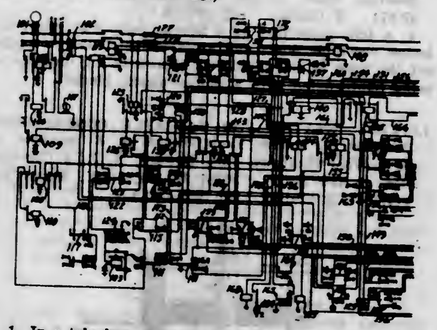
1. An amusement device utilizing basketballs, comprising a stall formed by resilient back and side walls, a back-board in the rear of said stall, a vertical open ended basket mounted adjacent to said back-board, an inclined ball-return runway extending from beneath said basket and outwardly from said stall, and a player positioning rail spaced from said stall and its runway.

1,574,202. DEVICE FOR USE IN PLAYING DUPLICATE WHIST. GRACE WEED MARSHALL, Binghamton, N. Y. Filed Apr. 4, 1922. Serial No. 549,423. 10 Claims. (Cl. 273—151.)



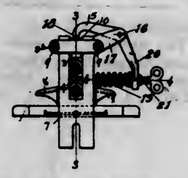
1. A card apparatus comprising an individual card holder for each player, each holder comprising a series of over-lapping pockets, and each holder having indicia indicating the dealing time of the player using that holder.

1,574,203. APPARATUS FOR ADJUSTING LITHOGRAPHIC-MACHINE DAMPING ROLLERS. HARRY GREAVES NALL, Sydney, New South Wales, Australia. Filed Apr. 29, 1925. Serial No. 26,583. 3 Claims. (Cl. 101—147.)



1. Apparatus for adjusting and evenly distributing the pressure on the plate damping rollers mounted between the plate cylinder and the brass damping roller of a lithographic machine comprising a bracket adapted to be oscillated on the control lever at each end of the brass damping roller, and a bearing for each plate damping roller mounted on the bracket.

1,574,204. PRESSURE-GAUGE CAP. CURTIS C. NEAL, Marmet, W. Va., assignor, by mesne assignments, to Tiregauge Valve Corporation, Charleston, W. Va., a Corporation of West Virginia. Filed Oct. 21, 1922. Serial No. 595,978. 1 Claim. (Cl. 152—12.)



A transparent cap for pneumatic pressure gauge stems comprising a metal base having a screw-threaded opening and a cap receiving socket; a glass cap having a shoulder at its open end; a soft closure wire on the shoulder; and an inturned edge of the wall of the socket engaging the wire and seating the same on the shoulder the outer wall having a diameter preventing the out-springing of the wire and the inturned edge preventing the up-springing of the wire away from the shoulder making a permanent connection between the base and the glass cap.

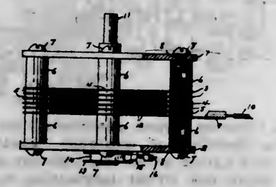
1,574,205. TELEPHONE SYSTEM. LIPA BOLINKOWSKY, Antwerp, Belgium, assignor to Western Electric Company, Incorporated, New York, N. Y., a Corporation of New York. Filed May 15, 1924. Serial No. 713,428. 6 Claims. (Cl. 179—18.)

1. In a telephone system, subscribers' lines arranged in groups, a plurality of separately operable selective switches each having access to a different group of said lines, a single link circuit terminating in all of said switches, a register individual to said link circuit, and means controlled by said register for selecting one of said switches and for operating the selected switch to extend said link circuit to one of the subscribers' lines.

1,574,206. WRINGER. WILLIAM ROBERTSON, Erie, Pa., assignor to Lovell Manufacturing Company, Erie, Pa., a Corporation of Pennsylvania. Filed Aug. 2, 1921. Serial No. 489,174. 3 Claims. (Cl. 68—82.)

1. In a wringer, the combination of a frame; rolls mounted in the frame; pressure mechanism for the rolls comprising a spring extending outwardly from a plane through the axes of the rolls, and a lever pivotally mounted on the frame having one end subjected to the action of the spring; and means communicating the pressure from the opposite end of the lever to the rolls comprising a release device adapted to break the communication between the lever and the rolls and release the rolls from the pressure of the spring.

1,574,207. FORGED BRAKE LEVER. FREDERIC SCHAEFER, Pittsburgh, Pa. Filed May 18, 1925. Serial No. 30,957. 1 Claim. (Cl. 74—5.)

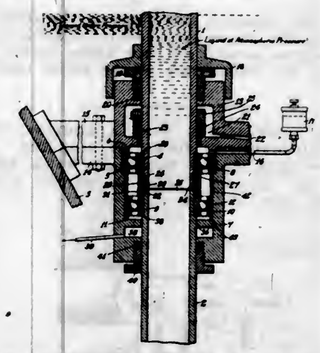


A forged lever for railway brakes having a central web and flanges formed integrally with and at the edges of said web and having end eyes and an intermediate eye, said web being provided adjacent to said intermediate eye with a concave-convex yoke-engaging projection extending beyond the plane of the sides of the flanges and of the boss surrounding said intermediate eye, the metal forming said projection being of substantially the same thickness as the web, and the convex side of the projection of one brake lever nesting in the concave side of a second brake lever when said second brake lever is stacked upon the first-named brake lever.

1,574,208. FELTED BOX-TOE STOCK AND METHOD OF MAKING THE SAME. HENRY PHILIP SHOPNECK, Dorchester, Mass., assignor to John J. Daly, West Newton, Mass. Filed July 31, 1925. Serial No. 47,371. 5 Claims. (Cl. 92—3.)

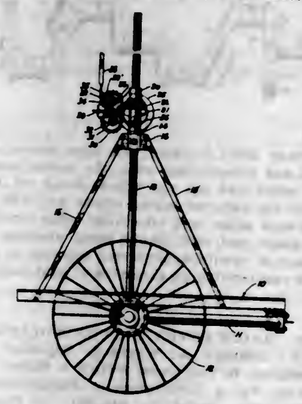
1. A felt, consisting of a fibrous pulp, and relatively longer vegetable fibres and asbestos distributed throughout the mass in felted relation therewith and capable of being impregnated with a thermo-plastic binder.

1,574,209. STATOR FOR VARIABLE CONDENSERS. PRESTON M. SMITH, East Orange, N. J., assignor to U. S. Tool Company, Inc., Newark, N. J., a Corporation of New Jersey. Filed June 4, 1924. Serial No. 717,705. 2 Claims. (Cl. 250—41.)



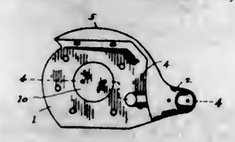
1. In a condenser, the combination of a pair of end plates, means for connecting said plates together comprising a plurality of screw threaded posts, tubular insulating members screwed upon the ends of each of said posts, and screws passing through apertures in said plates and screwed into the ends of said tubular members, with a plurality of stator plates spaced apart and supported upon said posts between said tubular members.

1,574,210. METHOD AND APPARATUS FOR STEAMING GRAIN AND THE LIKE. HORACE R. SPAULDING, San Francisco, Calif. Filed Oct. 29, 1924. Serial No. 746,699. 3 Claims. (Cl. 83—27.)



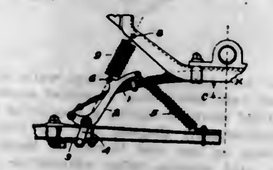
1. An apparatus for steaming grain comprising a chute arranged for gravity descent of grain therethrough, angularly disposed baffles within the chute for deflecting the grain including superimposed pairs of baffles arranged in gable roof formation with upper edges abutting to prevent entrance of grain and with an open space below the lower edges permitting the grain to flow together under the lower edges of the next lower pair of baffles and over the apex thereof, and a steam pipe extending into the chute positioned under the gabled baffles at a point above any grain so flowing together and perforated along its under side for ejection of steam at the upper surface of said grain.

1,574,211. SUBMERGED BEARING MOUNTING. JOHN TAYLOR, Bronxville, N. Y., assignor to The Hess-Bright Manufacturing Company, Philadelphia, Pa., a Corporation of Pennsylvania. Filed July 29, 1925. Serial No. 46,723. 7 Claims. (Cl. 308—187.)



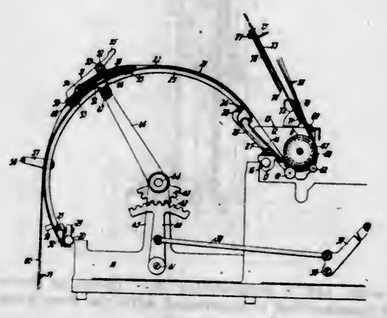
4. The combination with a pair of endwise abutting tubes, there being a bearing seat formed adjacent the ends of the respective tubes, of a housing surrounding such ends, an anti-friction bearing mounted on each seat and in the housing, and a labyrinth for shielding the juncture between the tubes.

1,574,212. LEVELING MECHANISM FOR COMBINED HARVESTERS. LOWELL H. THOEN, Stockton, Calif., assignor, by mesne assignments, to Caterpillar Tractor Co., a Corporation of California. Filed May 1, 1924. Serial No. 710,425. 7 Claims. (Cl. 56—209.)



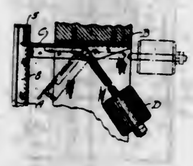
1. In a combined harvester having a carrying wheel journaled upon a crank axle, mechanism for swinging said axle to raise and lower the wheel for the purpose of leveling the harvester on a side hill, said raising and lowering mechanism including a screw shaft connected with the crank axle, a driving sleeve for said screw shaft and power-operated means for actuating said driving sleeve.

1,574,213. GOLF CLUB. RALPH G. TYLER, Bradford, Pa. Filed Apr. 3, 1923. Serial No. 629,596. Renewed Dec. 2, 1925. 2 Claims. (Cl. 273—77.)



1. A golf club comprising a one-piece metal frame member having an upstanding back portion formed integral with the neck of the frame and a sole portion extending forwardly from the base of said back there being an opening in the sole located on a center line to the rear of the center line of the neck, a wooden head block secured to the sole and back and having a recess to register with the said opening, and a weight piece removably connected to the sole, and fastening means between the weight piece and the head block.

1,574,214. SHOCK-ABSORBING DEVICE FOR VEHICLES. FRANK L. O. WADSWORTH, Pittsburgh, Pa. Filed June 8, 1922. Serial No. 566,911. 21 Claims. (Cl. 267—17.)

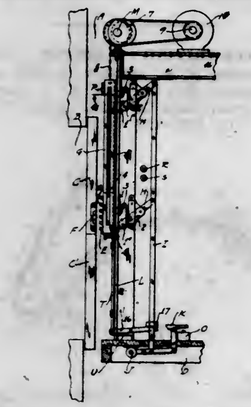


1. In an elastic suspension system for vehicles the combination of a rocking member, a plurality of springs operatively connected thereto, and means for effecting a substantial change in the angular position of the said member with respect to the flexural axis of one of said springs without substantially altering the initial tension of the latter, substantially as described and for the purpose specified.

1,574,215. TYPEWRITING MACHINE. JOHN WALDHEIM, Elizabeth, N. J., assignor to Underwood Typewriter Company, New York, N. Y., a Corporation of Delaware. Filed June 2, 1923. Serial No. 642,961. 23 Claims. (Cl. 197—127.)

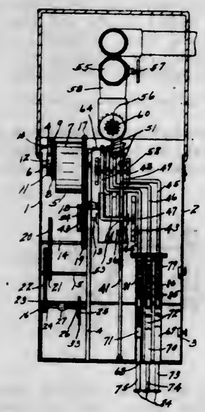
1. In a machine of the class described, a platen, a carriage for the platen, a frame on which the carriage travels, a carbon-carrier at the rear of the platen to retract and hold carbon-sheets in retracted position, a table, on which the carbon-carrier travels, connected with the carriage to travel therewith and curved to provide a great range of movement for the carbon-carrier as compared with the limited height and the distance from front to rear of the space occupied by the table, and means on said frame for actuating said carbon-carrier irrespective of the position of the carriage.

1,574,216. FIRE STOP FOR ELEVATOR DOORS. HERMAN C. WALDMAN, St. Louis, Mo. Filed July 28, 1922. Serial No. 578,264. 5 Claims. (Cl. 189—46.)



1. An elevator fire door structure, comprising a top door section spaced away from the lintel of the door opening so as to form a passageway for a vertically-aligned door located at a higher level, and an oscillating fire stop carried by the lintel that normally acts as a closure for the space between said door section and lintel when said top door section and the door above are in their closed position.

1,574,217. ELEVATOR-DOOR-OPERATING DEVICE. HERMAN C. WALDMAN, St. Louis, Mo. Filed Mar. 31, 1923. Serial No. 629,120. 5 Claims. (Cl. 187—52.)

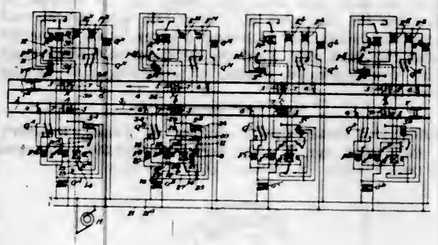


3. An operating mechanism for elevator shaft doors, comprising a vertically-disposed housing or guideway, a stationary supporting structure on an elevator car on which said housing is normally mounted, a manually-operable means for moving said housing towards and

away, from the door at which the elevator car is standing, co-operating means on said housing and supporting structure for guiding the housing and limiting the movement

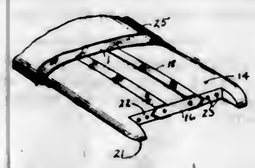
of same, and a reciprocating door operating device in said housing that is interlocked with the door when the housing is in its extended position.

1,574,218. VENDING MACHINE FOR LIQUID DISPENSERS. IRWIN WALDSMITH, Rocky Ford, Colo. Filed Oct. 29, 1924. Serial No. 746,456. 4 Claims. Cl. 194—29.)



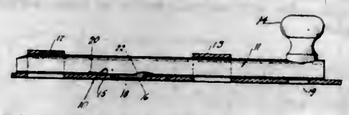
4. In a liquid dispenser, a drum operated spring motor, said drum having a transversely cut groove and longitudinally cut grooves having shallow portions varying in lengths corresponding with the value of the coin inserted; a locking lever engaging said transverse groove to keep the drum from rotating under the influence of the spring motor; a set of trip levers for releasing the locking lever which cause the said locking lever to follow one of the longitudinally cut grooves depending upon the particular trip lever operated by an inserted coin; a valve for dispensing liquid; and means engaging said locking lever and said valve for holding open said valve for varying lengths of time depending upon the length of the shallow portion of the particular groove in which the locking lever travels.

1,574,219. CRANK SHAFT. CLINTON L. WALKER, Piedmont, Calif. Filed Apr. 26, 1924. Serial No. 709,298. 4 Claims. (Cl. 74—38.)



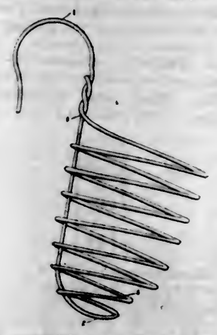
1. A crank shaft provided with four cranks, a pair of end webs and intermediate webs, the center cranks being set 180° apart and the end cranks being set 180° with relation to the adjacent center cranks and 180° with relation to each other, and all cranks being arranged on a common plane and said cranks being disposed in pairs, and a pair of counterweights one opposite to each endmost web and forming an extension of said webs.

1,574,220. RAILWAY-TRAFFIC-CONTROLLING APPARATUS. HERBERT A. WALLACE, Edgewood Borough, Pa., assignor to The Union Switch & Signal Company, Swissvale, Pa., a Corporation of Pennsylvania. Filed May 25, 1923. Serial No. 641,389. 10 Claims. (Cl. 246—37.)



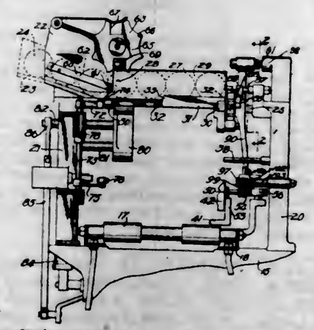
1. In combination, a section of railway track, a second section of railway track parallel therewith, and means controlled by traffic conditions in each said track for supplying local train controlling current to the two said sections in series.

1,574,221. DEVICE FOR SWIMMING-BELT CONSTRUCTION. JOHN M. WELCH, Houston, Tex. Filed Apr. 21, 1924. Serial No. 708,072. 5 Claims. (Cl. 18—35.)



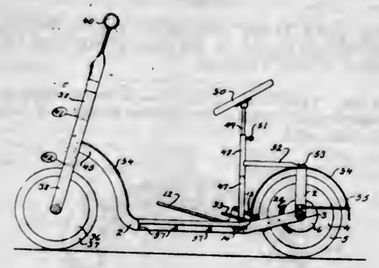
1. A device for placing longitudinal walls in a pneumatic life belt tube comprising a central section of approximately rigid material having a tongue on each side extending longitudinally thereof, and two side sections having a groove on one side thereof to loosely receive said tongues, said grooves being adapted to receive a strip of flexible material fitting over each said tongue whe said tongues are in said grooves, said flexible strip having exposed edges for cementing.

1,574,222. DOOR AND WINDOW BOLT. LOUIS WENSEL, Los Angeles, Calif., assignor to Weiser Hardware Manufacturing Company, Los Angeles, Calif., a Corporation of California. Filed Aug. 23, 1923. Serial No. 658,907. 4 Claims. (Cl. 292—152.)



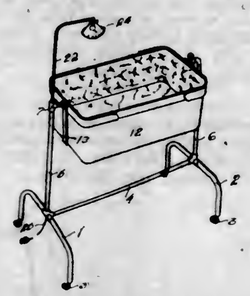
1. A bolt embodying a base member, a bolt bar longitudinally slidable on the base and having a stop shoulder formed thereon, keepers for guiding the bar in its longitudinal movement, a socket in the base, a spring interposed between the base and the bar, a portion of the spring projecting into the socket to position the spring with respect to the bar and base, said spring being adapted to thrust the bar into frictional contact with the keepers, and the free end of said spring being adapted to positively engage the shoulder on the bar for positively limiting the extent of longitudinal movement of the bar in one direction.

1,574,223. CAPRI-FIG BASKET. GEORGE L. WILCOX, Escalon, Calif. Filed Feb. 7, 1923. Serial No. 617,638. 4 Claims. (Cl. 220—19.)



1. A basket comprising a helically wound coil formed of a single piece of wire, said wire at the bottom of the coil being bent to extend upwardly to the top of the basket and then serving as a hanger for the basket.

1,574,224. CAN-ARRANGING MACHINE. GEORGE WILCOX, Riverside, Calif., assignor to California Canning Machinery Co., a Corporation of California. Filed Mar. 28, 1923. Serial No. 628,249. 13 Claims. (Cl. 226—14.)

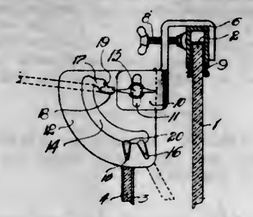


1. In a device of the class described, the combination of: a delivery member which receives objects from a previous operation; a receiver into which said objects are to be deposited in consecutive rows; a depositing member into which said objects are delivered by said delivery member, said depositing member receiving at each operation thereof a number of cans comprising a row in said receiver; and means operative from said depositing member for advancing said receiver as the rows of said objects are deposited therein by said depositing member.

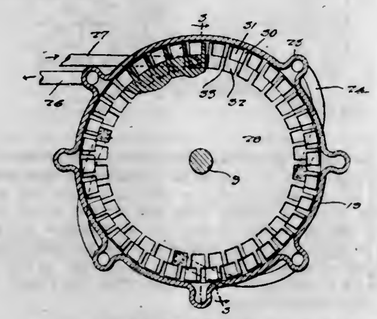
1,574,225. COASTER. MAXIMUS L. WILSON, Wichita, Kans. Filed Jan. 20, 1925. Serial No. 3,644. 4 Claims. (Cl. 208—37.)

1. In bicycle propelling mechanism, a cross-shaft, a supporting frame, a gear wheel rotatable on said shaft, a disc in approximate contact with said shaft and loose thereon, a pinion coaxial with and secured to the disc, and a circular series of drive pawls mounted in apertures in the gear wheel; said disc being provided with a series of openings being one less in number to that of the pawls in said gear so that the pawls will engage one at a time with said openings.

1,574,226. BASSINET. ALOIS R. ACKERMANN, Spokane, Wash. Filed May 5, 1925. Serial No. 28,184. 1 Claim. (Cl. 5—101.)



The combination with a supporting frame comprising a head post having a screw bar and hand wheel thereon and a foot post having a perforated trunnion thereon, of a bassinet having frame sections attached thereto, a bracket on one frame section having a nut to receive said screw bar, a bracket on the other frame section having a bearing cup for said trunnion, said bearing cup having a perforation therethrough, and a cotter pin for securing said cup and trunnion.

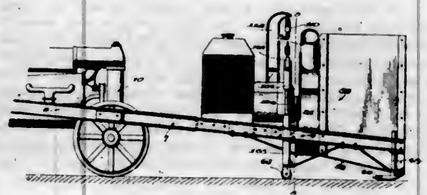


1,574,227. GLARE SCREEN. PETER J. ANDERSEN, Spokane, Wash. Filed May 11, 1925. Serial No. 29,388. 8 Claims. (Cl. 296—97.)

1. The combination with attaching means of a pair of slotted bracket plates and a complementary pair of sup-

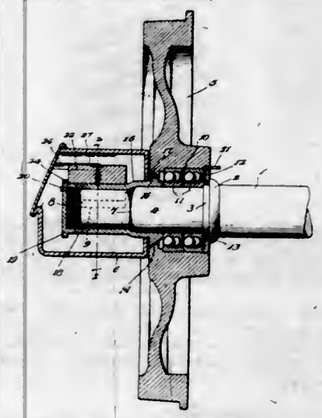
porting plates and clamping means therefor, of a glare screen having a pair of opposed trunnions, said supporting plates having complementary slots therein and complementary notches in the walls of said slots for the reception of said trunnions.

1,574,228. TURBINE. JOHN DIAZ ATWOOD, Marion, Ill. Filed Oct. 7, 1925. Serial No. 61,091. 3 Claims. (Cl. 253—66.)



1. A turbine of the class described including a casing, a rotor in the casing, said rotor provided with peripheral fins and side surface fins for forming peripheral pockets and pockets in the side surfaces communicating with the peripheral pockets, means for impinging steam against the side pockets, outlets extending from the periphery of the casing, and pipes leading from said outlets alternately to the two sides of the casing for allowing expanding steam to impinge the side pockets.

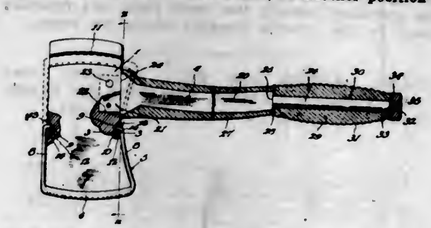
1,574,229. COIN-STORAGE TRAY AND SUPPORTING MEANS THEREFOR. EDWARD J. BRANDT, Watertown, Wis., assignor to Brandt Automatic Cashier Company, Watertown, Wis. Filed Mar. 8, 1921. Serial No. 450,585. 13 Claims. (Cl. 133—11.)



1. A storage tray for coins, having means for attachment to money changers, said tray having a plurality of coin channels varying in size to correspond with the varying size of the coin channels of the money changers, said channels of the tray being divided by transverse partitions, and said channels and partitions varying in sizes to accommodate coins of different denominations, and constructed and arranged whereby the exposed edges of all the coins will be maintained in substantially the same plane.

1,574,230. SNOWPLOW. FRANK W. BROWN, Fort Dodge, Iowa. Filed Aug. 7, 1924. Serial No. 730,692. 5 Claims. (Cl. 37—48.)

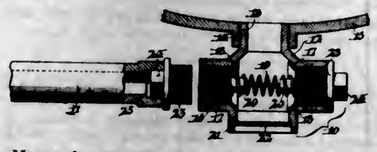
5. In a snow plow, the combination of a frame, a scoop carried thereby, means normally supporting the scoop, standards slidably carried by the frame and having ground contact members, and means connected to the standards to move the same downwardly to lift the forward portion of the scoop from the ground.



1,574,231. CAR WHEEL. ANDREW L. CARROLL, St. Louis, Mo., assignor of one-third to Fred D. Johnson, St. Louis, Mo. Filed Aug. 5, 1925. Serial No. 48,346. 2 Claims. (Cl. 295—36.)

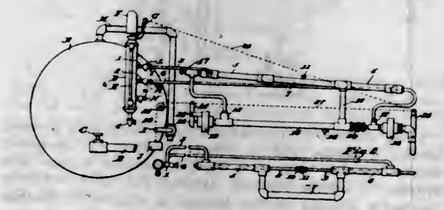
1. A car wheel structure comprising a wheel body having a central chamber larger at the inner side of the wheel than at the outer side thereof, anti-friction bearings fitted in said chamber and abutting at one side the outer wall of said chamber, a cap plate secured in the inner side of the car wheel body to close the inner end of said chamber and abut the said bearings, an axle provided with annular shoulders abutting the inner sides of the bearings and the said cap respectively, and an annular shoulder circumscribing the axle at the outer side of the car wheel and fitting within the end of the opening through the car wheel.

1,574,232. COMBINED AX AND BLADE GUARD THEREFOR. JOHN D. CASE, Olean, N. Y. Filed Mar. 12, 1925. Serial No. 15,108. 9 Claims. (Cl. 145—2.)



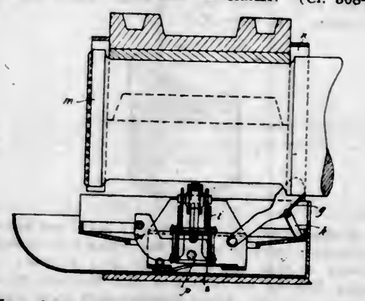
8. In a device of the class described, in combination, an ax blade having sockets in its front and rear edges, and a guard for the cutting edge of the blade comprising side members and a guard member supported thereby, the side members having pintles seating in the sockets and swingingly connecting the guard with the blade whereby, in one position of swinging adjustment of the guard, the guard member will extend along and shield the cutting edge of the blade and, in another position of adjustment of the guard, will lie beside the blade at a point remote from said cutting edge, the blade being provided in one face with a pocket to accommodate the said guard member in the last mentioned position of adjustment of the guard.

1,574,233. MANUFACTURE OF POWDERED MILK. NORMAN HENRY CHRISTENSEN, Windsor, Victoria, Australia. Filed Apr. 23, 1925. Serial No. 25,435. 12 Claims. (Cl. 99—5.)



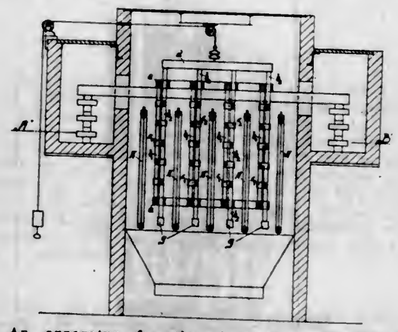
12. A process of manufacturing dried milk which consists in first adding a quantity of sodium oxalate to milk to precipitate a portion of the calcium content, treating the milk to remove the precipitated calcium, adding quantities of sodium citrate and an alkali to the milk, and then desiccating the milk by passing it in a thin film or layer over a heated roller.

1,574,234. MEANS FOR DRAINING MOTOR-VEHICLE CRANK CASES AND THE LIKE. ARTHUR B. CUMNER, Philadelphia, Pa. Filed Feb. 27, 1925. Serial No. 12,050. 14 Claims. (Cl. 137—139.)



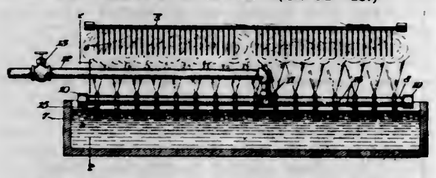
1. Means for draining motor vehicle crank cases including a drain valve having a self-seating closure, in combination with a valve opening conduit adapted to drain off the contents of the crank case.

1,574,235. BOILER-WATER-LEVEL AUTOMATIC CONTROL APPARATUS. LEWIS C. DAVIS, Baltimore, Md. Filed Apr. 3, 1925. Serial No. 20,526. 5 Claims. (Cl. 122—451.1.)



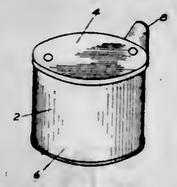
1. In a boiler water level automatic control apparatus, a chamber, means forming communication between the interior of the boiler and said chamber, and means for forming communication between the boiler and said chamber at a lower level so that as the water level lowers in the boiler the water in said chamber will drain therefrom, in accordance with the water level, through the latter means, allowing steam to enter said chamber from the boiler through the former means, and so that as the water level rises the inflow of water through the second mentioned means will drive the steam from said chamber through the first mentioned means, in combination with a container normally sealed and extending in said chamber, an operative agent in said container of such nature as to be acted upon by the heat of the steam thereon and so caused to expand to generate pressure in said container and to be condensed back to normal by immersion of the container in water of normal boiler temperature, means actuated by the expansion of said agent in said container for causing the supply of water to the boiler until the water level has been raised sufficiently to drive the steam out of said chamber and act on said container to cool the agent therein to reduce the pressure therein, and means adapted to put said chamber and said container temporarily in communication to fill said container.

1,574,236. APPARATUS FOR LUBRICATING THE AXLE BEARINGS OF VEHICLES AND THE LIKE. GEORG DUFFING, Hamburg, Germany. Filed June 5, 1924. Serial No. 718,118. 2 Claims. (Cl. 308—91.)



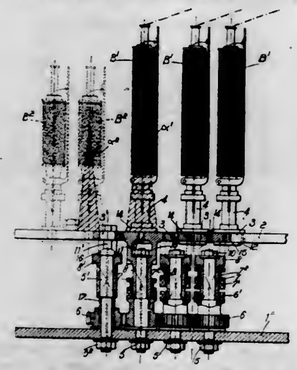
1. In a lubricating apparatus of the type wherein the lubricant is delivered to the surface of the journal by means of a ring dipping in the lubricant, the combination of a vertically and horizontally movable roller with concave bearing periphery, and a delivering ring having a knife-edge inner running surface suspended loosely on the concave bearing periphery of said roller, whereby the greatest possible freedom of movement is afforded to the ring in its work of delivering lubricant.

1,574,237. APPARATUS FOR THE ELECTRICAL PURIFICATION OF GASES. HANS EDLER, Gelsenkirchen, Germany. Filed Feb. 9, 1925. Serial No. 8,075. 7 Claims. (Cl. 183—7.)



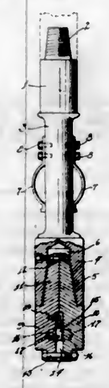
1. An apparatus for the electrical purification of gases, comprising bars of angular shape in cross section serving as collecting electrodes, and sparking electrodes consisting of flat bands arranged with their narrow edges facing towards the collecting electrodes.

1,574,238. METHOD OF IMPREGNATING MATCH SPLINTS TO PREVENT AFTERGLOW. WILLIAM J. ELDER and CHARLES N. MORRHOUSE, Oswego, N. Y., assignors to The Diamond Match Company, Chicago, Ill., a Corporation of Illinois. Filed Nov. 9, 1923. Serial No. 673,692. 2 Claims. (Cl. 91—45.)



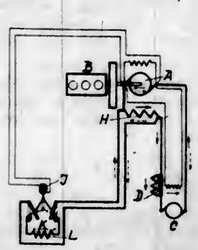
1. A process of treating match splints which consists in subjecting the individual splints to a fine spray of a concentrated solution of material adapted to impregnate the splints and prevent after-glow.

1,574,239. CAN. CHAMPE GERALDINE FITZHUGH, Washington, D. C. Filed Mar. 17, 1925. Serial No. 16,122. 2 Claims. (Cl. 220—85.)



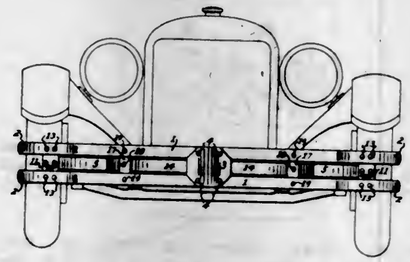
1. A closed container having side walls and end walls, the container being so shaped that there is no substantial clearance between the side walls of a plurality of adjacently disposed containers of like character when the said containers are packed together with their side walls in substantial contact, the container having a portion projecting beyond the edge of one of the end walls substantially in alinement with the side walls to form a spout, whereby the spout occupies a minimum space between the side walls of adjacently disposed containers, so as to permit packing the containers with their side walls in substantial contact.

1,574,240. CARRIER-DRIVE HEAD FOR LACE-BRAIDING MACHINES. HENRI FONTY, Paris, France, assignor to Societe Anonyme des Etablissements Lefiaine and Jean Jacques Knecht, Paris, France. Filed Nov. 9, 1925. Serial No. 67,955. 2 Claims. (Cl. 96—12.)



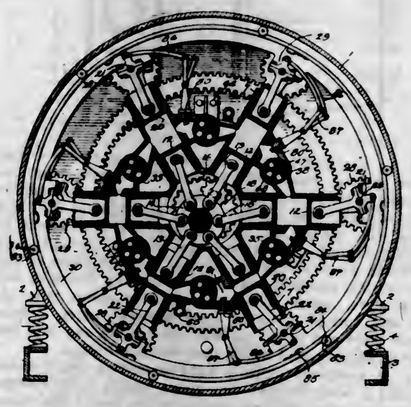
1. A lace braiding machine including in combination, upper and lower plates the upper of which is provided with a circular raceway, a series of discs arranged in the raceway and dividing the same into slots, braiding carriers mounted to slide in said slots, and drivers carrying the discs and arranged between the plates and including spindles each driver being provided with a recess positioned beneath the upper plate, and fastening means for the spindles arranged within the recess.

1,574,241. RIPPER FOR WELL CASINGS. JOHN ARTHUR FRANCIS, Parkerton, Wyo. Filed Nov. 3, 1924. Serial No. 747,662. 3 Claims. (Cl. 81—193.)



2. A casing ripper comprising a body portion having a tapered threaded recess, a cutter block composed of two sections adapted to be secured together and having contiguous portions constituting an extension and threaded to enter the threaded recess in the socket, said sections having registering recesses constituting a slot, and registering bores, and cutter blades disposed in said slot and having trunnions arranged to enter said bores.

1,574,242. ELECTRIC DRIVING INSTALLATION. WILLY FRENSDORFF, Bremen, Germany, assignor to Actien-Gesellschaft "Weser," Bremen, Germany, a Corporation of Germany. Filed July 23, 1925. Serial No. 45,581. 4 Claims. (Cl. 172—239.)



1. An electric driving installation comprising a dynamo having a series and a shunt winding; a compound wound working motor; a relay connected across said dynamo; a circuit for said dynamo and motor whereby the series winding of the dynamo is adapted to weaken the field strength of said dynamo so that the return current from the motor, when acting as a dynamo, flows through the series winding and the armature of the dynamo in order to operate it as a motor; and means for preventing reversal of polarity by the return current when it reaches a dangerous point comprising a resistance which is adapted to be connected into said circuit by said relay.

1,574,243. VEHICLE BUMPER. GEORGE J. GLAHN, Owensboro, Ky. Filed Sept. 23, 1925. Serial No. 58,115. 2 Claims. (Cl. 293—55.)

1. In a vehicle bumper as described, comprising V shape impact rails, a name-plate for the nose connection thereof, right and left supporting brackets, with straight ends, adapted to be connected to an automobile chassis, and means for connecting said brackets to the impact rails comprising vertically arranged plates with central depressions in same to receive opposite ends of said supporting brackets respectively, and means for connecting said brackets with said plates, also means for connecting said plates with said impact rails.

1,574,244. INTERNAL-COMBUSTION ENGINE. MANNING GOLDSMITH, Atlanta, Ga. Filed Oct. 13, 1921. Serial No. 507,433. 12 Claims. (Cl. 123—44.)

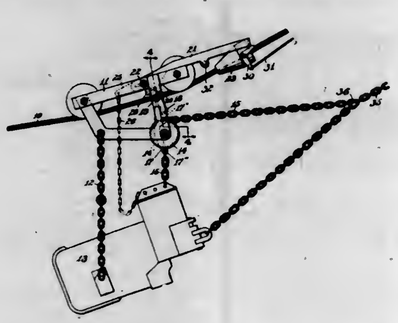
1. An internal combustion engine comprising a main shaft, a plurality of cylinders radially disposed eccentric to said main shaft and connected thereto whereby each of said cylinders travels in an orbit, an inner and outer piston in each of said cylinders, an inner crank shaft to which said pistons are connected, and a plurality of outer crank shafts to which said outer pistons are connected.

1,574,245. CALENDAR. LEW W. HAMILTON, Indianapolis, Ind. Filed July 23, 1925. Serial No. 45,469. 1 Claim. (Cl. 40—119.)

A calendar comprising a supporting back having at its upper edge a support receiving opening, a calendar pad secured in book leaf form to said supporting back intermediate of its ends, the free ends of the sheets comprising said pad having an opening therein at their lower edge to coincide, when folded upwardly, with the support receiving opening in said back, and a cover

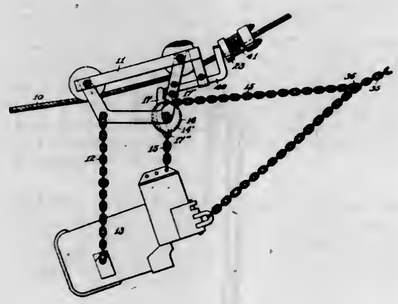
sheet for the upwardly folded pad sheets comprising a sheet doubled and having its free ends secured at the upper edge of the backing sheet.

1,574,246. ILLUMINATED SIGN. LEVI L. HEIZER, Muscatine, Iowa. Filed Dec. 29, 1924. Serial No. 758,689. 2 Claims. (Cl. 40—130.)



1. An illuminated sign, comprising a sign plate, a reflector supporting pipe having an adjustable connection with said sign plate, a reflector attached to said pipe, a cylindrical casing projecting outwardly from said reflector, a colored transparent portion arranged in said cylindrical casing, a lamp carried by said reflector supporting pipe between the reflector and said sign plate and in line with said cylindrical casing, whereby the transparent colored portion thereof is illuminated and whereby the light rays of the lamp are thrown onto the sign by the reflector.

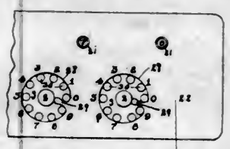
1,574,247. EXCAVATOR. ARTHUR M. HOOD, Indianapolis, Ind. Filed Dec. 27, 1923. Serial No. 682,920. 9 Claims. (Cl. 37—117.)



1. An excavator of the type described, comprising a carriage, a forwardly unbalanced scraper bucket pivotally supported on said carriage, a dragline connected to the forward end of the bucket, a lifting line connected

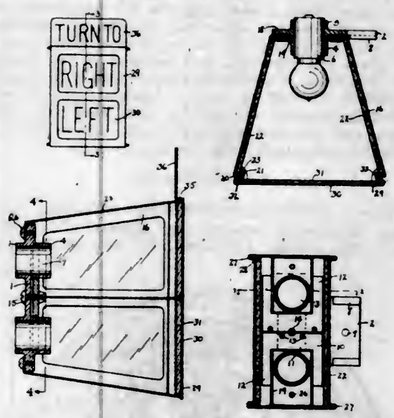
to the forward end of the bucket and passed over a support on the carriage to the dragline, means for decreasing the bucket-dumping effectiveness of the forwardly unbalanced weight of the bucket, a latch carried by

the carriage and adapted to at times limit reverse movement of the carriage, and means operated by relative longitudinal movement between the carriage and latch for increasing the bucket-dumping effectiveness of the forwardly unbalanced weight of the bucket.



1,574,248. SLACK-LINE EXCAVATOR. ARTHUR M. HOOD, Indianapolis, Ind. Filed Dec. 27, 1923. Serial No. 682,921. 4 Claims. (Cl. 37—117.)

1. An excavator of the type described comprising, a carriage, a forwardly unbalanced scraper bucket pivotally supported on said carriage, a dragline connected to the forward end of the bucket, a lift line connected to the forward end of the bucket, and passed over a support on the carriage to the dragline, means for decreasing the bucket-dumping effectiveness of the forwardly unbalanced weight of the bucket, and means movably mounted on the carriage and adapted to co-operate with a stop member and the lift line as a result of forward movement of the carriage toward the stop to increase the bucket-dumping effectiveness of the forwardly unbalanced weight of the bucket.

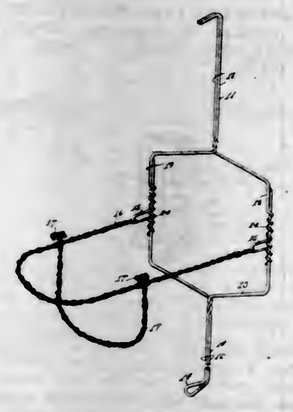


1,574,249. ADDING MACHINE. RUSSELL WALLACE HOOK, Grand Rapids, Mich. Filed Feb. 17, 1921. Serial No. 445,581. 3 Claims. (Cl. 235—131.)

1. In an adding machine, a base and a numeral wheel pivotally mounted thereon and formed with a series of evenly spaced projections, a pawl to restrain the rotation of the wheel and consisting of a clip to attach the pawl to the base, a resilient central portion and a head comprising parallel plates, a bearing strip between them,

and a weight at the outer end of the pawl, said head being normally held so that the weight at its outer end extends into the path of the projections on said wheel.

1,574,250. SIGNAL LIGHT FOR VEHICLES. PAUL KOROKNAY, Houston, Tex. Filed Oct. 26, 1925. Serial No. 64,849. 6 Claims. (Cl. 177—329.)

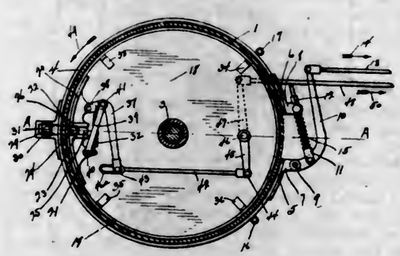


1. In a signal lantern, a housing comprising a back plate having light-receiving sockets therein, top and bottom plates of sheet metal, the rear ends of which are bent inwardly and secured to the rear face of said back plate, side plates, the rear edges of which are bent inwardly against the forward face of said back plate, or clamping plate, adapted to fit over the bent edges of said side plates, means to clamp said clamping plates to said back plate, means connecting the side plates with the top and bottom plates at their adjacent edges, a front cover plate and means on said cover plate and said side plates whereby said plates may slidably engage.

2. In a signal lantern, a light-supporting housing comprising a back plate of cast metal having light-receiving sockets therein, top and bottom walls, detachable means to secure said walls to the rear side of said back plate, the side edges of said walls being bent inwardly to form slideways, opposite side plates, means clamping the rear edges thereof to the forward side of said back plate, means engaging said top and bottom plates with said slideways, a cover plate slidable on said side plates, transparent walls in said side and cover plates, and a central partition positioned between said clamping means and said cover plate and contacting therewith at its ends.

1,574,251. ANIMAL POKE. AUGUST G. D. KREY, Wagner, S. Dak. Filed Mar. 6, 1924. Serial No. 697,284. 4 Claims. (Cl. 119—138.)

1. An animal poke including a neck encircling frame composed of separable sections, each of the sections having a substantially U-shaped portion, one of the sections having separable interlocked parts and the arms of the U-shaped portion provided with spiral coils, the arms of the U-shaped portion of the other section being received in the coiled arms of the first section and having

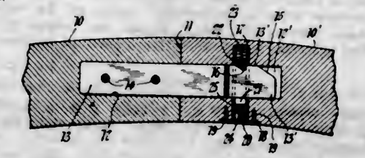


laterally directed loops engaged with the coils whereby the parts of the first section may be independently rotated after being separated to accomplish longitudinal adjustment with relation to the other section, and a head gear carried by said loops.

1,574,252. METHOD OF MAKING LIGHT, POROUS WALLS. CARL MARCZINCZEK, Oakland, Calif. Filed June 1, 1925. Serial No. 34,176. 1 Claim. (Cl. 106—34.)

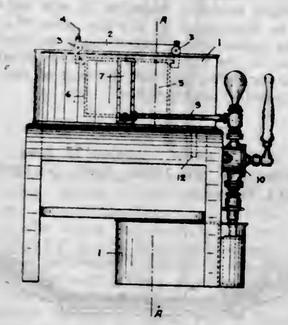
A wall material comprising a mixture substantially in the following proportions by bulk: volcanic ash forty per cent, pumice stone twenty per cent, lime (such as commonly designated as "hard wall finish"), twenty per cent, plaster of Paris twenty per cent, the whole being intimately mixed.

1,574,253. POWER BRAKE. PORTER S. MORGAN, Norwalk, Conn., assignor to Rotary Brake Company, Inc., New York, N. Y., a Corporation. Filed Oct. 7, 1919, Serial No. 328,974. Renewed May 8, 1923. 21 Claims. (Cl. 188—140.)



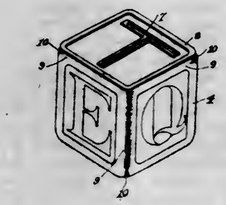
1. A brake comprising a rotary drum, an inner secondary brake band and an outer primary brake band both manually operated and adapted for angular rotation with the rotary drum, an unsymmetrical cam disposed between the ends of the secondary brake band, and means connecting the cam with the primary brake band for effecting an angular rotation of the said cam when the primary brake band moves with the rotary drum.

1,574,254. PROCESS OF TREATING BAGASSE FOR FIBER-MAKING PURPOSES. TREADWAY B. MUNROE, Forest Glen, Md. Filed July 7, 1924. Serial No. 724,712. 11 Claims. (Cl. 92—3.)



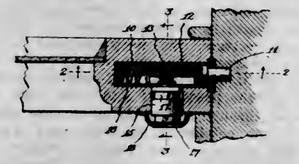
7. The process of making a heat insulating fiber board which consists in subjecting piled bagasse to an acetic acid fermentation until the fibers present are partially loosened from the bundles in which they naturally occur; stopping said fermentation before the strength of the fibers is impaired; mixing with the fermented bagasse a sufficient quantity of fibers derived from wood to aid in drying the formed board; subjecting the mixture thus obtained to a cooking action; refining the cooked mixture of fibers; separating from the refined mixture thus obtained any objectionable constituents derived from the cooking action; adding a fire resisting material to said mixture; and forming the mass thus obtained into a board.

1,574,255. TRUNDLE AND HOOP. STANLEY H. MYSLINSKI, Brooklyn, N. Y. Filed Apr. 14, 1924. Serial No. 706,231. 1 Claim. (Cl. 272—85.)



A play hoop comprised of two uniform semi-circular sections having recesses in their abutting ends, latch bars fixed in oppositely disposed recesses to extend into the remaining recesses, the hoop sections containing the remaining recesses being transversely bored, sleeves fixed in the mentioned bores, said sleeves being apertured to permit the passage of said latch bars, plungers in said sleeves through which the latch bars pass, said latch bars having notches on one edge with which elements of said plungers may engage, springs in said sleeves pressing said plungers normally into engagement and means to prevent rotation of said plungers, said plungers being manually releasable.

1,574,256. METHOD FOR THE FILLING OF HONEY-COMBS WITH SWEET LIQUID FOR THE NOURISHMENT OF BEES. MICHELE LORENZO GALLESIO-PIUMA, Piemonte, Italy. Filed Dec. 26, 1922. Serial No. 609,153. 3 Claims. (Cl. 6—12.)

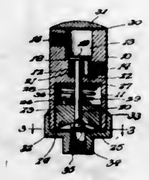


1. A method for filling honey combs with sweet liquid for the nourishment of bees consisting in exposing a hollow comb between two oppositely disposed sprinklers, and forcing a sweet liquid through said sprinklers under pressure upon the two opposite faces of the comb for filling the cells of the latter.

1,574,257. TOY BLOCK AND PROCESS OF PRODUCING THE SAME. FRANK A. REDNER, Menominee, Mich. Filed Feb. 19, 1923. Serial No. 619,958. 2 Claims. (Cl. 46—35.)

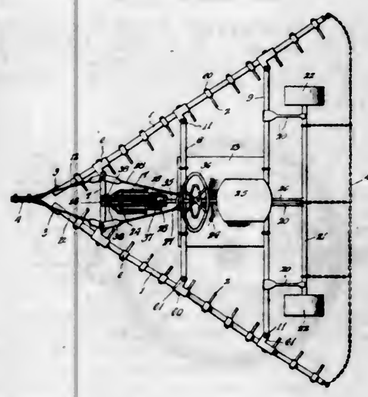
1. A toy block comprising a solid body of compressible material having angularly disposed faces, certain of said faces having raised symbols and a raised marginal border surrounding the symbols, the edges and corner portions of the body being located outside the border and said portions being compressed to round off the corners and edges, leaving the border inside the planes of the sides and protected by the compressed portions outside the same.

1,574,258. WINDOW LOCK. ANDREW J. ROSS, Los Angeles, Calif. Filed Apr. 28, 1924. Serial No. 709,485. 4 Claims. (Cl. 70—46.)



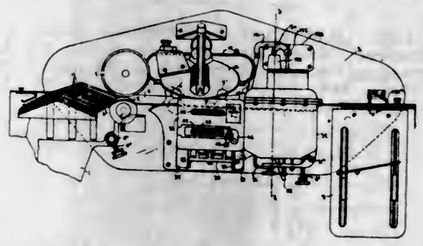
1. In a sash lock of the type set forth, a bolt-barrel set in the edge of the sash and enclosing a lock-bolt provided with a rack, a tumbler-barrel extending into the face of the sash at right angles to the aforesaid bolt-barrel and having its inner end open, a tumbler-shaft longitudinally slotted for a key and provided with a gear at its inner end, and a spring device carried by the said tumbler-barrel for locking the tumbler-shaft against rotation normally engaging in said key-slot and adapted to be disengaged by the key when the same is inserted, said spring device embodying a flat spring lying in a channel in the exterior of the tumbler-barrel and having a pin extending through the wall of the tumbler-barrel and entering said key-slot.

1,574,259. SHELL DISH. AUSTIN O. SARFF, Walker, Minn. Filed Feb. 27, 1924. Serial No. 695,565. 1 Claim. (Cl. 65—15.)



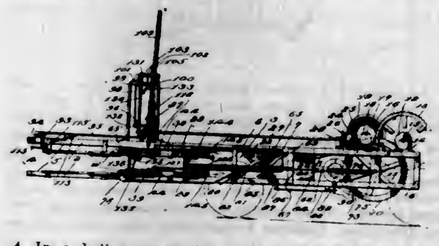
The combination with a dish having a bead on its periphery projecting outwardly of the outer surface of the dish; of a pressure nested block of thin sheets pressed on the interior of the dish and each having a marginal portion rolled around the bead and engaging against the outer surface of the dish adjacent the bead whereby the exposed sheet may be stripped from the block while leaving the remainder undisturbed.

1,574,260. AUTOMATIC PRESSURE-OPERATED FUEL VALVE. CHARLES M. SCHAEFFER, Allentown, Pa. Filed June 11, 1924. Serial No. 719,422. 1 Claim. (Cl. 137—153.)



An automatic fuel valve including a body having an inlet chamber, a communicating outlet chamber and a piston chamber separated from the inlet chamber by a dividing wall, the body being formed with a valve seat at the junction of the inlet and outlet chamber, a valve cooperating with said seat and provided with a stem extending through said wall into the piston chamber, a sleeve surrounding the stem, a gasket carried by the stem and compressed by said sleeve against said wall when the valve is closed, a pressure operated piston carried by the valve stem and slidable in said piston chamber for opening the valve, the piston being provided with a collar, a spring acting against the piston for normally holding the valve closed, and a gasket surrounding the stem and compressed against said wall by the collar when the valve is open.

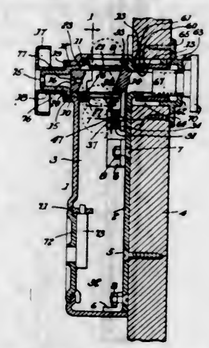
1,574,261. ROAD SCRAPER. JAMES W. SHATTO, Lorimor, Iowa. Filed May 21, 1925. Serial No. 31,865. 5 Claims. (Cl. 37—108.)



1. A road scraper comprising rearwardly diverging side bars, depending scraper blades rigidly secured to the side bars at intervals along the same, plow blades secured to the front ends of the side bars and having their front ends connected, and means for applying draft through the plow blades to the side bars.

1,574,262. MAIL-STAMPING MACHINE. GEORGE E. SHELDRICK, Detroit, Mich., assignor, by mesne assignments, to Pitney-Bowes Postage Meter Company, Stamford, Conn., a Corporation of Delaware. Filed Apr. 30, 1923. Serial No. 635,617. 52 Claims. (Cl. 101—91.)

1. In a mail marking machine, a removable and replaceable printing member, and a removable and replaceable register for registering the operations of said printing member; said printing member and said register being independently removable from and replaceable in the machine.



1,574,263. BALING PRESS. JOHN A. STOBIE, Malta Bend, Mo. Filed Apr. 20, 1921. Serial No. 463,093. 24 Claims. (Cl. 100—20.)

4. In a baling press the combination with a baling chamber of means including a long and relatively fixed support for retaining a plurality of formed bales in abutted relation adjacent said baling chamber, a plunger for compressing the material against the last formed bale, means for applying a portion of slack wire around said bale, and a needle for forming a loop in the wire, one side of said loop forming the remaining portion of the tying wire, and the other side of said loop constituting a portion of the wire for the succeeding bale to be tied, said needle being movable transversely of the baling chamber and longitudinally of the press upon the outside of said chamber.

1,574,264. COIN-CONTROLLED LOCK. WILLIAM M. SUBLETTE, Huntington Park, Calif. Filed May 15, 1924. Serial No. 713,518. 2 Claims. (Cl. 194,84.)

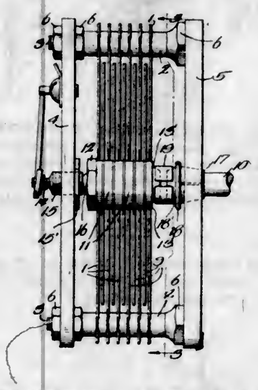
1. In a coin-controlled lock of the class described, the combination of a housing and a coin receptacle in said housing, the upper wall of the housing having a coin-receiving slot, a shaft journaled in the rear wall of said housing and extending rearwardly therefrom, a shell journaled in the front wall of said housing and extending forwardly therefrom, said shell surrounding said shaft in the housing, said shaft having a slot extending diametrically therethrough, said shell having a pair of diametrically opposed slots wider than the slot in said shaft, a shoulder at one side of the inner end of the lower slot in said shell for arresting a coin deposited through said coin-receiving slot in said shell slots and said shaft slot, a spring pressed bolt mounted in said housing for engaging a catch, a pin on said bolt, an arm on said shaft engaging said pin, a pin secured in the housing for engaging said arm to limit the projection of said bolt in locking position and for limiting the rotation of said shaft with said shaft slot in vertical alinement with said coin receiving slot, a spring connected to said shell, a stop for limiting the turning movement of said shell under the influence of said spring, with the shell slots opposite the upper and lower ends of the shaft slot

and said shoulder under the lower end of said shaft slot, the coin being adapted to engage opposite sides of said shell slots upon rotation of the shell in one direction for rotating the shaft and arm and retracting the bolt from said catch, and the coin being adapted to escape said shoulder and drop into said coin receptacle when said shaft is rotated.

1,574,265. TEAT CUP. ANGUS SUTHERLAND, Vancouver, British Columbia, Canada. Filed Mar. 7, 1925. Serial No. 13,759. 2 Claims. (Cl. 31—85.)

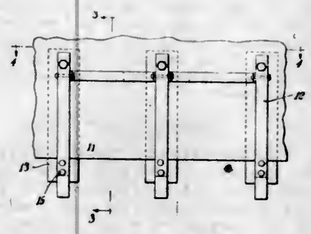
1. A teat cup, comprising the combination with an outer casing having a shouldered enlargement at the upper end and at the lower end a reduced concentric aperture with means intermediate the ends for connecting an inflator to the space within the casing, an inflation tube the length of which is less than the casing, a mouth ring comprising a frustrum of a smooth surfaced hollow cone the larger end of which is adapted for insertion within the upper end of the inflation tube to expand the same to fit the shouldered enlargement of the casing and retain it therein, a tubular connection between the lower end of the inflation tube within the casing and the milk delivery tube, said connection expanding the milk delivery tube without the casing that the enlargement of it will seal the aperture through which it passes into the casing.

1,574,266. PEN. JOHN C. WAHL, Chicago, Ill., assignor to The Wahl Company, Chicago, Ill., a Corporation of Delaware. Filed Nov. 7, 1921. Serial No. 513,231. 9 Claims. (Cl. 120—46.)



1. A fountain pen, in combination, the casing having a longitudinal slot therein, a pressure bar, a spring bar suitably secured in connection with said casing and attached to the pressure bar and provided with a centrally located slot therein, a lever pivoted in the slot in the casing and capable of projection through the slot in the spring member and into contact relation with the pressure bar, including a fashioning of a portion of the lever and relative arrangement thereof with reference to the slot in the spring, whereby, in the course of raising the lever to its open position, a portion thereof will be projected through the slot in the spring member and by contact with a wall of the slot as the lever nears its open position will induce gradual deflection and buckling action of the spring member whereby a tensioned stop for the lever will be effected and a resilient force will be developed to cause the lever to be returned to closed position.

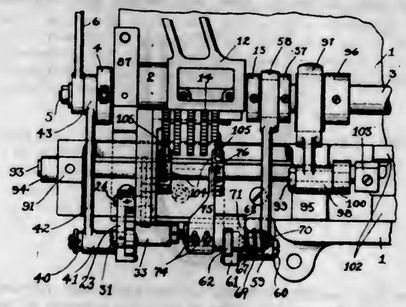
1,574,267. LIQUID-DEPTH GAUGE. HARRY C. WARNER, Kansas City, Mo., assignor to Warner Hardware Specialty Company, Kansas City, Mo., a Corporation of Missouri. Filed Aug. 22, 1925. Serial No. 51,840. 2 Claims. (Cl. 73—120.)



2. A liquid gauge comprising a metallic frame strip slotted longitudinally from near its butt end, and having lips back lapped from its longitudinal edges and butt end, a strip of black, flat-conted wire gauze held to one face of the frame strip by said back lapped lips and covering the slot in the frame strip, the opposite side of the frame strip bearing scale markings at the edges of said strip adjacent the slot.

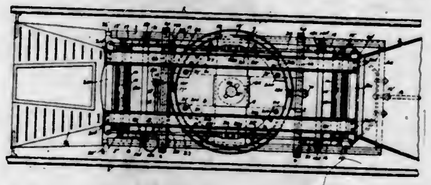
1,574,268. ELECTRICAL CONDENSER. BESTER R. WEBSTER, Chicago, Ill., assignor to Reliance Die & Stamping Company, Chicago, Ill., a Corporation of Illinois. Filed Apr. 28, 1924. Serial No. 709,514. 1 Claim. (Cl. 250—41.)

An electrical condenser including the two sides thereof, one side being a stator and the other side a rotor; a shaft carrying the condenser rotor; an end thrust bearing adjustable along the shaft axis; two abutments, one connected with the shaft and the other spaced apart from the first; and a spring in the form of a split ring bearing against said abutments and pressing the shaft upon its end thrust bearing, said abutments having conical formations tapering toward each other that are engaged by said ring.



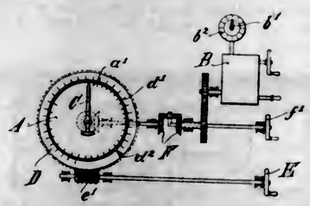
1,574,269. HOISTING BUCKET. FRANCIS H. WEEKS, New York, N. Y. Filed Aug. 20, 1925. Serial No. 51,360. 8 Claims. (Cl. 37—142.)

1. As an improved article of manufacture, a hoisting bucket having easily detachable teeth clamped to the edge portion thereof.



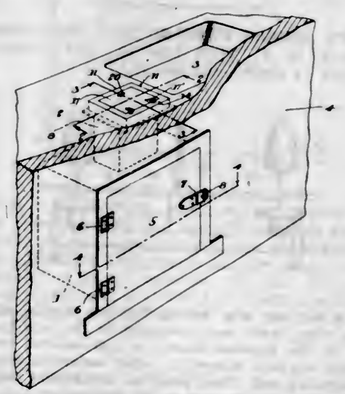
1,574,270. MULTIPLE-NEEDLE SEWING MACHINE. ALBERT H. WEIS, Nyack, N. Y., assignor to Metropolitan Sewing Machine Corporation, Nyack, N. Y., a Corporation of Delaware. Filed June 27, 1923. Serial No. 647,972. 42 Claims. (Cl. 112—209.)

1. The combination of feeding mechanism, stitching mechanism operative to automatically and simultaneously form a plurality of spaced curved lines of stitching in a garment fabric, said feeding mechanism comprising a pair of feed devices each having the feed portion



thereof located and acting on the fabric entirely at one side of said stitching mechanism, and means for independently reciprocating said feed devices.

1,574,271. TURNTABLE. RAYMOND G. WILCOX, Hannibal, N. Y. Filed Aug. 13, 1925. Serial No. 50,037. 8 Claims. (Cl. 104—45.)



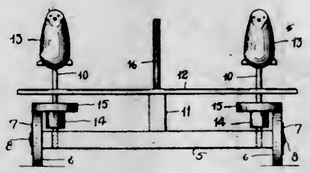
2. The combination with a turntable having spaced tracks for supporting vehicles, a carriage upon which said table is rotatable, means for locking said table after each half revolution thereof, means pivoted adjacent said tracks adapted to stop the forward travel of the vehicles across said table, a plurality of traction rollers engaging the roadbed adapted for trundling the table and carriage from place to place, and a plurality of springs arranged in pairs resiliently connecting the rollers with the carriage.

1,574,272. APPARATUS FOR DETERMINING THE TIME OF FLIGHT OF A PROJECTILE. WALTHER AKEMANN, Essen, Germany, assignor to Fried. Krupp Aktiengesellschaft, Essen-on-the-Ruhr, Germany. Filed Sept. 3, 1920. Serial No. 408,077. 6 Claims. (Cl. 235—61.)

1. An apparatus of the class described comprising a member provided with range graduations, a concentrically arranged member provided with seconds graduations, a pointer concentrically arranged relative to both of said members, a clock-work mechanism for rotating said pointer at a predetermined speed over said range and time scale, and means for adjusting said time scale relatively to said pointer, said pointer being set in operation at the instant the shot is fired and indicating at any instant the local position of the projectile and the time still existing up to impact.

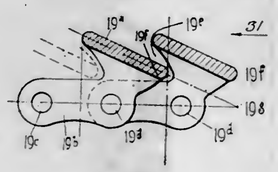
1,574,273. SANITARY REFUSE RECEIVER. WILLIAM L. ALLEN, Los Angeles, Calif. Filed May 11, 1925. Serial No. 29,478. 3 Claims. (Cl. 220—98.)

1. A garbage receptacle mounted with its entrance in the drain board of a sink, a housing below the receptacle extending through the outer wall of the house in which housing may be placed a garbage can to receive the contents of said receptacle, and means for dumping the contents of said receptacle into said garbage can.



1,574,274. PUMP. CHARLES W. G. ALLENDER, Steamboat Springs, Colo. Filed May 9, 1925. Serial No. 29,245. 1 Claim. (Cl. 230—27.)

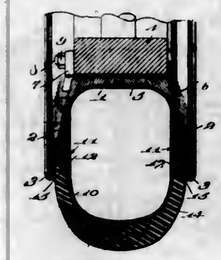
A pump of the class described comprising, in combination, a cup-like member having a port through its central portion, an outstanding neck carried by the central portion and surrounding the port, a flap valve secured within cup-like member for closing flow through the port, a handle having an end portion insertible within the neck, said inserted portion of the handle being provided with a bore open at its outer end so that the port in the cup-like member affords direct communication between the chamber of the cup-like member and the bore of the handle, a piston working within the bore of the handle, an operating rod for the piston extending freely through



the handle, and an operating knob carried by the outer end portion of the rod, the inserted end of the handle having a cut out portion affording communication with the bore of said handle, the wall of the neck being provided with a restricted port adapted to communicate with the cut out portion of the handle, the knob carried by the rod contacting with the outer end of the handle to atop the movement of the piston in a direction toward the cup-like member before the same passes over the cut out portion in the inserted end portion of the handle.

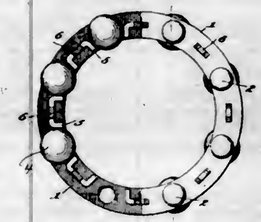
1,574,275. FIGURE WHEELED TOY. PHILIP BEECHER, Batavia, N. Y. Filed June 10, 1924. Serial No. 719,170. 1 Claim. (Cl. 46—45.)

In a toy, an axle having traction wheels, spindles having their lower ends journaled in the axle in proximity to the traction wheels, a hub secured on each axle and rotatable therewith, a disk associated with each hub, each of said disks being in engagement with the periphery of a traction wheel, the relation of parts being such that the disk supports the hub clear of the axle, a block on the axle between the wheels, a plate anchored to the block and having its ends extending outwardly to form bearings for the spindles above the hubs, and figures mounted on the spindles to rotate with them.



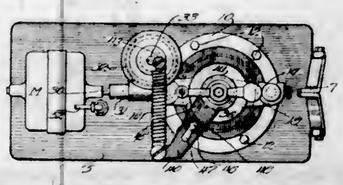
1,574,276. FURNACE GRATE. ALFRED WILLIAM BENNIS, Bolton, England. Filed May 6, 1919. Serial No. 295,208. 5 Claims. (Cl. 110—40.)

1. A chain grate fire bar having an inclined fuel supporting surface and a pair of pivotal axes, one of said axes lying outside the projection of the said fuel supporting surface on the plane containing said axes, and on the side of the fuel supporting surface opposite the intersection of the plane of the fuel supporting surface and the plane containing the said axes.



1,574,277. RIM AND TIRE CONSTRUCTION FOR VEHICLE WHEELS. MICHAEL T. CONROY, Akron, Ohio, assignor of one-half to Henry M. Groue, Cuyahoga Falls, Ohio. Filed Oct. 14, 1924. Serial No. 743,605. 3 Claims. (Cl. 152—13.)

1. A rim and tire construction comprising a rim member having a pair of rim flanges extending outward from the body thereof, a pneumatic tube encircling the body of said rim member and partially received between said rim flanges, said pneumatic tube having the portion thereof that is received between said rim flanges enlarged laterally outward to provide a pair of annular seat members, said seat members having the outer peripheral walls thereof located inwardly of the marginal edge portions of said rim flanges, and a tread member encircling said pneumatic tube and having side portions

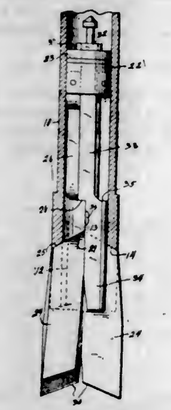


extending inwardly between the marginal edge portions of the rim flanges, the edges of said side portions of the member abutting the peripheral walls of said seat members.

1,574,278. RETAINER FOR RADIAL BALL BEARINGS. CHARLES W. DAVIS and JOHN A. CALDER, Torrington, Conn., assignors to The Torrington Company, Torrington, Conn., a Corporation of Connecticut. Filed Mar. 26, 1925. Serial No. 18,476. 1 Claim. (Cl. 308—201.)

A retainer for ball bearings comprising two parallel flat plates or rings provided with opposed pairs of slots, and a series of spacers each formed of a U-shaped piece cut away at right angles at its four corners to form tenons 6 and angular corners closely abutting the inner faces of the plates or ring, the said tenons extending through opposing pairs of slots and expanded in opposite directions at their outer ends, thereby compressing the metal thereof closely into the slots and forming a rigid connection therewith substantially flush with the outer faces of said plates or rings.

1,574,279. LUBRICANT COMPRESSOR. ERNEST W. DAVIS, Oak Park, Ill., assignor to The Bassick Manufacturing Co., Chicago, Ill., a Corporation of Delaware. Filed Feb. 16, 1921. Serial No. 445,356. 9 Claims. (Cl. 221—79.)

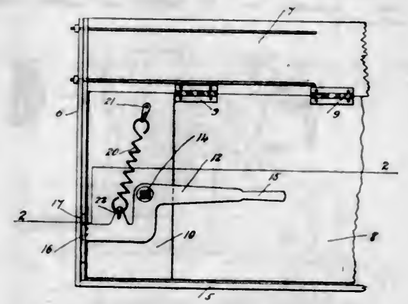


5. The combination with a container for lubricant, of a plunger movable within said container, a screw for actuating said plunger extending through said container, a rotatable collar surrounding said screw and adapted to rotate the same, said collar having an annular series

of teeth upon its periphery, an oscillatory handle, and a spring pressed dog upon said handle and engageable with the teeth upon said collar.

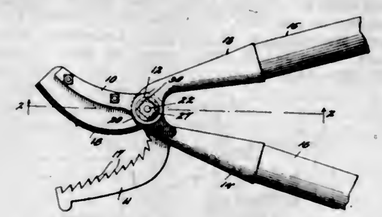
9. A lubricating outfit comprising a pump, a power source, and a speed reducing transmission between said source and said pump, said transmission including two speed reductions, the reduction next the source being irreversible and the other including a resilient take-up for permitting said source to operate when said pump is stalled by its load.

1,574,280. ROTARY UNDERREAMER DRILL. ORMAN W. DICKERSON, Oklahoma City, Okla. Filed Apr. 8, 1922, Serial No. 550,830. Renewed Aug. 11, 1925. 13 Claims. (Cl. 255—76.)



1. In a rotary under reamer drill, a drill shoe having a bore and provided in the walls thereof with blade receiving openings, a blade carrying support having a substantially fluid tight fit in the bore of the shoe, a hanger for said support vertically shiftable through the support and embodying portions which in elevated position of the hanger engage the support to suspend the same, conduits by-passing the support when suspended by said portions and having their terminal portions arranged immediately above and below the support when the hanger is in said position and other conduits in said hanger by-passing the support at all times.

1,574,281. FOUNTAIN PEN. GEORGE H. DOYLE, Holtsville, N. Y. Filed Jan. 27, 1922. Serial No. 532,297. 7 Claims. (Cl. 120—50.)

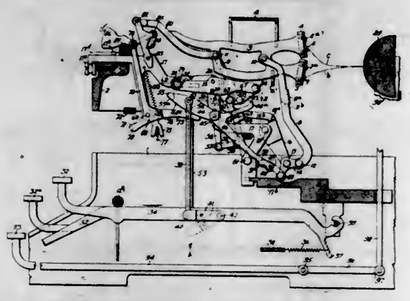


1. As an article of manufacture, a fountain pen feed bar having a main channel formed longitudinally therein, and provided with a plurality of catch depressions formed on each side of said main channel and in communication therewith, said depressions being inclined away from said channel at an acute angle in relation thereto and in a general direction of the inside end of said bar.

1,574,282. END GATE. GARFIELD A. GARRETT, Dorrance, Kans. Filed Mar. 24, 1925. Serial No. 17,967. 1 Claim. (Cl. 292—228.)

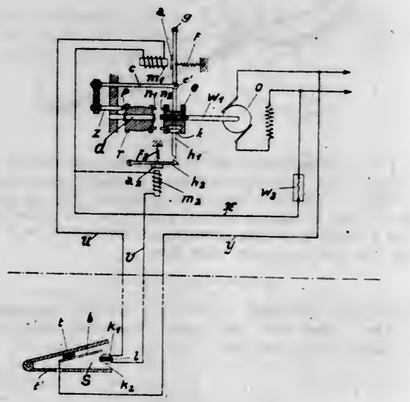
A latch for an end gate, comprising a bell-crank lever pivoted to the end gate and having a normally horizontal handle arranged radially of its pivot and having also a tongue arranged substantially parallel to the handle and adapted to project over the side edge of the end gate and engage with a socket, and a spring secured to the said tongue and to the end gate above the latch pivot.

1,574,283. PRUNING IMPLEMENT. PARIS M. GERFIN, East Petersburg, Pa. Filed Nov. 22, 1924. Serial No. 751,530. 7 Claims. (Cl. 30—11.)



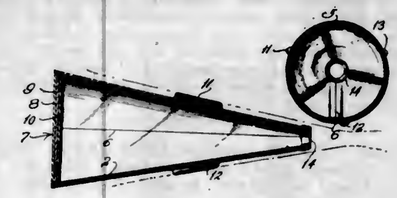
1. A pruning implement including in combination, two pivoted jaws, each provided with a handle, and adapted to move in parallel planes, a projection on the lower jaw having a bearing surface resting on the upper one, and a bushing passing through said projection, said upper jaw and into said lower jaw.

1,574,284. PEELER. JOHN H. GILLIS, Gainesville, Tex. Filed June 10, 1925. Serial No. 36,167. 4 Claims. (Cl. 146—38.)



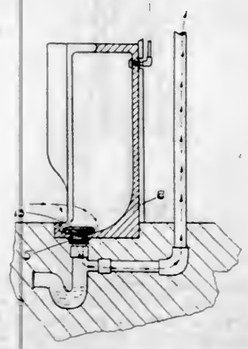
1. A peeler comprising a blade having a knife edge formed in the body thereof, and portions bent over at opposite edges of the blade both rigidifying the blade and providing guards for the thumb and forefinger of the hand operating the peeler.

1,574,285. TYPEWRITING MACHINE. GEORGE G. GOING, Middletown, Conn., assignor to Remington-Noiseless Typewriter Corporation, New York, N. Y., a Corporation of New York. Filed Feb. 9, 1925, Serial No. 7,941. Renewed Nov. 25, 1925. 34 Claims. (Cl. 197—25.)



1. In a typewriting or like machine, the combination in a type action of a type bar, a pair of supporting links therefor, a pair of actuating keys, means controlled by one of said keys for displacing from normal position a pivotal support for one of said links, and means controlled by the other of said keys for displacing from normal position the pivotal support of the other of said links.

1,574,286. CLUTCH MECHANISM FOR SOUND-REPRODUCING MACHINES AND THE LIKE. WILHELM GROENEBAUM, Neu-Babelsberg, near Berlin, Germany, assignor to the Firm Naamlooze-Vennootschap Financieele Maatschappij "Driebergen," Amsterdam, Netherlands. Filed Jan. 3, 1925. Serial No. 328. 7 Claims. (Cl. 192—18.)



1. Clutch mechanism for sound reproducing machines, comprising a rotating shaft, a fixed shaft coaxial with the rotating shaft, a driving wheel on the fixed shaft, a clutch having one member splined on the rotating shaft for sliding movement along the latter and having its companion member fixed to the driving wheel, a lever for operating the sliding clutch member, electro-magnetic means for operating the lever, a catch for holding the lever in its operative position, an arresting device for arresting the motion of the driving wheel, and means for automatically disengaging the arresting device from the driving wheel when the clutch couples the wheel with the rotating shaft.

1,574,287. MUTE. JOSEPH KEMP HOFFMAN, Baltimore, Md. Filed Sept. 2, 1921. Serial No. 497,905. 3 Claims. (Cl. 84—400.)

1. A mute comprising a frusto-conical hollow press board base; a veneering of wood applied to the exterior thereof and a diaphragm closing the larger end of the base, the various elements being permanently secured together.

1,574,288. DRAIN COVER. ARTHUR E. HOHMEISTER, Cincinnati, Ohio, assignor to The John Douglas Company, Cincinnati, Ohio, a Corporation of Ohio. Filed Apr. 30, 1923. Serial No. 635,570. 3 Claims. (Cl. 4—106.)

1. A urinal structure comprising a metallic drain pipe having an inlet opening, a vent pipe communicating with the drain pipe below the inlet opening, a vitreous fixture having an opening for receiving the open end of the drain pipe and for directing fluid into the drain pipe, and an imperforate vitreous cover over and spaced from the inlet opening of the drain pipe, the vitreous cover serving as a deflector for distributing a flow of air over all of the metal parts of the structure at the inlet opening and which air moves into the drain pipe inlet opening and into the vent.

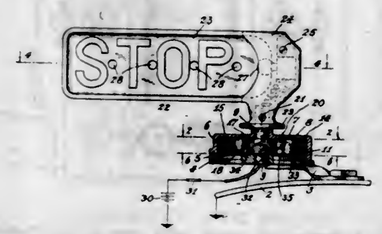
1,574,289. PROTECTIVE COATING FOR MAGNESIUM. LEWIS J. KEELER, Niagara Falls, N. Y., assignor to American Magnesium Corporation, Niagara Falls, N. Y., a Corporation of New York. Filed Jan. 22, 1923. Serial No. 614,304. 5 Claims. (Cl. 204—1.)

1. The process of coating magnesium and its alloys comprising bringing the metal in contact with nascent fluorine.

1,574,290. PROTECTIVE COATING FOR MAGNESIUM. LEWIS J. KEELER, Niagara Falls, N. Y., assignor to American Magnesium Corporation, Niagara Falls, N. Y., a Corporation of New York. Filed Jan. 22, 1923. Serial No. 614,305. 7 Claims. (Cl. 204—1.)

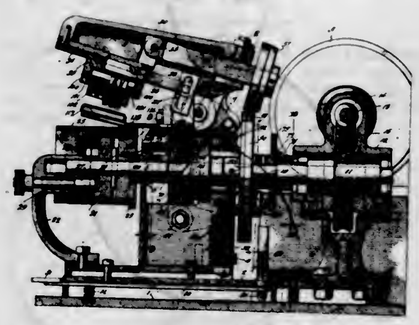
1. The process of coating magnesium and its alloys which comprises electrolyzing a solution of an alkali metal chromate, using the said metal as an anode.

1,574,291. PUMP. FRANK C. KELLEY, Long Beach, Calif., assignor of one-half to Elmer W. Riggle, Los Angeles, Calif. Filed July 8, 1924. Serial No. 724,775. 3 Claims. (Cl. 103—204.)



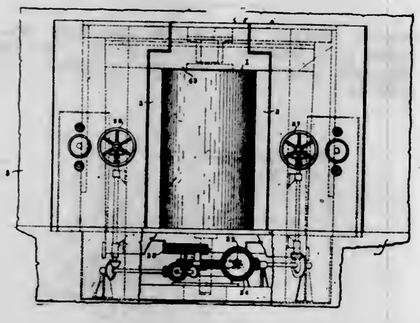
1. A pump of the character disclosed, including a liner, a working barrel surrounding said liner and spaced therefrom, ports disposed in said liner and permitting communication between the liner and the interior of the working barrel, a plunger within such liner, certain of the ports being so disposed within the liner that they are at all times covered by the plunger during its working strokes.

1,574,292. PUMP. FRANK C. KELLEY, Long Beach, Calif., assignor of one-half to Elmer W. Riggle, Los Angeles, Calif. Filed July 8, 1924. Serial No. 724,776. 4 Claims. (Cl. 103—204.)



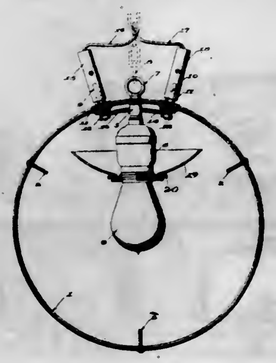
1. In a pump of the character disclosed, a working valve, an annular plunger carried by the working valve at one end thereof, and a tubular member carried by the said working valve at the other end thereof; said working valve permitting communication between the annular plunger and the tubular member during certain movement thereof; a working barrel adapted to confine the plunger, working valve and tubular member; an annulus within the tubular member and pump tubing secured to said annulus, and in part confined in the tubular member, said annulus being formed with a port of communication with said pump tubing, and said tubular member being formed with a port in communication with the port in the annulus.

1,574,293. SIGNAL DEVICE FOR VEHICLES. FREDERICK C. S. KNOWLES, Freeport, N. Y. Filed Nov. 22, 1921. Serial No. 517,139. 4 Claims. (Cl. 116—46.)



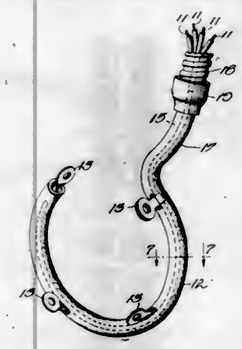
1. In a device of the kind described, a signal plate, said plate being recessed at one side thereof, a lamp in the recess for illuminating said plate, a guard plate mounted on said signal plate having a recess to cooperate with the recess on the signal plate for completely covering said lamp except at the side through which the light passes to illuminate said signal plate, and a water tight washer interposed between the meeting edges of said guard plate and signal plate.

1,574,294. DUPLICATE-TAG-PRINTING MACHINE. FREDERICK KOHNLE, Dayton, Ohio, assignor to The Monarch Marking System Company, Dayton, Ohio, a Corporation of Ohio. Filed Mar. 14, 1925. Serial No. 15,669. 25 Claims. (Cl. 101—301.)



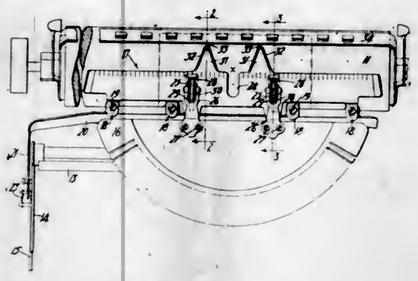
1. In a device of the class described, a printing arm pivotally mounted, a type carrying slide reciprocable thereon, a platen engageable by the slide, a pivoted lever for oscillating the slide having an abutment projecting therefrom, a drive shaft having a cam thereon engageable with said abutment for oscillating lever and slide, and means operable from the drive shaft for obtaining dwell of the printing arm, during type slide movements, and printing movements of the arm when the type slide is stationary.

1,574,295. **SAFE.** SAMUEL FORRY LAUCKS and WILLIAM E. WILKINSON, York, Pa., assignors to said Laucks. Filed May 11, 1922. Serial No. 560,013. 36 Claims. (Cl. 109—1.)



1. A closure for vaults, safes and the like including, in combination, a wall having an opening, a door for closing said opening mounted for rotation on its axis and for bodily axial movement, marginal bearing and sealing ribs adjacent said opening, and co-operating upright and transversely extending guiding ribs interposed between said wall and said door and being inclined to the axis of said door, said guiding ribs being opposed to said sealing ribs so as to guide the door upon axial movement thereof to effect through said sealing ribs tight joints at the margins of said closure.

1,574,296. **ELECTRIC-LIGHT FIXTURE.** VICTOR LE BEAU, New Orleans, La.; Paula Le Beau sole legatee of said Victor Le Beau, deceased. Filed Dec. 29, 1924. Serial No. 758,681. 1 Claim. (Cl. 240—78.)



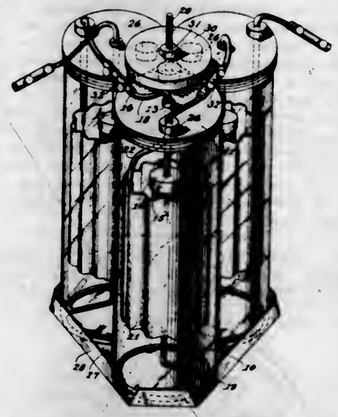
An electric fixture comprising a ring adapted to be suspended in a manner to maintain the ring in a vertical plane, an electric bulb having its illuminating element disposed at the center of the ring and along a radius of said ring, translucent globes mounted on the ring and extending in opposite directions from the light source and having their longitudinal axis in alinement with the longitudinal axis of the ring, and a convex deflector connected with the bulb and located above the illuminating element and at one side of the horizontal axis of the ring.

1,574,297. **ELECTRIC CABLE.** CHARLES L. LILLEBERG, Chicago, Ill. Filed Dec. 7, 1921. Serial No. 520,512. 1 Claim. (Cl. 173—324.)

A cable provided with an enclosing conduit having a portion formed with lateral openings distributed along the same through which wires of the cable are accessible for circuit connection, said cable also having a stiffening core in its conduit.

1,574,298. **TYPEWRITING MACHINE.** JOSEPH LINDBURG, Bay Ridge, Brooklyn, N. Y., assignor to Underwood Typewriter Company, New York, N. Y., a Corporation of Delaware. Filed Feb. 23, 1924. Serial No. 694,548. 7 Claims. (Cl. 197—135.)

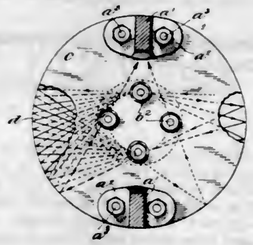
1. In a typewriting machine, the combination with a revoluble up-and-down shiftable platen and writing instrumentalities, of a thin, broad card-guide plate supported at the front of the platen and extending therealong and mounted to shift up and down therewith and having a type-clearing recess, and means mounted upon the stationary framework and directly pressing against the card-guide on opposite sides of the weakened portion formed by the type-clearing recess and close to the printing point, whereby said shifting card-guide is at all times supported against bowing outward at the weakened portion, and the card consequently held firmly against said platen at the printing point in all positions of the platen.



1,574,299. **AUTOMATIC DRIVE.** FISHER H. LIPPINCOTT, Philadelphia, Pa. Filed Mar. 13, 1924. Serial No. 698,965. 9 Claims. (Cl. 192—105.)

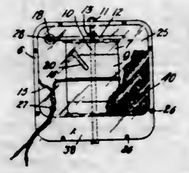
1. In an automatic drive, a driving member, a driven member, driving and driven friction members contributing to form an operative connection between said driving and driven members, means automatically controlled by and in accordance with the speed of said driving member to vary the degree of friction between the friction members, resilient means tending to cause the

clutching engagement of said friction members, and power amplifying means between said resilient means and said friction members.



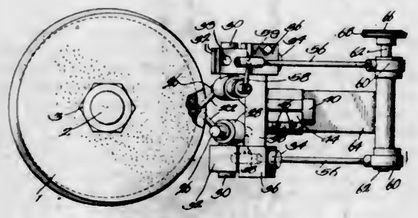
1,574,300. **PRIMARY BATTERY.** MARTIN L. MARTUS, Woodbury, and EDMUND H. BECKER and JAMES G. ROSS, Waterbury, Conn. Filed June 2, 1924. Serial No. 717,225. 12 Claims. (Cl. 136—115.)

1. In a battery, a jar, an electrode element, spring means supporting said element vertically within said jar engaging the inner upright wall of the jar and adapted to centralize said element along the vertical axis in the jar, another electrode element spaced from said first element, and means supporting said last named element within the jar independently of said first element.



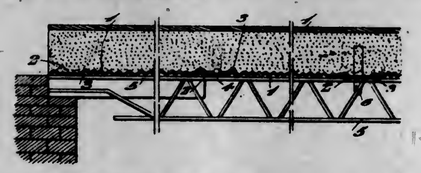
1,574,301. **FLEXIBLE COUPLING FOR SHAFTING.** ALFRED F. MASURY, New York, N. Y., assignor to International Motor Company, New York, N. Y., a Corporation of Delaware. Filed Apr. 19, 1924. Serial No. 707,547. 3 Claims. (Cl. 64—96.)

3. In combination with driving and driven shafts, a disc of re-enforced fabricated material, diametrically disposed arms carried with an end of one of the shafts, bolts to connect the extremities of the arms with the disc, a coupling plate carried with the proximate end of the other shaft and of lesser radius than the arms, bolts to connect the coupling plate with the disc, and continuous tension cords formed within the disc and disposed in the



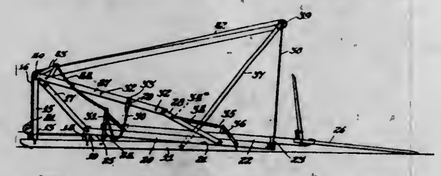
plane of the disc and tangentially of the arc of movement of the point of connection between the coupling plate and disc.

1,574,302. **PIEZO-ELECTRIC LOUD SPEAKER.** ALEXANDER M. NICOLSON, New York, N. Y., assignor to Western Electric Company, Incorporated, New York, N. Y., a Corporation of New York. Filed Dec. 31, 1923. Serial No. 683,643. 11 Claims. (Cl. 179—101.)



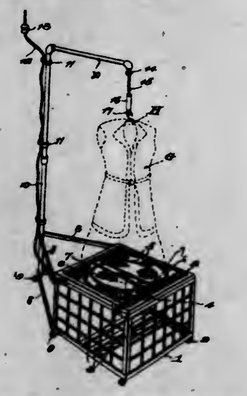
1. In combination, a piezo-electric crystal, a frame therefor, means for transmitting elastic vibrations of the crystal to a diaphragm, and internal electrode means for the crystal, said electrode means protruding through the surface of said crystal and engaging said first means and said frame.

1,574,303. **PROCESS AND MACHINE FOR DRESSING ABRASIVE ELEMENTS.** CARL G. OLSON, Chicago, Ill., assignor to Illinois Tool Works, Chicago, Ill., a Corporation of Illinois. Filed July 5, 1923. Serial No. 649,600. 12 Claims. (Cl. 125—11.)



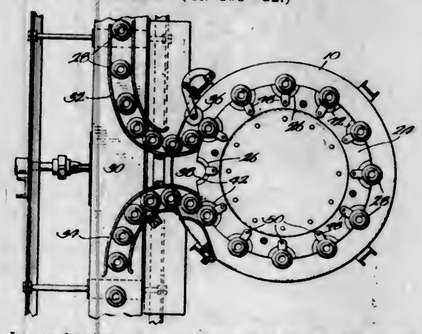
1. The process of dressing preformed, helicoidal and annular surfaces formed on bodies which are rotatable about their axes, said process consisting in causing the point of a pointed scarifying tool to oscillate at high speed through a limited arc lying in the surface to be dressed, and simultaneously causing the work to rotate about its own axis, the tool thereby producing a series of scarfs which in the agregate envelop the surface to be produced.

1,574,304. METAL LATH. GEORGE F. PAWLING, Philadelphia, Pa. Filed July 2, 1924. Serial No. 723,638. 4 Claims. (Cl. 72—116.)



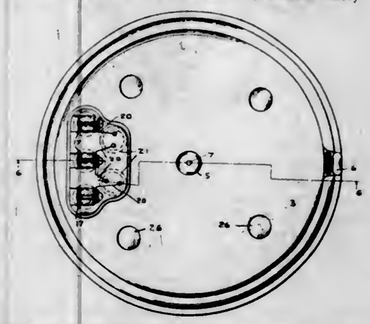
1. The combination with a structure to be spanned, and spaced joist spanning said structure of a series of strips, of metal lath arranged across said joist said strips being bordered by solid webs, the adjacent webs of said lath overlapping and each having formed therefrom opposed clips, said clips in use being bent backwardly and clinched in pairs to interlock said webs in a continuous, horizontal plane.

1,574,305. STACKER. CHARLES PEARSON, Chicago, Ill., assignor to International Harvester Company, Chicago, Ill., a Corporation of New Jersey. Filed Mar. 8, 1924. Serial No. 697,727. 9 Claims. (Cl. 214—141.)



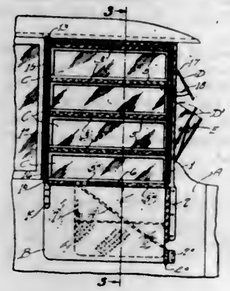
1. The combination of a normally stationary base frame, a lifting frame pivoted thereon, said frame comprising a main lifting arm and an extension arm, means for swinging the lifting frame upwardly and for simultaneously causing projection of the extension arm, and means independent of said swinging means and having one end connected to means fixed relative to the base frame for effecting retraction of the extension arm on downward movement.

1,574,306. GARMENT DRIER. WILLIAM ALBERT RAMSEY, Charlottie, N. C. Filed Aug. 6, 1925. Serial No. 48,548. 5 Claims. (Cl. 34—26.)



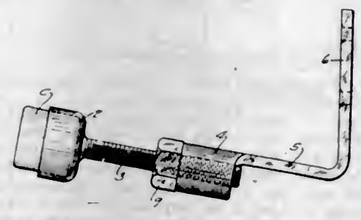
1. In a garment drier, the combination of a skeleton frame having a base to support an electric fan, an L-shaped rod for supporting the garment over the frame, braces securing said rod to the frame, a screen-covered hinged lid on the frame, a ring device anchored on the frame, means for suspending one end of the garment from the end of the L-shaped rod, and means for fastening the other end of the garment to the ring-shaped anchoring device.

1,574,307. BOTTLE ADAPTER FOR BOTTLE-FILLING MACHINES. ARTHUR I. RISSER, Chicago, Ill., assignor to U. S. Bottlers Machinery Co., Chicago, Ill., a Corporation of Illinois. Filed Apr. 7, 1924. Serial No. 704,560. 1 Claim. (Cl. 198—22.)



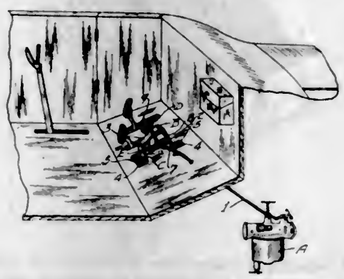
In mechanism of the class described, a bottle transporting member having a vertically extending notch, and an adapter member conforming to and detachably engageable in the notch, one of said members having an opening therein and the other having a dowel pin engageable in said opening to secure the members together with the side portions of the outer face of the adapter member in registry with the adjacent portions of the outer face of the bottle transporting member, said adapter member having a greater depth than the length of the dowel pin whereby the positioning of the lower end of the adapter member in the upper end of the notch with the side portions of its outer face in registry with the adjacent portions of the outer face of the bottle transporting member will aline said opening and dowel pin to effect certain engagement of the dowel pin in the opening by downward movement of the adapter member in the notch.

1,574,308. ELECTRIC HEATING UNIT. EDWIN A. RUTENBER, Milwaukee, Wis. Filed Aug. 22, 1924. Serial No. 733,514. 11 Claims. (Cl. 219—43.)



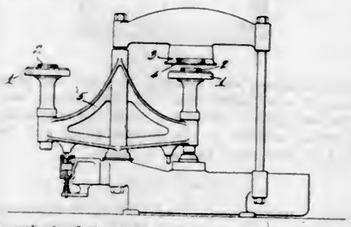
2. In an electric heating device, a shallow dish-shaped shell member having a shoulder formed on the inner side walls and an inverted cup-shaped lug struck up from the bottom thereof, an insulating support for a heating element resting on said shoulder and said lug to provide an air space between the bottom of the support and the bottom of the shell member, and said support being attached to said shell member only at its point of engagement with said lug.

1,574,309. STORM FRONT FOR VEHICLES. EDWARD W. SAUNDERS, St. Louis, Mo. Filed Oct. 27, 1923. Serial No. 671,209. 5 Claims. (Cl. 296—45.)



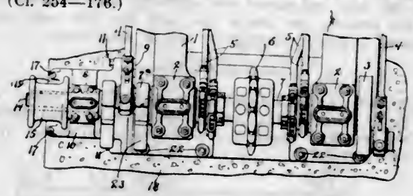
1. A door for vehicles having an upper portion formed by a plurality of hinged, horizontally-disposed, transparent panels, and a lower portion arranged so that it can swing on a horizontal axis located at the top edge of same.

1,574,310. SPEED-PEDAL-LOCATING DEVICE FOR AUTOMOBILES. EDWARD W. SAUNDERS, St. Louis, Mo. Filed Dec. 15, 1924. Serial No. 755,975. 1 Claim. (Cl. 74—81.)



A device for the purpose described, consisting of a supporting member adapted to be connected to the dash of an automobile, an angularly-disposed arm projecting rearwardly from said member and provided with an internally screw-threaded lug, a rod screwed into said lug and provided at its outer end with a cup, a buffer mounted in said cup, and a jam nut on said rod for preventing said rod from turning accidentally with relation to said lug.

1,574,311. FOOT ACCELERATOR FOR CARBURETORS. EDWARD W. SAUNDERS, St. Louis, Mo. Filed Dec. 15, 1924. Serial No. 755,976. 6 Claims. (Cl. 74—81.)

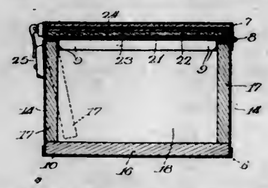


1. A foot accelerator for carburetors, comprising a foot rest arranged at one side of a foot pedal that can be engaged by a sidewise movement of the operator's foot positioned on said foot rest, and a carburetor controlling device on said foot rest arranged so that it can be engaged and actuated by a sidewise movement of the operator's foot in the opposite direction.

1,574,312. METHOD OF FINISHING SHIRTS. LEONARD S. SMITH, Cincinnati, Ohio, assignor to The American Laundry Machinery Company, Cincinnati, Ohio, a Corporation of Ohio. Filed Mar. 13, 1922. Serial No. 543,360. 1 Claim. (Cl. 68—9.)

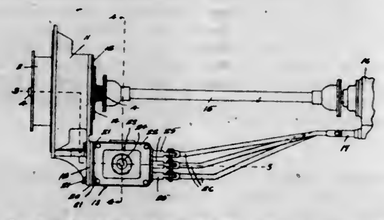
The method of finishing stiff bosom shirts, consisting in dressing the shirt upon a padded ironing board, subjecting the shirt bosom simultaneously over its entire area to the pressing effect of a heated smooth surfaced head, maintaining pressing contact for a period sufficient to set the form of the bosom but without complete expansion of the starch granules, and then while the shirt is still in position on said board and without changing its established set moistening the bosom and subjecting it to the effect of a hand finishing iron for producing a high polish or gloss thereon.

1,574,313. CATHEAD ATTACHMENT FOR DRILLING ENGINES. SIDNEY V. STEWART, Corry, Pa., and EDWARD TIMBS, Los Angeles, Calif., assignors of one-half to Union Tool Company, Torrance, Calif., a Corporation of California, and one-half to Ajax Iron Works, Corry, Pa., a Corporation of Pennsylvania. Filed Apr. 15, 1925. Serial No. 23,434. 3 Claims. (Cl. 254—176.)



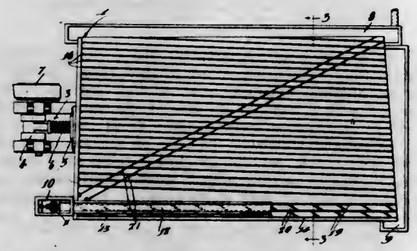
1. In a "cat-head" attachment for a steam drilling engine, the combination of an engine frame having a pair of aligning bearings, a crank-shaft carried in the bearings, with a crank at the side of the frame, a pillow-block constituting a part distinct from the frame of the engine and bolted to the side of the engine frame below said crank, said pillow-block having an outboard bearing aligning with the first named bearings and receiving the end of said shaft adjacent the said crank, said shaft having a neck projecting beyond the outboard bearing, and a "cat-head" carried on the neck.

1,574,314. RECEPTACLE. NATHAN M. STONE, Chicago, Ill. Filed Nov. 7, 1924. Serial No. 748,304. 3 Claims. (Cl. 220—84.)



1. In a receptacle, the combination with a metal box frame comprising an upper rectangular frame member formed of channel like sides and ends, a lower rectangular frame member formed of angle shaped sides and ends and angle shaped uprights connecting the corners of

the upper and lower frame members, all of said members being permanently secured together, of outer side and end panels located behind and overlapping the vertical flanges of said frame members, a bottom panel resting on the bottom flanges of the lower frame member with

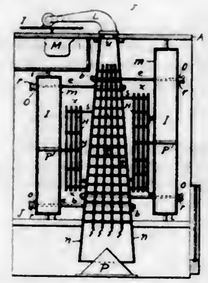


its edges engaging and securing in place the lower edge portions of said outer side and end panels and inner side and end panels extending from the channels of the upper frame member to the bottom panel and cooperating to hold the outer panels in place.

1,574,315. MOUNTING FOR GEAR-SHIFTING LEVERS. HENRY W. SWEET, Syracuse, N. Y., assignor to Brown-Lipe Gear Company, Syracuse, N. Y., a Corporation of New York. Filed May 26, 1925. Serial No. 33,018. 8 Claims. (Cl. 74—39.)

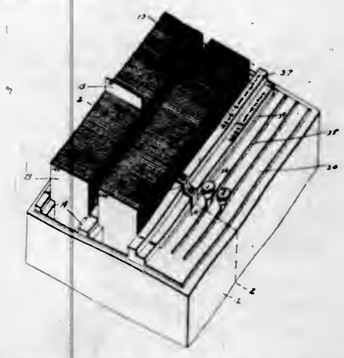
1. In a transmission mechanism, the combination of a clutch, a clutch case, a change speed gearing in the rear of the clutch and spaced apart therefrom and including a case and shiftable members extending outside of the case and means for operating said members located between the clutch case and the gear case comprising a support carried by one of said cases.

1,574,316. ORE-CLASSIFYING TABLE. WARREN C. TRACY, Los Angeles, Calif. Filed Mar. 27, 1924, Serial No. 702,231. Renewed Jan. 5, 1926. 5 Claims. (Cl. 209—441.)



1. An ore classifying table of the class described comprising a table top, supports for the table top, means for reciprocating the table top in relation to the supports, a cover for the said table top, there being riffles in the table top at an angle to the direction of reciprocation of the table top, there being riffles in the table top substantially parallel to the direction of reciprocation of the table top, and inter-communicating veins or riffles in the table top between the said parallel riffles.

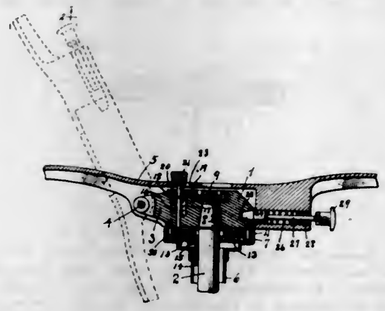
1,574,317. MANUFACTURE OF ZINC OXIDE. HOWARD H. UTLEY and JEAN MCCALLUM, Florence, Colo., assignors to River Smelting and Refining Company, St. Louis, Mo., a Corporation of Maine. Filed June 7, 1923. Serial No. 644,054. 7 Claims. (Cl. 23—148.)



1. The process of manufacturing zinc oxide from fume product containing zinc and lead, which comprises chloridizing the lead and other chloridizable matter and thereby separating by volatilization the lead and other chloridizable matter from the zinc oxide, mixing the residue with carbonaceous reducing material and roasting the mixture.

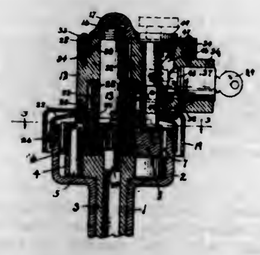
1,574,318. PHONOGRAPH. IGNATIUS J. VETTER, New York, N. Y. Original application filed May 29, 1922, Serial No. 564,645. Divided and this application filed Jan. 28, 1924. Serial No. 688,994. 12 Claims. (Cl. 181—27.)

1. In a sound reproducing or transmitting instrument, the combination of a vibratory side wall for a sound enclosure, a resonator, an intermediate sound board having sound transferring posts engaging respectively with said side wall and a side of the resonator and a rack of sound boards within the enclosure vibrationally engaged with the inside thereof and communicating its vibrations to those of the intermediate rack to superadd their effects to those produced in the side wall and thereby reinforce the total effect upon the resonator.



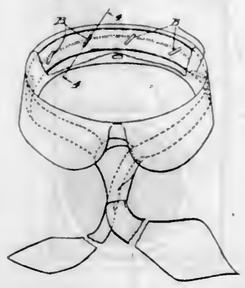
1,574,319. SELECTING CONTAINER FOR PAY ENVELOPES, ETC. AINSLEY J. VINCENT, Lawrence, Mass. Filed Oct. 7, 1924. Serial No. 742,165. 5 Claims. (Cl. 129—16.1.)

1. A selecting container for articles of the character stated, comprising a tray having an open top and a row of holders adapted to releasably support spaced apart articles with their upper ends projecting above the top, a carrier movable horizontally in the tray under and



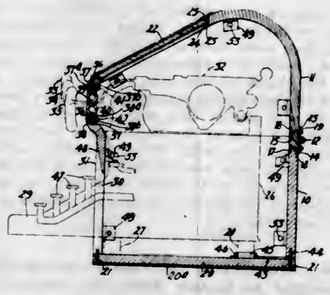
lengthwise of the row of holders, and selecting mechanism mounted on the carrier and including an article lifter located below the holders and movable horizontally by the carrier lengthwise of the row to a position under any article in the row, and movable vertically independently of the carrier to upwardly project an article under which it is located, a vertically movable plunger engaged with and guided by the carrier and projecting upwardly from the tray top at one side of the row of holders, means yieldingly supporting the plunger in a raised position, so that it may be manually depressed, and connections between the plunger and the lifter, adapted to convert a downward movement of the plunger into an upward movement of the lifter, the carrier being horizontally movable by the plunger, the arrangement being such that the plunger and the articles held by the holders project upward side by side from the top of the tray when the latter is in its operative position.

1,574,320. STEERING WHEEL. EDWARD H. VINCENT, Detroit, Mich. Filed Nov. 5, 1923. Serial No. 672,880. 14 Claims. (Cl. 74—33.)



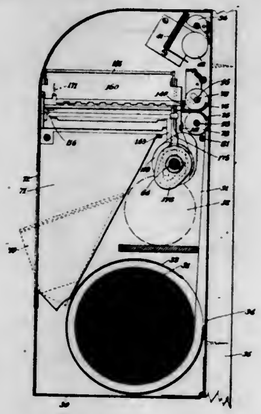
1. In combination, a steering shaft, a wheel head mounted thereon and having an opening parallel to and offset from the axis of said shaft, normally disengaged electrical contact elements, one of said elements being movable through the opening in the head, the other contact element being stationary below and carried by the head and engageable by the movable element, and means above the head and connected to the movable element to operate the same.

1,574,321. STEERING WHEEL. FREDERICK VINCENT, Detroit, Mich. Filed Dec. 20, 1921. Serial No. 523,698. 12 Claims. (Cl. 70—129.)



1. In a steering mechanism, a main rotatable steering shaft, a casing therefor having an internal circular rack, planetary gears carried by said main shaft and meshing with the rack, a member rotatable with and carried by the main shaft, a shaft section having a pinion meshing with and driving the planetary gears, said shaft section carrying a steering wheel structure including locking means adapted to have engagement with said member to prevent rotation of said shafts and planetary gears.

1,574,322. NECKTIE. NILS AUGUST WAHLQUIST, Chicago, Ill. Filed Jan. 16, 1924. Serial No. 686,470. 3 Claims. (Cl. 2—156.)

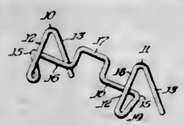


1. A necktie and the like having polished slightly convex clips of hard material clinched to the fabric of the tie at the inner side, positioned at intervals over the portion of the length of the tie which is to be embraced between the folds of the collar at the rear portion thereof.

1,574,323. TYPEWRITING MACHINE. JOHN WALDHEIM, Elizabeth, N. J., assignor to Underwood Typewriter Company, New York, N. Y., a Corporation of Delaware. Filed July 3, 1922. Serial No. 572,396. 9 Claims. (Cl. 197—186.)

1. A casing for a typewriting machine, in two sections, each composed of sheets of self-sustaining sound-deadening composition attached at its edges to form sound-proof joints, one of the sections being a cover hinged to the other section at the rear of the casing, said cover-section having the lower edge of its rear wall beveled, the other section having the upper edge of its rear wall beveled, and means for securing the leaves of the hinge to the board-material of the casing-sections, while maintaining a smooth interior finish, comprising strips of metal countersunk in the inner faces of the casing-sections, and screws passing through said strips and through the casing-walls to the leaves of the hinge.

1,574,324. MACHINE FOR MANUFACTURING PAPER CUPS. JOSEPH V. WECKBAUGH, New York, N. Y., assignor to American Cuptor Corporation, a Corporation of Delaware. Filed Nov. 22, 1920. Serial No. 425,800. 15 Claims. (Cl. 93—36.)



1. In a machine of the character described for making conical, metal bound paper cups; a casing, and an apertured outlet chute shaped to receive the completed cup in inverted position with its bound edge forward and having a front portion to retain the cup in the chute.

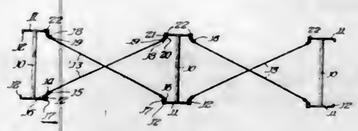
1,574,325. BUMPER. HARRY G. WEYMOUTH, Cleveland, Ohio, assignor to The Eaton Axle and Spring Company, Cleveland, Ohio, a Corporation of Ohio. Filed May 29, 1925. Serial No. 33,659. 3 Claims. (Cl. 293—55.)

1. In bumpers for vehicles, the combination of a plurality of vertically spaced impact bars connected together at their ends, each of said bars comprising a plurality of relatively adjustable overlapped members whereby the length of said bars may be adjusted to suit the width of the vehicle, a plurality of bars arranged in the rear of said impact bars with their outer ends connected with the ends of the impact bars and with their inner ends bent forwardly for independent connection with the impact bars, and clamping means for securing said inner ends to said impact bars and for securing said members of the impact bars in any relation to which they are adjusted.

1,574,326. RIB CHAIR. WILLIAM E. WHITE, Chicago, Ill., assignor to Kalman Steel Co., Chicago, Ill., a Corporation of Delaware. Filed Dec. 26, 1922. Serial No. 608,863. 4 Claims. (Cl. 72—122.)

2. A rib chair composed of a continuous wire providing two pairs of legs and a connecting member, said connecting member being arranged horizontally at a point midway of the height of the legs and shaped to provide a seat for a reinforcing bar.

1,574,327. BAR SPACER. WILLIAM E. WHITE, Chicago, Ill. Filed Dec. 26, 1922, Serial No. 608,864. Renewed Nov. 11, 1925. 6 Claims. (Cl. 72—122.)

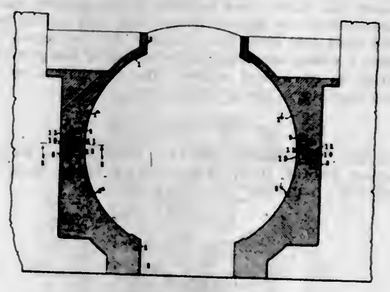


3. A spacing device composed of a single length of wire and chairs formed therein, the length of wire between each chair having at each end thereof a downwardly and outwardly projecting portion constituting a leg, the legs of adjacent lengths of wire being joined by a substantially horizontal portion extending transversely of the length of wire.

1,574,328. NAILING-STRIP ANCHOR. WILLIAM E. WHITE, Chicago, Ill., assignor to Kalman Steel Co., Chicago, Ill., a Corporation of Delaware. Filed Jan. 4, 1923. Serial No. 610,625. 4 Claims. (Cl. 72—101.)

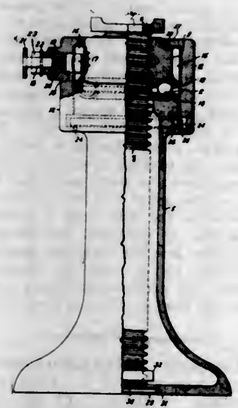
4. Means for simultaneously securing metal lath to structural members and nailing strips upon said lath, comprising a spring-metal U-shaped clip, the legs of which are adapted to pass through the lath and engage the flanges of a structural member, and portions projecting from the middle of the base of said clip and adapted to embrace a nailing strip.

1,574,329. CROSS BRACING FOR STRUCTURAL MEMBERS. WILLIAM E. WHITE, Chicago, Ill. Filed Jan. 21, 1925. Serial No. 3,863. 10 Claims. (Cl. 189—36.)



2. Means for bracing and for establishing a fixed spacing of metal lumber elements comprising a relatively flexible straight length of metal, means at one end thereof for interlocking with a marginal flange of said lumber, and means on the opposite end of said length of metal for interlocking with a flange on the opposite side of an adjacent lumber element.

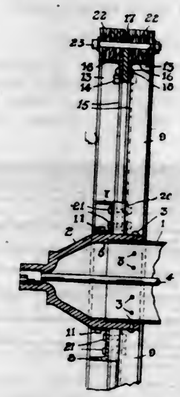
1,574,330. JOINT. WILLIAM E. WILKINSON, York, Pa., assignor to Samuel Forry Laucks, York, Pa. Filed Aug. 8, 1922. Serial No. 580,535. 8 Claims. (Cl. 109—1.)



1. A joint, including, in combination, two members having adjacent edge-portions of their bodies disposed in overlapping relationship and being each formed with a

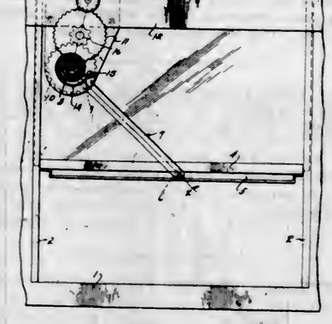
recess, said recesses registering when said members are disposed in such relationship, securing means disposed beside said recesses and associated with one of said mem-

bers and engaging the second of the same, a key, and means for moving said key to extend into both of said recesses.



1,574,331. SCREW JACK. FRED HORACE WILDER, Brattleboro, Vt., assignor to Millers Falls Company, Millers Falls, Mass., a Corporation of Massachusetts. Filed Sept. 25, 1923, Serial No. 664,723. Renewed Jan. 16, 1926. 7 Claims. (Cl. 254—98.)

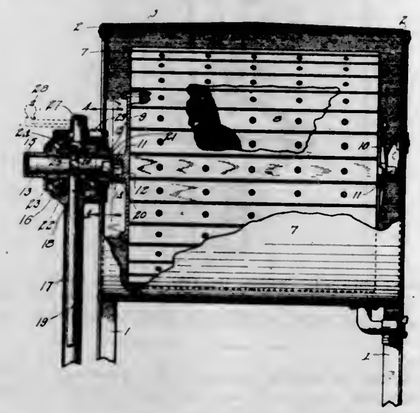
1. A jack, including a standard, a spindle carried by said standard, spindle moving means forming a part of said jack and co-operating with said standard, operating means for said moving means, said operating means being movable with respect to said standard, said standard and operating means being formed with complementary grooves and means extending into both of said grooves for preventing accidental removal of said operating means from said jack.



1,574,332. BULL WHEEL. CLYDE S. WRIGHT and FREDRICK J. SCHWIMMER, Toledo, Ohio, assignors to The National Supply Company, Toledo, Ohio, a Corporation of Ohio. Filed Apr. 11, 1924. Serial No. 705,822. 3 Claims. (Cl. 64—17.)

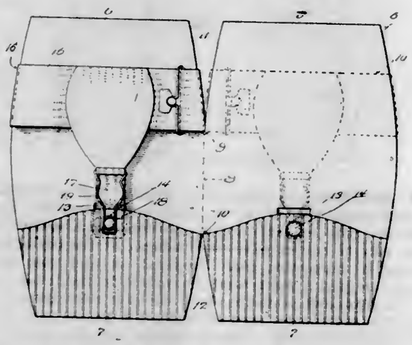
1. In a bull-wheel, a wheel-rim comprising a pair of metal rings in axial alinement and of angular cross-section, one side of each ring forming a rim member concentric with the axis of the wheel, and the other side of each ring projecting toward the said axis, a metal web clamped between the side members last named and pro-

jecting outwardly beyond the rim members, cants seated on the rim members, means securing the cants to the web, a shaft, and means securing the shaft to the wheel rim.



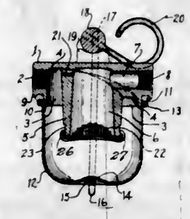
1,574,333. WINDOW REGULATOR. EDWARD L. ACKERMAN and ALOIS J. ZWIERZINA, Detroit, Mich., assignors to Ackerman-Blaesser-Fezzey, Inc., Detroit, Mich., a Corporation of Michigan. Filed Mar. 5, 1925. Serial No. 13,393. 2 Claims. (Cl. 268—4.)

1. Mechanism for operating a window sash in a closed vehicle body comprising the combination with the sash and the body having a recess into and from which the sash may be moved, of a cross member at the top of the recess, a supporting plate mounted on and extending below the bar, a pin rotatably mounted in the lower end of the plate and projecting from opposite sides thereof, a gear toothed member secured to the pin on the sash side of the plate, an arm in fixed relation with the gear and extending radially therefrom, means connecting the outer end of the said arm with the sash whereby the turning of the arm about the gear axis raises or lowers the sash, a flat coiled spring secured at its center to the opposite end of the pin, the outer end of the spring being secured to the supporting plate, a gear on the sash side of the plate meshing with the first named gear and a gear on the opposite side of the plate rotatable therewith, and a



fourth gear meshing with the last named gear, a housing for the said fourth gear having an opening in one side to receive a peripheral portion of the third gear, a handle for rotating the said fourth gear, and a lock for said fourth gear controlled solely by the handle.

1,574,334. WASHING MACHINE. ALPHEUS W. ALTORFER, Peoria, Ill., assignor to Altorfer Bros. Company, East Peoria, Ill., a Corporation of Illinois. Filed May 2, 1921. Serial No. 465,991. 9 Claims. (Cl. 74—14.)



1. In a machine of the character described, in combination, a frame, a casing within and secured to said frame, a housing connected with said casing and formed with axially disposed spaced end bearings, a bracing plate for the housing and casing disposed in horizontal position cross-wise of said casing on the outside thereof between said housing and casing and secured to said frame, and a bracing plate connected to the inside of the casing and encircling the inner bearing of said housing.

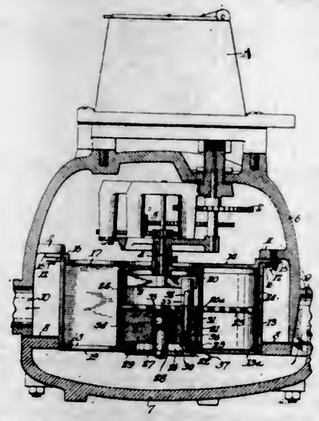
1,574,335. DISPLAY-DEVICE FOR GARTERS. IRVING R. ALLEN, Wheaton, Ill. Filed May 13, 1925. Serial No. 30,034. 1 Claim. (Cl. 206—44.)

A display device for garters, comprising a flat cardboard piece formed with a bifurcated upper portion and a bifurcated lower portion, both forming two joined similar halves shaped to simulate parts of a pair of human legs, said furcations leaving V-shaped notches extending in from the upper and lower edges, and the cardboard piece being scored vertically between said notches, and the lower portions of said halves having surface portions depicting parts of socks, the upper bifurcated portions being adapted to receive the elastic band portions of garters and the bottom of the upper notch acting as a stop whereby the elastic band portions of the garters may be aligned across the display device, and said halves being folded upon said score line, whereby the two halves may assume a widely spreading angle to display the garters in position as worn, and whereby the two halves may be folded together to partly enclose them.

1,574,336. SEDIMENT TRAP. HAROLD L. BLYDENBURGH, Detroit, Mich. Filed July 22, 1922. Serial No. 576,712. 5 Claims. (Cl. 210—165.)

1. In a sediment trap, a base having an oil inlet conduit, and an oil outlet conduit in alignment and provided with a semi-cylindrical chamber and a cylindrical chamber, a depending annular flange separating the said chambers, the oil inlet conduit opening into the semi-cylindrical chamber and the oil outlet conduit opening into the upper end of the cylindrical chamber, a screen seating on the said depending flange, a spring clip securing the screen in position on the flange, a packing ring mounted in the base, a bowl having a rolled upper edge adapted to engage the packing ring and enclose the said chambers, the said chambers being both open to the bowl, a pair of lugs on the upper side of the base, a member rotatably mounted in the said lugs, a U-shaped clamp engaging the bottom of the bowl and having inturned upper ends extending into the rotatable member eccentric to the axis thereof, and a lever for rotating the said rotatable member, the arrangement being such that oil flowing through the bowl is given a rotary motion.

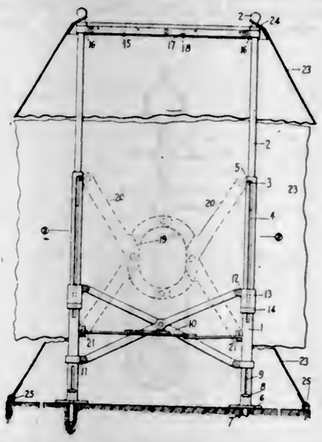
1,574,337. DYESTUFF INTERMEDIATES. MARSTON TAYLOR BOGERT, New York, N. Y. Filed Oct. 15, 1924. Serial No. 743,848. 2 Claims. (Cl. 260—130.5.)



1. As new products, the dyestuff intermediates comprising products obtainable by reduction of 2,4-dinitrodiaryl ethers, or of 2,4-nitroaminodiaryl ethers, and having the following probable constitution:

$$(2,4)\,(H_2N)_2Ar.O.Ar,$$

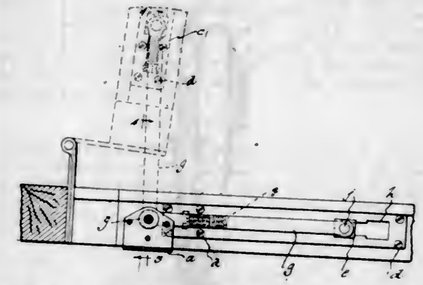
wherein Ar. denotes an aryl group; said intermediates being crystalline solids of definite melting points, of weakly basic properies, and which yield useful dyestuffs by reactions, processes and methods, similar to those in common use for the production of analogous dyestuffs from meta-phenylenediamine.



1,574,338. FLUID METER. RICHARD CLINTON BRADLEY, Chicago, Ill., assignor to S. F. Bowser and Company, Incorporated, Fort Wayne, Ind., a Corporation. Filed June 12, 1920. Serial No. 388,439. 18 Claims. (Cl. 73—87.)

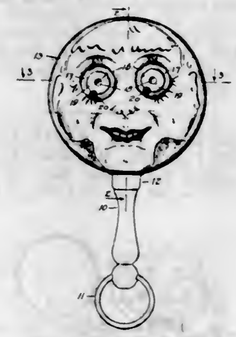
1. In a fluid meter, a casing provided with an inlet thereto and outlet therefrom, fluid measuring means actuated by the flow of fluid, and means for changing the action of said measuring means comprising spaced pivot

members for supporting said measuring means, and means whereby the spacing of said members may be varied.



1,574,339. FOLDABLE TENT. JOHN J. BUSH, Dayton, Ohio. Filed Apr. 30, 1924. Serial No. 710,120. 16 Claims. (Cl. 4—116.)

11. In a structure of the character described, a foldable frame comprising upright members movable toward and from each other, a substantially annular seat comprising a plurality of members movably connected one to the other to permit said members to move one toward the other in substantially the plane of said seat, means for pivotally connecting said seat with a part of said upright members, for movement about a horizontal axis, and means for detachably connecting said seat with others of said upright members.

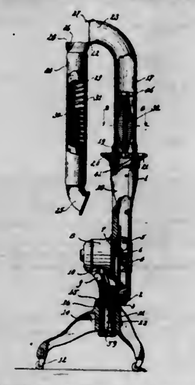


1,574,340. DOORCHECK. GEORGE FAUSER, Detroit, Mich., assignor to Fisher Body Corporation, Detroit, Mich., a Corporation of New York. Filed July 11, 1924. Serial No. 725,368. 6 Claims. (Cl. 16—85.)

1. In a door check, the combination of a header anchor adapted to be secured to the under side of the header, a slotted plate adapted to be secured to the top of the door longitudinally of the door edge, a check link pivoted to the header anchor and a slide secured in the slotted plate, and a coiled buffer cushion spring secured in the

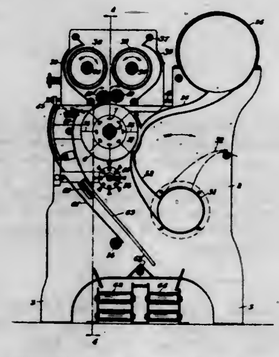
inner end of the slotted plate for taking substantially all the thrust on the parts when the limit of the door swing is reached.

1,574,341. BABY RATTLE. BEN J. FELDSTEIN, New York, N. Y. Filed May 29, 1925. Serial No. 33,689. 3 Claims. (Cl. 46—46.)



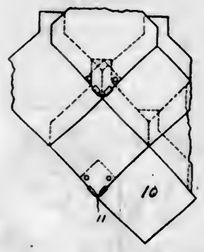
1. The herein described rattle, comprising a holder, a hollow sounding head secured thereto, means loosely disposed in said head to cause a rattling noise when the rattle is shaken, one face of the head having human features provided with eye sockets, transparent globular members for said sockets adapted to form an eye chamber, and balls loosely arranged in said chambers to give the appearance of pupils.

1,574,342. SHANK STIFFENER FOR SHOES. OSCAR FERN, Newburyport, Mass. Filed Sept. 16, 1925. Serial No. 56,712. 3 Claims. (Cl. 36—76.)



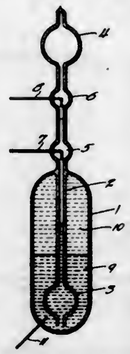
1. In combination with a main metal reinforcing strip for a shoe shank stiffener having means at its ends for attaching it at its upper side to the under side of the stiffener and a pair of intermediate apertures, a supplemental metal reinforcing strip disposed between the stiffener and said main strip and having two pairs of oppositely extending prongs formed therewith, one pair extending into the stiffener and the other pair extending through said apertures in position to be driven into the outer sole of the shoe in which it is placed.

1,574,343. HAIR-DRYING MACHINE. ERNEST O. FREDERICS, New York, N. Y. Filed Oct. 14, 1921. Serial No. 507,654. 2 Claims. (Cl. 219—39.)



1. In a hair drying machine, the combination with a casing, of a fan, a unitary refractory heating element support having tapering end portions, cruciform cross-section and being supported in the casing in the path of air driven by the said fan, a resistance wire wound upon the said support, a switch for controlling current to said resistance, the said casing having a hinged flexible end portion whereby the casing may be extended in length beyond said support.

1,574,344. MACHINE FOR REGINNING COTTON AND OTHER FIBROUS MATERIALS. JAMES C. GARNER, Houston, Tex. Filed Mar. 17, 1919, Serial No. 283,202. Renewed Aug. 3, 1923. 6 Claims. (Cl. 19—86.)

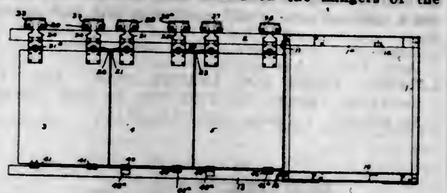


6. The combination of cotton-feeding means, saws arranged to receive the cotton so fed, and to retain the fibers thereof and to throw to one side the heavier motes, a mote board having its upper end arranged near to the point where the cotton is so received by the saws, so that the heavier motes will pass over the top of the board and be separately collected and so that the lighter motes and light separated fiber will pass down at the inner side of the board, a moting brush operating on the material carried by the saws to leave the laid fibers on the saws and to remove remaining motes and tangled lumps of fiber, a mote-separating slide to which said removed material is delivered by the moting board, and a blast nozzle and, spaced therefrom, a blast-receiving suction nozzle both arranged at the periphery of said saws so that the violently moving air will remove the fibers from the saws at said space between the nozzles.

1,574,345. ROOF. CHARLES C. GATES, Altoona, Pa. Filed June 16, 1923. Serial No. 645,771. 2 Claims. (Cl. 108—8.)

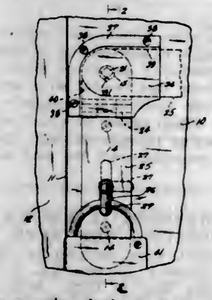
2. A roof shingling construction including a shingle having a body adapted to be laid to the weather and having a tip formed at one corner thereof and an elongated rectangular weather strip projecting from the opposite corner thereof, and a plate-like clip for overlying said weather strip and including a body having fastening receiving openings spaced apart to avoid the piercing of the said strip by the fastenings, and means at the lower edge of the clip for receiving the tip of the next shingle above.

1,574,346. THERMOSTAT. JULIAN G. GOODHUE, Evanston, Ill., assignor to Electro Thermostatic Control Company, Chicago, Ill., a Trust Estate. Filed July 19, 1923. Serial No. 652,482. 3 Claims. (Cl. 200—141.)



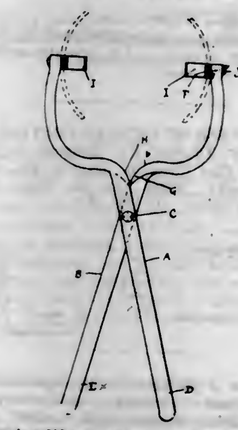
1. A thermostat for making electric contact, comprising a container, a stem extending into said container to form a trap therein and extending outwardly therefrom, a contact point in said outwardly extending portion of said tube, a bulb at the inner end of said inwardly extending portion of said stem, an expanding fluid in said container, a conducting fluid in said stem, the level of said conducting fluid being responsive to expansion of said expanding fluid under variations in temperature and means for making electrical contact with said conducting fluid at another point.

1,574,347. SLIDING DOOR. HENRY E. HACKMAN, Fort Wayne, Ind. Filed Aug. 21, 1925. Serial No. 51,614. 5 Claims. (Cl. 20—19.)



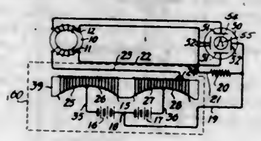
1. The combination with a plurality of doors, of a main rail fixed above the doors, hangers for and pivoted to each door and adapted to be moved on the rail,

switch rails fixed adjacent to the main rail and adapted to support a portion of the doors in open position and in parallel relation, and means on the hangers of the



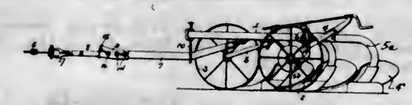
said portion of the doors adapted to engage the switch rails selectively for diverting the hangers onto said switch rails in the opening movement of the doors.

1,574,348. DOOR HASP AND CATCH. GEORGE C. HAGER, Danbury, Conn. Filed Mar. 18, 1925. Serial No. 16,349. 8 Claims. (Cl. 292—281.)



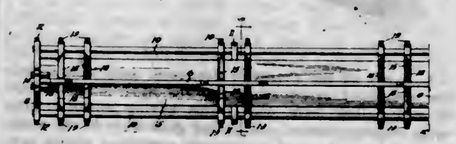
1. In a door securing device, a bolt extending through the door, a plate secured to said bolt on one side of the door, a hasp having an opening therethrough and pivoted to the plate to move toward and from the door, a catch secured to turn with the bolt on the other side of the door, said catch having oppositely extending projections to engage a jamb and also having an operating handle, and an eye secured to the door and adapted to pass through the opening in the hasp.

1,574,349. JAR-GRIPPING LIFTER. BERGHE JOHANSON, Springfield, Mass. Filed Apr. 18, 1922. Serial No. 555,485. 1 Claim. (Cl. 284—28.)



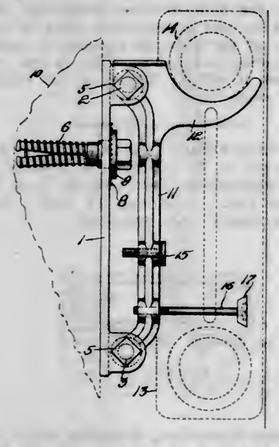
A jar gripping lifter, comprising a pair of levers, each lever having a handle and an L-shaped forward portion having a jar gripping jaw each lever being made from bar material having flat inner sides, the handles being pivoted to each other rearwardly of the L-shaped portions thereof, each L-shaped portion being connected to its handle by a twisted portion providing an inwardly deflected edge, the deflected edges facing each other and being adapted to abut against each other to limit the closing thrust of the L-shaped portions on each other, whereby the pressure exerted on a jar by the closing of said jaws upon it will be limited by the abutment of said deflected edges.

1,574,350. ELECTRICAL TESTING. JOHN B. JOHNSON, Elmhurst, N. Y., assignor to Western Electric Company, Incorporated, New York, N. Y., a Corporation of New York. Filed Aug. 14, 1923. Serial No. 657,422. 12 Claims. (Cl. 175—183.)



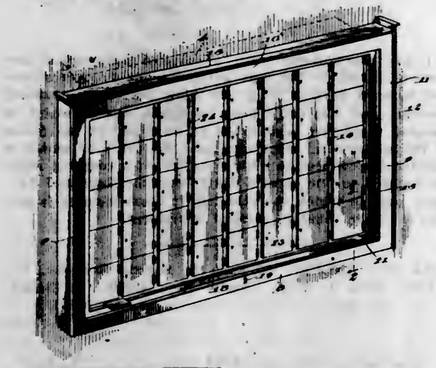
1. The method of measuring hysteresis which comprises subjecting the sample to be teated to a magnetizing field varying at a constant time rate and mapping the relation between the varying field and the time rate of change of the resulting magnetic induction in the sample.

1,574,351. DRAFT DEVICE FOR PLOWS AND THE LIKE. RUDOLPH J. ALTGELT, South Bend, Ind., assignor to Oliver Chilled Plow Works, South Bend, Ind. Filed June 21, 1921. Serial No. 479,325. 5 Claims. (Cl. 280—33.44.)



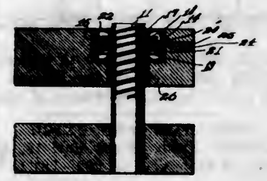
1. The combination with a wheeled agricultural implement in which the rear portion tends to overbalance the forward portion when the plow frame is in raised position, and two draft beam members, one of which is adapted to project beyond the forward end of the frame of the agricultural implement and the other of which is adapted for connection with a tractor, of a coupling member secured to one of said draft beam members and having a part to which the other draft beam member is pivoted to have limited vertical movement.

1,574,352. GAUGE. HOWARD E. BAKER, Roanoke, Va. Filed June 4, 1925. Serial No. 34,958. 2 Claims. (Cl. 33—32.)



1. A gauge comprising a base having a scale thereon, markers swingable toward and from said base, projections on said markers resting upon and supported by said base when said markers are swung to operative position, said markers being adjustable longitudinally of said base and said scale.

1,574,353. RADIATOR SUPPORT. HARRY E. BARBER, Boston, Mass. Filed Aug. 18, 1922. Serial No. 582,615. 1 Claim. (Cl. 248—17.)



A wall support for radiators comprising a single one-piece wall plate formed with a vertical slot intermediate its upper and lower ends to receive a bolt or the like for securing said plate to a wall; a bracket member in front of said wall plate having an aperture at its upper end, an aperture at its lower end and means for fastening a radiator thereto, and two horizontally disposed guide rods on and parallel with said base plate, said rods extending loosely through said apertures and slidably supporting said bracket member.

1,574,354. MAIL BOX. HENRY CARL BARTH, Helena, Mont. Filed Apr. 10, 1925. Serial No. 22,174. 3 Claims. (Cl. 232—25.)

1. A box of the character described comprising a hollow body open at the front, a frame supporting the rim of said hollow body, said frame having a slot in the upper member thereof and having guideways in the inner faces of the side members thereof, partitions within said body dividing the space within the latter into a plurality of compartments, each open at the front of the body, a door extending slidably through said slot in the upper part of the frame and in sliding engagement at its side edges with said guideways and the side members of the frame, said door being movable to and from position to cover the fronts of all of said compartments, said door having an opening for each of said compartments, each opening of the door being at the front of the corresponding compartment when the door is closed, and a door for each of the openings in said first named door.

1,574,355. OILER FOR LEADER PINS. EMIL A. BAUMBACH, Chicago, Ill. Filed Sept. 12, 1923. Serial No. 662,365. 6 Claims. (Cl. 184—25.)

1. A leader pin oiler including an integral sheet metal oil container arranged in surrounding relation to said pin, said container having a reentrant groove forming an opening in the inner face thereof with inwardly extending retaining beads positioned at opposite sides of the opening, and an oiling washer arranged within the container and projecting through the said opening between the beads and contacting with the said leader pin.

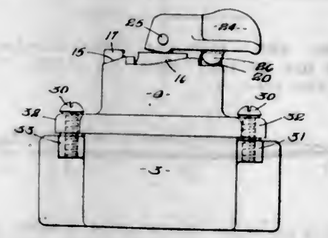
1,574,356. LIGHT-SENSITIVE MEDIUM AND PROCESS OF PRODUCING THE SAME. MURRAY C. BEEBE, Cincinnati, Ohio, assignor to The Wadsworth Watch Case Company, Dayton, Ky., a Corporation of Kentucky. Filed Mar. 8, 1922. Serial No. 542,124. 27 Claims. (Cl. 95—7.)

1. For use in processes of the character set forth, a varnish comprising a suitable base, a light-sensitive oil, and an accelerator serving to accelerate the selective action of light upon said varnish under photographic action.

1,574,357. PHOTOGRAPHIC MEDIA AND PROCESS. MURRAY C. BEEBE and ALEXANDER MURRAY, Cincinnati, Ohio, assignors to The Wadsworth Watch Case Company, Dayton, Ky., a Corporation of Kentucky. Filed Aug. 31, 1922. Serial No. 585,517. 51 Claims. (Cl. 95—5.)

1. A photographic medium comprising a suitable base, which base comprises a hydrophobic gell-like body sensitive to the action of light, and a catalytic accelerator incorporated with said base.

1,574,358. PROCESS OF OPTICAL COPYING. MURRAY C. BEEBE, Fort Thomas, Ky., assignor to The Wadsworth Watch Case Company, Dayton, Ky., a Corporation of Kentucky. Filed Nov. 21, 1921. Serial No. 516,865. 18 Claims. (Cl. 95—5.)



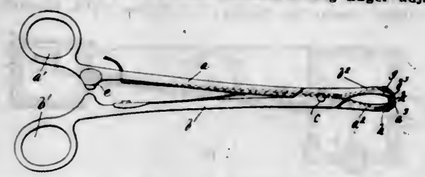
1. The process of photographically reproducing designs, etc., which comprises: covering a desired surface with a spontaneously drying light-sensitive varnish coating, optically projecting an image onto said coating and thus causing the areas under the influence of the projected light to become set, and subsequently developing coating.

1,574,359. PHOTOGRAPHIC MEDIUM. MURRAY C. BEEBE and ALEXANDER MURRAY, Cincinnati, Ohio, assignors to The Wadsworth Watch Case Company, Dayton, Ky., a Corporation. Filed Nov. 18, 1922. Serial No. 601,884. 5 Claims. (Cl. 95—7.)

1. A photographic medium comprising a hydrophobic colloid and a sensitizer comprising lead triethyl iodide.

1,574,360. ELECTRIC SWITCH FOR HEADLIGHTS. CARL H. BISSELL and RAYMOND H. OLLEY, Syracuse, N. Y., assignors to Crouse-Hinds Company, Syracuse, N. Y., a Corporation of New York. Filed Oct. 15, 1919. Serial No. 330,741. 5 Claims. (Cl. 200—8.)

1. In an electric switch, the combination of a switch member comprising a body movable about an axis, a conductor extending circumferentially around the body, a plurality of contacts arranged to be successively engaged by the conductor upon movement of the switch member in one direction, the conductor and the contacts being relatively arranged so that initial movement of said member engages the conductor with the first two contacts, a second movement of the body in the same direction engages the conductor and all three contacts and a third movement of the body in the same direction engages the conductor with the first two contacts only.



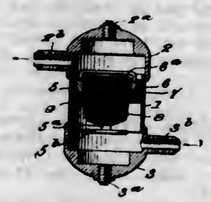
1,574,361. SOLDERING IRON. CLARENCE N. BROWN, Colton, Calif. Filed Aug. 19, 1924. Serial No. 732,988. 1 Claim. (Cl. 113—109.)

A soldering iron comprising a solid point, a solder reservoir tube secured in one end of said point, said point having an exterior solder discharge groove, a relatively small passageway extending substantially diagonally of the point and from the reservoir to said groove, a manually controlled valve for said passageway, said valve having an operating handle, said tube terminating short of the gripping end of said handle, a coupling forming a closure and engaging the feed end of said tube, and a stem carried by the coupling disposed opposite the gripping end of the handle and adapted for engagement jointly therewith.

1,574,362. HÆMOSTATIC FORCEPS. JOHN F. CALLAHAN, Brockton, Mass., assignor to Isabel G. Callahan, Brockton, Mass. Filed Sept. 28, 1922. Serial No. 591,127. 11 Claims. (Cl. 128—322.)

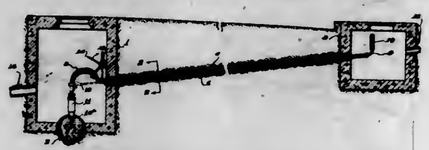
1. Hæmostatic forceps having jaws formed with gripping faces at their extremities only and being recessed away from one another back from said extremities each jaw having an external thread-holding finger adjacent to its said extremity, both fingers being at the same side of the forceps.

1,574,363. SILICEOUS ALKALINE-EARTH PRODUCT AND PROCESS OF MAKING THE SAME. ROBERT CALVERT, Lompoc, Calif., assignor to The Celite Company, Los Angeles, Calif., a Corporation of Delaware. Filed Dec. 1, 1923. Serial No. 678,029. 24 Claims. (Cl. 252—2.)



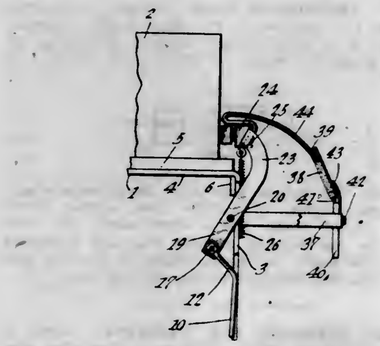
1. A finely divided product comprising the product of heating a mixture of finely divided diatomaceous earth, an hydroxide of an alkaline earth metal, and water.

1,574,364. EMBROIDERY HOOP. GUSTAV A. CARLSON, Chicago, Ill., assignor to The Boye Needle Company, Chicago, Ill., a Corporation of Illinois. Filed Aug. 17, 1925. Serial No. 50,611. 1 Claim. (Cl. 45—24.)



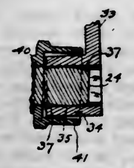
An inner ring for an embroidery hoop comprising a sheet metal member of annular form having lateral inwardly curled beads, and a sheet metal clip overlapping the end portions of said ring and interposed between said beads, the lateral edges of the end portions of said clip engaging indents in said beads.

1,574,365. STRAINER FOR GASOLINE. JOHN J. CASEY, Gloucester, Mass., assignor to Kant Clog Specialty Company, a Corporation of Massachusetts. Filed June 7, 1922. Serial No. 566,637. 5 Claims. (Cl. 210—165.)



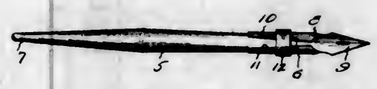
1. A strainer for liquid supply lines comprising a cylindrical casing or body, bearing lugs therein projecting inwardly, an upper and a lower end cap fitted to the body, each having a central tapped opening closed by a removable plug, and each having a lateral nipple for connection to discharge and to inlet pipe or tubing, respectively, and a cage centrally disposed in said body and supported on said lugs, said cage enclosing a pair of strainers and being in two parts, one part comprising a flanged ring or body with arms supporting a lower ring for protecting the lower strainer, and the other part comprising a clamping ring threaded into the flanged ring of the first part so as to clamp the strainers between them, and carrying a bent up cross bar serving to protect the upper strainer and also to turn the clamping ring.

1,574,366. APPARATUS FOR TESTING WATER MAINS. JOHN A. COLE, Chicago, Ill. Filed May 3, 1924. Serial No. 710,843. 4 Claims. (Cl. 73—167.)



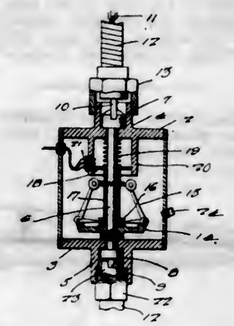
1. Means for testing a water main extending under a street, including a street manhole, a side walk manhole, a meter arranged in the street manhole, extending into the water main and actuated by the water flowing through the main, an indicating instrument arranged in the side walk manhole, and means operatively connecting the meter to the indicating instrument, whereby the velocity of the water flowing through the main will be indicated by the instrument in the side walk manhole.

1,574,367. PRINTING MECHANISM. PAUL P. COMMANDER, Doerun, Ga. Filed Sept. 15, 1924. Serial No. 737,840. 5 Claims. (Cl. 101—42.)



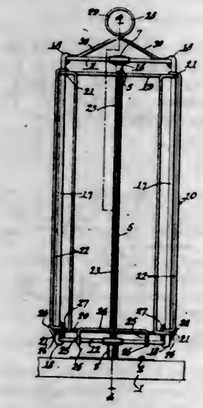
1. In a device of the class described, a support, a type lever fulcrumed on the support, type on the type lever, a swinging pad cooperating with the type, and an opener coacting with the pad to swing the pad away from the type when the lever is swung in one direction, the opener being carried by the lever, the opener having arcuate movement with respect to the fulcrum of the lever.

1,574,368. FAUCET. JOSEPH A. COSTELLO, Cleveland, Ohio, assignor to The Cleveland Brass Manufacturing Company, Cleveland, Ohio, a Corporation of Ohio. Filed Aug. 1. 1925. Serial No. 47,407. 2 Claims. (Cl. 251—163.)



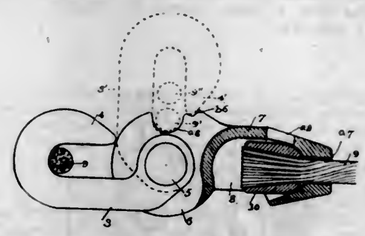
2. A faucet comprising a casing which has a fluid-receiving chamber having a fluid-outlet, a valve arranged to control communication through said outlet, a shaft supported from the casing and having means for actuating the valve into an open position during the required rotation of the shaft and also having an end portion thereof externally of the casing, and a crank embracing said portion of the shaft, the crank-embraced portion of the shaft having two substantially parallel external flat surfaces formed at opposite sides respectively of and extending endwise of the shaft and two substantially corresponding external surfaces which extend transversely of the shaft from one to the other and endwise of said flat surfaces and curve outwardly longitudinally and transversely of the shaft, the shaft-embracing portion of the crank being internally contoured as required to permit tilting of the crank toward and from the casing and to conform to said flat surfaces, and the crank and the casing having means whereby the crank, when it has been tilted to the required extent toward the casing after the aforesaid rotation of the shaft, is held against movement that would permit closing of the valve.

1,574,369. PEN. MONROE A. COVER, Okmulgee, Okla. Filed Mar. 21, 1925. Serial No. 17,287. 7 Claims. (Cl. 120—101.)



1. In a pen of the class described, a holder having a tapered extremity, a pen point having a sleeve formed thereon, and a remaining band adapted to retain the said sleeve in engagement with the said holder.

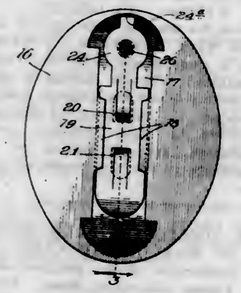
1,574,370. CENTRIFUGAL SWITCH. HAROLD E. CURTISS, Monroe, Mich. Filed Aug. 25, 1924. Serial No. 734,045. 1 Claim. (Cl. 200—80.)



A device of the class described comprising a casing embodying an open ended cylinder, closing plates for the opposite ends of said cylinder, one of said plates being provided with internal and external sockets, the other plate being formed with an external socket, a rotary shaft extending through the casing and having heads on its opposite ends located in said external sockets, a plurality of relatively stationary contacts mounted upon the wall of the internal socket, a sleeve slidably mounted upon said shaft, said sleeve having a flange at one end cooperable with said contacts and having a grooved collar at its opposite end, a coil spring located in said internal socket and surrounding the shaft and bearing at one end against said flange, and a speed controlled centrifugal governor fixedly mounted upon said shaft within said casing, said governor having spring pressed L-shaped arms, the short inturned ends of which extend into the groove in said collar.

1,574,371. DISPLAY RACK. EMILY C. CUSHING, Denver, Colo. Filed May 2, 1925. Serial No. 27,539. 2 Claims. (Cl. 40—124.)

1. In a display rack, a supporting base, a skeleton frame mounted to revolve on said base, card supporting members carried by said frame and comprising upright laterally spaced guides with a seat at the bottom, said guides being composed of upper and lower cross bars formed of wire arranged in a plane within that occupied by the members of the frame having loops one extended in one direction and one in the other and overlying each other to form guides or retainers for the edges of the cards to be supported, and supporting wires carried by the lower ends of the frame and bent to form pockets to receive the bottom of the card.



1,574,372. CHOKER HOOK. NAPOLEON A. DAMERON and ROY RHODES, Hamilton, Wash. Filed June 6, 1925. Serial No. 35,345. 1 Claim. (Cl. 24—242.)

In combination, a hook swivel having a shank with an arcuate end said arcuate end having a notch in the periphery thereof adapted to receive a cable, a stop lug on said shank adjacent said notch, and a hook pivoted to said swivel shank concentric with the periphery of said arcuate shank end with the point of said hook proximate to the periphery of said arc adapted to swing on said pivot and bear against said lug when the said hook registers with said notch said hook nonengageable with said cable except manually through said notch.

1,574,373. MEDALLION MOUNTING. JOSEPH A. DEDOUCH, Oak Park, Ill. Filed May 4, 1925. Serial No. 28,038. 5 Claims. (Cl. 40—20.)

1. In combination, a medallion having a depression in the rear face, a clip adapted to be secured to a surface to which it is desired to fasten said medallion, a groove having integral lips on said rear face extending vertically

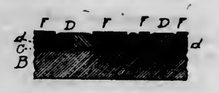
along the back of the medallion, and a transverse shoulder on said medallion for engaging a portion of said clip to retain the medallion thereon.

1,574,374. PROCESS FOR TREATING IRON. WILLIAM J. DIEDERICHS and ANSON HAYES, Ames, Iowa. Filed Aug. 21, 1922, Serial No. 583,370. Renewed Aug. 28, 1925. 8 Claims. (Cl. 148—13.)

1. The process for the heat treatment of castings from white cast iron which consists in (1) subjecting of the casting to a temperature above the critical temperature of the material for a period of from fifteen minutes to five hours or more but only until the iron carbid present is practically all absorbed in the solid solution, which means that in irons of commercial composition the combined carbon is reduced to approximately nine-tenths of one percent; (2) the cooling of the casting to a lower temperature in the neighborhood of the critical temperature; and (3) the cooling of the casting to room temperature.

1,574,375. PROCESS FOR TREATING IRON. WILLIAM J. DIEDERICHS and ANSON HAYES, Ames, Iowa. Original application filed Aug. 21, 1922, Serial No. 583,370. Divided and this application filed Aug. 6, 1925. Serial No. 48,623. 5 Claims. (Cl. 148—13.)

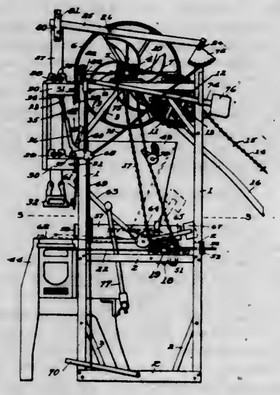
1. The process for the heat treatment of castings from white cast iron which consists in (1) subjecting of the casting to a temperature above the critical temperature of the material; (2) cooling the casting to a temperature considerably below the original critical temperature; (3) reheating the casting to a sufficient temperature to allow structural and chemical changes to progress; and (4) cooling the casting at an extremely slow rate of about five degrees centigrade per hour.



1,574,376. PROCESS FOR TREATING IRON. WILLIAM J. DIEDERICHS and ANSON HAYES, Ames, Iowa. Original application filed Aug. 21, 1922, Serial No. 583,370. Divided and this application filed Aug. 6, 1925. Serial No. 48,624. 5 Claims. (Cl. 148—13.)

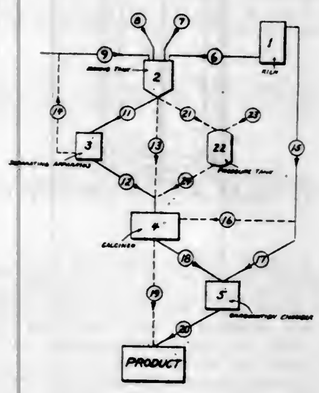
1. The process for the heat treatment of castings from white cast iron which consists in (1) subjecting the casting to a temperature above the critical temperature of the material for a period of from fifteen minutes to five hours or more but only until the iron carbid present is practically all absorbed in the solid solution, which means that in irons of commercial composition the combined carbon is reduced to approximately nine-tenths of one percent; (2) the cooling of the casting to a lower temperature in the neighborhood of the critical temperature; and (3) the cooling of the casting at a rate not less than about seven degrees centigrade per hour.

1,574,377. PROCESS FOR TREATING IRON. WILLIAM J. DIEDERICHS and ANSON HAYES, Ames, Iowa. Original application filed Aug. 21, 1922, Serial No. 583,370. Divided and this application filed Aug. 6, 1925. Serial No. 48,625. 5 Claims. (Cl. 148—13.)



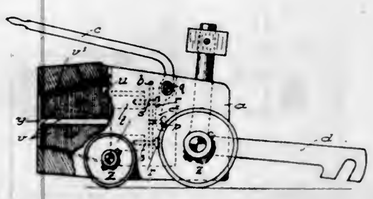
4. The process for the heat treatment of castings from white cast iron which consists in (1) the subjecting of the casting to a temperature above the critical temperature of the material; (2) the cooling of the casting to a point considerably below the original critical temperature by quenching; (3) reheating the casting to a sufficient temperature to allow chemical and structural changes to progress; and (4) cooling the casting to a temperature sufficientiy low that chemical and structural changes cease.

1,574,378. COLLOTYPE PRINTING PLATE AND METHOD OF MAKING THE SAME. WILLIAM J. DOBINSON, Somerville, Mass., assignor of one-half to Albert W. Finlay, Brookline, Mass. Filed Sept. 16, 1925. Serial No. 56,636. 3 Claims. (Cl. 41—41.5.)



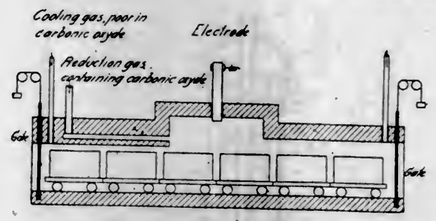
1. A collotype printing plate comprising a base; an inner coating of sensitized gelatine fixed to the base and insoluble in cold water when unhardened; and an outer coating of sensitized colloid soluble in cold water when unhardened, the outer coating covering and adhering to the inner coating, the two coatings being conditioned by the action of light through a negative, to provide each with hardened portions and leave other portions soft, and developed by cold water to remove the soft portions of the outer coating and swell, but not remove, the soft portions of the inner coating, so that the plate has a printing surface composed of ink-taking and water-rejecting hardened portions of the outer coating, and water-taking and ink-rejecting swelled portions of the inner coating, substantially flush with the hardened portions of the outer coating.

1,574,379. TAMPING MACHINE. CHARLES S. EMERT, Peoria, Ill. Filed Apr. 14, 1924. Serial No. 706,252. 9 Claims. (Cl. 25—41.)



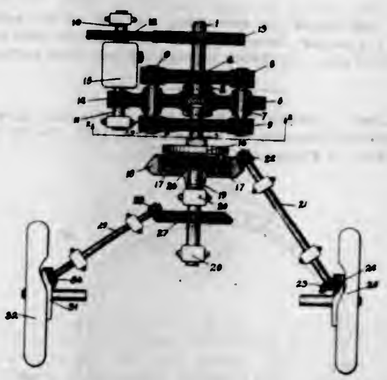
1. In a tamping machine the combination of a frame, a drive shaft mounted thereon, a plurality of cams on the drive shaft, levers cooperating with the cams, a movable fulcrum for carrying the levers, tamping members moved by the levers, fingers for holding the tamping members in elevated position, means for moving the fingers, and connections between the finger moving means and the movable fulcrum for the levers to move the levers out of the path of travel of the cams when the fingers are moved to engaging position.

1,574,380. ARTICLE OF MANUFACTURE AND PROCESS OF MAKING SAME. HERBERT A. ENDRES, Lompoc, Calif., assignor to The Celite Company, Los Angeles, Calif., a Corporation of Delaware. Filed June 23, 1925. Serial No. 39,142. 19 Claims. (Cl. 252—2.)



1. The process of producing a finely divided material comprising heating a mixture of a finely divided silica and lime in water, and then calcining the resulting product.

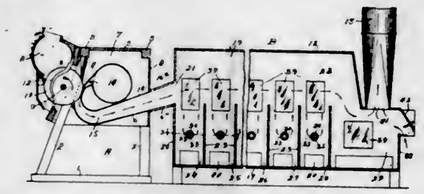
1,574,381. DRAWING CARRIAGE FOR DRAWING MACHINES. EUGEN ENTENMANN, Stuttgart, Germany. Filed Sept. 4, 1923. Serial No. 660,910. 2 Claims. (Cl. 205—24.)



2. A drawing carriage for drawing machines for the drawing of several rods in one operation comprising in combination a carriage body having in its end face a conical cavity, a number of sector-shaped jaws in said conical cavity, springs for pressing said jaws in outward direction, a base plate in said carriage, means for adjustably fixing said jaws in said base plate, a hand lever for moving said jaws in said conical cavity so that they are pressed against one another and a drawing die for the rods to be drawn, said drawing die consisting of a plate of convenient shape having holes of convenient shape arranged in a circle around the centre of said plate so that the position of said holes corresponds with the position of said clamping jaws.

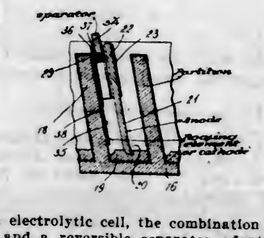
1,574,382. PROCESS FOR THE DRY REDUCTION OF IRON ORE. PEDER FARUP, Slemdal, near Christiania, Norway, assignor to Norsk Hydro-Elektrisk Kvaelstofaktieselskab, Christiania, Norway. Filed May 10, 1922. Serial No. 559,870. 5 Claims. (Cl. 204—63.)

1. In the dry process of reducing iron ore by means of carbonic oxide, the step which consists in cooling the reduced mass in an atmosphere containing only a relatively small proportion of carbonic oxide.



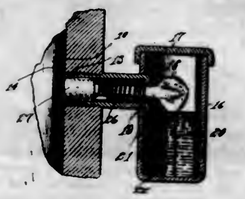
1,574,383. MOTOR-VEHICLE TRANSMISSION. JOHN DANIEL FRASER, Leamington, Ontario, Canada. Filed Sept. 25, 1922. Serial No. 590,438. 2 Claims. (Cl. 74—34.)

1. In a variable speed transmission for motor vehicles, the combination with the engine and driven shafts, of gears secured thereto in the vicinity of their adjacent ends, an idler gear mounted between the gears and free of the respective shafts, a plurality of longitudinally extending stub shafts rotatably mounted on the idler gear, pinions on the forward and rear ends of each stub shaft meshing respectively with the gears on the engine and driven shafts, a plurality of counter shafts, a friction clutch between the adjacent ends of the counter shafts, a pinion on the rear counter shaft meshing with the idler gear, a second gear on the engine shaft, and a gear on the forward counter shaft meshing therewith.



1,574,384. MECHANISM FOR CLEANING COTTON FIBERS. JAMES C. GARNER, Houston, Tex. Filed Aug. 30, 1921. Serial No. 496,872. 10 Claims. (Cl. 19—76.)

9. The combination with the saws adapted to separate the cotton fibers from each other and from relatively large quantities of foreign material commingled with the cotton, a duct for finally receiving said fibers, means enclosing a relatively elongated horizontal pathway between said saws and said duct, and a pneumatic mechanism arranged to cause a stream of air to take the fibers and the smaller particles of foreign material from the saws and convey them together along said pathway, the devices which define the pathway being arranged to



guide the fibers to said duct and to permit said particles of foreign material to separate by gravity from the fiber, and means for supplying supplemental vertically moving streams of air below said pathway.

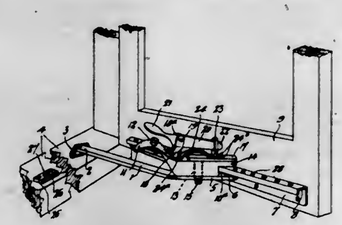
1,574,385. PROCESS AND APPARATUS FOR MANUFACTURING ROOFING ELEMENTS. JULIUS H. GILLIS, Elizabeth, N. J., assignor, by mesne assignments, to Anaconda Sales Company, a Corporation of Delaware. Filed Nov. 21, 1923. Serial No. 676,117. 21 Claims. (Cl. 204—1.)

1. In an electrolytic cell, the combination of an anode, a cathode and a reversible separator adapted to lie between the anode and the cathode and having conducting contact surfaces engaging the anode and cathode.

1,574,386. LUBRICATING DEVICE. ALPHONS H. GITS, Chicago, Ill.; Valentine Gits Farrow administratrix of Alphons H. Gits, deceased. Filed Jan. 17, 1923. Serial No. 613,298. 8 Claims. (Cl. 184—64.)

2. A lubricating device including a lubricant container, a pair of wicks within the container having their adjacent ends loosely connected, and an independent and separable lubricating element carried by one of the wicks.

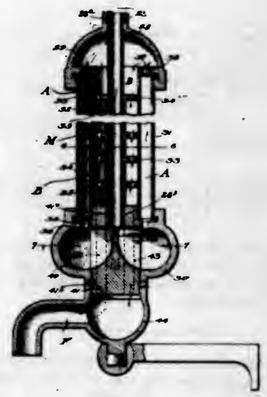
1,574,387. VEHICLE-DOOR WINDOW. GEORGES HAARNAGELL, Paris, France. Filed June 4, 1919. Serial No. 301,764. 2 Claims. (Cl. 296—48.)



2. A door having a recess therein open at the top of the door, a window movable vertically in said recess and through said opening, telescopically related slides one of which coacts with said window in the raising of the latter, said slides having means to cause successive move-

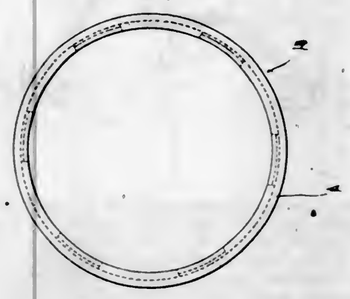
ments thereof when the first is operated, means to secure the lower side of the window when same is raised, and yieldable means arranged to exert downward thrust on

one of the slides when the window is raised to cushion the same and prevent casual upward movement of the window.



1,574,388. WINDOW OPENING AND CLOSING APPARATUS. IVAN HART, Avondale, near Auckland, New Zealand. Filed Mar. 31, 1924. Serial No. 703,279. 2 Claims. (Cl. 268—13.)

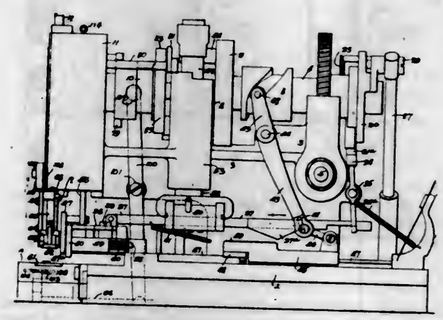
1. Window opening and closing apparatus comprising a link arm having means at one end to pivotally mount the same on a window sill, an adjusting bar for attachment to a window and provided with spaced openings, the free end of said link arm being pivotally and slidably connected to said adjusting bar, a plate mounted on the link arm for vertical movement and having a pin to engage any of the openings of the adjusting bar, a spring exerting its tension on said plate to normally hold the latter and pin in engaged position, and a lever pivotally mounted on said arm and connected to said plate to raise the latter and pin against the tension of said spring.



1,574,389. WATER-PURIFYING APPARATUS. HARRY BUXTON HARTMAN, Scottdale, Pa. Filed Apr. 15, 1921. Serial No. 461,504. 8 Claims. (Cl. 261—75.)

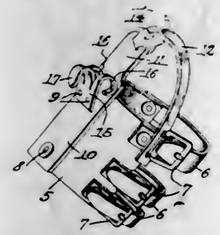
1. A water purifying apparatus including a mixing device having a casing consisting of a cap and base, concentric shell members clamped between the cap and base, a central inlet pipe, means for causing liquid supplied from said central conduit pipe to flow into the passage formed by the outermost of said concentric shell mem-

bers, and means for permitting the exit of the water from the passage formed between the innermost shell and the inlet pipe and thence through the said base member.



1,574,390. DEMOUNTABLE RIM. WILLIAM RUFUS HEDRICK, Roanoke, Va. Filed Oct. 6, 1925. Serial No. 60,800. 3 Claims. (Cl. 301—35.)

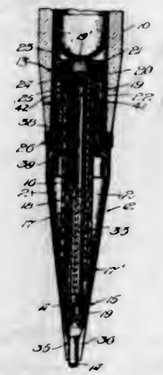
1. A demountable rim comprising a pair of complementary rim sections, complementary inturned flanges formed on the inner edges of the sections, said flanges being disposed outwardly at spaced intervals to provide pairs of lateral projections, and a series of channel-shaped locking members slidable on the aforementioned flanges and adapted to extend over the respective pairs of lateral projections for securing the rim sections together.



1,574,391. TICKETING MACHINE. GEORGE W. HENRY, Jr., Philadelphia, Pa., assignor to Soabar Company, Philadelphia, Pa., a Corporation of Pennsylvania. Filed Dec. 15, 1923. Serial No. 680,885. 3 Claims. (Cl. 112—104.)

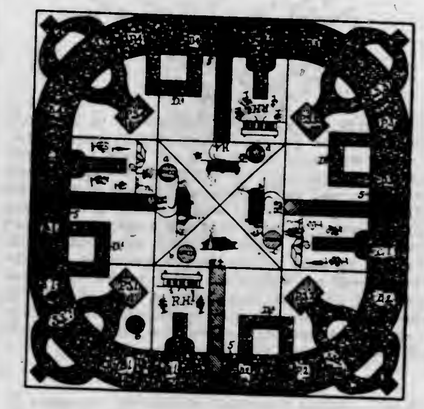
1. The combination in a ticketing machine, of a bed; a reciprocating feeding device for feeding a strip of tickets over the bed; means for cutting a ticket from the strip; a work plate, on which the material is placed, a presser foot; feed mechanism and stitching mechanism; a slide mounted on the presser foot arranged to move

with a ticket and the material during the stitching process; and means for returning the slide to its first position after a ticket has been secured to the material.



1,574,392. CORN HUSKER. JOHN J. HESER, Tamora, Nebr. Filed Dec. 8, 1924. Serial No. 754,578. 1 Claim. (Cl. 130—4.)

In a husking device, a body portion, a supporting strap secured to the body portion and having one end thereof extending beyond the body portion and provided with an obliquely disposed slot, buckles having straps secured to the body portion, a thumb strap having slits formed adjacent to its ends, said strap adapted to be passed through the slot and the opposite end of the strap passed through the slit of the thumb strap adjacent to the obliquely disposed slot providing a loop, one of the buckles adapted to be passed through the slit in the opposite end of the thumb strap to removably secure the thumb strap to the body portion, and a husking hook on the supporting strap.

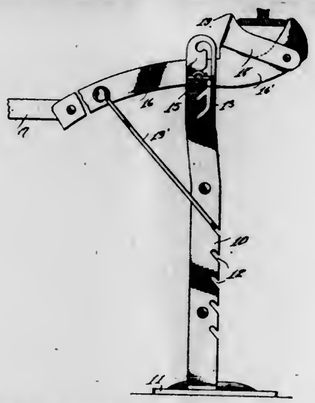


1,574,393. LEAD-PENCIL MECHANISM. GEORGE HOFMANN, Chicago, Ill., assignor to Ralph Bard, trustee, Chicago, Ill. Filed Aug. 17, 1922. Serial No. 582,348. 10 Claims. (Cl. 120—18.)

1. In a pencil mechanism of the character described, the combination with a barrel, of a central lead-tube rigidly connected with said barrel to be held by it against rotation, a propeller element having a portion entering said tube to act against the lead and having a portion outside of said tube adapted to engage a screw member to be propelled thereby, a screw member surrounding said tube and engaging said propeller element, said screw member having its inner end connected with said barrel to hold it against longitudinal displacement but free for rotation with respect to said barrel and to said lead-tube, and having connected for rotation with said rotatable element a turning member which is exteriorly accessible to the fingers and arranged beyond the forward end of the barrel, and a tip structure extending

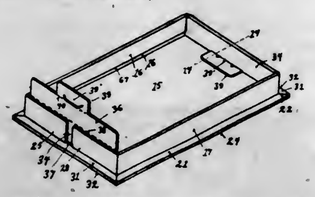
from said turning member to a point beyond the end of the lead-tube, and being free from the latter and demountably attached to the barrel-carried structure.

1,574,394. AUTOMOBILE GAME. JAMES H. HOLME, Tacoma, Wash. Filed June 9, 1923. Serial No. 644,515. 3 Claims. (Cl. 273—134.)



1. An automobile game comprising a board or table chart and playing members and traffic officer member, said board consisting of a starting point indicated by two or more homes, a road or lane leading from each of said homes to a main encircling highway, said main highway divided into units or spaces to measure an equal distance of travel over the same for each tourist when touring thereon from each of said homes and returning to the same.

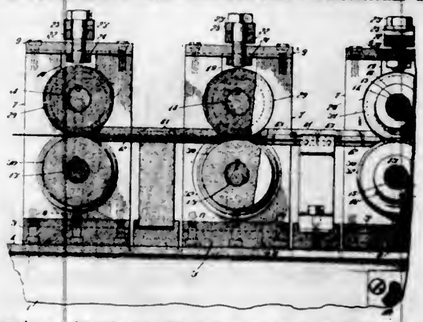
1,574,395. VEHICLE JACK. EDWIN A. HOWE, Bancroft, Iowa. Filed July 28, 1925. Serial No. 46,615. 3 Claims. (Cl. 254—131.)



1. A jack including a standard, a foldable, lifting lever pivotally mounted on the standard and having a recessed

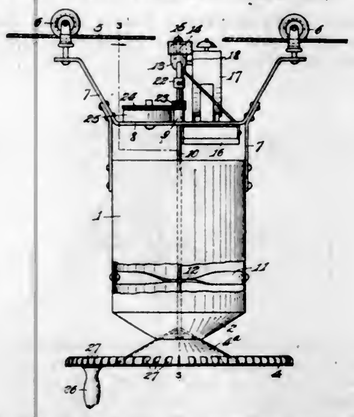
axle supporting end, and a member pivotally mounted on the axle supporting end of the lever and movable into

and out of cooperative axle supporting position, over said recessed end, at times, and for retaining embracing engagement with the foldable lever.



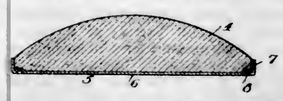
1,574,396. FOLDING BOX. CHARLES B. HOY, Cincinnati, Ohio. Filed Nov. 3, 1921. Serial No. 512,618. 15 Claims. (Cl. 229—34.)

15. A blank for a folding box section to constitute a box lid or box container comprising a main portion, side wall portions at the sides of said main portion provided with end members extending past the ends of said main portion, end wall portions at the ends of said main portion comprising two end wall members and a locking tongue separated by score lines and a slit, the end wall members adjacent to the main portion being folded inside of the end members of the side wall portions, and the outer end wall members being folded outside of the end members of the side wall portions, and the locking tongues inserted through slits in the end wall portions to lock the end and side wall portions together when the blank is set up into a box section.



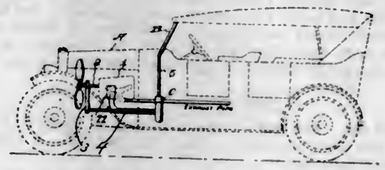
1,574,397. METAL-FORMING MACHINE. CHARLES W. KIRSCH, Sturgis, Mich., assignor to Kirsch Manufacturing Company, Sturgis, Mich., a Corporation of Michigan. Filed Aug. 9, 1923. Serial No. 656,560. 9 Claims. (Cl. 153—54.)

1. In a machine of the kind specified, a plurality of pairs of strip bending and forming elements between which a strip of sheet metal is adapted to be successively passed, each of said pairs of elements including a middle driven roll having a cylindrical face, all of said driven rolls being of equal diameter and adapted to effect forced travel of the strip while maintaining the portion thereof engaged by said rolls in normal condition, a pair of idle rolls associated with each driven roll and axially aligned therewith for bending the side edge portions of the strip and adapted to be rotated relatively to the driven roll by contact with the strip, and guides associated with and disposed between successive pairs of bending elements for guiding the strip from each pair of said elements to the next thereof, each of said guides having a guide opening corresponding in contour and cross-sectional di-



mensions with that of the strip as the same is delivered from the pair of bending elements behind each of said guides.

1,574,398. POULTRY-FEEDING APPARATUS. WILLIAM C. KISNER, Watson, W. Va. Filed Nov. 26, 1923. Serial No. 676,911. 9 Claims. (Cl. 161—10.)

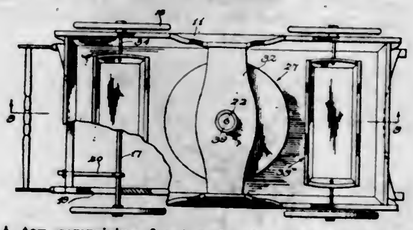


2. A time feed distributing apparatus comprising a feed container supported in an elevated position and having a bottom opening, a centrifugal feed distributor shiftable into and out of closing relation to said opening, means for holding said distributor in its closing position, time mechanism whereby release of said distributor from said holding means is effected at a predetermined time, and means for rotating said distributor when released.

1,574,399. COMPACT-POWDER HOLDER. JOHN S. LYON, Rochester, N. Y., assignor to John Bartholomew, Rochester, N. Y. Filed Apr. 26, 1923. Serial No. 634,662. 2 Claims. (Cl. 132—82.)

1. A tray or holder for compacted powder cakes embodying a sheet metal bottom having a surrounding shallow flange providing an upright side wall, the bottom being provided with an annular rib punched up from the under side thereof and closely adjacent and parallel to the base of said side wall.

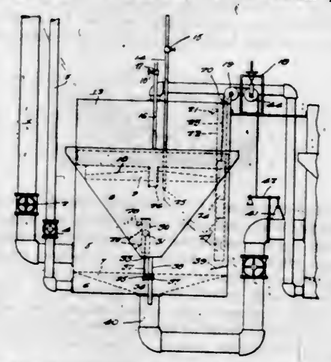
1,574,400. WINDSHIELD. MARTIN B. MCGRAW, Beaver Falls, Pa. Filed Apr. 14, 1922. Serial No. 552,623. 8 Claims. (Cl. 20—40.5.)



1. In a protecting device a hollow frame member adapted to receive a pane of glass and provided with a series of symmetrically arranged apertures, and means for supplying the frame member with air under pressure, said air passing outwardly through said apertures.

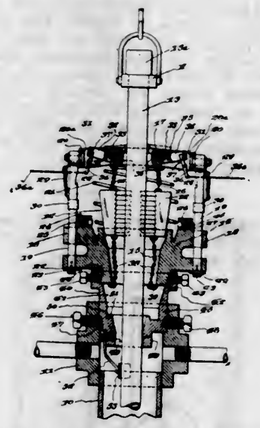
1,574,401. EGG-TURNING DEVICE FOR INCUBATORS. JOSEPH MCKEON, Independence, Mo. Filed Jan. 19, 1925. Serial No. 3,213. 2 Claims. (Cl. 119—44.)

1. In an egg turning device for incubators, a support, and an egg holder pivoted thereon to swing to two positions at opposite sides of the vertical, the holder having parallel sides and a V-shaped bottom, whereby each egg held therein will in either position of the holder have contact with one side of the holder and with both flaring portions of the bottom thereof.



1,574,402. DOLL CARRIAGE. JOSEPH MATUSHAK, Garfield, N. J. Filed June 23, 1924. Serial No. 721,766. 1 Claim. (Cl. 46—45.)

A toy comprising front and rear cross runners, side runners connecting the cross runners and having longitudinal slots near their rear ends, a wheeled axle inserted through and slidably supported in said slots, rods secured in and adjustable through the rear runner and provided at their front ends with hooks engaged around the wheeled axle, a floor secured upon the runners, a spindle mounted vertically in the floor in advance of the axle, a cage secured on the spindle above the floor, a sheave on the spindle below the floor, a pulley on the axle, and a belt trained around the sheave and the pulley.



1,574,403. FLOTATION MACHINE. STEPHEN ERNEST MEYER, Hayden, Ariz. Filed Oct. 24, 1924. Serial No. 745,624. 1 Claim. (Cl. 209—170.)

In a flotation machine of the class described, a pair of cells, froth collecting means within the cells, means for admitting pulp into the lower portion of one cell, means for admitting air into the lower portion of the last mentioned cell, a mat located in the last mentioned cell and disposed between the pulp and air admission means, a gas conducting pipe leading from the bottom of the last mentioned cell, a pipe leading from the top of the last mentioned cell, the cell being otherwise closed against the escape of gas, the first mentioned pipe communicating with the other cell in its bottom portion,

the second pipe communicating with the other cell below the first mentioned pipe, a mat located in the other cell and disposed between the two pipes, a valve in the first mentioned pipe, and float control means in the first cell for controlling said valve.

1,574,404. GRIPPING DEVICE. JOSEPH F. MOODY, Ranger, Tex. Filed Apr. 17, 1922. Serial No. 553,877. 12 Claims. (Cl. 24—263.)

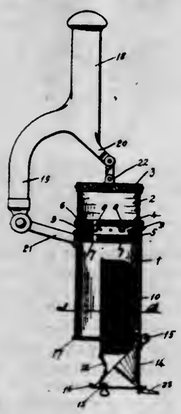
1. A gripping device comprising a member having a downwardly tapered vertical opening, a series of slips positioned to descend in said opening to assume a work-gripping position, a vertically movable support for the slips carried by the aforesaid member, means for yieldably holding the support elevated to position the slips in non-gripping position, and means associated with the support for coupling the same to the work upon a downward movement of the latter relative to the support.

1,574,405. GARMENT AND LIKE ARTICLE OF MANUFACTURE. HARLEY C. MOULTON, Medford, Mass., assignor, by mesne assignments, to Lewis Invisible Stitch Machine Co., a Corporation of Maine. Filed June 9, 1922. Serial No. 567,043. 6 Claims. (Cl. 112—268.)

6. A plain edge garment having a body comprising an outer layer and a facing connected together by a taped

infolded edge seam, a layer of stiffening material connected to said tape by an elastic lock-stitch seam comprising a series of alternating loops which respectively enter into and emerge from the respective juxtaposed faces of the stiffening material and the tape and are connected by a concatenating thread the portions of which between the loops overlie the edge of the tape and an elastic lock-stitch seam connecting said stiffening layer

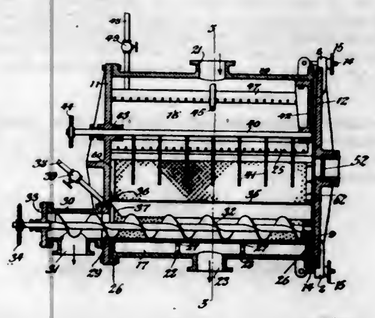
and facing together at a distance remote from the infolded edge seam and also remote from the edges of said stiffening layer comprising a series of alternating loops of thread which respectively enter into and emerge from the juxtaposed faces of said facing and stiffening layers respectively and extend in the direction of the line of seam and a concatenating thread connecting said alternate loops the sections of which intermediate of the loops extend in directions oblique to the line of the seam.



1,574,406. COMPOSITION FOR CLEANING STONE. GUSTAF A. NELSON, New York, N. Y. Filed June 12, 1923. Serial No. 644,944. 3 Claims. (Cl. 87—5.)

1. A composition of matter for cleansing granite, stone, marble, tile, etc., composed of technical ammoninium fluoride, oxalic acid and water.

1,574,407. CLEANING COMPOSITION FOR GRANITE, STONE, ETC. GUSTAF A. NELSON, New York, N. Y. Original application filed June 12, 1923, Serial No. 644,944. Divided and this application filed Sept. 9, 1924. Serial No. 736,790. 1 Claim. (Cl. 87—5.)

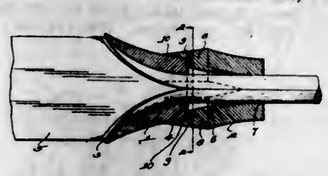


A composition matter for cleaning granite, stone, marble, tile, etc., comprising 75% ammoninum fluoride, 10% oxalic acid, 15% carbonate of sodium, compounded to about the weight of one and a half pounds, and mixed with about one gallon of water.

1,574,408. SMOKE PUMP. VITTORIO OREGGIA, San Remo, Italy. Filed Apr. 17, 1925. Serial No. 23,864. 1 Claim. (Cl. 43—128.)

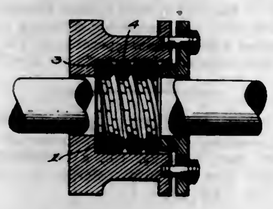
A smoke pump comprising a cylindrical body with cylindrical bellows connected to its rear end, partitions in said body forming an air chamber, nozzles projecting from one of said partitions and leading air from said bellows, holes in the cylindrical wall of said air chamber, holes in the second partition in alignment with said nozzles, a basket made of wire netting and fitted within said body, a funnel like cover pivoted to the body, a chain linking said basket to the cover, a double arm grip, with two arms each of which is articulated to depending projections from said body and said bellows.

1,574,409. FILTER. GEORGE J. PEZOLD, Buffalo, N. Y. Filed Dec. 19, 1923. Serial No. 681,460. 6 Claims. (Cl. 210—151.)



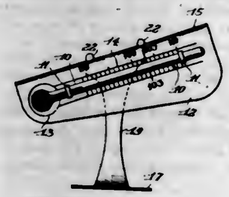
5. A filter comprising a shell provided on opposite sides of its interior with longitudinal flanges having the form of downwardly projecting hooks and having a removable head at one end, and a downwardly dished screen having its longitudinal edges engaging underneath said hook flanges and movable into and out of that end of the shell which is normally closed by said removable head.

1,574,410. LUBRICATING SYSTEM FOR INTERNAL-COMBUSTION ENGINES. CLAUDE LACY POWELL, Alamo, Tenn. Filed Oct. 7, 1921. Serial No. 506,029. 2 Claims. (Cl. 184—6.)



1. In combination with an internal combustion engine having a lubricating system and also having a fuel inlet, a throttle associated with the fuel inlet and governing the supply of fuel flowing therethrough to the engine, operating means positively and directly connected to the throttle for controlling and adjusting the same throughout its range of movement, means for supplying lubricant to the lubricating system of the engine and including an oil reservoir having a directly and downwardly extending connection projecting into the engine casing, a valve incorporated in said connection and operable to shut off or to permit in varying degrees the flow of lubricant from said oil reservoir to said engine under the influence of gravity, said valve being directly connected to and controlled by the operating means for the throttle whereby to be shut off when the throttle is shut off and opened as and when and in proportion to the degree to which the throttle is opened.

1,574,411. BUTT-WELDING PIPE. WINFIELD SCOTT STEVENSON, Zanesville, Ohio. Filed Oct. 10, 1923. Serial No. 667,728. 4 Claims. (Cl. 205—28.)

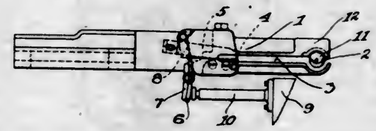


1. A pipe forming bell comprising a forming section and a welding section, said sections being provided with longitudinally aligned bearings, the bearings in the forming section being of greater diameter than the bearing in the welding section, and said welding section being provided at one end with a plurality of longitudinally extending transversely spaced bridge extensions having recesses provided in the outer ends thereof for the reception of the end of the adjoining forming section, and the spaces between said bridge extensions being such as to provide outlets at intervals around the full circumference of the bell.

1,574,412. METALLIC PACKING. ELMER E. SWITZER, Beaumont, Tex., assignor to George D. Switzer, Richard E. Switzer, and Thomas T. Switzer, all of Beaumont, Tex. Filed Sept. 3, 1925. Serial No. 54,243. 2 Claims. (Cl. 154—45.5.)

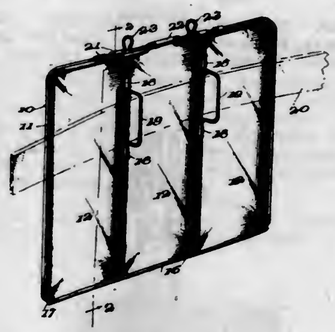
2. A packing comprising a rubber casing having an outer grooved face, and sectional metallic inserts in said casing and projecting beyond the inner face of the casing for producing a metallic bearing surface for engaging a rod or piston.

1,574,413. INCUBATOR THERMOMETER. HERBERT J. WINN, Rochester, N. Y., assignor to Taylor Instrument Companies, Rochester, N. Y., a Corporation of New York. Filed Aug. 20, 1924. Serial No. 733,100. 5 Claims. (Cl. 73—52.)



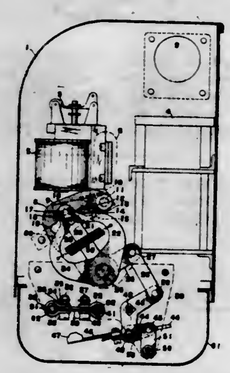
1. In an incubator thermometer, the combination of a thermometer tube, a plate on which said tube is mounted having at one lateral margin an angular flange provided with an aperture, and a standard comprising abutment means and a lug for engagement with said flange and aperture respectively to detachably support said mounting plate and tube in reading position.

1,574,414. BUTTON. ANDREW A. AHLQUIST, Lynn, Mass. Filed Sept. 3, 1925. Serial No. 54,368. 3 Claims. (Cl. 24—90.)



1. A method of making buttons, comprising rolling a strip of material upon itself, said roll being slitted, and the free end of said strip passed through said slit to a point where notches on the edges of said strip lock against the edge of the slit next said free end.

1,574,415. LOOM TEMPLE. GEORGE CROMPTON, Jr., Worcester, Mass. Filed Apr. 4, 1923. Serial No. 629,890. 1 Claim. (Cl. 139—303.)



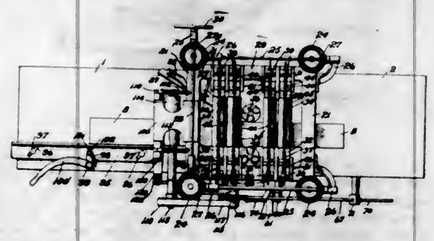
In apparatus of the class described, the combination with a temple head, means for engaging one side of the cloth carried by said temple head and further means for engaging the other side of the cloth, of a bifurcated bracket one arm of which carries said temple head and the other arm of which carries said second named means, thus leaving a slot allowing a thread to extend therethrough substantially at right angles to the selvage of the goods after being drawn by the weaving of a piece of goods completely away from both said means for engaging the cloth, and an automatic thread cutter located adjacent said slot substantially removed from both said means for engaging the cloth.

1,574,416. CARRIER OR HOLDER FOR ARTIFICIAL BAIT. FRANK HOWARD CAMPBELL, Lewisburg, W. Va. Filed Apr. 17, 1925. Serial No. 23,891. 3 Claims. (Cl. 43—31.)

1. A holder for artificial minnows, consisting of a two-part casing, the parts of which are hingedly connected along one edge of the casing, detachable fastening means in connection with the opposite edges of the parts, said casing parts having indented or dished portion paralleling one another in a direction at right angles to the hinged edges of the parts and forming separate minnow compartments when the casing is closed, and belt engaging loops whereby the carrier may be supported on the person in use, said loops being mounted externally of one of the casing parts and disposed parallel with and between the indented or dished portions thereof.

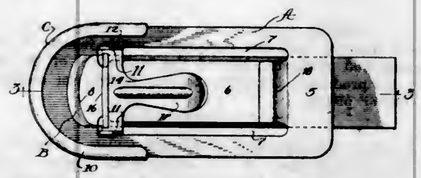
1,574,417. SWITCH. HERBERT W. CHENEY, Milwaukee, Wis., assignor to Allis-Chalmers Manufacturing Company, Milwaukee, Wis., a Corporation of Delaware. Filed Oct. 29, 1919. Serial No. 334,887. 22 Claims. (Cl. 200—6.)

1. A switch comprising two sets of relatively stationary contact means having the centers of their effective contact surfaces spaced apart a given distance, movable contact means having an open circuit position outside of a semi-circle having a diameter equal to said distance and in a plane perpendicular to said surfaces, and means whereby said movable contact means is caused to execute a combined motion of translation and rotation in moving directly from said open circuit position into engagement with either of said relatively stationary contact means.



17. In combination a switch operating mechanism having off, starting and running positions, a switch contact movable in unison with said operating mechanism, and means for preventing slow oscillation of said mechanism between the starting position and a position between the starting and off positions.

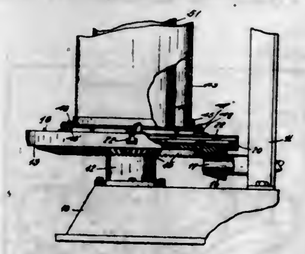
1,574,418. SCALP-TONIC APPLICATOR. PASQUALE COVIELLO, Highland Mills, N. Y. Filed Oct. 22, 1924. Serial No. 745,205. 1 Claim. (Cl. 128—65.)



A scalp tonic applicator comprising a comparatively flat body, a plurality of fingers projecting from the outer end of the body having their longitudinal axes arranged in the same plane, the inner end of the body being reduced and provided with a chamber, and internal threads adapted to secure the body to a container, the intermediately disposed fingers being each provided with a longitudinal passage and a discharge port at the free end thereof, the central portion of the body having passages connecting the passages in the intermediate fingers with the chamber, the fingers at each side of the intermediate fingers being solid.

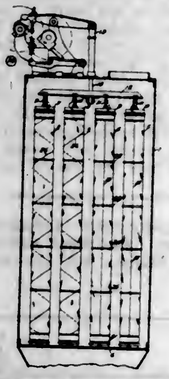
1,574,419. BOARD-DRESSING MACHINE. GLENN H. DICKERSON, Grand Rapids, Mich., assignor of one-third to De Forest Hamilton and one-third to Henry Riechel, both of Grand Rapids, Mich. Filed Jan. 17, 1923. Serial No. 613,162. 10 Claims. (Cl. 144—90.)

1. In a machine of the class described, a support, a feed and a delivery table carried thereby in alinement and spaced apart at their adjacent ends, driven feed rollers located between the tables, presser rollers associated with and located above the feed rollers, a relatively fixed rotatably mounted cutter located between the tables, a pivotally mounted arm on the support, a second cutter rotatably mounted on said arm, a bar connected to the arm extending laterally therefrom, a block through which the arm passes, a clamping member carried in the block and bearing against the bar, a screw for clamping said member against the bar, a gear rotatable with one of the feed rollers, a bar formed with a rack section thereon located adjacent the gear, a bar extending from the screw, connections between said two last mentioned bars, and means for elevating the rack bar into engagement with the gear operated by the passage of a board to the cutters, substantially as described.



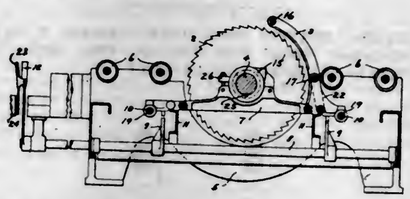
1,574,420. REED TRIMMER. GEORGE A. FINDER, Chicago, Ill., assignor, by mesne assignments, to Finder & Urbanek, Inc., Chicago, Ill., a Corporation of Illinois. Filed Aug. 2, 1924. Serial No. 729,852. 3 Claims. (Cl. 144—146.)

1. In a reed trimmer, the combination of an elongated body having a pair of spaced longitudinal slots between which is extended a spring tongue connected at one end integrally with the body, a pair of ears extended through the slots adjacent the ends thereof which are remote from the tongue connection with the body, means connecting the two ears having a clamping engagement with one body end, a cutting edge on the body closely adjacent to and formed in conformity with the edge on the free tongue end, and a cam device pivoted between the two ears adapted to move the tongue in a manner to perform a shearing operation, substantially as described.



1,574,421. APPARATUS FOR MAKING CONCRETE PIPE. CLARE H. BULLEN, Portland, Oreg., assignor to Tuerck Mackenzie Machine Co., Portland, Oreg., a Corporation of Oregon. Filed June 1, 1923. Serial No. 642,728. 10 Claims. (Cl. 25—30.)

1. In a machine of the class described, a rotatable table having a plurality of radially directed slots therein, a bar slidably mounted in each said slot provided with a plurality of tapped holes spaced along its length,

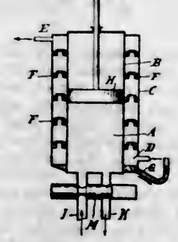


and a mold-supporting block provided with means cooperating with said bar-holes for clamping said block to the table.

1,574,422. DUST COLLECTOR OR FILTER. ROBERT F. FEIND, West Allis, Wis., assignor to Allis-Chalmers Manufacturing Company, Milwaukee, Wis., a Corporation of Delaware. Filed Feb. 20, 1922. Serial No. 537,858. 10 Claims. (Cl. 183—58.)

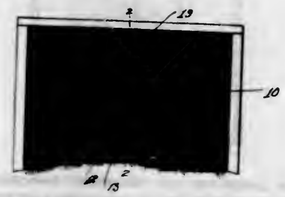
1. A dust collector of the bag type, having a filter bag provided with means for discharging static charges of electricity on said filter comprising a grounded electrical conductor in contact with a substantial portion of said bag.

1,574,423. RIFT SPLITTER. WILLIAM G. HAGMAIER, West Allis, Wis., assignor to Allis-Chalmers Manufacturing Company, Milwaukee, Wis., a Corporation of Delaware. Filed Apr. 13, 1922. Serial No. 552,159. 2 Claims. (Cl. 143—37.)



1. In combination, an arbor, a circular saw, a collar supporting said saw for movement along said arbor, stationary supports located on opposite sides of the vertical plane of the axis of said arbor, a guide rod located adjacent to the side of each of said supports remote from said arbor, a saw shifting frame engaging said collar, said frame resting on said supports and slidably engaging said rods, means for moving said frame, and a splitter rigidly associated with said frame in the plane of and closely adjacent to said saw.

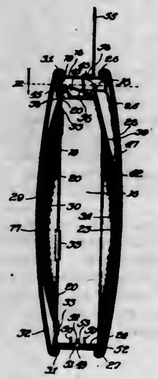
1,574,424. CONDENSER. HARRY A. HATCH, Newark, N. J., assignor to Splitdorf Electrical Company, Newark, N. J. Filed Oct. 16, 1920. Serial No. 417,847. 11 Claims. (Cl. 250—41.)



11. In a condenser comprising a stack of conducting layers separated by insulation, at least one relatively rigid insulating cover plate for said stack, and a deformable conducting plate at each side of the condenser, part of said layers being electrically connected to one of said side plates, and the remaining layers to the other side plate, each side plate having its opposite edges bent over so that at least one edge engages the outer face of said cover plate, said edge having securing means and said cover plate having openings to receive said means to assist in holding said edge against said cover plate, said means being too short to project from the inner faces of said cover plate into said stack.

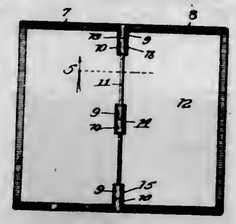
1,574,425. SEPARATION OF GASEOUS MIXTURES BY LIQUEFACTION AND RECTIFICATION AND APPARATUS THEREFOR. EUGÈNE JORDAN, Paris, France, assignor to Societe l'Air Liquide (Societe Anonyme pour l'Etude et l'Exploitation des Procedes Georges Claude), Paris, France. Filed Apr. 24, 1923. Serial No. 634,206. 14 Claims. (Cl. 183—115.)

1. The method of separating the constituents of gaseous mixtures by liquefaction and rectification, which comprises liquefying and simultaneously rectifying the gaseous mixture by the refrigerative effect of a gas, which is expanding with external work, in a chamber in heat transfer relation with the chamber in which the expansion occurs.



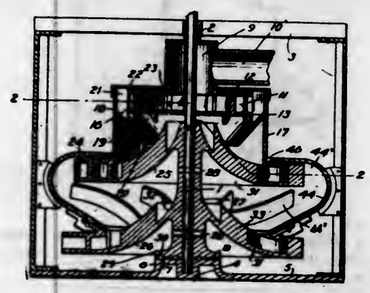
1,574,426. FLYTRAP. LOUIS H. KOLL, Casper, Wyo. Filed Dec. 4, 1922. Serial No. 604,802. 1 Claim. (Cl. 43—119.)

A fly trap comprising a pair of inverted angular U-shaped wire members disposed in close parallel relation, an elongated trough extending longitudinally between the lower ends of the legs of said members and



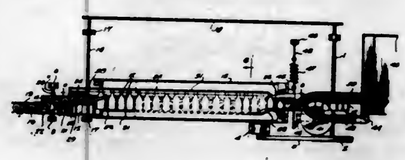
transversely between the legs of said members and being secured thereto, a reticulated covering secured to the U-shaped members and combining therewith to form an enclosure open at the bottom with the reticulated material terminating a short distance above said trough to permit free entrance of flies to the trough, and a snare within the reticulated enclosure having its lower end secured to the walls of the enclosure a short distance above the lower edges of the reticulated material.

1,574,427. BANK. JOSEPH KOMOROUS, Riverside, Ill., assignor to Parisian Novelty Company, Chicago, Ill., a Corporation of Illinois. Filed June 6, 1924. Serial No. 718,284. 29 Claims. (Cl. 232—4.)



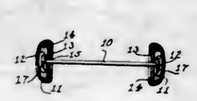
1. A bank structure formed of a hollow body comprising a ring, a plate-member extending crosswise of said ring adjacent one edge thereof, and an end plate flatwise opposing said plate-member, said plate-member having a deflected portion spaced from said end-plate and ring and affording therewith a compartment at the marginal edge of the bank, the bank also having a coin compartment, said hollow body containing an opening through which coins deposited in said coin compartment may be withdrawn therefrom, a closure for said opening, and releasable locking means for said closure comprising an element in said first-referred-to compartment.

1,574,428. BOOKLET. JOSEPH KOMOROUS, Chicago, Ill., assignor to Parisian Novelty Co., Chicago, Ill., a Corporation of Illinois. Filed July 23, 1925. Serial No. 45,532. 2 Claims. (Cl. 129—1.)



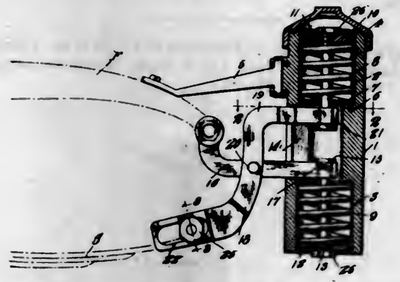
1. An article of the character described comprising separate cover sections, a removable and replaceable pin hingedly connecting said sections together, and a double-page sheet located between said cover sections and extending across the joint therebetween and removably held in place by said pin.

1,574,429. FLUID MOTOR. WILLIAM HARRISON LEGGETT, Zion, Ill. Filed May 9, 1925. Serial No. 29,084. 8 Claims. (Cl. 253—164.)



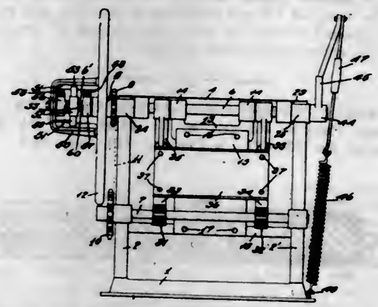
1. A fluid motor comprising a stationary member having an annular series of tangentially discharging fluid outlets, means for feeding the fluid centrally into the member to pass outward through the outlets, a shaft mounted to extend centrally through the annular member, a rotor carried by the shaft, an inner annular series of fluid impact members carried by the rotor, a plurality of annular series of outer fluid impact members also carried by the rotor on different planes, the inner series of fluid impact members being adapted to receive the fluid directly from the discharge outlets of the stationary member, and means for directing the fluid from such inner series successively to each of the plurality of outer series, and means for finally discharging the fluid from the last of the outer series.

1,574,430. CONVEYING APPARATUS. JOHN T. LEMON, Columbus, Ohio. Filed June 25, 1924. Serial No. 722,365. 6 Claims. (Cl. 198—23.)



6. A conveyor comprising an endless chain and divided into compartments, a rotatably mounted disk provided with depending spaced teeth arranged to engage said conveyor and move transversely through the compartments to force articles from the conveyor.

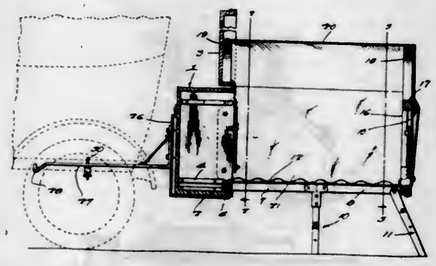
1,574,431. ELASTIC CUFF LINK. WALTER E. LENA, Waterbury, Conn. Filed Sept. 10, 1925. Serial No. 55,512. 10 Claims. (Cl. 24—102.)



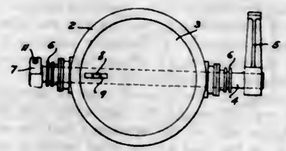
1. In an elastic cuff link, an elastic cord formed of woven fabric, a pair of hollow cuff buttons at the ends of said cord, and a pair of anchoring clamps formed separately from said buttons and clamped upon the ends of said cord within said buttons.

1,574,432. SHOCK ABSORBER. JOHN LESTER LIVELY, Middletown, Ohio. Filed Feb. 26, 1924. Serial No. 695,257, 1 Claim. (Cl. 267—17.)

A shock absorber including a housing having a longitudinal bore extending therethrough, the ends of the bore being counter bored to provide interior shoulders, there being a longitudinal guide slot in the housing between the counter bores and opening into the central portion of the bore, disks normally resting upon the shoulders at the inner ends of the counter bores, rods slidably mounted within the respective disks, head connected to the respective rods and slidable within the respective counter bores, a spring within each counter bore bearing at one end against the disk therein and at its other end against the head therein, crossed pivotally connected levers projecting at one end through the slot and into the bore, said levers engaging and adapted to actuate the respective rods, a bracket for fixedly attaching the housing to a vehicle, and means for movably connecting the outer ends of the levers to a vehicle frame and spring respectively.



1,574,433. CONCRETE-PIPE-BEND MACHINE. WILLIAM J. MACKENZIE, Portland, Oreg. Filed June 2, 1924. Serial No. 717,221. 9 Claims. (Cl. 25—30.)



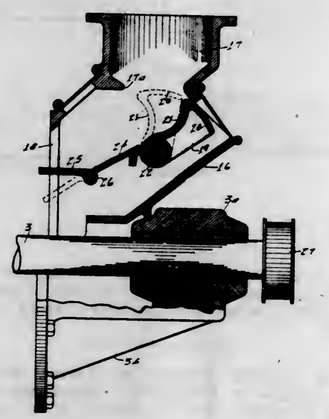
1. In a pipe-bend machine, a shaft having a screw-threaded end, an actuating wheel revolubly mounted on said shaft, a yoke rigidly secured to said wheel, a nut engaged upon said threaded end of said shaft and slidably associated with said yoke to turn therewith, thereby being caused to move longitudinally upon the shaft, said nut being provided with a stop-lug, and a collar adjustably connected to said shaft-end providing a stop to engage said stop-lug of said nut.

1,574,434. AUTOMOBILE BED. BENJAMIN D. MANNING, Decorah, Iowa. Filed Apr. 8, 1925. Serial No. 21,588. 4 Claims. (Cl. 5—119.)

1. In a structure of the class described, a box adapted to be supported on the rear end of a vehicle, a hinged cover for said box, said cover being adapted to swing upwardly, a foldable cot structure in said box adapted to be extended therefrom in a horizontal plane to position it for use, a frame structure hingedly connected to the rear end of said cot structure, said frame structure including a top bow, and a second bow fastened to the cover of said box, and a canvas fastened to said bows and adapted to be stretched to provide a canopy to overlie said cot.

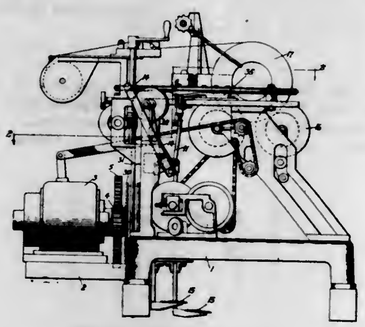
1,574,435. VALVE. CHARLES R. MARTIN, Milwaukee, Wis., assignor to Allis-Chalmers Manufacturing Company, Milwaukee, Wis., a Corporation of Delaware. Filed Apr. 4, 1923. Serial No. 629,770. 8 Claims. (Cl. 277—41.)

1. In combination, a casing, a butterfly valve within said casing, a pivot stem about the axis of which said valve is movable, and means disposed entirely within said stem for controlling the flow of fluid directly through said valve.



6. In combination, a casing, a butterfly valve within said casing, a stem providing a pivot for said valve, said stem having a transverse opening therethrough, and a rotary valve disposed concentrically within said stem for controlling the flow of fluid through said opening to opposite sides of said butterfly valve.

1,574,436. PULVERIZER BEATER. STANTON C. MARTIN, Erie, Pa., assignor, by mesne assignments, to Erie City Iron Works, a Corporation of Pennsylvania. Filed June 1, 1922. Serial No. 565,060. 4 Claims. (Cl. 83—11.)

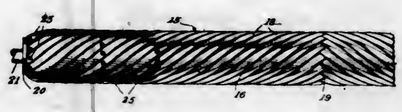


1. In a pulverizer beater, the combination of a carrier having undercut grooves in its periphery; and beater blades having bases arranged in said grooves with portions extending under the undercut portions of said grooves and the under sides of the bases being bevelled from a longitudinal line intermediate their edges.

1,574,437. FUEL-TREATING DEVICE. STANTON C. MARTIN, Erie, Pa., assignor, by mesne assignments, to Erie City Iron Works, a Corporation of Pennsylvania. Filed Feb. 25, 1922. Serial No. 539,188. 9 Claims. (Cl. 83—11.)

1. In a fuel treating device, the combination of a fuel feeding device comprising a case having an inlet opening and a discharge opening; a normally stationary support in the case extending to an off-set position relatively to the inlet opening and positioned relatively to the walls of the case to permit the forward slope of material to find an angle of repose; means for adjusting the inclination of the discharge end of the support; and an oscillating means acting on the fuel at the inlet opening controlling and pushing the same forward over the support.

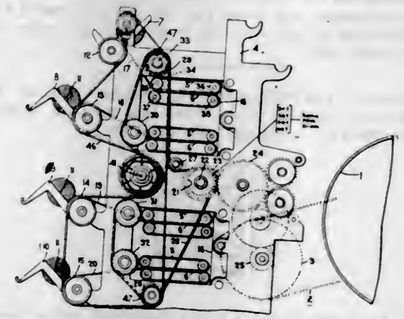
1,574,438. WRAPPING MACHINE. FRANK M. PIERCE, Chicago, Ill., assignor to Pierce Wrapping Machine Company, Chicago, Ill., a Corporation of Illinois. Filed Jan. 10, 1924. Serial No. 685,325. 7 Claims. (Cl. 242—6.)



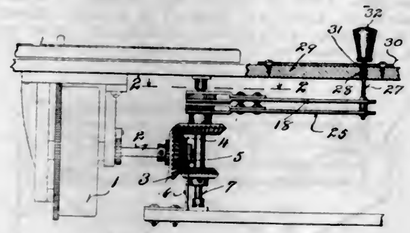
1. In a wrapping machine of the character described, the combination of a shuttle frame, a ring shuttle mounted on said frame, the frame and shuttle being provided with openings through which the article may be passed, means including a clutch to rotate the shuttle, a brake mechanism adjacent the shuttle, a cam formation on the outer periphery of the shuttle and with which the brake is adapted to engage, and a common operating member to release the clutch and apply the brake to the cam.

1,574,439. PILE CONSTRUCTION. WAYNE PRINGLE, Lincoln, Nebr. Filed Apr. 5, 1922. Serial No. 549,861. 7 Claims. (Cl. 61—80.)

1. In a self-sinking pile, a channel extending longitudinally therethrough for the rapid transmission of water to cause removal of soil whereby to permit the pile to sink, in combination with a return flow channel through which a part of the water may be withdrawn to be carried off by suitable piping, whereby to reduce undue erosion by the water of the soil surrounding the pile, said return flow channel having its intake in advance of the outlet of said water transmitting channel.



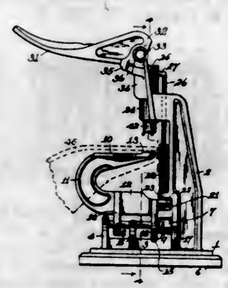
1,574,440. DEFLESHING-MACHINE CYLINDER. JOSEPH PROKOP, Newark, N. J. Filed Sept. 24, 1924. Serial No. 739,477. 4 Claims. (Cl. 149—16.)



1. A defleshing machine cylinder for hides comprising a core at least equal in length to the hides to be defleshed, a series of cutter blades arranged in opposed helical relation to extend from the longitudinal center of the core to the ends thereof, and filler strips disposed between said blades whereby their operative edge is of minimum height above the core at the end portions thereof and of maximum height above the core intermediate the end portions.

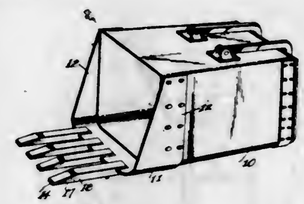
1,574,441. TAPE CONDENSER. WALTER T. PUTNAM, North Andover, Mass., assignor to Davis & Furber Machine Company, North Andover, Mass., a Corporation of Massachusetts. Filed Sept. 14, 1925. Serial No. 56,163. 5 Claims. (Cl. 19—151.)

1. A tape condenser comprising a plurality of banks of aprons, a winding drum for each bank of aprons, a driven pulley, a belt extending around the pulley and all of the winding drums, and means for radially expanding and contracting the pulley to adjust the speed of the belt and thereby the peripheral speed of the winding drums relatively to the speed of the aprons.



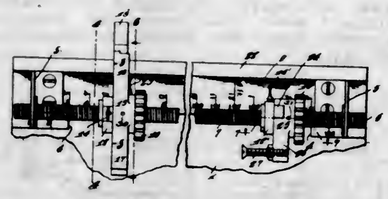
1,574,442. MECHANICAL MOVEMENT. AAGE RASMUSSEN, Milwaukee, Wis. Filed June 15, 1925. Serial No. 37,170. 1 Claim. (Cl. 74—54.)

A mechanical movement comprising a base member and a top member having sockets rigidly carried thereby, a vertical shaft extending between said sockets, a bevel gear rigidly secured to said shaft adjacent its lower end, a second bevel gear spaced therefrom and having an integral downwardly extending sleeve resting upon said first mentioned bevel gear to hold said bevel gears in spaced relation, a pair of rocking levers, pawl mechanisms operating in opposite directions and joining said levers with said shaft and with said last mentioned bevel gear, a frame work having vertical side members extending upwardly from said base and having a transverse member, a horizontal shaft having an end journaled in said transverse member, and a pair of bevel gears carried by said horizontal shaft and meshing with said first mentioned bevel gears.



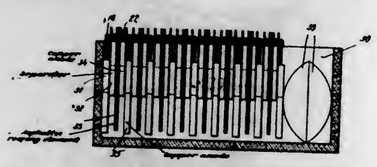
1,574,443. TOE-PLATE SETTER. JAMES C. REID, Jr., Cleveland, Ohio, assignor to James C. Reid, sr., Cleveland, Ohio, and William C. Taylor, East Cleveland, Ohio. Filed May 22, 1924. Serial No. 715,125. 9 Claims. (Cl. 1—21.)

3. A toe-plate setter for shoes comprising a return-bent and laterally oscillable anvil member, a pressing device having a ram adapted to be reciprocated in opposition to the anvil member, a locking member connected with the pressing device, and a stop on the anvil



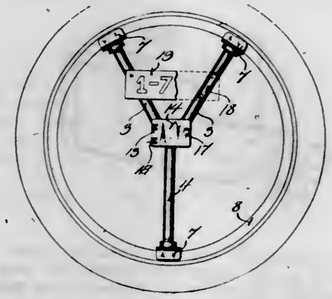
member arranged to intercept said locking member to prevent movement of the ram except when the anvil member is properly opposed to the ram.

1,574,444. LIP AND TEETH FOR EXCAVATING BUCKETS. NAZRO H. REYNOLDS, Oakland, Calif. Filed Jan. 14, 1925. Serial No. 2,424. 3 Claims. (Cl. 37—141.)



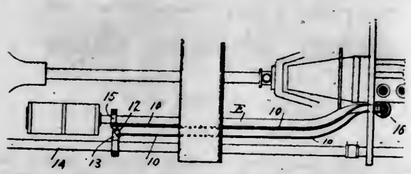
1. The combination with an excavating bucket, of a lip secured to the bucket and including a transverse bottom portion secured to the bottom of the front of the bucket and vertical side portions secured to the sides of the front of the bucket, and integral bars on the lower face of said bottom portion extending forwardly of the bucket to provide digging fingers and rearwardly thereof to provide attaching fingers and runners for the bottom of the buckets.

1,574,445. SAW GAUGE. JONATHAN J. ROBINSON, Philadelphia, Pa. Filed Nov. 15, 1923. Serial No. 674,963. 8 Claims. (Cl. 143—74.)



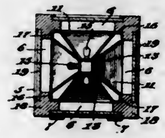
1. A gauge comprising a screw threaded carrier bar having an interrupted thread, a split sleeve removable radially from the carrier bar, a stop member rotatably mounted on the sleeve and removable radially from the bar, and means for holding the members of the sleeve and the stop member assembled.

1,574,446. METHOD AND APPARATUS FOR PRODUCING ROOFING ELEMENTS. THOMAS ROBINSON, New York, N. Y., assignor to Anaconda Sales Company, a Corporation of Delaware. Filed Dec. 22, 1923. Serial No. 682,149. 20 Claims. (Cl. 204—8.)



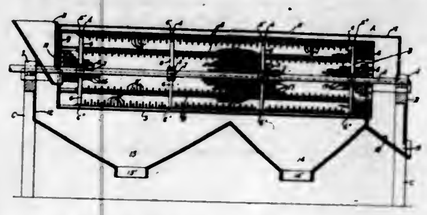
1. A method of making roofing elements comprising the steps of mounting an anode in a cell, this anode having a shape corresponding to the shape of the deposit to be made, placing a separator in contact with the face of the anode, placing a base having a conducting coat formed thereon against the surface of the separator, holding these parts together by pressure, and connecting the anode and the conducting coating of the base to the positive and negative terminals respectively of a source of current.

1,574,447. TIRE HOLDER. OMER RUTH, Racine, Wis. Filed Feb. 16, 1925. Serial No. 9,495. 2 Claims. (Cl. 224—29.)



1. A tire holder comprising a support having a hub, means rigidly carried by said hub for engaging a portion of a tire rim, a rod slidable through said hub and having means at its outer end for engaging a portion of the tire rim spaced from said first mentioned portion, a plate slidably mounted within said hub and adapted to be slid across the inner end of said rod, a door hinged to said hub and adapted when closed to prevent sliding of said plate, and a lock for temporarily holding said door closed.

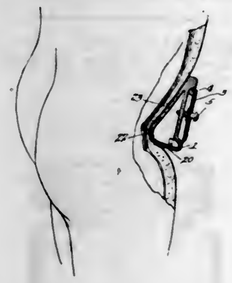
1,574,448. AUTOMATIC CARBURETOR ADJUSTMENT. WILLIAM J. SHORT, Heber Springs, Ark. Filed June 26, 1923. Serial No. 647,855. 2 Claims. (Cl. 261—39.)



1. The combination of a carburetor valve and the pipe extending from the exhaust manifold of an internal combustion engine, such pipe being free to move longitudinally under temperature changes due to exhaust gases passing through such pipe, a device connecting with and partaking of such longitudinal movement of said pipe, the point of connection between said device and the pipe being a substantial distance from the exhaust manifold and the carburetor valve, and an operative connection between said device and the carburetor valve for transmitting to the valve the longitudinal movement of the exhaust pipe.

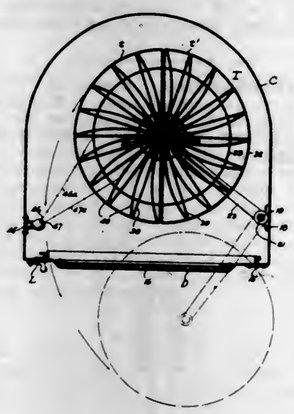
1,574,449. TRAFFIC-CONTROL SIGNAL. GEORGE S. SIMONS, Plainfield, N. J. Filed Jan. 10, 1924. Serial No. 685,461. 2 Claims. (Cl. 177—329.)

1. In a traffic signal, a casing comprising corner pieces defining openings on all four sides of said casing, reflectors arranged within said casing, each of said reflectors having a vertical inner wall adapted for the reception of a lamp and diverging side walls extending from said vertical inner wall to the margins of said openings, each reflector also having a vertical flange extending around the outer edges of its diverging side walls adapted to fit within internal angles formed in said corner pieces and means arranged at the entrance of said openings having traffic indicia thereon.



1,574,450. NUT-SHELLING MACHINE. EDGAR R. SKINNER, JOHN H. RENNE, and EDWARD O. OSTERMEYER, St. Louis, Mo., assignors to Bernhart Mercantile Company, a Corporation of Missouri. Filed Oct. 6, 1924. Serial No. 741,871. 3 Claims. (Cl. 146—11.)

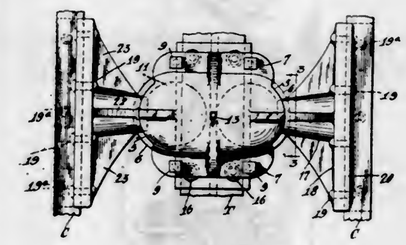
1. A nut-shelling machine comprising a rotatable drum into which the nuts are placed after the shells thereof have been cracked, and means comprising a plurality of pins extending inwardly from the wall of the drum whereby said nuts are tumbled about within said drum as it is rotated, the wall of said drum being provided with a group of apertures adjacent to one of its ends through which the fragments of the shells of nuts pass, and a group of larger apertures adjacent to the other end of said drum through which the kernels of said nuts pass, said drum being arranged at an inclination to cause the nuts therein to move toward one of its ends while the same is rotating.



1,574,451. TRUSS PAD. LUCIUS ANTON SMITH, Buffalo, N. Y., assignor of one-half to Bee Burn Smith, Buffalo, N. Y. Filed Dec. 9, 1922. Serial No. 605,911. 1 Claim. (Cl. 128—115.)

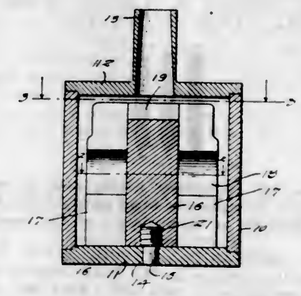
As a new article of manufacture, an inguinal hernia pad with an outer side and also with a portion for use in opposed relation to a patient's body, said portion characterized by an edge substantially constituting a plane straight in the directions of its length and width and lying substantially perpendicular to said outer side, and by a longitudinal protuberance immediately adjacent to said edge, comparatively thick at a point near

the edge, and nearer the upper end of the pad than the lower end thereof; the remainder of said portion being generally tapered from said protuberance to the edge of the pad remote from said plane edge.



1,574,452. DISHWASHING MACHINE. WILBERT L. SOUTH, Ontario, Calif. Filed Feb. 20, 1924. Serial No. 694,037. 6 Claims. (Cl. 141—9.)

3. In a dish washing machine, a casing having an opening in one of its vertical walls, a shaft supported for rotation in the casing, dish supporting trays fixed to and supported on the shaft, and means for supporting the shaft to permit lateral movement of the shaft and trays into and out of the casing through said opening.

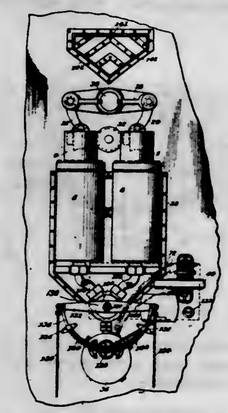


1,574,453. ARTICULATED CAR JOINT. JOSEPH M. SUAREZ, Baltimore, Md., assignor of one-tenth to Sterling P. Buck, Baltimore, Md. Filed Dec. 4, 1925. Serial No. 73,223. 7 Claims. (Cl. 105—4.)

1. An articulated car-joint comprising two members each formed with a neck having a ball on one end and means on its other end to secure it to an end of a car-section in such relation that these two members extend towards one another when secured on opposing ends of car-sections, and an intermediate joint-member including two ball-sockets each having an outlet in its upright side which is farthest from the other ball socket, said necks extending through said outlets while said balls are fitted

in said ball-sockets and adapted to have limited rotary movements therein, said joint-member having means to secure it to a truck-bolster.

1,574,454. PISTON CORE CHILL AND MOLD. MAYBEL E. TANDY, Hanford, Calif. Filed Nov. 11, 1924. Serial No. 749,246. 4 Claims. (Cl. 22—170.)



1. A sectional chill and core for a piston casting mold the same comprising a center section and quarter sections at opposite sides of the center section, the latter being of wedge formation to facilitate its withdrawal, corresponding quarter sections having matching notches to form wrist pin receiving bosses and the quarter sections being applicable and removable by direct lateral movement.

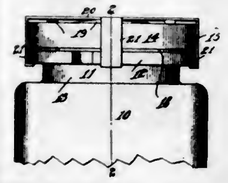
1,574,455. HYDRODYNAMIC STEERING GEAR. ENOCH VELEN, New Orleans, La. Filed Dec. 12, 1922. Serial No. 606,543. 2 Claims. (Cl. 114—150.)

2. The combination with a ship's rudder shaft, of a pair of horizontally arranged cylinders having one end open, pistons arranged in the cylinders, operative connections between the pistons and rudder shaft, a source of compressed fluid, a three-way valve controlling communication between the cylinders and source of compressed fluid and adapted to operate said cylinders, means for actuating the valve comprising a lever fixed intermediate its ends to rotate with the valve, an arcuate guide member fixed to the ends of the lever, guides through which the arcuate member passes, expansible coil springs encircling the arcuate member and disposed upon opposite sides of one of the guides and engaging the same, and normally urging the arcuate member to a

position where the valve will be disposed in closed position, and flexible elements connected with the ends of

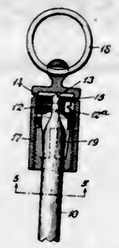
the lever whereby the latter may be rocked in the desired direction whereby to establish communication between the desired cylinder and source of compressed fluid.

1,574,456. RADON TUBE OR IMPLANT. CHARLES H. VIOL, Pittsburgh, Pa., assignor to Standard Chemical Company, Pittsburgh, Pa. Filed Apr. 23, 1924. Serial No. 708,512. 1 Claim. (Cl. 174—177.)



A radon tube or implant having such intense color appearance as to render the same readily visible to facilitate the handling or manipulation of the same.

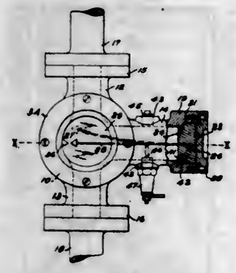
1,574,457. MECHANICAL PENCIL. JOHN C. WAHL, Chicago, Ill., assignor to The Wahl Company, Chicago, Ill., a Corporation of Delaware. Filed Mar. 5, 1921. Serial No. 449,804. 27 Claims. (Cl. 120—18.)



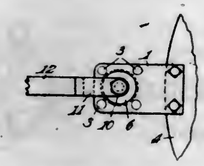
1. In a pencil, a casing; means for feeding the lead through the casing comprising a threaded follower rod; a threaded feed control member normally in disengagement of the rod to permit free gravity movement thereof; means for actuating said control member for effecting engagement with the rod to control the movement of the latter; and means for advancing or retracting said rod under engagement of the control member.

1,574,458. FRUIT-JAR COVER. ADA B. WENDEL, Smithland, Iowa. Filed May 12, 1925. Serial No. 29,775. 1 Claim. (Cl. 215—92.)

A jar including a neck having external and peripheral flanges the lowermost of which projects beyond the face of the neck, said lowermost flange being provided with vertical openings, a cover having a depending peripheral flange formed with internal steps arranged to be seated on the stepped flanges of the neck, gaskets on the stepped flanges and engaged by the steps of the cover, and a yoke extended across the cover and having its ends extended inwardly for passage through said openings and engagement beneath said lowermost flange of the neck.



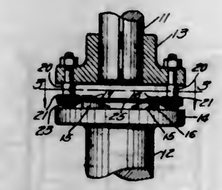
1,574,459. THERMOMETER. ROBERT M. WILHELM, Brooklyn, N. Y., assignor to Charles J. Tagliabue Mfg. Co., New York, N. Y., a Corporation of New York. Filed July 3, 1925. Serial No. 41,282. 7 Claims. (Cl. 206—16.5.)



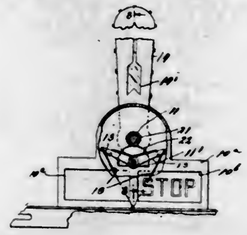
1. The combination of a thermometer provided at one end with an aperture, the axis of which is transverse to the major axis of the thermometer, a cap extending over the apertured end of said thermometer, and a fastening device passing through said aperture and connected with said cap whereby said thermometer and cap are attached to each other.

1,574,460. FLOW INDICATOR. ROBERT B. WILLIAMSON, Milwaukee, Wis., assignor to Allis-Chalmers Manufacturing Company, Milwaukee, Wis., a Corporation of Delaware. Filed Jan. 2, 1920. Serial No. 349,655. 8 Claims. (Cl. 116—117.)

1. A flow indicator, comprising a casing having a flow opening therethrough, and a movable indicating element within said casing comprising a flexible resilient vane having a portion in the normal path of flow through said casing, said movable element being biased toward nonindicating position independently of the position of the casing and capable of being readily flexed to indicating position in response to flow of fluid through said casing.

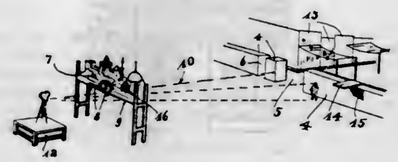


1,574,461. UNIVERSAL TRAILER HITCH. WILLIAM WITSBERGER, Wheeling, W. Va. Filed Nov. 6, 1924. Serial No. 748,129. 4 Claims. (Cl. 280—33.44.)



1. A coupling of the character described, comprising attached companion plates of flat form having therein registering apertures, the defining walls of said apertures being oppositely beveled to form opposed ball seats, a ball carried by said members, said ball having rotary movement on and being retained in place by said seats, a pole having a yoke formed on its end, and a pivot pin directed axially through said ball and having its ends mounted in the opposite members of said yoke above and below said plates.

1,574,462. ONE-WAY COUPLING. JOHN A. WINTROATH, Los Angeles, Calif., assignor to Peerless Pump Company, a Corporation of California. Filed June 25, 1923. Serial No. 647,604. 9 Claims. (Cl. 192—46.)

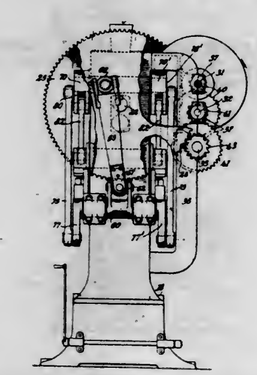


1. The combination of: a driving shaft; a driven shaft; projections secured to one of said shafts; pins secured to the other of said shafts and extending longitudinally thereof; and a member slidably supported on said pins, said member being adapted to engage said projections in a manner causing said driven shaft to be rotated when said driving shaft is rotated in a positive direction, and to be slid on said pins by said projections when said driving shaft is rotated in a negative direction, said member being circularly yieldable until all of said projections have equal driving contact therewith in a driving rotation.

1,574,463. AUTOMOBILE SIGNAL. FRIEDRICH WUCHERT, Astoria, N. Y. Filed Aug. 12, 1924. Serial No. 731,575. 3 Claims. (Cl. 116—51.)

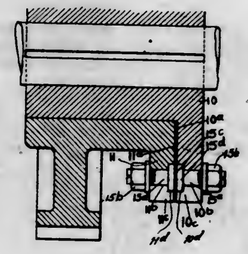
1. As an article of manufacture, a signaling device for a motor vehicle, consisting of an illuminable casing having a bottom window and adapted to be fixed to the vehicle above the license plate, a spring actuated spindle extending transversely through and journalled in said casing, an illuminable semaphore arm fixed to said spindle and adapted normally to project in vertical direction, a pair of levers operatively connected to said spindle at an angle to each other, a manually operable member adapted to be supported at the dashboard of the vehicle and flexible means connecting said member to said levers, so that by the operation of said member the semaphore arm will be tilted from its vertical position to indicate the direction in which the vehicle is to turn.

1,574,464. SCENERY FOR PICTURES AND METHOD OF PRODUCING SAME. JOHANNES BARTHOLOWSKY, Los Angeles, Calif. Filed Nov. 6, 1922. Serial No. 599,313. 10 Claims. (Cl. 88—16.)



1. In producing pictures, the method of providing full-size objects in the surrounding of moving objects up to a level above the moving objects, providing miniature objects in the foreground of the moving objects above the first-mentioned level and so as to unite into one scenery when photographed together, and photographing the said objects together with an actual performance.

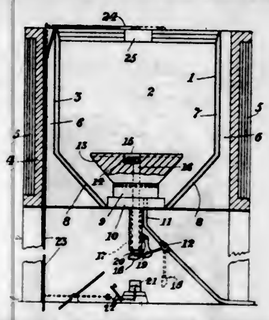
1,574,465. DRAWING PRESS. OTTO S. BEYER, Brooklyn, N. Y., assignor to E. W. Bliss Company, Brooklyn, N. Y., a Corporation of West Virginia. Original application filed May 14, 1920, Serial No. 381,369. Divided and this application filed May 11, 1922. Serial No. 560,116. 9 Claims. (Cl. 113—38.)



1. In a press of the type having a plunger and a workholder, a frame, a crank-shaft supported by the frame for operating the plunger, four toggle arms arranged on opposite sides of the frame and connected to the work-

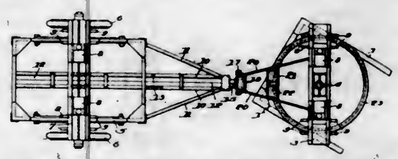
holder to raise and lower the same, said toggle arms arranged to swing in planes parallel to the axis of the crank-shaft, rods arranged in pairs exteriorly of the

frame and at both sides thereof for operating said toggle arms, and actuating mechanism arranged exteriorly of the frame at both sides thereof and connected to the lower ends of the rods.



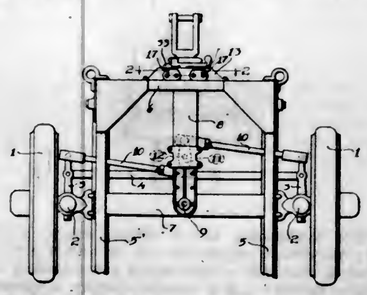
1,574,466. SAFETY CONNECTION FOR POWER TRANSMISSION. ELLIS EUGENE BROWN, Springmont, Pa. Filed Apr. 18, 1925. Serial No. 24,299. 7 Claims. (Cl. 64—105.)

1. A safety power-transmitting connection for driving and driven members, comprising a double-bodied member-connecting shear bolt the oppositely extending body portions of which are immovably positioned in the respective members so as to positively fix the latter in determined adjacent relation and the uniting shear portion of which is of a reduced cross-section having a shearing strength adapted to withstand only a determined maximum force of transmission.



1,574,467. COOKING OVEN. ROBERT BROWN, Donaghmore, Ireland. Filed Aug. 18, 1921. Serial No. 493,487. 4 Claims. (Cl. 126—39.)

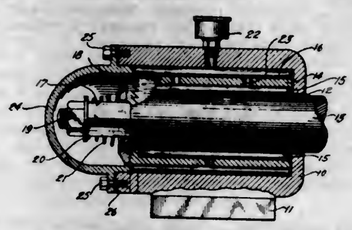
1. In a cooking apparatus having a cooking chamber, and a fuel burner, thermostatic control device comprising a support, a thermostatic weight resting thereon and adapted when heated to a predetermined degree to overbalance and fall therefrom, a guide to receive and guide said thermostatic weight during its fall, a pivoted latch adapted to be moved by said thermostatic weight during its fall, and a fuel control lever adapted to be



normally held by the said latch and arranged to be moved on movement of said latch to cut off the fuel supply.

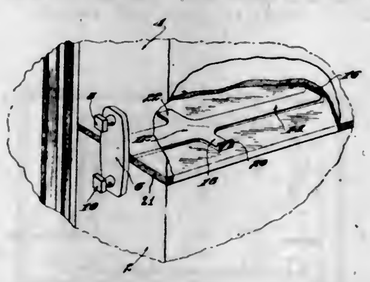
1,574,468. TRAILER HITCH. CHARLES G. CLEMENT, Edgerton, Wis., assignor to Highway Trailer Company, Edgerton, Wis., a Corporation of Wisconsin. Filed Dec. 5, 1919. Serial No. 342,598. 4 Claims. (Cl. 280—33.4.)

1. In the combination of a tractor truck and a trailer, a load-carrying bolster mounted on the truck for turning about a vertical axis, a draft member extending rearwardly from the bolster, laterally rigid with respect thereto and overhanging the rear end of the truck; a track on the truck formed concentrically about the vertical axis of the bolster and extending under said draft member, said track having a flange which serves as a tread; means on the draft member adapted to ride on said tread, and means on the draft member engaging under said flange to retain the parts in that relation.



1,574,469. DRAWBAR LOCK. CHARLES G. CLEMENT, Edgerton, Wis., assignor to Highway Trailer Company, Edgerton, Wis., a Corporation of Wisconsin. Filed Sept. 11, 1922. Serial No. 587,261. 5 Claims. (Cl. 280—33.55.)

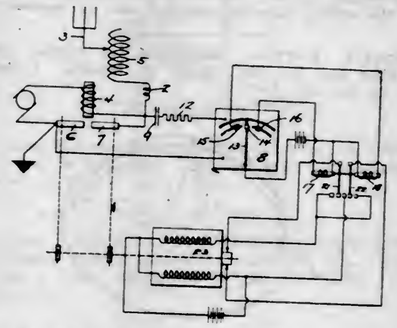
1. In a device for the purpose described, the combination with a transverse frame member, of a horizontally movable drawbar extending across the frame member,



a housing mounted on said member above the central position of the drawbar, said housing being provided with two vertical guideways at opposite sides of the central position of the drawbar, locking dogs vertically slidable in the respective guideways, independently of each other and located to engage opposite sides of the drawbar; and separate springs urging the respective dogs downwardly in projected position, the lower end of each dog having a cam face sloping laterally and upward for encounter with the drawbar as it is swung into central position.

1,574,470. BEARING CONSTRUCTION. BASSETT M. COFFEE, New Haven, Conn., assignor to The Safety Car Heating & Lighting Company, a Corporation of New Jersey. Filed Aug. 3, 1923. Serial No. 655,431. 17 Claims. (Cl. 308—183.)

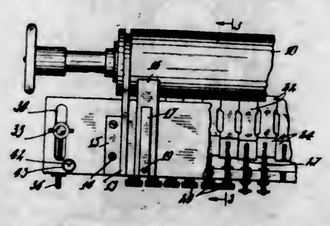
1. In bearing construction, in combination, a member having a reciprocatory motion, a member adapted to support said first member, means interposed between said two members adapted to distribute lubricant over the surfaces thereof, and means adapted to give said lubricant distributing means a uni-directional movement during said reciprocation of said first member.



1,574,471. ANCHOR. CHARLES A. CUNNINGHAM, Boston, Mass. Filed Jan. 9, 1924. Serial No. 685,208. 9 Claims. (Cl. 72—108.)

4. An anchor comprising an anchor arm of dimensions such that it is adapted to be embedded in the mortar of a building wall and having two projections disposed at right angles to each other and adapted, respectively, to solely coact with the mortar to resist displacing forces longitudinal of and transverse to the anchor arm.

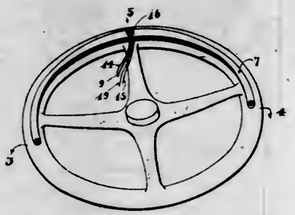
1,574,472. RADIOFREQUENCY ARC. HAROLD F. ELLIOTT, Palo Alto, Calif., assignor, by mesne assignments, to Federal Telegraph Company, San Francisco, Calif., a Corporation of California. Filed June 22, 1921. Serial No. 479,497. 3 Claims. (Cl. 250—36.)



1. In a system for producing high frequency current oscillations with an arc, a pair of electrodes between which the arc is formed, a circuit connected to the electrodes, and means for adjusting the distance between the electrodes so as to produce an optimum value as regards the arc output, comprising mechanism responsive only to variations beyond definite limits of the voltage drop across a part of the arc circuit for moving the electrodes relatively to each other.

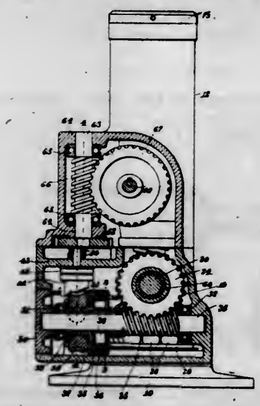
1,574,473. RADIOFREQUENCY SYSTEM. HAROLD F. ELLIOTT and JAMES ARTHUR MILLER, Palo Alto, Calif., assignors, by mesne assignments, to Federal Telegraph Company, San Francisco, Calif., a Corporation of California. Filed Jan. 9, 1922. Serial No. 527,885. 27 Claims. (Cl. 250—36.)

27. In a radio frequency electrical system, the method of maintaining the operation of the system at the required frequency which consists in increasing the amount of energy consumed in a portion of the system upon an appreciable variation in either direction from the desired frequency.



1,574,474. PRINTING-PRESS INK FOUNTAIN. EDWARD FALTUS, New York, N. Y. Filed Apr. 22, 1924. Serial No. 708,124. 4 Claims. (Cl. 101—365.)

1. In a printing press, in combination with a fountain roll, an ink supply device, a supporting frame, a series of sectional ink-knife devices extending transversely to said roll, a series of blocks slidable in said frame and having said devices connected thereto, said



blocks being formed with threaded sockets, and screws swiveled in said frame and engaged in the said sockets, said frame comprising a bottom plate and a top member resting thereon, the said screws having their axes in the meeting plane of said plate and top member.

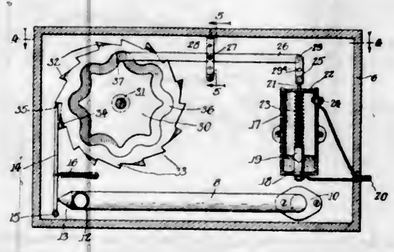
1,574,475. SWITCH. ROSS FOX, Los Angeles, Calif. Filed Jan. 30, 1924. Serial No. 689,456. 1 Claim. (Cl. 200—59.)

In an automobile signal, a base plate formed edgewise to follow the circle of the rim of a steering wheel of an automobile over a proportionally large portion and adapted to be applied to the top of the steering wheel, a cover plate to fit over the base plate spaced practically parallel from the base plate through the larger portion of its length and being attachable to the steering wheel together with the base plate, a leaf-like contact plate disposed over the base plate and extending through the whole space between the base and cover plates, insulating material disposed in the space between base and cover plate at about the middle of the length, other contact plates embedded in the insulating material and extending towards the ends of the base and cover plate normally spaced from the first-named contact plate between the base and cover plates, a smaller contact plate insulated from all other contact plates, and a push-button having contact with the last-named small contact plate and adapted to be pushed towards the first-named contact plate, the second-named contact plates to be moved towards the first-named contact plate by a bending and pressing of the cover plate towards the base plate.

1,574,476. LIFTING JACK. FRANK L. GORMLEY, Brookline, Mass., assignor to The Buda Company, Harvey, Ill., a Corporation of Illinois. Filed Aug. 1, 1925. Serial No. 47,421. 24 Claims. (Cl. 254—103.)

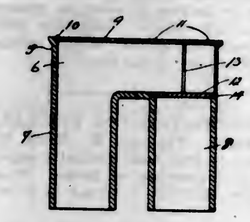
1. In a self-lowering lifting jack; a standard; a ram movable relatively thereto; actuating means for raising the ram; automatic means for controlling the lowering of the ram including a revoluble shaft; a pinion keyed to and slidable lengthwise of said shaft; a gear adapted to mesh with said pinion; manually operated means for retarding the rotation of said gear; and means for moving said pinion out of mesh with said gear.

1,574,477. WATER PURIFIER. ARTHUR LAW GRANT, Plainfield, N. J. Filed Dec. 13, 1923. Serial No. 680,399. 4 Claims. (Cl. 210—23.)



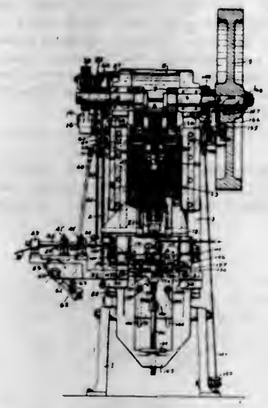
1. In the art of purifying water, that step which consists in the use of barium silicate to remove the hardness from the water.

1,574,478. HAME HOLDER FOR HORSE COLLARS. CASPER HUGO GRINGS, Waterloo, Iowa, assignor to Waterloo Saddlery Company, Waterloo, Iowa. Filed Dec. 11, 1924. Serial No. 755,334. 2 Claims. (Cl. 54—19.)



2. In combination, a horse collar having pads and a roll with a flexible connection therebetween which provides a hollow circumferential seat for hames, a flexible relatively wide transversely opening loop mounted upon the throat of the collar, and a strap passed flexibly through said loop and terminal eyes on the hames seated in the hame seat and having comating fastening means on its ends whereby the hames may be secured in said seat against displacements.

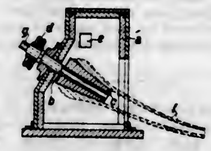
1,574,479. THERMOSTATIC REGULATOR. JOSEPH A. GUYER, Marion, Ind., assignor of one-half to Harry F. Anderson, Marion, Ind. Filed Mar. 30, 1925. Serial No. 19,523. 14 Claims. (Cl. 236—46.)



1. A heat regulator comprising, in combination, an electric switch operable to control a supply of heat, a thermal expansion element affected by the heat supply, a lever arranged to be moved by said thermal element as it contracts and expands, resilient means holding said lever against said element, a ratchet wheel having teeth adapted to rest against said lever, said ratchet having two sets of teeth, one set being longer radially than the other and said long teeth having a channel therein to permit the passage therethrough of the end of said lever, means to rotate the wheel, a cam on said wheel, and a cam bar to operate the switch, said cam being arranged to throw the switch when the wheel moves the distance of one tooth.

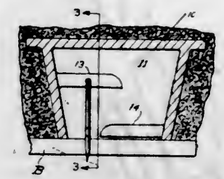
1,574,480. COMBINATION DRAIN VENT AND WATER BOX. JOHN T. HARNETT, Philadelphia, Pa. Filed Aug. 19, 1924. Serial No. 732,897. 1 Claim. (Cl. 137—18.)

A box of the class described comprising, in combination, a box having an irregular seat at its upper end, a vent leg and a water leg depending from the bottom of said box body, suitably spaced apart and communicating with the interior of said box body, the water leg having a seat at its upper end, a top of irregular formation to fit the seat in the upper end of the box body, said top being perforated only at that end overlying the water leg for the admission of air to the vent leg through the box body, a cover to engage the other seat to close the water leg, and means to suspend said cover from the perforated end of the top.



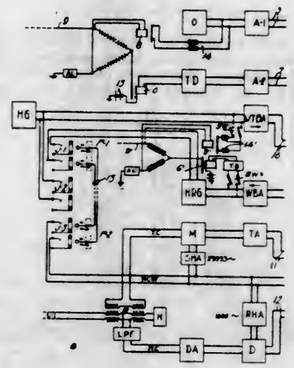
1,574,481. APPARATUS FOR AND PROCESS OF MAKING PULLEY UNITS. WILLIAM T. HENSLEY, Indianapolis, Ind. Filed Sept. 29, 1923. Serial No. 665,690. 64 Claims. (Cl. 164—21.)

1. In a machine of the class described, the combination with means for advancing a plurality of strips therethrough toward the center of the machine, in different horizontal planes, of means for shearing blanks from each of said strips, and means for stacking the blanks concentrically upon a receiving member in the same relative vertical position.



1,574,482. METHOD OF AND DEVICE FOR DRAWING TUBES. RICHARD HIRSCH, Jena, Germany, assignor to The Libbey Glass Company Trust, Toledo, Ohio. Filed Apr. 17, 1925. Serial No. 23,931. 6 Claims. (Cl. 49—17.1.)

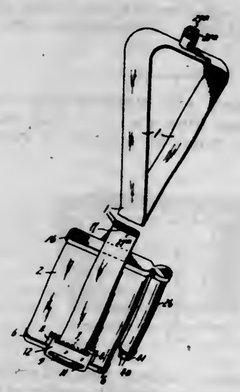
1. A method which consists in forming tubular mass of molten glass having its two ends of different shapes and sizes in cross section, continuously drawing a tube from smaller end of said mass, continuously adding to



the other end of said mass, and maintaining the respective ends of said mass in substantially their original shapes and sizes in cross section.

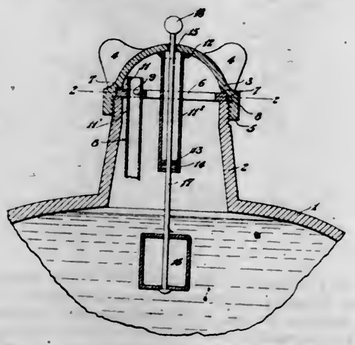
1,574,483. INSERT AND HOLDER FOR CONCRETE FORMS. JOSEPH HIRSHSTEIN, Cleveland, Ohio. Filed Aug. 7, 1924. Serial No. 730,589. 7 Claims. (Cl. 25—131.)

1. In combination, a concrete form and resilient means secured to the form and adapted to engage an insert and to maintain it in position whereby concrete may be placed in the form about the insert and said means and the form eventually removed from the said concrete and insert without marring the concrete.



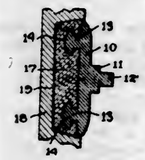
1,574,484. MULTIPLEX SIGNALING SYSTEM. JOSEPH W. HORTON, East Orange, N. J., assignor to Western Electric Company, Incorporated, New York, N. Y., a Corporation of New York. Filed July 29, 1921. Serial No. 488,297. 21 Claims. (Cl. 179—15.)

1. In a multiplex signaling system, a line terminating in two branches conductively connected thereto, one of said branches having associated therewith transmitting sets for impressing upon said line waves of different frequencies each controlled by signals and the other or receiving branch having associated therewith receiving sets for selectively receiving from said line waves of different frequencies each controlled by signals, the frequencies employed by all of said transmitters as a group



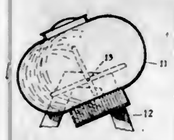
being comprised in a different range from the frequencies employed by said receivers as a group, and a filter connected in said receiving branch between said line and said receivers and arranged to pass currents of the frequencies employed by said receivers but to exclude from the receiving branch the currents from said transmitter sets.

1,574,485. LIFE-SAVING APPARATUS FOR USE AT SEA. JOHN HYLARD, St. Kilda, Victoria, Australia. Filed May 9, 1925. Serial No. 29,050. 10 Claims. (Cl. 9—14.)



1. Life-saving apparatus comprising a water-tight container, a float guide fixed thereto and open at one end for the admission of water, means for supporting the container in water with the open end of the float guide facing downward and submerged, a source of electrical energy in the container, an electric lamp outside the container, a float normally depressed in the guide and adapted to be raised by water entering the open end thereof, and circuit connections between the source of energy and the lamp, including a switch which breaks the circuit when the float is depressed, and closes the circuit when the float is raised.

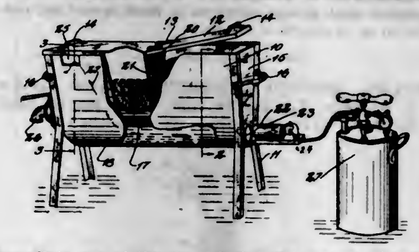
1,574,486. RADIATOR CAP AND OVERFLOW PIPE. CLARS JOHNSON, Springfield, Mass., assignor of one-half to Eric G. Johnson, Springfield, Mass. Filed Aug. 2, 1924. Serial No. 729,819. 1 Claim. (Cl. 220—24.)



A device for the purpose described comprising in combination, a metallic ring member which is formed with substantially all of its center portion removed and an inwardly extending part which projects into the open center portion and having an opening through the said inwardly extending part, the opening in the metallic ring being designed to receive the upper end of the overflow pipe of an automobile radiator and the ring serving as a gasket or packing between the closure cap and the upper end of the radiator filling tube, said overflow pipe being permanently secured in the opening of the inwardly extending part of the ring.

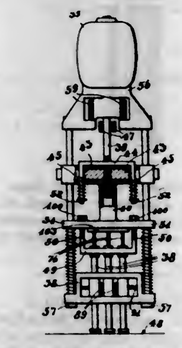
1,574,487. CONSTRUCTION FOR EYEGLASS PARTS AND THE LIKE. PERCIVAL W. JONES, Providence, R. I., assignor to Bay State Optical Company, Attleboro, Mass., a Corporation of Maine. Filed Nov. 4, 1921. Serial No. 512,734. 2 Claims. (Cl. 88—48.)

1. A nose-engaging device for eyeglasses comprising, in combination, an elongated and flattened metal base member having on one face thereof a projection for making connection with the other parts of the eyeglasses and on the other face thereof a pair of projecting metal posts, one adjacent each end of said base member and each provided with an enlarged and flattened head, and a member of celluloid resting against said last face of said base member and shaped substantially to the contour thereof, said celluloid member being of greater thickness than the entire length of said posts, completely covering said posts and interlocking with said heads thereof, the edges of said celluloid member being molded over and covering the adjacent edge of said base member throughout the circumference thereof, and the outer face of said celluloid member being roughened to engage and grip the nose.



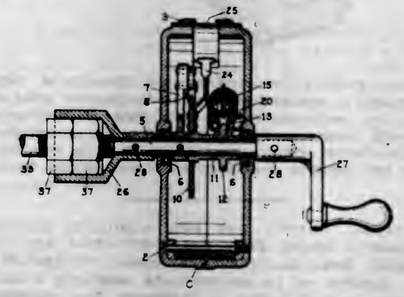
1,574,488. SUCTION MEMBER FOR WASHING MACHINES. HARRY F. KEIFFER, Perrysburg, Ohio. Filed Mar. 16, 1925. Serial No. 15,754. 5 Claims. (Cl. 68—21.)

1. An oscillatory washer having a chamber in the bottom thereof, cells in said chamber having open outer ends spaced from the bottom of said chamber thereby providing a channel common to all of said cells, and the inner ends of said cells being provided with restricted openings to afford communication with said chamber through said restricted openings.



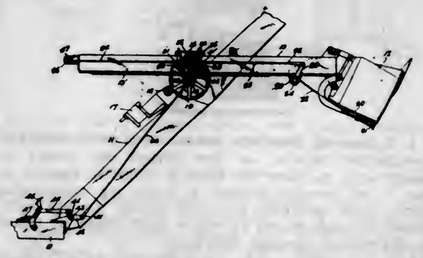
1,574,489. MELTING TANK OR KETTLE. GEORGE P. KITTEL, Union Hill, N. J. Filed May 17, 1924. Serial No. 714,143. 2 Claims. (Cl. 126—343.5.)

1. An oil-fired tar kettle comprising a double-walled tank, substantially trough-shaped throughout its length presenting a stream-like flue between its two walls avoiding the formation of dead air spaces, a centrally located strainer within said tank separating the raw material from the molten material allowing a ready flow of the melting material through said strainer and as



immediate use of the same during the process of melting by giving to the molten mass the correct temperature and maintaining the same throughout.

1,574,490. BOX-NAILING MACHINE. HERVEY R. KUMLER and CARROLL F. KUMLER, Los Angeles, Calif. Filed Dec. 4, 1924. Serial No. 753,873. 18 Claims. (Cl. 1—10.)



1. In a nailing machine of the class described, nailers disposed for back and forth movements, an actuating motor having a threaded spindle, and a nailing unit carrying said nailers having means for engaging the spindle during a nailing action and adapted for disengagement from the threaded spindle on completion of the nailing action.

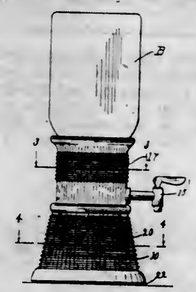
1,574,491. TORQUE-TESTING DEVICE FOR SEMAPHORE SIGNALS. RICHARD CHASE LEAKE, Rochester, N. Y., assignor to General Railway Signal Company, Gates, N. Y., a Corporation of New York. Filed Aug. 12, 1921. Serial No. 491,780. 15 Claims. (Cl. 265—25.)

1. In a torque testing device, in combination with a shaft adapted to be connected with the rotary element the torque of which is to be tested, a support having a scale and in which said shaft may turn, an indicator movable over said scale, and means including a spring for operatively connecting said shaft and indicator for driving movement in one direction with respect to said support.

1,574,492. DIPPER TRIP. WERNER LEHMAN, FRED J. BREWER, and ROGER SHERMAN HOAR, South Milwaukee, and BENJAMIN F. JOHNSTON and MITCHELL L. FYKSE, Milwaukee, Wis., assignors to Bucyrus Company, South Milwaukee, Wis., a Corporation of Wisconsin. Filed Sept. 4, 1923. Serial No. 660,903. 11 Claims. (Cl. 214—146.)

1. In a power shovel having a dipper and dipper stick mounted for swinging and shifting movements the combination of dipper door latch mechanism, a latch operating line arranged to automatically compensate for all shifting movements of the dipper stick, and latch line operating mechanism arranged to compensate for all swinging movements of the dipper stick.

1,574,493. SHEET-METAL DOOR. ELOF R. LEONARD, Mountain Lakes, N. J. Filed Aug. 1, 1925. Serial No. 47,426. 6 Claims. (Cl. 189—46.)



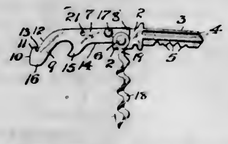
1. In a sheet metal door, the combination, with rails, and with stiles each grooved on their inner edges and open in their outer edges and provided with means for interlocking them with the rails and with means for slidably engaging an edging element, and paneling, of edging elements each provided with means for slidably engaging the engaging elements of a stile to close and complete the stile.

1,574,494. PROCESS OF PRESERVING YEAST. LUDOLF LINDEMANN, Altona-Babrenfeld, Germany, assignor to T. P. Hodge, Park Ridge, Ill. Filed Aug. 3, 1923. Serial No. 655,524. 2 Claims. (Cl. 195—20.)

1. The herein described method of making fresh yeast lasting consisting in washing finely distributed fresh yeast in water of from thirty-three to forty-three degrees centigrade until tests show the substantial to complete removal of glycogen.

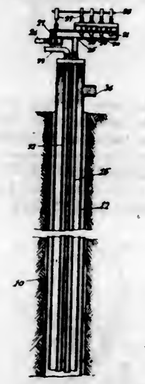
1,574,495. BEVERAGE DISPENSER. CARROL A. LOOK, Los Angeles, Calif. Filed Sept. 8, 1925. Serial No. 54,979. 7 Claims. (Cl. 225—22.)

1. A beverage dispenser comprising a base formed of transparent material, an open topped cup formed integral with the base on which a bottle is adapted to rest in an inverted position, a faucet for withdrawing liquid from said cup, said cup having its side walls ribbed or roughened to provide a light refracting means as and for the purposes described.



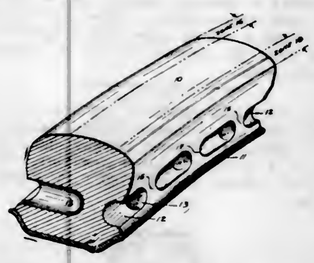
5. A beverage dispenser comprising a frusto conical base and an open topped cup formed integral therewith, said base and cup being formed of glass or similar transparent material and means for withdrawing liquid from said cup.

1,574,496. METHOD OF MAKING PILE FABRICS. THOMAS S. MCDERMOTT, Franklin, Mass., assignor to Clark-Cutler-McDermott Co., Franklin, Mass., a Corporation of Massachusetts. Filed July 16, 1925. Serial No. 44,097. 2 Claims. (Cl. 28—4.)



1. The process of making a pile fabric which consists in forming a foundation fabric by securing a layer of unspun, fibrous material to a core fabric, applying to the face of the unspun layer a woven fabric, pricking through the foundation fabric and the woven fabric to carry some of the unspun fibres through the woven fabric and then stripping the woven fabric off from the foundation fabric, thereby drawing up a pile from the layer of unspun fibres.

1,574,497. COMBINATION TOOL. ROBERT J. MCLEAN, New York, N. Y., assignor to Sloan & Company, a Corporation of New York. Filed Mar. 11, 1925. Serial No. 14,592. 4 Claims. (Cl. 7—1.)

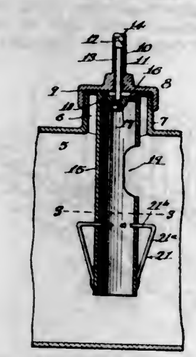


1. An implement of the character specified, comprising a shank having a member provided with means for operating a lock mechanism, a pivot-post extending laterally from said shank, a second member pivotally mounted upon said post, said second member being provided with a downwardly curving end-portion, and a stop means connected with said second-mentioned member with which the shank of the first-mentioned member is adapted to be brought into arrested engagement, to maintain said pivoted members in fixed opened-out relation so as to provide a handle.

1,574,498. METHOD OF PUMPING WELLS. GEORGE A. MACREADY, Los Angeles, Calif. Filed Jan. 23, 1925. Serial No. 4,217. 5 Claims. (Cl. 103—234.)

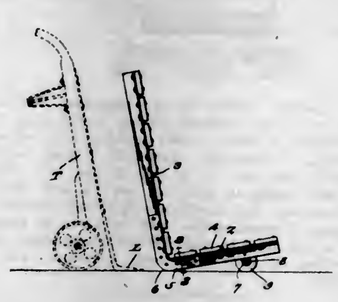
2. The method of pumping liquid from wells which consists of operating a pump in the well by means of a compressed gas, and releasing the gas successively into containers at the surface at successively decreasing pressures.

1,574,499. CUSHION TIRE. THOMAS C. MARSHALL, Mount Savage, Md., assignor to Kelly-Springfield Tire Company, Cumberland, Md., a Corporation of New Jersey. Filed Mar. 18, 1925. Serial No. 16,380. 7 Claims. (Cl. 152—1.)



1. A resilient tire comprising; a plurality of voids arranged in symmetrical pairs in the opposed sides of the tire; each said void in plan view constituting a laterally deeply penetrating element and a circumferentially directed orifice portion recessed into the side wall, the two portions thereof forming an L-shaped figure.

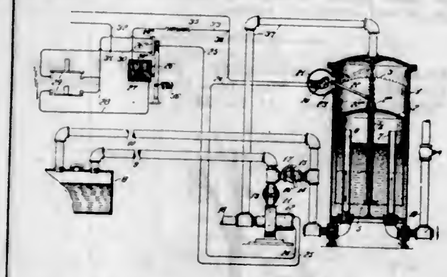
1,574,500. SAFETY CAP FOR GASOLINE TANKS. JOHN A. MARTS, Santa Ana, Calif. Filed Apr. 17, 1924. Serial No. 707,091. 2 Claims. (Cl. 120—86.)



1. A safety cap for gasoline tanks, comprising in combination a tank having an externally screw threaded nipple, a cap fitting thereon having an upward extension with a vertical aperture therethrough, a cylindrical

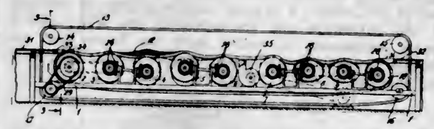
tube having a transverse member at its upper end and a lateral aperture for a filling nozzle, a bolt extending through the vertical aperture in the cap and bolted to

the transverse member of the tube and angular spring fingers attached to the lower end of the tube having horizontal parts engaging in the tube to allow insertion, but preventing removal of the tube from the nipple.



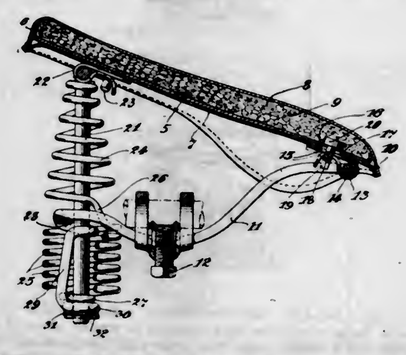
1,574,501. REMOVABLE BODY FOR HAND TRUCKS. JOHN H. O'BRIEN, Watertown, N. Y., assignor to Adams Equipment Company, Inc., Watertown, N. Y. Filed Aug. 26, 1925. Serial No. 52,678. 2 Claims. (Cl. 214—65.)

1. A removable body for hand trucks including strips, connections therebetween, said strips providing a bottom portion and an upstanding portion at an angle to each other, reinforcing means attached to the strips adjacent the angle of the body, and means depending from the body adjacent the free end of the bottom of the body for supporting said body in an inclined position with the center of gravity passing through the bottom of the body close to but without intersecting the upstanding portion of the body.



1,574,502. OIL-GAS-MAKING APPARATUS. CHARLES MATTHEWS, Jr., and WILLIAM C. MATTHEWS, Chicago, Ill. Filed Mar. 17, 1923. Serial No. 625,709. 10 Claims. (Cl. 48—144.)

4. In an oil gas making apparatus, the combination of a closed casing, a holder movable in said casing, a gas generator in communication with said holder, means for forcing air into said generator and holder, an air



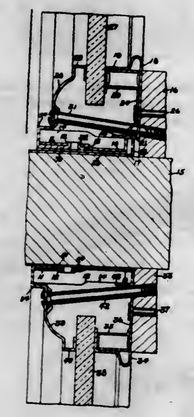
inlet for said air forcing means, and a pipe connecting the interior of said casing with said air inlet.

1,574,503. AMUSEMENT CONVEYER BELT. HYLA F. MAYNES, North Tonawanda, N. Y., assignor to Maynes Corporation, Dover, Del., a Corporation of Delaware. Filed June 23, 1925. Serial No. 38,993. 9 Claims. (Cl. 104—25.)

3. An amusement apparatus comprising the combination of a passenger-carrying conveyer belt, a plurality of drums for supporting and advancing the belt, the axes of certain of the drums being horizontal, and the axes of one being inclined in one direction and that of another in another direction to impart an undulating and rocking motion to the belt.

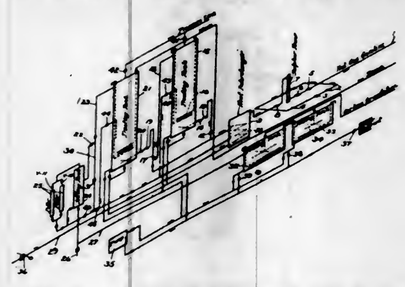
1,574,504. SADDLE. HENRY MESINGER, New York, N. Y. Filed June 11, 1925. Serial No. 36,323. 15 Claims. (Cl. 208—15.)

1. In combination with a saddle top, cushioning means for said saddle top including a longitudinally extending main spring pivotally connected at its forward end with the saddle top and having spaced portions provided with guides at their rear ends, a vertically disposed hanger pivotally connected to the rear end of the saddle top and having spaced parts movable through said guides,



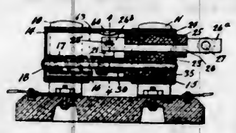
and a cushioning spring on each of said spaced parts of the hanger, and said guides on the spaced parts of said main spring constituting bearings for the lower ends of said cushioning springs.

1,574,505. HOSE SUPPORTER. EPHRAIM R. NABLO, Fort Wayne, Ind. Filed June 13, 1924. Serial No. 719,730. 5 Claims. (Cl. 24—247.)



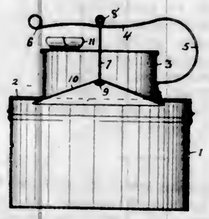
3. In a garment clasp, a frame having longitudinal guide-ways therein; a rubber stud member including an arm hinged at the upper part of the frame, the rubber stud having bearing contact upwardly against the lower end of the frame; a shackle loop longitudinally movable in the guideways and encompassing the stud; and a toggle mechanism connected with the frame and the shackle upwardly operable to move the shackle into binding engagement with the stud.

1,574,506. METALLIC WINDOW SASH. CHARLES G. NELSON, Chicago Heights, Ill., assignor to Zouri Drawn Metals Company, Chicago Heights, Ill., a Corporation of Illinois. Filed Mar. 7, 1925. Serial No. 13,686. 11 Claims. (Cl. 20—56.4.)



1. In a window sash construction, a sash member having a flange along one edge adapted to contact a sheet of glass and a flange along the other edge perpendicular to the sheet, attaching means adapted to apply drawing force to said member midway between said flange to draw said member towards the plane of the sheet, a draw-plate having one end seated in a groove in said member and attached to the second said flange, and means to prevent the draw-plate from tilting relatively to the plane of the sheet.

1,574,507. PROCESS AND APPARATUS FOR THE CONTINUOUS TREATMENT OF NATURAL-GAS GASOLINES. GEORGE GROVER OBERFELL, ALBERT M. BALLARD, RICHARD C. ALDEN, EDWARD L. UTSINGER, and WILLIAM R. LENTZ, Tulsa, Okla., assignors to Chestnut and Smith Corporation, Tulsa, Okla., a Corporation of Oklahoma. Filed Apr. 22, 1921. Serial No. 463,589. 9 Claims. (Cl. 196—24.)



1. The process of treating natural gas gasoline which consists in dissolving therein a quantity of elementary sulphur, and then passing the gasoline through a solution of sodium hydroxide without distilling the gasoline.

1,574,508. THERMAL ELECTRIC-CIRCUIT CONTROLLER. GEORGE W. O'KEEFFE, Dorchester, Mass., assignor, by mesne assignments, to Condit Electrical Manufacturing Corporation, Boston, Mass., a Corporation of Massachusetts. Filed Apr. 28, 1922. Serial No. 557,054. 38 Claims. (Cl. 200—122.)

1. A thermal electric circuit controller including a tubular insulating enclosing casing, metal caps on the ends thereof, a fixed contact member disposed within the casing, a thermally expansible element connected electrically with one of said end caps and arranged within said casing in operative relation with said fixed contact member, and a cylindrically-formed electric heating element disposed within said casing to lie along the length of and close to said thermally expansible element and having its ends electrically connected with said metal caps.

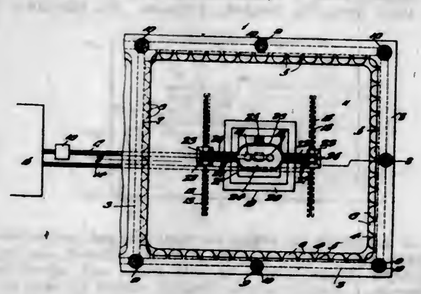
1,574,509. SELF-CLOSING CONTAINER. EUGENE J. OPPENHAMER, Fort Wayne, Ind. Filed June 13, 1925. Serial No. 36,855. 4 Claims. (Cl. 131—51.)

3. A closing means for a receptacle with an opening therein, a spring attached to the receptacle and extending over the opening; a valve in the receptacle operable

to close the opening from the interior of the receptacle; and a coupling means loosely connected with the spring and the valve.

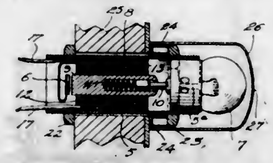
1,574,510. TOY CAP. ARTHUR OTTERBEIN, Middletown, Conn., assignor to The Kirby Manufacturing Company, Middletown, Conn., a Corporation of Connecticut. Filed Nov. 21, 1922. Serial No. 602,875. 2 Claims. (Cl. 2—200.)

1. A toy cap comprising two equal triangular sides fastened together on two of the exterior adjacent edges by two strips of suitable flexible material stuck thereto and being folded back on the inside of the hat on themselves so as to form suitable reinforcing elements at the lower edges of the hat, the third adjacent edges being open and having upwardly and inwardly directed retaining members turned back therein, the ends of said retaining members being held in their inturned position by the infold of the flexible material at the lower edge of the cap.



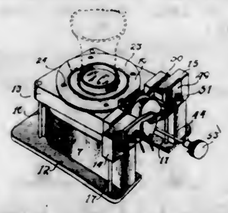
1,574,511. BELT-CONVEYER SUPPORT. WILLIAM E. PHILIPS, Cleveland, Ohio, assignor to The Stearns Conveyor Company, Cleveland, Ohio, a Corporation of Ohio. Filed Mar. 14, 1924. Serial No. 699,371. 4 Claims. (Cl. 198—192.)

1. The combination with a pair of pulley idlers placed end to end and each having a shaft, of an intermediate support for the shafts of said idlers comprising a bracket having a foot, an upwardly extending shank and portions extending laterally in opposite directions at the top of the shank, and upwardly extending arms at the outer ends of the lateral portions, each arm having an upwardly opening slot receiving one end of an adjacent idler shaft.



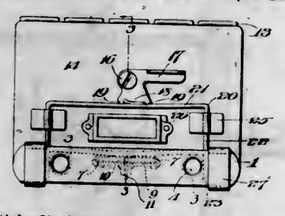
3. A bracket for supporting a pulley idlers, consisting of an integral member having a shank, a foot extending from the shank in the form of a ridge, and a bifurcated head providing two upwardly extending arms transversely of the ridge, each arm having through it an upwardly opening slot in which the end portion of the adjacent idler shaft is mounted.

1,574,512. SWIMMING POOL. WALTER S. POLLARD, Philadelphia, Pa. Filed Jan. 8, 1924. Serial No. 684,920. 4 Claims. (Cl. 4—172.)



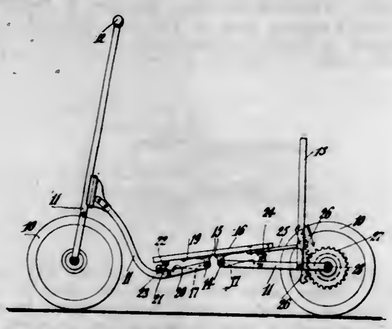
1. A swimming pool having a surrounding wall provided with laterally extending visible and invisible skim outlets which decrease in width in the direction of the floor, and a drain communicating with said outlets.

1,574,513. VEHICLE SIGNAL. DOUGLAS S. RATLIFF, Cleveland Heights, JOHN M. FRANCIS, Lakewood, and THOMAS E. REESE, Cleveland, Ohio. Filed Sept. 12, 1921. Serial No. 499,984. 3 Claims. (Cl. 177—311.)



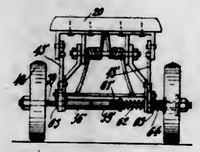
1. In a vehicle signaling system, a signal light comprising a sleeve, means for securing the sleeve to the dashboard of a vehicle, a signal lamp positioned in one end of the sleeve, a solenoid contained by the sleeve, a magnetic switch adapted to contact with the core of said solenoid, and a plunger positioned in said core in yieldable contact with said lamp, and means supported by the sleeve for shielding the major portion of the lamp rays from the operator's vision.

1,574,514. LOUD SPEAKER. FRANK J. REICHMANN, Chicago, Ill. Filed May 22, 1924. Serial No. 715,035. 37 Claims. (Cl. 179—108.)



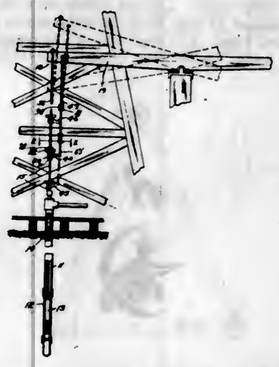
36. In a telephone receiver, an energizing coil, two pairs of pole pieces respectively disposed at opposite ends of the spool for affording two magnetic gaps in substantial alinement with the bore of the spool, a permanent magnet for polarizing all four pole pieces, and a pivoted armature extending through the bore of the coil and having its pivoting axis outside the coil and in a plane axial of the coil.

1,574,515. ARTICLE FILE. WILLIAM A. RINGLER, Philadelphia, Pa., assignor to Globe Wernicke Co., Cincinnati, Ohio, a Corporation of Ohio. Filed Oct. 10, 1922. Serial No. 593,546. 9 Claims. (Cl. 129—16.)



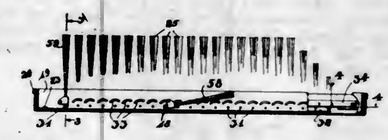
1 An article file having an expansible and contractible frame with means to secure it in its adjusted position, follower blocks carried by said frame and adjustable thereon, a locking member slidably carried by each follower block to clamp against said frame, and means on the follower block to actuate its locking member.

1,574,516. SCOOTER. JOHN ROHDIEK, New York, N. Y. Filed Nov. 8, 1924. Serial No. 748,509. 8 Claims. (Cl. 208—37.)



1. A scooter comprising in combination front and rear wheels with means for steering the front wheel and propelling means for the rear wheel, frame structures in which the said wheels are mounted, a platform between the wheels, pivot connections between said platform and said frames for connecting them, and a seat support carried by the rear wheel frame structure.

1,574,517. PROPELLING MECHANISM FOR CHILDREN'S VEHICLES. JOHN ROHDIEK, New York, N. Y. Filed Jan. 12, 1925. Serial No. 1,745. 7 Claims. (Cl. 208—38.)

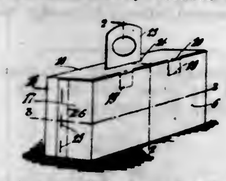


1. In combination with a vehicle including front and rear wheels, axles therefor, frame members in which said axles are mounted, a supporting platform pivotally connected with said frame members, and propelling mechanism for the vehicle comprising a buckle connection between the supporting platform and the rear axle and connections between the buckle, axle and one of the wheels for causing the wheel to rotate in one direction when the supporting member and buckle are depressed.

1,574,518. PUMP-PLUNGER ROTOR. SUMNER B. SARGENT, Los Angeles, Calif., assignor to Sargent Engineering Corporation, a Corporation of California. Filed Mar. 19, 1924. Serial No. 700,484. 5 Claims. (Cl. 255—14.

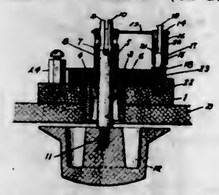
1. In a device of the class described, the combination of: a polished rod; a head mounted upon said polished rod; yoke means supporting said head; reciprocating mechanism for rotating said head; a crank for reciprocating said mechanism, link members connecting between said yoke means and a vertically rotatably reciprocating arm and a resiliently constituted parallel link connecting between said crank and said arm.

1,574,519. BRUSH. OTTO F. SCHULDT, Glendale, Calif. Filed Sept. 26, 1923. Serial No. 664,923. 6 Claims. (Cl. 15—203.)



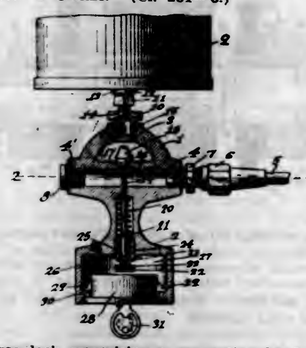
1. In a brush, a back embodying inner and outer sections of elongated cupped form nested one within the other with the side walls spaced apart, operating bars disposed within the spaces between the side walls of the inner and outer sections, the inner section having a plurality of perforations in its side walls, the said bars being provided with pins projecting through the perforations in the inner section, the pin-bars being arranged in sets of which one set is comparatively stationary while the other set it shiftable within the space between the sections of the back, bristle-holders, disposed in the depression of the inner section in an operative engagement with the pins, and operating means operatively engaged with one set of pin-bars whereby the bristle-holders may be tilted back and forth.

1,574,520. COLLAPSIBLE CASE. JOSEPH B. SINGER, New York, N. Y.; Ettie Singer executrix of said Joseph B. Singer, deceased. Filed Dec. 31, 1923. Serial No. 683,568. 2 Claims. (Cl. 229—41.)



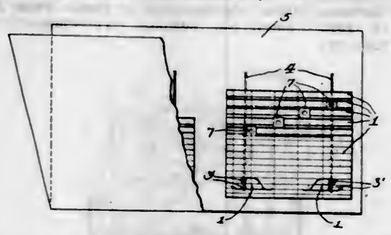
1. A collapsible case having a one-piece body consisting of a blank cut to provide side wall sections, end wall sections extending from each of the side wall sections and of relatively different widths, said end wall sections at the respective ends of the side wall sections being hingedly connected with each other and foldable inwardly between said side wall sections to collapse the container, a bottom wall section connecting the side wall sections with each other, the wider end wall sections having foldable flaps at their opposite ends of

substantially the same width as the bottom wall section adapted to extend inwardly between the spaced side



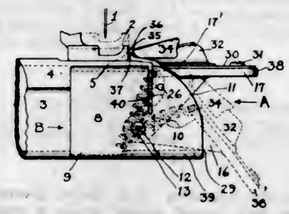
wall sections to prevent the inward folding of the hingedly connected end wall sections, and a foldable top wall section connected with each of the side wall sections.

1,574,521. RHEOSTAT. CHARLES STERN and DAVID BROWN, New York, N. Y. Filed Dec. 5, 1924. Serial No. 754,196. 4 Claims. (Cl. 201—55.)



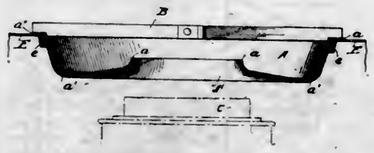
4. A rheostat comprising a base member of insulating material; a resistance wire wound around a suitably positioned insulating strip; a hollow, tubular supporting member suitably secured to said base and containing integral with itself an internal annular stop; a shaft positioned within said supporting member; said shaft having an annular collar on its lateral surface, said collar being adapted to abut against said annular stop; a knob adaptable for attachment to one end of said shaft; a contact member movable over an arcuate path and comprising a hollow casing, a contact piston contained within said casing and free to move therein, one end of said piston serving as a contact point; a spring within said casing adapted to actuate said piston in the direction of said resistance wire, and to hold said contact point in co-operation with said resistance element; means for connecting said shaft with said contact member; and limiting contact stops on said base.

1,574,522. GAS LOCK. WALLACE E. C. STONE, Los Angeles, Calif. Filed Aug. 24, 1923. Serial No. 659,157. 3 Claims. (Cl. 251—6.)



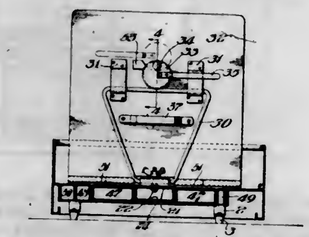
1. A gas lock comprising a connecting head provided with an interior opening and a valve seated therein, a key controlled means for unseating said valve, the stem of said valve extending into a control extension containing a hand operating means provided with means permitting its rotation by a key, a spring tending to move the valve toward its seat and adjustable means to vary the movement of said valve stem.

1,574,523. VISIBLE INDEX. HENRY A. VAN HOUTEN, New Rochelle, N. Y. Filed June 3, 1925. Serial No. 34,506. 2 Claims. (Cl. 129—16.7.)



1. In an index or file, a support having narrow slits in substantial parallelism with each other, cards adapted to be mounted upon said support in overlapped relation, tongues separately formed and widely spaced upon said cards within the periphery of each card and including portions outwardly directed towards the sides of said card for engaging the narrow slits in said support whereby the flexing of said card without danger of tearing off the tongues is facilitated.

1,574,524. END CAP FOR SEWING-MACHINE HORNS. JOHN P. WEIS, Nyack, N. Y., assignor to Metropolitan Sewing Machine Corporation, Nyack, N. Y., a Corporation of Delaware. Filed Nov. 5, 1925. Serial No. 66,932. 19 Claims. (Cl. 112—136.)

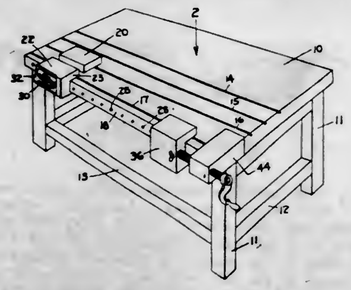


1. In a sewing machine having a feed up the arm work cylinder, the combination of an end cap therefor, and a work attachment secured to the cap for swinging movement from the stitching mechanism and toward the same in the direction of the line of feed thereby to provide when the attachment is swung away from the stitching mechanism, a clearance space for the manipulation of the work.

1,574,525. HEAT INTENSIFIER. LEWIS T. WILCOX, Peekskill, N. Y. Filed July 15, 1922. Serial No. 575,175. 2 Claims. (Cl. 126—214.)

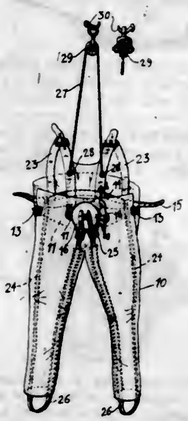
1. A heat intensifier for gas and oil stoves comprising a body member having a peripheral support, an inwardly and downwardly inclined outer side wall depending from the said peripheral support, and a bottom wall which in its entirety is upwardly inclined toward the center of the intensifier and terminates in an upwardly curved internal flange for directing the flame from a burner into the intensifier thereby providing a chamber for heated gases and also a receptacle for the drippings or overflow from a vessel placed above the intensifier.

1,574,526. TRAY FOR MACHINE POSTING. HENRY C. YEISER, Cincinnati, Ohio, and WILLIAM A. RINGLER, Philadelphia, Pa., assignors to Globe Wernicke Co., Cincinnati, Ohio, a Corporation of Ohio. Filed June 15, 1923. Serial No. 645,592. 11 Claims. (Cl. 129—16.)



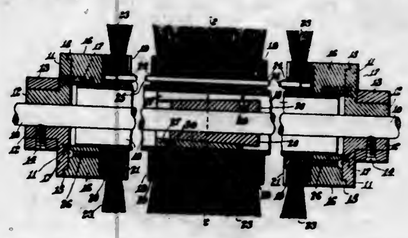
5. In a device of the character described, a sheet-metal frame having a movable side to vary the size of said frame, means to lock said side in its adjusted position, follower blocks relatively adjustable longitudinally of the frame, means to effect lateral adjustment of said follower blocks, compressor plates hinged to said follower blocks, and independent locking mechanism for each compressor plate.

1,574,527. HAIRPIN. JOHN C. YOUNG, Pittsburgh, Pa. Filed Feb. 6, 1923, Serial No. 617,371. Renewed July 25, 1925. 1 Claim. (Cl. 132—50.)



A hair pin consisting of a strand generally of U-shape, the legs thereof having waves in spaced coacting relation, and the opposite side portions of the legs at the bight of the pin substantially constituting one of the waves and being disposed substantially in parallelism and substantially angularly with respect to the line of insertion and withdrawal of the pin for concealment in the hair and to constitute a finger grip.

1,574,528. WORKBENCH. OTTO JOHN YOUNOMAN and MAXIMILIAN R. YOUNGMAN, Los Angeles, Calif. Filed Mar. 18, 1925. Serial No. 16,383. 8 Claims. (Cl. 144—286.)

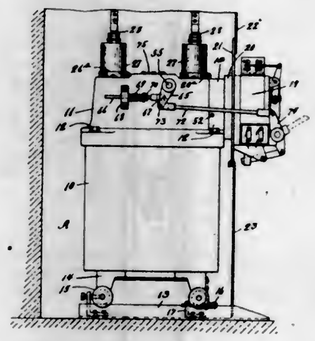


1. A work bench having a top with a groove diagonal to its longitudinal extension, a wedge block of rectangular and rigid construction having its lower face resting on the top, said wedge block having a longitudinal tongue in its lower surface adapted to slide in the groove, and a slide block rigid with the said top whereby an object may be secured between the wedge block and the slide block.

1,574,529. LIFE-SAVING SUIT. SAMUEL ABRAHAM, New York, N. Y. Filed Apr. 25, 1925. Serial No. 25,920. 2 Claims. (Cl. 227—11.)

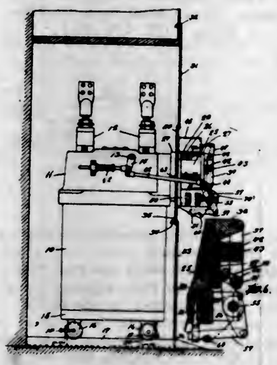
1. In a device of the character described, in combination, a pair of trousers, an adjustable waist belt for said trousers, adjusable straps disposed lengthwise and sidewise of said trousers, a casing secured to said waist belt; a reversible drum in said casing, a cable attached to and adapted to be coiled around said drum; a pair of complementary brake shoes normally engaging said cable to prevent its unwinding from the drum, and means adapted to be regulated by the person descending in said device to decrease or entirely release the pressure of the brake shoes on said cable.

1,574,530. ROTARY BRUSH. JOSEPH ADAMS, Roxbury, Mass., assignor to Adams-White Brush Company, Boston, Mass., a Corporation of Massachusetts. Filed Sept. 27, 1924. Serial No. 740,174. 7 Claims. (Cl. 15—181.)



3. The combination of a tube; annular heads secured to the opposite ends thereof; a plurality of unitary brush sections surrounding said tube between said heads; means preventing independent movement of said brush sections; and screws extending through said heads into the outer brush sections.

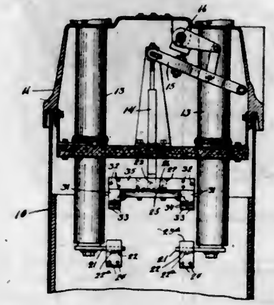
1,574,531. CIRCUIT INTERRUPTER. CHESTER D. AINSWORTH, Wollaston, Mass., assignor, by mesne assignments, to Condit Electrical Manufacturing Corporation, Boston, Mass., a Corporation of Massachusetts. Filed Dec. 14, 1921. Serial No. 522,227. 14 Claims. (Cl. 200—150.)



14. An electrically-operated electric switch comprising the combination of a closed receptacle, stationary and

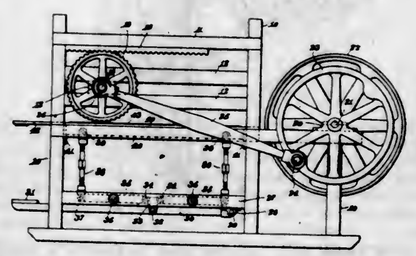
movable switch members enclosed therein, and an operating coil carried externally by said receptacle having

an armature, and means operably connecting said armature and movable switch member.



1,574,532. ELECTRIC SWITCH. CHESTER D. AINSWORTH, Wollaston, Mass., assignor, by mesne assignments, to Condit Electrical Manufacturing Corporation, Boston, Mass., a Corporation of Massachusetts. Filed Dec. 14, 1921. Serial No. 522,228. 35 Claims. (Cl. 200—150.)

15. A cell-type electric switch having a casing for the switch members, a cell-closing plate carried by the upper portion of said casing, and a cell cover carried by said plate.

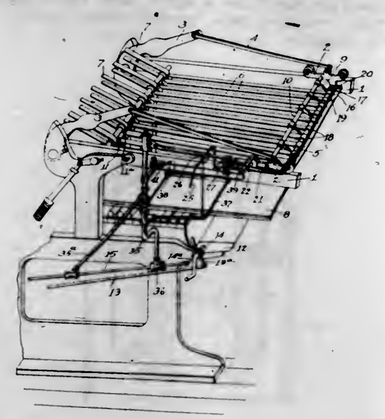


1,574,533. ELECTRIC SWITCH. CHESTER D. AINSWORTH, Wollaston, Mass., assignor, by mesne assignments, to Condit Electrical Manufacturing Corporation, Boston, Mass., a Corporation of Massachusetts. Filed Feb. 9, 1922. Serial No. 535,220. 18 Claims. (Cl. 200—150.)

1. An electric switch having two relatively movable switch members each formed with a main current-carrying member and two arcing members disposed on opposite sides of and extended in a circuit-opening direction beyond the contact face of and electrically connected with said main current-carrying member, and said switch members arranged to be moved to cause the engagement of their respective main current-carrying members and arcing members.

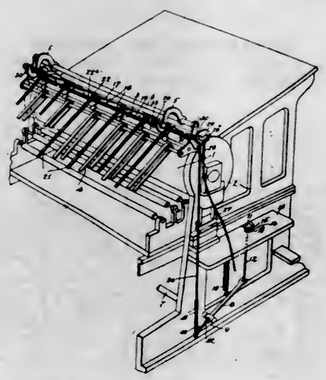
16. An electric switch having a movable switch member including a rectangular frame comprising connected and spaced end and side plates, arcing members carried by the connections between said end and side plates, and a main bridging member carried by said frame between said arcing members.

1,574,534. LEATHER-GRAINING MACHINE. JOHN WILLIAM AULSON, Lynn, Mass. Filed May 18, 1923. Serial No. 639,828. 12 Claims. (Cl. 149—17.)



1. In a machine of the class described, a hide support; guides parallel to said support; a drum reciprocable on said guides; means for oscillating the drum during its reciprocation, and treadle mechanism for bodily lifting said hide support and retaining it in parallelism with said guides.

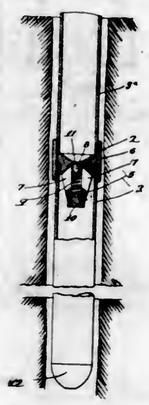
1,574,535. DELIVERY HEATER FOR PRINTING PRESSES. CHARLES BRADLEY, Los Angeles, Calif. Filed Feb. 27, 1925. Serial No. 11,962. 5 Claims. (Cl. 34—18.)



1. A heater for a printing press having trip mechanism and a movable delivery carriage, comprising heating means mounted on said carriage, a control for said

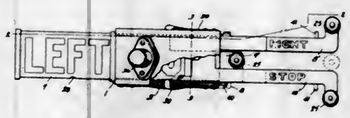
heating means moving with the latter and said carriage, and means for operating said control connected to the

trip mechanism of the press so as to shut-off and operate said heater as the press is tripped and released respectively.



1,574,536. HEATER FOR PRINTING PRESSES. CHARLES BRADLEY, Los Angeles, Calif. Filed Feb. 27, 1925. Serial No. 11,963. 7 Claims. (Cl. 34—18.)

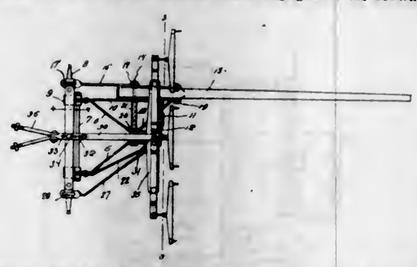
7. A heater for a printing press comprising a burner pipe arranged for passage of the printed sheets beneath the burner pipe, and sheet guard sticks carried by the burner pipe and projecting therefrom so as to overlie and prevent displacement of the printed sheets.



1,574,537. INSET CASING FLOAT VALVE. ALLEN P. BUACH, Whittier, Calif. Filed July 27, 1923. Serial No. 654,168. 2 Claims. (Cl. 251—121.)

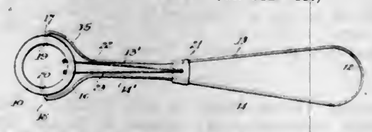
1. In combination a string of casing sections, contiguous ends of certain sections having a collar screw-threaded on the outside of the casing sections, an inserted float valve having a body part, a rim at the upper portion thereof, screw threads on the exterior of the rim, abutting faces on the top and bottom of the rim, said abutting faces engaging the contiguous ends of the casing sections and the threaded portion engaging the collar, a valve hole in the upper part of the body portion, a downwardly extending passage, a plug at the lower end of the passage, a spring bearing against the plug, a ball engaging the upper end of the spring whereby

the ball may be pressed against the valve hole, and a series of ports through the body, the inner ends of such ports being of less width than the diameter of the ball, whereby the ball is retained in said passage.



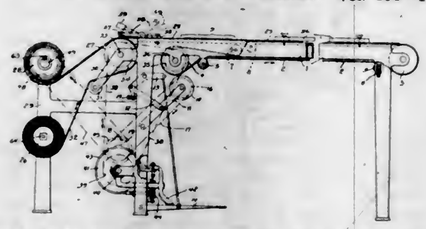
1,574,538. TRAFFIC SIGNAL. FRANK B. CROSBY, Seattle, Wash., assignor of one-half to Joseph C. Cahoon, Seattle, Wash. Filed Sept. 10, 1924. Serial No. 736,853. 1 Claim. (Cl. 116—50.)

A device of the class described comprising a housing formed of front and back plates and upper and lower spacing bars; said bars being provided with longitudinally extending grooves on their adjacent faces, a plurality of signaling slides mounted in the housing for slidable movement into and from the same along said grooves and having notches in the edges, arms extended from the inner ends of the slides whereby they may be moved into and from signaling position, knobs at the ends of said arms, and spring fingers fixed to the housing with ends adapted to engage within the notches of said slides to yieldingly retain the latter at adjusted positions.



1,574,539. DRAFT APPLIANCE. CLAUDE DAUGHERTY, Smithville, Mo., assignor of one-fourth to Lee A. Woods and one-fourth to Elmer D. Cutler, both of Smithville, Mo. Filed June 26, 1925. Serial No. 39,763. 3 Claims. (Cl. 278—41.)

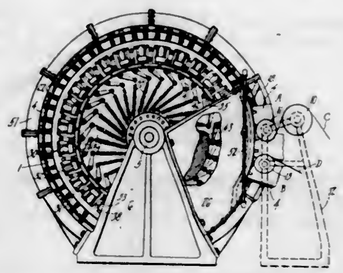
1. In combination with a vehicle front axle, a rigid frame attached thereto, a stub tongue carried by the frame, a bolt extending laterally from the stub tongue, a main tongue rotatable on the bolt and capable of swinging vertically, a curved arm attached at one end to an intermediate portion of the main tongue, and extending therefrom rearwardly and laterally and pivotally engaged with the bolt adjacent the stub tongue, a multiple draft tree attached to the stub tongue, a king pin rising from the axle, an adjustable brace engaged at its forward



end to the stub tongue and extending rearwardly therefrom and having a slot for receiving the king pin, and means for attaching it to the body of a wagon or the like.

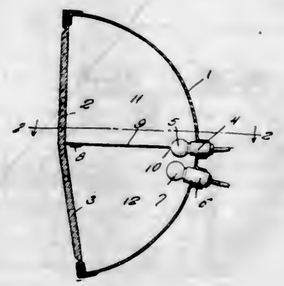
1,574,540. SCALP-MASSAGING DEVICE. WILLIAM DUNCAN, Los Angeles, Calif. Filed July 25, 1924. Serial No. 728,184. 8 Claims. (Cl. 132—19.)

1. A device of the class described comprising a comb having a body in the form of a ring, a circular row of teeth projecting downwardly from said body, and a handle pivoted to said body.



1,574,541. STOCK-ROLLING APPARATUS. ADRIAN O. ABBOTT, Jr., Detroit, Mich., assignor to Morgan & Wright, a Corporation of Michigan. Filed June 15, 1921. Serial No. 477,662. 13 Claims. (Cl. 154—1.)

4. In an apparatus for rolling up stock with a liner strip intermediate its convolutions, the combination with a conveyor operable at will of means for rolling up stock and a liner strip without substantially distorting the former, said means including a reel, a liner feed-roll, and means for rotating the same with substantially equal peripheral velocities as the stock and liner strips accumulate on the reel.

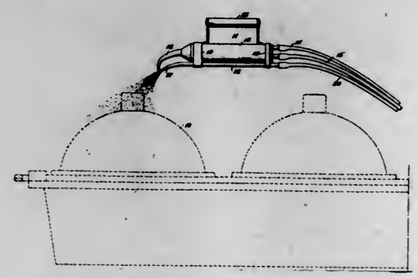


1,574,542. MACHINE FOR FORMING AND VULCANIZING STRIP MATERIAL CONTAINING RUBBER OR THE LIKE. ADRIAN O. ABBOTT, Jr., Detroit, Mich., assignor to Morgan & Wright, Detroit, Mich., a Corporation of Michigan. Filed May 7, 1924. Serial No. 711,563. 16 Claims. (Cl. 18—17.)

1. A machine for forming and vulcanizing material containing rubber or the like in strip form by a continuous operation, comprising a mold containing an endless mold cavity for the material, a station for feeding the material to the mold, a station for receiving the product from the mold, means for producing continuous relative movement between the mold and stations whereby the endless mold cavity will pass the stations in a

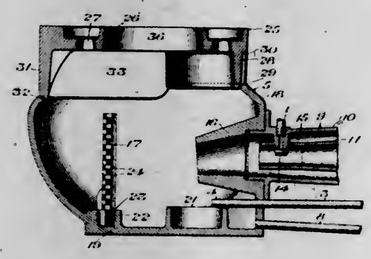
continuous progressive manner, means for progressively opening the mold fractionally in advance of the receiving station, means for closing same upon leaving the feeding station, and means for heating the mold.

1,574,543. HEADLIGHT CONSTRUCTION. SIMONI ANDERSEN, Denver, Wyo. Filed Jan. 19, 1925. Serial No. 3,370. 1 Claim. (Cl. 240—41.)



An automobile headlight comprising a substantially semi-circular casing open at its front, the forward edges of the lower half of the casing being cut away, a lens mounted in the open portion of the casing, the lower half thereof being offset at an angle to correspond with the cut away forward edges of the lower half of the casing, a lamp arranged centrally in the rear portion of the casing, an additional lamp supported below the aforementioned lamp, a partition supported horizontally in the central portion of the casing and conforming with the shape of the interior of the casing, the rear central portion of the partition being cut out to receive the first mentioned lamp, the opposed faces of the partition and the inner wall of the casing providing reflecting surfaces, the rays of light from the first mentioned lamp adapted to be disposed outwardly through the lens on opposite sides of the partition, the rays of light from the lower lamp being adapted to be disposed outwardly through the lower angular offset portion of the lens.

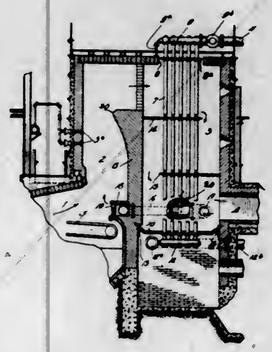
1,574,544. METHOD OF DEPOSITING SILVER. BLASIUS BART, East Orange, N. J. Filed Sept. 23, 1921. Serial No. 502,680. 15 Claims. (Cl. 91—68.3.)



2 In the art of coating objects with silver, the process which consists in mixing a solution of a silver salt with a reducing agent therefor, maintaining the association in

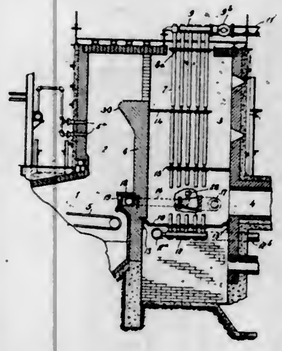
the absence of air and for a period of time less than the period necessary to permit a complete reduction of the silver salt present and spraying the resulting par-

tially reduced substance in the form of a mist and in the presence of air onto the surface of the object to be coated.



1,574,545. OIL HEATER. CHARLES H. BEAR, York, Pa., assignor to Bear Combustion Company, York, Pa., a Corporation of Pennsylvania. Filed Apr. 11, 1924, Serial No. 705,865. Renewed Dec. 22, 1925. 8 Claims. (Cl. 158—28.)

3. A fuel burning apparatus including a bowl provided with an inwardly extending nozzle, an ignition wall in the bowl arranged in front of the nozzle and provided with oppositely extending teeth adapted to break up a combustible mixture discharging into the bowl through the nozzle, said bowl having a substantially semi-spherical inner surface, a heat diffuser arranged at the top of the bowl and having a baffle abutting against one portion of the top edge of the bowl, and legs associated with the heat diffuser and resting on said bowl.

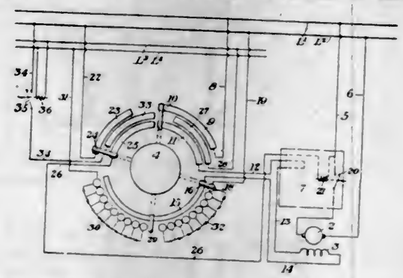


1,574,546. OIL-HEATING FURNACE. JOHN E. BELL, Brooklyn, N. Y., assignor to Sinclair Refining Company, Chicago, Ill., a Corporation of Maine. Filed Jan. 28, 1922. Serial No. 532,482. 14 Claims. (Cl. 196—116.)

5. A tubular oil cracking still having a heating chamber, a series of vertical oil heating tubes adapted to be externally heated extending through said heating chamber, a flue communicating with the lower end of said heating chamber, a fire box having an elongated vertical throat communicating at its upper end with said heating chamber, a flue connecting the lower end of the heating chamber with the lower end of the throat, and means in said flue for forcing the return of partially cooled but still hot gases to the first box, whereby the heating gases

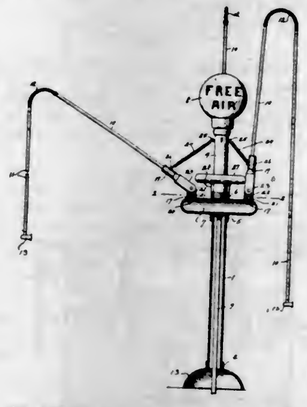
from the fire box are tempered by the returned hot gases of lower temperature and the resulting mixture is passed through the heating chamber.

1,574,547. OPERATION OF OIL STILLS. JOHN E. BELL, Brooklyn, N. Y., assignor to Sinclair Refining Company, Chicago, Ill., a Corporation of Maine. Filed Aug. 10, 1923. Serial No. 656,672. 19 Claims. (Cl. 196—116.)



1. The improvement in the heating of oil cracking stills in which oil is heated to the cracking temperature by hot products of combustion from a furnace passing externally over the oil heating surfaces of the still, which comprises recycling over the oil heating surfaces in admixture with fresh products of combustion from the furnace a portion of the hot waste heating gases which have previously passed over the heating surfaces.

1,574,548. METHOD AND APPARATUS FOR SWITCHING. MERRILL G. BENJAMIN, Lakewood, Ohio. Filed Mar. 31, 1924. Serial No. 703,326. 7 Claims. (Cl. 172—179.)

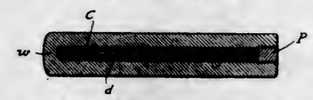


1. The method of operating an electric motor, which includes supplying the motor armature from one current source, supplying the motor field from the same current

source, switching the field to a second current source by supplying current in increasing amounts from the second source while decreasing the amount of current

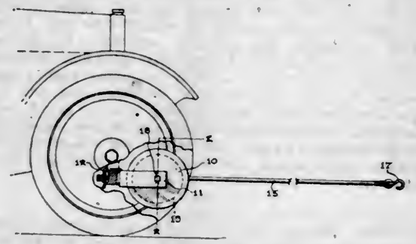
from the first source to the field, and maintaining the electrical connection between the first source and the motor armature, substantially as described.

1,574,549. TIRE-INFLATING DEVICE. HENRY W. BIESHAR, Oskaloosa, Iowa. Filed Jan. 29, 1924. Serial No. 689,341. 2 Claims. (Cl. 299—77.)



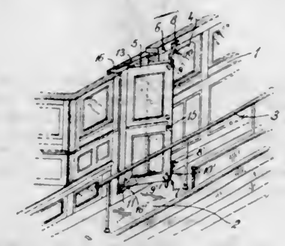
1. A tire inflating device comprising a hollow standard, a reservoir positioned intermediate the height of said standard, a supply pipe passing upwardly through the lower portion of said standard and communicating with said reservoir, outlet conduits having communication with said reservoir and pivotally mounted for vertical swinging movement, resilient means normally retaining said conduits in an elevated position and bumper means about said standard above the reservoir for limiting upward swinging movement of the conduits.

1,574,550. METHOD OF MAKING MAGNETIC ALLOYS. VERE B. BROWNE, Brackenridge, Pa. Filed Apr. 2, 1925. Serial No. 20,252. 5 Claims. (Cl. 75—45.)



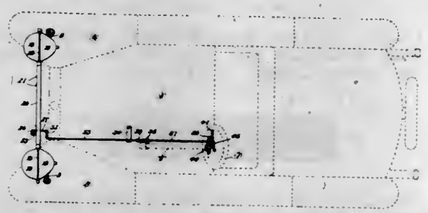
1. The method of making silicon iron having a silicon content sufficient to adapt it for use as a magnetic alloy and a carbon content of not over .03%, which consists in refining iron, in reducing the carbon in the refined iron by making additions of iron ore to the bath until no further reduction of carbon is obtained by further additions, in adding sufficient ferro-silicon to produce the necessary heat to maintain the metal molten during a Bessemer blow, in transferring the metal to a Bessemer converter and over-blowing to remove the silicon which has been added and substantially all of the remaining carbon, then in transferring the metal to a ladle and in adding thereto the necessary silicon.

1,574,551. ROLLING HOLLOW STEEL. EDWARD BUMFORD, Birmingham, Ala. Filed Nov. 10, 1921. Serial No. 514,410. 1 Claim. (Cl. 80—62.)



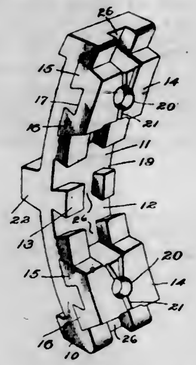
The method of producing hollow rolled bars which comprises providing a hollow blank filled with calcium carbide, rolling the bar and removing the carbide with the aid of water.

1,574,552. TOWLINE FOR AUTOMOBILES. LESLIE G. CHAPMAN, Bangor, Me. Filed Oct. 24, 1925. Serial No. 64,641. 1 Claim. (Cl. 280—33.14.)



A self winding tow line for vehicles having a casing, means for connecting the casing with the front axle of a vehicle, a drum revolubly mounted in the casing and having a cable reeled thereon and extended through an opening in the side of the casing for terminal attachment to a towing vehicle, and a drum rewinding spring housed within the casing, the said drum having a transverse spindle terminally secured in the side walls of the casing, and the means of engagement with the front axle consisting of a yoke straddling the casing and engaged with the extremities of said spindle.

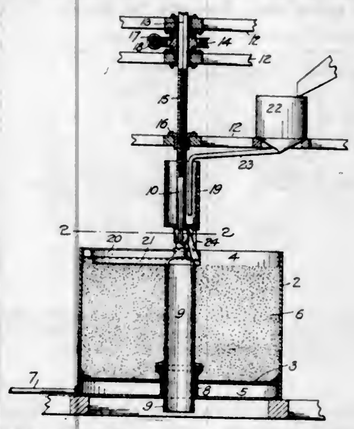
1,574,553. DOOR MOUNTING. IRWIN CHASE, Bayonne, N. J., assignor to The Elco Works of The Electric Boat Company, a Corporation of New Jersey. Filed May 16, 1924. Serial No. 713,837. 18 Claims. (Cl. 20—16.)



1. The combination of a door, a support and means carried by the support and connected to one edge of the door for causing this edge of the door to swing out away from the support a maximum distance equal to approximately one half the width of the door and then back against the support whereby the door is opened wide.

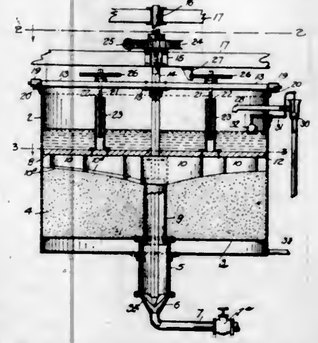
1,574,554. DIMMER SHADE FOR MOTOR-VEHICLE HEADLIGHTS. ANDREW CHLPKA, Lackawanna, N. Y. Filed Aug. 27, 1925. Serial No. 52,905. 1 Claim. (Cl. 240—45.6.)

In a device of the type described, the combination with the headlights of a motor vehicle, of a ring clamped on the rim of each headlight, a pair of bearings carried by each ring and projecting laterally from the opposite sides thereof, a semi-circular frame having end trunnions journaled in said bearings of each headlight, a dimmer shade carried by each frame, a tubular rod connecting the inner trunnions of the said frames, a laterally projecting arm carried by said tubular rod, a vertically extending rod pivotally connected to the extremity of said arm, a horizontally extending rotatably mounted rod having a laterally extending arm, a connection between the vertically extending rod and the last mentioned lateral arm whereby rotation of the horizontal rod will cause the vertical arm to move upwardly or downwardly to rotate the tubular rod connecting said dimmer shade frames, and means for rotating said horizontal rod.



1,574,555. BRAKE SHOE. JAMES A. CONNELLY, Hamilton, Ohio. Filed July 5, 1922. Serial No. 572,989. 5 Claims. (Cl. 188—238.)

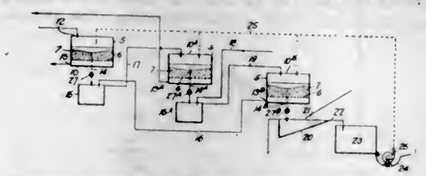
1. A brake shoe having a main body and a plurality of detachable wear-blocks, coacting means between the main body and the blocks, comprising tapered dove-tails and slots therefor and means on the main body for supporting the block adjacent its middle portion, each of the wear-blocks having a passage for air at its rear and adjacent the main body of the shoe.



1,574,556. FILTER. HARRISON S. COE, Mound City, Kans., assignor, by mesne assignments, to The Cycle Company, Colorado Springs, Colo., a Corporation of Colorado. Filed Aug. 13, 1919. Serial No. 317,237. 14 Claims. (Cl. 210—12.)

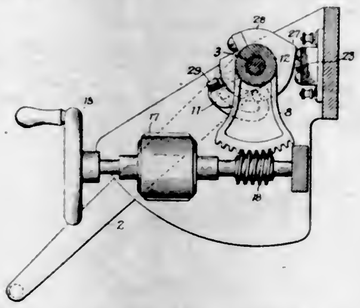
1. A filter comprising a vessel containing a column of filtering material, means for feeding liquid upon the column, means for withdrawing filtrate therefrom and mechanism operative upon the surface of the filtering

material where the liquid enters the column to successively remove successive layers thereof together with the deposit contained thereon.



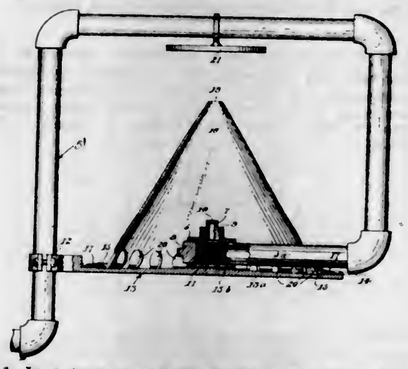
1,574,557. FILTERING APPARATUS. HARRISON S. COE, Mound City, Kans., assignor, by mesne assignments, to The Cycle Company, Colorado Springs, Colo., a Corporation of Colorado. Filed Jan. 26, 1920. Serial No. 354,177. 16 Claims. (Cl. 210—129.)

1. In filtering apparatus of the character described, the combination of a tank, a filter-bed therein, having a passage extending downwardly from its surface, and mechanism for moving the upper strata of the filter bed to said passage, comprising a rotary shaft mounted against longitudinal displacement, a scraping device connected for rotation with the shaft, and free therefrom for independent downward motion, and means to effect an intermittent downward movement of the device during rotation of the shaft.



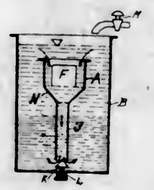
1,574,558. FILTERING PROCESS. HARRISON S. COE, Mound City, Kans., assignor, by mesne assignments, to The Cycle Company, Colorado Springs, Colo., a Corporation of Colorado. Filed Jan. 26, 1920, Serial No. 354,178. Renewed Oct. 29, 1925. 7 Claims. (Cl. 210—128.)

6. A process of filtration consisting in causing liquid in a mixture of liquid and solids, to percolate through a permeable filtering substance, and automatically removing the residue of the mixture, settling on said substance,



in different filtering units, and washing the residue of one unit with the filtrate of another.

1,574,559. MARINE-ENGINE GOVERNOR. WILLIAM G. COXE, Philadelphia, Pa., and GUSTAV M. LAGERGREN, Wilmington, Del. Filed Aug. 5, 1924. Serial No. 730,249. 14 Claims. (Cl. 137—159.)

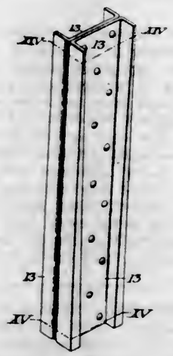


1. A marine engine governor comprising a reversible electric motor connected to open and close the engine control valves double throw switch means having opposite sides thereof connected in the motor circuit oscillated by pitching movement of the boat to automatically start and reverse the motor to open and close the engine control valve.

1,574,560. OIL BURNER. THOMAS A. CRAWFORD, Sacramento, Calif. Filed Mar. 19, 1925. Serial No. 16,748. 2 Claims. (Cl. 158—64.)

1. In a burner of the type described, a burner pan comprising a disk-like body portion having a radially sloping top surface, a circular series of spaced lugs projecting perpendicularly from the top face of the body portion, and a perpendicular flange formed on the peripheral edge of the pan, a wick carried by the pan between the flange and the circular series of lugs, a burner nozzle centrally disposed above said pan, and a conical mixing chamber resting upon said pan and confining said burner nozzle.

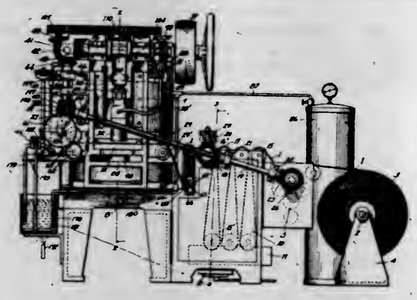
1,574,561. DISSOLVING DEVICE. EMIL CZAPEK and RICHARD WEINGAND, Bomlitz, near Walsrode, Germany. Filed Sept. 1, 1925. Serial No. 53,808. 6 Claims. (Cl. 23—272.)



1. In a dissolving device the combination with two containers, in one of which the substance to be dissolved is placed, and communication means between the upper and lower parts of said containers, of a valve for regulating the free sectional passage of the communicating means and the dissolving rate, and solvent-admitting means associated with the containers whereby the saturated fluid will be collected by gravity in the lower portion of the container.

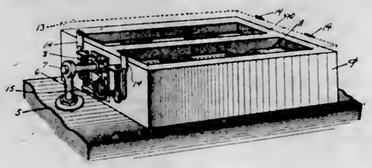
1,574,562. IMPREGNATED INSULATION. GUSTAVE F. DREHER, Schenectady, N. Y., assignor to General Electric Company, a Corporation of New York. Filed June 9, 1923. Serial No. 644,500. 9 Claims. (Cl. 91—68.)

1. A porous, mineral article permeated throughout with still wax pitch.



4. The process of impregnating asbestos composition with still wax which consists in modifying said wax by distillation to produce a flow point of about 45 to 50° C. and bringing said modified material into contact with said composition at a temperature of about 220° C. until penetration is completed.

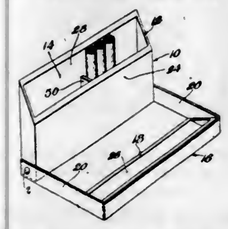
1,574,563. METALLIC STRUCTURE AND STRUCTURAL UNIT. SAMUEL E. DUFF, Ben Avon, Pa., assignor of one-half to Albert W. Heinle, Crafton, Pa. Filed Sept. 6, 1921. Serial No. 498,736. 2 Claims. (Cl. 189—34.)



1. A structural unit formed of a worked metal plate having its fibres extended in the direction of its elongation during the forming of the plate and having a substantially gradual variable wall thickness along the fibres, said plate being bent along the plane of its fibres to form the unit, substantially as described.

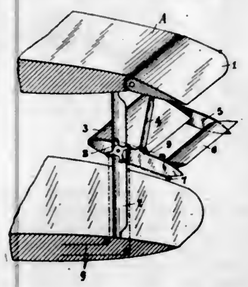
1,574,564. FORMING MACHINE. WILLIAM Y. FARNSWORTH, Seattle, Wash. Filed Oct. 9, 1922. Serial No. 593,256. 7 Claims. (Cl. 18—19.)

1. In a machine for forming articles from an endless strip of paper, or the like, in combination, means for intermittently advancing the strip, a blanking die having an opening therethrough, a receiving plate, a reciprocating die head co-acting with the blanking die to cut the article forming blanks from the strip and to advance the same through the die opening to partly shape the article, a rotating member, a plurality of forming dies arranged circularly thereon, means for transferring the partly shaped articles from the receiving plate into successive dies of the rotating member and means for actuating the latter dies to shape the articles therein and to discharge them as the dies successively approach the receiving position.



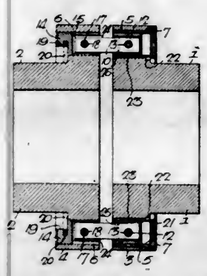
1,574,565. APPARATUS FOR MOLDING BUILDING BLOCKS. JOHN A. FERGUSON, Orange Park, Fla. Filed Aug. 8, 1921. Serial No. 490,675. 7 Claims. (Cl. 25—41.)

1. In apparatus for molding articles from a wet mixture, the combination of a suitably actuated jigging support, auxiliary supporting means associated therewith and adapted to be vertically actuated independently thereof, a mold form container separably carried by said jigging support, which mold form container has an enlarged top face opening and is so pivotally connected to said vertically actuated auxiliary supporting means as to be bodily invertible, for reseating wholly within its own normal area bounding limits relatively to said jigging support, when bodily shifted to said auxiliary supporting means away from said jigging support, closure means for said enlarged opening, and means for detachably securing said closure means thereover.



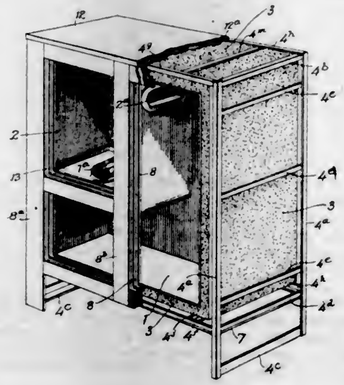
1,574,566. CONTAINER. CHARLES F. FISKE, Leominster, Mass., assignor to W. D. Earl & Co., Boston, Mass., a Corporation of Massachusetts. Filed Nov. 21, 1924. Serial No. 751,215. 2 Claims. (Cl. 206—41.)

1. A two-part case comprising a container member having a rearwardly beveled opening in the upper portion for the introduction and withdrawal of articles, a cover portion having a beveled face corresponding with the bevel surrounding the opening in the container and designed to fit flush with the walls of the container when in closed position, supporting arms connected to opposite sides of the cover member and pivoted at opposite sides of the container adjacent the lower end in such a manner that the edges of the supporting arms and the



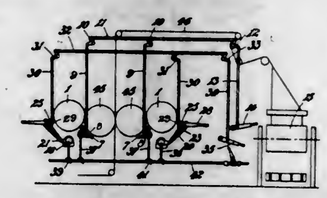
side of the cover member form a prolongation of the base of the container when the arms are swung forwardly to remove the cover member from closed to open position.

1,574,567. DEVICE FOR STEERING AIRCRAFT. ANTON FLETTNER, The Hague, Netherlands. Filed June 29, 1920. Serial No. 392,840. 14 Claims. (Cl. 244—29.) (Granted under the provisions of the act of March 3, 1921, 41 Stat. L., 1313.)



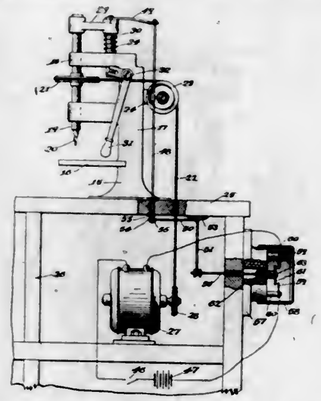
1. In a steering device for aircraft in combination, a rudder, an auxiliary pressure surface pivoted to said rudder near the rear edge thereof and gearing inserted between said rudder and said surface whereby this latter is caused, under the influence of the forces of flow acting thereon, to further the movement of said rudder.

1,574,568. FLEXIBLE COUPLING. WILLIAM J. FRANCKE, New Brunswick, N. J., assignor, by mesne assignments, to John Waldron Corporation, New Brunswick, N. J., a Corporation of New Jersey. Filed June 30, 1922. Serial No. 572,019. 6 Claims. (Cl. 64—96.)



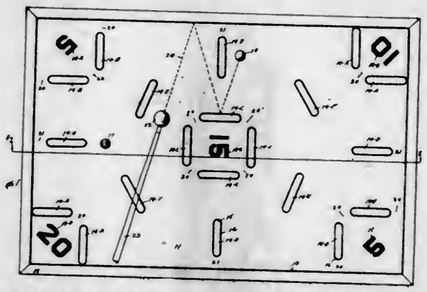
1. A flexible coupling comprising relatively movable coupling members having corresponding apertures, a flexible connecting element, a keeper pivotally secured to each end of said element and adapted respectively to occupy the apertures of the said coupling members, means for securing one of the keepers to its coupling member, and a sleeve constituting a liner for the aperture of the other member detachably retained in the aperture and removable therefrom independent of the connecting element.

1,574,569. REFRIGERATOR. ROBERT T. FRAZIER, DONALD W. BODDY, and CURTIS F. HAMLIN, Chattanooga, Tenn., assignors to Tennessee Furniture Corporation, Chattanooga, Tenn., a Corporation of Tennessee. Filed June 17, 1925. Serial No. 37,716. 16 Claims. (Cl. 220—9.)



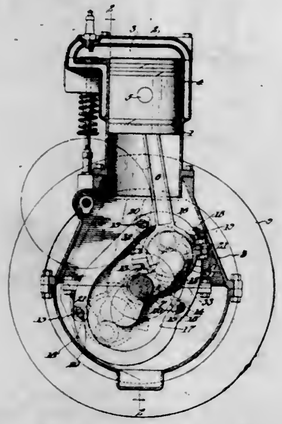
4. A refrigerator comprising a skeleton metal supporting frame; an interior food and ice container mounted in said frame; an insulating lining covering the back, sides, top and bottom of said container; an exterior casing mounted upon and enclosing said skeleton frame; and a wooden frame attached to the front of the said metal frame and having openings registering with the openings in the ice and food compartments.

1,574,570. APPARATUS FOR GUMMING LITHOGRAPHIC PRINTING SURFACES. BENJAMIN JOSEPH JOHN GOULDING, Altrincham, England, assignor to Linotype and Machinery Limited, London, England, a British Company. Filed July 11, 1924. Serial No. 725,322. 3 Claims. (Cl. 101—142.)



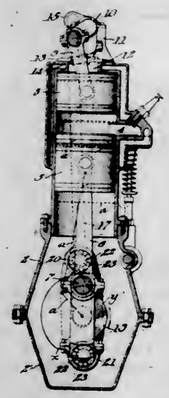
1. In a lithographic printing press, the combination with a plurality of plate cylinders of gumming apparatus appropriate to each plate cylinder comprising a gum-solution trough, a power operated roller adapted to receive gum solution therefrom and means adapted to bring the roller into and out of contact with a plate on the plate cylinder, and mechanism operative to bring such apparatus into and out of operation either individually or a plurality thereof collectively.

1,574,571. CIRCUIT CONTROLLER FOR LENS-DRILLING MACHINES. EVERETT E. GRAY, Los Angeles, Calif. Filed Oct. 21, 1922. Serial No. 595,999. 2 Claims. (Cl. 77—6.)



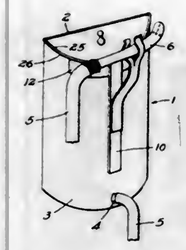
1. A lens drilling machine comprising a bench, a standard mounted upon the bench, spaced bearing arms extending horizontally from the standard, a drill shaft mounted vertically in the bearing arms and adapted to rotate and reciprocate and adapted to carry a drill, a carriage fixed upon the upper end of the shaft, a rod fixed to the carriage and reciprocating through the upper bearing arm, a spring upon the rod between the bearing arm and carriage, a hand lever pivoted to the standard and connected to the rod for reciprocating the drill shaft, a motor mounted under the bench, means to rotate the drill spindle from the motor, and means whereby the motor circuit is closed when the drill shaft moves towards work and open when the drill shaft moves away from work.

1,574,572. GAME. TRACY R. GROVE, Portland, Oreg. Filed Dec. 22, 1924. Serial No. 757,412. 1 Claim. (Cl. 273—118.)



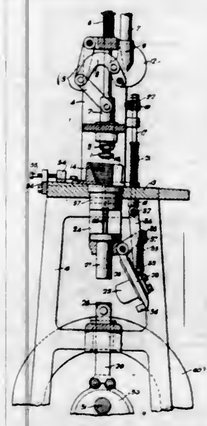
A game board having, in combination, a flat rectangular base having a wall formed about the perimeter thereof, said wall having a resilient inner face, with a plurality of fences mounted on said base within said wall, some of which fences forming narrow gated enclosures in the corner of said board, others forming a narrow gated enclosure in the center of said board, others forming side barriers between the corner enclosures near the outer edges of said board, and others forming barriers between the center and outer closures; a small ball adapted to pass through any of said gateways; a large ball incapable of passing through any of said gateways; a cue for driving both of said balls; and a resilient covering for said fences and barriers.

1,574,573. INTERNAL-COMBUSTION ENGINE. JACKSON TIPTON HALE, Fulton County, Ga., assignor of one-third to Christopher La Fayette Hardwick, Cleveland, Tenn. Filed Oct. 19, 1923. Serial No. 669,521. 7 Claims. (Cl. 74—20.)



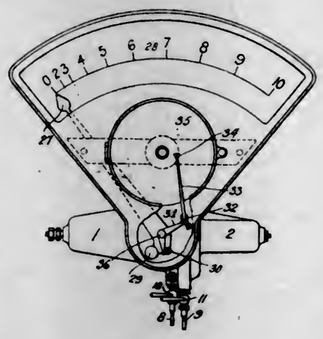
1. In combination, a cylinder, a piston, a crank shaft, a connecting rod affording a connection between said piston and crank shaft, a cam track mounted in predetermined relation to said crank shaft, means whereby said cam track may be augularly adjusted with respect to said crank shaft, and a cam follower carried by said connecting rod and affording a connection between said cam track and connecting rod whereby when said piston is at the limit of its upward stroke said crank shaft will have passed dead center.

1,574,574. INTERNAL-COMBUSTION ENGINE. JACKSON T. HALE, Fulton County, Ga., assignor of one-third to Christopher La Fayette Hardwick, Cleveland, Tenn. Filed Mar. 27, 1924. Serial No. 702,404. 2 Claims. (Cl. 123—78.)



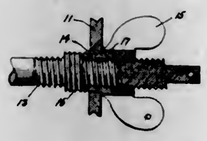
2. In an internal combustion engine, a power cylinder, a power piston working therein, a crank shaft and a connection between said piston and crank shaft, a compression piston arranged in said cylinder above said power piston and adapted to move in unison therewith throughout a portion of the power stroke, and to remain stationary during the remainder of said stroke, and means for imparting such movement to said compression piston including a cam carried by and revoluble with said crank shaft, a rock shaft mounted in bearings above the cylinder head, a connection between said rock shaft and compression piston, and a link connected to said rock shaft and provided with rollers engaging said cam at diametrically opposite points of its periphery, whereby a reciprocatory motion is imparted to said link and an oscillatory motion imparted through said link to said rock shaft.

1,574,575. SYRINGE-HOLDING CLIP. INEZ L. HARMON, Loma Linda, and STANLEY F. GIBBS, Glendale, Calif. Filed Feb. 19, 1925. Serial No. 10,298. 2 Claims. (Cl. 128—224.)



1. A syringe holding clip comprising a support adapted to hook over the rim of a container, and a clip member spaced from said support having a bifurcated upper end forming two spring sections curved oppositely to form a clip for holding a nozzle in horizontal position.

1,574,576. HEEL-BUILDING AND LIKE MACHINE. DAVID HILL, Burton-on-Trent, England, assignor to David Hill, Limited, Burton-on-Trent, England, a British Company. Filed Mar. 31, 1925. Serial No. 19,659. 22 Claims. (Cl. 12—42.)

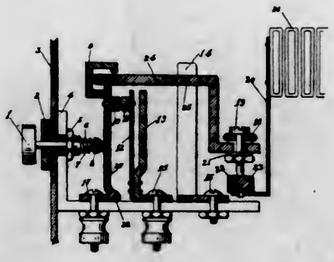


1. A heel building machine of the type herein referred to, having, in combination a hand lever by which compression of the heel lifts is effected, automatically acting nail driving mechanism, a device controlling said mechanism and intermediate means for actuation by said hand lever to render said controlling device active.

1,574,577. FLUID METER. JOHN LAWRENCE HODGSON, Eggington House, near Leighton Buzzard, England, assignor to George Kent, Limited, London, England. Filed Apr. 23, 1923. Serial No. 633,945. 2 Claims. (Cl. 73—110.)

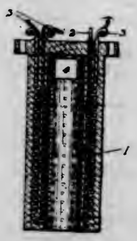
1. An instrument for measuring the flow of a fluid by means of pressure differences comprising a casing, a flexible diaphragm separating the interior of the casing into two chambers, plates secured on opposite sides respectively of the central portion of the diaphragm, a tension spring connected to each plate, means whereby the springs are adjustably anchored to the casing, means for obtaining in the two chambers a pressure difference caused by the flow to be measured, a cradle carried by the casing and adapted to support the annular portion of the diaphragm between the casing and the plates, and means for indicating the movement of the diaphragm.

1,574,578. SELF-LOCKING SEAL NUT. CHARLES E. HOLMES, Lynn, Mass., assignor to General Electric Company, a Corporation of New York. Filed Apr. 19, 1924. Serial No. 707,740. 3 Claims. (Cl. 171—34.)



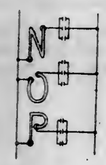
1. A casing, a cover therefor provided with an opening, a threaded bolt extending from said casing through the opening in said cover, and a seal nut on said bolt for holding said cover in place, said nut being provided with an integral bushing threaded on said bolt and in said opening and having a shoulder abutting against said cover.

1,574,579. SYRINGE. EDMUND A. JONES, West Medford, Mass. Filed Aug. 30, 1924. Serial No. 735,182. 7 Claims. (Cl. 128—218.)



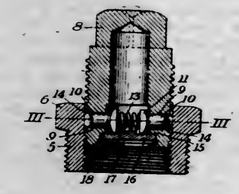
1. In a syringe, the combination of a rigid frame presenting a lateral opening, a guide adjacent its rear end and an abutment adjacent its front end, a tube having one end seated endwise against said abutment and removable laterally through said opening, a rearwardly movable retainer having a recess to receive the other end of said tube, said retainer being longitudinally slidable in said guide, and a plunger for expelling the contents f said tube, and for retracting said retainer to permit the insertion and removal of said tube.

1,574,580. ELECTRIC-CIRCUIT BREAKER. WILLIAM MAHLON REID KAY, Windsor, Ontario, Canada. Filed Oct. 17, 1924. Serial No. 744,225. 1 Claim. (Cl. 200—142.)



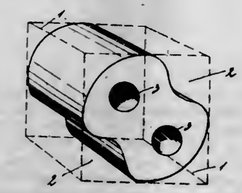
In a thermostatic circuit-breaker, a supporting base, a latching member pivoted on said base, a heat conductor in contact with a controlled device, a heat conducting receptacle fixed to said heat conductor, a fusible metal in said receptacle, an adjustable member mounted on said latching member and resting on the surface of said fusible member to hold latch in latched position, a fixed resilient contact, a pivoted contact cooperating therewith and held in closed circuit position by said latching member, so that on release of said latch, said pivoted contact is impelled toward open circuit position by said fixed resilient contact and held in said position by gravity, and a resetting push button for closing said contacts.

1,574,581. ELECTRIC WATER HEATER. WILLIAM MAHLON REID KAY, Windsor, Ontario, Canada. Filed Feb. 12, 1925. Serial No. 8,765. 4 Claims. (Cl. 219—44.)



4. An electric heater, comprising a resistance element imbedded in a body of glass or porcelain, the base of said body being flanged with holes therein engaging with bolts, the ends of said element being brought out through the base of said body to provide connections, means for protection comprising a perforated sheet of copper imbedded in said body and protruding through said base to which is mounted a circuit-breaker, means for making a water tight connection between said body and said casing comprising a rubber washer and means for mounting said body to casing through holes in flanged base of said body comprising nuts and bolts.

1,574,582. ELECTRIC SIGN. CARL KERN, Berlin-Tempelhof, Germany, assignor to General Electric Company, a Corporation of New York. Filed Nov. 28, 1923. Serial No. 677,555. 2 Claims. (Cl. 176—14.)



1. A unit for an electric sign comprising in combination a discharge tube, a supporting plate behind said tube, electrode terminals for said discharge tube projecting through said plate and secured to the rear of the plate and electric condenser means mounted on the rear of said plate and connected in circuit with said tube.

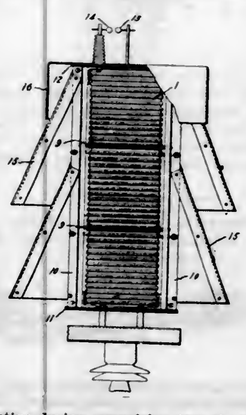
1,574,583. FORCE-FEED LUBRICATOR. FREDERICK K. LANDGRAF, Crafton, Pa., assignor to Flannery Bolt Company, Pittsburgh, Pa., a Corporation of Pennsylvania. Filed Jan. 31, 1924. Serial No. 689,678. 5 Claims. (Cl. 184—48.)

1. A force-feed lubricator, comprising a holder having a screw-threaded bore, a screw-threaded plug mounted in said holder and formed with an interior recess intersected by two diametrically opposite openings in the wall of said plug, and friction means for preventing unintentional rotation of said plug, comprising a pair of plungers working in said openings, and a spring interposed between the inner ends of said plungers and tending to force them outwardly, said plungers having having their outer ends shaped for cooperation with diametrically opposite grooves formed in the inner wall of said holder and extending parallel to the axis thereof, substantially as described.

1,574,584. FILLER. WILHELM LINDNER, Dresden, Germany. Filed Apr. 1, 1924. Serial No. 703,569. 1 Claim. (Cl. 72—15.5.)

A refractory filler element of the type adapted to be promiscuously thrown into heat accumulators, consisting of a substantially cylindrical body, the cross section of which resembles a figure 8.

1,574,585. JAW FOR ENGRAVERS' CLAMPS. CHARLES EDWARD LINNIG, Peru, Ill. Filed Jan. 2, 1923. Serial No. 610,203. 1 Claim. (Cl. 81—4.)

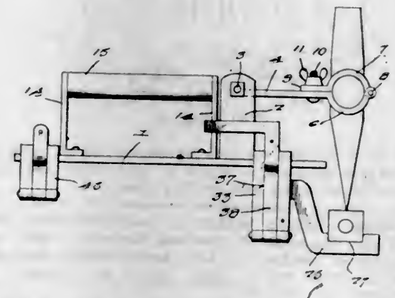


In holding jaws for engravers' clamps, a body part having an aperture, a plurality of projections integral with said body part, the inner side of which projections slant toward each other, a pin slidably mounted in said aperture, a plate adjacent to said projections fastened to said pin, in combination with a lifting member, having an inclined face slidably mounted in said body part, a suitable notch in said lifting member and a suitably shaped thumb screw connected to said lifting member and mounted in said body part.

1,574,586. BUILDING CONSTRUCTION. JAMES F. LOUCKS, Cleveland, and HARRY GILLETT, Gates Mills, Ohio, assignors to Holorib, Incorporated, Cleveland, Ohio, a Corporation of Ohio. Filed Jan. 16, 1924. Serial No. 686,493. 10 Claims. (Cl. 108—6.)

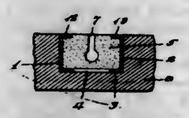
1. A sheet-metal foundation for roofs and floors having a substantially continuous load-carrying surface and a plurality of spaced hollow triangular ribs projecting from the opposite surface, said ribs each having a depth in excess of the width of the base thereof.

1,574,587. PROTECTIVE DEVICE. NORMAN A. LOUGEE, Schenectady, N. Y., assignor to General Electric Company, a Corporation of New York. Filed Feb. 7, 1918, Serial No. 215,796. Renewed Nov. 24, 1923. 17 Claims. (Cl. 115—30.)



2. A protective device comprising two electrodes, means for spacing the same apart and insulating them from one another, one of said electrodes having a conductive contact surface designed to make electrical contact with a

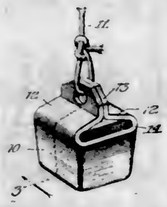
suitable support and the other of said electrodes having a conductive contact surface designed to support and make electrical contact with a similar mechanically independent device, and material between said electrodes of low electrical resistance, said material being adapted to be converted into material of high electrical resistance by the passage of an electric discharge therethrough.



15. In a device of the character described, a series of protective units arranged in a pile and means for protecting said units from the weather comprising a series of spaced overlapping petticoat members surrounding said pile of units.

1,574,588. CHISEL HOLDER. JOHN J. MACEK, Jr., Chadron, Nebr. Filed May 6, 1925. Serial No. 28,342. 1 Claim. (Cl. 81—13.)

In a structure of the class described, a plate, a pair of adjustable members mounted on the plate and having depending portions, one of said depending portions being slotted vertically, a bowed member hingedly mounted in the slot, a spring for normally holding the bowed member extended inwardly of the slot, the other depending portion provided with a pair of apertured ears, a pin extending through the apertured ears, an arm slidably and rotatably mounted on the pin and provided with a recess for engaging the nut, and a spring on the pin for engaging the arm to hold it in a raised position for engaging the under side of the nut, and clamping means pivotally engaged with the plate for holding a chisel in engagement with the nut supported in the arm.



1,574,589. PROCESS OF MANUFACTURING RUNNER BRICKS. WALTHER MALZACHER, Traisen, Austria. Original application filed Jan. 12, 1923, Serial No. 612,362. Divided and this application filed Oct. 4, 1924. Serial No. 741,652. 1 Claim. (Cl. 22—134.)

A process for manufacturing runner bricks consisting in mounting cores for the passages in a rigid metal frame open at at least two faces, filling such frame with moulding material and removing the cores through the open faces of the frames.

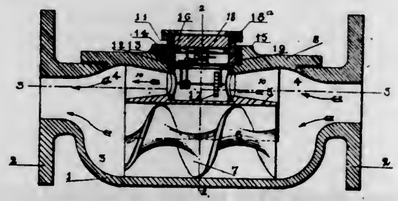
1,574,590. CHALK HOLDER. GEORGE F. MILLER, Chicago, Ill. Filed Mar. 10, 1924. Serial No. 698,158. 6 Claims. (Cl. 273—17.)

1. A chalk-holder, formed of a casing-forming portion open at its opposite ends and adapted for the insertion therein of the piece of chalk through one of its open ends, stop-means at its other end for engagement by one end of the chalk, and stop-forming means at the end of

the casing through which the chalk is introduced therein formed of portions having flatwise-opposed extensions angularly disposed relative to said portions.

1,574,591. MULTIPLE-FILM-GUIDE MOUNTING. ALBERT L. ADATTE, North Plainfield, N. J., assignor to Pathe Exchange, Inc., Jersey City, N. J., a Corporation of New York. Filed May 6, 1925. Serial No. 28,445. 3 Claims. (Cl. 95—94.)

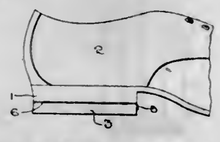
1. A film guide mounting, comprising a shaft and a hub slidably and non-rotatably mounted thereon, the bore of the hub being disposed longitudinally in a diagonal direction with regard to the axis of the hub, said hub adapted to rotatably support a film guide.



1,574,592. FELT FOR USE ON THE DRYING PORTION OF PAPER AND PASTEBOARD MACHINES. EDUARD V. ASTEN, Eupen, Belgium. Filed Apr. 30, 1924. Serial No. 710,187. 1 Claim. (Cl. 139—420.)

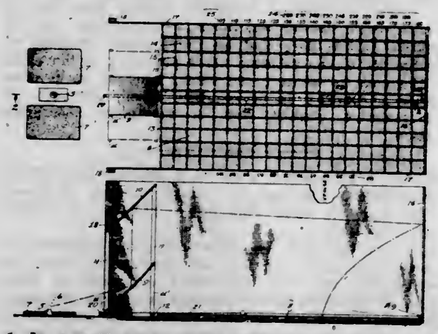
A drier felt having a surface section made up of threads, each having an inner strengthening core of vegetable textile fiber and an outer dense envelope of asbestos fibers, the asbestos fibers providing an envelope for the core to protect the same, whereby to provide a drier felt which is of requisite tensile strength, of heat resistive quality, and of maximum absorptive function.

1,574,593. WET FELT FOR THE PAPER AND PULP INDUSTRY. EDUARD V. ASTEN, Eupen, Belgium. Filed Apr. 30, 1924. Serial No. 710,188. 2 Claims. (Cl. 139—420.)



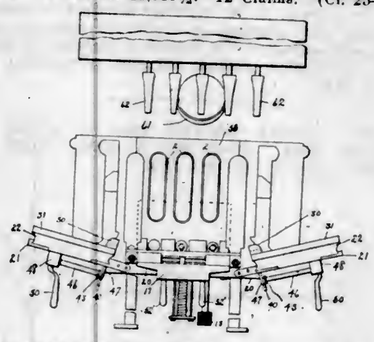
2. A wet felt made up of threads, each consisting of a core of worsted yarn with an envelope of roving of wool covering the same, and fulled to provide an interlocking of the fibres of the envelope as a loose permeable felt about and while maintaining the full strength of the core, whereby to form a water permeable wet-felt of requisite tensile strength.

1,574,594. WATER METER. ANTOINE JOSEPH ASTIER, Colombes, France. Filed July 12, 1920. Serial No. 395,809. 2 Claims. (Cl. 73—68.) (Granted under the provisions of the act of Mar. 3, 1921, 41 Stat. L., 1313.)



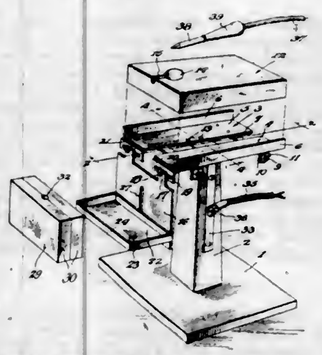
1. In a fluid meter, a body having a pass therethrough for the flow of fluid and also having a second pass parallel with the first named pass and provided with walls forming a cylindrical chamber intermediate the ends of said second pass, an Archimedean screw arranged in the first named pass, a cylindrical casing arranged and mounted for turning movement in said chamber of the second pass and having a wall provided with openings which by the turning of said casing may be caused to register with the second pass or to be moved out of communication therewith to cut off the flow of fluid through said second pass and fluid operated measuring means mounted in said casings.

1,574,595. HEEL OF FOOTWEAR. PERCY WALTER BANKS and ALFRED NORRIS BURT, Wellington, New Zealand, assignors to Detachable Heels Limited, Wellington, New Zealand, a Company of New Zealand. Filed Oct. 10, 1924. Serial No. 742,917. 3 Claims. (Cl. 36—42.)



1. A heel for footwear, comprising, a fixed and a detachable heel portion, a plate having a V shaped opening secured to one portion, a V shaped plate with offset edges fixed to the other portion, the edges forming a locking flange for the edges of the V shaped opening of the first said plate, the V shaped portions of each plate extending to the inner edges of the respective heel portion.

1,574,596. GOLF APPARATUS. EDWARD L. BARNETT, New York, N. Y. Filed Dec. 19, 1924. Serial No. 756,978. 6 Claims. (Cl. 273—35.)



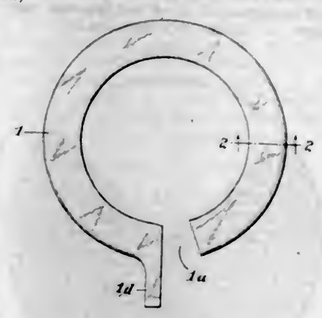
1. In a golf apparatus, a field divided into spaces having predetermined values into which a ball is adapted to be projected, means for retarding the flight of said ball, said means comprising oppositely facing deflecting and retarding plates with which the ball contacts in its flight to said field.

1,574,597. MACHINE FOR FORMING CEMENT BLOCKS. JOE BOCCHINO, Utica, N. Y. Filed Aug. 7, 1925. Serial No. 48,839½. 12 Claims. (Cl. 25—41.)

1. In a machine for forming cement blocks, receding means for moulding a recess in said block, and rock means for actuating said receding means.

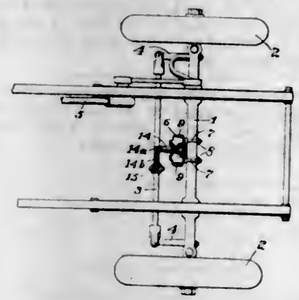
1,574,598. METAL MELTING AND POURING DEVICE. WILLIAM M. BOWLES, Shawnee, Okla., assignor of one-half to Mrs. Sarah Moses, Shawnee, Okla. Filed Oct. 9, 1924. Serial No. 742,665. 4 Claims. (Cl. 22—79.)

1. A device for melting and pouring metal comprising a supporting standard, a crucible block removably held thereon and having a metal receiving concavity and a pouring channel leading therefrom, and a mold support freely swingingly suspended in position to support a mold to receive molten metal delivered from the channel, when the standard is tilted.



1,574,599. CIGAR AND CIGARETTE LIGHT EXTINGUISHER. WALTER W. BRISCOE, Staunton, Va. Filed Oct. 26, 1923. Serial No. 671,007. 3 Claims. (Cl. 131—51.)

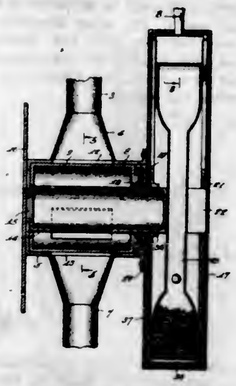
1. In a cigar and cigarette light-extinguisher the combination with a substantially conical body portion pri-



marily open at both ends, of a pointed fire-spreader projecting through the opening at the smaller end of the structure in frictional contact with the inner walls thereof.

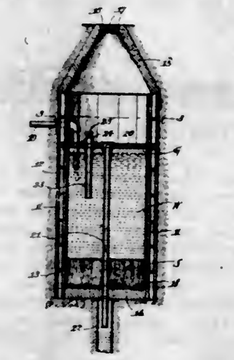
1,574,600. CORE OR MANDREL. FERDINAND F. BAUCKER, Akron, Ohio, assignor to The Miller Rubber Company, Akron, Ohio, a Corporation of Ohio. Filed July 17, 1925. Serial No. 44,321. 1 Claim. (Cl. 18—45.)

A core or mandrel for forming inner tubes for pneumatic tires comprising a circular disc-like member in the form of a relatively thin flat interrupted ring having parallel side walls and rounded edges.



1,574,601. STEERING-GEAR CHECK. JAMES W. BRUNDAGE, Akron, Ohio, assignor to The Miller Rubber Company, Akron, Ohio, a Corporation of Ohio. Filed Jan. 10, 1925. Serial No. 1,629. 5 Claims. (Cl. 280—90.)

1. In a device for checking the movement between two elements which are movable one with respect to the other, a cylinder affixed to one of said elements, a pair of connected pistons therein having their acting faces equidistantly spaced from the cylinder heads when in neutral position, there being restricted bypass ports for fluid between the opposite ends of the cylinder, and relatively large bypass ports in the cylinder wall which are closed by the piston when in neutral position, and uncovered by movement of the piston in either direction whereby resistance to the piston movement is removed, and an actuator operatively connecting said piston to the other element.

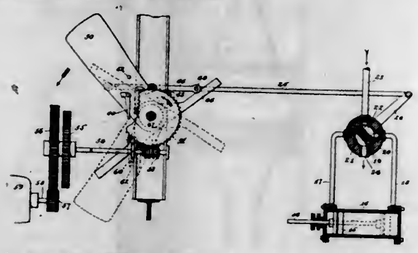


1,574,602. TOILET-FLUSHING DEVICE. FREDERICK ALBERT BURKHARD, New York, N. Y. Filed Mar. 25, 1925. Serial No. 18,238. 5 Claims. (Cl. 137—93.)

4. In a toilet flushing device, a valve, automatic means for closing said valve, manually actuated means for shifting the automatic means for opening the valve, said automatic means including a tubular member connected to the rotating part of a valve so as to rotate

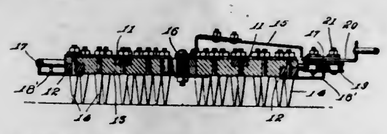
therewith, and granular matter arranged in the tubular member adapted to flow from one end of the tubular member to the other as the tubular member is inverted.

1,574,603. CESSPOOL. WILLIAM THOMAS BURTIS, Glen Head, N. Y. Filed Oct. 3, 1924. Serial No. 741,507. 1 Claim. (Cl. 210—6.)



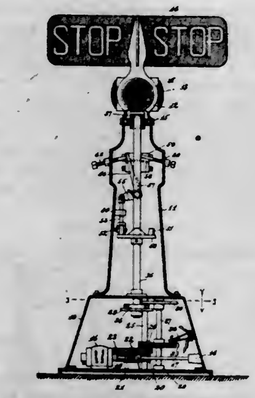
A final disposal tank for the contents of cesspools including an approximately cylindrical receptacle into which said contents are adapted to be discharged, said receptacle having its side walls constructed of vertical rows of communicating hollow blocks, the rows of blocks defining V shaped vertical drain channels at the junction of the rows, the rows also including internal vertical drain channels open at their ends to the soil and communicating thru lateral openings with the V shaped drain channels, and means for drawing off water from the tank including pipes communicating with the internal channels.

1,574,604. AUTOMATIC SHIFTER. WILLIAM T. CHAMBERLAIN, New York, N. Y. Original application filed May 31, 1924, Serial No. 717,077. Divided and this application filed Apr. 23, 1925. Serial No. 25,334. 5 Claims. (Cl. 137—139.)



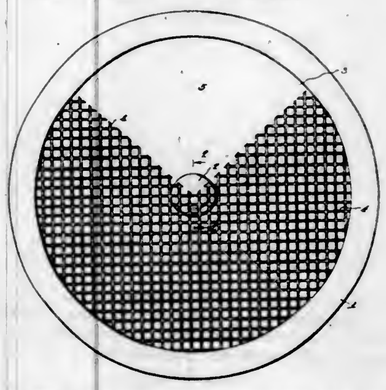
1. An automatic shifter adapted to throw a valve, comprising a support, a valve-throwing crank arm on the support, a shaft on the support, a bar fixed between its ends to the shaft and adapted at its ends to engage the crank arm, a weighted arm fixed to the shaft, a pair of worm wheels loose on the shaft and at opposite sides of the weighted arm, means for turning said worm

wheels in opposite directions, lugs on the worm wheels, ratchet means on opposite sides of the weighted arm whereby the arm is caused to move in one direction by one worm wheel and in the other direction by the other worm wheel, and whereby said arm when the bar engages the crank arm falls of its own weight to quickly move the crank arm from one position to another and to quickly reverse the valve.



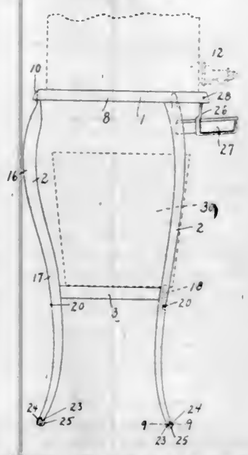
4. A valve shifter, including a support, a shaft on the support, a weighted arm fixed to the shaft, means for transmitting motion to the arm to turn said shaft in opposite directions, the arm being adapted for release from its operating means whereby the arm may fall by gravity and complete the movement of the shaft, said release occurring at a predetermined time in both directions of movement.

1,574,605. DRAG. FRANK CHARTIER, Duluth, Minn. Filed Feb. 25, 1925. Serial No. 11,581. 3 Claims. (Cl. 55—13.)



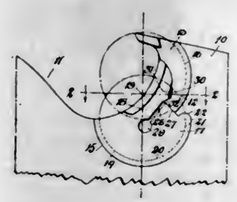
1. A circular drag comprising a pair of hingedly connected sections, teeth depending from each section, a circular guard rail surrounding the drag and spaced therefrom, and including pivotally connected sections, means for supporting the rail on the drag, and a draft bar having one end pivoted centrally of the drag.

1,574,606. MEANS FOR AUTOMATICALLY CONTROLLING TRAFIC. HARRY COOKE, Jr., Garfield, N. J. Filed July 2, 1924. Serial No. 723,766. 6 Claims. (Cl. 177—329.)



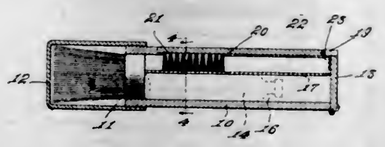
1. A traffic regulating apparatus comprising distinctive visual signals, driven mechanism connected to the signals and operable to intermittently move the signals to display them in alternate directions, continuously operating means for operating the driven mechanism to intermittently move the signals, control mechanism operatively connected between the driven mechanism and the continuously operating means for speeding up the continuously operating means during the time the signals are being moved and for slowing down the continuously operating means when said signals are at rest.

1,574,607. HEADLIGHT LENS. GEORGE EUSTIS CORCORAN, Washington, D. C. Filed May 14, 1925. Serial No. 30,287. 1 Claim. (Cl. 240—48.4.)



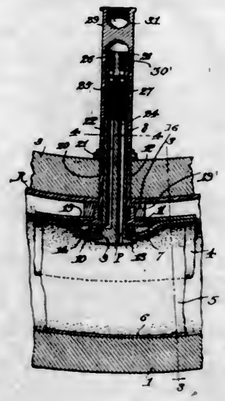
A headlight lens composed of clear plane glass, having on a face and throughout approximately three-quarters of the surface of the lens parallel crossed bands separated from each other, leaving clear and non-diffusing areas between them, said bands being translucent and formed by etching, the other portion of the lens being clear and located at the upper portion of the lens and extending from the center of the lens to the periphery thereof and increasing in width from the center of the lens to the periphery thereof.

1,574,608. STAND FOR WATER COOLERS. HENRY G. CORDLEY, Glen Ridge, N. J., and GEORGE R. LONG, Waterbury, Conn. Filed Feb. 7, 1924. Serial No. 691,244. 4 Claims. (Cl. 248—41.)



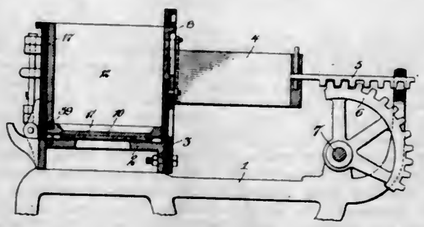
4. In a knockdown stand for water coolers, a top formed of a sheet metal disk having its edge so formed as to provide a peripheral groove having walls extending from its upper face upward above the plane of the upper face of the disk, having its outer wall so formed as to provide at points equally spaced apart an outwardly extending recess, and having its inner wall so formed as to provide an outwardly extending ridge opposite each of said recesses, supporting legs each formed of a single strip of metal U-shaped in cross section and provided at its upper end with a flattened portion adapted to fit the inner wall of said groove and carrying an outwardly extending ridge adapted to fit a recess and also provided at its end with a lip adapted to engage the lug opposite the recess, and a brace formed of a single strip of metal having projecting portions corresponding in number to the legs each adapted to fit within the sides of the groove of the legs, the upper portions of the legs being curved outward from their upper ends, their mid portions curved inward to receive the projecting portions of the brace and their lower portions being curved outward and terminating in supporting feet.

1,574,609. INSERTABLE SAW TOOTH AND HOLDER THEREFOR. ALFRED MAXWELL CURRIER, Aberdeen, Wash. Filed Aug. 27, 1924. Serial No. 734,528. 1 Claim. (Cl. 143—151.)



A saw including a blade, insertable teeth seated in said blade, and tooth holders for the teeth, each holder comprising an anchoring portion seated in the blade and against which the inner end of the tooth is adapted to seat, said anchoring portion including a rounded protuberance seated in a correspondingly shaped pocket in the blade, and a shoulder abutting the blade and offering a seat for the tooth, each holder also including a blocking strut portion disposed to bear against the front of that tooth in the rear thereof, each tooth presenting surfaces at the front thereof at an angle to each other, and the strut portion of the holder presenting surfaces at angles to each other, and opposed to the said surfaces of the tooth, said strut contacting with the tooth at separate places at the respective angular surfaces of the tooth.

1,574,610. COMBINED SHAVING AND TOOTH BRUSH. HARRY D. DELANEY, Memphis, Tex. Filed Mar. 14, 1925. Serial No. 15,579. 4 Claims. (Cl. 132—84.)

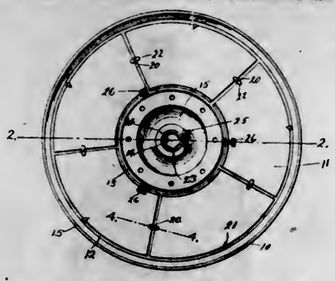


1. In combination, a shaving brush including a handle, having a longitudinal groove and an opening at one end of the groove, a tooth brush including a handle pivoted within said groove and adapted to normally lie flush with the outer surface of the handle, or projected beyond one end of the handle for use, said opening being adapted to receive the bristles of said brush when the latter is in its folded position.

1,574,611. AUTOMOBILE TIRE. ANTHONY F. DEMBEK, Brooklyn, N. Y. Filed Dec. 23, 1924. Serial No. 757,710. 2 Claims. (Cl. 152—22.)

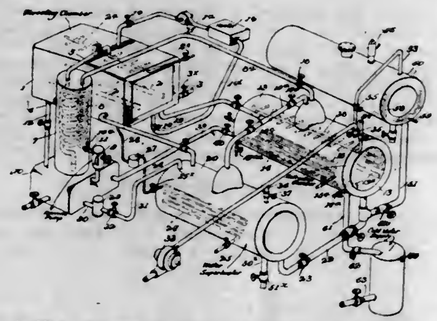
1. In a tire structure, a plurality of inflatable inner tubes adapted to fit within a tire casing, a valve stem attached to and supported by the walls of said inner tubes, a packing element carried by the wall of one of said inner tubes and through which the valve stem slidably extends, said valve stem having separate passages therein which communicate respectively with the interiors of the inner tubes, and a check valve in each of said passages whereby to inflate and deflate said inner tubes.

1,574,612. CEMENT-BLOCK MOLD BOX. ROBERT ANANIAS EATON, Haddon Heights, N. J. Filed May 23, 1924. Serial No. 715,310. 4 Claims. (Cl. 25—41.)



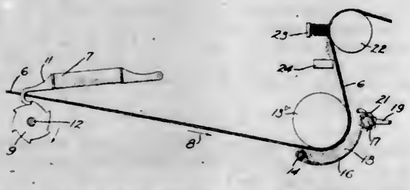
1. In a concrete block mold box, fixed bottom and rear walls, a multicompartment mold member mounted on the bottom wall, a plurality of vertically extending spaced partition plates forming said mold member, said plates being arranged in pairs with their adjacent edges slightly spaced to form a longitudinal slot between the pairs, a partition plate adapted to be disposed in said slot to divide the multicompartment member into two groups of compartments, a false bottom adapted to rest on the bottom plate, and a front wall pivoted to the bottom plate to which said false bottom is attached, the front wall and the false bottom being rotatable to move the false bottom out of the compartment with the blocks thereon.

1,574,613. LAMP SHADE. HARRY FIRMAN, Woodhaven, N. Y. Filed Apr. 25, 1923. Serial No. 634,564. 1 Claim. (Cl. 240—108.)



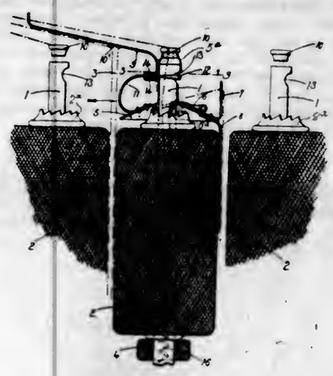
A lamp shade comprising a frame formed of an annular inclined rim, an annular rim of a larger diameter having an upturned flange disposed below said annular

inclined rim, radial extending downwardly inclined members connecting said rims, translucent panels of curved trapezoidal pattern supported by said rims and having



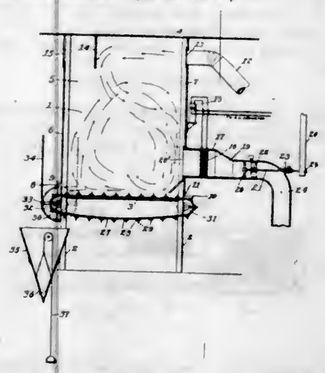
their meeting edges overlying said members, and bendable clips carried by said members for engagement with the meeting edges of said panels.

1574,614. PROCESS FOR RECOVERING BY-PRODUCTS FROM PLANT SUBSTANCES AND THE LIKE. FREDERICK K. FISH, Jr., New York, N. Y. Filed Jan. 2, 1920. Serial No. 348,725. 13 Claims. (Cl. 203—6.)



1. The process of removing volatile and other extractives from a resinous solid plant substance, consisting in subjecting the substance to water at a temperature above its normal boiling point, with said water charged with all volatile extractives from a resinous wood resulting from a previous treatment of such wood with superheated water, the said water being further enriched and charged with volatile extractives removed or liberated from the substances during the progress of the treatment, to thereby remove constituent material from the substance being treated, removing the charged water, and thereafter separating the contained extractives from such charged water.

1,574,615. ROOFING MATERIAL. CORNELIUS S. FLEMING, Berkeley, Calif., assignor to The Paraffine Companies, Inc., San Francisco, Calif., a Corporation of Delaware. Filed Nov. 28, 1921. Serial No. 518,281. 1 Claim. (Cl. 91—68.)

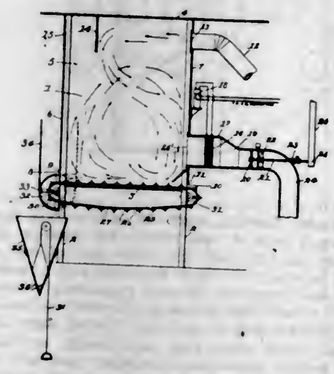


A roofing having a base of fibrous material, a coat of bituminous material on the fibrous material, a surface coating of finely flaked metallic particles adhesively retained by the bituminous coat in overlapping relation, in a manner characterized by the sprinkling of said particles on the bituminous coat when the bituminous coat is in a softened heated condition.

1,574,616. BOBBIN CARRIER FOR LACE-BRAIDING MACHINES. HENRI FONTY, Paris, France, assignor to Société Anonyme des Etablissements Lefaive, Jean Jacques Knecht, Paris, France. Filed Nov. 9, 1925. Serial No. 67,954. 4 Claims. (Cl. 96—14.)

1. In combination in bobbin carriers for braiding machines, a stationary spindle provided with a notch, a cap arranged on the spindle and having a tubular portion engaging the spindle and provided with a slot opposite said notch, a leaf spring connected to said cap and having a yoke-shaped part embracing the tubular portion of the cap and provided with jaws to engage the notch for holding the cap upon the spindle, a thread bobbin loosely mounted on the spindle and provided with a ratchet disc, thread guides supported by the cap and its tubular portion, and a pawl mounted on the cap and engaging the ratchet disk.

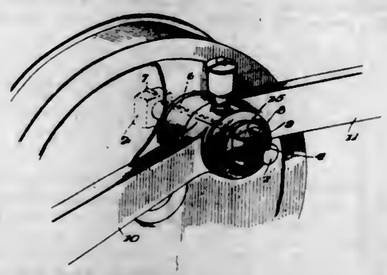
1,574,617. METHOD OF DEODORIZING HAIR, FEATHERS, AND THE LIKE AND PRODUCT THEREOF. ALFRED HUGH GALLAGHER, Chicago, Ill., assignor to Tanners Products Company, Chicago, Ill., a Corporation of Delaware. Filed May 24, 1924. Serial No. 715,764. 12 Claims. (Cl. 167—3.)



1. The method of deodorizing animal tissues such as hair, feathers and the like, which comprises treating the material with ozone.

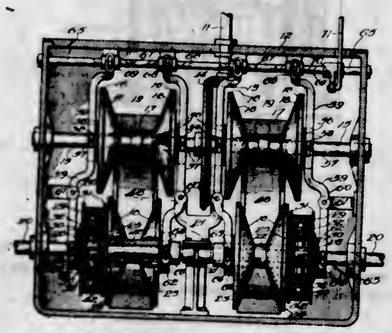
3. The method of treating animal tissues such as hair, feathers and the like which comprises subjecting the material to the action of ozone while the material is in

motion, to establish intimate contact between the material and the ozone, whereby the material will be deodorized and its resilient quality retained.



10. A resilient hair product having its odorous quality removed by the treatment with ozone and its resilient quality retained, whereby the product is deodorized and has yielding properties.

1,574,618. TREATING APPARATUS. ALFRED HUGH GALLAGHER, Chicago, Ill., assignor to Tanners Products Company, Chicago, Ill., a Corporation of Delaware. Original application filed May 24, 1924, Serial No. 715,764. Divided and this application filed May 29, 1925. Serial No. 33,769. 11 Claims. (Cl. 19—66.)



1. In a treating apparatus, the combination of a chamber, means for delivering material to be treated in a current of gas to the upper portion of the chamber, means arranged below the material delivering means for causing the material to circulate in the chamber, and means for delivering a gas in the path of the circulating material.

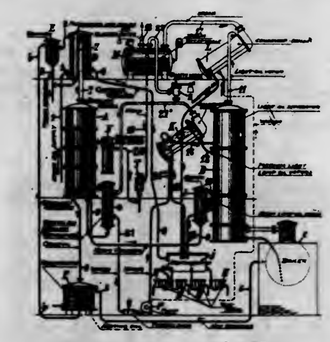
1,574,619. NUT LOCK. FELIX A. GIBSON, Martin County, Fla. Filed May 23, 1923. Serial No. 640,943. 1 Claim. (Cl. 151—8.)

A nut lock comprising a bolt having a screw threaded shank portion provided with a head, said bolt having a groove extending longitudinally thereof and being merged at one of its ends into an opening extending through said head, and a rod-like locking element made of a flexible material, said locking element being partially disposed in said groove and extending through said opening to project beyond the upper face of said head, the projecting end portion of the locking element being bent laterally into engagement with the face of the head and then longitudinally and against a side face of the head and the end portion of the locking element remote from the head being adapted to be bent laterally into engagement with a nut on the shank of the bolt, said second named end portion of the locking element being of sufficient length to extend laterally beyond a side face of the nut and to then have the terminal portion thereof bent inwardly against said face of the nut.

1,574,620. DIFFERENTIAL TRANSMISSION MECHANISM. CHARLES H. GILL, Chicago, Ill., assignor to The Autodrive Company, a Corporation of Delaware. Filed Mar. 16, 1925. Serial No. 15,952. 29 Claims. (Cl. 74—26.)

1. In transmission mechanism, the combination of a driving shaft, two driven shafts axially aligned with each other, a ring encircling and suspended from said driving shaft and one of said driven shafts in frictional driven engagement with said driving shaft and in frictional driving engagement with said one driven shaft, and a second ring encircling and suspended from the said driving shaft and the other of said driven shafts in frictional driven engagement with said driving shaft and in frictional driving engagement with said other driven shaft.

1,574,621. GRAVE MARKER. PERCY JOHN GOOD, Camden, Me. Filed May 2, 1925. Serial No. 27,611. 4 Claims. (Cl. 40—124.5.)

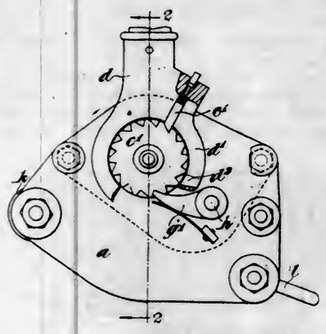


4. In a marker of the character described, a hollow housing open at one end and having opaque waterproof walls, means for supporting said housing, a plate adapted to be received flatwise in said housing adjacent to the open end thereof, said plate having a relatively large aperture, a transparent panel covering said aperture, means for retaining said plate substantially flatwise in said housing adjacent to the open end of the housing, and means for retaining a record card flatwise against the inner face of said transparent panel.

1,574,622. PROCESS OF DISTILLING VOLATILE PRODUCTS. LOUIS GRANGER, CHARLES MARILLER, and CHARLES PRACHE, Paris, France. Filed Jan. 9, 1920. Serial No. 350,354. 1 Claim. (Cl. 196—94.)

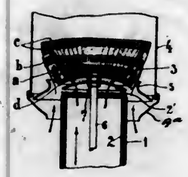
The method of distilling crude mineral oil consisting in vaporising the oil, condensing the vapors in evaporators with rapid circulation of water to ensure opera-

tion with small temperature drop, vaporizing water in said evaporators by absorbing the latent heat of the condensed products to produce steam at a temperature



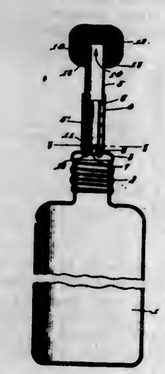
only slightly less than the condensed vapors and at a high pressure and using said steam in the heating of said oil and for the production of power.

1,574,623. SIGNAL CANE. LOUIS GRAU, Brooklyn, N. Y. Filed Apr. 2, 1925. Serial No. 20,256. 2 Claims. (Cl. 240—6.4.)



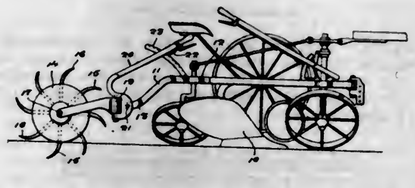
1. A signal cane, comprising a cane body provided with a grip and divided into two parts near the grip, a member secured to one part formed with a threaded portion adapted to be screwed into the other part for firmly connecting said parts together, said parts at the point of contact being provided with a pair of metallic ferrules, a button operated contact co-acing with said member, said contact being electrically connected with one of said ferrules, a lamp adjacent the end of the cane opposite the grip, a conductor connected with the other of said ferrules and with one side of said lamp and a battery arranged in said body, a conductor connecting one side of said battery with the other side of said lamp, and means for connecting said battery with said member having the threaded portion whereby when said button is operated for actuating said contact the circuit of said lamp will be closed.

1,574,624. TIMBER-DRAWING APPLIANCE. THOMAS GREAVES, WILLIAM HENRY DARBOURNE, and VINCENT WARNER, Mansfield, England, assignors to The Littlejack Engineering Co. Limited, Mansfield, England, a Company registered under the laws of Great Britain. Filed Nov. 28, 1923. Serial No. 677,475. 3 Claims. (Cl. 254—176.)



1. A timber drawing appliance of the class described, comprising a pair of side plates, an inwardly directed supporting member upon the inner side of one of said plates, a bearing plate upon the outer side of said plate, a main shaft mounted in said supporting member and the other of said side plates, a counter-shaft mounted in said supporting member and said bearing plate, an anti-slip chain drum upon said main shaft, an interiorly toothed hollow cylindrical extension upon one side of said chain drum, a pinion barrel upon said countershaft provided with teeth for meshing with the teeth of said hollow extension, ratchet teeth upon one side of said pinion barrel, a spring-pressed stop pawl for engaging said ratchet teeth, an operating handle having a recessed strap surrounding said ratchet teeth, and an actuating pawl carried by said strap for engaging said ratchet teeth for rotating said pinion barrel and said chain drum for winding said chain.

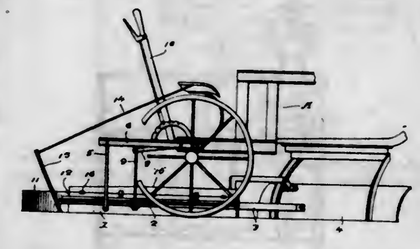
1,574,625. HYDROCARBON BURNER. GEORGES EDOUARD GRIMMEISEN, Paris, France. Filed Oct. 24, 1922. Serial No. 596,681. 3 Claims. (Cl. 158—94.)



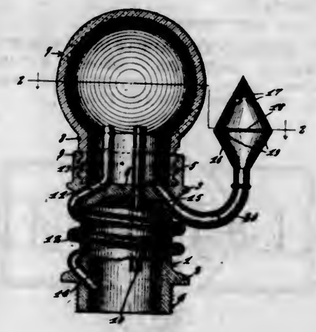
3. A hydrocarbon burner comprising inner and outer wick tubes, a tubular wick arranged between the wick tubes, the said inner wick tube being also a conduit for air, a cracking plate arranged above and heated by the flame of the wick to disassociate the hydrocarburets and provided with an opening therethrough for the passage of air and such disassociated hydrocarburets, and a diffuser plate arranged above and in spaced relation to the cracking plate and providing a mixing chamber there between, supporting means for the cracking plate and diffuser and including means to permit the relative adjustment of the cracking plate and diffuser towards and from each other to vary the width of the space between them as required.

1,574,626. POLISH-APPLYING DEVICE. OTTO E. HACKMAN, Fort Wayne, Ind. Filed May 6, 1925. Serial No. 28,468. 1 Claim. (Cl. 15—139.)

A polish applying device, comprising a container, a cap for closing the same, a tubular extension on the cap, a tubular member having a portion passing through the extension and through a hole in the cap, the lower part of the member being reduced to form a space between itself and the extension, a coiled spring in said space bearing against the shoulder formed between the reduced part and the large part of the member for holding the member in its outermost position, a plug closing the lower end of the reduced portion, said portion having holes therein above the plug, a swab connected with the outer end of the tubular member by tongues punched from the tubular member which form openings for permitting liquid in the member to saturate the swab.



1,574,627. ATTACHMENT FOR PLOWS. JOHN W. HAINES, Chanute, Kans. Filed Aug. 25, 1922. Serial No. 584,312. 1 Claim. (Cl. 97—6.)

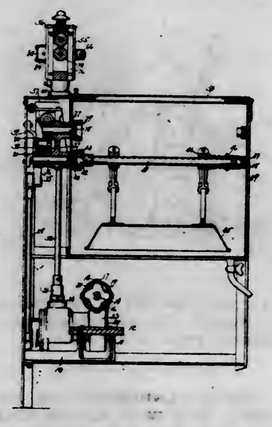


The combination with an agricultural machine, of a rearwardly and downwardly disposed arm rigidly secured to the machine, an adjusting lever mounted upon the outer end of said arm for vertical pivotal movement, vertically spaced bearing arms included in said lever, a fork mounted for horizontal pivotal movement between said bearing arms, a rotary member mounted in said fork, a plurality of penetrating elements extending from the rotary member, an upwardly and rearwardly curved toothed arm extending from the rigid arm in the path of the lever and means carried by the arm to engage the tooth of the lever and hold the latter in adjusted position.

1,574,628. ROAD-GRADER ATTACHMENT. JOSEPH HALDA, Purcell, Kans. Filed June 18, 1924. Serial No. 720,855. 1 Claim. (Cl. 37—155.)

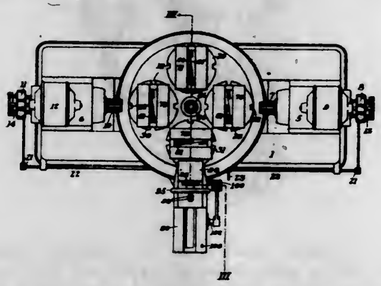
A device of the character described including a scraper blade, supporting means for said blades, means carried by the support whereby to raise and lower said blade and a longitudinal strip hingedly connected to the upper edge of said blade and adapted to be inoperatively disposed against the outer face of the blade and adapted to be moved to rest upon the upper edge of the blade for increasing the height of the same.

1,574,629. VAPOR CONDENSER FOR AUTOMOBILE RADIATORS. KURT W. E. HAMANN, Trumbull, Conn. Filed Feb. 4, 1925. Serial No. 6,804. 3 Claims. (Cl. 257—25.)



1. A condenser device of the type described, comprising a tubular body member having one end threaded for insertion into the filling opening of an automobile radiator, and further having a partition formed upon the interior thereof to divide the same into an upper and lower compartment, means to provide a condensing chamber threadably secured in said upper compartment, a vapor tube extending through said partition for the admission of vapor to said condensing chamber from the radiator, an auxiliary condenser tube having one end extended through said partition in the said chamber and having its other end opening downwardly into said radiator opening to convey condensed liquid back into said radiator from said chamber and further acting to condense any vapor not condensed in said chamber, and an air relief device leading from the lower portion of said chamber and opening into the atmosphere.

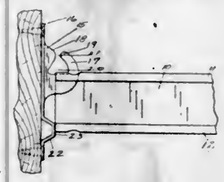
1,574,630. WASHING MACHINE. FREDERICK A. HART, New Britain, Conn. Filed Jan. 20, 1921. Serial No. 438,782. 2 Claims. (Cl. 68—19.)



1. A frame, a washing receptacle mounted in the frame, a rock shaft extending into the washing receptacle, a washer frame including a bar, said shaft and bar having their ends formed with a socket on one part to receive and retain the adjacent end of the other part while per-

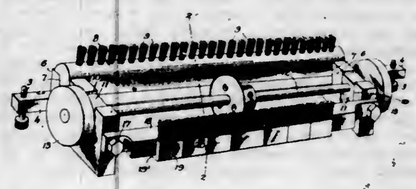
mitting removal thereof by a tipping movement of said bar, means for securing the bar and rock shaft together for rocking movement and against relative lateral move-

ment, and means for removably securing the opposite end of said bar against lateral movement and within the washing receptacle.



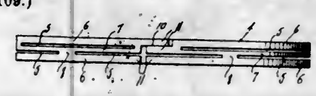
1,574,631. METHOD AND APPARATUS FOR THREADING METAL ARTICLES. GEORGE E. MIRFIELD, Youngstown, Ohio. Filed Apr. 22, 1922. Serial No. 556,114. 14 Claims. (Cl. 10—132.)

3. In the method of successively machining two surfaces of an article, machining articles in a successive manner and simultaneously machining a portion of two articles, the steps of successively centering the articles to be machined on axes movable about another axis, successively bringing each article so centered into machining relation to two machining tools as the articles are moved about said axis, rotating each article for a portion of a cycle about the axis on which it is centered after the first machining and before the second machining, and simultaneously moving both machining tools into machining relation to two articles whereby one portion of each article is machined by one tool and the other portion by another tool.



1,574,632. CURTAIN ROD. CARL EMIL MOLLER, Jamestown, N. Y. Filed May 3, 1924. Serial No. 710,919. 2 Claims. (Cl. 156—22.)

1. The combination with a flat faced curtain rod, the upper and lower edges of which are roller over to form parallel channels having openings in the upper and lower walls, of supporting brackets each comprising a base plate having an integral projection therefrom, at the outer upper edge of which is a hook having a tip upwardly and inwardly inclined to provide a recess, and a second integral projection above said first projection, forming with said hook a narrow entrance passage into said recess, said rod being mounted by slipping the upper channel over said first named projection at an angle into

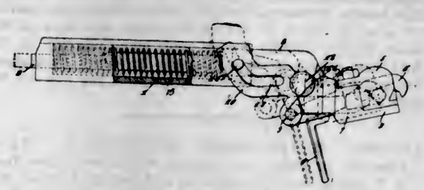


said recess until the opening in the rod is above said hook and then swinging said rod into the horizontal position said hook entering said opening and the outer wall of the opening bearing against the shank of the hook within said recess and the end of the upper wall beyond said opening being below said second projection.

1,574,633. PRINTING-PRESS ATTACHMENT. ELIJAH GUY MYOVER, Independence, Kans. Filed Dec. 4, 1924. Serial No. 753,884. 7 Claims. (Cl. 164—99.)

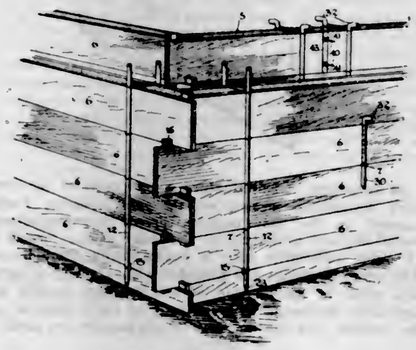
1. In combination with a paper carrying roller, means for retaining the paper against said roller, and means for forming a line of perforations in said paper while travelling, said means consisting of brushes bearing against the paper and an intermediate perforating device.

1,574,634. PISTON RING. DEAN M. SOLENBERGER, Kansas City, Mo. Original application filed Apr. 9, 1924, Serial No. 705,172. Divided and this application filed Jan. 25, 1926. Serial No. 83,715. 2 Claims. (Cl. 74—109.)



1. A one piece ring having an upper and a lower circumferential series of slots, the said ring being provided with a stepped split joint comprising upper and lower overlapping tongues, the slots in one series being staggered with respect to those in the other series, one of the lower slots extending circumferentially across the lower tongue to divide said tongue into two portions, and the line of overlap of said tongues being disposed to one side of the circumferential axis of the ring.

1,574,635. THREAD CUTTER FOR LOOMS. JAMES ALEXANDER SORRELLS, Gainesville, Ga., assignor to Draper Corporation, Hopedale, Mass., a Corporation of Maine. Filed Jan. 3, 1924. Serial No. 684,207. 6 Claims. (Cl. 139—303.)

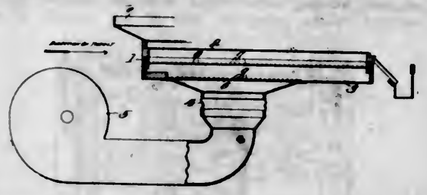


6. In a loom, a temple stand, a spring pressed member slidably mounted therein, a head connected with said

member, a stationary cutter carried by the head, cutter means movably mounted in the head and having a hook-

shaped cutting part for cooperating with the stationary cutter and having an angle shaped slot in its rear part and a pin connected to the stand engaging the slot.

1,574,636. CONCRETE FORM. HAROLD ROBERT SUITER, Red Lodge, Mont. Filed Apr. 12, 1923. Serial No. 631,621. 11 Claims. (Cl. 25—131.)

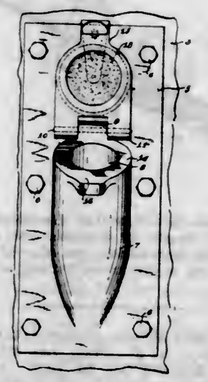


1. In a form, the combination of a loop having means whereby the same may be engaged by holding members, and spring clips secured to said loop and having curved portions for engagement with two adjacent form boards whereby to hold the form boards in position.

6. A form for walls comprising a plurality of form boards arranged in courses, tie loops extending across the courses and having their ends arranged outwardly of the form boards, holding rods extending through the extended terminal portions of said tie loops for holding the form boards in edge to edge relation, spring clips carried by said tie loops and adapted to engage two adjacent form boards whereby to cooperate with the holding rods in securing the form boards in position, board holding members secured to said tie loops and cooperating with the spring clips to hold the form boards against lateral movement, said holding rods having flat surfaces adapted to be turned into opposed relation to the form boards whereby to release the holding rods from locking engagement with the form boards, one edge of the flat surface of each holding rod being rounded whereby the holding rods may be conveniently turned.

1,574,637. AIR BAFFLE. HENRY MOORE SUTTON, WALTER LIVINGSTON STEELE, and EDWIN GOODWIN STEELE, Dallas, Tex. Filed July 31, 1923. Serial No. 654,869. 13 Claims. (Cl. 209—502.)

1. A table for dry separation of elements of a mass, comprising a pervious separating deck, an air-pressure supply for floating said mass on the top of the deck, and a baffle plate between the said air-supply and the sep-

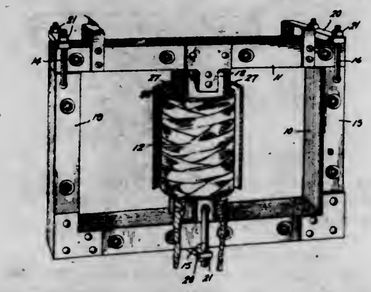


arating deck, the said baffle plate comprising inclined tongues that feed the air upward at an angle to the deck, for the purpose described.

1,574,638. PROCESS OF PRESERVING POWDER OF KONJAC TO BE USED FOR MANUFACTURING PASTE OR SIZING MATERIAL. KATSUNAGA TAMANAHA, Toyotama-gun, Tokyo-fu, Japan. Filed Oct. 12, 1923. Serial No. 668,166. 3 Claims. (Cl. 99—1.)

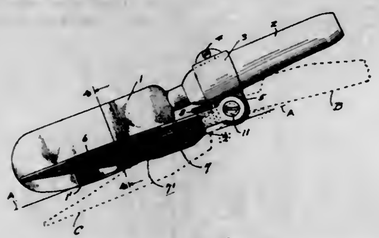
1. The process of preserving konjac powder, consisting in mixing therewith a substance having an acid reaction therewith.

1,574,639. OIL FILLER AND BREATHER. PAUL THAMM, New York, N. Y., assignor, by mesne assignments, to C. Blair Woodrow. Refiled for abandoned application Serial No. 384,948, filed May 28, 1920. This application filed Dec. 27, 1922. Serial No. 609,347. 7 Claims. (Cl. 121—194.)



1. In an oil-filler and breather cap for filling tubes for a crank case of internal combustion engines, a closure therefor including an annular member hingedly connected to said crank case adjacent the mouth of said tube, a flexible diaphragm secured to the upper face of said annular member and means for resiliently pressing said diaphragm against said annular member and adapted normally to effect an air tight seal between said diaphragm and annular member but to permit flexing of the diaphragm away from said member due to variations of pressure within the crank case.

1,574,640. STATIONARY INDUCTION APPARATUS. MAGNUS UNGER, Pittsfield, Mass., assignor to General Electric Company, a Corporation of New York. Filed May 26, 1921. Serial No. 472,879. 5 Claims. (Cl. 175—356.)

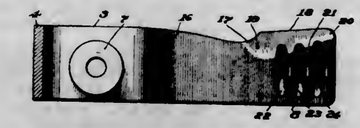


1. Stationary induction apparatus for metal melting furnaces comprising a U shaped core member, a T shaped core member arranged to cooperate with said U shaped

core member to form a three-legged core, the middle leg of said core being the leg of said T shaped member, a primary winding surrounding said leg adapted to be inserted in the secondary loop of the crucible of an

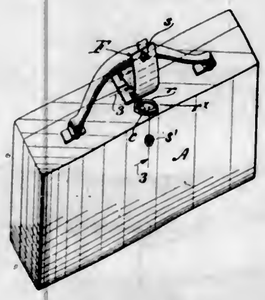
electric induction furnace, and means for securing said winding to said leg whereby said winding may be moved with said T shaped core member and thereby inserted in and removed from said secondary loop.

1,574,641. PAPER-HANGER'S KNIFE ATTACHMENT. GAUTIER A. CHRISTOPHERSON, San Francisco, Calif. Filed Aug. 17, 1925. Serial No. 50,880. 4 Claims. (Cl. 216—61.)



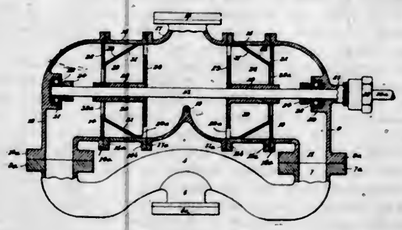
1. A device of the character described adapted for attaching to the handle of a knife, and provided with a rounding guard overhanging the edge of the knife for forcing paper into a corner in cutting the same with the knife.

1,574,642. LUBRICATING COMPOSITION. IDA M. CUSTER, Rahway, N. J. Filed Jan. 28, 1921, Serial No. 440,756. Renewed Oct. 29, 1925. 4 Claims. (Cl. 87—9.)



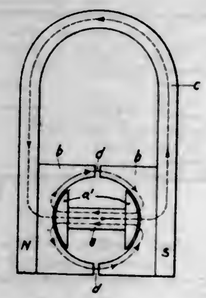
1. A mobile penetrative fluid lubricating composition, comprising deflocculated graphite and coal tar oil.

1,574,643. FILLING REPLENISHING SHUTTLE. HARRY A. DAVIS, Hopedale, Mass., assignor to Draper Corporation, Hopedale, Mass., a Corporation of Maine. Filed Oct. 26, 1925. Serial No. 64,753. 7 Claims. (Cl. 139—207.)



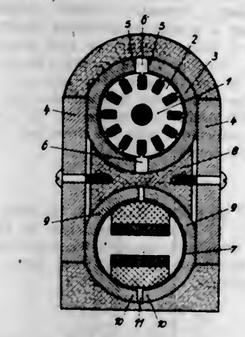
1. An automatic filling replenishing shuttle having a bobbin holder comprising bobbin holding jaws recessed on their inner faces for engagement with the bobbin rings, and a double bevel on the inner face of the bobbin holding jaw, one bevel extending downwardly from the top edge of the jaw for the ready entrance of a bobbin between the jaws and the other bevel having its greatest depth of cut at its inner end back of the inner bobbin holding recess and longitudinally of the jaws and progressively decreasing in depth throughout its length from its inner end towards the end of the jaws.

1,574,644. HAND-CARRIED RECEPTACLE. MAYER FIERING, Brooklyn, and ISIDOR SCHNEIDER, New York, N. Y., assignors to themselves and Isidore Fiering, New York, N. Y., and Sigmund Weintraub, Brooklyn, N. Y. Filed Mar. 21, 1925. Serial No. 17,214. 1 Claim. (Cl. 150—37.)



As an article of manufacture, a receptacle of the character designtaed, formed with a coin reservoir fixedly mounted in the body portion thereof and protuberant therefrom, and consisting of a tubular casing formed at its outer extremity with a substantially semi-circular coin retaining flange and provided with a spring-actuated coin plate, in combination with a lockable closure flap articularly connected with the body of the receptacle, for the purpose, and substantially in the manner set forth.

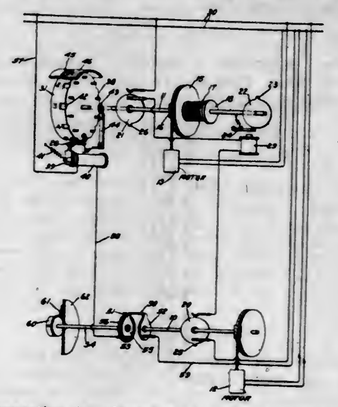
1,574,645. EXPLOSIVE-MIXTURE COMPRESSOR. JAMES I. DEMMILL, Pontiac, Mich., assignor of one-half to Wm. A. Ludlow, Pontiac, Mich. Filed Jan. 23, 1924. Serial No. 688,114. 4 Claims. (Cl. 103—107.)



1. In a device of the class described, a single intake and double discharge manifold pipe, an elbow connected to each discharge of said pipe, a nipple connected to each of said elbows, a three-way coupler connecting said nipples, a shaft extending axially through said nipples, a fan in each of said nipples keyed to said shaft and having fan blades provided with beveled outer edges, said fans each having a central annular inlet and a peripheral annular outlet, and a thimble positioned within each of said nipples surrounding said fan and formed to correspond with the beveled edges of said blades.

1,574,646. MAGNETO-ELECTRIC IGNITION MACHINE. WALTER HÄHNLE, Stuttgart-Degerloch, Germany, assignor to Robert Bosch Aktiengesellschaft, Stuttgart, Germany. Filed Oct. 27, 1921. Serial No. 510,981. 5 Claims. (Cl. 171—209.)

1. A magneto-electric ignition device comprising, in combination, a magnet, pole-shoes formed on said magnet and having opposed arcuate surfaces, an armature arranged to be excited by said magnet, said armature having shoes with arcuate surfaces, the arcs of which are of less extent than the arcs of said pole-shoes, said pole shoes having opposed prolongations to form a reduced air-gap between the ends of said pole-shoes, the magnetic resistance of which is such that the magnetic resistance over said pole-shoes and through said air-gap is greater than the magnetic resistance over said pole-shoes and said armature, but is not greater than the magnetic resistance of the magnet itself.

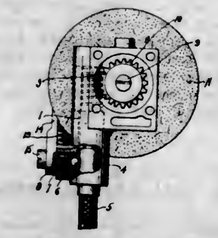


1,574,647. DYNAMO MACHINE. WALTER HÄHNLE and AUGUST KAZENMAIER, Stuttgart, Germany, assignors to Robert Bosch Aktiengesellschaft, Stuttgart, Germany. Filed Aug. 6, 1923. Serial No. 656,079. 5 Claims. (Cl. 171—209.)

1. A combined lighting and ignition generator comprising a plurality of armatures, common field magnetic means, and means forming shunts for the lines of force of the fields of said armatures whereby said lines of force close without passing through said field magnetic means.

1,574,648. SIGNAL SYSTEM. JOHN L. HALL, Schenectady, N. Y., assignor to General Electric Company, a Corporation of New York. Filed Jan. 28, 1922. Serial No. 532,382. 6 Claims. (Cl. 177—337.)

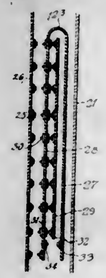
1. A signal system comprising a continuously rotating shaft located in a receiving station, a rotary indicator, a releasable driving connection between said shaft and said indicator arranged to engage and drive said indicator in a predetermined relation with said shaft, an electromagnetic device for arresting the rotation of said indicator in opposition to said driving connection whereby



said connection is released, and selective means located in a sending station for energizing said electromagnetic device when said indicator has been turned by said shaft to a predetermined indicating position.

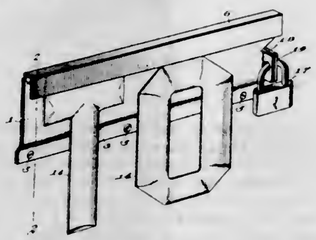
1,574,649. COMPASS AND MOUNTING. FRANK P. HIBLER, Hubbard, Ohio. Filed July 27, 1925. Serial No. 46,424. 5 Claims. (Cl. 248—20.)

1. In an apparatus of the character described, a support having an opening therein, a plate secured upon the support and having an opening adjacent the first-named opening, a compass unit adapted to fit within said openings, a pivotal mounting for the compass unit permitting it to swing from inoperative position in a vertical plane into operative position in a horizontal plane, and means for limiting the outward swinging movement.



1,574,650. GRINDER. FRANKLIN E. HIERS, Anderson, Ind. Filed Mar. 29, 1924. Serial No. 702,913. 2 Claims. (Cl. 74—7.)

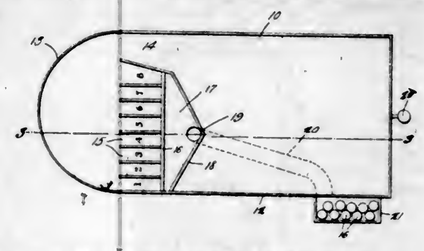
1. A device of the class described comprising a casing, a vertically arranged worm shaft journaled therein, a transversely arranged shaft journaled in the casing, a gear thereon meshing with the worm on the vertical shaft.



interchangeable brackets adapted to be connected with the casing for supporting the same from a suitable support and means for attaching a flexible drive shaft to the vertically arranged shaft.

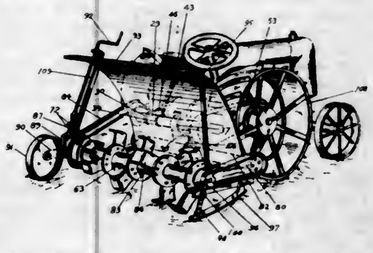
1,574,651. SLEEPING GARMENT. CARSON HILDRETH, Lincoln, Nebr. Filed May 19, 1923. Serial No. 640,205. 2 Claims. (Cl. 2—97.)

1. As a new article of manufacture, a garment formed with a pocket at the back thereof, a pad accommodated in said pocket, said pad having inner and outer folds, and an interlining accommodated between the inner and outer folds of said pad, together with fastener means to secure the interlining to one of the folds of the pad, and fastener means to hold a fold of the pad to one of the walls of the pocket.



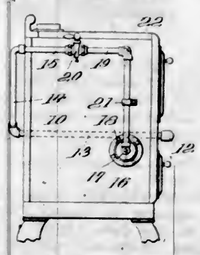
1,574,652. SIGN. ALBERT HOLDER, Los Angeles, Calif. Filed Apr. 22, 1925. Serial No. 25,057. 6 Claims. (Cl. 40—140.)

3. In a sign of the character described, a bar-like supporting section having a rearwardly off-set lower edge portion adapted to be attached to a support, a bar-like clamping section having a body adapted to slide close to said supporting bar, with the upper edge of the clamping bar continuously parallel to the upper edge of the supporting bar, to and from position to embrace the upper edge portion of the supporting bar, and a sign unit having a hook-like hanger portion at its upper end adapted to engage with the upper edge portion of said supporting bar and to be held in place on the supporting bar by the upper edge portion of said clamping bar.



1,574,653. GAME. EINER M. HOLM, Detroit, Mich. Filed Aug. 15, 1925. Serial No. 50,496. 3 Claims. (Cl. 273—124.)

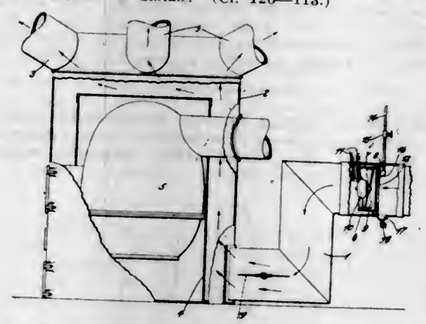
1. A game apparatus comprising an inclined board having an upstanding marginal flange curved at one end of the board, a plurality of pockets extending transversely across the board adjacent the curved portion of the flange and opening toward said curved portion, said pockets being arranged to provide a passage between one of the pockets and the adjacent portion of the flange, a compartment extending across one end of all of the pockets, a movable partition strip dividing the pockets from the compartment, said strip being common to and providing



a bottom wall for said pockets, yieldable means to hold the partition strip in place and means to move the partition strip to provide communication between the pockets and compartment.

1,574,654. POWER-DRIVEN CULTIVATOR. ARTHUR CLIFFORD HOWARD, Moss Vale, New South Wales, Australia. Filed Sept. 23, 1925. Serial No. 58,162. 5 Claims. (Cl. 97—40.)

1. In combination, a tractor, a sleeve mounted on the draw-bar thereof, a power transmitting shaft journalled in said sleeve, a frame pivoted on said power shaft to swing vertically thereon, a tool carrying shaft journalled in said frame, means for adjusting said tool shaft vertically, a driving connection between the tool shaft and the power shaft, means for adjusting the sleeve about a vertical axis coincident with the draw-bar, and a chain sprocket on said power shaft.

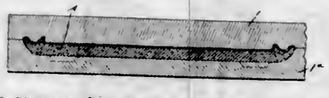


1,574,655. GAS RANGE. HARRY W. HUNTER, Baltimore, Md., assignor, by mesne assignments, to Union Trust Company of Maryland, trustee, Baltimore, Md., a Corporation of Maryland. Filed Jan. 5, 1922. Serial No. 527,141. 4 Claims. (Cl. 126—39.)

1. The combination with a gas range provided with an oven and having a normally closed opening in one end wall of the oven adapted to receive a thermostatic device, of a gas manifold terminating in a short branch

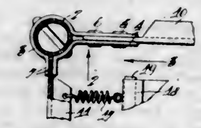
overlapping said oven end wall, a burner extending into the oven through said end wall, and a removable conduit member consisting of two angularly disposed portions lying in a plane parallel with said end wall, one of said portions being connected to the burner and the other with said manifold branch, and a joint between the portions of said conduit member located opposite said opening, whereby a similar conduit member having a thermostatic device located at said joint and extending into the oven may be readily substituted for the first mentioned conduit member.

1,574,656. VENTILATING DEVICE. GEORGE F. ISGRIG, St. Louis, Mo., assignor of one-half to William H. Moore, St. Louis, Mo. Filed June 22, 1925. Serial No. 38,615. 3 Claims. (Cl. 126—113.)



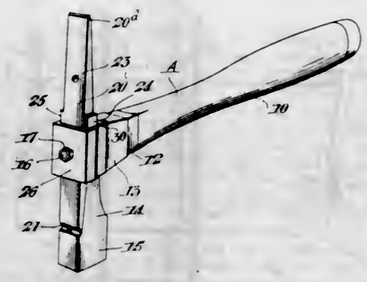
1. The combination with a hot air furnace shell having distributing pipes leading therefrom and an inlet pipe opening thereinto, of a pipe section within and of smaller diameter than said inlet pipe, a baffle between said pipe section and said inlet pipe, and an air propelling device in said pipe section.

1,574,657. STEEL-TRUSSED STRUCTURE. JOHN GRANT JACKSON, Chatham, Ontario, Canada. Filed Feb. 10, 1925. Serial No. 8,234. 7 Claims. (Cl. 72—85.)



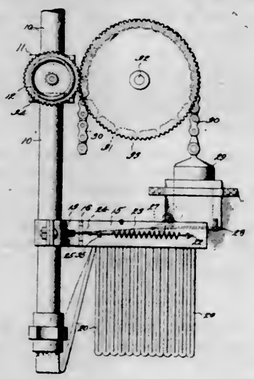
1. A cement reinforced steel structure comprising independent longitudinal steel members, suitably spaced transverse steel members connecting the respective longitudinal steel members together, said longitudinal and transverse members encased in cementitious material, opposed longitudinal flanges on the sides of the structure, and tieing means extending between the opposed flanges.

1,574,658. HARD-RUBBER ARTICLE AND METHOD OF MAKING SAME. JOHN F. JOHNSTON, Akron, Ohio, assignor to The Miller Rubber Company, Akron, Ohio, a Corporation of Ohio. Original application filed Mar. 3, 1923, Serial No. 622,581. Divided and this application filed June 6, 1925. Serial No. 35,314. 4 Claims. (Cl. 18—53.)



1. The process of producing a substantially solid rubber article, which consists in incorporating a blowing agent in the raw rubber compound, forming the unvulcanized article therefrom slightly smaller than the finished article, assembling a mold around the unvulcanized article, and applying heat to the mold whereby the article is expanded to the size and shape of the mold and vulcanized therein.

1,574,659. FOLDING BED. SYLVANUS K. JOHNSTON, Bradner, British Columbia, Canada. Filed Apr. 30, 1925. Serial No. 27,109. 1 Claim. (Cl. 5—288.)

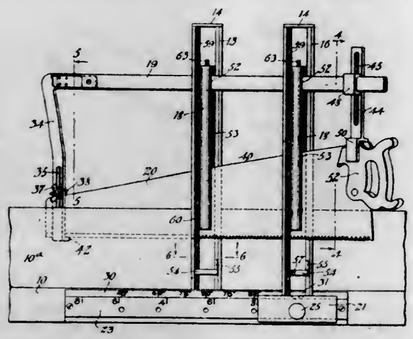


A detachable bed-frame, comprising in combination, corner posts, side rails and end rails, each corner post having a member secured to it which is bent to encircle it, the ends of this encircling member bent to extend outward from the post and spaced apart to receive between them an end of a side rail, the spaced apart ends being secured together by two rivets to engage notches in the end of the side rail, the post encircling member having also a portion doubled out from the post to receive an end of the end rails between the doubled portion and having portions removed from the bend of the doubled portion to afford access of the engaging end rail thereto.

1,574,660. BRICKLAYER'S COMBINED HAMMER AND SCUTCH. WALTER JOHN KIMBER, Ottawa, Ontario, Canada. Filed Nov. 9, 1923. Serial No. 673,762. 6 Claims. (Cl. 125—40.)

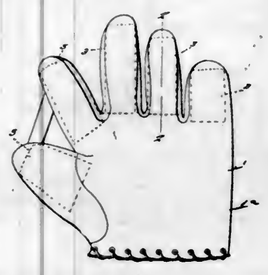
1. A tool for bricklayers comprising an adze head having integral therewith a hammer head and separate therefrom an interchangeable cutter, a handle having a central bore therein and means formed in the adze head adapted to detachably engage with the handle and the cutter respectively, a cap for the adze head and cutter member and securing means extending through the cap, the cutter member, the adze head and the handle.

1,574,661. VALVE-OPERATING DEVICE. REUBEN FREDERIC LAURENCE, Minneapolis, Minn. Filed May 4, 1923. Serial No. 636,742. Renewed Oct. 19, 1925. 2 Claims. (Cl. 299—80.)



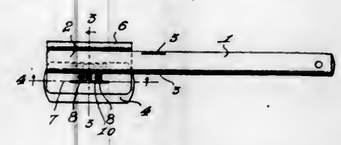
1. In a fire extinguishing apparatus, the combination with a hose supporting device and a valve for controlling a liquid extinguishing agent, of means including a weight operatively connected to the valve for opening the latter, a hingedly mounted support for the weight, a latch for holding the support against movement and means operatively connecting the latter and hose supporting device for actuating the latch to release the weight simultaneous with the removal of the hose.

1,574,662. PROCESS OF PRESERVING WOOD. RANDOLPH LEEDOM, Clifton, N. J., assignor to The Western Union Telegraph Company, New York, N. Y., a Corporation of New York. Filed June 4, 1923. Serial No. 643,427. 3 Claims. (Cl. 99—12.)



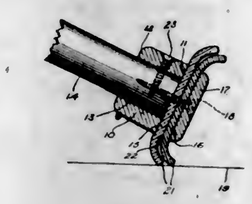
1. The process of preserving wood which comprises charring the surface of the wood to produce a hot dry char and applying a hot preserving medium to said hot surface.

1,574,663. ATTACHMENT FOR MITER BOXES. EMIL LESKE, Jr., New York, N. Y. Filed Apr. 27, 1925. Serial No. 26,219. 1 Claim. (Cl. 143—89.)



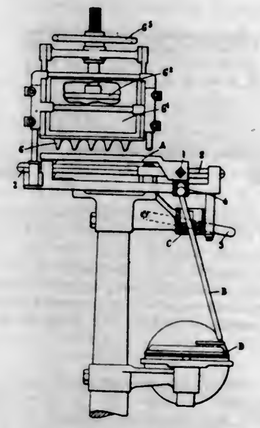
A device of the character described comprising a base, a hollow guide rigidly mounted on one side edge of the base and provided with vertical slots, a track at the other side edge of the base, a movable hollow guide provided with slots slidably mounted on the track, a post vertically movable in each guide, said post being provided with slots, a supporting bar mounted in the slots, clamping means at the opposite ends of the supporting bar for securing the opposite ends of a saw to the supporting bar, one of said clamping means being adjustable longitudinally of the supporting bar, said bar being slidable through the slots in the post and the saw being slidable through the slots in the guide means for locking the movable guide in one of a plurality of different positions at opposite sides of the transverse center of the base for producing varying angular cuts with the saw, plates slidably mounted in the hollow posts and carrying stops adapted to engage the lower end of said posts for limiting the downward movement of the posts and likewise the downward movement of the saw, and means on the plate engageable with the hollow guide for locking the plates in various vertical positions, lugs at the upper end of each guide and a resilient clip on the slidable posts adapted to engage the lugs for retaining the posts and likewise the saw in an inoperative position.

1,574,664. BASEBALL GLOVE. WALTER E. LONG, Philadelphia, Pa., assignor to George A. Reach, Philadelphia, Pa. Filed Aug. 12, 1925. Serial No. 49,807. 6 Claims. (Cl. 2—19.)



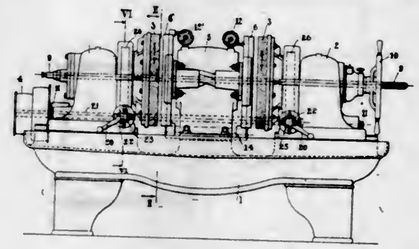
1. A base ball glove having a finger reinforcement of stiff inflexible material, which is curved on the arc of a circle corresponding substantially to the curvature of a base ball.

1,574,665. BLADE HOLDER. FRANK J. LOVIN, Mahnomen, Minn. Filed Sept. 14, 1925. Serial No. 56,361. 1 Claim. (Cl. 30—25.)



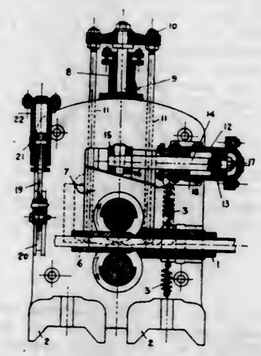
In a device for the purpose set forth, a handle comprising a tubular member having one end slotted longitudinally to provide spaced jaws, said handle inward of the jaws having grooved longitudinally, a clamp comprising a spring metal plate which is centrally rounded upon itself to form the same with a head, side plates extending in parallelism from the head, one of said side plates having an opening therethrough and being formed with outwardly rounded inwardly extending fingers disposed opposite the opening, a plate between the sides, contacted by the fingers, the second side and the said plate designed to receive a razor blade therebetween and the said fingers adapted to be contacted by one of the jaws of the handle and to be sprung by virtue of said contact to exert a pressure against the plate to cause the latter to exert a like pressure against the blade.

1,574,666. SURFACE CLEANER. WILLIAM B. LYNCH Brooklyn, N. Y. Filed Apr. 15, 1925. Serial No. 23,331. 5 Claims. (Cl. 15—245.)



1. A surface cleaning device comprising a block, a plurality of closely associated flexible blades secured to the block, the portions of the blades free of the block being concavo-convex in cross section and extending forwardly of the block, said concavo-convex blades cooperating with each other to cause the free ends of the blades to maintain a positive contact with the floor.

1,574,667. MECHANISM FOR IMPARTING TO A SUPPORT, CARRIER, OR THE LIKE, MOVEMENTS OF A DETERMINED CHARACTER. HUGH WATSON MACKENZIE, Yorkshire, England. Filed Sept. 27, 1921. Serial No. 503,569. 10 Claims. (Cl. 74—14.)

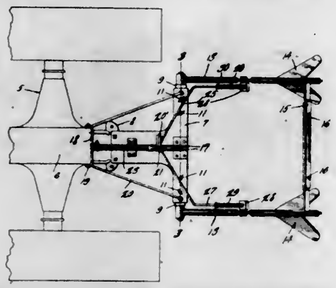


1. Apparatus comprising a movable member, position restricting means by which the movable member is permitted to move freely in or approximately in a plane in such a manner that when the movable member is moved any straight line on the movable member in said plane is maintained parallel to its original position or approximately so, a rocking arm, a support for the rocking arm located at a position between its ends about which the rocking arm may turn freely in all angular directions, a coupling connection between one end of the rocking arm and the movable member, a rotatable driver, and means driven by the rotatable driver connected with the rocking arm for mechanically imparting compound movements to the other end of the rocking arm, for the purposes set forth.

1,574,668. MACHINE FOR GRINDING BALLS. BASILE FRANÇOIS MAHÉ, Charenton, France. Filed Dec. 10, 1923. Serial No. 679,739. 6 Claims. (Cl. 51—130.)

1. A machine for grinding balls for ball-bearings, comprising grooved plates for receiving the balls, grindstones rotatably mounted opposite said plates, means for transferring the balls from one plate to the other, a support for said plates fixed to the frame, said plates being movable axially in their support and a spring interposed between each plate and its support.

1,574,669. TUBE-ROLLING MILL. UMBERTO MARCHI, Rivarolo, Liguria, Italy. Filed July 13, 1921. Serial No. 484,524. 1 Claim. (Cl. 80—14.)



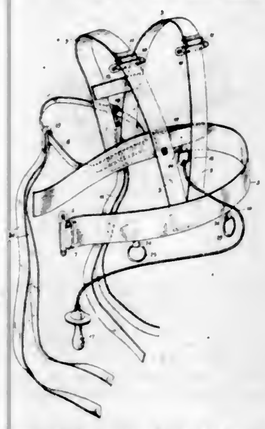
A tube rolling mill including in combination, a main support, ribs formed on said support, rotatable grooved rollers mounted within the support, means for effecting a constant feeding of a billet at each revolution of the rollers including a block provided with a bore having a diameter slightly larger than the exterior diameter of the tube to be rolled and also provided with longitudinal grooves in the opposite side edges thereof for slidable engagement with the ribs on the main support and for preventing lateral movement of the block relative to the rollers, the block being arranged to embrace the side surfaces of the rollers, and resilient means on the main support and associated with the block for maintaining the bore of the block in alinement with the axis of the grooves of the rollers.

1,574,670. PLOW ATTACHMENT FOR TRACTORS. JOHN A. MAREK, Yoakum, Tex. Filed Oct. 10, 1924. Serial No. 742,007. 3 Claims. (Cl. 97—47.)

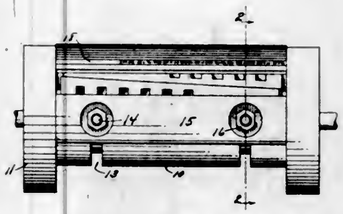
1. The combination with a tractor, of a transverse bar detachably associated with the tractor, earth breaking elements pivotally connected with the transverse bar

and extending rearwardly therefrom, a quadrant carried by the bar, a U-shaped seat carried by the upper end thereof, and adapted to embrace the differential housing

of the tractor, a bolt passing through the housing and the seat, and a lever cooperating with the quadrant and operatively connected with the earth breaking elements.



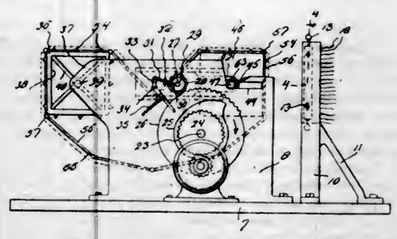
1,574,671. COMBINATION FENCE TOOL. MARTIN L. MAREK, Peoria, Ill., assignor of one-sixth to George A. Shurtleff and one-sixth to John M. Niehaus, jr., both of Peoria, Ill. Filed Apr. 2, 1925. Serial No. 20,259. 2 Claims. (Cl. 254—77.)



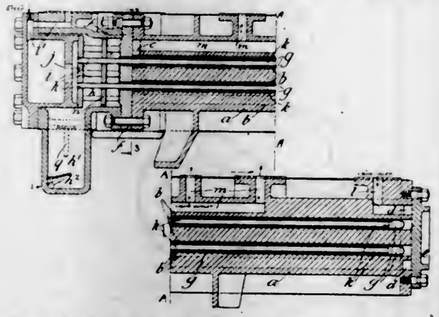
2. A device of the character described, comprising an elongated shank portion having at one end a section bent approximately at right angles thereto; a claw at the other end of the shank; and a rigid finger portion branching off at a sharp angle from the shank between said bent end and said claw and on the same side of the shank as said bent end with a tapered space between said finger portion and the shank from which it branches off, the bent end, the side finger, and the claw end of the device being in approximate alinement with each other, the bent end of the device and the spread of the claw both extending approximately in the same plane, the side finger being nearer to the claw than the bent end of the device with the inclined space between the finger and shank opening toward the claw end of the device.

1,574,672. SAFETY HARNESS FOR CHILDREN. CLARA MCCARROLL-DOULL, Butte, Mont. Filed July 3, 1924. Serial No. 724,171. 1 Claim. (Cl. 128—134.)

In safety harness of the class specified, a waistband having means for supporting the same from the shoulders of the wearer to diminish strain on the abdomen during movement of the wearer, and an enlarged loop fixed at the center of the back of the belt and having attaching devices freely slidable from side to side over the loose portion of the loop, the loop being sufficiently stiff to maintain its form and permit freedom of operation of the fastening devices thereon and the projection of the loop from the rear of the belt permitting unrestricted movement of the body of the wearer to different positions and effect a self-adjustment of the fastening devices to the various positions.



1,574,673. PRINTING PRESS. GEORGE B. MCCARTY, Little Rock, Ark. Filed Mar. 25, 1925. Serial No. 18,286. 4 Claims. (Cl. 101—377.)

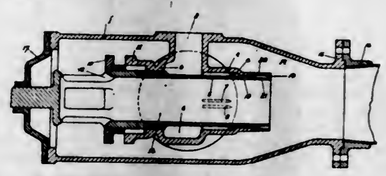


1. In combination, a printing press cylinder, a slug including an elongated body portion, and a type carrying portion projecting laterally from one edge of the body portion and adapted to be arranged in contacting engagement with the adjacent slug on said cylinder, spacing bars arranged between the body portions of the adjacent slugs, and means for locking the slugs in fixed relation to the cylinder.

1,574,674. COMBINED SIGNBOARD AND FLASHER MECHANISM. WALTER W. MCDANIELS, Waupun, Wis. Filed May 13, 1925. Serial No. 30,068. 10 Claims. (Cl. 200—46.)

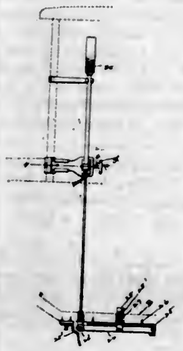
1. An apparatus of the class described including a supporting structure, an endless member including a plurality of units, projections extending from the units, means for operating the endless member intermittently, a switch board including a plurality of circuit closers engageable by the projections, and means for moving one of the units toward the switch board during an idle interval of the endless member, so that the projections will operate the circuit closers.

1,574,675. HEAT-EXCHANGE APPARATUS. JOHN GRAVES MCKEAN, Mount Vernon, and ROBERT FREDERICK JONES, Glasgow, Scotland. Filed Mar. 5, 1921. Serial No. 449,813. 9 Claims. (Cl. 257—238.)



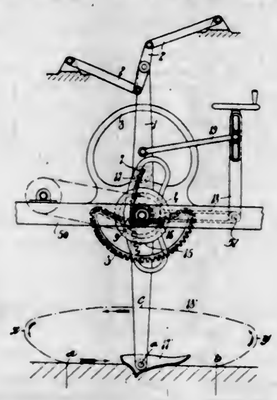
1. A heat exchange apparatus comprising a main heater body member having a plurality of passages extending therethrough from end to end, the said ends of the body member having recesses connecting the ends of the passages, and end plates secured to the body and enclosing the recesses whereby the said passages are made to constitute a continuous duct extending toward the center of said body member.

1,574,676. PROCESS OF PRODUCING A RUBBER COMPOUND. HAROLD A. MORTON, Akron, Ohio, assignor to The Miller Rubber Company, Akron, Ohio, a Corporation of Ohio. Filed Apr. 8, 1924. Serial No. 705,195. 1 Claim. (Cl. 18—53.)



The process of producing vulcanized rubber which consists in mixing rubber with sulphur and an accelerator, calendering the same into a sheet of suitable thickness, applying an activator to the surface of the sheet, rolling the sheet upon itself, and curing the same.

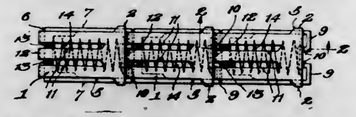
1,574,677. EJECTOR FOR THE DELIVERY OF GAS AND AIR IN LARGE QUANTITIES. JAKOB MULDER and DIRK CHRISTIAAN ENDERT, Rotterdam, Netherlands. Filed Aug. 23, 1924. Serial No. 733,858. 12 Claims. (Cl. 230—13.)



1. A steam gas or vapour operated gas or air ejector for the delivery of large quantities having an annular nozzle centrally arranged in the casing of the ejector for the inlet of the working medium, characterized by the fact that in rear of the smallest cross section (18) of the annular nozzle the outer wall (4) and the inner wall of the nozzle (5) which is independent of the former run concentrically for a considerable distance and the space (6) between them is divided into a circle of passages (8) by radial or helical ribs (7) extending in an axial direction whilst both walls of the nozzle are centered relatively to each other by said ribs.

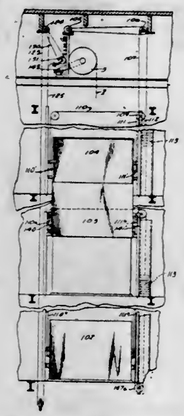
1,574,678. SIGNAL DEVICE. JAKE NIBLER, La Grande, Oreg. Filed Oct. 29, 1924. Serial No. 746,594. 1 Claim. (Cl. 74—81.)

A vehicle signal operating means comprising an elongated bracket adapted to be secured to the underside of the floor board, and having a central opening therein, lugs depending from one end of said bracket, a lever pivoted at one end on said lugs and normally arranged parallel with said bracket projecting a slight distance beyond the forward end of said bracket, a vertically disposed operating rod connected at the forward end of said lever and operating through an opening in the floor board, a shank bifurcated at one end and straddling said lever to which it is secured, said shank sliding through the central opening of said bracket, a foot pedal carried by the upper end of said shank and utilized to operate said lever, and a coiled spring surrounding said shank and interposed between the bracket and said pedal for normally holding the lever parallel with the bracket and the signal inactive.



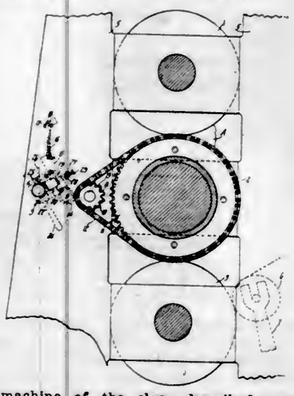
1,574,679. SUPPORTING AND PROPELLING MECHANISM FOR MOTOR VEHICLES. FRITZ ALBERT NILSSON, Karlskoga, Sweden. Filed Mar. 24, 1922. Serial No. 546,503. 5 Claims. (Cl. 180—8.)

1. A supporting and propelling mechanism for motor vehicles, comprising a frame, legs having feet thereon to support said frame, means for causing said legs to move with their feet rearwardly relative to the frame along a substantially straight line with the feet in contact with the ground, to lift the legs at the end of said movement and move same so as to cause the feet thereof to describe a curved path having rounded off edges



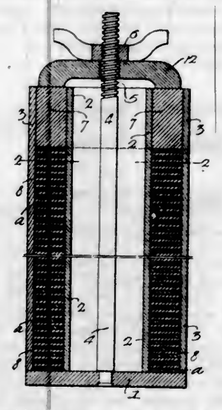
and an extended convex top, and means controlled by the legs themselves to cause the legs to move with their feet at an approximately constant speed during said rearward movement and to cause the legs to move with their feet at a successively accelerated speed along the first half portion of said curved path and at a successively retarded speed during the last half portion of said curved path and said means being further so constructed that the time required for each foot to move along said curved path is substantially equal to the time required for the foot to move along said straight line.

1,574,680. SEPARABLE-LINK BRACELET OR CHAIN. FREDERICK W. NITTEL, Attleboro Falls, Mass., assignor to M S Company, Attleboro, Mass. Filed Sept. 25, 1925. Serial No. 58,595. 8 Claims. (Cl. 59—79.)



1. A separable link construction comprising a plurality of box links each having one end wall slotted and the opposite end wall formed with spaced guide openings, a plurality of connecting U-links having their bases slidable between the top and bottom walls of the respective box links and their side arms slidable through the end wall guide openings, the free ends of the side arms being extended inwardly into the slotted end of an adjacent box link, and means on the inturned ends of the side arms extending through the slot of the slotted end walls for engaging the second named walls of adjacent box links for spacing the respective box links.

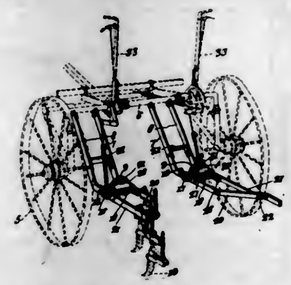
1,574,681. GATE-OPERATING MECHANISM FOR ELEVATORS. CLIFFORD NORTON, Orange; NEVILLE S. DICKINSON, Glen Ridge; and RUMSEY W. SCOTT, Montclair, N. J., assignors to Elevator Supplies Company, Inc., Hoboken, N. J., a Corporation of New Jersey. Filed Apr. 30, 1921. Serial No. 465,906. 35 Claims. (Cl. 187—52.)



28. In combination, a hatchway and three or more gates along the same, a car, a gate-operating motor common to all gates, an "open" magnet and a "close" magnet common to all the gates and controlling in part their opening and closing movements, means operated by the movement of each gate independently and arranged to control the movement of the gates, a selector arranged to connect in said gates in succession correspondingly with the movement of the car, mechanism arranged to automatically cause said selector to be operative only when the car has slowed down to stop at a floor, "open" and "close" buttons in the car and mechanism operated thereby by which the operator in the car may initiate an opening or closing movement of the gates but only of the gate where the car is.

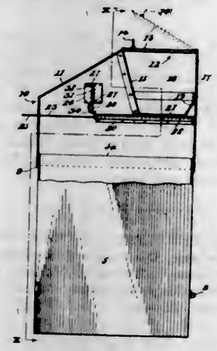
1,574,682. MACHINE FOR CALENDERING AND CUTTING SHEETS FORMED FROM PLASTIC MATERIALS. RALPH G. NULL, Indianapolis, Ind., assignor to G & J Tire Company, Indianapolis, Ind., a Corporation of Indiana. Filed Mar. 11, 1924. Serial No. 698,352. 4 Claims. (Cl. 18—2.)

1. A machine of the class described comprising in combination, top, intermediate and bottom calendar rolls, a revoluble backing roll spaced from the intermediate calender roll around which a calendered sheet may be passed from the bight between the top and intermediate calender rolls to the bight between the intermediate and bottom calender rolls, and a multiplicity of cutters coacting with said backing roll for slitting the sheet longitudinally as it is passed between successive bights of the calender rolls, whereby a calendered sheet may be cut into strips without subjecting the cut strips to a distorting tension.



1,574,683. MOLD. CARL F. OGREN, Trenton, N. J., assignor to Thermoid Rubber Company, Hamilton Township, N. J., a Corporation of New Jersey. Filed June 23, 1924. Serial No. 721,811. 4 Claims. (Cl. 18—43.)

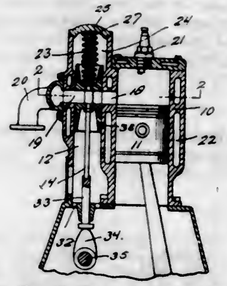
1. The combination in a mold, of a bottom plate; a shell; a rod secured to the bottom plate and extending through the shell; a series of rings encircling the shell



between which the materials to be molded are placed; a clamping plate; and a nut on the rod engaging the clamping plate.

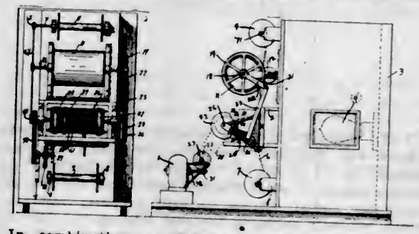
1,574,684. RIDING PLOW. EDGAR OLIVER, Wisner, La. Filed Aug. 6, 1925. Serial No. 48,634. 2 Claims. (Cl. 97—161.)

1. In a riding plow a draft frame composed of spaced bars, a fixed bearing plate secured between the bars, a spacing strip lying against the plate, a plow frame composed of spaced beams, a movable bearing plate connected between said beams and engaging the fixed bearing plate, a spacing and reinforcing strip secured against said movable plate between said beams, a pivot passing through both said plates and bearing strips, and means to hold the plates together.



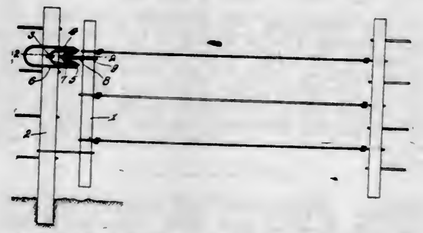
1,574,685. GARBAGE RECEPTACLE. LAWRENCE PACOREK, Chicago, Ill. Filed Sept. 11, 1924. Serial No. 737,108. 2 Claims. (Cl. 220—41.)

1. In a device of the type described, a receptacle, a hopper formed in said receptacle, a reciprocable plate valve for closing the discharge opening in said hopper, and resilient means for moving said plate valve into its closed position, said means including a pivoted arm carried by the receptacle and having its outer end freely bearing against and wiping over one end of said plate valve, and resilient means for forcing said outer end of the arm against the valve.



1,574,686. ENGINE. ANTHONY PETTICORE, Sedro Woolley, Wash. Filed Mar. 23, 1925. Serial No. 17,645. 3 Claims. (Cl. 123—188.)

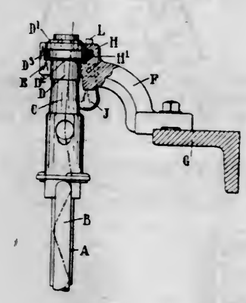
1. In an engine, a cylinder, cylindrical valve chambers communicating with the cylinder and having inlet and exhaust ports, reciprocatory valves mounted within the valve chambers, each valve comprising spaced cylindrical members adapted to control communication between the cylinder and inlet and exhaust ports of the valve chambers, an oil chamber at one end of the valve chambers,



springs within the oil chambers and bearing against the valves to yieldingly force the latter in one direction and means to move the valves in an opposite direction.

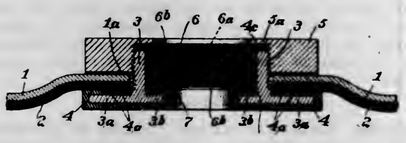
1,574,687. PHOTOGRAPHIC-PRINTING MACHINE. ARTHUR C. PILLSBURY, Yosemite, Calif. Filed Nov. 14, 1922. Serial No. 600,891. 1 Claim. (Cl. 95—75.)

In combination, a stationary plate support and a sliding pusher mounted in opposing relation, an electric source of light mounted rearwardly of the support, a rotary shaft mounted in front of the pusher, means driven by the shaft for advancing a sheet of paper between the plate support and the pusher in intermittent impulses, cams mounted on the shaft operatively engaging the pusher for intermittently forcing the latter against the plate disposed so as to become active when the paper comes to rest and a switch mechanism mounted on said shaft comprising a metallic disc fixed to the shaft having insulating sectors therein riding over stationary contacts for alternately connecting and disconnecting the same and for thereby lighting and extinguishing the light in timed relation to the relative movements of the paper.



1,574,688. GATE FASTENER. CHARLES O. PLUMMER, Geary, Okla. Filed Feb. 21, 1924. Serial No. 694,396. 1 Claim. (Cl. 292—113.)

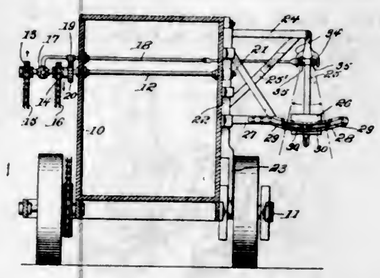
In combination with a swinging gate and a latch post therefor, of a means for drawing the gate toward the latch post and for locking said gate thereto, said means



comprising a yoke pivoted to the latch post, a lever whose body portion is substantially U-shaped in plan having inner inturned ends swingably connected to the ends of the yoke, the ends of the lever merging into a substantially U-shaped crank portion disposed centrally of the lever proper and arranged at an angle with respect thereto, and a hook swingably connected with the crank portion of the lever, as and for the purpose set forth.

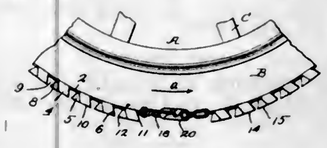
1,574,689. FLYER BEARING. WILLIAM PRINCE-SMITH and DAVID WATERHOUSE, Keighley, England. Filed Mar. 9, 1925. Serial No. 14,230. 4 Claims. (Cl. 118—57.)

1. An upper support for spindles of worsted drawing frames and analogous machines comprising an upper bearing for a spindle, a support having partially embracing means in which the said bearing is mounted, and adjustable means carried by said partially embracing means normally engaging the said bearing and operable to be disengaged from the bearing when it is desired to effect a doffing operation.



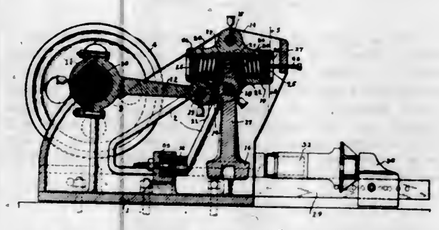
1,574,690. ACID-PROOF CONTAINER. ELI H. RADABAUGH, Akron, Ohio, assignor to The Miller Rubber Company, Akron, Ohio, a Corporation of Ohio. Filed July 14, 1925. Serial No. 43,529. 3 Claims. (Cl. 220—39.)

1. The combination with a rubber lined metal container provided with an opening in the wall thereof, of a metal ferrule seated in said opening having an outwardly extending annular flange at its inner end overlapping the rubber lining, said flange having a covering of hard rubber, said ferrule having a threaded exterior, a lock nut cooperating with said threaded portion, and an acid-proof closure plug cooperating with said ferrule.



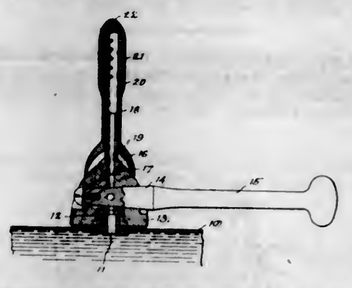
1,574,691. ATTACHMENT FOR HARVESTERS. WILLIAM W. RAGSDALE, Mesa, Wash. Filed May 28, 1924. Serial No. 716,529. 3 Claims. (Cl. 56—209.)

1. The combination with a leveler mechanism for harvesters including a horizontally movable clutch rod, of a pivotally mounted lever, means operatively connecting the lever and clutch rod, a weight for said lever, whereby laterally inclined movement of the harvester



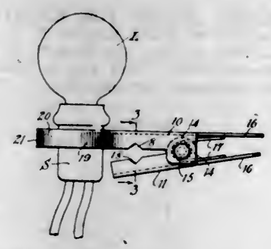
will move the lever and actuate the clutch rod and combined means for holding the lever in normal position and guiding the weight.

1,574,692. ANTISKID CHAIN. ALBERT E. REAM, Braymer, Mo., assignor of one-half to Ella Ream, Braymer, Mo., and one-half to Edward A. Ream, Braymer, Mo. Filed Mar. 23, 1925. Serial No. 17,721. 3 Claims. (Cl. 152—14.)



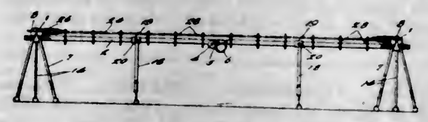
1. In a device of the character described, a member consisting of a flexible metallic strip of sufficient length to extend almost entirely around the periphery of a tire, spaced blades formed integral with and projecting at substantially right angles from the longitudinal margins of said strip and outwardly beyond the periphery of the tire, the edges of said blades being inclined at an angle to the body of the strip, and means for detachably connecting the ends of said strip.

1,574,693. HAMMER. PETER W. RECK, Bettendorf, and WALTER G. VETTER, Davenport, Iowa, assignors to The Bettendorf Company, Bettendorf, Iowa, a Corporation of Iowa. Filed May 31, 1924. Serial No. 716,950. 18 Claims. (Cl. 22—1.)



1. A power hammer comprising a support, a carrier pivotally mounted thereon, a hammer pivotally mounted on the carrier, the pivotal axes of the hammer and carrier being parallel, means for oscillating the carrier, and cushioning means for resisting movement of the hammer relative to the carrier.

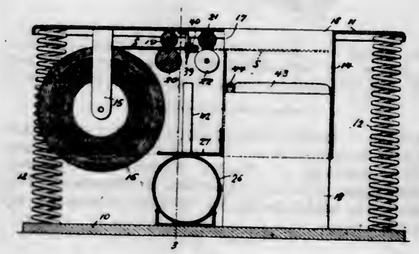
1,574,694. SYRINGE. WILLIAM RICHARDS, Warren, Pa. Filed Feb. 10, 1925. Serial No. 8,266. 1 Claim. (Cl. 128—239.)



In a syringe, a tubular standard having means to secure it to the syringe head on a bag, and a nozzle having an intermediate cylindrical portion fitting said standard, said nozzle having an enlarged flaring base below said cylindrical portion for guiding the nozzle into proper engagement with the standard and adapted to contact with and be supported on the head of the bag and having the enlarged upper end beyond said cylindrical portion formed with discharge orifices, the terminal of said nozzle having blunt rounded lines.

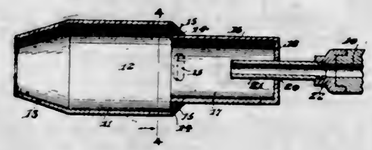
1,574,695. LAMP-SOCKET HOLDER. WALTER A. RILEY, New York, N. Y. Filed Sept. 26, 1925. Serial No. 58,901. 1 Claim. (Cl. 248—42.)

A Christmas tree lamp socket attaching device, comprising a pair of pivotally connected spring-pressed clamping jaws of U-shaped cross sectional configuration, the side walls of one of said jaws being extended beyond the body portion thereof and formed to provide a pair of coacting clip fingers for frictionally engaging and connecting a lamp socket therewith, the confronting free edges of the side walls of said jaws having notched portions for embracingly engaging a branch of the tree, and means for normally effecting swinging of said jaws into clamped relation.



1,574,696. BED. CHARLES A. ROBERTS, Butte, Mont. Filed Jan. 18, 1924. Serial No. 687,132. 5 Claims. (Cl. 5—112.)

1. A camp bed comprising a rectangular frame consisting of side pieces and end pieces, a support at each corner of the frame, each support being of tripod form and consisting of a base to which three legs are each pivoted, said base having means by which it is connected to the adjacent free end of an end piece and other means by which it is connected to the adjacent free end of a side piece.

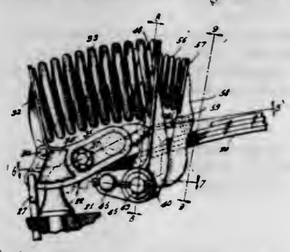


4. A tripod having a slot in its base adapted to receive and support the end of the side rail of a cot, a seat having a projection thereon for engaging the slot and a back hinged to the seat.

1,574,697. TAPE-DISPENSING MACHINE. CARL LEE ROSS, Wilson, N. C. Filed Aug. 13, 1924. Serial No. 731,812. 13 Claims. (Cl. 216—25.)

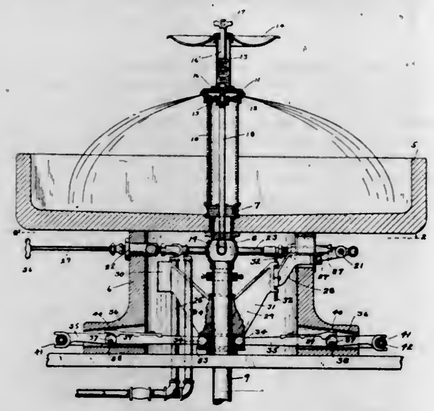
1. A tape dispensing machine embodying a base, a vertically movable cover plate spaced above the base and provided with an opening, a rotatably mounted tape roll beneath the cover plate, means whereby tape from the roll may be fed beneath the opening in said plate and means whereby downward movement of the cover plate will actuate the tape feeding means.

1,574,698. BLOWTORCH. CLIFFORD V. ROYALL, Richmond, Va. Filed Jan. 21, 1925. Serial No. 3,853. 3 Claims. (Cl. 158—27.4.)



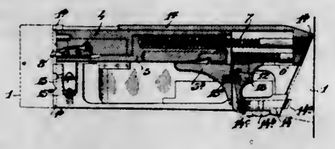
1. A blow torch comprising a hollow cylindrical body portion comprising a combustion chamber, a tapered nozzle extending from the forward end of said body portion, an inwardly extending and rearwardly inclined annular flange projecting from the rear end of the body portion and formed with a series of slots open at one side, a hollow cylindrical member extending through said flange, closing the open sides of said slots, forming a mixing chamber and having its forward end opening into the combustion chamber at the rear end thereof, a disk secured to the rear end of said member and provided with air inlets, and a nozzle extending through said disk and opening into said mixing chamber and leading from a combustible mixture supply.

1,574,699. SHOCK ABSORBER. ALBERT C. SAVIDGE, Indianapolis, Ind., assignor to Robert G. Thompson, trustee, Indianapolis, Ind. Filed Apr. 20, 1923. Serial No. 633,389. 17 Claims. (Cl. 267—17.)



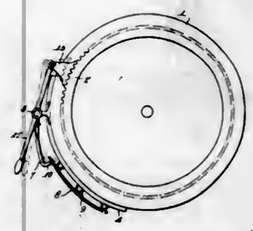
1. A shock absorber for automobiles, comprising a link arranged to be pivoted above the end of the main spring

and projecting below it, a lever pivoted to the lower end of said link at a point inward from the end of the



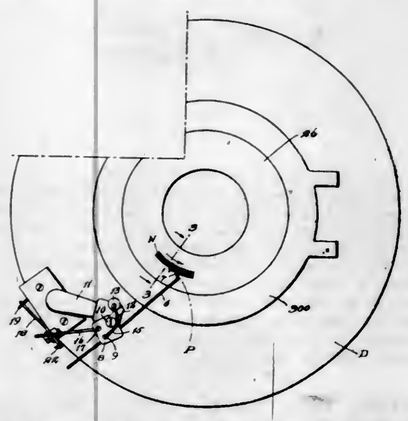
main spring and having one arm projecting outward to the end of the main spring for pivotal connection therewith, and two springs acting in opposition on said lever.

1,574,700. FOOT-CONTROLLED WASH FOUNTAIN. LOUIS SCHLESINGER and HERMAN E. HEINE, Milwaukee, Wis., assignors to Bradley Washfountain Company, Milwaukee, Wis., a Corporation of Wisconsin. Filed Mar. 12, 1925. Serial No. 15,044. 9 Claims. (Cl. 4—191.)



1. A washfountain, comprising a wash basin accessible from all sides, a fountain positioned above the basin and having a circumferential line of jets for discharging water into the basin, a valve controlling the flow of water from the fountain, a reciprocal member for controlling the valve, and levers positioned beneath the basin and accessible from all sides of the fountain for moving the reciprocal member.

1,574,701. SMALL ARM WITH TUBULAR CARTRIDGE MAGAZINE. HANS SCHMEISSER, Suhl, Germany. Filed Aug. 24, 1925. Serial No. 52,072. 4 Claims. (Cl. 42—16.)



1. A repeating rifle of the type described comprising a casing; a cover having a groove; a breech bolt in said cover having a closing member and a firing member; a spring-pressed locking pawl pivoted in said cover adapted to hold the firing member in cocked position; a locking latch adapted to slide in said groove; and means in the cover adapted to engage in the casing.

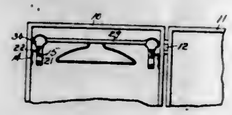
1,574,702. INTERLOCKING DEVICE FOR LAUNDRY MACHINES. BERNHARD FRIEDRICH JOHANNES SCHUTT, Brooklyn, N. Y. Filed Apr. 16, 1925. Serial No. 23,618. 4 Claims. (Cl. 192—135.)

1. The combination with a washing machine, a sliding door therefor, and a gear wheel for operating the machine, of a rocker shaft mounted on the machine, a pair of plates on the door having openings therein, arms on the rocker shaft, fingers on the arms movable through the openings in said plates, a lever on said shaft, and a toothed segment carried by the lever adapted to engage the gear wheel when the rocker shaft is turned to position to release the fingers from locking engagement with the plates.

1,574,703. LATCH OPENER FOR KNITTING MACHINES. ROBERT W. SCOTT, Babylon, N. Y., assignor to Scott and Williams, Inc., New York, N. Y., a Corporation of Massachusetts. Filed Aug. 4, 1923. Serial No. 655,593. 10 Claims. (Cl. 66—21.)

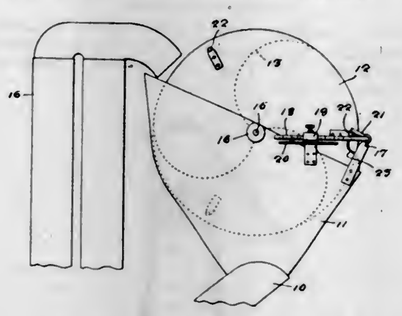
1. A knitting machine having latch needles, and a latch opener in combination with a mount for said opener permitting it to swing yieldingly before the movement of the needles and away from the needle circle.

1,574,704. HAIRDRESSING IMPLEMENT. WILLIAM H. SEABROOK, Jr., Savannah, Ga. Filed Sept. 24, 1925. Serial No. 58,361. 7 Claims. (Cl. 132—14.)



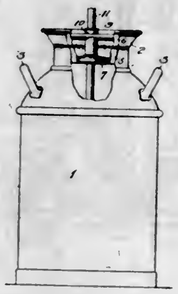
1. A device for the purpose set forth comprising a comb member for applying heat to the hair, a handle means extending rearwardly from said comb member, a slotted guard adapted to enclose said comb member,

said comb member and guard provided with associated means for detachably connecting the comb member in enclosed position, a handle extending rearwardly from



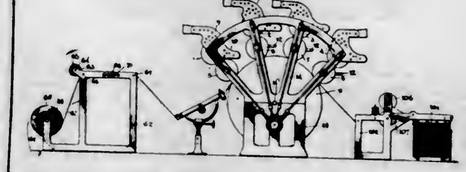
said guard, pivoted intermediate its ends, and further pivoted at its rear end with the rear end of said handle means.

1,574,705. WARDROBE HANGER. ALBERT L. SESSIONS, Bristol, Conn. Filed Oct. 10, 1921. Serial No. 506,660. 5 Claims. (Cl. 211—15.)



1. A garment hanger support comprising an outer tubular member having depending flanges extending in substantially parallel relation lengthwise along one side, an inner tubular member located within said outer tubular member and having depending flanges also extending in substantially parallel relation along one side and located between the flanges of said outer member, and means for supporting one of said members for sliding movement with respect to the other member as a support therefor.

1,574,706. AUTOMATIC WEIGHING MACHINE. JOSHUA W. SMITH, SHELDON W. SMITH, and EDMUND S. SMITH, Springville, Iowa. Filed Nov. 21, 1924. Serial No. 751,352. 3 Claims. (Cl. 249—19.)

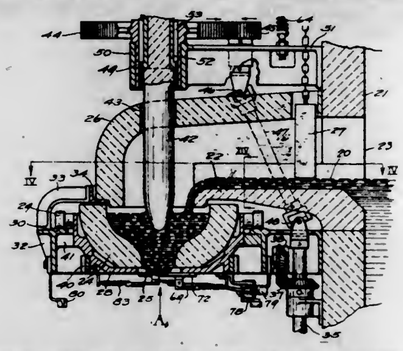


1. An automatic weighing machine comprising a hopper, a member mounted for rotation therein, a plurality of pockets provided in said member, means whereby the material to be weighed may be fed to the pockets and the member rotated by the weight of the material, a stop extending from the rotatably mounted member, a scale beam pivotally mounted upon the hopper, an arm carried by the beam and disposed in the path of the stops whereby movement of the member may be stopped and the pockets properly positioned, a support located in the path of the beam for limiting its movement in one direction and means located in the path of the stops for retarding movement of the member before each of the stops engage the arm and for holding said member against retrograde rotation.

1,574,707. SHEET-METAL CHURN TOP. OSCAR T. SMITH, Wellsburg, W. Va., assignor to Sheet Metal Specialty Company, Pittsburgh, Pa., a Corporation of West Virginia. Filed Aug. 25, 1925. Serial No. 52,453. 4 Claims. (Cl. 259—125.)

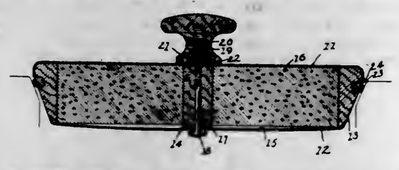
1. A sunken sheet metal churn cover in combination with a tubular guide for a dasher handle rising centrally from the bottom of said cover and spaced laterally from the surrounding walls thereof.

1,574,708. MULTICOLOR PRINTING PRESS. ROBERT JARVIS SMOTHERS, Holyoke, Mass., assignor to James T. Robinson, Holyoke, Mass. Filed Apr. 2, 1924. Serial No. 708,776. 8 Claims. (Cl. 101—137.)



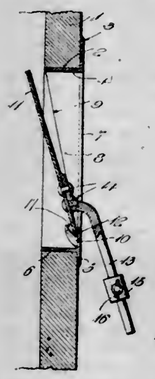
1. A multi-color printing press comprising an impression cylinder, a plurality of synchronously operated transfer rolls opposing said cylinder for successively printing in connection with said cylinder, upon a web travelling in one direction, differently colored portions of a design to complete the latter on the web on one pass thereof between said rolls and cylinder, a plurality of plate rolls operated from and synchronously with said transfer rolls and each associated with a transfer roll and each provided with means for applying on its associated transfer roll a differently colored portion of the design to be printed on the web, an angularly adjustable web directing mechanism positioned in advance of and in proximity to said impression cylinder, and an adjustable combined web brushing and shifting mechanism positioned in advance of and spaced from said directing mechanism.

1,574,709. APPARATUS FOR DELIVERING CHARGES OF MOLTEN GLASS. LEONARD D. SOUBIER, Toledo, Ohio, assignor to The Owens Bottle Company, Toledo, Ohio, a Corporation of Ohio. Filed Dec. 20, 1920. Serial No. 431,847. 30 Claims. (Cl. 49—55.)



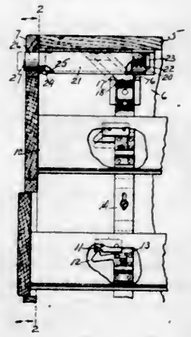
7. The combination with a receptacle to contain molten glass having an outlet opening in the bottom thereof, means to rotate the receptacle about the vertical center line of said opening as an axis, a regulator projecting downward into the glass in the receptacle over said outlet, means to reciprocate said regulator toward and

from the outlet and thereby control the discharge of glass through the outlet, a cutter mounted to rotate with said receptacle beneath said outlet, and automatic



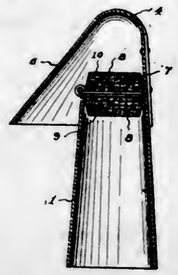
means operating in synchronism with the movements of said regulator to periodically actuate the cutter and thereby sever charges of glass issuing from said outlet.

1,574,710. COVER. CHARLES C. SPREEN, Detroit, Mich., assignor to Kelvinator Corporation, Detroit, Mich., a Corporation of Michigan. Filed July 6, 1925. Serial No. 41,629. 2 Claims. (Cl. 220—24.)



1. A cover, for an opening in the top of an ice cream cabinet affording access to the interior of an ice cream receptacle therebelow, comprising a top plate, a bottom plate, an annular spacer separating said plates adjacent the periphery thereof, a circular central spacer separating said plates centrally thereof, heat insulating material in the chamber thus formed, and tie means connecting said plates together in such spaced relation.

1,574,711. AUTOMATIC DRAFT CONTROL. IRA E. STEELE, Sioux City, Iowa. Filed Mar. 12, 1925. Serial No. 15,054. 2 Claims. (Cl. 236—45.)

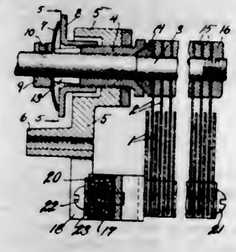


1. An automatic damper for a stove or furnace smoke outlet passage having an air inlet opening, said damper comprising a frame whose lower side member is provided with a plurality of horizontally spaced lugs which extend inwardly and upwardly from said member, a plate having a sharpened lower edge adapted to pivotally rest on said lugs, a weighted arm secured to the outer side of said plate and projecting below the same in a plane parallel thereto, and inwardly projecting ears on said plate, engaging said lugs to hold the plate against sliding in the direction of its pivotal axis.

1,574,712. CABINET LOCK. ELMER B. STONE, New Britain, Conn., assignor to The American Hardware Corporation, New Britain, Conn., a Corporation of Connecticut. Filed July 11, 1922. Serial No. 574,271. 7 Claims. (Cl. 70—25.)

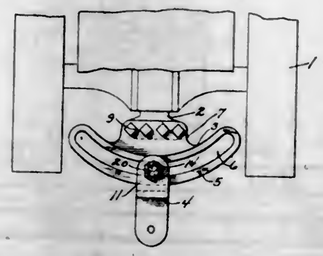
1. In a lock mechanism, a movably mounted actuating member and an actuator member of a lock mechanism, mechanical means for operating said actuator member, a cam arm rigidly connected with and projecting from one of said members into engagement with the other of said members to be actuated by the movement of the actuator member under the influence of said mechanically operated means to operate said actuating member, and means for securing said actuator in its locked position.

1,574,713. GREASE ABSORBER. LOUIS SULZBACH, Philadelphia, Pa., assignor to Caloric Gas Stove Works, Philadelphia, Pa. Filed Dec. 15, 1923. Serial No. 681,013. 1 Claim. (Cl. 126—39.)



As a new article of manufacture, a director for the waste products of combustion of a gas stove formed of a single piece of sheet metal shaped to provide a pipe, an extension projecting upwardly from one side of said pipe and a downwardly and outwardly inclining cowl carried by said extension and overhanging the upper open end of said pipe, a foraminous body removably mounted in the upper open end of said pipe, and an absorbent in said body, said body being composed of a hingedly connected section to permit removal of the absorbent therefrom.

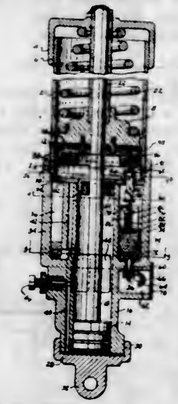
1,574,714. DENTAL ALLOY AND PROCESS OF MAKING THE SAME. CLARENCE C. VOGT, Pittsburgh, Pa., assignor to Lee S. Smith & Son Manufacturing Company, Pittsburgh, Pa., a Corporation of Pennsylvania. Filed Dec. 26, 1922. Serial No. 609,096. 8 Claims. (Cl. 75—1.)



1. A dental alloy containing silver and tin in amounts which will readily amalgamate with mercury to form a suitable hardening dental amalgam, together with a minor proportion of tungsten, substantially as described.

1,574,715. CONDENSER. CHESTER E. WARNER, Berwyn, Ill., assignor to Benjamin Electric Manufacturing Company, Chicago, Ill., a Corporation of Illinois. Filed May 18, 1925. Serial No. 30,955. 14 Claims. (Cl. 250—41.)

1. A condenser comprising rotor plates, a rotatable shaft on which said plates are mounted, a bushing through which said shaft extends and which forms a bearing for said shaft, a support in which said bushing is longitudinally adjustable, and variable friction means for controlling the rotation of said shaft, comprising a member carried by said bushing and adjustable therewith.

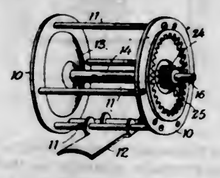


1,574,716. TRACTOR HITCH. HARRY E. WARREN, Tracy, Minn. Filed Dec. 31, 1923. Serial No. 683,764. 2 Claims. (Cl. 280—33.10.)

1. A tractor hitch of the class described including a curved plate having a curved slot therein, a clevis, a roller carried thereby and engaged with said slot, the slot being provided with a centrally disposed notch at its rear side with which said roller is adapted to engage when a tractor to which the hitch is applied is pulling straight ahead.

1,574,717. ELEVATOR-DOOR CLOSER AND SWITCH. WILLIAM WALLACE WEEKS, Brooklyn, N. Y., assignor to Elevator Supplies Company, Inc., a Corporation of New Jersey. Filed Oct. 27, 1923. Serial No. 671,124. 12 Claims. (Cl. 187—51.)

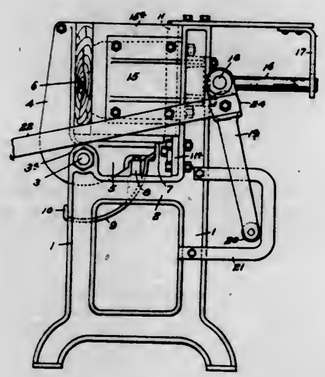
5. A combined elevator door closer and switch comprising a casing, a piston in said casing, means for admitting pressure fluid to said casing to operate said piston, switch terminals in said casing, a conducting member, means for maintaining a bath of oil around said terminals and conducting member, means for operatively connecting said conducting member to said piston, whereby said conducting member will be moved into and out of



contact with said terminals, with the movements of said piston, and means for holding said conducting member in pressure contact with said terminals during contact therewith.

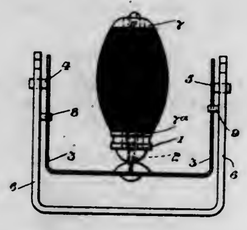
1,574,718. RUDDER FOR STEERING AND CONTROLLING VESSELS. HENRY O. WESTENDARP, Saugus, Mass. Filed Jan. 15, 1924. Serial No. 686,291. 11 Claims. (Cl. 114—145.)

2. In a vessel the combination of a hull, a shaft mounted in the hull, a propeller secured to the shaft, a ruder consisting of two blades, a steering post, a steering sleeve, pressure balancing plates integral with the steering post and sleeve and pivoted to the rudder plates to create a reaction of the water thrown back by the propeller against the rudder plates for reducing the strains of the operating mechanism.



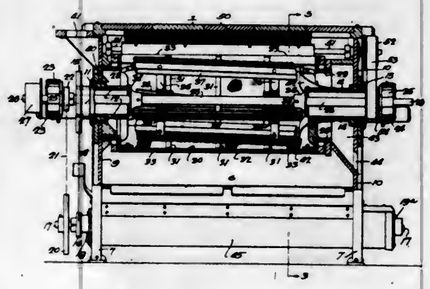
1,574,719. FISHING REEL. HERBERT WHITE, Hanover, Ill. Filed May 19, 1925. Serial No. 31,322. 3 Claims. (Cl. 242—84.7.)

1. In a fishing reel the combination of a frame and its casing and a rotatable bearing shell in the casing having a gear-arm and gear thereon, a shaft journaled in the frame and shell and a pinion on the shaft, a spool on



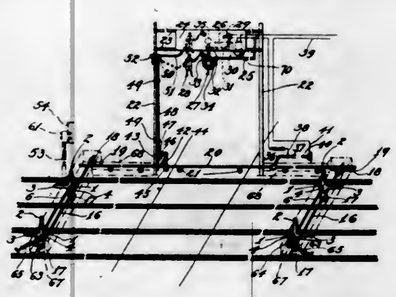
the shaft, a clutch on the spool and a clutch member on the shaft, means on the shaft for disengaging the clutch members when the shaft is moved in one direction, a handle fixed to the shell for rotating the latter to engage the clutch members, and multiplying gears betwen said pinion and gear.

1,574,720. BLOCK-SHAPING MACHINE. SHERBURNE H. WIGHTMAN and THOMAS A. LONG, Chicago, Ill., assignors to International Concrete Industries Corporation, Chicago, Ill., a Corporation of Delaware. Filed Feb. 7, 1925. Serial No. 7,598. 14 Claims. (Cl. 25—41.)



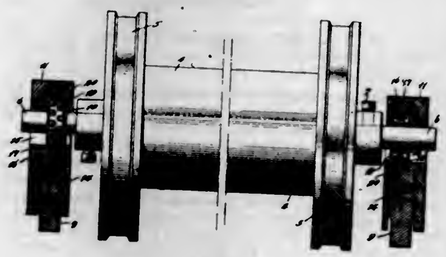
1. A block or tile shaping machine having in combination a cradle adapted to support a platen and an anvil at an angle one to the other, a back plate forming the third side of a mold, a horizontally reciprocable head, plates adapted to form the end walls of the mold and held in operative position by the head, cores carried by the head and means for reciprocating the head.

1,574,721. SUPPORT FOR BOBBINS, COPS, PIRNS, OR THE LIKE WHEN UNWINDING THREAD, YARN, OR THE LIKE THEREFROM. THOMAS WILSON and ARCHIBALD WILSON, Doagh, Ireland. Filed Sept. 29, 1924. Serial No. 740,645. 5 Claims. (Cl. 242—130.)



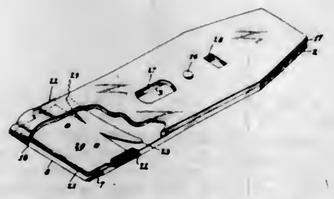
1. A bobbin or like support comprising a fixed member, a second member pivotally mounted on the fixed member and a bobbin carrier on the second member, the pivotal axis of the second member being between the base and the top of the bobbin and at right angles to the axis of the bobbin carrier.

1,574,722. BRAN DUSTER. AUGUSTUS WOLF, Chambersburg, Pa. Filed Mar. 13, 1924. Serial No. 698,945. 5 Claims. (Cl. 209—299.)



3. The combination in a bolting machine of a casing; a reel therein; two brushes positioned to operate opposite one another respectively on the inner and outer surfaces of the reel; means for radially adjusting the inner brush toward or from the inner surface of the reel; and means for rotating the brushes and the reel.

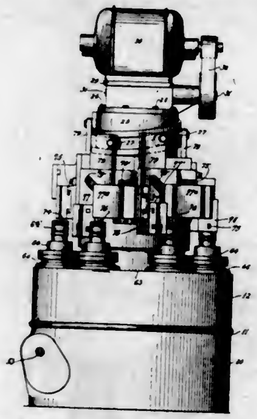
1,574,723. RAILROAD-CROSSING SIGNAL. THOMAS YELCIC, Republic, Pa., assignor of one-half to George Verbonic, Republic, Pa. Filed July 1, 1925. Serial No. 40,755. 4 Claims. (Cl. 246—294.)



1. A railroad crossing signaling apparatus comprising a set of bell-crank-levers positioned at each side of said crossing and adapted to be operated by a strike-arm positioned on a passing train; a rack-gear actuated by each of said bell-crank-levers; a pull-rod running parallel to the railroad track and having at each end a rack to be engaged by one of said rack-gears; electrical switching means operated by said pull-rod adapted to open and close an electrical circuit to an electric-bell, an electric motor and lights; mechanical means also actuated by said pull-rod and adapted to operate a visible warning signal; said sets of bell-crank levers being disposed to rotate simultaneous and in opposite directions.

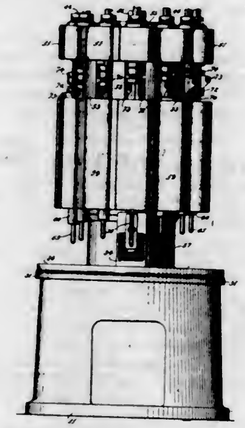
1,574,724. WARP BEAM FOR KNITTING MACHINES. HANS ZAHN, Union, N. J., assignor to Robert Reiner, Incorporated, Weehawken, N. J., a Corporation of New Jersey. Filed Mar. 22, 1924. Serial No. 701,070. 4 Claims. (Cl. 242—85.)

1. A removable self-aligning ball bearing for a warp beam adapted to be attached to a beam rack of a knitting machine, said bearing having a vertical notch adapted to engage its rack, and jaws adapted to fit over both sides of said rack and prevent said notch from slipping off said rack.



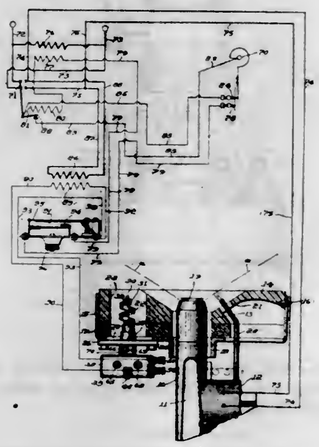
1,574,725. BIT. PIERRE BASMAISON, San Francisco, Calif. Filed May 2, 1925. Serial No. 27,450. 10 Claims. (Cl. 145—17.)

9. A bit comprising a cutter blade having a rabbeted end and a groove formed in the end wall of the rabbet, a cutter seated in said groove, said groove being misalined with the rabbet to position the outer edge of the cutter above the rabbet, a clamp plate for pressing the cutter to a seat in said rabbet, a resilient plate secured to the cutter blade for retaining the cutter in position when the bit is released, upturned flanges on each side of said resilient plate to guide said clamp plate into position, and wings on said resilient plate curved upwardly to bear against said clamp plate to resist movement between said cutter blade and clamp plate.



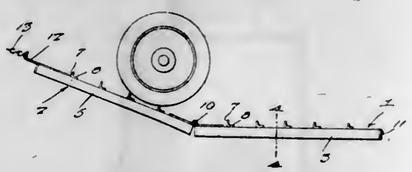
1,574,726. MULTIPLE-SPINDLE-MACHINE TOOL. EDWARD P. BULLARD, Jr., Bridgeport, Conn., assignor to The Bullard Machine Tool Co., Bridgeport, Conn., a Corporation of Connecticut. Filed Jan. 29, 1921. Serial No. 440,844. 35 Claims. (Cl. 29—38.)

4. A continuous turning machine of the class described including a rotor carrying a circular series of individually rotatable work holders, and a circular series of nonratatable tool holders, each tool holder consisting of an automatically reciprocated tool holding member carrying one tool and a separate tool holding member



mounted on the said reciprocated tool holding member and carrying a second tool disposed at an angle to the first mentioned tool.

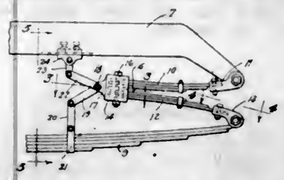
1,574,727. MULTIPLE-SPINDLE CONTINUOUS-DRILLING MACHINE. EDWARD P. BULLARD, Jr., Bridgeport, Conn., assignor to The Bullard Machine Tool Co., Bridgeport, Conn., a Corporation of Connecticut. Filed Mar. 23, 1921. Serial No. 454,741. 6 Claims. (Cl. 77—23.)



1. In a multiple spindle machine, a base, a hollow cylindrical support carried thereby and having a horizontally disposed head, a rotatable carrier surrounding said support annularly, means adapted to support work piecea in radially spaced relation, a plurality of radially spaced tool operating spindles carried by the carrier, tools therefor, and means for rotating the spindles comprising a non-rotatable vertical shaft carried by said head and extending above it, a spindle-driving gear journaled on said shaft and having two sets of teeth, a vertical drive shaft in said support at one side of said non-rotatable shaft, a gear on said drive shaft above said head adapted to drive said spindle-driving gear through cooperation with one of said sets of teeth, and gears carried by said spindles and meshing with the other set of teeth.

1,574,728. SAFETY DEVICE FOR BURNERS. MILTON A. FESLER, Stamford, Conn., assignor to Petroleum Heat & Power Company, Boston, Mass., a Corporation of Delaware. Filed June 19, 1925. Serial No. 38,278. 13 Claims. (Cl. 158—42.4.)

1. In combination with a burner, a safety control thermostat, comprising in combination, a thermostatic element mounted near the burner to be quickly heated thereby, means controlled by said element for cutting off the supply of fuel to the burner, a shaft rotatably supported adjacent said element and mechanically connected by the free end of the element to be rotated by its contraction and expansion, means controlled by the thermostatic element for cutting off the supply of fuel to the burner, and means actuated by the turning of said shaft to control the flow of cooling currents of air to the thermostatic element for preventing its overheating.

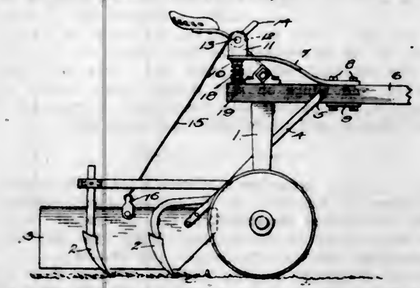


1,574,729. TRACTION-INCREASING DEVICE FOR MOTOR VEHICLES. EPHRIAM A. FOSTER, Massillon, Ohio. Filed July 17, 1925. Serial No. 44,344. 1 Claim. (Cl. 180—7.)

A traction increasing device of the class described comprising a pair of hingedly connected sections, each section including a pair of spaced side members, and vehicle engaging cleats extending transversely across the side members, the upper portions of said cleats being disposed above said side members, each cleat comprising a metallic plate, the same being slit vertically from its bottom edge adjacent the respective ends thereof, the lower end portions of each cleat being bent laterally and secured to the top of the respective side members of each section.

1,574,730. SHOCK ABSORBER. WALTER L. FOSTER, Whittier, Calif. Filed Nov. 15, 1923. Serial No. 674,877. 2 Claims. (Cl. 267—45.)

1. In combination with a leaf spring and frame supported thereon, a shock absorber interposed therebetween comprising a pair of reentrant cantilever springs, fittings securing the ends of said cantilever springs to said frame



and said leaf spring and a recoil structure tying the juncture of said cantilever springs to said leaf spring.

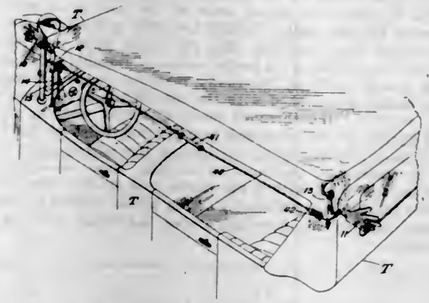
1,574,731. CORE BARREL AND ROTARY BIT. WALTER L. FOSTER, Whittier, Calif., assignor of one-fourth to William Meredith, Huntington Beach, and one-fourth to W. H. Taylor, South Pasadena, Calif. Filed Nov. 3, 1924. Serial No. 747,554. 8 Claims. (Cl. 255—72.)

1. In a tool of the class described, the combination of a head having a tubular extension forming the mouth of a core barrel, a plurality of rotary disk cutters mounted about said extension on axes non-radial to the longitudinal center of said head, lateral running teeth extending from said head, said head having passages for circulation fluid extending therethrough and opening adjacent said disk, and core trimming cutters on said extension.

1,574,732. ATTACHMENT FOR ADJUSTING THE FENDERS OF LISTER CULTIVATORS. JOHN HEMJE, Hildreth, Nebr. Filed Apr. 30, 1925. Serial No. 26,940. 1 Claim. (Cl. 97—188.)

An attachment for adjusting the fender of a lister cultivator, comprising a rod having a crank provided on one end thereof, a yoke in which said rod is rotatably

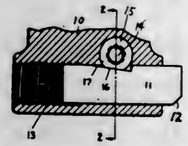
mounted, a drum mounted on the rod, a fender pivotally attached to the frame of the cultivator, a cable having one end attached to the drum, a brake member comprising an eye engaging the rod on which the drum is mounted, a depending stem, lock nuts on the outer end of said stem, and a spring interposed between the lock nuts and the bight portion of the yoke on which the rod is mounted, whereby the tension of the drum may be adjusted by adjusting the lock nuts.



1,574,733. COMPOUND FOR PROTECTING THE HANDS FROM THE EFFECTS OF CONTACT WITH OIL, GREASE, AND DIRTY SUBSTANCES. DAVID R. KELLOGG, Edgewood Borough, Pa., assignor to Peterson-Kintner Company, Pittsburgh, Pa., a Corporation of Pennsylvania. Filed Jan. 3, 1924. Serial No. 684,191. 5 Claims. (Cl. 167—9.)

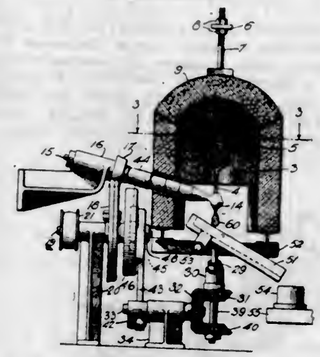
1. A compound for protecting the skin from the effects of contact with oil, grease and dirty substances consisting of a mixture of gelatinous forming clay, pure soap and water.

2. A compound for protecting the skin from the effects of contact with oil, grease and dirty substances consisting of a mixture of bentonite, pure soap and water.



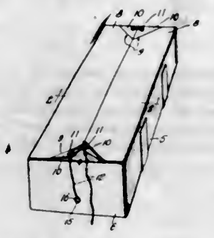
3. A compound consisting of a mixture made up of 17% bentonite, 4.5% soap and 78.5% water.

1,574,734. SIGNALING APPARATUS. ALEXANDER MCLAREN, Brooklyn, N. Y. Filed Sept. 5, 1925. Serial No. 54,758. 10 Claims. (Cl. 116—47.)



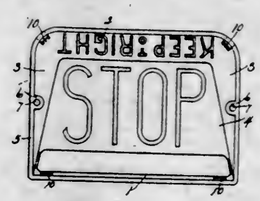
1. Signaling apparatus comprising a plurality of signals arranged for movement to signaling and non-signaling positions, means for simultaneously moving signals to similar signaling and non-signaling positions respectively, and means for moving one of said signals to a third and distinctive signaling position independently of the other signal.

1,574,735. GAUGE. JOSEPH B. PALOSKI, Detroit, Mich., assignor to Ford Motor Company, Detroit, Mich., a Corporation of Delaware. Filed May 31, 1924. Serial No. 717,032. 1 Claim. (Cl. 33—163.)



In a locking device for gauges having a frame with pins adjustably mounted therein, each of said pins being formed with a face inclined to the longitudinal axis thereof, an elongated locking member adjustable in said frame transversely of said pin and having a face inclined to its longitudinal axis and designed to coact with the inclined face on the pin whereby longitudinal movement of the locking member will tend to force the pin against the adjusting device of the gauge to thereby lock said pin from accidental displacement in use.

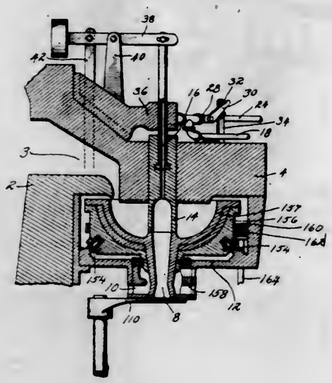
1,574,736. FEEDER FOR MOLTEN GLASS. KARL E. PEILER, Hartford, Conn., assignor, by mesne assignments, to Hartford-Empire Company, a Corporation of Delaware. Filed Aug. 3, 1912. Serial No. 713,143. 13 Claims. (Cl. 49—55.)



3. A feeder for molten glass, comprising a rotatable gathering head, means for rotating said head, and means for flowing molten glass upon said head, while rotating, whereby a layer of glass is accumulated around the head.

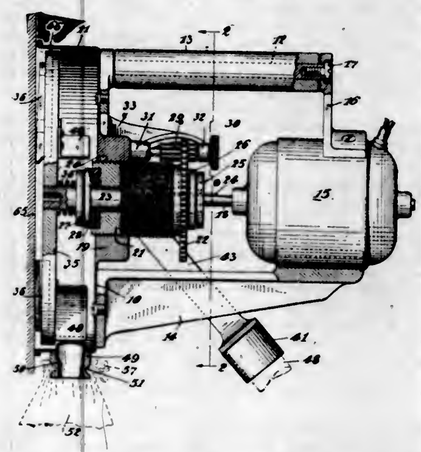
1,574,737. BOX CLOSURE. HARRY L. FELLOWES, Chicago, Ill., assignor to Bankers Box Company, Chicago, Ill., a Corporation of Illinois. Filed Jan. 26, 1925. Serial No. 4,660. 2 Claims. (Cl. 229—46.)

1. A closure fastener for boxes and the like comprising a button for mounting on the outside of the box and having a shank to pass through the wall of the box, a cord anchorage secured against the inside of the box by the button shank and serving to distribute the load of the button over a relatively large area of the box wall, and a cord having one end anchored to the anchorage and adapted to pass through openings in the anchorage and the box wall at a point removed from the shank so that its outer end may be wound about the shank of the button on the outside of the box.



1,574,738. TRAFFIC MARKER. THOMAS G. CRETNEY, Madison, Wis. Filed Dec. 7, 1923. Serial No. 679,246 8 Claims. (Cl. 94—1.5.)

1. A warning marker for location between the curb lines of streets, comprising a substantially rigid member, having a polygonal base, and having the major por-



tion of its upper surface inclined toward one margin, and affording a prominent field for suitable warning indicia, said marker being adapted to allow vehicle wheels to pass thereover without series obstruction or shock.

1,574,739. METHOD AND APPARATUS FOR DELIVERING MOLTEN GLASS. ENOCH THEODORE FERNGREN, Toledo, Ohio, assignor to Hartford-Fairmont Company, a Corporation of New York. Original application filed Sept. 29, 1913, Serial No. 792,383. Renewed Feb. 10, 1919, Serial No. 276,175. Divided and this application filed Sept. 19, 1925. Serial No. 57,454. 15 Claims. (Cl. 49—55.)

2. The combination of a receptacle to contain molten glass, said receptacle provided with an outlet orifice, and automatic means to cause an equalization of temperature within the receptacle comprising mechanism for rotating the receptacle about the axis of said orifice.

1,574,740. CUTTING DEVICE. JOHN ROSCOE RAYNOR, Greenport, N. Y. Filed Apr. 7, 1924. Serial No. 704,737. 4 Claims. (Cl. 144—119.)

1. In a device of the character specified, in combination, a supporting casing open at the bottom, a motor carried by said casing, a shaft revoluble with said motor, a second shaft revoluble with the motor shaft and telescopic therewith, a threaded member revoluble around the second shaft, an internally threaded opening within the casing top meshed with the threaded member, means for revolving the threaded member, means whereby the revolution of the threaded member will raise or lower the second shaft, means for locking the second shaft in a predetermined position, an eroding plate carried by the second shaft within the casing and spaced from the sides thereof and a plurality of fan blades carried by the plate capable of drawing eroded materials into the casing.

ALPHABETICAL LIST OF REGISTRANTS OF TRADE-MARKS.

Adam, Meldrum & Anderson Co. Inc., Buffalo, N. Y. Overalls, work shirts, and pants. 208,593; Feb. 2; Serial No. 220,057; published Nov. 3, 1925.
Adam's Preserving Co., The, Houston, Tex. Preserved figs. 208,648; Feb. 2.
Aeroshade Company, The, Waukesha, Wis. Porch shades. 208,583; Feb. 2; Serial No. 219,794; published Nov. 17, 1925.
Allbestos Corporation, Philadelphia, Pa. Brake linings. 208,628; Feb. 2.
Allied Industrial Products Co., Chicago, Ill. Liquid used for preparing sheet metal for pickling and for neutralizing acid after pickling. 208,413; Feb. 2; Serial No. 214,307; published Nov. 10, 1925.
Alton Mercantile Company, Enid, Okla. Coffee. 208,463; Feb. 2; Serial No. 218,726; published Nov. 17, 1925.
Amboy Milk Products Co., Amboy, Ill. Evaporated milk. 208,420; Feb. 2; Serial No. 208,889; published Nov. 10, 1925.
American Caramel Co., Lancaster, Philadelphia, and York; American Caramel Company, York, Pa. Caramels and candies. 50,741; renewed Mar. 27, 1926.
American Caramel Co., Lancaster, Philadelphia, and York; American Caramel Company, York, Pa. Caramels and candies. 52,313; renewed May 8, 1926.
American Flyer Mfg. Co., Chicago, Ill. Miniature railroads. 208,453; Feb. 2; Serial No. 220,102; published Nov. 10, 1925.
American Retailers Association, Inc., New York, N. Y. Ladies' suits, coats, dresses, waists, etc. 208,604; Feb. 2; Serial No. 220,282; published Nov. 10, 1925.
American Specialty Co. (See Goldstein, Aaron.)
American Varnish Company, The, Chicago, Ill. Varnishes. 49,960; renewed Feb. 27, 1926.
Arden, Elizabeth. (See Lewis, Florence N.)
Aron, J., & Company, Inc., New York, N. Y. Coffee. 208,570; Feb. 2; Serial No. 219,518; published Nov. 17, 1925.
Associated Physicians Laboratories, San Francisco, Calif. Solution to be used in the treatment of neurasthenia, asthma, following grippe, convalescence from infectious diseases, etc. 208,656; Feb. 2.
Athlete and Sportsman Company, Inc., Columbus, Ohio. Magazine. 208,472; Feb. 2; Serial No. 203,781; published Dec. 30, 1924.
Atlas Asbestos Company, North Wales, Pa. Ford transmission lining. 208,473; Feb. 2; Serial No. 201,319; published Nov. 17, 1925.
Auto Truck Industrial Appliances, Inc., New York, N. Y. Autotruck apparatus. 208,523; Feb. 2; Serial No. 220,881; published Nov. 17, 1925.
Avri Drug & Chemical Company, Jersey City, N. J. Insecticide. 208,443; Feb. 2; Serial No. 220,333; published Nov. 10, 1925.
Barker, A. E., & Co. of Calif., Los Angeles, Calif. Fresh vegetables. 208,537; Feb. 2; Serial No. 217,062; published Nov. 17, 1925.
Barrett Company, The. (See Jayne, H. W., Chemical Co., assignor.)
Barrett, Denton & Lynn Company, Dalton, Ga. Wheat flour. 52,804; renewed May 15, 1926.
Bates, A. J., Co.; A. J. Bates Company, Webster, Mass. Leather shoes for ladies, men, and children. 53,300; renewed May 29, 1926.
Baxter Bros. Co., The, Brunswick, Me. Canned vegetables. 52,242; renewed May 1, 1926.
Bay State Fishing Company, Boston, Mass. Fillets, finnan haddie, fish flakes, etc. 208,568; Feb. 2; Serial No. 219,321; published Nov. 17, 1925.
Bayer Company, Inc., The, New York, N. Y. Rodenticides. 208,439; Feb. 2; Serial No. 220,391; published Nov. 10, 1925.
Bayuk Cigars Incorporated, Philadelphia, Pa. Cigars. 208,451; Feb. 2; Serial No. 220,172; published Nov. 10, 1925.
Beardsley Specialty Co., Rock Island, Ill. Malt extract in sirup form and beverages made therefrom. 208,637; Feb. 2.
Beltona Limited, Hoddesdon, England. Liniment. 208,538; Feb. 2; Serial No. 216,765; published Nov. 10, 1925.
Best & Co., Inc., New York, N. Y. Canes and umbrellas. 208,579; Feb. 2; Serial No. 216,767; published Nov. 3, 1925.
Bi-Car-Gum, Inc., New York, N. Y. Chewing gum for the relief of acid or sour stomach. 208,479; Feb. 2; Serial No. 220,491; published Nov. 10, 1925.
Bissell Varnish Company, The. (See Crockett, David B., Company.)
Blaw-Knox Company, Blawnox, Pa. Machines for measuring fine aggregates for concrete. 208,536; Feb. 2; Serial No. 217,202; published Nov. 10, 1925.
Boardman, William, & Sons, Co., The, Hartford, Conn. Coffee, flavoring extracts for food, and spices. 208,466; Feb. 2; Serial No. 218,047; published Nov. 17, 1925.

Boston Knitting Mills, Inc., Somerville, Mass. Infant's band. 208,614; Feb. 2; Serial No. 220,492; published Nov. 10, 1925.

Perfumes, toilet waters, face, dusting, and talcum powders, etc. Cheramy, Inc. 208,475; Feb. 2; Serial No. 220,445; published Nov. 10, 1925.
Perfumes used in the manufacture of powders, creams, lotions, etc. Usines De l'Allondon S. A. 208,619; Feb. 2.
Pharmaceutical preparation. Lloyd Brothers. 50,517; renewed Mar. 20, 1926.
Phosphatic powders. Rumford Chemical Works. 53,230; renewed May 29, 1926.
Powder, Toilet. Stork Company. 50,800; renewed Mar. 27, 1926.
Preparation for external application. Southern Laboratories, Inc. 208,549; Feb. 2; Serial No. 203,981; published Nov. 10, 1925.
Preparation for neurasthenia. Marius Fraisse and Co. 208,500; Feb. 2; Serial No. 217,019; published Nov. 10, 1925.
Preparation for the relief of pain. Nova Sal Laboratories Inc. 208,486; Feb. 2; Serial No. 218,869; published Nov. 10, 1925.
Preparation for the treatment of anæmia. Marius Fraisse and Co. 208,501; Feb. 2; Serial No. 217,020; published Nov. 10, 1925.
Preparation for the treatment of arteriosclerosis. Marius Fraisse and Co. 208,498; Feb. 2; Serial No. 217,017; published Nov. 10, 1925.
Preparation for the treatment of syphilis. Marius Fraisse and Co. 208,499; Feb. 2; Serial No. 217,018; published Nov. 10, 1925.
Remedy for epilepsy. A. K. Mandis. 50,241; renewed Mar. 6, 1926.
Remedy for headache and neuralgia. R. P. Menard. 47,601; renewed Nov. 14, 1925.
Remedy for indigestion. Voigt & Co. 53,212; renewed May 29, 1926.
Rodenticides. Bayer Company. 208,439; Feb. 2; Serial No. 220,301; published Nov. 10, 1925.
Rouges and face powders. L. T. Piver, Inc. 208,494; Feb. 2; Serial No. 220,420; published Nov. 10, 1925.
Salt, Granular effervescent. H. K. Mulford Company. 51,650; renewed Apr. 17, 1926.
Salts, Bath. F. N. Lewis. 208,509; Feb. 2; Serial No. 220,661; published Nov. 10, 1925.
Salves and ointments. Theodore Sougelas & Co. 208,510; Feb. 2; Serial No. 220,687; published Nov. 10, 1925.
Soldering flux. Grasselli Chemical Co. 27,947; renewed Mar. 10, 1926.
Soldering fluxes. Grasselli Chemical Company. 208,449; Feb. 2; Serial No. 220,227; published Nov. 10, 1925.
Solution to be used in the treatment of neurasthenia, asthma following grippe, etc. Associated Physicians Laboratories. 208,656; Feb. 2.
Toilet cream. La Verne Beauty Products. 208,441; Feb. 2; Serial No. 220,345; published Nov. 10, 1925.
Toilet preparations. A. W. Joslyn. 208,408; Feb. 2; Serial No. 207,788; published Nov. 10, 1925.
Tooth paste. L. and G. Lengyel. 208,553; Feb. 2; Serial No. 209,227; published Aug. 25, 1925.

CLASS 7.

Twine. Fulton Bag & Cotton Mills. 52,482; renewed May 8, 1926.

CLASS 11.

Ink, Lithographic. Fuchs & Lang Manufacturing Co. 28,026; renewed Mar. 31, 1926.

CLASS 12.

Bricks. Decatur Brick Mfg. Co. 208,404; Feb. 2; Serial No. 201,288; published Oct. 20, 1925.
Doors. Paine Lumber Company. 53,789; renewed June 12, 1926.
Flooring. J. E. Higgins Lumber Co. 208,626; Feb. 2.
Lumber of all kinds used for panels and doors. Cadwallader-Gibson Co. 208,624; Feb. 2.

CLASS 15.

Grease and lubricating oils, Cup. Galena Axle Grease Co. 51,465; renewed Apr. 17, 1926.
Grease, Lubricating. Philadelphia Grease Manufacturing Co. 49,316; renewed Jan. 30, 1926.

CLASS 16.

Varnishes. American Varnish Company. 49,960; renewed Feb. 27, 1926.
Varnishes. David B. Crockett Co. 49,883; renewed Feb. 20, 1926.
Varnishes. David B. Crockett Company. 51,222; renewed Apr. 10, 1926.

CLASS 17.

Cigarettes. Miltiades Melachrino, Inc. 208,474; Feb. 2; Serial No. 220,413; published Nov. 10, 1925.
Cigars. Bayuk Cigars Incorporated. 208,451; Feb. 2; Serial No. 220,172; published Nov. 10, 1925.
Cigars. H. L. Haines. 208,615; Feb. 2; Serial No. 220,454; published Nov. 17, 1925.
Cigars, cigarettes, and smoking tobacco. A. Gutierrez. 208,601; Feb. 2; Serial No. 220,654; published Nov. 17, 1925.

Railroads, Miniature. American Flyer Mfg. Co. 208,453; Feb. 2; Serial No. 220,102; published Nov. 10, 1925.
Teeters, slides and whirligigs. A. O. Edwards. 208,600; Feb. 2; Serial No. 220,768; published Nov. 17, 1925.
Toy blocks. Strombeck-Becker Manufacturing Company. 208,599; Feb. 2; Serial No. 221,035; published Nov. 17, 1925.
Toys, Mechanical. Huber-Sweet Mfg. Co. 208,458; Feb. 2; Serial No. 219,432; published Nov. 10, 1925.
Vehicles. Children's wheeled play. E. C. von Glahn. 208,485; Feb. 2; Serial No. 219,359; published Nov. 10, 1925.

CLASS 23.

Adzes. Warren Tool and Forge Co. 208,516; Feb. 2; Serial No. 221,394; published Nov. 17, 1925.
Bearings, Ball. Hess-Bright Manufacturing Co. 50,105; renewed Mar. 6, 1926.
Diestocks. Hart Manufacturing Co. 49,311; renewed Jan. 30, 1926.
Diestocks. Oster Manufacturing Company. 208,556; Feb. 2; Serial No. 218,017; published Nov. 17, 1925.
Drill chucks. Oberlin Manufacturing Company. 208,563; Feb. 2; Serial No. 218,716; published Nov. 10, 1925.
Engines and parts thereof, Internal-combustion. New Jersey Motors, Inc. 208,399; Feb. 2; Serial No. 197,163; published Nov. 10, 1925.
Files and rasps. Nicholson File Company. 49,411; renewed Feb. 6, 1926.
Files and rasps. Nicholson File Company. 50,135; renewed Mar. 6, 1926.
Files and rasps and handles and holders therefor. Nicholson File Company. 50,880; renewed Apr. 3, 1926.
Files, rasps, and handles and holders therefor. Nicholson File Company. 50,137; renewed Mar. 6, 1926.
Fire extinguishers. Portable. Weldon Manufacturing Company. 208,436; Feb. 2; Serial No. 211,508; published Nov. 10, 1925.
Grading machines, Road-. Stockland Road Machinery Co. 208,524; Feb. 2; Serial No. 220,745; published Nov. 17, 1925.
Ice-shaving machines. C. C. Clawson. 51,983–4; renewed May 1, 1926.
Knife, Pocket, desk, or sewing-basket. Kwik-Kut Knife Company. 208,405; Feb. 2; Serial No. 206,242; published Nov. 10, 1925.
Knives for woodworking. P. B. Yates Machine Company. 208,410; Feb. 2; Serial No. 209,521; published Nov. 10, 1925.
Linings for tube mills. F. L. Smidth & Co. 208,521; Feb. 2; Serial No. 220,976; published Nov. 17, 1925.
Locomotive beds, cradles, ash pans, buffer pockets, etc. Commonwealth Steel Company. 208,559; Feb. 2; Serial No. 218,052; published Nov. 17, 1925.
Pump cylinders and pump check valves. Red Jacket Manufacturing Company. 208,621; Feb. 2.
Razor blades and safety-razor blades. Otto Roth, Inc. 208,419; Feb. 2; Serial No. 209,499; published Sept. 1, 1925.
Road-grading machines. Stockland Road Machinery Co. 208,525; Feb. 2; Serial No. 220,744; published Nov. 17, 1925.
Rock crushers, elevators, screens, graders, etc. Good Roads Machinery Company, Inc. 208,520; Feb. 2; Serial No. 221,006; published Nov. 17, 1925.
Tools and weights for textile machines, Band-tying. Cook-Taylor Co. 208,543; Feb. 2; Serial No. 214,648; published Nov. 17, 1925.
Truck apparatus, Auto. Auto Truck Industrial Appliances, Inc. 208,523; Feb. 2; Serial No. 220,881; published Nov. 17, 1925.
Valves for internal-combustion engines, Poppet. Rich Tool Company. 208,541; Feb. 2; Serial No. 211,492; published Nov. 10, 1925.

CLASS 24.

Laundry nets. Hooper Sons' Manufacturing Co. 208,636; Feb. 2.

CLASS 26.

Lens, measuring gauges. Federal Products Corporation. 208,564; Feb. 2; Serial No. 218,805; published Nov. 10, 1925.
Lenses, Ophthalmic. New Era Optical Co. 208,507; Feb. 2; Serial No. 220,564; published Nov. 10, 1925.
Measuring flue aggregates for concrete, Machines for. Blaw-Knox Company. 208,536; Feb. 2; Serial No. 217,202; published Nov. 10, 1925.
Pictures, Machines for projecting. Triplex Manufacturing Corporation. 208,544; Feb. 2; Serial No. 213,815; published Nov. 10, 1925.
Pyrometers. Taylor Instrument Companies. 208,492; Feb. 2; Serial No. 220,979; published Nov. 10, 1925.
Spectacles and goggles. Safety Equipment Service Company. 208,477–8; Feb. 2; Serial Nos. 220,476–7; published Nov. 10, 1925.
Thermostatic device. Honeywell Heating Specialties Co. 208,555; Feb. 2; Serial No. 217,879; published Nov. 10, 1925.

CLASS 27.

Watches, clocks, and chronometers. Thos. Russell & Son. 208,633; Feb. 2.

CLASS 28.

Links, sleeve buttons, collar buttons, studs, and blouse button sets. Standard Button Company. 50,190; renewed Mar. 6, 1926.
Silver flatware, hollow ware, and tableware, Sterling-. Theodore W. Foster & Bro. Co. 50,670; renewed Mar. 27, 1926.
Silver-plated ware. Homan Silver Plate Co. 27,974; renewed Mar. 17, 1926.

CLASS 29.

Toothbrushes. Forhan Company. 208,411; Feb. 2; Serial No. 210,544; published Nov. 10, 1925.
Toothbrushes. Rhodes Bros. Incorporated. 208,484; Feb. 2; Serial No. 218,429; published Nov. 10, 1925.

CLASS 30.

Pottery, earthenware, and china. Doulton & Co. Limited. 50,410; renewed Mar. 13, 1926.

CLASS 31.

Refrigerators. Keyser & Co. 27,585; renewed Dec. 31, 1925.

CLASS 32.

Chairs, settees, couches, tables, etc. Buoyant Upholstery Company. 208,580; Feb. 2; Serial No. 215,400; published Nov. 10, 1925.
Display or show case for merchandise. E. C. Essinger. 208,461; Feb. 2; Serial No. 219,620; published Nov. 17, 1925.
Mattresses and pillows. Louisville Bedding Company. 208,468; Feb. 2; Serial No. 216,841; published Nov. 17, 1925.
Mirrors. Fiberloid Corporation. 208,418; Feb. 2; Serial No. 210,296; published Nov. 10, 1925.
Shades, Porch. Aeroshade Company. 208,583; Feb. 2; Serial No. 219,794; published Nov. 17, 1925.

CLASS 33.

Bottles, Glass. L. Rose & Co. 51,682; renewed Apr. 24, 1926.
Glass, Sheet and picture. Semon Bache & Company. 50,345; renewed Mar. 13, 1926.
Glassware, Pressed. A. H. Heisey & Co. 50,121; renewed Mar. 6, 1926.

CLASS 34.

Dampers. S. H. Howes Company. 52,046; renewed May 1, 1926.
Furnaces, both pipe and pipeless, Hot-air heating. Waterman-Waterbury Company. 208,632; Feb. 2.
Furnaces, Hot-air. Wise Furnace Company. 50,839; renewed Apr. 3, 1926.
Heating and cooking apparatus. F. & L. Kahn & Bros. 27,832; renewed Feb. 18, 1926.
Radiators, hot-air registers, and heaters, Metal cabinets for. Dixie Metal Products Co. 208,407; Feb. 2; Serial No. 208,578; published Oct. 20, 1925.

CLASS 35.

Brake linings. Allbestos Corporation. 208,628; Feb. 2.
Flaps for automobile rims. North Eastern Rubber Co. 208,400; Feb. 2; Serial No. 193,118; published Nov. 10, 1925.

Lining, Ford transmission. Atlas Asbestos Company. 208,473; Feb. 2; Serial No. 201,319; published Nov. 17, 1925.
Piston rings. Pacific Piston Ring Co. 208,431; Feb. 2; Serial No. 218,656; published Nov. 10, 1925.
Piston rings. Pacific Piston Ring Co. 208,487; Feb. 2; Serial No. 218,655; published Nov. 10, 1925.
Tires, Inner tubes for. W. R. Calhoun. 208,548; Feb. 2; Serial No. 206,939; published Nov. 17, 1925.
Tires, Inner tubes for pneumatic vehicle. Goodyear Tire & Rubber Company. 208,406; Feb. 2; Serial No. 207,240; published Nov. 10, 1925.
Transmission bands for automobiles. Russell Manufacturing Company. 208,527; Feb. 2; Serial No. 220,576; published Nov. 17, 1925.

CLASS 36.

Concertinas and accordions. Lyon & Healy. 53,180; renewed May 29, 1926.
Drums. Lyon & Healy. 51,729; renewed Apr. 24, 1926.

CLASS 37.

Pads, Memorandum. National Cardoscope Co. 208,551; Feb. 2; Serial No. 192,218; published Oct. 20, 1925.
Paper, Coated. National Coated Paper Corporation. 208,546; Feb. 2; Serial No. 212,194; published Sept. 15, 1925.
Paper, Printed Craft. Central States Paper Distributing Co. 208,558; Feb. 2; Serial No. 218,050; published Oct. 20, 1925.
Paper, Wall. A. Peats. 27,888; renewed Mar. 3, 1926.
Papers made from wood pulp. International Paper Company. 50,974; renewed Apr. 3, 1926.
Pens, Fountain. Century Pen Company. 51,262; renewed Apr. 10, 1926.

CLASS 38.

Magazine, Monthly. Athlete and Sportsman Company. 208,472; Feb. 2; Serial No. 203,781; published Dec. 3, 1924.
Newspaper, Weekly. Curtis Guild & Co. 49,123; renewed Jan. 23, 1926.

CLASS 39.

Band, Infant's. Boston Knitting Mills, Inc. 208,614; Feb. 2; Serial No. 220,492; published Nov. 10, 1925.
Bathing suits. Gulterman Bros., Inc. 208,611; Feb. 2; Serial No. 220,069; published Nov. 3, 1925.
Boots and shoes. Thomas & Company. 208,635; Feb. 2.
Boots and shoes, Leather. V. Schoenecker Boot & Shoe Company. 52,222; renewed May 1, 1926.

TO WHOM

PATENTS WERE ISSUED ON THE 2D DAY OF FEBRUARY, 1926.

NOTE.—Arranged in accordance with the first significant character or word of the name (in accordance with city and telephone directory practice). **Includes patents, reissues, and designs.**

Adams, Henry, Plainfield, N. J. Method of and apparatus for controlling and directing burning fuel or gases. 1,571,179; Feb. 2.
Adkison, John S. (See Diamond, Rubin L., assignor.)
Ahrens, John F., Brooklyn, N. Y. Collar button. 1,571,780; Feb. 2.
Air Reduction Company. (See Van Nuys, C. C., and Wilkinson, assignors.)
Air Reduction Company. (See Wilkinson, Walter, assignor.)
Aktiebolaget Auto Pins. (See Egelin, Ernst C., assignor.)
Aktiebolaget Ljungströms Angturbin. (See Ljungström, Frederik and B., assignors.)
Aldrich, Alonzo, Beloit, Wis. Paper-making machine. 1,571,362; Feb. 2.
Aldrich, Roscoe H., Allentown, Pa. Compensating device for pumps. 1,571,781; Feb. 2.
Allcutt, Chester T., Pittsburgh, Pa., assignor to Westinghouse Electric & Manufacturing Company. Measuring device. 1,571,224; Feb. 2.
Allen, Donald T., assignor to Prime Mfg. Co., Milwaukee, Wis. Phonograph. 1,571,568; Feb. 2.
Allen, Joseph W., et al. (See Camden, Andrew B., assignor.)
Allen, S. H., et al. (See Camden, Andrew B., assignor.)
Allen, William S., Birmingham, Ala. Antiglare device. 1,571,779; Feb. 2.
Alt, Otto, and C. Helsig, Kiel, assignors to Fried. Krupp Aktiengesellschaft Germaniawerft, Kiel-Gaarden, Germany. Fuel-injecting device for internal-combustion engines. 1,571,389; Feb. 2.
American Bander Company. (See Long, B. H., and Stone, assignors.)
American Dressler Tunnel Kilns, Inc. (See Dressler, Conrad, assignor.)
American Flyer Manufacturing Company. (See Becker, Harry S., assignor.)
American Manganese Steel Company. (See Knight, Hervey S., assignor.)
American Manganese Steel Company. (See Pfeil, Henry C., assignor.)
American Steel Products Co. (See Landgraf, Jacob T., assignor.)
American Steel Wheel Corporation. (See Jayne, Ames R., assignor.)
American Telephone and Telegraph Company. (See Edwards, William H., assignor.)
Anchor Cap & Closure Corporation. (See Jaeger, Max, assignor.)
Anderson, Andrew W., Aurora, Ill., and J. R. Hickox, Lincoln, Nebr. Water-treating system. 1,571,225; Feb. 2.
Anderson, Carl, assignor of one-half to T. C. Doolittle, Roza, Wash. Brake lining. 1,571,443; Feb. 2.
Anderson, David E., St. Paul, Minn. Rail cutter. 1,571,569; Feb. 2.
Anderson, Harley E., Chicago, Ill., assignor, by mesne assignments, to W. H. Miner, Inc. Railway draft rigging. 1,571,694; Feb. 2.
Anderson, James A., Grand Rapids, Mich. Combined china closet, buffet, and extension table. 1,571,896; Feb. 2.
Anderson, Ora B., Deadwood, S. Dak. Laundry device. 1,571,312; Feb. 2.
Andrews, Charles B., assignor to Taylor Wharton Iron and Steel Company, High Bridge, N. J. Dipper tooth. 1,571,782; Feb. 2.
Apex Products Company. (See Peterson, A. J., and Melvin, assignors.)
Apthorpe, William H., London, assignor to Cambridge and Paul Instrument Company Limited, Cambridge, England. Adjustable sensitive electrical regulating device. 1,571,390; Feb. 2.
Argerbright, Floyd M. (See Hockersmith, H. J., and Argerbright.)
Arrow Electric Company, The. (See Wyrfel, Samuel P., assignor.)
Ashley, Frank M. (See Trust, H., and Ashley.)
Astley, Robert, Boston, Mass. Envelope and stamp moistener. 1,571,180; Feb. 2.
Atack, Frederick W., Manchester, England. Sulphurizing organic compounds. 1,571,181; Feb. 2.
Attaway, William, assignor to Dixie Cake Company, Inc., Spartanburg, S. C. Box top. Des. 69,341; Feb. 2.
August, Frederick C., Enfield, England. Controlling the delivery of liquids. 1,571,464; Feb. 2.
Aulenback, James R., Worcester, Mass. Adjustable gauge. 1,571,783; Feb. 2.
Auspitzer, Alfred J., Munich, Germany. Device for adjustment of the side angle of sighting instruments. 1,571,177; Feb. 2.
Auto-Mailing Machinery Company. (See Smith, Edwin R., assignor.)
Averill Mfg. Co. (See Parsons, George H., assignor.)
Bablin, Jules, Paris, France. Method and apparatus for compressing gas. 1,571,615; Feb. 2.
Backherms, Alvin B., assignor of one-half to E. J. Green, Akron, Ohio. Spray nozzle. 1,571,616; Feb. 2.
Bailey, Edwin W. M., Amesbury, Mass. Window-glass channel. 1,571,831; Feb. 2.
Bailey, Edwin W. M., Amesbury, Mass. Window guide. 1,571,832; Feb. 2.
Bair, Joseph H., Camp Hill, Pa. Rotary engine valve. 1,571,465; Feb. 2.
Baker, George F. (See Birmingham, Raymond A., assignor.)
Bakketun, Torger A., Northwood, Iowa. Game board. Des. 69,342; Feb. 2.
Barber, Allan J., Woonsocket, R. I. Game. 1,571,503; Feb. 2.
Barbieri, Cesare, New York, N. Y., assignor to The Vortex Mfg. Co., Chicago, Ill. Carton and packing the same. 1,571,918; Feb. 2.
Barducci, Pilade, Naples, Italy. Drying plant. 1,571,226; Feb. 2.
Barducci, Pilade, Milan, Italy. Drying plant. 1,571,227; Feb. 2.
Barducci, Pilade, Milan, Italy. Drying plant. 1,571,228; Feb. 2.
Barducci, Pilade, Milan, Italy. Drying plant. 1,571,228; Feb. 2.
Barker, James, Kalamazoo, Mich. Fountain pen. 1,571,363; Feb. 2.
Barlow, George H., et al. (See Seely, Charles C., assignor.)
Barnum, Thomas E., Wauwatosa, and E. R. Stoekle, assignors to The Cutler-Hammer Mfg. Co., Milwaukee, Wis. Protective device for electric circuits. 1,571,182; Feb. 2.
Barnard, William M. (See O'Brien, Joseph J., assignor.)
Baron, Harry, et al., administrators. (See Baron, Joseph.)
Baron, Joseph, deceased, New York, N. Y., S. Baron and H. Baron, administrators. Dough-cutting machine. 1,571,504; Feb. 2.
Baron, Sarah, et al., administrators. (See Baron, Joseph.)
Barrows, Donald S., Rochester, N. Y., assignor, by mesne assignments, to The Symington Company. Wear plate for car-truck side frames. 1,571,229; Feb. 2.
Barthes, Emil, Salinas, Calif. Heel protector. 1,571,466; Feb. 2.
Bassett, Preston R., assignor to E. A. Sperry, Brooklyn, N. Y. Aerial flare bomb. 1,571,617; Feb. 2.
Bassick Manufacturing Company, The. (See Frier, James H., jr., assignor.)
Bates, Eddo V., Lowell, Mass. Machine for feeding fibrous material. 1,571,364; Feb. 2.
Bausman, Alonzo L., assignor to National Equipment Company, Springfield, Mass. Confection-coating machine. 1,571,365; Feb. 2.
Beaumont, R. H., Company. (See Beaumont, Robert H., assignor.)
Beaumont, Robert H., Radnor, assignor to R. H. Beaumont Company, Philadelphia, Pa. Skip-hoist bucket. 1,571,784; Feb. 2.
Bechman, Henry F., assignor to Duplex Printing Press Company, Battle Creek, Mich. Inking mechanism for printing presses. 1,571,882; Feb. 2.
Becker, Harry S., assignor to American Flyer Manufacturing Company, Chicago, Ill. Door and mounting therefor for toy railway cars. 1,571,505; Feb. 2.
Becker, Herbert W., Milwaukee, Wis. Ink remover. 1,571,313; Feb. 2.
Becker, Julius, assignor to Fried. Krupp Aktiengesellschaft, Essen-on-the-Ruhr, Germany. Sighting device, for guns. 1,571,391; Feb. 2.
Beckwith Company, The. (See Howes, George W., assignor.)
Behrstock, Isadore, Los Angeles, Calif. Stone setting. Des. 69,343; Feb. 2.

Bélanger, François X., Langdon, N. Dak. Land-cleaning device. 1,571,883; Feb. 2.
Belivcau, Uiric, Detroit, Mich. Motor-horn-operating mechanism. 1,571,695; Feb. 2.
Bell & Howell Company, The. (See Howell, Albert S., assignor.)
Bell Register, Inc. (See Bell, Samuel J., assignor.)
Bell, Samuel J., Springfield, Mass., assignor to Bell Register, Inc., Woonsocket, R. I. Change-making machine. 1,571,618; Feb. 2.
Belle City Manufacturing Company. (See Hendrickson, Robert O., assignor.)
Belvin, Preston, Richmond, Va. Heating and ventilating apparatus. 1,571,785; Feb. 2.
Bender, Lillian M., San Francisco, Calif. Portable wardrobe. 1,571,366; Feb. 2.
Benjamin Electric Manufacturing Company. (See Benjamin, Reuben B., assignor.)
Benjamin Electric Manufacturing Company. (See McClatchie, Stanley, assignor.)
Benjamin, Reuben B., assignor to Benjamin Electric Manufacturing Company, Chicago, Ill. Current tap. 1,571,696; Feb. 2.
Bennett, John L., assignor to U. S. Manufacturing Corporation, Decatur, Ill. Device or implement for killing or disabling insects, flies, and the like. 1,571,619; Feb. 2.
Bernegau, Carl M., assignor to Keuffel and Esser Company, Hoboken, N. J. Transit. 1,571,697; Feb. 2.
Berold, Frederick H., Cincinnati, Ohio. Tobacco-leaf-stemming machine. 1,571,537; Feb. 2.
Bettes, Fred M., assignor to Erie City Iron Works, Erie, Pa. Drill holder. 1,571,620; Feb. 2.
Bettinardi, Anton, Jersey City Heights, N. J. Ironing table. 1,571,698; Feb. 2.
Bilfex Products Company. (See Ericson, Willard E., assignor.)
Birmingham, Raymond A., Buena Vista, assignor of one-half to G. F. Baker, Lexington, Va. Roll-holding attachment. 1,571,786; Feb. 2.
Blackadder, Thomas, Great Neck Estates, assignor to Robeson Process Company, New York, N. Y. Making tanning preparations and products thereof. 1,571,873; Feb. 2.
Blackford, Ralph E., and C. Butterfield, Middletown, Ohio. Making metal cans. 1,571,367; Feb. 2.
Blair, Rolandis A., Fort Wayne, Ind., assignor to The P & M Company, Chicago, Ill. Rail anchor. 1,571,183; Feb. 2.
Blake, E. J. (See Jarvis, Roger E., assignor.)
Blake, R. P., et al. (See Simpson, Arthur E., assignor.)
Blaw-Knox Company. (See Garlinghouse, A. F., and Venable, assignors.)
Bleichert, Adolf, & Company. (See Gatzweiler, Johann, assignor.)
Blood, Bryant H., Hartford, Conn., assignor to Pratt & Whitney Company, New York, N. Y. Snap limit gauge. 1,571,314; Feb. 2.
Bludworth, William D., Sacramento, Calif. Pony and rider toy. Des. 69,344; Feb. 2.
Boardman, Edwin A., Hoquiam, assignor to J. F. O'Brien, Seattle, Wash. Adjustable stilt. 1,571,919; Feb. 2.
Bohn, Martin, assignor to The Keyless Lock Company, Indianapolis, Ind. Furniture. 1,571,230; Feb. 2.
Bolli, Henry, Bronx, N. Y. Saw gauge. 1,571,231; Feb. 2.
Boothe, Albert, Colfax, Iowa. Musical instrument. 1,571,315; Feb. 2.
Božić, Dobrivoje, Belgrade, Yugoslavia. Quick-action triple valve. 1,571,506; Feb. 2.
Bozich, Peter M., Spokane, Wash. Grain-car-door latch. 1,571,444; Feb. 2.
Bradley, Allen, Herndon, Va. Hay-stacking frame. 1,571,787; Feb. 2.
Brunlette, Andrew J., jr., Huntington Park, assignor of one-third to J. C. Craig, Los Angeles, Calif. Shock absorber. 1,571,788; Feb. 2.
Brandes, Friedrich W., Solvesborg, Sweden. Dustlike fuel. 1,571,621; Feb. 2.
Brandt, Edmund S. R., Newport, R. I., assignor to the Government of the United States, represented by the Secretary of the Navy. Torpedo. 1,571,507; Feb. 2.
Brandt, Maurice L. (See Ipsen, Henrik, assignor.)
Bremer, Joseph H., Tampa, Fla. Push button. 1,571,316; Feb. 2.
Brennan, Charles T., assignor to The E. J. Manville Machine Company, Waterbury, Conn. Mechanism for feeding metal blanks. 1,571,232; Feb. 2.
Brenne, Arild M., Chicago, Ill., assignor, by mesne assignments, to W. H. Miner, Inc. Friction shock-absorbing mechanism. 1,571,699; Feb. 2.
Brettschneider, Josephine, St. Paul, Minn. Water waver. 1,571,317; Feb. 2.
Bridgewater, Horace M. (See Fliegelman, D., and Bridgewater.)
Briggs Manufacturing Company. (See Marshall, William, assignor.)
Briggs, Peter A., Spokane, Wash. Press. 1,571,622; Feb. 2.
Brinton, H., Company. (See MacNamee, Joseph B., assignor.)
Brotherton, George W., O. O. Weaver, and N. W. Johnson, Hartford City, Ind. Rat trap. 1,571,392; Feb. 2.
Brown, Dee C. (See Renzetti, A. M., and Brown.)
Browning, George. (See La Chance, L. H., and Browning.)
Bruger, Louis. (See Schafran, Isaac, assignor.)
Bryant and May Proprietary Limited. (See Ney, Andrew F., assignor.)
Bunker, H. M., & Company. (See Gardner, Percy, assignor.)
Burkett, Joseph S., Macon, Ga. Collapsible derrick. 1,571,318; Feb. 2.
Buron, Joseph N., Santa Barbara, Calif. Safety stirrup. 1,571,570; Feb. 2.
Burrell, William C., Kankakee, Ill. Parting strip for cement structures. 1,571,700; Feb. 2.
Bussinger, Charles C., Modesto, Calif. Hoisting device. 1,571,789; Feb. 2.
Butler, Henry G., Houston, Tex. Method of and apparatus for burning ballast. 1,571,701; Feb. 2.
Butler, Nathan C., Cleveland, Ohio. Fuse plug. 1,571,702; Feb. 2.
Butterfield, Charles. (See Blackford, R. E., and Butterfield.)
Butzbach, Otto, Chicago, Ill., assignor to The Invincible Blow Pipe Co. Drier. 1,571,703; Feb. 2.
Buxton & Skinner Printing and Stationery Company. (See Hermann, Otto L. assignor.)
Byrne, Charles F., Janesville, Wis., assignor to General Motors Corporation, Detroit, Mich. Tractor hitch. 1,571,319; Feb. 2.
Cable, Julius L., Boston, Mass. Folding chair. 1,571,538; Feb. 2.
Cady, William M., Edgewood, assignor to The Westinghouse Air Brake Company, Wilmerding, Pa. Automotive brake. 1,571,184; Feb. 2.
Caldwell, Jack, Los Angeles, assignor of one-half to R. N. Ferguson, Pasadena, Calif. Shock absorber. 1,571,393; Feb. 2.
Caldwell, John H., Seattle, Wash. Land-clearing machine. 1,571,704; Feb. 2.
Callahan Distributor Company. (See Callahan, J. W., and Dusinberre, assignors.)
Callahan, John W., and G. B. Dusinberre, assignors to Callahan Distributor Company, Incorporated, Wellsboro, Pa. Hay-handling method and device. 1,571,539; Feb. 2.
Cambridge and Paul Instrument Company Limited. (See Apthorpe, William H., assignor.)
Camden, Andrew B., Durant, Okla., assignor to J. W. Allen and S. H. Allen, Temple, Tex. Traffic indicator and advertising sign. 1,571,790; Feb. 2.
Campbell, MacAlbert, Knoxville, Tenn. Cut-out. 1,571,791; Feb. 2.
Canine, Chester W., Norwood, Ohio. Laundry-marking tag. 1,571,792; Feb. 2.
Carle, Harold, Buffalo, N. Y., assignor, by mesne assignments, to Vortex Mfg. Co., Chicago, Ill. Cup dispenser. 1,571,705; Feb. 2.
Carlson, Wendell L., and G. W. Carpenter, Washington, D. C. Electrotherapeutic apparatus. 1,571,508; Feb. 2.
Carmichael, James H., assignor to U. S. Cartridge Company, Lowell, Mass. Making waterproof paper tubes. 1,571,706; Feb. 2.
Carpenter, Glenn W. (See Carlson, W. L., and Carpenter.)
Carroll, John E., assignor to Co-2 Products Company, Philadelphia, Pa. Vending machine for compressed gases and fluids in containers. 1,571,750; Feb. 2.
Carter, Albert S., et al. (See Warner, Harvey J., assignor.)
Case, Arthur F., assignor to The Wellman-Seaver-Morgan Company, Cleveland, Ohio. Rotary car dumper. 1,571,233; Feb. 2.
Casein Manufacturing Company, The. (See Dunham, Andrew A., assignor.)
Castellan, Giulio, San Luis Obispo, Calif. Fish gun. 1,571,751; Feb. 2.
Cavicchi, Ercole, Quincy, Mass. Base and floor border polishing machine. 1,571,571; Feb. 2.
Casper, George D., New York, assignor of one-half to W. W. Schusky, Long Island City, N. Y. Drain trap. 1,571,707; Feb. 2.
Cattell, W. J., et al. (See Warner, Harvey J., assignor.)
Cayo, Julius N., Buchanan, Mich. Top. 1,571,708; Feb. 2.
Chalmer, Ernest, Surbiton, England. Runner for curtain rods. 1,571,894; Feb. 2.
Chamberlain, Grace G., assignor of one-fifth to W. W. Fife, New Orleans, La. Automatic drip coffeepot. 1,571,752; Feb. 2.
Chartoff, Louis, and J. Sumerspitz, Brooklyn, N. Y. Display device. 1,571,623; Feb. 2.
Chevalier, John F. (Griswold, A. A., and Goddard, assignors.)
Chicago Pneumatic Tool Company. (See Hoffman, Leon F., assignor.)
Chicago Pneumatic Tool Company. (See Kimman, Theodore P., assignor.)
Chicago Pneumatic Tool Company. (See Smith, W. A., and Dockham, assignors.)
Chirelx, Henri, Paris, France. Relay. 1,571,368; Feb. 2.
Christian, John L., Pinnacle, N. C. Auto utility table. 1,571,753; Feb. 2.
Christopher, William M., Tonawanda, N. Y. Mop pail and wringer. 1,571,754; Feb. 2.

Cincinnati Bickford Tool Company, The. (See Klausmeyer, D. C., and Rickwood, assignors.)
Cincinnati Victor Company, The. (See Ryder, Charles D., assignor.)
Clark, Ansel R., Los Angeles, Calif. Apparatus and method for collecting seaweed. 1,571,395; Feb. 2.
Clark, George H., Brooklyn, N. Y., assignor to Radio Corporation of America. Variable condenser. 1,571,370; Feb. 2.
Clark, George H., Brooklyn, N. Y., assignor to Radio Corporation of America. Radio Signaling apparatus. 1,571,371; Feb. 2.
Clark, John, Walkerton, Ind. Track liner. 1,571,920; Feb. 2.
Clark, Samuel B., assignor of one-half to A. Waner, Harrah, Okla. Hydrocarbon generator. 1,571,321; Feb. 2.
Clarke, Oliver H., Washington, D. C., assignor to The Clymer Manufacturing Company, Rockford, Ill. Spot or search light assembly. 1,571,709; Feb. 2.
Clavel, René, Basel, Switzerland. Dyeing cellulose acetates. 1,571,320; Feb. 2.
Claxton, James W., Abilene, Tex. Grave marker. Des. 69,345; Feb. 2.
Clemetsen Company, The. (See Vaaler, Jens, assignor.)
Clymer Manufacturing Company, The. (See Clarke, Oliver H., assignor.)
Cobb, Edward S., assignor to Cobb Temperature Regulator Co., Los Angeles, Calif. Temperature-regulating device for orchards. 1,571,467; Feb. 2.
Cobb, John W., and H. J. Hodsman, Leeds, England. Purification of gas. 1,571,624; Feb. 2.
Cobb Temperature Regulator Co. (See Cobb, Edward S., assignor.)
Cocroft, Susanna, New York, N. Y. Facial-muscle-lifting device. 1,571,755; Feb. 2.
Code Check Guard Company. (See Gabel, Thomas R., assignor.)
Cole, Lyndon C., Hamilton, Ohio, assignor to Niles-Bement-Pond Company, New York, N. Y. Tool holder. 1,571,322; Feb. 2.
Cole, Lyndon C., and O. Pabst, Hamilton, Ohio, assignors to Niles-Bement-Pond Company, New York, N. Y. Axle-turning lathe. 1,571,323; Feb. 2.
Coles Copyholder Company. (See Coles, Howard B., assignor.)
Coles, Howard B., Brooklyn, assignor to Coles Copyholder Company, New York, N. Y. Copyholder. 1,571,658; Feb. 2.
Colomb, Henri, Tavannes, Switzerland. Manufacturing process of blanks for watch movements provided with jewel-insetting or plug holes. 1,571,756; Feb. 2.
Compagnie des Forges et Aciéries de la Marine et d'Homécourt. (See Granat, Elie, assignor.)
Compton, Pearl, Flint, Mich. Brake-band liner. 1,571,757; Feb. 2.
Comstock, L. J. (See Disch, J., and Frese, assignors.)
Conklin, Lee S., Grand Rapids, Mich. Display rack. 1,571,659; Feb. 2.
Connolly, Thomas W., Los Angeles, Calif. Adjustable support. 1,571,509; Feb. 2.
Conrad, Frank, Pittsburgh, Pa., assignor to Westinghouse Electric & Manufacturing Company. Volt-ampere meter. 1,571,234; Feb. 2.
Coolamp Company, The. (See Mull, Raymond A., assignor.)
Corney, Nehemiah P., Montville, N. J. Stickpin. Des. 69,346; Feb. 2.
Cosgrove, John W., Medford, Mass., assignor to United Shoe Machinery Corporation, Paterson, N. J. Cementing machine. 1,571,710; Feb. 2.
Cotswold Comfortable Company. (See Trout, Harry W., assignor.)
Cotton, Alfred, assignor to Heine Boiler Company, St. Louis, Mo. Water-tube boiler. 1,571,369; Feb. 2.
Co-2 Products Company. (See Carroll, John E., assignor.)
Cover, John W., and O. F. Oliver, Seattle, Wash. Piston. 1,571,185; Feb. 2.
Cowgill, H. J., et al. (See Rundell, Sam S., assignor.)
Craig, Edward, St. Joseph, Mich. Machine for feeding sheet material. 1,571,572; Feb. 2.
Craig, J. C. (See Bramlette, Andrew J., jr., assignor.)
Cramer, Albert N., assignor to The Owens Bottle Company, Toledo, Ohio. Machine for forming glass articles. 1,571,445; Feb. 2.
Cranston, Albert E., Spokane, Wash., assignor to A. J. Gerrard, Chicago, Ill. Binding machine. 1,571,573; Feb. 2.
Crosse & Blackwell Limited. (See James, George, assignor.)
Crossley, Royal E., assignor to Crouse-Hinds Company, Syracuse, N. Y. Lock. 1,571,574; Feb. 2.
Crouse-Hinds Company. (See Crossley, Royal E., assignor.)
Crouse-Hinds Company. (See Olley, E. A., and Smith, assignors.)
Cutler-Hammer Mfg. Co., The. (See Barnum, T. E., and Stockle, assignors.)
Cutler-Hammer Mfg. Co., The. (See Fernow, Bernhard E., jr., assignor.)
Czapek, Stanley, Detroit, Mich., assignor to Radiant Specialty Co. Lighting fixture. Des. 69,347; Feb. 2.
D'Albe, Edmund E. F., Kingston-on-Thames, England, assignor of one-half to B. Winfield, New York, N. Y. Telegraphic transmission of pictures and images. 1,571,897; Feb. 2.
Dalzell, Arthur G., Toronto, Ontario, Canada. Pipe-laying device. 1,571,372; Feb. 2.
Darrah, William A., Chicago, Ill. Heating gases and equipment therefor. 1,571,575; Feb. 2.
Darrow, Henry E., Santa Barbara, Calif. Pressure-equalizer valve. 1,571,396; Feb. 2.
Davignon, Victor D., North Attleboro, assignor to General Plate Company, Attleboro, Mass. Plated metal and producing the same. 1,571,540; Feb. 2.
Davignon, Victor D., North Attleboro, assignor to General Plate Company, Attleboro, Mass. Plated metal. 1,571,541; Feb. 2.
Davis, Norman E., Chene Bourg, near Geneva, Switzerland, assignor to Radio Corporation of America. Wireless transmitting apparatus. 1,571,373; Feb. 2.
Dawes, George F., La Crosse, Wis. Flaked soap and making the same. 1,571,625; Feb. 2.
Dayton, James M., Hartford, assignor to Dayton Manufacturing Company, Torrington, Conn. Heavy-duty counter. 1,571,576; Feb. 2.
Dayton, James M., Hartford, assignor to The Dayton Manufacturing Company, Torrington, Conn. Compensator. 1,571,577; Feb. 2.
Dayton Manufacturing Company, The. (See Dayton, James M., assignor.)
De Busk, William R., assignor to The P. & M. Company, Chicago, Ill. Rail anchor. 1,571,186; Feb. 2.
Deere & Company. (See Paul, William L., assignor.)
De Feo, Vincenzo, assignor to Societa Anonima Ansaldo-San Georgio, Spezia, Italy. Submarine. 1,571,833; Feb. 2.
Dennison, French E., assignor to Lipman Refrigerator Car & Manufacturing Company, Beloit, Wis. Refrigerating apparatus. 1,571,660; Feb. 2.
Deppa, Bert W., Lancaster, Ohio. Box packer. 1,571,235; Feb. 2.
Descoteau, Adelard J., Newark, N. J., assignor to The Foster Screen Co. Inc. Rod or tube coupling. 1,571,661; Feb. 2.
Desmond, Joseph J., et al. (See Seley, Charles C., assignor.)
De Villiers, Peter G. T., Pretoria, Transvaal, assignor of one-half to A. Rogers-Jenkins, Durban, Natal, South Africa. Coin-box mechanism for coin-in-the-slot machines. 1,571,692; Feb. 2.
De Villiers, Peter G. T., Pretoria, Transvaal, assignor of one-half to A. Rogers-Jenkins, Durban, Natal, South Africa. Coin-actuated signaling apparatus. 1,571,693; Feb. 2.
Dewey, Clarence L., Elkhart, Ind. Decoy. 1,571,711; Feb. 2.
De Whalley, William R. M., assignor to Rones Limited, London, England. Apparatus for filing documents and the like. 1,571,187; Feb. 2.
Diamond, Rubin L., assignor of one-half to J. S. Adkison, McHenry, Miss. Agricultural implement. 1,571,758; Feb. 2.
Diamond, Rubin L., assignor of one-half to J. S. Adkison, McHenry, Miss. Agricultural implement. 1,571,759; Feb. 2.
Dick, Seward J., Clymer, Pa. Curtain and shade supporting bracket. 1,571,760; Feb. 2.
Dickerman, John A., Bridgeport, Conn., assignor to Remington Arms Company, Inc. Making anvils for ammunition primers. 1,571,510; Feb. 2.
Dickey, Charles O., et al. (See Hartsock, Frank R., assignor.)
Dickey, Leonard E., et al. (See Hartsock, Frank R., assignor.)
Dieckmann, Edward H., Florisant, Mo. Tractor. 1,571,236; Feb. 2.
Diegel, Wilfrid E., River Rouge, Mich. Game. 1,571,188; Feb. 2.
Diehl, Frank, Wabash, Ind. Glue machine. 1,571,324; Feb. 2.
Dietzgen, Eugene, Company. (See Wedekind, Hugo, assignor.)
Dill, Errett B., Fort Wayne, Ind. Fuel-oil vaporizer. 1,571,237; Feb. 2.
Dilley, Arzeno J., River Forest, Mich. Self-lubricating spring hanger, bolt, and eye. 1,571,761; Feb. 2.
Disch, Joseph, and J. G. Frese, St. Louis, Mo., assignors to L. J. Comstock, Oakland, Calif. Adjustable step for automobile running boards. Re16,258; Feb. 2.
Dixie Cake Company. (See Attaway, William, assignor.)
Doane, Leroy C., assignor to The Miller Company, Meriden, Conn. Shade support. 1,571,578; Feb. 2.
Dockham, Clarence H. (See Smith, W. A., and Dockham.)
Donner, Carl R., Wittgenadorf, Germany. Bunghole seat of metal. 1,571,325; Feb. 2.
Donovan, John P., San Francisco, Calif. Automobile hoist. 1,571,178; Feb. 2.
Doolittle, Thomas C. (See Anderson, Carl, assignor.)
Dornier, Claudius, Friedrichshafen-on-the-Bodensee, Germany. Wooden girder. 1,571,238; Feb. 2.
Dornier, Claudius, assignor to the Firm: Dornier Metallbauten Gesellschaft mit beschränkter Haftung, Friedrichshafen-on-the-Bodensee, Germany. Metal girder for light metal structures. 1,571,239; Feb. 2.

Dornier, Claudius, assignor of one-half to Firm: Dornier Metallbauten Gesellschaft mit beschränkter Haftung, Friedrichshafen-on-the-Bodensee, Germany. Metal Girder. 1,571,240; Feb. 2.
Dornier Metallbauten Gesellschaft mit beschränkter Haftung. (See Dornier, Claudius, assignor.)
Dorsey, Farnum F., assignor to North East Electric Company, Rochester, N. Y. Lock washer. 1,571,511;
Dougan, Archie F., assignor of one-half to P. Hansen, Cochran, Oreg. Saw gauge. 1,571,397; Feb. 2.
Down, Sidney G., Pittsburgh, assignor to The Westinghouse Air Brake Company, Wilmerding, Pa. Brake-shoe construction. 1,571,241; Feb. 2.
Down, Sidney G., Pittsburgh, assignor to The Westinghouse Air Brake Company, Wilmerding, Pa. Brake-shoe construction. 1,571,242; Feb. 2.
Down, Sidney G., Pittsburgh, assignor to The Westinghouse Air Brake Company, Wilmerding, Pa. Brake-shoe construction. 1,571,243; Feb. 2.
Down, Sidney G., Pittsburgh, assignor to The Westinghouse Air Brake Company, Wilmerding, Pa. Automotive brake. 1,571,244; Feb. 2.
Down, Sidney G., Pittsburgh, assignor to The Westinghouse Air Brake Company, Wilmerding, Pa. Motor-vehicle brake. 1,571,245; Feb. 2.
Down, Sidney G., Pittsburgh, assignor to The Westinghouse Air Brake Company, Wilmerding, Pa. Automotive brake. 1,571,246; Feb. 2.
Down, Sidney G., Pittsburgh, assignor to The Westinghouse Air Brake Company, Wilmerding, Pa. Automobile brake. 1,571,247; Feb. 2.
Drake Process, Incorporated. (See Price, John D., assignor.)
Drake, Walter H. (See Price, J. D., and Drake.)
Draper Corporation. (See Rhoades, Alonzo E., assignor.)
Dreistadt, John. (See Hirthler, A. J., and Dreistadt.)
Dressler, Conrad, assignor to American Dressler Tunnel Kilns, Inc., New York, N. Y. Method of and apparatus for drying and calcining gypsum. 1,571,189; Feb. 2.
Driscoll, John S., Boston, Mass. Combined ash receptacle and cigar holder. 1,571,762; Feb. 2.
Dubilier Condenser and Radio Corporation. (See Dubilier, William, assignor.)
Dubilier Condenser & Radio Corporation. (See Van Deventer, Harry R., assignor.)
Dubilier, William, New York, N. Y., assignor to Dubilier Condenser and Radio Corporation. Electrical condenser. 1,571,512; Feb. 2.
Duncan Electric Manufacturing Company. (See Harris, Jesse, assignor.)
Dunham, Andrew A., Bainbridge, assignor to The Casein Manufacturing Company, New York, N. Y. Casein waterproof glue. 1,571,662; Feb. 2.
Dunham, Henry V., Mount Vernon, assignor to The Rosemary Creamery Company, New York, N. Y. Obtaining milk sugar. 1,571,626; Feb. 2.
Duplex Printing Press Company. (See Beckman, Henry F., assignor.)
Du Pont, E. I., de Nemours & Company. (See Scott, Winfield, assignor.)
Durgin, Mark W., Corvallis, Oreg. Hay sweep. 1,571,398; Feb. 2.
Duryea, Nina L., Stockbridge, Mass. Artificial fabric. 1,571,579; Feb. 2.
Dusinberre, George B. (See Callahan, J. W., and Dusinberre.)
Eastman Machine Company. (See Ulrich, George E., assignor.)
Edmonds, Samuel R., Washington, D. C. Dimension stone and sill machine. 1,571,763; Feb. 2.
Edwards, Charles, Lansford, assignor of one-fourth to R. H. Grenfell, and one-fourth to J. F. Grenfell, Beaver Meadows, Pa. Chain-applying device. 1,571,764; Feb. 2.
Edwards, William H., Brooklyn, N. Y., assignor to American Telephone and Telegraph Company. Telephone substation circuits. 1,571,513; Feb. 2.
Egelin, Ernst C., assignor to Aktiebolaget Antopins, Stockholm, Sweden. Box particularly for needle-shaped objects. 1,571,399; Feb. 2.
Egry Register Company, The. (See Johnson, Arthur A., assignor.)
Eickhoff, Friedrich, Rochester, N. Y. Tire-tread advertising device. 1,571,248; Feb. 2.
Electric Vacuum Cleaner Company. (See Queisser, Charles F., assignor.)
Ellis, Carleton. (See Huxham, Trevor S., assignor.)
Emack, James H., Philadelphia, Pa. Process and machine for variably cutting roofing slate. 1,571,712; Feb. 2.
Emery, Elias J., Lynn, Mass. Buffer. 1,571,713; Feb. 2.
Erickson, Arthur F., Portland, Oreg. Thermostatic oven regulator. 1,571,400; Feb. 2.
Erickson, Arthur F., Portland, Oreg. Valve. 1,571,401; Feb. 2.
Ericson, Willard E., Evanston, assignor to Bifiex Products Company, Waukegan, Ill. Automobile bumper. 1,571,249; Feb. 2.
Erie City Iron Works. (See Bettes, Fred M., assignor.)
Eschholz, Otto H., Wilkinsburg, Pa., assignor to Westinghouse Electric & Manufacturing Company. Arc-extinguishing device. 1,571,250; Feb. 2.
Eureka Radio and Phono Parts Co. (See Phillips, William, assignor.)
Evans, George E., Waco, Tex. Cotton-gin feeder. 1,571,514; Feb. 2.
Fairbanks, E. Hayward. (See Haag, Alfred H., assignor.)
Fairley, James F., Birmingham, England. Vertical wheel. 1,571,251; Feb. 2.
Faige, Robert N., and W. M. Johnson, Cleveland, Ohio, assignors to General Electric Company. Lens for vehicle lamps. 1,571,714; Feb. 2.
Famuliener, Ray, Salt Lake City, Utah. Combination inkwell and penrack. 1,571,252; Feb. 2.
Farmer, Clyde C., Pittsburgh, assignor to The Westinghouse Air Brake Company, Wilmerding, Pa. Electric train wire coupler. 1,571,190; Feb. 2.
Farmer, Clyde C., Pittsburgh, assignor to The Westinghouse Air Brake Company, Wilmerding, Pa. Interlocking switch device. 1,571,191; Feb. 2.
Farmer, Clyde C., Pittsburgh, assignor to The Westinghouse Air Brake Company, Wilmerding, Pa. Fluid-pressure brake. 1,571,192; Feb. 2.
Farrel Foundry & Machine Company. (See North, J. Frank, assignor.)
Faulkner, Arthur B., Williamsport, Pa. Adjustable vise wrench. 1,571,326; Feb. 2.
Faunce, Benjamin F., Johnstown, Pa. Wheel mill. 1,571,468; Feb. 2.
Fearing, Joseph L., Greenwich, Conn., assignor to International Paper Company. Forming watermarks in paper. 1,571,715; Feb. 2.
Fellner & Ziegler. (See Krauss, Richard, assignor.)
Fels, William, assignor to M. Nydegger, Elizabeth, N. J. Pattern-change mechanism for knitting machines. 1,571,765; Feb. 2.
Fels, William, Elberta, Ala., assignor to M. Nydegger, Elizabeth, N. J. Cam mechanism for knitting. 1,571,766; Feb. 2.
Fels, William, Elberta, Ala., assignor to M. Nydegger, Elizabeth, N. J. Motor-control system. 1,571,767; Feb. 2.
Fels, William, Elberta, Ala., assignor to M. Nydegger, Elizabeth, N. J. Cam-control mechanism for knitting machines. 1,571,768; Feb. 2.
Fels, William, Elberta, Ala., assignor to M. Nydegger, Elizabeth, N. J. Selective-thread-change mechanism for knitting machines. 1,571,769; Feb. 2.
Fenner, George E., Oxford, Wis. Artificial bait. 1,571,770; Feb. 2.
Ferguson, Robert N. (See Caldwell, Jack, assignor.)
Fernow, Bernhard E., jr., assignor to The Cutler-Hammer Mfg. Co., Milwaukee, Wis. Brake. 1,571,542; Feb. 2.
Ferro Chemicals Inc. (See McElroy, Karl P., assignor.)
Fien, Alphonsus, assignor to S. H. Pomeroy Company, Inc., New York, N. Y. Metal window. 1,571,327; Feb. 2.
Fife, Walter W. (See Chamberlain, Grace G., assignor.)
Fishburn, Moses P., Carthage, Mo. Auto wrench. 1,571,580; Feb. 2.
Fischer, Albert C., Chicago, Ill. Expansion joint. 1,571,874; Feb. 2.
Fischer, Frank H., Atlantic City, N. J. Sign. 1,571,771; Feb. 2.
Fisher, Frank B., jr. (See Kirk, E. J., Jones, and Fisher, jr.)
Fisher, George H., Leavenworth, Kans. Water-recooling apparatus. 1,571,253; Feb. 2.
Fisher, John M., Salt Lake City, Utah. Stovepipe fastener. 1,571,772; Feb. 2.
Fishwick, Victor S., Cincinnati, Ohio. Carton-filling machine. 1,571,716; Feb. 2.
Flanigan, Joseph H., assignor of one-half to C. R. Sharp, Shemeld, Ala. Wrench. 1,571,328; Feb. 2.
Fleming, Ora A., Lincoln, Me. Safety gate. 1,571,402; Feb. 2.
Fleming, Richard C., Detroit, Mich. Diestock. 1,571,515; Feb. 2.
Fletcher, George H., Ashton-on-Mersey, England, assignor to Westinghouse Electric and Manufacturing Company. Armature of dynamo-electric machines. 1,571,914; Feb. 2.
Fletcher Works Incorporated. (See Schaum, Carl, assignor.)
Fliegelman, David, and H. M. Bridgewater, Bridgeport, Conn. Holder for flags or the like. 1,571,581; Feb. 2.
Flynn, Michael A., Akron, Ohio. Mold for curing inner tubes. 1,571,193; Feb. 2.
Folberth, Fred G. and W. M., Cleveland, Ohio, assignors to Trico Products Corporation, Buffalo, N. Y. Windshield cleaner. 1,571,516; Feb. 2.
Folberth, William M. (See Folberth, Fred G. and W. M.)
Foote, Charles B., New York, N. Y. Dauber. 1,571,254; Feb. 2.
Foote, Frank L., Boy River, Minn. Headlight-dimming means. 1,571,255; Feb. 2.
Force, Harold H., Philadelphia, Pa. Portable shoe-polishing machine. 1,571,773; Feb. 2.
Fornaca, Guido, Turin, Italy. Hydraulic brake system. 1,571,517; Feb. 2.
Fortescue, Charles L., Pittsburgh, Pa., assignor to Westinghouse Electric & Manufacturing Company. Electrical protective device. 1,571,256; Feb. 2.
Foss, Carl and S. O., Seattle, Wash. Oil-engine heater. 1,571,663; Feb. 2.
Foss, Simon O. (See Foss, Carl and S. O.)

Foster, Ernest, North Brunswick, Victoria, assignor to Vermont Casein Pty, Ltd., Melbourne, Victoria, Australia. Apparatus for reducing and drying casein curd. 1,571,518; Feb. 2.
Foster Screen Co., The. (See Descoteau, Adelard J., assignor.)
Frantz, Peter, assignor to Frantz Manufacturing Co., Sterling, Ill. Door catch. 1,571,194; Feb. 2.
Frantz Manufacturing Co. (See Frantz, Peter, assignor.)
Franzino, Jack, New York, N. Y. Wall plate for lighting fixtures. Des. 69,348; Feb. 2.
Franzino, Jack, New York, N. Y. Wall plate for lighting fixtures. Des. 69,349; Feb. 2.
Fratzke, Gustav, Merrill, Wis. Portable door lock. 1,571,543; Feb. 2.
Fredette, Frank H., Newark, N. J. Baseball game. 1,571,469; Feb. 2.
Freeman, Hubert M., Wilkinsburg, Pa., assignor to Westinghouse Electric & Manufacturing Company. Grid leak. 1,571,257; Feb. 2.
Frese, John G. (See Diech, J., and Frese.)
Freund, Emanuel, New York, N. Y. Statuette. Des. 69,350; Feb. 2.
Fried. Krupp Aktiengesellschaft. (See Becker, Julius, assignor.)
Fried. Krupp Aktiengesellschaft Germaniawerft. (See Alt, O., and Heisig, assignors.)
Frier, James H., jr., Evanston, assignor to The Bassick Manufacturing Company, Chicago, Ill. Pump. 1,571,915; Feb. 2.
Frunz, Frank J., and J. W., Patterson, Calif. Automatic air valve. 1,571,258; Feb. 2.
Frunz, John W. (See Frunz, Frank J. and J. W.)
Fulton, Loyd R., Huntington Park, Calif. Vertical-space register for typewriters. 1,571,403; Feb. 2.
Furber, Frederick M., Revere, Mass., assignor to United Shoe Machinery Corporation, Paterson, N. J. Controlling mechanism. 1,571,259; Feb. 2.
Gabel, Thomas R., Los Angeles, Calif., assignor to Code Check Guard Company. Check protector. 1,571,470; Feb. 2.
Gabrielson, Carl, Syracuse, N. Y. Reverse line-spacing device for typewriting machines. 1,571,519; Feb. 2.
Gaffney, Leo, Philadelphia, Pa. Valve-spring lifter. 1,571,195; Feb. 2.
Gairing, Emil, Detroit, Mich. Boring tool. 1,571,260; Feb. 2.
Galant, Wladyslaw, Chicago, Ill. Aquarium. 1,571,196; Feb. 2.
Galayda, Michael F., Pageton, W. Va. Radioheadgear. 1,571,471; Feb. 2.
Gardocky, Walter, Conshohocken, Pa. Machine for placing flipper strips on tire beads. 1,571,404; Feb. 2.
Gardner, Percy, East Orange, N. J., assignor to H. M. Bunker & Company, Inc., New York, N. Y. Machine for forming tubular fabrics. 1,571,774; Feb. 2.
Garlinghouse, Albert F., Aspinwall Borough, and W. M. Venable, Pittsburgh, Pa., assignors to Blaw-Knox Company. Measuring device for bulk materials. 1,571,544; Feb. 2.
Garris, Bernard J., Wilmington, Del., assignor of one-half to L. Samel, South Sterling, N. J. Dispensing device. 1,571,775; Feb. 2.
Gatzweiler, Johann, assignor to Adolf Bleichert & Company, Leipzig-Gohlis, Germany. Aerial ropeway. 1,571,520; Feb. 2.
General Electric Company. (See Faige, R. N., and Johnson, assignors.)
General Electric Company. (See Gräner, Ladislaus P., assignor.)
General Electric Company. (See Kjolseth, Ole K., assignor.)
General Electric Company. (See Schombourger, Lucien, assignor.)
General Electric Company. (See Steenstrup, Christian, assignor.)
General Motors Corporation. (See Byrne, Charles F., assignor.)
General Motors Corporation. (See Midgley, Thomas, jr., assignor.)
General Motors Corporation. (See Thomas, John G. P., assignor.)
General Motors Corporation. (See Whitacre, Clarence J., assignor.)
General Motors Research Corporation. (See Summers, Caleb E., assignor.)
General Plate Company. (See Davignon, Victor D., assignor.)
George, Jerome R., assignor to Morgan Construction Company, Worcester, Mass. Conveying mechanism. 1,571,521; Feb. 2.
Germond, Henry S., jr., Bayonne, N. J. Portable elevator. 1,571,627; Feb. 2.
Gerrard, Alec J. (See Cranston, Albert E., assignor.)
Gesellschaft für Chemische Produktion m. b. H. (See Schmidt, Erwin, assignor.)
Gesellschaft für Drahtlose Telegraphie m. b. H. (See Schloemilch, Wilhelm, assignor.)
Gibbons, Charles J., Bridgeport, Conn. Rolling mill. 1,571,545; Feb. 2.
Gilbert, Charles E., Fort Wayne, Ind. Attachment for reproducing facsimile signatures. 1,571,664; Feb. 2.
Gilman, George H., Boston, Mass. Heat treating of articles. 1,571,329; Feb. 2.
Ginter, Earl E., Ranshaw, Pa. Combined compass and protractor. 1,571,261; Feb. 2.
Glaser, John E., East Hartford, Conn. Magazine for firearms. 1,571,776; Feb. 2.
Goddard, Alvin C. (See Griswold, A. A., and Goddard.)
Goetzke, Herman W. A., North St. Paul, Minn. Finger ring. Des. 69,351; Feb. 2.
Goldberg, Meyer J. Muskegon, assignor, by mesne assignments, to The Maximotor Company, Muskegon Heights, Mich. Explosive-mixture-supply control device for internal-combustion engines. 1,571,197; Feb. 2.
Golden, Charles F., Denver, Ind. Circle-working implement. 1,571,777; Feb. 2.
Golding Bros. Company. (See Korzinek, William C., assignor.)
Goldsmith, Alfred N., New York, N. Y., assignor, by mesne assignments, to Radio Corporation of America. Apparatus for wave changing in radiosignaling. 1,571,405; Feb. 2.
Golinick, Paul A., assignor to Spiegel, May, Stern Co., Chicago, Ill. Tray. 1,571,330; Feb. 2.
Ganzález, Joaquin M., Marcane Termino, Palma Soriano, Cuba. Injector. 1,571,406; Feb. 2.
Gourtoff, Paul A., Edgemere, N. Y. Aeroplane kite. 1,571,472; Feb. 2.
Government of the United States. (See McVay, Charles B., jr., assignor.)
Government of the United States, represented by the Secretary of the Navy. (See Brandt, Edmund S. R., assignor.)
Granat, Elie, assignor of one-half to Compagnie des Forges et Aciéries de la Marine et d'Homécourt, Paris, France. Electric distant control system. 1,571,262; Feb. 2.
Grandjean, Marc, Paris, France. Paper-feeding means for stenographic machines. 1,571,522; Feb. 2.
Gräner, Ladislaus P., Eindhoven, Netherlands, assignor, by mesne assignments, to General Electric Company. Manufacturing metal caps for electric incandescent lamps. 1,571,717; Feb. 2.
Gray, Frederick O., assignor to Ohmer Fare Register Company, Dayton, Ohio. Taximeter fare-counter control. 1,571,263; Feb. 2.
Green, Elmer J. (See Backherms, Alvin B., assignor.)
Greist Manufacturing Company, The. (See Greist, Walter C., assignor.)
Greist, Walter C., assignor to The Greist Manufacturing Company, New Haven, Conn. Portable lamp. 1,571,407; Feb. 2.
Grenfell, John F., et al. (See Edwards, Charles, assignor.)
Grenfell, Richard H., et al. (See Edwards, Charles, assignor.)
Gretsch, Rudolf, Berlin-Grunewald, Germany, assignor to Westinghouse Electric & Manufacturing Company. Vehicle stabilizer. 1,571,264; Feb. 2.
Gridley, Charles C., Columbus, Ohio. Roof ventilator. 1,571,473; Feb. 2.
Grillet, Nicolas B., Neuilly, assignor to Societe pour la Fabrication de la Soie "Rhodiaseta", Paris, France. Apparatus for the manufacture of artificial threads or filaments. 1,571,474; Feb. 2.
Grimshaw, William, Glen Ellyn, Ill. Fire extinguisher. 1,571,546; Feb. 2.
Griswold, Albert A., Providence, R. I., and A. C. Goddard, Richmond Hill, N. Y., assignors of one-half to said Griswold and one-half to J. F. Chevalier, Brookline, Mass. Flexible-shingle-wiring machine. 1,571,582; Feb. 2.
Gross, Benjamin & Edward J., Co. (See Scherer, Charles, assignor.)
Grubman Engineering & Manufacturing Co. (See Grubman, Leo J., assignor.)
Grubman, L. J., Incorporated. (See Grubman, Leo J., assignor.)
Grubman, Leo J., Belle Harbor, assignor to L. J. Grubman, Incorporated, Long Island City, N. Y. Applying eye mountings in dol heads. 1,571,916; Feb. 2.
Grubman, Leo J., Belle Harbor, assignor to Grubman Engineering & Manufacturing Co. Inc., Long Island City, N. Y. Applying eye mountings in doll heads. 1,571,917; Feb. 2.
Guelbaum, David, Syracuse, N. Y. Universal grain-cutting machine. 1,571,408; Feb. 2.
Guenther, Henry J., assignor to Therman Leather Goods Co., Inc., New York, N. Y. Brief bag. 1,571,475; Feb. 2.
Gunn Furniture Company, The. (See Richards, James A., assignor.)
Gurley, W. & L. E. (See Price, William G., assignor.)
Haag, Alfred H., Baltimore, Md., assignor of fifteen one-hundredths to E. Hayward Fairbanks, Merchantville, N. J. Radiocabinet. 1,571,665; Feb. 2.
Hagar, Arthur P., Newark, N. J., assignor to The Safety Car Heating and Lighting Company. Signal apparatus. 1,571,547; Feb. 2.
Hagman, William J., Philadelphia, Pa., assignor to Niles-Bement-Pond Company, New York, N. Y. Axle cutting-off and centering machine. 1,571,331; Feb. 2.
Halvorsen, Henry, Detroit, Mich. Heat-treating furnace. 1,571,666; Feb. 2.
Hanes, Nathan G. (See Scott, N. I., and Hanes.)
Hansen, Pete. (See Dougan, Archie F., assignor.)
Harris, J. M., et al. (See Simpson, Arthur E., assignor.)

Harris, Jesse, assignor to Duncan Electric Manufacturing Company, La Fayette, Ind. Induction electricity meter. 1,571,198; Feb. 2.
Harris, Jesse, assignor to Duncan Electric Manufacturing Company, La Fayette, Ind. Synchronous induction motor. 1,571,199; Feb. 2.
Harris, Jesse, assignor to Duncan Manufacturing Company, La Fayette, Ind. Induction electricity meter. 1,571,200; Feb. 2.
Hartman, Charles H., assignor to W. F. Stimpson, Louisville, Ky. Knife-edge pivot for scales. 1,571,265; Feb. 2.
Hartsock, Frank R., assignor of one-half to C. O. Dickey and one-third to L. E. Dickey, Warsaw, Ind. Rim tool. 1,571,266; Feb. 2.
Hartsock, Frank R., assignor of one-third to C. O. Dickey and one-third to L. E. Dickey, Warsaw, Ind. Tube-flaring tool. 1,571,267; Feb. 2.
Hartung, Theodore A., Austin, Tex. Riding Fresno scraper. 1,571,476; Feb. 2.
Haseltine, Stacy B., Chicago, Ill., assignor, by mesne assignments, to W. H. Miner, Inc. Friction shock-absorbing mechanism. 1,571,898; Feb. 2.
Haseltine, Stacy B., Chicago, Ill., assignor, by mesne assignments, to W. H. Miner, Inc. Door operating and locking device. 1,571,899; Feb. 2.
Hayes, Ira P., Eckford, Mich. Poultry feeder. 1,571,409; Feb. 2.
Haynes, Charles M., Chillicothe, Ohio. Self-filling fountain pen. 1,571,477; Feb. 2.
Hein, George N., San Francisco, Calif. Adjustable piston-rod centering guide and coupling, especially adapted for syringes. 1,571,268; Feb. 2.
Heine Boiler Company. (See Cotton, Alfred, assignor.)
Helsig, Curt. (See Alt, O., and Helsig.)
Hendler, Oscar, Vienna, Austria. Holder for cigarettes and cigars. 1,571,410; Feb. 2.
Hendrickson, Robert O., assignor to Belle City Manufacturing Company, Racine, Wis. Tractor. 1,571,628; Feb. 2.
Henry, William, McCarthy, Alaska. Automatic stop. 1,571,834; Feb. 2.
Heppes, Otto A., Chicago, Ill., assignor to The Richardson Company, Lockland, Ohio. Building board and making it. 1,571,667; Feb. 2.
Hermann, Otto L., assignor to Buxton & Skinner Printing and Stationery Company, St. Louis, Mo. Loose-leaf binder. 1,571,905; Feb. 2.
Hermanowich, Stephen, Ellwood City, Pa. Ice-card holder. 1,571,835; Feb. 2.
Herminghausen, Louis W., Mendon, Mo., assignor of one-half to J. H. Staples, Shawnee, Okla. Fishing tool. 1,571,332; Feb. 2.
Hess, Edward B., assignor to Royal Typewriter Company, Inc., New York, N. Y. Typewriting machine. 1,571,718; Feb. 2.
Hess, Edward B., assignor to Royal Typewriter Company, Inc., New York, N. Y. Typewriting machine. 1,571,719; Feb. 2.
Hess, Edward B., assignor to Royal Typewriter Company, Inc., New York, N. Y. Typewriting machine. 1,571,720; Feb. 2.
Hess, Edward B., New York, and L. C. Myers, Freeport, assignors to Royal Typewriter Company, Inc., New York, N. Y. Typewriting machine. 1,571,721; Feb. 2.
Heverle, Richard L. (See Weiland, Frank E., assignor.)
Hewitt, Arthur J. (See McLeod, J. E., and Hewitt.)
Heywood, Anna R. (See Moisan, M. V., and Heywood.)
Hickox, Jay R. (See Anderson, A. W., and Hickox.)
Hirthler, Alfred J., and J. Dreistadt, Wilkes-Barre, Pa. Cartridge for blasting powder. 1,571,478; Feb. 2.
Hockersmith, Howard J., and F. M. Argerbright, Great Falls, Mont.; said Argerbright assignor to said Hockersmith. Soldering iron. 1,571,836; Feb. 2.
Hodsman, Henry J. (See Cobb, J. W., and Hodsman.)
Hoffman, Leon F., Franklin, Pa., assignor to Chicago Pneumatic Tool Company, New York, N. Y. Cylinder head for internal-combustion engines. 1,571,583; Feb. 2.
Hoffman, Ralph A., Marshalltown, Iowa. Grid for storage batteries. 1,571,333; Feb. 2.
Holland, Pink D., Saratoga, Tex. Resilient wheel. 1,571,411; Feb. 2.
Holley, Julius J., La Crosse, Wis. Automobile signal device. 1,571,722; Feb. 2.
Homan, William C., Meriden, Conn., assignor to L. T. Wilcox, Peekskill, N. Y. Wick holder. 1,571,668; Feb. 2.
Hompe, Robert W., Cleveland Heights, Ohio. Valve lock. 1,571,669; Feb. 2.
Horton, Thomas A., and A. E. Maspons, Kingston, N. Y. Cigar-mold press. 1,571,548; Feb. 2.
Howard, Frank E., assignor to James L. Howard and Company, Hartford, Conn. Door hanger. 1,571,334; Feb. 2.
Howard, James L., and Company. (See Howard, Frank E., assignor.)
Howell, Albert S., assignor to The Bell & Howell Company, Chicago, Ill. Photographic camera. 1,571,670; Feb. 2.
Howells, Julius M., Oakland, Calif. Hydraulic-fill-dam-building machine. 1,571,446; Feb. 2.
Howes, George W., assignor to The Beckwith Company, Dowagiac, Mich. Stove. 1,571,723; Feb. 2.
Houston Blow Pipe & Sheet Metal Works. (See Rogers, John C., assignor.)
Hubbs, Charles L., San Diego, Calif. Safety lock for motor vehicles. 1,571,724; Feb. 2.
Huber, Frederick W., San Francisco, Calif. Indexing device. 1,571,479; Feb. 2.
Hudson Motor Car Company. (See Machesky, John V., assignor.)
Hugé, Etienne, Indret, France. Sprayer. 1,571,629; Feb. 2.
Hull, John C., Gasport, N. Y. Cooling system for sprayers. 1,571,837; Feb. 2.
Hutchinson, Frank L., Wauwatosa, assignor, by mesne assignments, to Milwaukee Valve Company, Milwaukee, Wis. Steam trap. 1,571,921; Feb. 2.
Hutson, Archibald, Erie, Pa. Clamshell dredger bucket. 1,571,838; Feb. 2.
Huxham, Trevor S., Bloomfield, assignor, by mesne assignments, to C. Ellis, Montclair, N. J. Composition for molding and making same. 1,571,447; Feb. 2.
Improved Paper Machinery Company. (See Reed, H. J., and Spafford, assignors.)
Industrial Gloves Corporation. (See Millard, Irwin W., assignor.)
Ingersoll-Rand Company. (See Smith, William A., assignor.)
International Paper Company. (See Fearing, Joseph L., assignor.)
International Patents Development Company. (See Jeffries, Frederick L., assignor.)
International Patents Development Company. (See Newkirk, William B., assignor.)
Invincible Blow Pipe Co., The. (See Butzbach, Otto, assignor.)
Ipsen, Henrik, Brooklyn, assignor to M. L. Brandt, New York, N. Y. Razor stropper. 1,571,523; Feb. 2.
Irvin, Richard, Knoxville, Pa. Producing sheet-metal pipe. 1,571,412; Feb. 2.
Irving-Pitt Manufacturing Company. (See Pitt, William P., assignor.)
Iven, Charles J., assignor to J. H. Sager Company, Rochester, N. Y. Bumper for motor vehicles. 1,571,671; Feb. 2.
Jaeger, Max, assignor to Anchor Cap & Closure Corporation, Brooklyn, N. Y. Package-assembling machine. 1,571,269; Feb. 2.
James, George, assignor to Crosse & Blackwell Limited, London, England. Jar. Des. 69,352; Feb. 2.
James, Paul N. C., Paris, France. Double control of the combined type for aeroplanes and for like purposes. 1,571,413; Feb. 2.
Janes, Clyde M., Pawtucket, R. I., Stafety stop light. 1,571,584; Feb. 2.
Japolsky, Nicolas, London, England. High-tension circuit breaker. 1,571,630; Feb. 2.
Jacquemin, André F., Saucourt, France. Furnace for the heating and unwinding of wire. 1,571,839; Feb. 2.
Jarvis, Roger E., assignor of one-half to E. J. Blake, St. Louis, Mo. Covering for plumbing fixtures and the like. 1,571,335; Feb. 2.
Jayne, Ames R., assignor to American Steel Wheel Corporation, Chicago, Ill. Punch and die construction. 1,571,672; Feb. 2.
Jayne, Ames R., assignor to American Steel Wheel Corporation, Chicago, Ill. Automobile wheel-forming punch and die. 1,571,673; Feb. 2.
Jefferies, Frederick L., Riverside, Ill., assignor, by mesne assignments, to International Patents Development Company. Liquid-sampling apparatus. 1,571,201; Feb. 2.
Jeffrey Manufacturing Company, The. (See Levin, Nils D., assignor.)
Jensen, Herbert G., Detroit, Mich. Thermostatic control for heaters. 1,571,270; Feb. 2.
Jensen, Vernon W., Seattle, Wash. Amplifier. 1,571,414; Feb. 2.
Jenssen, G. D., Company. (See Jenssen, Jacob D., assignor.)
Jenssen, Jacob D., assignor to G. D. Jenssen Company, New York, N. Y. Producing acid liquor in sulphite pulp processes. 1,571,271; Feb. 2.
Johnson, Augusta S., Brooklyn, assignor to Model Brassiere Co., Inc., New York, N. Y. Brassière. 1,571,415; Feb. 2.
Johnson, Frank P. (See Johnson, William R. and F. P.)
Johnson, Nathan W. (See Brotherton, G. W., Weaver, and Johnson.)
Johnson, Arthur A., Bridgeport, Conn., assignor to The Egry Register Company, Dayton, Ohio. Autographic register. 1,571,448; Feb. 2.
Johnson, Wilbur M., (See Faige, R. N., and Johnson.)
Johnson, William R. and F. P., assignors to F. E. Reed Glass Company, Rochester, N. Y. Bottle. Des. 69,353; Feb. 2.
Johnston, Alfred P., Winnipeg, Manitoba, Canada. Multigraph rail-soldering machine. 1,571,416; Feb. 2.
Jones, Thomas D. (See Kirk, E. J., Jones, and Fisher, jr.)
Jorgensen, Olav E., assignor to Worthington Pump and Machinery Corporation, New York, N. Y. Fuel pump for internal-combustion engines. 1,571,585; Feb. 2.
Juhász, Julius, Madison, Conn. Reversible turndown collar and making the same. 1,571,480; Feb. 2.
Kadel, Byers W., Baltimore, Md., assignor by mesne assignments to The Symington Company. Journal box. 1,571,272; Feb. 2.

Kadel, Byers W., Baltimore, Md., assignor, by mesne assignments, to The Symington Company. Side frame. 1,571,273; Feb. 2.
Kamp, Alphonse, Ostend, Belgium. Bogie for rail and tramway cars. 1,571,274; Feb. 2.
Kandera, John, New York, N. Y. Planer. 1,571,449; Feb. 2.
Karcher, Otto, Canton, Ohio. Velocipede. 1,571,202; Feb. 2.
Kasmeier, John, Beeville, Tex. Insect destroyer. 1,571,481; Feb. 2.
Kass, Louis J., assignor to The Ferdinand Strauss Corporation, New York, N. Y. Mechanical toy. 1,571,203; Feb. 2.
Kaufman, David, New York, N. Y. Protective apparatus for bank windows and the like. 1,571,450; Feb. 2.
Kaufmann, Jacob, Elkins Park, assignor to Steel Heddle Manufacturing Company, Philadelphia, Pa. Pile-forming wire for pile-fabric looms. 1,571,586; Feb. 2.
Kayser, Julius, & Co. (See Terry, William B., assignor.)
Kazarian, Kasber, Providence, R. I. Bobbin holder for braiding machines. 1,571,587; Feb. 2.
Keller, Westfield H., Watertown, N. Y. Fuel-conserving device for locomotives. 1,571,840; Feb. 2.
Keller, Louis B., Chicago, Ill. Vehicle signal. 1,571,841; Feb. 2.
Kelley, Edgar A., Berkeley, Calif. Hose rack. 1,571,275; Feb. 2.
Kelling, Gustave C., Chicago, Ill. Measuring machine for peanuts and the like. 1,571,588; Feb. 2.
Kelly, William L., Olyphant, assignor to J. D. Monie, Scranton, Pa. Clothesline holder. 1,571,336; Feb. 2.
Kenyon, Otis A., New York, N. Y., assignor to Westinghouse Electric & Manufacturing Company. Automatic welder. 1,571,924; Feb. 2.
Kerr, Elizabeth A., Dublin, Ireland. Apparatus for the manufacture of candles. 1,571,589; Feb. 2.
Kerth, Arthur J., Clayton, Mo. Automobile bed. 1,571,549; Feb. 2.
Keuffel and Esser Company. (See Bernegau, Carl M., assignor.)
Keyless Lock Company, The. (See Bohn, Martin, assignor.)
Kimman, Theodore P., Cleveland, Ohio, assignor to Chicago Pneumatic Tool Company, New York, N. Y. Venting apparatus for motors. 1,571,550; Feb. 2.
Kincade, John M., assignor of two-fifths to F. E. Snypp, Springfield, Ohio. Railway. 1,571,590; Feb. 2.
King, Charles D., Rutherford, N. J. Paper fastener. 1,571,482; Feb. 2.
Kingsley, Harold T., Detroit, Mich. Mechanical toy. 1,571,674; Feb. 2.
Kirby, James B., Cleveland, Ohio. Suction cleaner. 1,571,276; Feb. 2.
Kirk, Eugene J., T. D. Jones, Kansas City, Mo., and F. B. Fisher, jr., Kansas City, Kans. Tone arm and wireless headpiece coupling. 1,571,204; Feb. 2.
Kitson Engineering Company (London) Limited, The. (See McNutt, William A., assignor.)
Kjelsberg, Harald A., Wilkinsburg, Pa., assignor to Westinghouse Electric & Manufacturing Company. Motor suspension. 1,571,906; Feb. 2.
Kjolseth, Ole K., Scotia, N. Y., assignor to General Electric Company. Locomotive or car truck. 1,571,725; Feb. 2.
Klausmeyer, David C., and R. L. Rickwood, assignors to The Cincinnati Bickford Tool Company, Cincinnati, Ohio. Radial-drill column clamp. 1,571,893; Feb. 2.
Klein, Max, assignor to Shapiro & Aronson, Inc., New York, N. Y. Body for lighting fixtures. Des. 69,354; Feb. 2.
Kleinow, George A., Marquette, Iowa. Line-chalking device. 1,571,483; Feb. 2.
Knab Corporation, The. (See Knab, Elmer L., assignor.)
Knab, Elmer L., assignor to The Knab Corporation, Rochester, N. Y. Eaves-trough hanger. 1,571,277; Feb. 2.
Knight, Edward M., Brooklyn, N. Y. Filtering medium. 1,571,417; Feb. 2.
Knight, Herbert M., Montclair, N. J. Tank. 1,571,484; Feb. 2.
Knight, Hervey S., Evanston, assignor to American Manganese Steel Company, Chicago, Ill. Grate bar for pulverizing machines. 1,571,675; Feb. 2.
Knowles, Carroll, Hartford, Conn., assignor to Pratt & Whitney Company, New York, N. Y. Gear grinder. 1,571,337; Feb. 2.
Kornn, John J., Oklahoma City, Okla. Radiator cap. Des. 69,355; Feb. 2.
Korzinek, William C., Cliffside Park, N. J., assignor to Golding Bros. Company, New York, N. Y. Textile fabric. Des. 69,356; Feb. 2.
Krakan, Frank G., Pittsburgh, Pa. Automobile spring device. 1,571,451; Feb. 2.
Kramer, Henry W., Kingston, assignor of one-half to R. P. Young, Marlboro, N. Y. Detachable handle and attaching means for wooden baskets. 1,571,551; Feb. 2.
Kratochvil, Joseph, Bridgeville, Pa. Paintbrush. 1,571,338; Feb. 2.
Krauss, Richard, Frankfort-on-the-Main-Rodelheim, assignor to Firm of Fellner & Ziegler, Frankfort-on-the-Main, Germany. Coal dust and air supply in Siemens-Martin and like furnaces. 1,571,418; Feb. 2.
Krueger, Carl W., Norwood, Ohio. Combined deflector and cover for heated air registers. 1,571,631; Feb. 2.
Krug, John B., Philadelphia, Pa. Game apparatus. 1,571,726; Feb. 2.
Kühn, Ludwig, Berlin-Charlottenburg, Germany, assignor to Westinghouse Electric & Manufacturing Company. Connection for producing oscillations with vacuum tubes. 1,571,278; Feb. 2.
Labry, Joseph S., sr., Morganza, La. Soap holder. 1,571,842; Feb. 2.
La Chance, Leander H., and G. Browning, assignors to Lee Razor Manufacturing Company, Chicago, Ill. Safety razor. 1,571,552; Feb. 2.
Lamb, Margaret S., St. Paul, Minn. Figure toy. 1,571,279; Feb. 2.
Lamson Company, The. (See Maclaren, James G., assignor.)
Lamson, Dode M. (See Maus, H. P., and Lamson.)
Landgraf, Jacob T., assignor to American Steel Products Co., Macomb, Ill. Incubator. 1,571,280; Feb. 2.
Lanus, Charles R., Pocahontas, Iowa. Attachment for traction wheels. 1,571,419; Feb. 2.
La Port, George E., St. Joseph, Mo. Combination lock. 1,571,281; Feb. 2.
Laughlin, John N., and F. J. Myers, National Military Home, Kans. Coffee-urn crown. 1,571,843; Feb. 2.
Laurent, Antoine A., Minneapolis, Minn. Operating table. 1,571,205; Feb. 2.
Lautenschlager, William F., Cincinnati, Ohio. Machine element. 1,571,206; Feb. 2.
Lawrence, Obed I., Pauls Valley, Okla. Cash register. 1,571,485; Feb. 2.
Le Cras, Thomas J., Toronto, Ontario, Canada. Abdominal support. 1,571,420; Feb. 2.
Léculier, Paul, Lyon, France. Apparatus for drying fabrics or the like. 1,571,282; Feb. 2.
Lee Razor Manufacturing Company. (See La Chance, L. H., and Browning, assignors.)
Lee, Walter H., Washington, D. C. Display form. 1,571,844; Feb. 2.
Lefebvre, Albert, Pre Saint Gervais, France. Oil pump. 1,571,845; Feb. 2.
Leidecker, Frank W., Tulsa, Okla. Swab. 1,571,876; Feb. 2.
Lehman, Frank H., Lebanon, Pa. Receptacle for the storage of articles of food. 1,571,875; Feb. 2.
Lehman, William C., Cannelton, Ind. High chair. 1,571,846; Feb. 2.
Lentz, George W., assignor to United Alloy Steel Corporation, Canton, Ohio. Sheet-metal-straightening machine. 1,571,207; Feb. 2.
Lesser, Abraham B., Chicago, Ill. Safety pocket. 1,571,847; Feb. 2.
Levin, Nils D., assignor to The Jeffrey Manufacturing Company, Columbus, Ohio. Locomotive headlight. Des. 69,357; Feb. 2.
Lind, Arvid, Stockholm, Sweden. Starting and steering device for boat-propelling apparatus. 1,571,421; Feb. 2.
Lindgren, Adolph F., Buffalo, N. Y. Lined sheet-metal barrel. 1,571,208; Feb. 2.
Link, Theodore H., Chicago, Ill., assignor, by mesne assignments, to W. H. Miner, Inc. Hand brake. 1,571,677; Feb. 2.
Lipman Refrigerator Car and Manufacturing Company. (See Dennison, French E., assignor.)
Lidseen, Gustave, Chicago, Ill. Combined pump and force-feed oil can. 1,571,676; Feb. 2.
Ljungström, Birger. (See Ljungström, Fredrik and B.)
Ljungström, Fredrik, Lidingo-Brevik, and B. Ljungström, assignors to Aktiebolaget Ljungströms Ångturbin, Stockholm, Sweden. Air-cooled condenser. 1,571,524; Feb. 2.
Lobenstein, Walter, Brooklyn, N. Y. Auxiliary eyeglasses or spectacles. 1,571,848; Feb. 2.
Lockwood, Harry C., Brooklyn, N. Y. Egg beater. 1,571,591; Feb. 2.
Long, Benjamin H., Brooklyn, N. Y., and W. M. Stone, East Orange, N. J., assignors to American Bander Company, New York, N. Y. Blank-feeding mechanism. 1,571,486; Feb. 2.
Long, Edward A., New Castle, Pa. Making building blocks. 1,571,849; Feb. 2.
Long, Omer E., Chicago, Ill. Self-fastening wall bracket. 1,571,283; Feb. 2.
Loomis, Crawford C., Ilion, N. Y., assignor to Remington Arms Company, Inc. Automatic pistol. 1,571,592; Feb. 2.
Lord, Francis L., Newark, N. J., assignor of one-half to H. J. Lucke, New York, N. Y. Tuned radiofrequency receiving system. 1,571,900; Feb. 2.
Lorenz, William A., assignor to The Otaka Fabric Company, Hartford, Conn. Paper crinkling. 1,571,593; Feb. 2.
Lorenz, William A., assignor, by mesne assignments, to The Otaka Fabric Company, Hartford, Conn. Paper embossing. 1,571,594; Feb. 2.
Lovejoy, Ralph M., Meredith, N. H. Universal coupling. 1,571,595; Feb. 2.
Low, John J., Santa Ana, Calif. Amplifier for radiophones. 1,571,452; Feb. 2.
Lubbock, Oswald J., Alameda, Calif. Sprinkler head. 1,571,422; Feb. 2.
Lucke, Henry J. (See Lord, Francis L., assignor.)

Ludlow, Walter S., jr., Delhi, Ohio. Signal service. 1,571,209; Feb. 2.
Ludwig, Leonard L., Delavan, Kans. Elevating mechanism. 1,571,284; Feb. 2.
Ludwig, Otto R., Garvin, Minn. Folding carrier. 1,571,850; Feb. 2.
Lynn, Earle A., Spokane, Wash., assignor to Sullivan Machinery Company. Water-intercepting means. 1,571,553; Feb. 2.
Lyon, Ray W., Trail, Oreg. Beater and mixer. 1,571,851; Feb. 2.
Macfarren, Samuel J., Washington, D. C. Calculator. 1,571,728; Feb. 2.
Machesky, John V., Grosse Pointe Park, assignor to Hudson Motor Car Company, Detroit, Mich. Taillight. 1,571,286; Feb. 2.
Maclaren, James G., Mamaroneck, N. Y., assignor, by mesne assignments, to The Lamson Company. Carrier-distributing apparatus for pneumatic dispatch systems. 1,571,423; Feb. 2.
MacNamee, Joseph B., Llanerch, assignor to H. Brinton Company, Frankford, Philadelphia, Pa. Dial-aligning device. 1,571,855; Feb. 2.
Madden, Louis J., assignor of one-half to J. L. Wagner, Syracuse, N. Y. Adjustable cutter drill. 1,571,339; Feb. 2.
Mahurin, Vird L., Princeton, Mo. Puzzle board. 1,571,856; Feb. 2.
Manville Machine Company, The. (See Brennan, Charles T., assignor.)
Marquette Manufacturing Company. (See Nordgren, Algot W., assignor.)
Martin, Hawkins R., Fort Worth, Tex. Convertible furniture. 1,571,857; Feb. 2.
Maspons, Albert E. (See Horton, T. A., and Maspons.)
Marshall, William, assignor to Briggs Manufacturing Company, Detroit, Mich. Hinge for windshields. 1,571,287; Feb. 2.
Marx, Frederick A. K., St. Louis, Mo. Molding apparatus. 1,571,424; Feb. 2.
Massacese, Vincenzo, New York, N. Y. Fabric furniture spring. 1,571,858; Feb. 2.
Mataloni, Joseph, Mason City, Iowa. Key holder. 1,571,425; Feb. 2.
Maus, Harry P., and D. M. Lamson, Lima, Ohio. Record-controlled musical instrument. 1,571,859; Feb. 2.
Maxfield, Jacey S., Grand Saline, Tex. Coin-controlled phonograph. 1,571,793; Feb. 2.
Maximotor Company, The. (See Goldberg, Meyer J., assignor.)
Maxon, Curtis, Los Angeles, Calif. Latch. 1,571,453; Feb. 2.
McCall, Peter L., Rockingham, N. C. Apparatus for forming paper cones. 1,571,852; Feb. 2.
McClanahan, Thomas G., Seattle, Wash. Detector. 1,571,907; Feb. 2.
McClatchie, Stanley, Cambridge, Mass., assignor to Benjamin Electric Manufacturing Company, Chicago, Ill. Attachment plug. 1,571,727; Feb. 2.
McCowan, Samuel H., Greenway, Ark. Clamping device. 1,571,853; Feb. 2.
McDougall, James C., Montreal, Quebec, Canada. Building wall. 1,571,285; Feb. 2.
McElroy, Karl P., assignor to Ferro Chemicals Inc., Washington, D. C. Gasification of coal. 1,571,877; Feb. 2.
McFarland, John H., Merrill, Mich. Sampling device for beans and the like. 1,571,632; Feb. 2.
McLeod, John E., and A. J. Hewitt, Washington, Kans. Draft regulator. 1,571,854; Feb. 2.
McNutt, William A., Stamford, assignor to The Kitson Engineering Company (London) Limited, Westminster, London, England. Refrigerating system or apparatus. 1,571,633; Feb. 2.
McSpadden, Aurelious M., St. Louis, Mo. Grease pump. 1,571,634; Feb. 2.
McVay, Charles B., jr., Washington, D. C., assignor to the Government of the United States. Torpedo. 1,571,487; Feb. 2.
Melvin, Roy E. (See Peterson, A. J., and Melvin.)
Menzies, William E., Irwin, Pa., assignor to Westinghouse Electric & Manufacturing Company. Electrical system. 1,571,908; Feb. 2.
Menzies, William E., Irwin, Pa., assignor to Westinghouse Electric & Manufacturing Company. Regulator system. 1,571,909; Feb. 2.
Merrick, Herbert L., Passaic, N. J. Weighing mechanism. 1,571,288; Feb. 2.
Merten, William J., Pittsburgh, Pa. Casehardening. 1,571,289; Feb. 2.
Merten, William J., Pittsburgh, Pa., assignor to Westinghouse Electric & Manufacturing Company. Quenching bath. 1,571,290; Feb. 2.
Meyer, Gertrude M., Davis, W. Va. Baking glove. 1,571,860; Feb. 2.
Meyer & Wenthe. (See Meyer, Gustav A. J., assignor.)
Meyer, Gustav A. J., assignor to Meyer & Wenthe, Chicago, Ill. Label holder for self-inking stamps. 1,571,291; Feb. 2.
Meyer, Harry R., and L. G. Riley, Wilkinsburg, Pa., assignors to Westinghouse Electric and Manufacturing Company. Electrical switch for car doors. 1,571,292; Feb. 2.
Michael, William F., and W. A. Pauls, Benton Harbor, Mich. Automobile signal. 1,571,861; Feb. 2.
Middleton, Harry N., Westville, N. J., assignor to B. F. Sturtevant Company, Hyde Park, Mass. Conveyer system. 1,571,525; Feb. 2.
Midgley, Thomas, jr., Dayton, Ohio, assignor, by mesne assignments, to General Motors Corporation, Detroit, Mich. Prevention of fuel knock. 1,571,862; Feb. 2.
Miehle Printing Press & Manufacturing Company. (See Stevens, Burt D., assignor.)
Millard, Irwin W., assignor to Industrial Gloves Corporation, Chicago, Ill. Legging. 1,571,340; Feb. 2.
Miller, Ann, Dallas, Tex. Measuring instrument. 1,571,596; Feb. 2.
Miller Company, The. (See Doane, Leroy C., assignor.)
Millers Falls Company. (See Saunders, Kenneth H., assignor.)
Milnor, Joseph W. (See Sindeband, M. L., and Milnor.)
Milwaukee Valve Company. (See Hutchinson, Frank L., assignor.)
Miner, W. H., Inc. (See Anderson, Harley E., assignor.)
Miner, W. H., Inc. (See Brenne, Arild M., assignor.)
Miner, W. H., Inc. (See Haseltine, Stacy B., assignor.)
Miner, W. H., Inc. (See Link, Theodore H., assignor.)
Miner, W. H., Inc. (See O'Connor, John F., assignor.)
Miner, W. H., Inc. (See Strid, Sven J., assignor.)
Minton, Richard C., East Boldon, assignor to A. Reyrolle & Company Limited, Hebburn-on-Tyne, England. Electric switch. 1,571,526; Feb. 2.
Mitchell, Mark B., Spring Prairie, Wis. Collapsible bed and tent for automobiles. 1,571,426; Feb. 2.
Model Brassiere Co. (See Johnson, Augusta S., assignor.)
Modline, Arthur B., Racine, Wis. Tobacco pipe. 1,571,729; Feb. 2.
Modine, Arthur B., Racine, Wis. Radiator. 1,571,730; Feb. 2.
Moetteli, Arnold, Oberwinterthur, Switzerland. Plant for cooling hot coke and utilizing the heat liberated thereby. 1,571,455; Feb. 2.
Molsan, Mitchel V., and A. R. Heywood, Central Square, N. Y. Educational game. 1,571,488; Feb. 2.
Monie, James D. (See Kelly, William L., assignor.)
Monson, Jöns, New York, N. Y. Toy. 1,571,901; Feb. 2.
Mooney, John D., St. Paul, Minn. Marine-engine combined reversing gear and clutch. 1,571,210; Feb. 2.
Moravec, Joseph E. (See Vorel, Frank, assignor.)
Morgan Construction Company. (See George, Jerome R., assignor.)
Morihata, Matsusuke, Honolulu, Hawaii. Toy vehicle. 1,571,489; Feb. 2.
Morrie, Tittisanna A., Sugarloaf, Pa. Piston for engines. 1,571,427; Feb. 2.
Morris, Herbert, Incorporated. (See Parrish, Donald E., assignor.)
Morris, Vernon J., Seattle, Wash. Baking utensil. 1,571,678; Feb. 2.
Morrison Laboratories, Incorporated. (See Morrison, Vaughn E., assignor.)
Morrison, Vaughn E., Detroit, Mich., assignor to Morrison Laboratories, Incorporated. Telephone-receiver unit. 1,571,454; Feb. 2.
Morton, Frank M. and G. W., Phoenix City, Ala. Raw-stock-dyeing apparatus. 1,571,863; Feb. 2.
Morton, Frank M. and G. W., Phoenix City, Ala. Dye vat. 1,571,864; Feb. 2.
Morton, Gordon W. (See Morton, Frank M. and G. W.)
Moser, William L., Winston-Salem, N. C. Vending machine. 1,571,341; Feb. 2.
Moss, Charles M., Pittsburgh, Pa., assignor to Westinghouse Electric & Manufacturing Company. Flow meter. 1,571,293; Feb. 2.
Mull, Raymond A., assignor to The Coolamp Company, Benton Harbor, Mich. Acetylene lamp. 1,571,554; Feb. 2.
Myers, Elman B., Belleville, assignor to Radio Audion Company, Jersey City, N. J. Amplifier coil and connection. 1,571,490; Feb. 2.
Myers, Fred J. (See Laughlin, J. N., and Myers.)
Myers, Lewis C. (See Hess, E. B., and Myers.)
Naidul, Joe, West Allis, Wis. Trap. 1,571,635; Feb. 2.
Naldrett, Edgar, Edmonton, Alberta, Canada. Rail anchor. 1,571,428; Feb. 2.
National Equipment Company. (See Bausman, Alonzo L., assignor.)
Nelson, Anthony, St. Paul, Minn. Cue chalker. 1,571,211; Feb. 2.
Nelson, Theodore J. (See Samuelson, V. K., and Nelson.)
Nevenx, Fortunato, Rivoli, Turin, assignor to O. M. I. M. Officina Meccanica Industria Magileria, Turin, Italy. Stop mechanism for knitting machines. 1,571,294; Feb. 2.
New Idea Spreader Co., The. (See Oppenheim, T. H., and Selhorst, assignors.)
Newkirk, William B., Riverside, Ill., assignor, by mesne assignments, to International Patents Development Company. Making grape sugar. 1,571,212; Feb. 2.
Newman, A. L., Company. (See Newman, Almyr L., assignor.)
Newman, Almyr L., Warwick, assignor, by mesne assignments, to A. L. Newman Company, Cranston, R. I. Jewelry chain. 1,571,731; Feb. 2.
Newman, Gentry D., Newark, N. J. Tent-securing device. 1,571,295; Feb. 2.
Ney, Andrew F., East Kew, assignor to Bryant and May Proprietary Limited, Richmond, Victoria, Australia. Attaching hinged lids to rectangular metal boxes. 1,571,429; Feb. 2.

Nichols, Charlie E., Augusta, Ga. Rotary show-case stand. 1,571,597; Feb. 2.
Nickels, Stanford B. (See Robertson, Hugh E., assignor.)
Nieberding, Frank A., deceased, Cleveland, Ohio; M. H. Nieberding administratrix. Heater. 1,571,636; Feb. 2.
Nieberding, Frank A., deceased, Cleveland, Ohio; M. H. Nieberding administratrix. Gas burner. 1,571,637; Feb. 2.
Nieberding, Margaret H., administratrix. (See Nieberding, Frank A.)
Niesen, Jacob P., Chicago, Ill. Hone for sharpening clippers. 1,571,555; Feb. 2.
Niles-Bement-Pond Company. (See Cole, L. C., and Pabst, assignors.)
Niles-Bement-Pond Company. (See Cole, Lyndon C., assignor.)
Niles-Bement-Pond Company. (See Hagman, William J., assignor.)
Niles-Bement-Pond Company. (See Wildhaber, Ernest, assignor.)
Noe, William R., & Sons. (See Villaret, Gustave E., assignor.)
Nordendale, Charles E. and H. W., Chicago, Ill. Garment hanger. 1,571,598; Feb. 2.
Nordendale, Harry W. (See Nordendale, Charles E. and H. W.)
Nordgren, Algot W., assignor to Marquette Manufacturing Company, St. Paul, Minn. Bumper. 1,571,884; Feb. 2.
Nordgren, Algot W., assignor to Marquette Manufacturing Company, St. Paul, Minn. Twin bumper structure. 1,571,885; Feb. 2.
Norris, Almon E., Brookline, Mass. Car-haulage plant. 1,571,732; Feb. 2.
North East Electric Company. (See Dorsey, Farnum F., assignor.)
North, J. Frank, assignor to Farrel Foundry & Machine Company, Ansonia, Conn. Platen for vulcanizing presses and the like. 1,571,599; Feb. 2.
North, Samuel A., Bridgeport, Conn., assignor to Remington Arms Company, Inc. Knife blade. 1,571,886; Feb. 2.
Nydegger, Max. (See Fels, William, assignor.)
Nyhagen, Barney R., New York, N. Y. Brush. 1,571,556; Feb. 2.
Nyman, Alexander, Wilkinsburg, Pa., assignor to Westinghouse Electric & Manufacturing Company. Electrical measuring system. 1,571,910; Feb. 2.
Nyman, Alexander, Swissvale, Pa., assignor to Westinghouse Electric & Manufacturing Company. Electrical measuring instrument. 1,571,911; Feb. 2.
O. M. I. M. Officina Meccanica Industria Magileria. (See Nevenx, Fortunato, assignor.)
Oakes, George W., Crystal City, Mo. Combined dust cap and air seal for tire-valve stems. 1,571,865; Feb. 2.
O'Brien, James F. (See Boardman, Edwin A., assignor.)
O'Brien, Joseph J., assignor to W. M. Barnard, Springfield, Mass. Core-forming device for sash-weight casting. 1,571,894; Feb. 2.
O'Connor, John F., Chicago, Ill., assignor, by mesne assignments, to W. H. Miner, Inc. Friction shock-absorbing mechanism. 1,571,679; Feb. 2.
O'Connor, John F., Chicago, Ill., assignor, by mesne assignments, to W. H. Miner, Inc. Car construction. 1,571,680; Feb. 2.
O'Connor, John F., Chicago, Ill., assignor, by mesne assignments, to W. H. Miner, Inc. Friction shock-absorbing mechanism. 1,571,681; Feb. 2.
O'Connor, John F., Chicago, Ill., assignor, by mesne assignments, to W. H. Miner, Inc. Friction shock absorbing mechanism. 1,571,682; Feb. 2.
O'Connor, John F., Chicago, Ill., assignor, by mesne assignments, to W. H. Miner, Inc. Antifriction side bearing. 1,571,683; Feb. 2.
O'Connor, John F., Chicago, Ill., assignor, by mesne assignments, to W. H. Miner, Inc. Friction shock-absorbing mechanism. 1,571,684; Feb. 2.
O'Connor, John F., Chicago, Ill., assignor, by mesne assignments, to W. H. Miner, Inc. Friction shock-absorbing mechanism. 1,571,685; Feb. 2.
O'Connor, John F., Chicago, Ill., assignor, by mesne assignments, to W. H. Miner, Inc. Aligning device for pedestal journal boxes. 1,571,686; Feb. 2.
Ohmer Fare Register Company. (See Gray, Frederick O., assignor.)
Oliver, Orris F. (See Cover, J. W., and Oliver.)
Olley, Edwin A., and F. C. Smith, assignors to Crouse-Hinds Company, Syracuse, N. Y. Electric switch. 1,571,600; Feb. 2.
O'Loughlin, Thomas C., Detroit, Mich. Plumb-bob carrier. 1,571,687; Feb. 2.
Olson, John K., assignor to Stewart-Warner Speedometer Corporation, Chicago, Ill. Spotlight-range-limiting device. 1,571,456; Feb. 2.
Olson, Even. (See Ternan, A. L., and Olson.)
Olson, Ole N., Chicago, Ill. Spark-coil terminal. 1,571,638; Feb. 2.
Oppenheim, Theodore H., and B. Selhorst, assignors to The New Idea Spreader Co., Coldwater, Ohio. Cornhusking machine. 1,571,866; Feb. 2.
Orlik, Alfred, New York, N. Y. Tobacco pipe. Des. 69,358; Feb. 2.
Orlik, Alfred, New York, N. Y. Tobacco pipe. Des. 69,359; Feb. 2.
Orr, Francis L., Denver, Colo. Transmission gearing. 1,571,457; Feb. 2.
Ost, Frederick A. (See Seguine, Guy A., assignor.)
Otaka Fabric Company, The. (See Lorenz, William A., assignor.)
Owens Bottle Company, The. (See Cramer, Albert N., assignor.)
Owens Bottle Company, The. (See Soubier, Leonard D., assignor.)
P & M Company, The. (See Blair, Rolandis A., assignor.)
P & M Company, The. (See De Busk, William H., assignor.)
P & M Company, The. (See Warr, Harold G., assignor.)
Pabst, Otto. (See Cole, L. C., and Pabst.)
Packard Motor Car Company. (See Vincent, Jesse G., assignor.)
Paige, Chester, Nowata, Okla. Ice box. 1,571,342; Feb. 2.
Pankoff, Panteleimon I., New York, N. Y. Attachment for sewing machines. 1,571,296; Feb. 2.
Parrish, Donald E., assignor to Herbert Morris Incorporated, Buffalo, N. Y. Ash-can hoist. 1,571,297; Feb. 2.
Parrish, Willis S., Cave City, Ky. Stock ring. 1,571,867; Feb. 2.
Parsons, George H., assignor to Averill Mfg. Co., New York, N. Y. Doll. 1,571,868; Feb. 2.
Paul, William L., Berkeley, Calif., assignor to Deere & Company, Moline, Ill. Shaft adjustment. 1,571,557; Feb. 2.
Pauls, Walter A. (See Michael, W. F., and Pauls.)
Pavloff, Stephen, Camas, Wash. Prune gatherer. 1,571,298; Feb. 2.
Pennsylvania Globe Company. (See Slinack, Victor H., assignor.)
Peres, Cecilio S., Brooklyn, N. Y. Transmission control. 1,571,430; Feb. 2.
Perfection Stove Company. (See Resek, Marc, assignor.)
Perkins, Andrew H., Helena, Miss. Fish-catching device. 1,571,869; Feb. 2.
Permutit Company, The. (See Tellier, Roy G., assignor.)
Peters Morse Manufacturing Company. (See White, Nelson, assignor.)
Peterson, Arthur J., and R. E. Melvin, Chicago, Ill., assignors, by mesne assignments, to Apex Products Company. Laundry wringer. 1,571,688; Feb. 2.
Peterson, Earl L., Corona, assignor to United Concrete Pipe Company, New York, N. Y. Concrete-pipe joint. 1,571,870; Feb. 2.
Pfeil, Henry C., Chicago Heights, assignor to American Manganese Steel Company, Chicago, Ill. Pattern for snap molding. 1,571,689; Feb. 2.
Pfmeger, John H. W., Covington, Ky. Telephone cover. 1,571,639; Feb. 2.
Phillips, William, New York, N. Y., assignor to Eureka Radio and Phono Parts Co. Combined phonographic and telephonic apparatus. 1,571,690; Feb. 2.
Phillips, William, New York, N. Y., assignor to Eureka Radio and Phono Parts Co. Combined phonographic and telephonic apparatus. 1,571,691; Feb. 2.
Pinkham, Edward H., North Andover, Mass. Holder. 1,571,794; Feb. 2.
Pitchford, C. E., et al. (See Simpson, Arthur E., assignor.)
Pittman, Reinhart W. (See Wahlgren, K. E., and Pittman.)
Pitt-Taylor, Francis S., Blackpool, England. Concertina keyboard. 1,571,431; Feb. 2.
Pitt, William P., assignor to Irving-Pitt Manufacturing Company, Kansas City, Mo. Loose-leaf binder and making parts of same. 1,571,299; Feb. 2.
Pitts, John B., Winnetka, Ill. Hunter's decoy duck. 1,571,213; Feb. 2.
Plonka, John. Chicago, Ill. Boat-propelling means. 1,571,640; Feb. 2.
Pomeroy, S. H., Company. (See Fien, Alphonsus, assignor.)
Pomeroy, S. H., Company. (See Washburn, Loring, assignor.)
Poss, Grady A., Augusta, Ga. Automatic feed valve for oil stoves. 1,571,795; Feb. 2.
Powell, Harvey A., Haleyville, Ala. Animal trap. 1,571,432; Feb. 2.
Powers, Frank T., Douglaston, N. Y. Apparatus for drying plates of various sorts. 1,571,214; Feb. 2.
Prat, Georges J. A. L., Paris, France. Producing mechanical drafts. 1,571,797; Feb. 2.
Pratt & Whitney Company. (See Blood, Bryant H., assignor.)
Pratt & Whitney Company. (See Knowles, Carroll, assignor.)
Pratt & Whitney Company. (See Schramm, Carl, assignor.)
Pratt & Whitney Company. (See Schramm, William C. F., assignor.)
Pratt, Frederick J., Detroit, Mich. Gauge for determining internal diameters of elements being ground. 1,571,641; Feb. 2.
Price, John D., Cleveland, Ohio, assignor to Drake Process, Incorporated, Wilmington, Del. Shoe and method of making. 1,571,796; Feb. 2.
Price, John D., and W. H. Drake, Cleveland, Ohio. Shoe and method of making. 1,571,798; Feb. 2.
Price, William G., Yakima, Wash., assignor to W. & L. E. Gurley, Troy, N. Y. Current meter. 1,571,433; Feb. 2.
Prime Mfg. Co. (See Allen, Donald T., assignor.)

Pritchard, George E., Elizabeth City, N. C. Bean harvester. 1,571,491; Feb. 2.
Pupin, Michael I., Norfolk, Conn., assignor to Westinghouse Electric & Manufacturing Company, East Pittsburgh, Pa. Electromagnetic production of direct current without fluctuations. 1,571,458; Feb. 2.
Pym, Arthur F., Lynn, Mass., assignor to United Shoe Machinery Corporation, Paterson, N. J. Machine for shaping uppers over lasts. 1,571,733; Feb. 2.
Pym, Arthur F., Marblehead, Mass., assignor to United Shoe Machinery Corporation, Paterson, N. J. Making shoes. 1,571,734; Feb. 2.

Queisser, Charles F., Cleveland Heights, assignor to Electric Vacuum Cleaner Company, Inc., Cleveland, Ohio. Impeller. 1,571,735; Feb. 2.
Radiant Specialty Co. (See Czapek, Stanley, assignor.)
Radio Audion Company. (See Myers, Elman B., assignor.)
Radio Corporation of America. (See Clark, George H., assignor.)
Radio Corporation of America. (See Davis, Norman E., assignor.)
Radio Corporation of America. (See Goldsmith, Alfred N., assignor.)
Radio Corporation of America. (See White, Richard H., assignor.)
Randall, A. L., Co. (See Shearer, Grover P., assignor.)
Rathbone, John A., Detroit, Mich., assignor to Rathbone Machine Company, Cleveland, Ohio. Forming molds. 1,571,642; Feb. 2.
Rathbone Machine Company. (See Rathbone, John A., assignor.)
Ray, William, Spokane, Wash. Amusement trackway. 1,571,434; Feb. 2.
Reed, Emerson G., Wilkinsburg, Pa., assignor to Westinghouse Electric & Manufacturing Company. Making transformer tanks. 1,571,300; Feb. 2.
Reed, F. E., Glass Company. (See Johnson, William R., and F. P., assignors.)
Reed, Harold J., Nashua, N. H., and C. L. Spafford, Sherbrooke, Quebec, Canada, assignors to Improved Paper Machinery Company, Nashua, N. H. Screen. 1,571,736; Feb. 2.
Reeves, Austin H., Newark, N. J. Concrete column. 1,571,799; Feb. 2.
Register, Albert L., Haverford, Pa. Pipe union. 1,571,343; Feb. 2.
Remington Arms Company. (See Dickerman, John A., assignor.)
Remington Arms Company. (See Loomis, Crawford C., assignor.)
Remington Arms Company. (See North, Samuel A., assignor.)
Renick, Tommie M., Morgantown, W. Va. Toy. 1,571,643; Feb. 2.
Renzetti, Aurelius M., and D. C. Brown, Philadelphia, Pa., assignors to Stutz Motor Car Company of America, Inc., Indianapolis, Ind. Radiator cap. Des. 69,360; Feb. 2.
Resek, Marc, East Cleveland, assignor to Perfection Stove Company, Cleveland, Ohio. Portable oil heater. 1,571,301; Feb. 2.
Reutlinger, Emile C., Boston, Mass. Washing machine. 1,571,887; Feb. 2.
Reyrolle, A., & Company Limited. (See Minton, Richard C., assignor.)
Rhoades, Alonzo E., assignor to Draper Corporation, Hopedale, Mass. Automatically-threading shuttle for looms. 1,571,888; Feb. 2.
Rhodes, Albert T., Worcester, Mass. Pavement and making same. 1,571,527; Feb. 2.
Richard, Leroy L., Visalia, and R. E. Richard, Coalinga, Calif. Playing-game implement. 1,571,374; Feb. 2.
Richard, Robert E. (See Richard, Leroy L. and R. E.)
Richards, James A., assignor to The Gunn Furniture Company, Grand Rapids, Mich. Bookcase construction. 1,571,601; Feb. 2.
Richardson Company, The. (See Heppes, Otto A., assignor.)
Richey, Eldred T., Le Blanc, La. Automatic telephone ringer. 1,571,435; Feb. 2.
Rickwood, Roland L. (See Klausmeyer, D. C., and Rickwood.)
Riffle, Alva M., Queens, W. Va. Garment hanger. 1,571,778; Feb. 2.
Riley, Lynn G. (See Meyer, H. R., and Riley.)
Rilling, John E., Milwaukee, Wis. Furniture construction. 1,571,302; Feb. 2.
Ripley, David W., Fresno, Calif. Automatic measuring machine. 1,571,459; Feb. 2.
Ripley, William H., Hartford, assignor to The Whitlock Coil Pipe Company, West Hartford, Conn. Heat-exchange apparatus. 1,571,889; Feb. 2.
Roberts, James, Toronto, Ontario, Canada. Hydraulic jack. 1,571,602; Feb. 2.
Robertson, Hugh E., assignor of one-half to S. B. Nickels, Oakland, Calif. Time-clock electrical switch. 1,571,644; Feb. 2.
Robeson Process Company. (See Blacknadder, Thomas, assignor.)
Rocké, Ivan, New York, N. Y. Building construction. 1,571,845; Feb. 2.
Rockwell, Willard F., Oshkosh, Wis. Rear-axle assembly. 1,571,800; Feb. 2.
Rockwell, Willard F., Osbkosh, Wis. Double-reduction bus axle. 1,571,801; Feb. 2.
Rogers-Jenkins, Arthur. (See de Villiers, Peter G. T., assignor.)
Rogers, John C., assignor of one-half to Houston Blow Pipe & Sheet Metal Works, Houston, Tex. Condenser. 1,571,375; Feb. 2.
Rogers, John P., Dayton, Ohio. Tire-spreading tool. 1,571,376; Feb. 2.
Rohr, Mary E., Lynchburg, Va. Coin and key purse. 1,571,528; Feb. 2.
Roneo Limited. (See de Whalley, William R. M., assignor.)
Ronk, George T., Des Moines, assignor to Speeder Machinery Corporation, Fairfield, Iowa. Girder construction for excavators. 1,571,377; Feb. 2.
Rose, Frederick W. P., Clifton, and C. Werner, Passaic, N. J., assignors to Werner & Company, Inc. Textile-finishing machine. 1,571,802; Feb. 2.
Rosemary Creamery Company, The. (See Dunham, Henry V., assignor.)
Rosenbaum, Bruno, Berlin, Germany, assignor to Westinghouse Electric & Manufacturing Company. Propeller-drive control. 1,571,492; Feb. 2.
Rosenblatt, Victor J., Alexandria, Egypt. Soldering iron. 1,571,903; Feb. 2.
Royal Typewriter Company. (See Hess, Edward B., assignor.)
Royal Typewriter Company. (See Hess, E. B., and Myers, assignors.)
Ruggles, Charles S., Quincy, Mass. Fisherman's type. 1,571,603; Feb. 2.
Rundell, Sam S., assignor of forty-nine one-hundredths o H. J. Cowgill and J. H. Slaughter, Bogalusa, La. Greasing and oiling device. 1,571,436; Feb. 2.
Russell, James G., Dorchester, Mass. Flanging machine. 1,571,568; Feb. 2.
Russell, John F., New York, N. Y. Cock and valve packing. 1,571,803; Feb. 2.
Ruth, William C., assignor of one-half to H. L. Rutter, Gap, Pa. Baling-press feeder. 1,571,437; Feb. 2.
Rutter, Howard L. (See Ruth, William C., assignor.)
Ryan, Thomas W., Concord Junction, Mass. Ball cocks for use upon high and low pressure systems. 1,571,604; Feb. 2.
Ryder, Charles D., Covington, Ky., assignor to The Cincinnati Victor Company, Cincinnati, Ohio. Dash lamp. 1,571,646; Feb. 2.
Safety Car Heating and Lighting Company, The. (See Hagar, Arthur P., assignor.)
Sager, J. H., Company. (See Iven, Charles J., assignor.)
Salles, Edmond L. R., Paris, France. Mmeans for closing receptacles. 1,571,605; Feb. 2.
Samel, Leo. (See Garris, Bernard J., assignor.)
Samson, Jerônimo, Pasay, Rizal, P. I. Vehicle wheel. 1,571,804; Feb. 2.
Samuel, Frank B., Baton Rouge, La. Fractionating tower. 1,571,805; Feb. 2.
Samuelson, Victor K., and T. J. Nelson, Chicago, Ill. Lamp. Des. 69,361; Feb. 2.
Samuelson, Victor K., and T. J. Nelson, Chicago, Ill. Lamp. Des. 69,362; Feb. 2.
Sanders, Edward, Moorhead, Minn. Potato harvester. 1,571,344; Feb. 2.
Sanford, Hugh W., Knoxville, Tenn. Mine-car coupling. 1,571,345; Feb. 2.
Santarsiero, Antonio V., New York, N. Y. Combined helicopter and aeroplane. 1,571,647; Feb. 2.
Saunders, Kenneth H., Brattleboro, Vt., assignor to Millers Falls Company, Millers Falls, Mass. Jack. 1,571,606; Feb. 2.
Schafran, Isaac, New York, N. Y., assignor of one-half to L. Bruger, Montreal, Quebec, Canada. Duplex air rotor. 1,571,303; Feb. 2.
Schanandoah, Chapman, Nedrow, N. Y. Condensing metals. 1,571,737; Feb. 2.
Schaum, Carl, assignor to Fletcher Works Incorporated, Philadelphia, Pa. Ice pick and the like. 1,571,890; Feb. 2.
Scherer, Charles, Long Island, assignor to Benjamin & Edward J. Gross Co. Inc., New York, N. Y. Finger ring or article of similar nature. Des. 69,363; Feb. 2.
Scherer, Charles, Long Island, assignor to Benjamin & Edward J. Gross Co. Inc., New York, N. Y. Finger ring or article of similar nature. Des. 69,364; Feb. 2.
Schloemilch, Wilhelm, assignor to Gesellschaft für Drahtlose Telegraphie m. b. H., Berlin, Germany. Sound-reproducing arrangement. 1,571,378; Feb. 2.
Schmidt, Erwin, assignor to the Firm Gesellschaft für Chemische Produktion m. b. H., Mannheim-Waldhof, Germany. Obtaining hydrochloric acid free from arsenic. 1,571,648; Feb. 2.
Schmitt, Charles J., Algoma, Wis. Convertible table. 1,571,806; Feb. 2.
Schmitt, Charles J., Algoma, Wis. Folding table. 1,571,807; Feb. 2.
Schnur, Cyril C., Toronto, Ontario, Canada. Method of and apparatus for the manufacture of hollow ware from refractory mineral substances. 1,571,607; Feb. 2.
Schomburger, Lucien, Paris, France, assignor to General Electric Company. Compounding alternating-current machine. 1,571,738; Feb. 2.
Schopf, Henry S., Spokane, Wash. Provision safe. 1,571,438; Feb. 2.

Schramm, Carl, West Hartford, Conn., assignor to Pratt & Whitney Company, New York, N. Y. Cutting tool. 1,571,347; Feb. 2.
Schramm, William C. F., Hartford, Conn., assignor to Pratt & Whitney Company, New York, N. Y. Forming milling cutters. 1,571,346; Feb. 2.
Schultz, Herman J., Chicago, Ill. Sheet detector for printing presses and like machines. 1,571,649; Feb. 2.
Schumacher, Ludwig F., New York, N. Y. Vehicle wheel. 1,571,493; Feb. 2.
Schusky, William W. (See Casper, George D., assignor.)
Schwartzman, Harry, New York, N. Y. Cloth-laying machine. 1,571,808; Feb. 2.
Scott, Nora L., and N. G. Hanes, Atascadero, Calif. Lingerie-strap fastener. 1,571,494; Feb. 2.
Scott, Winfield, assignor to E. I. du Pont de Nemours & Company, Wilmington, Del. Hard resinous vulcanization accelerator and making same. 1,571,739; Feb. 2.
Seem, Charles B., Buffalo, N. Y. Permanent mold for casting radiator sections and the like. 1,571,439; Feb. 2.
Seguine, Guy A., assignor of one-sixteenth to F. A. Ost, Fredonia, Kans. Attachment for sand caps or oil savers. 1,571,740; Feb. 2.
Seley, Charles C., Erie, assignor to G. H. Barlow and J. J. Desmond, Corry, Pa. Making garment stays. 1,571,902; Feb. 2.
Selhorst, Bernard. (See Oppenheim, T. H., and Selhorst.)
Shapiro & Aronson, Inc. (See Klein, Max, assignor.)
Sharp, C. R. (See Flanigan, Joseph H., assignor.)
Sharpe, William A., Denver, Colo. Electric water heater. 1,571,379; Feb. 2.
Shaukis, Arthur J., Haverhill, Mass. Commutation railway ticket. 1,571,809; Feb. 2.
Shearer, Grover P., assignor to A. L. Randall Co., Chicago, Ill. Ornament and making the same. 1,571,380; Feb. 2.
Sherman, Roy H., Vallejo, Calif. Amusement novelty. 1,571,381; Feb. 2.
Shimp, Roy S., Penns Grove, N. J. Valve. 1,571,810; Feb. 2.
Shimwell, Oliver, Gawsworth, England. Loom for weaving. 1,571,878; Feb. 2.
Shipley, Lyman E., Carlton, Oreg. Bearing-relining cap. 1,571,529; Feb. 2.
Silkwood, T. M., et al. (See Simpson, Arthur E., assignor.)
Simmons, Wesley, Cleveland, Ohio. Radiator. 1,571,530; Feb. 2.
Simpson, Arthur E., assignor to H. L. Webb, J. M. Harris, B. H. Webb, T. M. Silkwood, R. P. Blake, and C. E. Pitchford, West Frankfort, Ill. Rotary pump. 1,571,650; Feb. 2.
Sims, Grover A., Remlig, Tex. Garment hanger. 1,571,904; Feb. 2.
Sindeband, Maurice L., and J. W. Milnor, New York, N. Y., assignors to Westinghouse Electric & Manufacturing Company. Electrical system. 1,571,304; Feb. 2.
Slaughter, J. H., et al. (See Rundell, Sam S., assignor.)
Slick, Edwin E., Pittsburgh, Pa. Smoker's set. Des. 69,365; Feb. 2.
Slinack, Victor H., assignor to Pennsylvania Globe Company, Philadelphia, Pa. Inverted incandescent light. 1,571,895; Feb. 2.
Smith, Benjamin H., Wilkinsburg, Pa., assignor to Westinghouse Electric & Manufacturing Company. Voltampere meter. 1,571,912; Feb. 2.
Smith, Charles F. D., Lake Wales, Fla. Drive-well point. 1,571,871; Feb. 2.
Smith, Edward F., Chicago, Ill. Milling cutter and making same. 1,571,559; Feb. 2.
Smith, Edwin R., Fitchburg, Mass., assignor to Automailing Machinery Company. Route marker for addressing machines. 1,571,811; Feb. 2.
Smith, Floyd C. (See Olley, E. A., and Smith.)
Smith, George F., Sturgis, Mich. Fireplace. 1,571,741; Feb. 2.
Smith, Grover C., assignor of one-half to J. R. Smith, Ogden, Utah. Rack. 1,571,440; Feb. 2.
Smith, James R. (See Smith, Grover C., assignor.)
Smith, William A., Athens, Pa., assignor to Ingersoll-Rand Company, Jersey City, N. J. Air-line lubricator. 1,571,495; Feb. 2.
Smith, William A., and C. H. Dockman, Detroit, Mich., assignors to Chicago Pneumatic Tool Company, New York, N. Y. Pneumatic tool. 1,571,560; Feb. 2.
Snyder, Simon, assignor to Sprout, Waldron & Co., Muncy, Pa. Grinding mill. 1,571,812; Feb. 2.
Snypp, Frank E. (See Kincade, John M., assignor.)
Società Anonima Ansaldo-San Giorgio. (See De Feo, Vincenzo, assignor.)
Societe pour la Fabrication de la Sole Rhodiaseta. (See Grillet, Nicholas B., assignor.)
Sohner, Robert, Vienna, Austria. Motor plow. 1,571,305; Feb. 2.
Soltesz, Nick, Toledo, Ohio. Rail connecter. 1,571,384; Feb. 2.
Soubier, Lonard D., assignor to The Owens Bottle Company, Toledo, Ohio. Glass feeder. 1,571,215; Feb. 2.
Soubier, Leonard D., assignor to The Owens Bottle Company, Toledo, Ohio. Method of and apparatus for forming glass tubing. 1,571,216; Feb. 2.
Sova, Alfred L., Flint, Mich. Automatic burring attachment. 1,571,813; Feb. 2.
Spafford, Claude L. (See Reed, H. J., and Spafford.)
Spear, Furman D., New York, N. Y. Signal lantern. 1,571,531; Feb. 2.
Speeder Machinery Corporation. (See Ronk, George T., assignor.)
Sperry, Elmer A. (See Bassett, Preston R., assignor.)
Spiegel, May, Stern Co. (See Golinick, Paul A., assignor.)
Sprout, Waldron & Co. (See Snyder, Simon, assignor.)
Staley, George W., San Francisco, Calif. Extension bit. 1,571,497; Feb. 2.
Standish, Edward K., Stoughton, Mass. Braiding machine. 1,571,385; Feb. 2.
Staples, James H. (See Herminghausen, Lous W., assignor.)
Stee, Clarence O., Butte, Mont. Drill bit. 1,571,848; Feb. 2.
Steel Heddle Manufacturing Company. (See Kaufmann, Jacob, assignor.)
Steenstrup, Christian, Schenectady, N. Y., assignor to General Electric Company. Closed furnace and operating same. 1,571,742; Feb. 2.
Sterling, William W., Cambridge City, Ind. Clothes drier. 1,571,496; Feb. 2.
Stern, Louis, Co. (See Valcourt, Louis E., assignor.)
Stevens, Burt D., Evanston, assignor to Miehle Printing Press & Manufacturing Company, Chicago, Ill. Worksetting means. 1,571,651; Feb. 2.
Stevens, Enoch P., deceased, Chicago, Ill.: M. A. Stevens, executrix. Furnace-roof structure. 1,571,561; Feb. 2.
Stevens, Mary A., executrix. (See Stevens, Enoch P.)
Stevenson, Stephen G. (See Waldron, C. R., and Stevenson.)
Stewart, Charles C., Detroit, Mich. Feeding device. 1,571,814; Feb. 2.
Stewart-Warner Speedometer Corporation. (See Olsen, John K., assignor.)
Stig, Josef E. L. (See Stig, Torsten G. and J. E. L.)
Stig, Torsten G. and J. E. L., Odda, Norway. Production of alloyed steel and iron with chromium, manganese, etc. 1,571,382; Feb. 2.
Stillman, Raymond H., Eatontown, N. J. Bag holder and filling device. 1,571,608; Feb. 2.
Stimpson, Walter F., Louisville, Ky. Steelyard rod and spring connection for scales. 1,571,306; Feb. 2.
Stimpson, Walter F. (See Hartman, Charles H., assignor.)
Stirrup, Frank A., Westfield, N. J. Ice-cream freezer. 1,571,609; Feb. 2.
Stone, Wilbur M. (See Long, B. H., and Stone.)
Stoekle, Erwin R. (See Barnum, T. E., and Stoekle.)
Stout, Marion F., Fort Thomas, Ky. Imitation-brick concrete wall and laying it. 1,571,815; Feb. 2.
Stowers, John L., Habana, Cuba. Device used to collect coins. 1,571,383; Feb. 2.
Straight, Halver R., Adel, Iowa. Machine for laying brick paving and the like. 1,571,386; Feb. 2.
Strauss, Ferdinand, Corporation, The. (See Kass, Louis J., assignor.)
Strid, Sven J., Chicago, Ill., assignor, by mesne assignments, to W. H. Miner, Inc. Friction shock-absorbing mechanism. 1,571,652; Feb. 2.
Sturtevant, B. F., Company. (See Middleton, Harry N., assignor.)
Stutz Motor Car Company of America. (See Renzetti, A. M., and Brown, assignors.)
Sucden, Albert, Stratford, Ontario, Canada. Power transmission for trains. 1,571,816; Feb. 2.
Sullivan Machinery Company. (See Lynn, Earle A., assignor.)
Sumerspitz, Joseph. (See Chartoff, L., and Sumerspitz.)
Summers, Caleb E., assignor to General Motors Research Corporation, Dayton, Ohio. Indicator. 1,571,349; Feb. 2.
Swanstrom, Charles J., Coronado Beach, Calif. Wooden shoes. 1,571,498; Feb. 2.
Swhler, William W., Portland, Ind. Concrete-finishing machine. 1,571,817; Feb. 2.
Symington Company, The. (See Barrows, Donald S., assignor.)
Symington Company, The. (See Kadel, Byers W., assignor.)
Taylor, Hugh S. (See Whiting, D. F., and Taylor.)
Taylor-Wharton Iron and Steel Company. (See Andrews, Charles B., assignor.)
Tellier, Roy G., Chicago Heights, Ill., assignor to The Permutit Company, New York, N. Y. Softening water. 1,571,891; Feb. 2.
Tellier, Roy G., Chicago, Ill., assignor to The Permutit Company, New York, N. Y. Water-softening art and material. 1,571,892; Feb. 2.
Telling-Stevens Motors, Limited. (See Whitehorn, Harold K., assignor.)
Ternan, Alfred L., and E. Olson, Quartzburg, Idaho. Renewable shovel. 1,571,818; Feb. 2.
Terry, William B., assignor to Julius Kayser & Co., New York, N. Y. Ribbon. Des. 69,366; Feb. 2.
Tex Engineering Corporation. (See Textorius, Knut O. B., assignor.)
Textorius, Knut O. B., assignor to Tex Engineering Corporation, New York, N. Y. Machine-operating mechanism. 1,571,653; Feb. 2.

Therman Leather Goods Co. (See Guenther, Henry J., assignor.)
Thomas, Henry, London, England, assignor to U. S. Slicing Machine Company, La Porte, Ind. Slicing machine. 1,571,217; Feb. 2.
Thomas, John G. P., Preston, England, assignor to General Motors Corporation, Detroit, Mich. Clutch and brake control on road vehicles. Re16,257; Feb. 2.
Thompson, James H., Hollidays Cove, W. Va. Electron-discharge device. 1,571,499; Feb. 2.
Thompson, James H., Hollidays Cove, W. Va. Device for winding symmetrical coils. 1,571,500; Feb. 2.
Tiedemann, Henry F., assignor to Theo. Tiedemann & Sons, Inc., New York, N. Y. Machine for making shirred ribbons. 1,571,654; Feb. 2.
Tiedemann, Theo., & Sons, Inc. (See Tiedemann, Henry F., assignor.)
Tikalsky, Charles W., Manitowoc, Wis. Grease gun. 1,571,307; Feb. 2.
Tingley, Philo B., New York, N. Y. Scooter. 1,571,562; Feb. 2.
Tingley, Philo B., New York, N. Y. Web-winding mechanism. 1,571,610; Feb. 2.
Toresan, James, Susanville, Calif. Window opener and closure. 1,571,810; Feb. 2.
Trico Products Corporation. (See Folberth, Fred G., and W. M., assignors.)
Trix, Herbert B., Detroit, Mich. Deflector support. 1,571,563; Feb. 2.
Trout, Harry W., assignor to Cotswold Comfortable Company, Syracuse, N. Y. Garnett machine. 1,571,743; Feb. 2.
Trust, Henry, deceased, Park Ridge, N. J., and F. M. Ashley, Brooklyn, N. Y.; said Ashley assignor to J. Trust, Park Ridge, N. J.; J. Trust, administratrix. Supporting and actuating mechanism for mixing and beating machines. 1,571,655; Feb. 2.
Trust, Josephine, administratrix. (See Trust H., and Ashley.)
Turnier, Harry A., New York, N. Y. Speed-recording device. 1,571,820; Feb. 2.
Tusing, Isaac N., Rye, Colo. Traction lug. 1,571,821; Feb. 2.
Ulrich, Edward R., Chicago, Ill. Sterilizing device. 1,571,872; Feb. 2.
Ulrich, George E., assignor to Eastman Machine Company, Buffalo, N. Y. Knife for cloth-cutting machines or the like. 1,571,441; Feb. 2.
Underwood Computing Machine Conpany. (See Waldheim, John, assignor.)
United Alloy Steel Corporation. (See Lentz, George W., assignor.)
United Concrete Pipe Company. (See Peterson, Earl L., assignor.)
United Shoe Machinery Corporation. (See Cosgrove, John W., assignor.)
United Shoe Machinery Corporation. (See Furber, Frederick M., assignor.)
United Shoe Machinery Corporation. (See Pym, Arthur F., assignor.)
U. S. Cartridge Company. (See Carmichael, James H., assignor.)
U. S. Manufacturing Corporation. (See Bennett, John L., assignor.)
U. S. Slicing Machine Company. (See Thomas, Henry, assignor.)
Vaaler, Jens, assignor to The Clemetsen Company, Chicago, Ill. Costumer or coat hanger. 1,571,308; Feb. 2.
Valcourt, Louis E., assignor to Louis Stern Co., Providence, R. I. Bracelet. 1,571,532; Feb. 2.
Valcourt, Louis E., Pawtucket, assignor to Louis Stern Co., Providence, R. I. Bracelet. 1,571,533; Feb. 2.
Van Deren, James B., Hennessey, Okla. Automatic weighing machine. 1,571,460; Feb. 2.
Van Deventer, Harry R., assignor to Dubilier Condenser & Radio Corporation, New York, N. Y. Electrical condenser. 1,571,501; Feb. 2.
Van Nuys, Claude C., Cranford, and W. Wilkinson, Jersey City, N. J., assignors to Air Reduction Company, Incorporated, New York, N. Y. Separation of the constituents of gaseous mixtures. 1,571,461; Feb. 2.
Vapo Products Company. (See Wiese, Carl T., assignor.)
Vaughan, Victor G., Wilkinsburg, Pa., assignor to Westinghouse Electric & Manufacturing Company. Electrically-heated appliance. 1,571,922; Feb. 2.
Venable, William M. (See Garlinghouse, A. F., and Venable.)
Venn-Brown, Lionel, Longueville, New South Wales, Australia. Metal-extraction process. 1,571,502; Feb. 2.
Vermont Casein Pty, Ltd. (See Foster, Ernest, assignor.)
Villaret, Gustave E., Leonia, N. J., assignor to William R. Noe & Sons, New York city, N. Y. Base for portable electric lamps. Des. 69,367; Feb. 2.
Villaret, Gustave E., Leonia, N. J., assignor to William R. Noe & Sons, New York, N. Y. Arm for bridge lamps. Des. 69,368; Feb. 2.
Villaret, Gustave E., Leonia, N. J., assignor to William R. Noe & Sons, New York, N. Y. Arm for bridge lamps. Des. 69,369; Feb. 2.
Vincent, Jesse G., assignor to Packard Motor Car Company, Detroit, Mich. Carburetor. 1,571,611; Feb. 2.
Voorhees, Samuel D., Bay City, Mich. Chimney block. 1,571,387; Feb. 2.
Vorel, Frank, assignor of one-half to J. E. Moravec, Cleveland, Ohio. Engine valve and making the same. 1,571,744; Feb. 2.
Vortex Mfg. Co., The. (See Barbieri, Cesare, assignor.)
Vortex Mfg. Co. (See Carle, Harold, assignor).
Wade, William H., Chicago, Ill. Radio-apparatus cabinet. 1,571,923; Feb. 2.
Wagner, John L. (See Madden, Louis J., assignor.)
Wahlgren, Knut E., Valley Stream, and R. W. Pittman, New York, N. Y.; said Pittman assignor to said Wahlgren. Core-making machine. 1,571,442; Feb. 2.
Waldheim, John, Elizabeth, N. J., assignor to Underwood Computing Machine Company, New York, N. Y. Computing machine. 1,571,534; Feb. 2.
Waldron, Charles R., and S. G. Stevenson, Elyria, Ohio. Bathing shoe. 1,571,462; Feb. 2.
Wall, Orlando B., Wichita, Kans. Well-drilling apparatus. 1,571,309; Feb. 2.
Walliser, H. F., Company. (See Walliser, Robert E., assignor.)
Walliser, Robert E., assignor to H. F. Walliser Company, Chicago, Ill. Attaching device for picture and mirror cords. 1,571,564; Feb. 2.
Walter, Samuel A., Courtland, Kans. Corn-picking machine. 1,571,388; Feb. 2.
Waner, Arthur. (See Clark, Samuel B., assignor.)
Wann, Eugene E., Bradford, Pa. Gas burner. 1,571,822; Feb. 2.
Ward, Wilburt, Ste. Genevieve, Mo. Stoker. 1,571,612; Feb. 2.
Warner, Harvey J., assignor of one-third to A. S. Carter and one-third to W. J. Cattell, Denver, Colo. Lathe. 1,571,745; Feb. 2.
Warr, Harold G., Park Ridge, assignor to The P & M Company, Chicago, Ill. Rail anchor. 1,571,218; Feb. 2.
Washburn, Loring, Greenwich, Conn., assignor to S. H. Pomeroy Company, Inc., New York, N. Y. Muntin-bar lock for metal windows. 1,571,350; Feb. 2.
Washington, William, Dunkirk, N. Y. Supporting cores. 1,571,535; Feb. 2.
Watkins, Frank O., Cincinnati, Ohio. Valve. 1,571,351; Feb. 2.
Weaver, Frank R., Fairgrove, Mo. Musical instrument. 1,571,823; Feb. 2.
Weaver, Orlie O. (See Brotherton, G. W., Weaver, and Johnson.)
Webb, Archibald W., jr., Fawn Grove, Pa. Shock absorber. 1,571,825; Feb. 2.
Webb, B. H., et al. (See Simpson, Arthur E., assignor.)
Webb, H. L., et al. (See Simpson, Arthur E., assignor.)
Weddell, Clyde E. (See Wickersham, Roy D., assignor.)
Wedekind, Hugo, Nuremberg, Germany, assignor to Eugene Dietzgen Company, Chicago, Ill. Lettering instrument. 1,571,565; Feb. 2.
Weeks, Paul T., East Orange, N. J., assignor to Westinghouse Lamp Company. Electron-tube voltage regulator. 1,571,913; Feb. 2.
Weiland, Frank E., assignor of one-half to R. L. Heverle, Fort Myers, Fla. Tiltable-headlamp mounting. 1,571,824; Feb. 2.
Weiffens, Emile J., Manchester, England. Swing gearing for slubbing, roving, and like frames. 1,571,219; Feb. 2.
Wellenhoffer, John J., Salamanca, N. Y. Nursing-bottle holder. 1,571,826; Feb. 2.
Wellman-Seaver-Morgan Company, The. (See Case, Arthur F., assignor.)
Wemp, Ernest E., Detroit, Mich. Clutch. 1,571,746; Feb. 2.
Wemp, Ernest E., Detroit, Mich. Clutch disk. 1,571,747; Feb. 2.
Werner & Company. (See Rose, F. W. P., and Werner, assignors.)
Werner, Christian. (See Rose, F. W. P., and Werner.)
Western Electric Company. (See Whiting, D. F., and Taylor, assignors.)
Westinghouse Air Brake Company, The. (See Cady, William M., assignor.)
Westinghouse Air Brake Company, The. (See Down, Sidney G., assignor.)
Westinghouse Air Brake Company, The. (See Farmer, Clyde C., assignor.)
Westinghouse Air Brake Company, The. (See Woernley, Harry F., assignor.)
Westinghouse Electric & Manufacturing Company. (See Allcutt, Chester T., assignor.)
Westinghouse Electric & Manufacturing Company. (See Smith, Benjamin H., assignor.)
Westinghouse Electric & Manufacturing Company. (See Conrad, Frank, assignor.)
Westinghouse Electric & Manufacturing Company. (See Escholz, Otto H., assignor.)
Westinghouse Electric & Manufacturing Company. (See Fletcher, George H., assignor.)
Westinghouse Electric & Manufacturing Company. (See Fortescue, Charles L., assignor.)
Westinghouse Electric & Manufacturing Company. (See Freeman, Hubert M., assignor.)
Westinghouse Electric & Manufacturing Company. (See Gretsch, Rudolf, assignor.)
Westinghouse Electric & Manufacturing Company. (See Kenyon, Otis A., assignor.)

Westinghouse Electric & Manufacturing Company. (See Kjelsberg, Harald A., assignor.)
Westinghouse Electric & Manufacturing Company. (See Kühn, Ludwig, assignor.)
Westinghouse Electric & Manufacturing Company. (See Menzies, William E., assignor.)
Westinghouse Electric & Manufacturing Company. (See Merten, William J., assignor.)
Westinghouse Electric and Manufacturing Company. (See Meyer, H. R., and Riley, assignors.)
Westinghouse Electric & Manufacturing Company. (See Moss, Charles M., assignor.)
Westinghouse Electric & Manufacturing Company. (See Nyman, Alexander, assignor.)
Westinghouse Electric & Manufacturing Company. (See Pupin, Michael I., assignor.)
Westinghouse Electric & Manufacturing Company. (See Reed, Emerson G., assignor.)
Westinghouse Electric & Manufacturing Company. (See Rosenbaum, Bruno, assignor.)
Westinghouse Electric & Manufacturing Company. (See Sindeband, M. L., and Milnor, assignors.)
Westinghouse Electric & Manufacturing Company. (See Vaughan, Victor G., assignor.)
Westinghouse Electric & Manufacturing Company. (See Zworykin, Vladimir K., assignor.)
Westinghouse Lamp Company. (See Weeks, Paul T., assignor.)
Weston, Edward B., assignor to The Weston Paper and Mfg. Co., Dayton, Ohio. Display stand. 1,571,352; Feb. 2.
Weston Paper and Mfg. Co., The. (See Weston, Edward B., assignor.)
Wetherill, Henry E., Phoenixville, Pa. Stamping device. 1,571,656; Feb. 2.
Wetherill, Lee R., Roxborough, Philadelphia, Pa. Indicating the cope side of patterns and castings. 1,571,353; Feb. 2.
Weyenberg, Sylvester A., Milwaukee, Wis. Stitch-down lasting machine. 1,571,566; Feb. 2.
Wharton, Frederick, New York, N. Y. Sweatband for hats. 1,571,827; Feb. 2.
Whitacre, Clarence J., Janesville, Wis., assignor to General Motors Corporation, Detroit, Mich. Radiator shield for motor vehicles. 1,571,354; Feb. 2.
Whitacre, Clarence J., assignor to General Motors Corporation, Detroit, Mich. Frame and spring suspension for motor vehicles. 1,571,355; Feb. 2.
White, Emanuel C., Welland, Ontario, Canada. Calendar. 1,571,828; Feb. 2.
White, Nelson, Ithaca, assignor to Peters Morse Manufacturing Company, New York, N. Y. Paper holder for adding machines. 1,571,567; Feb. 2.
White, Richard H., London, England, assignor to Radio Corporation of America. Telephone. 1,571,356; Feb. 2.
Whitehorn, Harold K., assignor to Telling-Stevens Motors Limited, Maidstone, England. Dynamo-electric machine. 1,571,613; Feb. 2.
Whiting, Donald F., and H. S. Taylor, Brooklyn, assignor to Western Electric Company, Incorporated, New York, N. Y. Communication system. 1,571,357; Feb. 2.
Whitlock Coil Pipe Company, The. (See Ripley, William H., assignor.)
Wickersham, Roy D., assignor of one-half to C. E. Weddell, Indianapolis, Ind. Clothes stick. 1,571,220; Feb. 2.
Wiese, Carl T., assignor to Vapo Products Company, Inc., Sand Point, Idaho. Detergent composition. 1,571,829; Feb. 2.
Wilcox, Lewis T. (See Homan, William C., assignor.)
Wildbaber, Ernest, Rochester, assignor to Niles-Bement-Pond Company, New York, N. Y. Relieving milling-cutter blanks. 1,571,358; Feb. 2.
Wildbaber, Ernest, Brooklyn, assignor to Niles-Bement-Pond Company, New York, N. Y. Hob. 1,571,359; Feb. 2.
Wilkinson, Walter. (See Van Nuys, C. C., and Wilkinson.)
Wilkinson, Walter, Jersey City, N. J., assignor to Air Reduction Company, Incorporated, New York, N. Y. Indicator. 1,571,657; Feb. 2.
Willman, Irvin F., Muleshoe, Tex. Demountable rim. 1,571,830; Feb. 2.
Willwerscheid, Theodor R., St. Paul, Minn. Stamping machine with transferable dies. 1,571,614; Feb. 2.
Wilson, Frank J., Arlington, Mass. Electric-light fixture. 1,571,221; Feb. 2.
Williams, Arthur F., Leytonstone, England. Stacking machine. 1,571,360; Feb. 2.
Williams, James, Vienna, Ga. Washing machine. 1,571,361; Feb. 2.
Wilson, Charles H., North Pelham, N. Y. Penetrator for testing penetration hardness. 1,571,310; Feb. 2.
Wilson, Frank N., Webster Groves, Mo. Conveyer. 1,571,536; Feb. 2.
Wilson, George W., Henderson, Ia. Axle and wheel structure. 1,571,748; Feb. 2.
Winfield, Bernard. (See d'Albe, Edmund E. F., assignor.)
Wittjen, Johannes A., Holly Springs, Miss. Powder distributor. 1,571,311; Feb. 2.
Woernley, Harry F., Wilkinsburg, Pa., assignor to The Westinghouse Air Brake Company. Automatic car, air, and electirc couplers. 1,571,222; Feb. 2.
Wohltman, George J., Newburgh, N. Y. Detachable, stop signal, parking, and trouble automobile lamp. 1,571,749; Feb. 2.
Worthington, Everett, assignor to Zenith Radio Corporation, Chicago, Ill. Radiocabinet. Des. 69,370; Feb. 2.
Worthington, Everett, assignor to Zenith Radio Corporation, Chicago, Ill. Radiocabinet. Des. 69,371; Feb. 2.
Worthington, Everett, assignor to Zenith Radio Corporation, Chicago, Ill. Radiocabinet. Des. 69,372; Feb. 2.
Worthington, Everett, assignor to Zenith Radio Corporation, Chicago, Ill. Radiocabinet. Des. 69,373; Feb. 2.
Worthington, Everett, assignor to Zenith Radio Corporation, Chicago, Ill. Radiocabinet. Des. 69,374; Feb. 2.
Worthington, Everett, assignor to Zenith Radio Corporation, Chicago, Ill. Radiocabinet. Des. 69,375; Feb. 2.
Worthington, Everett, assignor to Zenith Radio Corporation, Chicago, Ill. Radiocabinet. Des. 69,376; Feb. 2.
Worthington, Everett, assignor to Zenith Radio Corporation, Chicago, Ill. Radiocabinet. Des. 69,377; Feb. 2.
Worthington, Everett, assignor to Zenith Radio Corporation, Chicago, Ill. Radiocabinet. Des. 69,378; Feb. 2.
Worthington, Everett, assignor to Zenith Radio Corporation, Chicago, Ill. Radiocabinet. Des. 69,379; Feb. 2.
Worthington Pump and Machinery Corporation. (See Jorgnsen, Olav E., assignor.)
Wyrfel, Samuel P., assignor to The Arrow Electric Company, Hartford, Conn. Faceplate for electrical receptacles. 1,571,879; Feb. 2.
Young, Ralph P. (See Kramer, Henry W., assignor.)
Young, Wilber E., Gordon, Nebr. Runnered wagon. 1,571,880; Feb. 2.
Zaran, Stiv, Chicago, Ill. Grain shocker. 1,571,223; Feb. 2.
Zenith Radio Corporation. (See Worthington, Everett, assignor.)
Zimmer, John, Troy, N. Y. Automatic fuel cut-off for gas stoves. 1,571,881; Feb. 2.
Zworykin, Vladimir K., Pittsburgh, Pa., assignor to Westinghouse Electric & Manufacturing Company. Oscillation-generator system. 1,571,463; Feb. 2.

ALPHABETICAL LIST OF INVENTIONS

FOR WHICH

PATENTS WERE ISSUED ON THE 2D DAY OF FEBRUARY, 1926.

NOTE.—Arranged in accordance with the first significant character or word of the name (in accordance with city and telephone directory practice). **Includes patents, reissues, and designs.**

Abdominal support. T. J. Le Cras. 1,571,420; Feb. 2.
Accelerator and making same, Hard resinous vulcanization. W. Scott. 1,571,739; Feb. 2.
Acid free from arsenic, Obtaining hydrochloric. E. Schmidt. 1,571,648; Feb. 2.
Acid liquor in sulphite pulp processes, Producing. J. D. Jenssen. 1,571,271; Feb. 2.
Adding machines, Paper holder for. N. White. 1,571,567; Feb. 2.
Addressing machines, Route marker for. E. R. Smith. 1,571,811; Feb. 2.
Adjustable gauge. J. R. Aulenback. 1,571,783; Feb. 2.
Adjustable support. T. W. Connolly. 1,571,509; Feb. 2.
Aerial ropeway. J. Gatzweiler. 1,571,520; Feb. 2.
Aeroplane kite. P. A. Gourtoff. 1,571,472; Feb. 2.
Aeroplanes and for like purposes, Double control of the combined type for. P. N. C. James. 1,571,413; Feb. 2.
Agricultural implement. R. L. Diamond. 1,571,758–9; Feb. 2.
Air-cooled condenser. F. and B. Ljungström. 1,571,524; Feb. 2.
Air-line lubricator. W. A. Smith. 1,571,495; Feb. 2.
Air rotor, Duplex. I. Schafran. 1,571,303; Feb. 2.
Alternating-current machine, Compounding. L. Schombourger. 1,571,738; Feb. 2.
Ammunition primers, Making anvils for. J. A. Dickerman. 1,571,510; Feb. 2.
Amplifier. V. W. Jensen. 1,571,414; Feb. 2.
Amplifier coil and connection. E. B. Myers. 1,571,490; Feb. 2.
Amusement novelty. R. H. Sherman. 1,571,381; Feb. 2.
Amusement trackway. W. Ray. 1,571,434; Feb. 2.
Animal trap. H. A. Powell. 1,571,432; Feb. 2.
Antiglare device. W. S. Allen. 1,571,779; Feb. 2.
Aquarium. W. Galant. 1,571,190; Feb. 2.
Arc-extinguishing device. O. H. Eschholz. 1,571,250; Feb. 2.
Artificial fabric. N. L. Duryea. 1,571,579; Feb. 2.
Ash receptacle and cigar holder, Combined. J. S. Driscoll. 1,571,762; Feb. 2.
Auto utility table. J. L. Christian. 1,571,753; Feb. 2.
Auto wrench. M. P. Fishburn. 1,571,580; Feb. 2.
Autographic register. A. A. Johnson. 1,571,448; Feb. 2.
Automatic stop. W. Henry. 1,571,834; Feb. 2.
Automobile brake. S. G. Down. 1,571,247; Feb. 2.
Automobile bumper. W. E. Ericson. 1,571,249; Feb. 2.
Automobile hoist. J. P. Donovan. 1,571,178; Feb. 2.
Automobile running boards, Adjustable step for. J. Disch and J. G. Frese. Re16,258; Feb. 2.
Automobile signal. W. F. Michael and W. A. Pauls. 1,571,861; Feb. 2.
Automobile signal device. J. J. Holley. 1,571,722; Feb. 2.
Automobile spring device. F. G. Krakan. 1,571,451; Feb. 2.
Automobile wheel-forming punch and die. A. R. Jayne. 1571,673; Feb. 2.
Automotive brake. W. M. Cady. 1,571,184; Feb. 2.
Automotive brake. S. G. Down. 1,571,244; Feb. 2.
Automotive brake. S. G. Down. 1,571,246; Feb. 2.
Axle and wheel structure. G. W. Wilson. 1,571,748; Feb. 2.
Axle assembly, Rear-. W. F. Rockwell. 1,571,800; Feb. 2.
Axle cutting-off and centering machine. W. J. Hagman. 1,571,331; Feb. 2.
Axle, Double-reduction bus. W. F. Rockwell. 1,571,801; Feb. 2.
Bag: *See*—
Brief bag.
Bag holder and filling device. R. H. Stillman. 1,571,608; Feb. 2.
Bait, Artificial. G. E. Fenner. 1,571,770; Feb. 2.
Baking glove. G. M. Meyer. 1,571,860; Feb. 2.
Baling-press feeder. W. C. Ruth. 1,571,437; Feb. 2.
Ballast, Method of and apparatus for burning. H. G. Butler. 1,571,701; Feb. 2.
Barrel, Lined sheet-metal. A. F. Lindgren. 1,571,208; Feb. 2.
Baseball game. F. H. Fredette. 1,571,469; Feb. 2.
Baskets, Detachable handle and attaching means for wooden. H. W. Kramer. 1,571,551; Feb. 2.
Bath: *See*—
Quenching bath.
Batteries, Grid for storage. R. A. Hoffman. 1,571,333; Feb. 2.

Bearing, Antifriction side. J. F. O'Connor. 1,571,683; Feb. 2.
Bearing-relining caps. L. E. Shipley. 1,571,529; Feb. 2.
Beater and mixer. R. W. Lyon. 1,571,851; Feb. 2.
Bed, Automobile. A. J. Kerth. 1,571,549; Feb. 2.
Bed and tent for automobiles, Collapsible. M. B. Mitchell. 1,571,426; Feb. 2.
Binder and making parts of same, Loose-leaf. W. P. Pitt. 1,571,299; Feb. 2.
Binding machine. A. E. Cranston. 1,571,573; Feb. 2.
Bit: *See*—
Drill bit. Extension bit.
Blank-feeding mechanism. B. H. Long and W. M. Stone. 1,571,486; Feb. 2.
Blanks for watch movements provided with jewel-in-setting or plug holes, Manufacturing process of. H. Colomb. 1,571,756; Feb. 2.
Block: *See*—
Chimney block.
Board: *See*—
Puzzle board.
Boat-propelling apparatus, Starting and steering device for. A. Lind. 1,571,421; Feb. 2.
Boat-propelling means. J. Plonka. 1,571,640; Feb. 2.
Boiler: *See*—
Water-tube boiler.
Bomb, Aerial flare. P. R. Bassett. 1,571,617; Feb. 2.
Bookcase construction. J. A. Richards. 1,571,601; Feb. 2.
Boring tool. E. Gairing. 1,571,260; Feb. 2.
Bottle. W. R. and F. P. Johnson. Des. 69,353; Feb. 2.
Box: *See*—
Ice box. Journal box.
Box packer. B. W. Deppa. 1,571,235; Feb. 2.
Box top. W. Attaway. Des. 69,341; Feb. 2.
Box particularly for needle-shaped objects. E. C. Egelin. 1,571,399; Feb. 2.
Boxes, Attaching hinged lids to rectangular metal. A. F. Ney. 1,571,429; Feb. 2.
Bracelet. L. E. Valcourt. 1,571,532–3; Feb. 2.
Bracket: *See*—
Wall bracket.
Braiding machine. E. K. Standish. 1,571,385; Feb. 2.
Braiding machines, Bobbin holder for. K. Kazarian. 1,571,587; Feb. 2.
Brake: *See*—
Automobile brake. Hand brake.
Automotive brake. Vehicle brake.
Fluid-pressure brake.
Brake. B. E. Fernow, jr. 1,571,542; Feb. 2.
Brake-band liner. P. Compton. 1,571,757; Feb. 2.
Brake lining. C. Anderson. 1,571,443; Feb. 2.
Brake-shoe construction. S. G. Down. 1,571,241–3; Feb. 2.
Brassière. A. S. Johnson. 1,571,415; Feb. 2.
Brick paving and the like, Machine for laying. H. R. Straight. 1,571,386; Feb. 2.
Brief bag. H. J. Guenther. 1,571,475; Feb. 2.
Brush. B. R. Nyhagen. 1,571,556; Feb. 2.
Buffer. E. J. Emery. 1,571,713; Feb. 2.
Building blocks, Making. E. A. Long. 1,571,849; Feb. 2.
Building board and making it. O. A. Heppes. 1,571,667; Feb. 2.
Building construction. I. Ročić. 1,571,645; Feb. 2.
Building wall. J. C. McDougall. 1,571,285; Feb. 2.
Bumper. A. W. Nordgren. 1,571,884; Feb. 2.
Bumper structure, Twin. A. W. Nordgren. 1,571,885; Feb. 2.
Bunghole seat of metal. C. R. Donner. 1,571,325; Feb. 2.
Burner: *See*—
Gas burner.
Burning fuel or gases, Method of and apparatus for controlling and directing. H. Adams. 1,571,179; Feb. 2.
Burring attachment, Automatic. A. L. Sova. 1,571,813; Feb. 2.
Button, Push. J. H. Bremer. 1,571,316; Feb. 2.
Calculator. S. J. Macfarren. 1,571,728; Feb. 2.
Calendar. E. C. White. 1,571,828; Feb. 2.
Camera, Photographic. A. S. Howell. 1,571,670; Feb. 2.
Candles, Apparatus for the manufacture of. E. A. Kerr. 1,571,589; Feb. 2.
Car, air, and electric couplers, Automatic. H. F. Woernley. 1,571,222; Feb. 2.

Car construction. J. F. O'Connor. 1,571,680; Feb. 2.
Car coupling, Mine-. H. W. Sanford. 1,571,345; Feb. 2.
Car-door latch, Grain-. P. M. Bozich. 1,571,444; Feb. 2.
Car doors, Electrical switch for. H. R. Meyer and L. G. Riley. 1,571,292; Feb. 2.
Car dumper, Rotary. A. F. Case. 1,571,233; Feb. 2.
Car-haulage plant. A. E. Norris. 1,571,732; Feb. 2.
Car-truck side frames, Wear plate for. D. S. Barrows. 1,571,229; Feb. 2.
Carburetor. J. G. Vincent. 1,571,611; Feb. 2.
Carrier: *See*—
Folding carrier.
Carton and packing the same. C. Barbieri. 1,571,918; Feb. 2.
Carton-filling machines. V. S. Fishwick. 1,571,716; Feb. 2.
Cartridge for blasting powder. A. J. Hirthler and J. Dreistadt. 1,571,478; Feb. 2.
Casehardening. W. J. Merten. 1,571,289; Feb. 2.
Casein curd, Apparatus for reducing and drying. E. Foster. 1,571,518; Feb. 2.
Cash register. O. I. Lawrence. 1,571,485; Feb. 2.
Casting, Core forming device for sash-weight. J. J. O'Brien. 1,571,894; Feb. 2.
Casting radiator sections and the like, Permanent mold for. C. B. Seem. 1,571,429; Feb. 2.
Cellulose acetates, Dyeing. R. Clavel. 1,571,320; Feb. 2.
Cement structures, Parting strip for. W. C. Burrell. 1,571,700; Feb. 2.
Cementing machine. J. W. Cosgrove. 1,571,710; Feb. 2.
Chain-applying device. C. Edwards. 1,571,764; Feb. 2.
Chair: *See*—
Folding chair. High chair.
Change-making machine. S. J. Bell. 1,571,618; Feb. 2.
Check protector. T. R. Gabel. 1,571,470; Feb. 2.
Chimney block. S. D. Voorhees. 1,571,387; Feb. 2.
China closet, buffet and extension table, Combined. J. A. Anderson. 1,571,896; Feb. 2.
Cigar-mold press. T. A. Horton and A. E. Maspons. 1,571,548; Feb. 2.
Cigarettes and cigars, Holder for. O. Hendler. 1,571,410; Feb. 2.
Circle-working implement. C. F. Golden. 1,571,777; Feb. 2.
Circuit breaker, High-tension. N. Japolsky. 1,571,630; Feb. 2.
Clamp: *See*—
Radial-drill column clamp.
Clamping device. S. H. McCowan. 1,571,853; Feb. 2.
Cleaner: *See*—
Suction cleaner. Windshield cleaner.
Cloth-cutting machines or the like, Knife for. G. E. Ulrich. 1,571,441; Feb. 2.
Cloth-laying machine. H. Schwartzman. 1,571,808; Feb. 2.
Clothes drier. W. W. Sterling. 1,571,496; Feb. 2.
Clothes stick. R. D. Wickersham. 1,571,220; Feb. 2.
Clothesline holder. W. L. Kelly. 1,571,336; Feb. 2.
Clutch. E. E. Wemp. 1,571,746; Feb. 2.
Clutch disk. E. E. Wemp. 1,571,747; Feb. 2.
Coal, Gasification of. K. P. McElroy. 1,571,877; Feb. 2.
Coffeepot, Automatic drip. G. G. Chamberlain. 1,571,752; Feb. 2.
Coffee-urn crown. J. N. Laughlin and F. J. Myers. 1,571,843; Feb. 2.
Coils, Device for winding symmetrical. J. H. Thompson. 1,571,500; Feb. 2.
Coin-actuated signaling apparatus. P. G. T. de Villiers. 1,571,693; Feb. 2.
Coin-in-the-slot machines, Coin-box mechanism for. P. G. T. de Villiers. 1,571,692; Feb. 2.
Coins, Device used to collect. J. L. Stowers. 1,571,383; Feb. 2.
Coke and utilizing the heat liberated thereby, Plant for cooling hot. A. Moetteli. 1,571,455; Feb. 2.
Collar and making the same, Reversible turndown. J. Juhász. 1,571,480; Feb. 2.
Collar button. J. F. Ahrens. 1,571,780; Feb. 2.
Combination, Lock. G. E. La Port. 1,571,281; Feb. 2.
Communication system. D. F. Whiting and H. S. Taylor. 1,571,357; Feb. 2.
Compass and protractor, Combined. E. E. Ginter. 1,571,261; Feb. 2.
Compensator. J. M. Dayton. 1,571,577; Feb. 2.
Computing machine. J. Waldheim. 1,571,534; Feb. 2.
Concertina keyboard. F. S. Pitt-Taylor. 1,571,431; Feb. 2.
Concrete column. A. H. Reeves. 1,571,799; Feb. 2.
Concrete-finishing machine. W. W. Swhier. 1,571,817; Feb. 2.
Concrete-pipe joint. E. L. Peterson. 1,571,870; Feb. 2.
Concrete wall and laying it, Imitation-brick. M. E. Stout. 1,571,815; Feb. 2.
Condenser. J. C. Rogers. 1,571,375; Feb. 2.
Condenser, Variable. G. H. Clark. 1,571,370; Feb. 2.
Confection-coating machine. A. L. Bausman. 1,571,365; Feb. 2.
Controlling mechanism. F. M. Furber. 1,571,259; Feb. 2.
Convertible table. C. J. Schmitt. 1,571,806; Feb. 2.
Conveyer. F. N. Wilson. 1,571,536; Feb. 2.
Conveyer system. H. N. Middleton. 1,571,525; Feb. 2.
Conveying mechanism. J. R. George. 1,571,521; Feb. 2.
Copyholder. H. B. Coles. 1,571,658; Feb. 2.
Corda, Attaching device for picture and mirror. R. E. Walliser. 1,571,564; Feb. 2.

Core-making machine. K. E. Wahlgren and R. W. Pittman. 1,571,442; Feb. 2.
Cores, Supporting. W. Washington. 1,571,535; Feb. 2.
Corn-husking machine. T. H. Oppenheim and B. Selhorst. 1,571,866; Feb. 2.
Corn-picking machine. S. A. Walter. 1,571,388; Feb. 2.
Costumer or coat hanger. J. Vanler. 1,571,308; Feb. 2.
Cotton-gin feeder. G. E. Evans. 1,571,514; Feb. 2.
Coupling: *See*—
Car coupling. Universal coupling.
Rod or tube coupling.
Counter, Heavy-duty. J. M. Dayton. 1,571,576; Feb. 2.
Cue chalker. A. Nelson. 1,571,211; Feb. 2.
Cup dispenser. H. Carle. 1,571,705; Feb. 2.
Current meter. W. G. Prince. 1,571,433; Feb. 2.
Current tap. R. B. Benjamin. 1,571,696; Feb. 2.
Curtain and shade supporting bracket. S. J. Dick. 1,571,760; Feb. 2.
Curtain rods, Runner for. E. Chalmer. 1,571,394; Feb. 2.
Cut-out. M. Campbell. 1,571,791; Feb. 2.
Cutter: *See*—
Rail cutter.
Cutter drill, Adjustable. L. J. Madden. 1,571,339; Feb. 2.
Cutting tool. C. Schramm. 1,571,347; Feb. 2.
Dam-building machine, Hydraulic-fill-. J. M. Howells. 1,571,446; Feb. 2.
Dauber. C. B. Foote. 1,571,254; Feb. 2.
Decoy. C. L. Dewey. 1,571,711; Feb. 2.
Decoy duck, Hunter's. J. B. Pitts. 1,571,213; Feb. 2.
Deflector support. H. B. Trix. 1,571,563; Feb. 2.
Derrick, Collapsible. J. S. Burkett. 1,571,318; Feb. 2.
Detector. T. G. McClanahan. 1,571,907; Feb. 2.
Detergent composition. C. T. Wiese. 1,571,829; Feb. 2.
Dial-aligning device. J. B. MacNamee. 1,571,855; Feb. 2.
Diestock. R. C. Fleming. 1,571,515; Feb. 2.
Dipper tooth. C. B. Andrews. 1,571,782; Feb. 2.
Dispensing device. B. J. Garris. 1,571,775; Feb. 2.
Display device. L. Chartoff and J. Suinersplitz. 1,571,623; Feb. 2.
Display form. W. H. Lee. 1,571,844; Feb. 2.
Display rack. L. S. Conklin. 1,571,659; Feb. 2.
Display stand. E. B. Weston. 1,571,352; Feb. 2.
Documents and the like, Apparatus for filing. W. R. M. de Whalley. 1,571,187; Feb. 2.
Doll. G. H. Parsons. 1,571,868; Feb. 2.
Doll heads, Applying eye mountings in. L. J. Grubman. 1,571,916; Feb. 2.
Door catch. P. Frantz. 1,571,194; Feb. 2.
Door hanger. F. E. Howard. 1,571,334; Feb. 2.
Door lock, Portable. G. Fratzke. 1,571,543; Feb. 2.
Door operating and locking device. S. B. Haseltine. 1,571,899; Feb. 2.
Dough-cutting machine. J. Baron. 1,571,504; Feb. 2.
Draft regulator. J. E. McLeod and A. J. Hewitt. 1,571,854; Feb. 2.
Drafts, Producing mechanical. G. J. A. L. Prat. 1,571,797; Feb. 2.
Drain trap. G. D. Casper. 1,571,707; Feb. 2.
Dredger bucket, Clamshell. A. Hutson. 1,571,838; Feb. 2.

Gear grinder. C. Knowles. 1,571,337; Feb. 2.
Gearing, Transmission. F. L. Orr. 1,571,457; Feb. 2.
Generator: *See*—
Hydrocarbon generator.
Girder, Wooden. C. Dornier. 1,571,238; Feb. 2.
Glass articles, Machine for forming. A. N. Cramer. 1,571,445; Feb. 2.
Glass feeder. L. D. Soubler. 1,571,215; Feb. 2.
Glass tubing, Method of and apparatus for forming. L. D. Soubler. 1,571,216; Feb. 2.
Glue, Casein waterproof. A. A. Dunham. 1,571,662; Feb. 2.
Glue machine. F. Diehl. 1,571,324; Feb. 2.
Grain-cutting machine, Universal. D. Guelbaum. 1,571,408; Feb. 2.
Grain shocker. S. Zaran. 1,571,223; Feb. 2.
Grave marker. J. W. Claxton. Des. 69,345; Feb. 2.
Greasing and oiling device. S. S. Rundell. 1,571,436; Feb. 2.
Grid leak. H. M. Freeman. 1,571,257; Feb. 2.
Grinding mill. S. Snyder. 1,571,812; Feb. 2.
Gun, Fish. G. Castellan. 1,571,751; Feb. 2.
Gun, Grease. C. W. Tikalsky. 1,571,307; Feb. 2.
Guns, Sighting device for. J. Becker. 1,571,391; Feb. 2.
Gypsum, Method of and apparatus for drying and calcining. C. Dressler. 1,571,189; Feb. 2.
Hand brake. T. H. Link. 1,571,677; Feb. 2.
Hanger: *See*—
Door hanger. Garment hanger.
Eaves-trough hanger.
Harvester, Bean. G. E. Pritchard. 1,571,491; Feb. 2.
Harvester, Potato. E. Sanders. 1,571,344; Feb. 2.
Hats, Sweatband for. F. Wharton. 1,571,827; Feb. 2.
Hay-handling method and device. J. W. Callahan and G. B. Dushberre. 1,571,539; Feb. 2.
Hay-stacking frame. A. Bradley. 1,571,787; Feb. 2.
Hay sweep. M. W. Durgin. 1,571,398; Feb. 2.
Headlamp mounting, Tiltable-. F. E. Weiland. 1,571,824; Feb. 2.
Headlight-dimming means. F. L. Foote. 1,571,255; Feb. 2.
Headlight, Locomotive. N. D. Levin. Des. 69,357; Feb. 2.
Heat-exchange apparatus. W. H. Ripley. 1,571,889; Feb. 2.
Heat treating of articles. G. H. Gilman. 1,571,329; Feb. 2.
Heated-air registers, Combined deflector and cover for. C. W. Krueger. 1,571,631; Feb. 2.
Heater: *See*—
Oil heater. Water heater.
Oil-engine heater.
Heater. F. A. Nieberding. 1,571,636; Feb. 2.
Heaters, Thermostatic control for. H. G. Jensen. 1,571,270; Feb. 2.
Heating and ventilating apparatus. P. Belvin. 1,571,785; Feb. 2.
Heat-treating furnace. H. Halvorsen. 1,571,666; Feb. 2.
Heel protector. E. Barthes. 1,571,466; Feb. 2.
High chair. W. C. Lehman. 1,571,846; Feb. 2.
Helicopter and aeroplane, Combined. A. V. Santarsiero. 1,571,647; Feb. 2.
Hob. E. Wildhaber. 1,571,359; Feb. 2.
Hoist, Ash can. D. E. Parrish. 1,571,297; Feb. 2.
Hoist bucket, Skip. R. H. Beaumont. 1,571,784; Feb. 2.
Hoisting device. C. C. Bussinger. 1,571,789; Feb. 2.
Holder. E. H. Pinkbam. 1,571,794; Feb. 2.
Hollow ware from refractory mineral substances, Method of and apparatus for the manufacture of. C. C. Schnur. 1,571,607; Feb. 2.
Hone for sharpening clippers. J. P. Niesen. 1,571,555; Feb. 2.
Horn-operating mechanism, Motor-. U. Beliveau. 1,571,695; Feb. 2.
Hose rack. E. A. Kelley. 1,571,275; Feb. 2.
Hydraulic brake system. G. Fornaca. 1,571,517; Feb. 2.
Hydraulic jack. J. Roberts. 1,571,602; Feb. 2.
Hydrocarbon generator. S. B. Clark. 1,571,321; Feb. 2.
Ice box. C. Paige. 1,571,342; Feb. 2.
Ice-card holder. S. Hermanowich. 1,571,835; Feb. 2.
Ice-cream freezer. F. A. Stirrup. 1,571,609; Feb. 2.
Ice pick and the like. C. Schaum. 1,571,890; Feb. 2.
Impeller. C. F. Queisser. 1,571,735; Feb. 2.
Incandescent light, Inverted. V. H. Slinack. 1,571,895; Feb. 2.
Incubator. J. T. Landgraf. 1,571,280; Feb. 2.
Indexing device. F. W. Huber. 1,571,479; Feb. 2.
Indicator. C. E. Summers. 1,571,349; Feb. 2.
Indicator. W. Wilkinson. 1,571,657; Feb. 2.
Induction electricity meter. J. Harris. 1,571,198; Feb. 2.
Induction electricity meter. J. Harris. 1,571,200; Feb. 2.

Induction motor, Synchronous. J. Harris. 1,571,199; Feb. 2.
Injector. J. M. Gonzalés. 1,571,406; Feb. 2.
Ink remover. H. W. Becker. 1, 571,313; Feb. 2.
Inkwell and penrack, Combination. R. Famulener. 1,571,252; Feb. 2.
Insect destroyer. J. Kasmeier. 1,571,481; Feb. 2.
Insects, flies, etc., Device or implement for killing or disabling. J. L. Bennett. 1,571,619; Feb. 2.
Iron: *See*—
Soldering iron.
Ironing table. A. Bettinardi. 1,571,698; Feb. 2.
Jack: *See*—
Hydraulic jack.
Jack. K. H. Saunders. 1,571,606; Feb. 2.
Jar. G. James. Des. 69,352; Feb. 2.
Jewelry chain. A. L. Newman. 1,571,731; Feb. 2.

Saw gauge. A. F. Dougan. 1,571,397; Feb. 2.
Scales, Knife-edge pivot for. C. H. Hartman. 1,571,265; Feb. 2.
Scales, Steelyard rod and spring connection for. W. F. Stimpson. 1,571,306; Feb. 2.
Scooter. P. B. Tingley. 1,571,562; Feb. 2.
Scraper, Riding fresno. T. A. Hartung. 1,571,476; Feb. 2.
Screen. H. J. Reed and C. L. Spafford. 1,571,736; Feb. 2.
Seaweed, Apparatus and method for collecting. A. R. Clark. 1,571,395; Feb. 2.
Sewing machines, Attachment for. P. I. Pankoff. 1,571,296; Feb. 2.
Shade support. L. C. Doane. 1,571,578; Feb. 2.
Shaft adjustment. W. L. Paul. 1,571,557; Feb. 2.
Sheet material, Machine for feeding. E. Craig. 1,571,572; Feb. 2.
Sheet-metal pipe, Producing. R. Irvin. 1,571,412; Feb. 2.
Sheet-metal straightening machine. G. W. Lentz. 1,571,207; Feb. 2.
Shingle-wiring machine, Flexible. A. A. Griswold and A. C. Goddard. 1,571,582; Feb. 2.
Shock absorber. A. J. Bramlette, jr. 1,571,788; Feb. 2.
Shock absorber. J. Caldwell. 1,571,393; Feb. 2.
Shock absorber. A. W. Webb, jr. 1,571,825; Feb. 2.
Shock-absorbing mechanism, Friction. A. M. Brenne. 1,571,699; Feb. 2.
Shock-absorbing mechanism, Friction. S. B. Haseltine. 1,571,898; Feb. 2.
Shock-absorbing mechanism, Friction. J. F. O'Connor. 1,571,679; Feb. 2.
Shock-absorbing mechanism, Friction. J. F. O'Connor. 1,571,681–2; Feb. 2.
Shock-absorbing mechanism, Friction. J. F. O'Connor. 1,571,684–5; Feb. 2.
Shoe and method of making. J. D. Price. 1,571,796; Feb. 2.
Shoe and method of making. J. D. Price and W. H. Drake. 1,571,798; Feb. 2.
Shoe, Bathing. C. R. Waldron and S. G. Stevenson. 1,571,462; Feb. 2.
Shoe-polishing machine, Portable. H. H. Force. 1,571,773; Feb. 2.
Shoe, Wooden. C. J. Swanstrom. 1,571,498; Feb. 2.
Shoes, Making. A. F. Pym. 1,571,734; Feb. 2.
Shovel: *See*—
Renewable shovel.
Show-case stand, Rotary. C. E. Nichols. 1,571,597; Feb. 2.
Side frame. B. W. Kadel. 1,571,273; Feb. 2.
Sighting instruments, Device for adjustment of the side angle of. A. J. Auspitzer. 1,571,177; Feb. 2.
Sign. F. H. Fischer. 1,571,771; Feb. 2.
Signal: *See*—
Automobile signal. Vehicle signal.
Signal apparatus. A. P. Hagar. 1,571,547; Feb. 2.
Signal service. W. S. Ludlow, jr. 1,571,209; Feb. 2.
Signatures, Attachment for reproducing facsimile. C. E. Gilbert. 1,571,664; Feb. 2.
Slate, Process and machine for variably cutting roofing. J. H. Emack. 1,571,712; Feb. 2.
Slicing machine. H. Thomas. 1,571,217; Feb. 2.
Smoker's set. E. E. Slick. Des. 69,365; Feb. 2.
Snap limit gauge. B. H. Blood. 1,571,314; Feb. 2.
Snap molding, Pattern for. H. C. Pfeil. 1,571,689; Feb. 2.
Soap and making the same, Flaked. G. F. Dawes. 1,571,625; Feb. 2.
Soap holder. J. S. Labry, sr. 1,571,842; Feb. 2.
Soldering iron. H. J. Hockersmith and F. M. Argerbright. 1,571,836; Feb. 2.
Soldering iron. V. J. Rosenblatt. 1,571,903; Feb. 2.
Sound-reproducing arrangement. W. Schloemilch. 1,571,378; Feb. 2.
Spark coil terminal. O. N. Olson. 1,571,638; Feb. 2.
Speed recording device. H. A. Turnier. 1,571,820; Feb. 2.
Spot or search light assembly. O. H. Clarke. 1,571,709; Feb. 2.
Spotlight-range-limiting device. J. K. Olsen. 1,571,456; Feb. 2.
Sprayer. E. Hugé. 1,571,629; Feb. 2.

Sprayers, Cooling system for. J. C. Hull. 1,571,837; Feb. 2.
Spring: *See*—
Furniture spring.
Spring hanger, bolt, and eye, Self-lubricating. A. J. Dilley. 1,571,761; Feb. 2.
Sprinkler head. O. J. Lubbock. 1,571,422; Feb. 2.
Stacking machine. A. F. Williams. 1,571,360; Feb. 2.
Stamping device. H. E. Wetherill. 1,571,656; Feb. 2.
Stamping machine with transferable dies. T. R. Willwerscheid. 1,571,614; Feb. 2.
Stamps, Label holder for self-inking. G. A. J. Meyer. 1,571,291; Feb. 2.
Stand: *See*—
Display stand. Show-case stand.
Statuette. E. Freund. Des. 69,350; Feb. 2.
Steam trap. F. L. Hutchinson. 1,571,921; Feb. 2.
Steel and iron with chronium, manganese, etc., Production of alloyed. T. G. and J. E. L. Stig. 1,571,382; Feb. 2.
Stenographic machines, Paper-feeding means for. M. Grandjean. 1,571,522; Feb. 2.
Sterilizing device. E. R. Ulrich. 1,571,872; Feb. 2.
Stickpin. N. P. Corney. Des. 69,346; Feb. 2.
Stilt, Adjustable. E. A. Boardman. 1,571,919; Feb. 2.
Stock ring. W. S. Parrish. 1,571,867; Feb. 2.
Stoker. W. Ward. 1,571,612; Feb. 2.
Stone and sill machine, Dimension. S. R. Edmonds. 1,571,763; Feb. 2.
Stone setting. I. Behrstock. Des. 69,343; Feb. 2.
Stop light, Safety. C. M. Janes. 1,571,584; Feb. 2.
Storage receptacle for articles of food. F. H. Lehman. 1,571,875; Feb. 2.
Stove. G. W. Howes. 1,571,723; Feb. 2.
Stovepipe fastener. J. M. Fisher. 1,571,772; Feb. 2.
Stoves, Automatic fuel cut-off for gas. J. Zimmer. 1,571,881; Feb. 2.
Submarine. V. De Feo. 1,571,833; Feb. 2.
Suction cleaner. J. B. Kirby. 1,571,276; Feb. 2.
Sugar, Making grape. W. B. Newkirk. 1,571,212; Feb. 2.
Sulpnurizing organic compounds. F. W. Atack. 1,571,181; Feb. 2.
Swab. F. W. Leidecker. 1,571,876; Feb. 2.
Swing gearing for slubbing, roving, and like frames. E. J. Welffens. 1,571,219; Feb. 2.
Switch: *See*—
Electric switch. Electrical switch.
Switch device, Interlocking. C. C. Farmer. 1,571,191; Feb. 2.
Table: *See*—
Auto utility table. Ironing table.
Convertible table. Operating table.
Folding table.
Taillight. J. V. Machesky. 1,571,286; Feb. 2.
Tank. H. M. Knight. 1,571,484; Feb. 2.
Tanks, Making transformer. E. G. Reed. 1,571,300; Feb. 2.
Tanning preparations and products thereof, Making. T. Blackadder. 1,571,873; Feb. 2.
Taximeter fare-counter control. F. O. Gray. 1,571,263; Feb. 2.
Telegraphic transmission of pictures and images. E. E. F. d'Albe. 1,571,897; Feb. 2.
Telephone. R. H. White. 1,571,356; Feb. 2.
Telephone cover. J. H. W. Pflueger. 1,571,639; Feb. 2.
Telephone-receiver unit. V. E. Morrison. 1,571,454; Feb. 2.
Telephone ringer, Automatic. E. T. Richey. 1,571,435; Feb. 2.
Telephone substation circuits. W. H. Edwards. 1,571,513; Feb. 2.
Tent-securing device. G. D. Newman. 1,571,295; Feb. 2.
Textile fabric. W. C. Korzinek. Des. 69,356; Feb. 2.
Textile-finishing machine. F. W. P. Rose and C. Werner. 1,571,802; Feb. 2.
Thermostatic oven regulator. A. F. Erickson. 1,571,400; Feb. 2.
Threads or filaments, Apparatus for the manufacture of artificial. N. B. Grillet. 1,571,474; Feb. 2.
Tire heads, Machine for placing flipper strips on. W. Cardocky. 1,571,404; Feb. 2.
Tire-spreading tool. J. F. Rogers. 1,571,376; Feb. 2.
Tire-tread advertising device. F. Eickhoff. 1,571,248; Feb. 2.
Tire-valve stems, Combined dust cap and air seal for. G. W. Oakes. 1,571,865; Feb. 2.
Tobacco-leaf-stemming machine. F. H. Berold. 1,571,537; Feb. 2.
Tobacco pipe. A. B. Modine. 1,571,729; Feb. 2.
Tobacco pipe. A. Orlik. Des. 69,358–9; Feb. 2.
Tone arm and wireless headpiece coupling. E. J. Kirk, T. D. Jones, and F. B. Fisher, jr. 1,571,204; Feb. 2.
Tool holder. L. C. Cole. 1,571,322; Feb. 2.
Top. J. N. Cayo. 1,571,708; Feb. 2.
Torpedo. E. S. R. Brandt. 1,571,507; Feb. 2.
Torpedo. C. B. McVay, jr. 1,571,487; Feb. 2.
Toy. J. Monson. 1,571,901; Feb. 2.
Toy. T. M. Renick. 1,571,643; Feb. 2.
Toy, Figure. M. S. Lamb. 1,571,279; Feb. 2.
Toy, Mechanical. L. J. Kass. 1,571,203; Feb. 2.
Toy, Mechanical. H. T. Kingsley. 1,571,674; Feb. 2.
Toy, Pony and rider. W. D. Bludworth. Des. 69,344; Feb. 2.
Toy railway cars, Door and mounting therefor for. H. S. Becker. 1,571,505; Feb. 2.
Toy vehicle. M. Morihata. 1,571,489; Feb. 2.
Track liner. J. Clark. 1,571,920; Feb. 2.
Traction lug. I. N. Tusing. 1,571,821; Feb. 2.
Traction wheels, Attachment for. C. R. Lanus. 1,571,419; Feb. 2.
Tractor. E. H. Dieckmann. 1,571,236; Feb. 2.
Tractor. R. O. Hendrickson. 1,571,628; Feb. 2.
Tractor hitch. C. F. Byrne. 1,571,319; Feb. 2.
Traffic indicator and advertising sign. A. B. Camden. 1,571,790; Feb. 2.
Train-wire coupler, Electric. C. C. Farmer. 1,571,190; Feb. 2.
Trains, Power transmission for. A. Sugden. 1,571,816; Feb. 2
Transit. C. M. Bernegau. 1,571,697; Feb. 2.
Transmission control. C. S. Peren. 1,571,431; Feb. 2
Trap: *See*—
Animal trap. Rat trap.
Drain trap. Steam trap.
Trap. J. Naidul. 1,571,635; Feb. 2.
Tray. P. A. Gollnick. 1,571,330; Feb. 2.
Tube-flaring tool. F. R. Hartsock. 1,571,267; Feb. 2.
Tubes, Mold for curing inner. M. A. Flynn. 1,571,193; Feb. 2.
Typewriters, Vertical-space register for. L. R. Fulton. 1,571,403; Feb. 2.
Typewriting machine. E. B. Hess. 1,571,718–21; Feb. 2.
Typewriting machines, Reverse line-spacing device for. C. Gabrielson. 1,571,519; Feb. 2.
Universal coupling. R. M. Lovejoy. 1,571,595; Feb. 2.
Uppers over lasts, Machine for shaping. A. F. Pym. 1,571,733; Feb. 2.
Utensil, Baking. V. J. Morris. 1,571,678; Feb. 2.
Vacuum tubes, Connection for producing oscillations with. L. Kühn. 1,571,278; Feb. 2.
Valve. A. F. Erickson. 1,571,401; Feb. 2.
Valve. R. S. Shimp. 1,571,810; Feb. 2.
Valve. F. O. Watkins. 1,571,351; Feb. 2.
Valve and making the same, Engine. F. Vorel. 1,571,744; Feb. 2.
Valve, Automatic air. F. J. and J. W. Frunz. 1,571,258; Feb. 2.
Valve-spring lifter. L. Gaffney. 1,571,195; Feb. 2.
Valve lock. R. W. Hompe. 1,571,669; Feb. 2.
Valve, Pressure-equalizer. H. E. Darrow. 1,571,396; Feb. 2.
Valve, Quick-action triple. D. Božić. 1,571,506; Feb. 2.
Vat: *See*—
Dye vat.
Vehicle brake, Motor-. S. G. Down. 1,571,245; Feb. 2.
Vehicle signal. L. B. Keller. 1,571,841; Feb. 2.
Vehicle stabilizer. R. Gretsch. 1,571,264; Feb. 2.
Vehicle wheel. J. F. Fairley. 1,571,251; Feb. 2.
Vehicle wheel. J. Samson. 1,571,804; Feb. 2.
Vehicle wheel. L. F. Schumacher. 1,571,493; Feb. 2.
Vehicles, Bumper for motor. C. J. Iven. 1,571,671; Feb. 2.
Vehicles, Clutch and brake control on road. J. G. P. Thomas. Re16,257; Feb. 2.
Vehicles, Frame and spring suspension for motor. C. J. Whitacre. 1,571,355; Feb. 2.
Vehicles, Radiator shield for motor. C. J. Whitacre. 1,571,354; Feb. 2.
Vehicles, Safety lock for motor. C. L. Hubbs. 1,571,724; Feb. 2.
Velocipede. O. Karcher. 1,571,202; Feb. 2.
Vending machine. W. L. Moser. 1,571,341; Feb. 2.
Vending machine for compressed gases and fluids in containers. J. E. Carroll. 1,571,750; Feb. 2.
Ventilator: *See*—
Roof ventilator.
Vise wrench, Adjustable. A. B. Faulkner. 1,571,326; Feb. 2.
Volt-ampere meter. F. Conrad. 1,571,234; Feb. 2.
Volt-ampere meter. B. H. Smith. 1,571,912; Feb. 2.
Wagon, Runnered. W. E. Young. 1,571,880; Feb. 2.
Wall bracket, Self-fastening. O. E. Long. 1,571,283; Feb. 2.
Wardrobe, Portable. L. M. Bender. 1,571,366; Feb. 2.
Washer: *See*—
Lock washer.
Washing machine. E. C. Reutlinger. 1,571,887; Feb. 2.
Washing machine. J. Williams. 1,571,361; Feb 2.
Water heater, Electric. W. A. Sharpe. 1,571,379; Feb. 2.
Water-intercepting means. E. A. Lynn. 1,571,553; Feb. 2.
Water-recording apparatus. G. H. Fisher. 1,571,253; Feb. 2.
Water, Softening. R. G. Tellier. 1,571,891; Feb. 2.
Water-softening art and material. R. G. Tellier. 1,571,892; Feb. 2.
Water-treating system. A. W. Anderson and J. R. Hickox. 1,571,225; Feb. 2.
Water-tube boiler. A. Cotton. 1,571,369; Feb. 2.
Water waver. J. Brettschneider. 1,571,317; Feb. 2.
Web-winding mechanism. P. B. Tingley. 1,571,610; Feb. 2.
Weighing machine, Automatic. J. B. Van Deren. 1,571,460; Feb. 2.

Weighing mechanism. H. L. Merrick 1,571,288; Feb. 2.
Welder, Automatic. O. A. Kenyon. 1,571,924; Feb. 2.
Well-drilling apparatus. O. B. Wall. 1,571,309; Feb. 2.
Well point, Drive-. C. F. D. Smith. 1,571,871; Feb. 2.
Wheel: *See*—
Resilient wheel.
Vehicle wheel.
Wheel mill. B. F. Faunce. 1,571,468; Feb. 2.
Wick holder. W. C. Homan. 1,571,668; Feb. 2.
Window-glass channel. E. W. M. Bailey. 1,571,831; Feb. 2.
Window guide. E. W. M. Bailey. 1,571,832; Feb. 2.
Window, Metal. A. Flen. 1,571,327; Feb. 2.
Window opener and closure. J. Toresan. 1,571,819; Feb. 2.
Windows and the like, Protective apparatus for bank. D. Kaufman. 1,571,450; Feb. 2.
Windows, Muntin-bar lock for metal. L. Washburn. 1,571,350; Feb. 2.
Windshield cleaner. F. G. and W. M. Folberth. 1,571,516; Feb. 2.
Windshields, Hinge for. W. Marshall. 1,571,287; Feb. 2.
Wire, Furnace for the heating and unwinding of. A. F. Jacquemin. 1,571,839; Feb. 2.
Wireless transmitting apparatus. N. E. Davis. 1,571,373; Feb. 2.
Work-setting means. B. D. Stevens. 1,571,651; Feb. 2.
Wrench. J. H. Flanigan. 1,571,328; Feb. 2.
Wrench: *See*—
Auto wrench.
Vise wrench.
Wringer: *See*—
Laundry wringer.

CLASSIFICATION OF PATENTS

FEBRUARY 2, 1926.

NOTE.—First number—class, second number—subclass, third number—patent number.

2— 42: 1,571,415
143: 1,571,480
169: 1,571,860
182: 1,571,827
247: 1,571,847
4— 173: 1,571,335
5— 119: 1,571,426
124: 1,571,857
192: 1,571,858
8— 5: 1,571,320
18: 1,571,863
1,571,864
9— 21: 1,571,462
10— 121: 1,571,347
127: 1,571,515
165: 1,571,232
12— 7: 1,571,566
51: 1,571,733
142: 1,571,734
15— 8: 1,571,276
28: 1,571,773
248: 1,571,338
253: 1,571,516
262: 1,571,764
16— 98: 1,571,334
18— 8: 1,571,474
13: 1,571,599
17: 1,571,599
42: 1,571,193
59: 1,571,717
19— 69: 1,571,743
156: 1,571,375
20— 0.5: 1,571,238
20: 1,571,194
22— 10: 1,571,442
13: 1,571,894
123: 1,571,529
164: 1,571,689

Preparation for asthma, hay fever, and catarrh. E. R. Budd. 208,681; Feb. 9; Serial No. 217,006; published Nov. 17, 1925.
Preparation for perfuming softening and disinfecting water, cold cream, rouge, etc. H. Weinstein. 208,666; Feb. 9; Serial No. 184,949; published Nov. 17, 1925.
Preparation for the blood. Hidalgo Medicine Company. 208,823; Feb. 9; Serial No. 221,258; published Nov. 17, 1925.
Preparation for the prevention or removal of scale from boilers. Actinium Development Limited. 208,703; Feb. 9; Serial No. 214,637; published Nov. 17, 1925.
Preparation for the treatment of eczema, etc. J. H. Hall. 208,752; Feb. 9; Serial No. 221,057; published Nov. 17, 1925.
Preparation for the treatment of the scalp, eczema, itch, poison ivy, etc. B. H. B. Laboratories. 208,740; Feb. 9; Serial No. 221,057; published Nov. 17, 1925.
Preparations for the diseases of the digestive organs. Fitchmul Company. 46,226; renewed Sept. 12, 1925.
Remedy for boils. C. B. Knudsen. 208,725; Feb. 9; Serial No. 220,192; published Nov. 17, 1925.
Remedy for certain named diseases. Antikamnia Chemical Company. 47,939; renewed Nov. 28, 1925.
Remedy for the treatment of the diseases of poultry. B. M. Beatty. 208,807; Feb. 9; Serial No. 219,107; published Nov. 17, 1925.
Remedy in liquid form, Pile. Roberts Remedies Company. 208,729; Feb. 9; Serial No. 220,088; published Nov. 24, 1925.
Remedy used in the treatment of rheumatism. S. Caplan. 208,867; Feb. 9; Serial No. 215,133; published Nov. 17, 1925.
Salves. J. C. Ballantyne. 208,780; Feb. 9; Serial No. 217,916; published Nov. 17, 1925.
Shampoos. Hiscox Chemical Works. 208,773; Feb. 9; Serial No. 218,700; published Nov. 24, 1925.
Sirup for disguising quinine, Aromatic. Voigt & Co. 53,263; renewed May 29, 1926.
Soda, Bicarbonate of. Pennsylvania Salt Mfg. Co. 53,936; renewed June 12, 1926.
Specific for neuralgia and rheumatism. Mellier Drug Company. 51,500; renewed Apr. 17, 1926.
Sterilizing solution. E. Schulze. 208,887; Feb. 9; Serial No. 218,337; published Nov. 24, 1925.
Stomachic and carminative. E. Dort. 52,170; renewed May 1, 1926.
Substance for use in the treatment of syphilis. J. W. Stevens. 208,695; Feb. 9; Serial No. 211,722; published Nov. 17, 1925.
Thiosinamine compound for medicinal use, Soluble. E. Merck. 49,160; renewed Jan. 23, 1926.
Toilet preparations and perfumery. Parfumerie Roger & Gallet. 208,602–4; Feb. 9; Serial Nos. 199,084–6; published Nov. 17, 1925.
Tonic cordial. Voigt & Co. 53,213; renewed May 29, 1926.
Treatment for poultry diseases, etc., Liquid and tablet. G. J. Homan. 208,890; Feb. 9; Serial Nos. 216,392; published Nov. 24, 1925.

CLASS 7.

Twine and binder twine. Plymouth Cordage Company. 48,714; renewed Jan. 9, 1926.
Warps, Carpet. James E. Reynolds & Co. 53,358; renewed May 29, 1926.

CLASS 8.

Cigarette paper. J. Fauraut. 208,816; Feb. 9; Serial No. 221,359; published Nov. 17, 1925.
Pipes, cigar and cigarette holders, and hookahs. Reiss-Premier Pipe Co. 208,727; Feb. 9; Serial No. 220,141; published Nov. 10, 1925.
Smoking pipes, cigar holders, and cigarette holders. L. & H. Stern, Inc. 208,736; Feb. 9; Serial No. 221,787; published Nov. 24, 1925.
Tobacco cases or pouches. Smokers Products, Inc. 208,830; Feb. 9; Serial No. 221,140; published Nov. 10, 1925.

CLASS 9.

Gun and pistol cartridges and parts thereof. Union Metallic Cartridge Company. 49,617; renewed Feb. 13, 1926.
Gun and pistol cartridges and parts thereof. Union Metallic Cartridge Company. 49,619; renewed Feb. 13, 1926.
Matches. United States Match Corporation. 208,766; Feb. 9; Serial No. 204,982; published Nov. 17, 1925.

CLASS 10.

Gypsum, Agricultural. Centerville Gypsum Company. 208,866; Feb. 9; Serial No. 220,110; published Nov. 24, 1925.

CLASS 11.

Inks, Writing. Von Rufs Ink Company. 208,919; Feb. 9; Serial No. 209,184; published Nov. 3, 1925.

CLASS 12.

Plaster boards and plaster wall boards. United States Gypsum Company. 208,840; Feb. 9; Serial No. 221,860; published Nov. 24, 1925.

CLASS 13.

Cabinets, Dispensing. Albany Perforated Wrapping Paper Co. 52,287; renewed May 8, 1926.
Car-door hangers, fasteners, and guide brackets, Freight-. Camel Company. 50,896; renewed Apr. 3, 1926.
Car doors, Trimmings for freight. Camel Company. 50,872; renewed Apr. 3, 1926.
Couplings, Belt. Greene, Tweed & Co. 51,556; renewed Apr. 17, 1926.
Metal manufactures. U. T. Hungerford Brass & Copper Co. 52,347; renewed May 8, 1926.
Nails, Wire. Charles F. Baker & Co. 49,583; renewed Feb. 13, 1926.
Valves. Ohio Brass Company. 208,756; Feb. 9; Serial No. 220,793; published Nov. 17, 1925.

CLASS 14.

Castings, Steel. Oklahoma Steel Castings Co. 208,889; Feb. 9; Serial No. 216,472; published Nov. 24, 1925.
Iron sheets and plates. Wheeling Steel Corporation. 208,863; Feb. 9; Serial No. 219,650; published Nov. 24, 1925.
Steel plates, sheets, and bars. Colonial Steel Company. 208,841; Feb. 9; Serial No. 221,694; published Nov. 24, 1925.
Steel sheets and plates. Wheeling Steel Corporation. 208,864; Feb. 9; Serial No. 219,649; published Nov. 24, 1925.
Steel, Tool. Horace T. Potts & Co. 208,936; Feb. 9; Serial No. 221,506; published Nov. 24, 1925.

CLASS 15.

Oils, Lubricating. Valvoline Oil Company. 53,237; renewed May 29, 1926.

CLASS 16.

Carbon black. United Oil & Natural Gas Products Corporation. 208,948; Feb. 9.
Paints, Carbon. Patterson Sargent Co. 51,407; renewed Apr. 17, 1926.
Paints, enamels, stains, and varnishes. Truscon Steel Company. 208,686; Feb. 9; Serial No. 217,429; published Oct. 27, 1925.
Paints, Ready-mixed. Howland & Dewey Company. 208,961; Feb. 9.

CLASS 17.

Cigarettes. Carreras & Marcianus Cigarettes, Limited. 48,240; renewed Dec. 19, 1925.
Cigars. J. Weinreich. 48,673; renewed Jan. 9, 1926.
Cigars and cigarettes. L. Morgenstern. 208,760; Feb. 9; Serial No. 220,665; published Nov. 24, 1925.

CLASS 20.

Linoleums. W. & J. Sloane Manufacturing Company. 208,781; Feb. 9; Serial No. 217,837; published Nov. 17, 1925.

CLASS 21.

Batteries and spark plugs, Storage. Certain-teed Products Corporation. 208,853; Feb. 9; Serial No. 218,469; published Oct. 13, 1925.
Batteries, Storage. P. M. Marko. 208,952; Feb. 9.
Battery eliminators. Cooper Corporation. 208,850; Feb. 9; Serial No. 218,797; published Oct. 20, 1925.
Electric circuits, Variable-resistance units for controlling. Electrad, Inc. 208,923; Feb. 9; Serial No. 206,284; published Nov. 3, 1925.
Electric irons, fans, toasters, percolators, and waffle irons. Newberry Electric Corporation. 208,955; Feb. 9.
Electric-lighting fixtures. Goodrich Electric Company. 208,974; Feb. 9.
Electric systems, Automotive-vehicle. Pierce-Arrow Motor Car Company. 208,904; Feb. 9; Serial No. 179,681; published Oct. 13, 1925.
Electrical fittings, Groundulet Company. 208,846; Feb. 9; Serial No. 219,482; published Oct. 20, 1925.
Electrical relay switches, pouring ladles, and heating apparatus. J. S. Dunn. 208,912; Feb. 9; Serial No. 215,387; published Oct. 13, 1925.
Electrical relay switches, pouring ladles, and heating apparatus. J. S. Dunn. 208,913; Feb. 9; Serial No. 215,003; published Oct. 13, 1925.
Insulated wires. Phillips Insulated Wire Co. 52,626; renewed May 15, 1926.
Insulators, insulator fittings and pins, Electrical. R. Thomas & Sons Co. 208,848; Feb. 9; Serial No. 219,155; published Oct. 20, 1925.
Lamps and switches therefor, Electrical direction signal. P. P. Basterreix. 208,855; Feb. 9; Serial No. 218,444; published Oct. 20, 1925.
Lamps, Mercury-vapor. Cooper Hewitt Electric Company. 208,968; Feb. 9.
Lamps, Sewing-machine. F. E. Becka. 208,962; Feb. 9.
Lighting fixtures, electric desk lamps, etc., Portable electric. H. G. McFaddin & Co. 208,961; Feb. 9; Serial No. 202,069; published Nov. 3, 1925.
Radio apparatus. F. L. Fausch. 208,951; Feb. 9.
Radio apparatus, Loud speakers for. American Bosch Magneto Corporation. 208,844; Feb. 9; Serial No. 219,568; published Oct. 20, 1925.
Radio equipment. Electrad, Inc. 208,922; Feb. 9; Serial No. 206,286; published Oct. 13, 1925.
Radio receiving sets. D. X. Instrument Company. 208,854; Feb. 9; Serial No. 218,454; published Oct. 13, 1925.
Radio receiving sets and parts thereof. People's Outfitting Co. 208,925; Feb. 9; Serial No. 200,639; published Jan. 6, 1925.
Radio receiving sets, loud speakers and units, transformers, etc. Electrical Research Laboratories, Inc. 208,959; Feb. 9.
Rheostats. Monitor Controller Company. 208,957, Feb. 9.
Tubes, Rectifier. American Appliance Co. 208,886, Feb. 9; Serial No. 219,101; published Oct. 20, 1925.
Vacuum tubes, X-ray tubes, and parts thereof. C. H. F. Müller. 48,934; renewed Jan. 16, 1926.
Wire for electrical purposes. S. S. Spring. 208,973; Feb. 9.
Wires for electric connections to mercury-tube switches, Lead. Federal Gauge Co. 208,852; Feb. 9; Serial No. 218,092; published Nov. 10, 1925.

CLASS 22.

Baseball bats. Thos. E. Wilson & Co. 208,808; Feb. 9; Serial No. 219,097; published Nov. 24, 1925.
Dominoes, dice, poker chips, billiard tables, etc., Chinese. Julius Schmid, Inc. 208,768; Feb. 9; Serial No. 206,639; published Nov. 24, 1925.
Fish bait. Hickson-Young Company. 208,705; Feb. 9; Serial No. 214,959; published Nov. 24, 1925.
Golf clubs. E. F. Fraser. 208,732; Feb. 9; Serial No. 219,957; published Nov. 24, 1925.

CLASS 23.

Chains, Driving and mortise. Hans Renold Limited. 208,942; Feb. 9.
Chisels. Warren Tool and Forge Co. 208,748; Feb. 9; Serial No. 221,396; published Nov. 17, 1925.
Files and rasps. G. & H. Barnett Company. 49,472; renewed Feb. 6, 1926.
Files and rasps. Nicholson File Company. 49,666; renewed Feb. 13, 1926.
Fire extinguishers. American-La France Fire Engine Co. 53,839; renewed June 12, 1926.
Guide bars and sprockets and sprocket wheels. Hans Renold Limited. 208,941; Feb. 9.
Keys, Cushion finger. Munson Supply Company. 52,364; renewed May 8, 1926.
Knife sections. Whitman & Barnes Manufacturing Company. 52,876; renewed May 22, 1926.
Letter-duplicating machines. Hever Duplicator Company, Inc. 208,683; Feb. 9; Serial No. 217,152; published Nov. 24, 1925.
Mauls. Warren Tool and Forge Co. 208,749; Feb. 9; Serial No. 221,395; published Nov. 17, 1925.
Needles. Excelsior Needle Company. 53,544; renewed June 5, 1926.
Pliers and wrenches. Gripnstik Company. 208,971; Feb. 9.
Saws. Henry Disston & Sons, Incorporated. 53,678; renewed June 12, 1926.
Saws. Henry Disston & Sons, Incorporated. 53,699–700; renewed June 12, 1926.
Saws. Henry Disston & Sons, Incorporated. 53,702; renewed June 12, 1926.
Saws. Henry Disston & Sons, Incorporated. 53,752; renewed June 12, 1926.
Sewing-machine needles. Excelsior Needle Company. 52,659–60; renewed May 15, 1926.
Sewing machines and parts thereof. Union Special Machine Company. 49,361; renewed Jan. 30, 1926.
Shovels, scoops, and spades. St. Louis Shovel Co. 53,991; renewed June 19, 1926.
Universal joints and parts thereof. Universal Products Co. 208,800; Feb. 9; Serial No. 219,506; published Nov. 24, 1925.

CLASS 24.

Laundry nets. Progressive Weaving Co. 208,950; Feb. 9.
Wringers. American Wringer Company. 52,689; renewed May 15, 1926.
Wringers and the parts composing the same, Clothes. American Wringer Company. 52,406; renewed May 8, 1926.

CLASS 25.

Banks, Portable savings. American Art Works, Incorporated. 208,824; Feb. 9; Serial No. 219,408; published Nov. 24, 1925.

CLASS 26.

Eye-examining instruments. De Zeng Standard Co. 208,905; Feb. 9; Serial No. 173,627; published Nov. 24, 1925.
Gravimetric testing apparatus and parts thereof. G. R. Delamater. 208,932; Feb. 9; Serial No. 221,051; published Nov. 24, 1925.
Picture films, Motion-. Film Booking Offices of America, Inc. 208,927; Feb. 9; Serial No. 220,892; published Nov. 24, 1925.
Pictures, Moving. A. J. Jensen. 208,859; Feb. 9; Serial No. 220,026; published Nov. 24, 1925.

CLASS 27.

Clock cases and watchcases. Bakelite Corporation. 208,910; Feb. 9; Serial No. 216,817; published Nov. 3, 1925.
Clocks, Alarm. A. C. Becken. 49,027; renewed Jan. 23, 1926.
Watches. A. Wittnauer Co. 208,972; Feb. 9.
Watches, watchcases, and watch movements. M. Klass. 208,906–7; Feb. 9; Serial Nos. 218,062–3; published Nov. 3, 1925.
Watches, watch movements, and parts thereof. J. Gottlieb. 208,966–7; Feb. 9.

CLASS 28.

Breastpins, brooches, bracelets, and barrettes. Wachenheimer Bros., Inc. 208,856; Feb. 9; Serial No. 218,440; published Nov. 3, 1925.
Buttons and links, buckles, key rings, etc., Cuff. D. A. Ballou & Co. 208,865; Feb. 9; Serial No. 219,520; published Oct. 13, 1925.

Allen, A. C., et al., trustees. (See Matheson, Andrew A., assignor.)

Allison, James A., et al. (See Gilman, Norman H., assignor.)

Alos Apparatebau, Gesellschaft mit beschrankter Haftung. (See Ley, Christian, assignor.)

Alsatian Machine Works Limited. (See Tunstall, Harry, assignor.)

Alsfasser, Joseph, Chicago, Ill. Lock for damper regulators. 1,571,990; Feb. 9.

Altorfer, Alpheus W., Peoria, assignor to Altorfer Bros. Company, East Peoria, Ill. Driving mechanism for ironing machines. 1,572,633; Feb. 9.

Altorfer Bros. Company. (See Altorfer, Alpheus W., assignor.)

Altwegg, Jean, and E. F. Chermette, Lyon, France, assignors to Societe Chimique des Usines du Rhone, Paris, France. Manufacture of condensation products of compound aliphatic-aromatic ketones with polyalcohols. 1,572,176; Feb. 9.

Aluminum Company of America. (See Archer, R. S., and Edwards, assignors.)

Aluminum Company of America. (See Frary, Francis C., assignor.)

Aluminum Company of America. (See Jeffries, Z., and Archer, assignors.)

Aluminum Company of America. (See Johnston, R. L., Archer, and Jeffries assignors.)

Aluminum Company of America. (See Pacz, Aladar, assignor.)

Aluminum Company of America. (See Tilson, Donald H., assignor.)

Aluminum Die-Casting Corporation. (See Johnston, Roderick L., assignor.)

Aluminum Manufacturers, Incorporated. (See Crosby, Ernest R., assignor.)

American Can Company. (See Butler, William F., assignor.)

American Chicle Company. (See Van Buren, John, assignor.)

American Copperas Company. (See Marsh, H. S., and Cochran, assignors.)

American Electrical Heater Company. (See Kuhn, F., and Hand, assignors.)

American Flatlike Company, The. (See Balsillie, John G., assignor.)

American Lakes Paper Company. (See Weber, Herman G., assignor.)

American Laundry Machinery Company, The. (See Carroll, Emil J., assignor.)

American Moistening Company. (See Jackson, John W., assignor.)

American National Company, The. (See Bingham, Jeremiah, assignor.)

American Rolling Mill Company, The. (See Tytus, John B., assignor.)

American Sheet and Tin Plate Company. (See Porter, R., and Whetzel, assignors.)

American Telephone and Telegraph Company. (See Affel, Herman A., assignor.)

American Telephone and Telegraph Company. (See Bailey, Rand S., assignor.)

American Telephone and Telegraph Company. (See Fay, Frank H., assignor.)

American Telephone and Telegraph Company. (See Fox, Francis H., assignor.)

American Telephone and Telegraph Company. (See Herman, Joseph, assignor.)

American Wiremold Company. (See Frederickson, Otto A., assignor.)

Anderson, Adolph L., Zumbrota, Minn. Silo construction 1,572,589; Feb. 9.

Anderson, Paul. (See Godwin, A. L., and Anderson.)

Anderson, Robert J., Sidney, Ohio. Clothes wringer. 1,572,758; Feb. 9.

Anderson, Robert J., Sidney, Ohio. Clothes wringer. 1,572,759; Feb. 9.

Andrews, Fred, Detroit, Mich. Device for placing belts on pulleys. 1,572,830; Feb. 9.

Animal Trap Company of America. (See O'Neil, Jeremiah, assignor.)

Annabel, Charles C. (See Letts, Ellsworth M., assignor.)

Appleton, Joseph H., Port Washington, assignor to Leach Company, Oshkosh, Wis. Machine for making links or similar articles. 1,572,175; Feb. 9.

Archer, Robert S. (See Jeffries, Z., and Archer.)

Archer, Robert S. (See Johnston, R. L., Archer, and Jeffries.)

Archer, Robert S., East Cleveland, Ohio, and J. D. Edwards, Pittsburgh, Pa., assignors to Aluminum Company of America, Pittsburgh, Pa. Making castings of aluminum-silicon alloys. 1,572,459; Feb. 9.

Arnau, Ramón R., San Juan, P. R. Optical device. 1,572,760; Feb. 9.

Ash, Marsellus T., Chicago, Ill. Object-dispensing machine. 1,572,263; Feb. 9.

Atkinson, Frederick C., Indianapolis, Ind., assignor to John W. Garland, Inc., Pittsburgh, Pa. Destructive distillation. 1,572,510; Feb. 9.

Automatic Electric Inc. (See Ray, Arthur J., assignor.)

Axelman, Harry W. (See Axelman, Mayer and H. W.)

Axelman, Mayer and H. W., Chicago, Ill. Reenforced suitcase. 1,572,868; Feb. 9.

Ayres, Elwood B., Melrose Park, assignor to Proctor and Schwartz, Incorporated, Philadelphia, Pa. Carrying frame for leather driers. 1,572,831; Feb. 9.

Ayres, Elwood B., Melrose Park, and A. O. Hurxthal, Philadelphia, Pa., assignors to Proctor and Schwartz, Incorporated, Philadelphia, Pa. Locking device for drying frames. 1,572,832; Feb. 9.

Babka, Joseph J., Berwyn, Ill. Mixing machine. 1,571,926; Feb. 9.

Bachmeyer, Engelbert W., Hawley, Pa. Supertransposing piano. 1,572,841; Feb. 9.

Badische Anilin- & Soda-Fabrik. (See Günther, F., and Lange, assignors.)

Badische Anilin- & Soda-Fabrik. (See Wietzel, Rudolf, assignor.)

Bailey, Rand S., Montclair, N. J., assignor to American Telephone and Telegraph Company. Telephone ringing system. 1,571,991; Feb. 9.

Baker, Benjamin F., St. Stephen, New Brunswick, Canada. Separable cuff button. 1,572,511; Feb. 9.

Baker, George Pershing, assignor of one-third to L. McCrory and one-third to R. J. Jones, jr., Pawhuska, Okla. Burner construction. 1,572,833; Feb. 9.

Baker-Perkins Company. (See Polnton, John E., assignor.)

Baldridge, Albert G., and L. D. Roberts; said L. D. Roberts assignor to J. A. Hornbeak and P. M. Hornbeak, Fulton, Ky. Dancing toy. 1,572,124; Feb. 9.

Baldwin Locomotive Works, The. (See Dougherty, Richard, assignor.)

Balsillie, John G., Melbourne, Victoria, Australia, assignor, by mesne assignments, to The American Flatlite Company, Cincinnati, Ohio. Light projectors. 1,572,853; Feb. 9.

Banschbach, Edward A., Chicago, Ill. Automobile fender and guard. 1,572,460; Feb. 9.

Barrett, Urbane L. (See Efford, G. A., and Erickson, assignors.)
Bartlemay, Arlie, assignor to The Red Cross Manufacturing Co., Bluffton, Ind. Power transmission mechanism. 1,572,264; Feb. 9.
Bate, Thomas C., et al. (See Jackson, Maunsell B., assignor.)
Bates, William P., Kempton, N. Dak. Dyestuffs and process of making same. 1,572,417; Feb. 9.
Baughman, Harold E., Waterloo, Iowa. Brake for airplanes. 1,572,834; Feb. 9.
Bayles, Lewis C., Easton, Pa., assignor to Ingersoll-Rand Company, Jersey City, N. J. Throttle valve. 1,571,992; Feb. 9.
Bayles, Lewis C., Easton, Pa., assignor to Ingersoll-Rand Company, Jersey City, N. J. Valve for rock drills. 1,571,993; Feb. 9.
Beacon Manufacturing Company. (See Kerwin, William J., jr., assignor.)
Beamer, Minnie J., Flint, Mich. Skirt-measuring device. 1,572,835; Feb. 9.
Beausejour, Reme A., Port Richmond, assignor to Standard Varnish Works, New York, N. Y. Application of cellulose-ester lacquers. 1,572,461; Feb. 9.
Bechtelheimer, Harry A., Rock Island, Ill., assignor, by mesne assignments, to Moline Implement Company. Power farming apparatus. 1,572,462; Feb. 2.
Beck, Joseph, Two Harbors, Minn. Hook. 1,572,347; Feb. 9.
Becker, Leo G. (See Florence, Albert F., assignor.)
Beckwith, Raymond A., assignor to Koehring Company, Milwaukee, Wis. Cable drive for shovels. 1,572,177; Feb. 9.
Bender, Frederick C., Hempstead, N. Y. Musical instrument. 1,572,418; Feb. 9.
Bendix Brake Company. (See Price, Jacob L., assignor.)
Beneke Manufacturing Company. (See Rayfield, Charles L., assignor.)
Benjamin Electric Manufacturing Company. (See McClatchie, Stanley, assignor.)
Benner, Raymond C., Bayside, assignor to The Prest-O-Lite Company, Inc., New York, N. Y. Composition for storage-battery positive electrodes and making same. 1,572,512; Feb. 9.
Bennett, Morris H., assignor to Scovill Manufacturing Company, Waterbury, Conn. Electric furnace. 1,572,634; Feb. 9.
Benton & Stone Limited. (See Milner, Charles E., assignor.)
Bermond, Lester W., St. Paul, Minn., assignor to Swift & Company, Chicago, Ill. Bacon hanger. 1,572,178. Feb. 9.
Berry, Harold R., Brooklyn, N. Y. Constructive conversion of hydrocarbons. 1,571,994; Feb. 9.
Berry, Herbert H., London, England. Electric fire. 1,572,836; Feb. 9.
Besta, Adalbert, Duisburg, Germany. Apparatus for carbonizing bituminous fuels. 1,571,927; Feb. 9.
Betts, Edward D. (See Betts, Helen and E. D.)
Betts, Helen and E. D., Passaic, N. J. Dispensing device. 1,572,837; Feb. 9.
Bielfeldt, Henry. (See Whiteside, Robert E., assignor.)
Binder, Louis, Newark, N. J. Cardboard box. 1,572,125; Feb. 9.
Bingham, Jeremiah, assignor to The American National Company, Toledo, Ohio. Sheet-metal-working machine. 1,572,376; Feb. 9.
Bintz, Wesley, Lansing, Mich. Bathing pool. 1,572,463; Feb. 9.
Birchall, William, Ashbourne, Pa. Centrifugal separator. 1,572,419; Feb. 9.
Birchall, William, Ashbourne, Pa. Centrifugal separator. 1,572,420; Feb. 9.
Birckner, Victor. (See Paine, H. S., Walton, and Birckner.)
Bird, James B., Vancouver, Wash. Liquid-fuel burner. 1,572,838; Feb. 9.
Birbetter Manufacturing Company. (See Croxford, John S., assignor.)
Bjorklund, Charles, St. Paul, Minn. Intake-connecting bolt. 1,572,464; Feb. 9.
Black, John C., Destrehan, La., and J. W. Weir, Fillmore, Calif. Manufacturing lubricating oils. 1,572,465; Feb. 9.
Black, Paul W., San Francisco, Calif. Device for dispensing and moistening gummed tape. 1,572,063; Feb. 9.
Blades, Leroy R., Chicago, Ill., assignor to F. J. Gandy. Auxiliary intake air valve. 1,572,842; Feb. 9.
Blair, Frank M., Newark, Ohio. Enamel metal shingle. 1,572,377; Feb. 9.
Blair, George W., Wabash, Ind. Baked-enamel remover. 1,572,839; Feb. 9.
Blaisdell, Carroll H., Providence, R. I. Paper cutter. Des. 69,380; Feb. 9.
Blakesley, George R., Edgerton, Wis. Electric water heater. 1,572,466; Feb. 9.
Blecksmith, Charles E., Los Angeles, Calif. Rethregding tool. 1,572,064; Feb. 9.
Blodgett, Fred H., Wakefield, Mass. Pruning device. 1,572,100; Feb. 9.
Blue Bird Products Company, The. (See Smith, Clarence S., assignor.)
Bocklisch, Heinrich, deceased, Poughkeepsie, N. Y., by G. W. Gittins, administrator, assignor to Welte-Mignon Corporation, New York, N. Y. Automatic musical instrument. 1,572,857; Feb. 9.
Boehmer, Norris, Montclair, N. J., assignor to Chadeloid Chemical Company. Resinous composition containing chlorinated rubber. 1,572,065; Feb. 9.
Bohan, William J., St. Paul, Minn. Method and apparatus for washing locomotive boilers. 1,571,928; Feb. 9.
Bohn & Herber Maschinenfabrik und Eisengiesserei. (See Finkhaus, Oskar, assignor.)
Boman, Frank W., Moro, Ark. Convertible plow frame. 1,571,995; Feb. 9.
Booker, Russell E., Windber, Pa. Mining machine. 1,572,066; Feb. 9.
Booker, Russell E., Windber, Pa. Mine drill. 1,572,067; Feb. 9.
Bostwick, Grant W. (See Bostwick, Robert W. and G. W.)
Bostwick, Robert W., Detroit, Mich. Window-regulator lock. 1,572,635; Feb. 9.
Bostwick, Robert W. and G. W., Detroit, Mich. Window regulator. 1,572,265; Feb. 9.
Bothner, Emil, Floral Park, N. Y. Electromagnetic compressor. 1,572,126; Feb. 9.
Bourcet, Paul. (See Chevalier, J. M. A., Bourcet, and Regnault.)
Bonrue-Fuller Company. (See Chapin, Fred H., assignor.)
Boye Needle Company, The. (See Flannery, John L., assignor.)
Bowles, Wallace, Meadow Creek, W. Va., assignor, by direct and mesne assignments, of four-twentieths to J. I. Scott, Meadow Creek, W. Va., and one-twentieth to J. E. Decker, Sacoma, W. Va. Automobile wheel rim. 1,572,101; Feb. 9.
Bowman, John J. (See Fulton, H. R., and Bowman.)
Brach, L. S., Manufacturing Co. (See Brach, Leon S., assignor.)
Brach, Leon S., East Orange, assignor to L. S. Brach Manufacturing Co., Newark, N. J. Insulator. Des. 69,381; Feb. 9.
Braddock, Leo I., New Smyrna, Fla. Capping for stucco walls. 1,571,996; Feb. 9.
Bradley, Linn, Montclair, N. J., and E. P. McKeefe, Plattsburg, N. Y. Production of pulp. 1,572,840; Feb. 9.
Branch, Charles J., Philadelphia, Pa. Adjustable pipe hanger. 1,572,636; Feb. 9.
Branchen, Leonard E., assignor to Eastman Kodak Company, Rochester, N. Y. Reducing the viscosity characteristics of nitrocellulose. 1,572,266; Feb. 9.
Brandwood, Joseph, Newton, Mass. Apparatus for the continuous treatment of textile fibers in skein form. 1,572,637; Feb. 9.
Brazeau, Albert. (See Goulet, Joseph, assignor.)
Braunsdorf, William, New York, N. Y. Mop-cleaning device. 1,572,102; Feb. 9.
Bray, Thomas J., jr., Youngstown, Ohio. Steel manufacture. 1,572,179; Feb. 9.
Breen, Edward T., New Haven, Conn. Chair seat. 1,572,378; Feb. 9.
Bréguet, Louis and P., Geneva, Switzerland. Apparatus to control the number of turns of the drawing shaft in drawing benches. 1,572,761; Feb. 9.
Bréguet, Paul. (See Bréguet, Louis and P.)
Brehm, Frederick W., and G. W. Adams, assignors to Eastman Kodak Company, Rochester, N. Y. Camera handle and latch. 1,572,267; Feb. 9.
Breslauer, Joseph, and C. Goudet, assignors to Société d'Etudes Chimiques pour l'Industrie, Geneva, Switzerland. Manufacture of salts of urea. 1,572,638; Feb. 9.
Brewer, John W., assignor of one-half to M. A. Ward, Magna, Utah. Rail-supporting device. 1,572,127; Feb. 9.
Briggs, D. F., Company. (See Slaiger, Henry, assignor.)
Brighton Mills. (See Pearson, W. H., and Kelly, assignors.)
Broadmeyer, Albert, assignor to W. O. Hickok Manufacturing Company, Harrisburg, Pa. Ruling apparatus 1,572,421; Feb. 9.
Bronander, Wilhelm B., Montclair, N. J. Die holder. 1,571, 929; Feb. 9.
Brown, Allen W. (See Finley, T. M., and Brown.)
Brown, Annie M., St. Louis, Mo. Razor-blade cutting and scraping tool. 1,572,702; Feb. 9.
Brown Company. (See Parker, Howard, assignor.)
Browne, L. Richmond, et al. (See Lowry, George A., assignor.)
Brunner, Albert H., Carbondale, Ill. Grease-dispensing device. 1,572,762; Feb. 9.
Brunswick-Balke-Collender Company, The. (See Nystrom, Martin, assignor.)
Bryant Electric Company, The. (See Engstrom, Henry O., assignor.)
Bryce Brothers Company. (See Bryce, Gerard S., assignor.)
Bryce, Gerard S., assignor to Bryce Brothers Company, Mount Pleasant, Pa. Goblet or similar article. Des. 69,382; Feb. 9.
Bryce, Gerard S., assignor to Bryce Brothers Company, Mount Pleasant, Pa. Tumbler or similar article. Des. 69,383; Feb. 9.

Buchanan, Robert B., Hamilton, Ontario, Canada. Doffing apparatus for spinning frames. 1,572,103; Feb. 9.
Buchler, C. A. (See Dufrene, Sylvester, assignor.)
Buckley, Thomas F., Scranton, Pa. Spring-forming machine. 1,572,639; Feb. 9.
Bucyrus Company. (See Fyke, Mitchell L., assignor.)
Budd, Selden J., Manhasset, assignor of one-half to C. W. Smith, Great Neck, N. Y. Fishing reel. 1,572,104; Feb. 9.
Burgess, Louis G., and H. Thompson, Detroit, Mich. Refrigerating apparatus. 1,572,467; Feb. 9.
Burke, Paul, assignor to Northwest Engineering Company, Green Bay, Wis. Clutch-operating means. 1,572,225; Feb. 9.
Burke, Paul, assignor to Northwest Engineering Company, Green Bay, Wis. Clutch-operating mechanism. 1,572,226; Feb. 9.
Burke, Paul, assignor to Northwest Engineering Company, Green Bay, Wis. Clutch mechanism. 1,572,227; Feb. 9.
Burke, Paul, assignor to Northwest Engineering Company, Green Bay, Wis. Fairlead for dragline excavators. 1,572,228; Feb. 9.
Burke, Paul, assignor to Northwest Engineering Company, Green Bay, Wis. Power system. 1,572,229; Feb. 9.
Burke, Paul, assignor to Northwest Engineering Company, Green Bay, Wis. Servo mechanism. 1,572,230; Feb. 9.
Burson Knitting Company. (See Ziock, Edward J., assignor.)
Busch-Sulzer Bros.-Diesel Engine Company. (See Rotter, Max, assignor.)
Bush, A. G. (See Wallis, Henry E., assignor.)
Bush, Bert D. (See Conover, W. E., and Bush.)
Butler, Charles R. (See Trout, W. A., and Butler.)
Butler, William F., Hillside, N. J., assignor to American Can Company, New York, N. Y. Automatic sheet-feeding device. 1,572,640; Feb. 9.
Buvinger, George A., C. Warner, and J. A. Smith, assignors to Delco-Light Company, Dayton, Ohio. Pumping apparatus. 1,572,231; Feb. 9.
Buzby, Walter E., Wichita Falls, Tex. Take-down sling. 1,571,997; Feb. 9.
Buzza, George E., Minneapolis, Minn. Parchment motto and greeting card and making the same. 1,572,180; Feb. 9.
Byrd, Britton E., assignor to Mill Devices Company, Durham, N. C. Knotter device. 1,572,181; Feb. 9.
Byrd, Britton E., assignor to Mill Devices Company, Durham, N. C. Knotter device. 1,572,182; Feb. 9.
Byrne, Edmund J., London, England. Golf-ball tee. 1,572,105; Feb. 9.
C. G. Spring & Bumper Company, The. (See Dunston, Wayne E., assignor.)
Cahn, Bernard, Sacramento, Calif. Dress and suit folder. 1,572,703; Feb. 9.
California Cap Company. (See Oliver, Albert L., assignor.)
Calisen, Jürgen, Elberfeld, Germany, assignor to Winthrop Chemical Company, Inc., New York, N. Y. Pharmaceutical product. 1,572,768; Feb. 9.
Cambridge Glass Company, The. (See McCartney, Will C., assignor.)
Cameron, Daniel R., Vancouver, British Columbia, Canada. Grain-door latch. 1,572,590; Feb. 9.
Cannon, John W., Providence, R. I. Apparatus for burning liquid fuel. 1,572,591; Feb. 9.
Carlson, Hjalmar G., assignor to Rockwood Sprinkler Company of Massachusetts, Worcester, Mass. Filter. 1,572,379; Feb. 9.
Carow, John J., Washington, D. C. Method of ornamentation. 1,572,348; Feb. 9.
Carpenter, Charles E., New York, N. Y. Paper feed. 1,572,704; Feb. 9.
Carr, Harry L. (See Simons, P. W. Purnell, and Carr.)
Carr, Mattie, Chicago, Ill. Safety device. 1,572,763; Feb. 9.
Carr, Uriel A., Warren, Ohio. Window scaffold or seat. 1,572,592; Feb. 9.
Carroll, Emil J., Norwood, assignor to The American Laundry Machinery Company, Cincinnati, Ohio. Drying machine. 1,572,183; Feb. 9.
Carroll, Stewart J., assignor to Eastman Kodak Company, Rochester, N. Y. Cellulose-acetate film composition. 1,572,232; Feb. 9.
Carter, Carnie B., and A. E. Coxe, Pittsburgh, Pa., assignors to S. Karpen & Bros., Chicago, Ill. Producing chlor-derivatives of methane. 1,572,513; Feb. 9.
Casey, Stephen M., San Francisco, Calif. Door. 1,572,184; Feb. 9.
Casey, Thomas F., Washington, D. C. Can machine. 1,572,514; Feb. 9.
Cass, Christopher P., Berkeley, Calif., assignor to The Westinghouse Air Brake Company, Wilmerding, Pa. Automatic drain valve. 1,527,185; Feb. 9.
Ceasar, Paul, Brooklyn, N. Y. Steaming device for yarns. 1,571,930; Feb. 9.
Chadeloid Chemical Company. (See Boehmer, Norris, assignor.)
Chamberlin, Benjamin D., assignor to Eastman Kodak Company, Rochester, N. Y. Resilient-type-disk numbering stamp for photographic-printing machines. 1,572,233; Feb. 9.
Chamberlain, John J., assignor to The United States Stoneware Company, Akron, Ohio. Press. 1,572,843; Feb. 9.
Chamberlin, John R., Bronxville, N. Y. Rotary-core drill bit. 1,572,349; Feb. 9.
Chandler, Daniel L., Boston, Mass., assignor, by mesne assignments, to Vend Ads Corp. Vending machine. 1,572,422; Feb. 9.
Chapin, Fred H., assignor to The Bourne-Fuller Company, Cleveland, Ohio. Molding shrink-head casings. 1,572,705; Feb. 9.
Chapin, Fred H., assignor to The Bourne-Fuller Company, Cleveland, Ohio. Mold for making shrink-head castings. 1,572,706; Feb. 9.
Chapman, Harry, Sheffield, England. Means for observing the working conditions in the cylinder of an internal-combustion engine. 1,572,423; Feb. 9.
Chattin, John E., Dahlonega, Ga. Egg beater. 1,572,764; Feb. 9.
Chermette, Edouard F. (See Altwegg, J., and Chermette.)
Chestnut, John H., jr., Tarentum, Pa. Safety mechanism for railway tracks. 1,572,765; Feb. 9.
Chevalier, Joseph M. A., P. Bourcet, and H. Regnault, Paris, France. Distillation of natural resins and oleoresins. 1,572,766; Feb. 9.
Chicago Pneumatic Tool Company. (See Smith, William A., assignor.)
Christensen, Niels C., Salt Lake City, Utah. Treating mixed lead-zinc sulphide ores. 1,572,268; Feb. 9.
Christianson, Andrew, Butler, Pa. Side bearing for car trucks. 1,572,128; Feb. 9.
Christie, Charles H. (See Trontman, F. E., and Christie.)
Chudoba, Frank F., Glastonbury, Conn., assignor, by mesne assignments, to United States Hat Machinery Corporation, Richmond, Va. Felt shrinking. 1,572,424; Feb. 9.
Church, Walter L., West Columbia, Tex. Collapsible drill bit. 1,571,931; Feb. 9.
Ciccolanni, Joseph, Smock, Pa. Aeroplane. 1,572,767; Feb. 9.
Citizens of the United States of America. (See Paine, H. S., Walton, and Birckner.)
Clark, Edgar H., Richmond Hill, N. Y., assignor to Western Electric Company, Incorporated, New York, N. Y. Telephone switch. 1,572,380; Feb. 9.
Clark, James B., Midwest, Wyo. Oil-well sand cleaner. 1,572,769; Feb. 9.
Clause, Robert L., Sewickley, Pa., assignor to Pittsburgh Plate Glass Company. Apparatus for making sheet glass. 1,572,468; Feb. 9.
Clauson, William, Boston, Mass. Spring mounting. 1,572,106; Feb. 9.
Clawson, Monroe S., Upper Montclair, N. J. Roughening grinding wheels. 1,572,515; Feb. 9.
Clayton, George S. (See McEwing, L. B., and Clayton.)
Coan, Sherwin M., Allston, Mass. Spring wheel. 1,572,129; Feb. 9.
Cochran, Ralf S. (See Marsh, H. S., and Cochran.)
Cockburn, Francis B., assignor to The Lodge & Shipley Machine Tool Company, Cincinnati, Ohio. Apron disk transmission mechanism. 1,572,107; Feb. 9.
Coleman, Effie S., Birmingham, Ala. Corset confiner. 1,571,998; Feb. 9.
Colley, George F., assignor of one-half to J. Q. Roberts, Memphis, Tenn. Bolt lock. 1,572,770; Feb. 9.
Collins, Samuel W. (See Evans, S. R., and Collins.)
Colomb, Henri, Tavannes, Switzerland. Winding-up and hand-setting mechanism in watches. 1,572,516; Feb. 9.
Combs, Albert B. (See Smith, E. G., and Combs.)
Conlon, Thomas A. (See Joyce, Bryan P. assignor.)
Connecticut Telephone & Electric Company, The. (See Johnson, J. E., and Spellman, assignors.)
Connelly, Clyde A., Shelby, Ohio. Towrope. 1,572,771; Feb. 9.
Conover, William E., and B. D. Bush, assignors to Utica Duxbak Corporation, Utica, N. Y. Sportsman's hunting coat. 1,572,517; Feb. 9.
Continental Scale Works. (See Weber Mathias J., assignor.)
Cook, George, Detroit, Mich. Neutral-position detector for automobile pedals. 1,572,186; Feb. 9.
Cook, George E. (See Nelson, H. P., and Davies, assignors.)
Cooper, James F., assignor to The Goodyear Tire & Rubber Company, Akron, Ohio. Balloon. 1,572,187; Feb. 9.
Corby, Robert L., Chevy Chase, Md., and R. Glasgow, Pittsburgh, Pa., assignors, by mesne assignments, to The Fleischmann Company. Preparing yeast-nutrient solutions and of manufacturing yeast therefrom. 1,571,932; Feb. 9.
Cornelius, Wesley F., Whittier, Calif. Sucker-rod elevator. 1,572,234; Feb. 9.
Corning Glass Works. (See Taylor, William C., assignor.)
Cowles, Irving, Chicago Ill. Auxiliary charge-forming device for automobiles. 1,572,381; Feb. 9.
Cox, Millard F., Louisville, Ky. Grease cup. 1,572,772; Feb. 9.
Coxe, Albert E. (See Carter, C. B., and Coxe.)

Cramer, Stanley S., assignor to Motora Holding Company, Camden, N. J. Pneumatic power generator. 1,572,269; Feb. 9.
Cranford Frederick L. (See Meem, James C., assignor.)
Criswell, William T. (See Fleming, August L. N., assignor.)
Croce, Albert, Memphis, Tenn. Safety catch. 1,572,518; Feb. 9.
Crosby, Ernest R., assignor to Aluminum Manufacturers, Incorporated, Cleveland, Ohio. Metallic alloy. 1,572,382; Feb. 9.
Crossley, Alfred, Washington, D. C. Piezo-electric crystal apparatus. 1 572,773; Feb. 9.
Crowell, Melvin E., Franklin, Ind. Brick or block paving machine. 1,572,188; Feb. 9.
Crowley, Daniel J., Detroit, Mich. Vending machine. 1,572,189; Feb. 9.
Croxford, John S., assignor to Bitbetter Manufacturing Company, Winthrop, Mass. Clutch pedal. 1,572,774; Feb. 9.
Cunningham, James E., assignor of one-half to C. F. McCoy, McKeesport, Pa. Fountain comb. 1,571,933; Feb. 9.
D. & T. Manufacturing Company. (See Dougherty, John M., assignor.)
Dart, James, Chicago, Ill. Door. 1,572,641; Feb. 9.
Dautrick Company, The. (See Dautrick, Owen L., assignor.)
Dautrick, Owen L., assignor to The Dautrick Company, Detroit, Mich. Vertically-slidable inwardly-swinging window. 1,572,775; Feb. 9.
Davenport Manufacturing Co. (See Hansen, John, assignor.)
David, Emanuel. (See Sanderson, Howard, assignor.)
Davies, George. (See Nelson, H. P., and Davies.)
Davis, Francis W., Waltham, Mass. Vibration-absorbing means for steering gears for motor vehicles. 1,572,519; Feb. 9.
Davis, Lemuel M., London, England. Toothbrush. 1,571,999; Feb. 9.
Davis, Lewis F., Santa Ana, Calif. Sucker-rod elevator. 1,572,235; Feb. 9.
Dawe, Charles N. (See Woodside, W. P., and Dawe.)
Day, Dorothy W., Chicago, Ill. Radiator casing. Des. 69,384; Feb. 9.
De Bats, Jean H. L., East Orange, assignor to De Bats Metals Company, Bloomfield, N. J. Alloy. 1,572,593; Feb. 9.
De Bats Metal Company. (See De Bats, Jean H. L., assignor.)
Decarie, Felix O., Sacramento, Calif. Power-operated door. 1,572,108; Feb. 9.
Decker, James E., et al. (See Bowles, Wallace, assignor.)
De Coursey, William B. (See Smith, Lawrence F., assignor.)
De Laval Separator Company, The. (See Hall, S. H., and Hapgood, assignors.)
Delco-Light Company. (See Buvinger, G. A., Warner, and Smith, assignors.)
Delco-Light Company. (See Starr, Frank F., assignor.)
De Lin, Martin, assignor to Holland Furnace Company, Holland, Mich. Liquid-flow-regulating valve. 1,572,469; Feb. 9.
Dennys, Frederick O. B., Lexham Gardens, London, England. Ball carrier. 1,572,383; Feb. 9.
De Nome, Frank, Philadelphia, Pa. Glass-rim stretcher. 1,572,776; Feb. 9.
Deroche, Alexander P., et al. (See Jackson, Maunsell B., assignor.)
Dettelbach, Samuel E. (See Jaworowski, Joseph F., assignor.)
Deubel, Joseph, Clifton, N. J. Rotary engine. 1,572,000; Feb. 9.
Diehl, Christian A., Camden, N. J. Oil burner. 1,572,470; Feb. 9.
Dodge Brothers Inc. (See Goddard, George E., assignor.)
Dodge Brothers Inc. (See Huff, Russell, assignor.)
Doherty Research Company. (See Griswold, Robert G., assignor.)
Dolan & Bullock. (See Nyberg, John G., assignor.)
Don, William, assignor to F. J. Malthaner, New Brunswick, N. J. Fruit preserver. 1,572,196; Feb. 9.
Donnelly, John R., Austin, Tex. Budding tool. 1,572,191; Feb. 9.
Doolittle, Harold L., Los Angeles, Calif. Penstock structure. 1,572,471; Feb. 9.
Doren, Henry E., Edmonds, Wash. Dredge. 1,572,472; Feb. 9.
Dorman, Henry J., Bald Knob, Ark. Harrow. 1,572,777; Feb. 9.
Dorrance, Charles J. (See Richard, Mark R., assignor.)
Dotzert, Jacob, Detroit, Mich., assignor to Wright Manufacturing Company, Lisbon, Ohio. Chain hoist. 1,572,001; Feb. 9.
Dougherty, John M., assignor to D. & T. Manufacturing Company, St. Louis, Mo. Heating system. 1,572,844; Feb. 9.
Dougherty, Richard, assignor to The Baldwin Locomotive Works, Philadelphia, Pa. Oil burner. 1,572,778; Feb. 9.
Dremel, Albert J., Racine, Wis., assignor to The Maytag Company, Newton, Iowa. Wringer mechanism. 1,572,002; Feb. 9.
Dresser, Frank G., Providence, R. I. Dental floss reel. 1,572,707; Feb. 9.
Dubilier Condenser & Radio Corporation. (See Horton, Charles, assignor.)
Duckham, Arthur M., assignor to Thermal Industrial and Chemical (T. I. C.) Research Company Limited, London, England. Apparatus for heat treatment by means of a bath of molten metal. 1,572,779; Feb. 9.
Dufrene, Sylvester, Lockport, assignor of one-half to C. A. Buchler, Westwego, La. Game trap. 1,572,384; Feb. 9.
Dumont, Joseph R., assignor to M. F. Dumon, Kansas City, Mo. Lock. 1,572,109; Feb. 9.
Dumont, Maude F. (See Dumont, Joseph R., assignor.)
Duncan, Arthur L., Oakland, Calif. Apparatus for pitting or coring fruit. Re16,259; Feb. 9.
Dunston, Wayne E., assignor to The C. G. Spring & Bumper Company, Detroit, Mich. Bumper attaching and supporting means. 1,572,594–5; Feb. 9.
Dunston, Wayne E., assignor to The C. G. Spring & Bumper Company, Detroit, Mich. Bumper-supporting means. 1,572,596; Feb. 9.
Dunston, Wayne E., assignor to The C. G. Spring & Bumper Company, Detroit, Mich. Bumper-attaching and supporting means. 1,572,597; Feb. 9.
Duvall, James, Camas, Wash. Shearing device for envelope-making machine and the like. 1,572,110; Feb. 9.
Dwyer, Daniel I., assignor of one-half to E. A. Smith, Dayton, Ohio. Toy airplane. 1,572,270; Feb. 9.
Eastman Kodak Company. (See Branchon, Leonard E., assignor.)
Eastman Kodak Company. (See Brehm, F. W., and Adams, assignors.)
Eastman Kodak Company. (See Carroll, Stewart J., assignor.)
Eastman Kodak Company. (See Chamberlin, Benjamin D., assignor.)
Eastman Kodak Company. (See Frederick, Charles W., assignor.)
Eastman Kodak Company. (See Jones, John G., assignor.)
Eastman Kodak Company. (See Riddell, William A., assignor.)
Eastman Kodak Company. (See Sheppard, S. E., and Eberlin, assignors.)
Eastman Kodak Company. (See Tessler, Julien, assignor.)
Eaton, John, Schenectady, N. Y., assignor to General Electric Company. Electromagnetically-controlled device. 1,572,708; Feb. 9.
Eberlin, Leon W. (See Sheppard, S. E., and Eberlin.)
Ecker, Fred C., Topeka, Kans. Repeating gun for shooting elastic bands. 1,572,350; Feb. 9.
Edwards, Bernhard, Sanford, Fla. Side closure for motor vehicles. 1,572,271; Feb. 9.
Edwards, Junius D. (See Archer, R. S., and Edwards.)
Efford, Grace A., and N. S. Erickson, Chicago, Ill., assignors, by mesne assignments, to U. L. Barrett, Mason City, Iowa. Curtain support. 1,572,845; Feb. 9.
Egloff, Frank S., Riverside, Ill. Oil burner. 1,572,598; Feb. 9.
Einsler, Otto, assignor to Farbenfabriken vorm. Friedr. Bayer and Co., Leverkusen, near Cologne-on-the-Rhine, Germany. Automatic means for letting off steam from a container having in it a boiling liquid. 1,572,272; Feb. 9.
Eischen, Charles J., Los Angeles, Calif. Board joiner. 1,572,780; Feb. 9.
Elder, Samuel, Washington, D. C., assignor to Michle Printing Press & Manufacturing Company, Chicago, Ill. Roll control. 1,571,934; Feb. 9.
Electrical Engineers Equipment Company. (See Jacobs, Ernest H., assignor.)
Electro Dynamic Company. (See Heitman, E., and Treaudeau, assignors.)
Elias, Justin A., Philadelphia, Pa. Paper fastener. 1,572,192; Feb. 9.
Elias, Owen A., London, England. Preparation of aerated beverages. 1,572,111; Feb. 9.
Ellis, Harry R. (See Fessenden, L. P., and Ellis.)
Ellsworth, Benjamin F., Brooklyn, N. Y. Finger guide for typewriters. 1,572,385; Feb. 9.
Elsas, Louis J., Atlanta, Ga. Automatic feeding apparatus for sewing machines. 1,572,351; Feb. 9.
Elton, Nina M., Los Angeles, Calif. Baby crawler. 1,572,273; Feb. 9.
Engel, Frederick S., New York, N. Y. Testing muscular development. 1,572,193; Feb. 9.
Engstrom, Henry O., assignor to The Bryant Electric Company, Bridgeport, Conn. Switch handle. 1,572,130; Feb. 9.
Erbograph Company. (See Hubbard, R. C., and Mutscher, assignors.)
Erickson, Nels S. (See Efford, G. A., and Erickson.)
Erickson, Nils R., Vancouver, British Columbia, Canada. Rocking seesaw. 1,572,194; Feb. 9.
Eriksson, Erik O. (See Ljungström, B., Eriksson, and Ljungström.)
Etheridge, Harry, Zellenople, Pa. Railway-track construction. 1,572,131; Feb. 9.
Evans, David Z., Philadelphia, Pa. Window-shade bracket. 1,572,642; Feb. 9.
Evans, John. (See Ewing, Edwin J., assignor.)
Evans, Samuel R., and S. W. Collins, Tulsa, Okla. Combination sand pump and drill. 1,572,274; Feb. 9.

Evershed & Vignoles, Limited. (See Needham, John C., assignor.)
Ewalt, Harry E., Chicago, Ill. Paper-seasoning machine. 1,572,352; Feb. 9.
Ewing, Edwin J., Cornopolis Borough, assignor of one-half to J. Evans, Westwood, Pa. Combination bathing fixture. 1,572,275; Feb. 9.
Fagerholm, Per E., Stockholm, Sweden. Calculating apparatus. 1,572,520; Feb. 9.
Fahrney, Emery H., Chicago, Ill. Engine. 1,572,709; Feb. 9.
Fairbanks, E. and T., and Company. (See Taylor, William H., assignor.)
Fairchild, Walter L., New York, N. Y. Splicing unvulcanized rubber tubes for automobile tires and the like. 1,572,276; Feb. 9.
Faith Manufacturing Company. (See Faith, Stephen, assignor.)
Faith, Stephen, assignor to Faith Manufacturing Company, Chicago, Ill. Automobile radiator cap. Des. 69,385; Feb. 9.
Falkner, Benjamin H., Cleveland, Ohio, assignor to Western Wheeled Scraper Company, Aurora, Ill. Track shifting and raising machine. 1,572,643; Feb. 9.
Farbenfabriken vorm. Friedr. Bayer and Co. (See Einsler, Otto, assignor.)
Farbenfabriken vorm. Friedr. Bayer and Co. (See Meerwein, Hans, assignor.)
Farber, Simon W., Inc. (See Ramge, William, assignor.)
Farmer, Clyde C., Pittsburgh, assignor to The Westinghouse Air Brake Company, Wilmerding, Pa. Speed-control governor. 1,572,195; Feb. 9.
Farmer, Clyde C., Pittsburgh, assignor to The Westinghouse Air Brake Company, Wilmerding, Pa. Variable load brake. 1,572,196; Feb. 9.
Farmer, Percy L., Richmond Me. Hose coupling. 1,572,781; Feb. 9.
Farnsworth, William W., Chicago, Ill. Hair cutter. 1,572,644; Feb. 9.
Fay, Frank H., Brooklyn, N. Y., assignor to American Telephone and Telegraph Company. Telegraph circuits. 1,572,782; Feb. 9.
Fehler, Otto, Berlin-Steglitz, Germany. Electric incandescent lamp for advertising purposes. 1,572,521; Feb. 9.
Felters Company, The. (See Guilliaume, Ernest M., assignor.)
Fenno, James A., et al. (See Allec, Henry, assignor.)
Ferguson, George W., Minneapolis, Minn. Toy. 1,572,473; Feb. 9.
Ferguson, John E. (See Whitmore, J. B., and Ferguson.)
Ferguson, William C., St. Louis, Mo. Series of sewers or conduits. 1,572,197; Feb. 9.
Fessenden-Ellis Company, The. (See Fessenden, L. P., and Ellis, assignors.)
Fessenden, Louis P., and H. R. Ellis, assignors to The Fessenden-Ellis Company, Sheboygan, Wis. Automatic draft regulator for furnaces. 1,572,277; Feb. 9.
Feuge, John J., et al. (See Lowry, George A., assignor.)
Finkhaus, Oskar, assignor to Bohn & Herber, Maschinenfabrik und Eisengiesserei, Wurzburg, Germany. Gripper mechanism of printing presses. 1,572,710; Feb. 9.
Finley, Thomas M., St. Louis, Mo. Tandem motor power unit. 1,572,522; Feb. 9.
Finley, Thomas M., and A. W. Brown, St. Louis, Mo. Engine. 1,572,523; Feb. 9.
Fischer, Albert C., Chicago, Ill. Expansion joint. 1,572,474; Feb. 9.
Fisher, Carl G., et al. (See Gilman, Norman H., assignor.)
Fisher, Harry C., Cincinnati, assignor to The Richardson Company, Lockland, Ohio. Coloring mineral matter. 1,572,425; Feb. 9.
Fisk, James R., El Paso, Tex. Wood-burning fireplace. 1,572,711; Feb. 9.
Fiske, Kenneth B., Chicago, Ill. Oven. 1,572,783; Feb. 9.
Fitzhugh, Mayo M. (See Heard, E. F., and Fitzhugh.)
Flannery, John L., assignor to The Boye Needle Company, Chicago, Ill. Embroidery stiletto. 1,572,524; Feb. 9.
Fleischmann Company, The. (See Corby, R. L., and Glasgow, assignors.)
Fleming, Albert C. (See Fleming, David A., assignor.)
Fleming, Ambrose, Washington, D. C. Magazine-fed pencil. 1,572,133; Feb. 9.
Fleming, August L. N., Lyndhurst, N. J., and W. T. Criswell, New York, N. Y. Safety device. 1,571,935; Feb. 9.
Fleming, David A., assignor of one-third to A. C. Fleming, Indiana, Pa. Automatic flow controller. 1,572,784; Feb. 9.
Fleming, Rives, Richmond, Va. Stove-leg lock. 1,572,003; Feb. 9.
Fletcher, Hubert G., Lonoke, Ark. Steam injector for internal-combustion engines. 1,572,278; Feb. 9.
Flinn, Paul A., South St. Paul, Minn., assignor to Swift & Company, Chicago, Ill. Bacon-skewer block. 1,572,198; Feb. 9.
Florence, Albert F., assignor of one-half to L. G. Becker, Kansas City, Mo. Vise. 1,572,279; Feb. 9.
Foley, William S., assignor of one-third to E. T. Petersen, Kansas City, Mo. Ring. Des. 69,386; Feb. 9.
Foote, J. B., Foundry Company, The. (See Harry, Charles R., assignor.)
Foote, John H., Delta, Utah. Pruning implement. 1,572,426; Feb. 9.
Forgeson, Florence M., Portland, Oreg. Flour sifter. 1,572,112; Feb. 9.
Fournier, Edmond E., and M. I. Vestal, Fall River, Mass. Timer. 1,572,199; Feb. 9.
Fowler, Alfred B., Beverly, Mass., assignor to United Shoe Machinery Corporation, Paterson, N. J. Abrading machine. 1,571,936; Feb. 9.
Fox, Francis H., Detroit, Mich., assignor to American Telephone and Telegraph Company. Telegraph circuit. 1,572,785; Feb. 9.
Fox, William, Tacoma, Wash. Snowshoe. 1,572,200; Feb. 9.
Frampton, John A., assignor of one-half to N. L. Parker, Columbus, Ohio. Wrench. 1,572,525; Feb. 9.
Francesco, John V., Brooklyn, N. Y. Combined rheostat and switch. 1,572,645; Feb. 9.
Frantz, Walter A., Cleveland, Ohio. Wringer. 1,572,201; Feb. 9.
Frary, Francis C., Oakmont, assignor to Aluminum Company of America, Pittsburgh, Pa. Refractory lining for crucibles and the like. 1,572,475; Feb. 9.
Fraser, Warren F., Westboro, Mass. Grinding machine. Re16,260; Feb. 9.
Frasier, Lee, and C. C. Hiner, Waco, Tex. Railway crossing signal. 1,572,280; Feb. 9.
Frederick, Charles W., assignor to Eastman Kodak Company, Rochester, N. Y. Camera obscura. 1,572,236; Feb. 9.
Frederickson, Otto A., Wethersfield, assignor to The American Wiremold Company, Hartford, Conn. Braiding machine. 1,572,712; Feb. 9.
Frederickson, Otto A., Wethersfield, assignor to The American Wiremold Company, Hartford, Conn. Braiding machine. 1,572,713; Feb. 9.
Froeell, Oscar, Hackensack, N. J., assignor, by mesne assignments, to Williamsport Building Products Co., Williamsport, Pa. Plastic and producing same. 1,572,714; Feb. 9.
Fry, Byron G., Glendale, Calif. Exerciser. 1,572,281; Feb. 9.
Frye, Whitney M., Wilton, N. H. Card. 1,571,937; Feb. 9.
Fuller Automobile Company. (See Fuller, Mzl, assignor.)
Fuller-Lehigh Company. (See Hilditch, William, assignor.)
Fuller, Mzl, assignor to Fuller Automobile Company, Chattanooga, Tenn. Mounting for window glass. 1,572,427; Feb. 9.
Fulton, Harry R., and J. J. Bowman, Washington, D. C. Preservation of fresh fruits and vegetables. 1,571,938; Feb. 9.
Furber, Frederick M., Revere, Mass., assignor to United Shoe Machinery Corporation, Paterson, N. J. Apparatus for applying liquids. 1,571,939; Feb. 9.
Fykse, Mitchell L., Milwaukee, assignor to Bucyrus Company, South Milwaukee, Wis. Removable wheel. 1,572,134; Feb. 9.
Gagnon, Albert J., et al. (See Gagnon, Peter J., jr., assignor.)
Gagnon, Peter J., jr., assignor of one-third to J. L. Henderson and one-third to A. J. Gagnon, Lowell, Mass. Automatic feed-regulating mechanism. 1,571,940; Feb. 9.
Galloway, Robert M., and A. G. Sudhoff, assignors to The National Automatic Tool Company, Richmond, Ind. Rotary table for drilling machines. 1,572,476; Feb. 9.
Gamber, Edward F., Shamokin, Pa. Window jack. 1,572,646; Feb. 9.
Gandy, Frank J. (See Blades, Leroy R., assignor.)
Garland, John W., Inc. (See Atkinson, Frederick C., assignor.)
Garner, Ernest P., Charlotte, N. C. Window screen. 1,572,786; Feb. 9.
Gartin, Elmer G., Claremont, N. H., assignor to Sullivan Machinery Company. Feed mechanism. 1,572,647; Feb. 9.
Gaskill, Jesse A., Imbler, Oreg. Weeding attachment for harrows. 1,572,004; Feb. 9.
Gates, Leroy G., Bakersfield, Calif. Rotary drill bit. 1,572,886; Feb. 9.
Gauriat, Pierre S., assignor to Pathe Cinema, Anciens Etablissements Pathe Freres, Paris, France. Apparatus for taking cinematographic views. 1,572,648; Feb. 9.
General Electric Company. (See Eaton, John, assignor.)
General Electric Company. (See Raube, William C., assignor.)
General Electric Company. (See Sanderson, Frank M., assignor.)
General Electric Company. (See Van Amburg, O. H., and Kempton, assignors.)
Geuder Paeschke and Frey Company. (See Kempter, Philip, assignor.)
Gillis, Charles R., assignor of one-half to G. F. Taft and one-half to N. S. Waite, Boston, Mass. Piston-ring compressor. 1,572,135; Feb. 9.
Gillis & Geoghegan, Inc. (See Hooker, Edward D., assignor.)
Gilman, Norman H., Indianapolis, Ind., assignor to C. C. Fisher and J. A. Allison, Miami, Fla. Vacuum brake. 1,572,526; Feb. 9.

Gilmartin, Daniel T., jr. (See Clark, E., and Gilmartin.)
Gittins, George W., administrator. (See Bocksch, Heinrich.)
Glasgow, Ruth. (See Corby, R. L., and Glasgow.)
Glee, Arthur. (See Glee, Charles P. and A.)
Glee, Charles P. and A., White, Nebr. Dehorner. 1,572,787; Feb. 9.
Glogauer, Fritz. (See Junghans, H., and Glogauer.)
Goddard, George E., Detroit, Mich., assignor, by mesne assignments, to Dodge Brothers Inc. Windshield. 1,571,941; Feb. 9.
Godwin, Alfred L., and P. Anderson, Ellwood City, Pa. Wire gauge. 1,572,353; Feb. 9.
Goelitz, Henry G., et al. (See Purnell, Lemuel H., assignor.)
Golden, Eleanor J., Portland, Oreg. Auxiliary stove plate. 1,572,113; Feb. 9.
Golding Bros. Company. (See Korzinek, William C., assignor.)
Goldsmith, Elmer P., Newark, N. J., assignor to Miller & Goldsmith, New York, N. Y. Novelty holder for soiled or clean handkerchiefs. Des. 69,387; Feb. 9.
Goldsmith, Wolf T., Newark, N. J. Bag frame. Des. 69,388–9; Feb. 9.
Goldsworthy, William J., San Francisco, Calif. Golf practice ball. 1,572,527; Feb. 9.
Gong Bell Manufacturing Company. (See Watrous, Clifford M., assignor.)
Goodyear Tire & Rubber Company, The. (See Cooper, James F., assignor.)
Gordon, Abrahams, Brooklyn, N. Y. Collapsible box. 1,572,788; Feb. 9.
Goudet, Charles. (See Breslauer, J., and Goudet.)
Gould, Edward G., Oakland, assignor to Advanced Engine Co. Inc., San Francisco, Calif. Engine. 1,572,068; Feb. 9.
Goulet, Joseph, assignor of one-half to A. Brazeau, Timmins, Ontario, Canada. Automatic safeguard. 1,572,202; Feb. 9.
Grafton, Howard T., C. W. Weesner, and F. J. Hoffman, Warren, Ohio. Apparatus for purifying gas. 1,572,599; Feb. 9.
Grafton, Howard T., and C. Weesner, Warren, Ohio. Annealing iron articles. 1,572,600; Feb. 9.
Grant Leather Corporation. (See Shivell, H. J., and Koeniger, assignors.)
Grantzow, Emil, Dresden, Germany. Sharpening machine for pencils and other styles. 1,572,005; Feb. 9.
Grasselli Chemical Company. (See Hoff, Clayton M., assignor.)
Gravell, James H., Elkins Park, Pa. Rustproofing bath for iron and steel. 1,572,354; Feb. 9.
Gray, Orrin D., assignor to Advance Automobile Accessories Corporation, Chicago, Ill. Friction material. 1,572,601; Feb. 9.
Greenawalt, William E., Denver, Colo. Metallurgical process. 1,572,114; Feb. 9.
Greenawalt, William E., Denver, Colo. Metallurgical process. 1,572,115; Feb. 9.
Gribbin, William J., Washington, D. C. Lanston monotype perforating machine. 1,572,136; Feb. 9.
Griffin, Frank W., Galesburg, Ill. Handle. 1,572,006; Feb. 9.
Griffin, Sidney S., Detroit, Mich. Child's coaster toy. 1,572,789; Feb. 9.
Griffith, D. W., Incorporated. (See Scholl, Edward, assignor.)
Grignon, Ephraim P., Appleton, Wis. Foldable table. 1,572,282; Feb. 9.
Grigsby, Hugh S., Richmond, Va. Garage. 1,572,790; Feb. 9.
Grimes, Charles P., Syracuse, N. Y. Attaching copper fins to cast-iron cylinders. 1,572,428; Feb. 9.
Griswold, Robert G., Westfield, N. J., assignor to Doherty Research Company, New York, N. Y. Gas calorimeter. 1,572,283; Feb. 9.
Grither, Valentine J., jr., St. Louis, Mo. Display case. 1,572,429; Feb. 9.
Gross, Benjamin & Edward J., Co. (See Gross, Benjamin, assignor.)
Gross, Benjamin, assignor to Benjamin & Edward J. Gross Co. Inc., New York, N. Y. Finger ring or article of similar nature. Des. 69,390; Feb. 9.
Grote, Walther H., assignor to C. Kenyon Company, Inc., Brooklyn, N. Y. Coupling device. 1,572,355; Feb. 9.
Grundlock, Ida S., Philadelphia, Pa. Souvenir emblematic gate. Des. 69,391; Feb. 9.
Grünig, Fritz, Thun, Switzerland. Block-signal system. 1,572,137; Feb. 9.
Grunlee, Sigwald C., Chicago, Ill. Stop mechanism for blank-feeding machines. 1,572,007; Feb. 9.
Gueft-Grinberg, Amshel, New York, N. Y. Bucco-lingual dental attachment. 1,571,942; Feb. 9.
Guillaume, Ernest M., Worcester, assignor to The Felters Company, Inc., Boston, Mass. Window channel. 1,572,284; Feb. 9.
Gunderman, Lester S., Pittsburgh, Pa. Mechanical toy. 1,572,356; Feb. 9.
Gunderman, Lester S., Pittsburgh, Pa. Mechanical toy. 1,572,649; Feb. 9.
Günther, Fritz, and F. Lange, assignors to Badische Anilin- & Soda-Fabrik, Ludwigshafen-on-the-Rhine, Germany. Solid stable diazo compound. 1,572,715; Feb. 9.
Guy, Charles G., Vancouver, British Columbia, Canada. Azimuth reader for magnetic compasses. 1,572,528; Feb. 9.
Guymon, Franklin N., assignor of one-sixth to J. P. Johnson, Huntington, Utah. Power operating attachment for sheep shears. 1,572,791; Feb. 9.
Guyot, Henri R., assignor to Société R. Guyot & Cie., Paris, France. Radiator with removable elements. 1,572,792; Feb. 9.
Hachmuth, Henry C., Comstock Park, Mich. Motor-vehicle signal. 1,572,138; Feb. 9.
Hachmann, Frederick, Chicago, Ill. Track-aligning jack. 1,572,477; Feb. 9.
Haeussler, Bennet D., Marion, Iowa. Waiting-station booth. Des. 69,392; Feb. 9.
Haft, Lester, assignor to Haft, Wood & Co., Inc., New York, N. Y. Making lighting-outfit-festoons. 1,572,650; Feb. 9.
Haft, Wood & Co. (See Haft, Lester, assignor.)
Hage, Robert R., Minneapolis, Minn. Door holder. 1,572,285; Feb. 9.
Haight, Harry V. (See McClay, G. F., and Haight.)
Haight, Harry V., Sherbrooke, Quebec, Canada, assignor to Ingersoll-Rand Company, Jersey City, N. J. Chuck assembly for rock drills. 1,572,529; Feb. 9.
Hall, Albert L., assignor to Simplex Heater Company, Los Angeles, Calif. Water-heater burner. 1,572,203; Feb. 9.
Hall, J. C., Company, The. (See Hetherington, Herbert W., assignor.)
Hall, James W., Brighton, Mass., assignor to The Moore Pen Company, Boston, Mass. Illuminated display case. 1,572,793; Feb. 9.
Hall, Selden H., Poughkeepsie, N. Y., and C. H. Hapgood, Nutley, N. J., assignors to The De Laval Separator Company, New York, N. Y. Separating wax from mineral-oil distillates. 1,571,943; Feb. 9.
Hall, Thomas W., assignor of one-half to C. Kuntson, Long Beach, Calif. Safety collapsible combination stepladder and stool. 1,572,008; Feb. 9.
Halsey, Edward S., assignor of one-third to R. A. Ruess, Washington, D. C. Flooded horizontal refrigerating coil. 1,572,858; Feb. 9.
Hamilton, Charles L., Seattle, Wash. Massage apparatus. 1,572,794; Feb. 9.
Hammond, Grant, New Haven, Conn. Reclaiming used paper. 1,572,478; Feb. 9.
Hammond, Grant, New Haven, Conn. Composition of ingredients and process for delinking paper. 1,572,479; Feb. 9.
Hammond, John H., jr., Gloucester, Mass. Limiting the effect of static or other disturbances in wireless telegraphy. 1,572,204; Feb. 9.
Hand, Jay A. (See Kuhn, F., and Hand.)
Hanna, William T., Cincinnati, Ohio. Coal-cutting knife. 1,572,430; Feb. 9.
Hansen, Charles C., Easton, Pa., assignor to Ingersoll-Rand Company, Jersey City, N. J. Shoveling and loading machine. 1,572,009; Feb. 9.
Hansen, Holger, Charlottenlund, near Copenhagen, Denmark. Hollow dibble. 1,572,431; Feb. 9.
Hansen, John, Bettendorf, assignor to Davenport Manufacturing Co. Inc., Davenport, Iowa. Power baling machine. 1,572,716; Feb. 9.
Hanson, Lyndall O., New Auburn, Wis. Pipe hoist. 1,572,286; Feb. 9.
Hapgood, Cyrus H. (See Hall, S. H., and Hapgood.)
Harding, Dana E. (See Wright, W. C., and Harding.)
Harding, Dana E., Danvers, assignor to Harding Engineering Company, East Boston, Mass. Coating machine. 1,572,205; Feb. 9.
Harding Engineering Company. (See Harding, Dana E., assignor.)
Harding Engineering Company. (See Wright, W. C., and Harding, assignors.)
Harrington & Richardson Arms Co. (See Abbenzeller, Alfred D., assignor.)
Harrison, George D., North Attleboro, Mass., assignor to Providence Stock Company, Providence, R. I. End connecter for bracelets. 1,572,717; Feb. 9.
Harrison, Henry C., Port Washington, assignor to Western Electric Company, Incorporated, New York, N. Y. Sound box. 1,572,387; Feb. 9.
Harry, Charles R., assignor to The J. B. Foote Foundry Company, Fredericktown, Ohio. Cement-block machine. 1,572,602; Feb. 9.
Hart, Walter V., deceased, Jacksonville, Fla.; E. H. Heddon, administratrix. Box-making machine. 1,572,718; Feb. 9.
Hartford-Empire Company. (See Howard, George E., assignor.)
Hartshorn, Stewart, Company. (See Hartshorn, Stewart H., assignor.)
Hartshorn, Stewart H., Short Hills, N. J., assignor to Stewart Hartshorn Company, East Newark, N. J. Shade roller. 1,572,651; Feb. 9.
Hathaway, Chester W. (See Mueller, R. H., and Hathaway.)
Haviland, Theodore, & Co. (See Haviland, William D., assignor.)
Haviland, William D., Limoges, France, assignor to Theodore Haviland Co. Inc., New York, N. Y. Dish or similar article. Des. 69,393; Feb. 9.

Haviland, William D., Limoges, France, assignor to Theodore Haviland & Co. Inc., New York, N. Y. Plate or similar article. Des. 69,394; Feb. 9.
Hazlett, Walter H., Long Beach, Calif., assignor of one-half to V. M. Stedman, Whittier, Calif. Crown-block string weigher. 1,572,719; Feb. 9.
Head, Drew, Chicago, Ill. Wrist-pin connection. 1,572,795; Feb. 9.
Heard, Edmund F., Elizabeth City County, and M. M. Fitzhugh, assignors to Newport News Shipbuilding & Dry Dock Company, Newport News, Va. Apparatus for presetting lathe tools and the like. 1,571,944; Feb. 9.
Heddon, Elsie H., administratrix. (See Hart, Walter V.)
Hedde, Christen P., Kenosha, Wis., assignor to T. C. Igo, Chicago Heights, Ill. Bumper and bracket therefor. 1,572,603; Feb. 9.
Heimerdinger, Harry M., Blackfoot, Idaho. Food product. 1,571,945; Feb. 9.
Heitman, Edward, Jersey City, and J. F. Trudeau, assignors to Electric Dynamic Company, Bayonne, N. J. Bearing cap. 1,572,287; Feb. 9.
Helm, John, Meade, Kans. Saddle ring. 1,572,796; Feb. 9.
Helmond, William F., Hartford, Conn., assignor to Underwood Typewriter Company, New York, N. Y. Typewriting machine. 1,571,946; Feb. 9.
Helmond, William F., Hartford, Conn., assignor to Underwood Typewriter Company, New York, N. Y. Typewriting machine. 1,572,139; Feb. 9.
Henderson, Joseph L., et al. (See Gagnon, Peter J., jr., assignor.)
Hendren, Mary, administratrix. (See Schultz, R. C., and Hendren.)
Hendren, Otto L. (See Schultz, R. G., and Hendren.)
Hendry, William F., assignor to Western Electric Company, Incorporated, New York, N. Y. Vacuum tube. 1,572,530; Feb. 9.
Henkel, Frederick, Long Beach, Calif. Wheelbarrow. 1,572,531; Feb. 9.
Henry, Leo L., assignor to J. E. Jackson, Cedar Rapids, Iowa. Memorandum pad. Des. 69,395; Feb. 9.
Hepp s, Otto A., Chicago, Ill. Container. 1,572,140; Feb. 9.
Hercules Match Corporation. (See Nevins, Thomas A., assignor.)
Herdle, Frederick J., Chicago, Ill. Muffler. 1,572,116; Feb. 9.
Herman, Joseph, New York, N. Y., assignor to American Telephone and Telegraph Company. Detector circuit. 1,572,010; Feb. 9.
Hermann, Otto, assignor to Thermo Electric Battery Company, Chicago, Ill. Thermoelectric element. 1,572,117; Feb. 9.
Hermann Tire Building Machine Company. (See Hermann, Walter H., assignor.)
Hermann, Walter H., assignor to Hermann Tire Building Machine Company, Lancaster, Ohio. Tire-building machine. 1,572,011; Feb. 9.
Hernandez y Perez, Francisco, Habana, Cuba. Double lock. 1,572,077; Feb. 9.
Herskovitz, Max, deceased, Chicago, Ill.; W. Herskovitz and C. Weinfeld, executors. Electric-lamp-supporting structure. 1,572,532; Feb. 9.
Herskovitz, William, et al., executors. (See Herskovitz, Max.)
Hertlin, Louis J., Woodhaven, N. Y. Production of aluminum printing plates. 1,572,012; Feb. 9.
Hetherington, Herbert W., assignor to The J. C. Hall Company, Providence, R. I. Safety paper. Des. 69,396; Feb. 9.
Heuser, Charles J., Paterson, N. J. Means for eliminating vapor and preventing condensation and for ventilation. 1,572,288; Feb. 9.
Henser, Herman, Evanston, Ill. Food compound. 1,572,533; Feb. 9.
Hey, Harry, Melbourne, Victoria, Australia. Recovery of lead and silver from sulphide ores and metallurgical products. 1,572,388; Feb. 9.
Hickok, W. O., Manufacturing Company. (See Broadmeyer, Albert, assignor.)
Highland, Charles D., Des Moines, Iowa. Perforating-machine attachment. 1,572,720; Feb. 9.
Hildebrandt, Edward. (See Hildebrandt, Harold and E.)
Hildebrandt, Harold and E., Tacoma, Wash. Novelty box and wagon. 1,572,141; Feb. 9.
Hilditch, William, Cleveland, Ohio, assignor to Fuller-Lehigh Company, Fullerton, Pa. Feeder. 1,572,206; Feb. 9.
Hilfman, Harry. (See Roetgen, Frederick, assignor.)
Hilfman, Harry. (See Villaret, Gustave E., assignor.)
Hilton, William, Seattle, Wash. File gauge. 1,572,013; Feb. 9.
Hinckley, Arthur T., Niagara Falls, N. Y., assignor to National Carbon Company, Inc. Sectional electrode with locked screws-thread joints. 1,572,534; Feb. 9.
Hiner, Connell C. (See Frasier, L., and Hiner.)
Hirt, William R., Deerbrook, Wis. Woodworking machine. 1,572,797; Feb. 9.
Hislop, William C., Detroit, Mich. Ash receptacle. 1,572,480; Feb. 9.
Hitchcock, Halbert K., Pittsburgh, Pa., assignor to Pittsburgh Plate Glass Company. Gate for glass tanks. 1,572,481; Feb. 9.
Hodgkinson, Edwin, assignor to Taylor Companies, Rochester, N. Y. Recording instrument. 1,572,207; Feb. 9.
Hodgson, Harriette E., New York, N. Y. Swinging hobby-horse. 1,571,947; Feb. 9.
Hoff, Clayton M., assignor to The Grasselli Chemical Company, Cleveland, Ohio. Manufacture of alkali-metal phosphates. 1,572,846; Feb. 9.
Hoffman, Floyd J. (See Grafton, H. T., Weesner, and Hoffman.)
Hoffman, George D., Pasadena, Calif., assignor to Hoffman Specialty Company, Waterbury, Conn. Vapor-heating system with differential loops. 1,572,482; Feb. 9.
Hoffman Specialty Company. (See Hoffman, George D., assignor.)
Hogan, William, Fillmore, Utah. Holder for beet-toppers' knives. 1,572,289; Feb. 9.
Hoier, John, Dell Rapids, S. Dak. Feed trough. 1,572,483; Feb. 9.
Holland Furnace Company. (See De Lin, Martin, assignor.)
Holmes, Frank M. (See Winter, W. J., and Holmes.)
Homar, Frank T., Tucson, Ariz. Shock absorber. 1,572,484; Feb. 9.
Hood, Charles H., Ashland, Ky. Joint completing or grooving tool. 1,572,142; Feb. 9.
Hood, Percy A., Yarmouth, Nova Scotia. Clearer for drawing frames. 1,572,014; Feb. 9.
Hooker, Edward D., assignor to Gillis & Geoghegan, Inc., New York, N. Y. Hoisting apparatus. 1,572,015; Feb. 9.
Horn, Ernest H., assignor to Waterbury Clock Co., Waterbury, Conn. Timepiece. 1,572,485; Feb. 9.
Horn, Ernst, Berlin, and M. Langer, Hermsdorf, Germany, assignors to Siemens & Halske Aktiengesellschaft, Wernerwerk, Siemensstadt, near Berlin, Germany. Telephone system. 1,572,859; Feb. 9.
Horn, Ernst, Berlin, Germany, assignor to Siemens & Halske Aktiengesellschaft, Siemensstadt, near Berlin, Germany. Telephone system. 1,572,860; Feb. 9.
Hornbeak, J. Alfred, et al. (See Baldridge, A. G., and Roberts, assignors.)
Horton, Charles, Ridgefield Park, N. J., assignor to Dubilier Condenser & Radio Corporation, New York, N. Y. Radiocondenser. 1,572,604; Feb. 9.
Houskeeper, William G., assignor to Western Electric Company, Incorporated, New York, N. Y. Electron-discharge device. 1,571,948; Feb. 9.
Houskeeper, William G., assignor to Western Electric Company, Incorporated, New York, N. Y. Vacuum tube. 1,572,721; Feb. 9.
Howard, George E., Butler, Pa., assignor to Hartford-Empire Company, Hartford, Conn. Multiple-mold shear device for glass-working machines. 1,572,143; Feb. 9.
Howard, Jesse R., Beloit, Wis. Window sash. 1,572,486; Feb. 9.
Howe, William C., Chicago, Ill., assignor to The Alden Speare's Sons Co., Boston, Mass. Laundry bag. 1,572,605; Feb. 9.
Hubbard, Roscoe C., Mount Vernon, and A. E. Mutscher, South Ozone Park, N. Y., assignors to Erbograph Company, New York, N. Y. Light-control attachment for film-printing machines. 1,572,798; Feb. 9.
Huff, Russell, Detroit, Mich., assignor, by mesne assignments, to Dodge Brothers Inc. Transmission lock. 1,571,949; Feb. 9.
Hughes, Charles H., East Orange, N. J. Roller bearing. 1,572,606; Feb. 9.
Hull, Matthew R., assignor to Rex Manufacturing Company, Connersville, Ind. Joint-masking means for demountable automobile tops. 1,572,290; Feb. 9.
Humphrey, Herbert S., Kalamazoo, Mich. Sprinkler. 1,571,950; Feb. 9.
Hunt, Elmer L., Los Angeles, Calif. Scriber clamp and attaching device. 1,572,237; Feb. 9.
Hunt, Thomas F., Jacksonville, Fla. Combined window-shade and curtain bracket. 1,572,389; Feb. 9.
Huntoon, William C., jr., East Greenwich, R. I. Collapsible tube. 1,572,208; Feb. 9.
Hurxthal, Alpheus O. (See Ayres, E. B., and Hurxthal.)
Huston, Dwight W., Springfield, Ohio, assignor to Wayne Tank & Pump Company, Fort Wayne, Ind. Illuminating sign for gasoline pumps. 1,572,016; Feb. 9.
Hyde, Burdon P., assignor to Scovill Manufacturing Company, Waterbury, Conn. Loose-powder vanity box. 1,572,652; Feb. 9.
Igo, Tom C. (See Heide, Christen P., assignor.)
Ingersoll-Rand Company. (See Bayles, Lewis C., assignor.)
Ingersoll-Rand Company. (See Haight, Harry V., assignor.)
Ingersoll-Rand Company. (See Hansen, Charles C., assignor.)
Ingersoll-Rand Company. (See McClay, G. F., and Haight, assignors.)
Ingersoll-Rand Company. (See Peters, Arthur E., assignor.)
International Nickel Company, The. (See Merica, Paul D., assignor.)
International Register Co. (See Woodward, Arthur H., assignor.)
Irvin, A. H., Company. (See Irvin, Daniel L., assignor.)

Irvin, Daniel L., assignor to A. H. Irvin Company, Inc., Curwensville, Pa. Staple binder. 1,572,017; Feb. 9.
Irvin, Daniel L., assignor to A. H. Irvin Company Inc., Curwensville, Pa. Staple binder. 1,572,018; Feb. 9.
Irving Engineering Sales Company. (See Roehmholdt, Paul L., assignor.)
Israel, Albert H. (See Kramer, J., and Israel.)
Jackson, John A., Chesterton, Ind., assignor to The Ryan Car Company, Chicago, Ill. Fluid-pressure hammer. 1,572,019; Feb. 9.
Jackson, John W., Fall River, assignor to American Moistening Company, Boston, Mass. Humidifier control. 1,572,432; Feb. 9.
Jackson, Julian E. (See Henry, Leo L., assignor.)
Jackson, Maunsell B., Toronto, Ontario, Canada, assignor of thirty-three per cent to T. C. Bate, thirty-three per cent to E. McMahon, twenty-nine per cent to P. D. Lyons, and five per cent to A. P. Deroche, Ottawa, Canada. Woodturning machine. 1,572,535; Feb. 9.
Jackson, Maxey, Portland, Oreg., assignor, by mesne assignments, to Motor Safety Indicator, Inc. Speed-indicating signal. 1,572,536; Feb. 9.
Jacobs, Ernest H., assignor to Electrical Engineers Equipment Company, Chicago, Ill. Switch. 1,572,209; Feb. 9.
Jacobson, Axel E., Minneapolis, Minn. Grinding machine. 1,572,722; Feb. 9.
Jacques, George W., Stratford, Conn., assignor, by mesne assignments, to United Shoe Machinery Corporation, Paterson, N. J. Duplex eyeleting machine. 1,571,951; Feb. 9.
Jacques, George W., Stratford Conn., assignor, by mesne assignments, to United Shoe Machinery Corporation, Paterson, N. J. Fastener-setting machine. 1,571,952; Feb. 9.
Jaeger, Hans W., Tacoma, Wash. Hydrocarbon-oil burner. 1,572,653; Feb. 9.
Jaeger, Julius T., Iroquois Falls, Ontario, Canada. Process and apparatus for cooking wood chips. 1,572 723; Feb. 9.
Jansen, Emile. (See Wieland, C. F., and Jansen.)
Jaworowski, Joseph F., assignor of one-half to S. E. Dettelbach, Cleveland, Ohio. Hydraulic reduction drive. 1,572,020; Feb. 9.
Jeffries, Zay. (See Johnston, R. L., Archer, and Jeffries.)
Jeffries, Zay, Shaker Heights and R. S. Archer, Lakewood, Ohio, assignors to Aluminum Company of America, Pittsburgh, Pa. Aluminum-copper alloy. 1,572,487; Feb. 9.
Jeffries, Zay, Shaker Heights, and R. S. Archer, Lakewood, Ohio, assignors to Aluminum Company of America, Pittsburgh, Pa. Aluminum-silicon alloy. 1 572,488; Feb. 9.
Jenkins, Charles F., Washington, D. C. Offset filament lamp. 1,572,607; Feb. 9.
Jobson, William P., Philadelphia, Pa., assignor to H. S. Souder, Souderton, Pa. Continuous ore-treating furnace. 1,572,291; Feb. 9.
Johansen, Johanne, Newport, R. I. Furniture polish. 1 572,021; Feb. 9.
Johns-Manville, Incorporated. (See Walsh, Joseph H., assignor.)
Johnson Automobile Lock Co. (See Johnson, Colvin L., assignor.)
Johnson, Charles E., Denver, Colo. Steam-cooking utensil. 1,572,144; Feb. 9.
Johnson, Colvin L., St. Louis, Mo., assignor to Johnson Automobile Lock Co. Locking a transmission-housing cover. 1,572,145; Feb. 9.
Johnson, James P. (See Guymon, Franklin N., assignor.)
Johnson, John, Percival, Saskatchewan, Canada. Controlling device for two-cycle explosive engines. 1,572,292; Feb. 9.
Johnson, Joseph E., and H. W. Spellman, assignors to The Connecticut Telephone & Electric Company, Incorporated, Meriden, Conn. Power press. 1,572,724; Feb. 9.
Johnson, Stephens & Shinkle Shoe Company. (See Spalsbury, Charles B., assignor.)
Johnston, Roderick L., New York, R. S. Archer, East Cleveland, and Z. Jeffries, Cleveland Heights, Ohio, assignors to Aluminum Company of America, Pittsburgh, Pa. Aluminum alloy. 1,572,489; Feb. 9.
Johnston, Roderick L., Plainfield, N. J. R. S. Archer, Lakewood, and Z. Jeffries, Shaker Heights, Ohio, assignors to Aluminum Company of America, Pittsburgh, Pa. Aluminum alloy. 1,572,490; Feb. 9.
Johnston, Roderick L., Plainfield, N. J., assignor to Aluminum Die-Casting Corporation. Alloy. 1,572 357; Feb. 9.
Jones, Carl A., Bristol, Va. Bottle. Des. 69,397; Feb. 9.
Jones, John G., assignor to Eastman Kodak Company, Rochester, N. Y. Suction box for paper-making machines. 1,572,238; Feb. 9.
Jones, Marie C., Los Angeles, Calif. Poetic puzzle and poetic-puzzle blocks. 1,572,433; Feb. 9.
Jones, Rees J., jr., et al. (See Baker, George, assignor.)
Jones, Richard, Parkville, Mo. Divider board. 1,572,146; Feb. 9.
Joyce, Bryan P., Davenport, Iowa, assignor to T. A. Conlon, Silver Spring, Md. Lubricating device. 1,572,537; Feb. 9.
Judge, Michael H., Greeley, Nebr. Door latch. 1,572,293; Feb. 9.
Junghans, Helmut, Gut Berneck, near Schramberg, Germany, and F. Glogauer, Cincinnati, Ohio. Circuit closer for direction indicators. 1,572,147; Feb. 9.
Kaiser, Arthur, Brooklyn, N. Y. Pocket for sweaters. 1,572 434; Feb. 9.
Kaiser, Robert E., Conemaugh, Pa. Dirigible headlight. 1,572,799; Feb. 9.
Kaltenbach, Robert W., Cleveland Heights, assignor to The McMyler-Interstate Company, Cleveland, Ohio. Car-dumping apparatus. 1,572,654; Feb. 9.
Kane, Thomas H., Youngstown, Ohio, assignor to Truscon Steel Company. Wire-mesh machine. 1,572,491; Feb. 9.
Kannenberg, William, Milwaukee, Wis. Train-signaling system. 1,572,800; Feb. 9.
Karpen, S., & Bros. (See Carter, C. B., and Coxe, assignors.)
Katz, Morris I., Springfield, Mass. Bottle. Des. 69,398; Feb. 9.
Kearney, Paul C., Bridgeport, Conn. Piston-ring compressor. 1,572,801; Feb. 9.
Keim, Lester H., Pasadena, Calif. Spring well-casing hook. 1,572,390; Feb. 9.
Keller, Julius, sr., Chicago, Ill. Roller bearing. 1,572,725; Feb. 9.
Kelly, Mervin J., assignor to Western Electric Company, Incorporated, New York, N. Y. Electron-discharge device. 1,572,726; Feb. 9.
Kelly, Timothy J. (See Pearson, W. H., and Kelly.)
Kelvinator Corporation. (See Spreen, Charles C., assignor.)
Kempter, Philip, assignor to Geuder Paeschke and Frey Company, Milwaukee, Wis. Sanitary-container construction. 1,572,492; Feb. 9.
Kempton, Leslie A. (See Van Amburg, O. H., and Kempton.)
Kendall, Allen B. (See Shaver, A. G., and Kendall.)
Kent-Owens Machine Company, The. (See Shepherd, Harold F., assignor.)
Kenyon, C., Company. (See Grote, Walther H., assignor.)
Kerr, Arthur N., Bellevue, assignor to Rockgas Products Company, Corapolis, Pa. Liquid-fuel container. 1,572,727; Feb. 9.
Kerr, Harold H. (See O'Connell, J., and Kerr.)
Kerwin, William J., jr., assignor to Beacon Manufacturing Company, New Bedford, Mass. Manufacturing colored yarns. 1,572,148; Feb. 9.
Kestell, Philip, assignor to Thomas Day Company, San Francisco, Calif. Electric-lighting fixture. 1,572,728; Feb. 9.
Klærbye, Oluf, assignor to Aktieselskabet Eto Electro Co., Copenhagen, Denmark. Resistance. 1,572,538; Feb. 9.
Klefer, Karl, Cincinnati, Ohio. Filling machine. 1,572,149; Feb. 9.
Klefer, Karl, Cincinnati, Ohio. Filling machine. 1,572,150; Feb. 9.
Kimball, William M. (See Race, Arthur L., assignor.)
King, Albert M., Casper, Wyo. Bomb. 1,572,435; Feb. 9.
King, Albert M., Casper, Wyo. Bomb casing. 1,572,436; Feb. 9.
King, Dean W., San Francisco, Calif. Gun sight. 1,572,294; Feb. 9.
King, De Witt C., Fillmore, Calif. Trap for oil-well pumps. 1,572,022; Feb. 9.
Kingery, Samuel S., Norwood, Ohio. Corn-popping machine. 1,572,437; Feb. 9.
Kingwill, Charles G. (See Kingwill, Edward J., assignor.)
Kingwill, Edward J., Santa Monica, Calif., assignor of one-half to C. G. Kingwill, Hammond, Ind. Sash and door lock. 1,572,608; Feb. 9.
Kirchhof, Ludwig. (See Vogt, E., and Kirchhof.)
Kluiber, Walter J., Chicago, Ill., assignor to The Koppers Company, Pittsburgh, Pa. Container for testing coal and method of testing. 1,572,391; Feb. 9.
Klecker, William J., Watertown, Wis. Windmill. 1,572,493; Feb. 9.
Klein, Fred E. (See Rosenthal, Morris G., assignor.)
Kline, Frederick, Santa Monica, Calif. Game. 1,572,069; Feb. 9.
Knapp, Leland G., assignor to Montgomery, Ward & Co., Chicago, Ill. Scale. 1,572,609; Feb. 9.
Knatvold, Burt, Albert Lea, Minn. Clothesline reel. 1,572,151; Feb. 9.
Knowlton, Cutler D., Beverly, Mass, assignor to United Shoe Machinery Corporation, Paterson, N. J. Reciprocating abrader. 1,571,953; Feb. 9.
Knutson, Charles. (See Hall, Thomas W., assignor.)
Koehring Company. (See Beckwith, Raymond A., assignor.)
Koehrman, Mathias G., assignor to The Roberts Printing Company, Toledo, Ohio. Book stamp. 1,572,392; Feb. 9.
Koeniger, Karl W. (See Shivell, H. J., and Koeniger.)
Koerner, Ewald, Dresden, Germany, assignor to United Cigarette Machine Co., Inc., Lynchburg, Va. Cut-off knife for cigarette machines. 1,572,393; Feb. 9.
Kofsky, Henry M., Philadelphia, Pa. Bracket. 1,572,295; Feb. 9.
Kolenski, Gustave, Jamaica, N. Y. Surface covering. 1,572,070; Feb. 9.

Kolibas, John A., Cleveland, Ohio. Combined visor and automatic flash light. 1,572,210; Feb. 9.
Koppers Company, The. (See Klaiber, Walter J., assignor.)
Korzinek, William C., Cliffside Park, N. J., assignor to Golding Bros. Company, New York, N. Y. Textile fabric. Des. 69,399; Feb. 9.
Kramer, Joseph, and A. H. Israel, New York, N. Y. Collapsible millinery box. 1,572,296; Feb. 9.
Krause, Oscar, Far Rockaway, N. Y. Textile fabric. Des. 69,400; Feb. 9.
Krause, William C., Milwaukee, Wis. Pressure branding machine. 1,572,494; Feb. 9.
Krebs, Nicolaj P., Brea, Calif. Casing head. 1,572,394; Feb. 9.
Kreuder, Norman W., Chicago, Ill. Spraying device. 1,572,656; Feb. 9.
Kuhn, Frank, and J. A. Hand, assignors to American Electrical Heater Company, Detroit, Mich. Heating unit. 1,572,395; Feb. 9.
Kurowski, Alfred G. F., Brooklyn, N. Y., assignor to Underwood Typewriter Company, New York, N. Y. Typewriting machine. 1,572,396; Feb. 9.
Kurtzner, Hugo, Cleveland, Ohio. Radiator. 1,572,657; Feb. 9.
La Bombard, Leon E., and M. H. Sidebotham, assignors to Specialty Automatic Machine Company, Chelsea, Mass. Blank feeder. 1,572,438; Feb. 9.
La Bombard, Leon E., and M. H. Sidebotham, assignors to Specialty Automatic Machine Company, Chelsea, Mass. Timed feeder. 1,572,439; Feb. 9.
Lacks, William, and M. S. Newman, Newark, N. J. Bracket holder for junction boxes. 1,572,610; Feb. 9.
Ladin, Morris, Brooklyn, N. Y. Trimming for wearing apparel. Des. 69,401; Feb. 9.
Laher, Frank J., Portland, Oreg. Bumper. 1,572,118; Feb. 9.
Lambert, Edmund B., St. Paul, Minn. Fluid power transmitter. 1,571,954; Feb. 9.
Lambert, Henry M., Portland, Oreg., assignor to Lambert Tire & Rubber Co., Akron, Ohio. Mold for manufacturing tires. 1,572,440; Feb. 9.
Lambert Tire & Rubber Co. (See Lambert, Henry M., assignor.)
Lange, Fritz. (See Günther, F., and Lange.)
Langer, Max. (See Horn, E., and Langer.)
Langerak, Meyer. (See Langerak, Wiggert, assignor.)
Langerak, Wiggert, assignor of one-half to M. Langerak, Pella, Iowa. Weighing device. 1,572,658; Feb. 9.
Langstroth, William J., London, Ontario, Canada. Milk-bottle support. 1,572,152; Feb. 9.
Larkin, Joseph M. A., New York, N. Y. Building construction for toys. 1,572,659; Feb. 9.
Larraznbai y Fernandez, Luis, Habana, Cuba. Planimeter. 1,572,132; Feb. 9.
Larrey, Elisa, Mexico, Mexico. Rotary percolator. 1,572,861; Feb. 9.
Larson, John M., assignor to National Regulator Company, Chicago, Ill. Regulating device. 1,572,495; Feb. 9.
Lasker, William W., Brooklyn, N. Y., assignor, by mesne assignments, to Powers Accounting Machine Corporation, New York, N. Y. Paper-supporting carriage and guiding means. 1,571,955; Feb. 9.
Laskey, Philip B., Marblehead, Mass., assignor to W. B. Laskey, Brooklyn, N. Y. Candy-cutting machine. 1,572,071; Feb. 9.
Laskey, William B. (See Laskey, Philip B., assignor.)
Lathrop, Elbert C., Philadelphia, Pa., and T. B. Munroe, Forest Glen, Md.; said Lathrop assignor to the said Munroe. Preparing and preserving fibers for pulp-making purposes. 1,572,539; Feb. 9.
Lathrop, Elbert C., Philadelphia, Pa., and T. B. Munroe, Forest Glen, Md.; said Lathrop assignor to the said Munroe. Preserving fibers for pulp-making purposes. 1,572,540; Feb. 9.
Lathrop, Harry D., and W. H. Paulson, Chicago, Ill.; said Paulson assignor to said Lathrop. Dissolving apparatus. 1,572,023; Feb. 9.
Laughlin, William C., assignor to Laughlin Filter Corporation.)
Laughlin, William C., Glendale, Calif., assignor to Laughlin Filter Corporation, New York, N. Y. Method and centrifugal separator for separating solids from liquids. 1,572,611; Feb. 9.
Laughlin, William C., assignor to Laughlin Filter Corporation, New York, N. Y. Centrifugal separator. 1,572,612; Feb. 9.
Laver, Arthur, Bayside, N. Y. Lawn-mower attachment. 1,572,297; Feb. 9.
Lawrence, James S., Twin Falls, Idaho. Rotary engine. 1,572,541; Feb. 9.
Lawrence, Nellie, Greenwich, near Sydney, New South Wales, Australia. Tennis rackets. 1,572,542; Feb. 9.
Lawrence, Paul A., Grand Island, Nebr. Internal-combustion engine. 1,572,397; Feb. 9.
Layman, Charles D., Louisville, Ky. Exerciser. 1,572,802; Feb. 9.
Leach Company. (See Appleton, Joseph H., assignor.)
Lee, Frank M., Chicago, Ill., assignor to Sullivan Machinery Company. Drill-sharpening mechanism. 1,572,729; Feb. 9.
Leopold, Frederick B., Pittsburgh, Pa. Filtering apparatus. 1,572,398; Feb. 9.
Leppert, Henry E., assignor to The Trumbull Electric Mfg. Company, New Britain, Conn. Electric-switch terminal. 1,572,211; Feb. 9.
Letts, Ellsworth M., assignor of forty-nine one-hundredths to C. C. Annabel, Waverly, N. Y. Bottle-capping device. 1,572,543; Feb. 9.
Levin, Morris. (See Tuñez, Amable S., assignor.)
Lewis, Abraham I., Newark, N. J. Ornamental button. 1,572,803; Feb. 9.
Lewis, Joseph R., Kansas City, Mo. Hair curler. 1,572,399; Feb. 9.
Ley, Christian, assignor to the Firm of Alos Apparatebau, Gesellschaft mit beschrankter Haftung, Glauchau, Germany. Starter for electric motors. 1,572,804; Feb. 9.
Libros, Oscar. (See Libros, Simon, assignor.)
Libros, Simon, Cynwyd, assignor of one-half to O. Libros, Philadelphia, Pa. Sign. 1,572,496; Feb. 9.
Lide, Martin J., Birmingham, Ala. Condenser. 1,572,660; Feb. 9.
Lincoln Manufacturing Company. (See Lincoln, Neil S., assignor.)
Lincoln, Neil S., assignor to Lincoln Manufacturing Company, Connersville, Ind. Brake. 1,572,862; Feb. 9.
Lindemann, Walter C., Milwaukee, Wis. Gas stove. 1,572,661; Feb. 9.
Lindstrom, Nils O., Nutley, and C. F. E. Olofson, West Orange, N. J., assignors to A. B. See, Brooklyn, N. Y. Elevator. 1,572,400; Feb. 9.
Lippert, Aloysius C., Kenosha, Wis., assignor of one-half to C. A. Norton, Chicago, Ill. Radiator cap. Des. 69,402; Feb. 9.
Ljungström, Birger, Stockholm, E. O. Eriksson and F. Ljungström, Lidingo-Brevik, assignors to Atiebolaget Ljungströms Angturbin, Stockholm, Sweden. Condenser plant for locomotives. 1,572,153; Feb. 9.
Ljungström, Fredrik. (See Ljungström, B., Eriksson, and Ljungström.)
Locke, Fred J. (See Locke, Fred M. and F. J.)
Locke, Fred M. and F. J., Victor, N. Y. Batch for making ceramic material and to a ceramic material made therefrom. 1,572,730; Feb. 9.
Lodge & Shipley Machine Tool Company, The. (See Cockburn, Francis B., assignor.)
Long, John E., Multnomah, Oreg. Electric sign. 1,572,212; Feb. 9.
Los Angeles Pressed Brick Company. (See Mueller, Max, assignor.)
Lösel, Franz, Brunn, Czechoslovakia. High-pressure steam generator. 1,572,613; Feb. 9.
Low, David W., Los Angeles, Calif. Filing device. 1,572,239; Feb. 9.
Lowry, George A., assignor to J. J. Feuge and L. R. Browne, New York, N. Y. Cleaning fibrous materials. 1,572,662; Feb. 9.
Lowry, George A., assignor to J. J. Feuge and L. R. Browne, New York, N. Y. Cleaning and preparing fibrous materials. 1,572,663; Feb. 9.
Lucas, Wilbert, Detroit, Mich. Orthopedic support for shoes. 1,572,213; Feb. 9.
Luce, Louis L., Portland, Oreg., assignor to Luce-Mattson Engine Company, San Francisco, Calif. Steam generator for internal-combustion engines. 1,572,614; Feb. 9.
Luce-Mattson Engine Company. (See Luce, Louis L., assignor.)
Lundahl, Alma J., Logan, Utah. Rim tool. 1,572,298; Feb. 9.
Lux, Heinrich, Berlin, Germany. Photometer. 1,572,544; Feb. 9.
Lynch, Curtis L., Cherryfield, Me. Container pack. 1,572,731; Feb. 9.
Lynch Joseph L., Oak Park, Ill. Auto parking system. 1,572,664; Feb. 9.
Lyons, Phillip D., et al. (See Jackson, Maunsell B., assignor.)
Macadie, Donald. (See Ratcliff, C. F., and Macadie.)
MacInnes, Neil, Chicago, Ill. Vehicle lamp. 1,572,024; Feb. 9.
Macy, Charles E., Iowa Hill, Calif. Automatically-operated electric iron. 1,572 441; Feb. 9.
Maglathlin, Horace B., Kingston, assignor of one-half to F. E. Smith, Newton, Mass. Berry harvester. 1,572,025; Feb. 9.
Magor, Richard A., and W. Stone, Long Beach, Calif. Fishing tool. 1,572,615; Feb. 9.
Major Engineering Corporation. (See Schmidt, Fred, assignor.)
Malina, Louis. (See Morrell, Michael, assignor.)
Malider, Robert W., Dubuque, Iowa. Calculator. 1,572,547; Feb. 9.
Mallner, Albert. (See Moreno, Joseph, assignor.)
Malthaner, Frank J. (See Don, William, assignor.)
Marchant, Agénor, jr., Fourmies, France. Automatic device with limited feed for the supply of internal-combustion engines. 1 572,737; Feb. 9.
Marcus, Charles L., New York, N. Y. Perfume container. Des. 69,403; Feb. 9.
Marlin Firearms Corporation, The. (See Swebilius, Carl G., assignor.)
Maroger, Samuel, Nimes, France. Rotary pump for liquids or gases. 1,572,738; Feb. 9.
Marrett, Alexander, Los Angeles, Calif. Traffic signal for motor vehicles. 1,572,442; Feb. 9.
Marsden John E., Philadelphia, Pa. Soldering iron. 1,572,666; Feb. 9.

Marsh, Henry S., and R. S. Cochran, assignors to American Copperas Company, Youngstown, Ohio. Pickling. 1,572,155; Feb. 9.
Marx, Leo P., Le Mars, Iowa. Snowplow. 1,572,026; Feb. 9.
Massingham, Claude W. (See Parker, E. A., and Massingham.)
Matheson, Andrew A., Shoshoni, Wyo., assignor to A. A. Matheson, Denver, Colo., A. C. Allen, Riverton, and E. Merriam, Moneto, Wyo., trustees of The Matheson Beet Harvester Syndicate. Beet topper. 1,572,490; Feb. 9.
Mathwig, Albert L., South Sioux City, Nebr. Valve lifter. 1,572,402; Feb. 9.
Mattern, Curtis R., Tower City, Pa. Cement-bag cleaner. 1,572,739; Feb. 9.
Mattice, Royal, Bethlehem, Pa. Method of and apparatus for electric welding. 1,572,740; Feb. 9.
Mattison, Ruth E., Montello, Wis. Convertible flowerpot and hanging basket. 1,572,548; Feb. 9.
Max, Mary R., Pittsburgh, Pa. Heating device. 1,572,300; Feb. 9.
May, Adam J., assignor to Ritter Dental Manufacturing Company, Rochester, N. Y. Supporting fixture. 1,572,215; Feb. 9.
Maytag Company, The. (See Dremel, Albert J., assignor.)
McCammack, Charles, Quincy, Ind. Stretcher. 1 572,732; Feb. 9.
McCann, Ronald A., assignor to The Union Switch & Signal Company, Swissvale, Pa. Railway-traffic-controlling apparatus. 1,572,545; Feb. 9.
McCarter, Harold A., Los Angeles, Calif. Cursor shifter for slide rules. 1,572,497; Feb. 9.
McCartney, Will C., assignor to The Cambridge Glass Company, Cambridge, Ohio. Glass goblet or similar article. Des. 69,404; Feb. 9.
McCartney, Will C., assignor to The Cambridge Glass Company, Cambridge, Ohio. Glass goblet or similar article. Des. 69,405; Feb. 9.
McClatchie, Stanley, Cambridge, Mass., assignor to Benjamin Electric Manufacturing Company, Chicago, Ill. Attachment plug. 1,572,119; Feb. 9.
McClay, Gordon F., and H. V. Haight Sherbrooke, Quebec, Canada, assignors to Ingersoll-Rand Company, Jersey City, N. J. Paper-making machine. 1,572,498; Feb. 9.
McConoughey, Oscar H., San Francisco, Calif. Hair-cutting comb and razor guard. 1,572,154; Feb. 9.
McCormick, Charles H. (See Rose, Ernest M. assignor.)
McCourt, Patrick H., St. Louis, Mo. Spectacles. 1,572,733; Feb. 9.
McCoy, Charles F. (See Cunningham, James E., assignor.)
McCrory, Lee, et al. (See Baker, George, assignor.)
McDermott, James H., Hartford, Conn. Fabric-measuring device. 1,572,734; Feb. 9.
McDonald, Charles D., Los Angeles, Calif. Mattress support for foldable beds and the like. 1,572,241; Feb. 9.
McDuffee, William T., Pensacola, Fla. Automatically-operated safety gates. 1,572,665; Feb. 9.
McEntire, Fred W., Salt Lake City, Utah. Centrifugal separator. 1,572,290; Feb. 9.
McEwing, Luther B., and G. S. Clayton, Chicago, Ill. Road-surface signal lamp. 1,572,214; Feb. 9.
McGrath, Patrick J., Brooklyn, N. Y. Game apparatus. 1,572,401; Feb. 9.
McKeefe, Edward P. (See Bradley, L., and McKeefe.)
McKeown, Samuel C., assignor to Splitdorf Electrical Company, Newark, N. J. Resetting device. 1,572,240; Feb. 9.
McKenney, Emerson, Newport, Me. Pruner. 1,572,546; Feb. 9.
McKune, Frank B., Hamilton, Ontario, Canada. Tapping trough, slag sweeper or skimmer. 1,572,864; Feb. 9.
McKune, Frank B., Hamilton, Ontario, Canada. Method of and mold and appliance for the continuous transfer of molten metal. 1,572,865; Feb. 9.
McKune, Frank B., Hamilton, Ontario, Canada. Transfer spout. 1,572,866; Feb. 9.
McLaughlin, William, Los Angeles, Calif. Beverage cooler and dispenser. 1,572,242; Feb. 9.
McMahon, Edward, et al. (See Jackson, Maunsell B., assignor.)
McMyler-Interstate Company, The. (See Kaltenbach, Robert W., assignor.)
McNeil, Charles, Glasgow, Scotland. Spring-relieving gear for rolls of sugar-cane mills, metal-rolling mills, and the like. 1,572,735; Feb. 9.
McPhail, Duncan S., Detroit, Mich., and J. E. Pastorius, Kingsville, Ontario, Canada. Roller bearing. 1,572,736; Feb. 9.
Mead, Harry J Philadelphia, Pa. Lining for transmission and brake bands. 1,572,301; Feb. 9.
Meehan, Emma V., Washington, D. C. Weaving frame. 1,572,549; Feb. 9.
Meem, James C., assignor of one-half to F. L. Cranford, Brooklyn, N. Y. Tunnel and method of building and submerging. 1,572,741; Feb. 9.
Meerwein, Hans, Konigsberg, Germany, assignor to Farbenfabriken vorm. Friedr. Bayer and Co., Leverkusen, near Cologne-on-the-Rhine, Germany. Production of alcohols from halogenated aldehydes. 1,572,742; Feb. 9.
Mellinger, Charles, Akron, Ohio. Paddle stitcher. 1,572,216; Feb. 9.
Menczer, Samuel A., Fort Worth, Tex. Window casing. 1,572,217; Feb. 9.
Merco Nordstrom Valve Company. (See Nordstrom, Sven J., assignor.)
Meredith, Ray S., Columbia City, Ind. Portable candy tray. 1,572,743; Feb. 9.
Merica, Paul D., assignor to The International Nickel Company, New York N. Y. Nickel alloy and making the same. 1,572,744; Feb. 9.
Meronek, Anthony F., Polonia, Wis. Manually-operated mechanism for operating and securing swinging doors. 1,572,302; Feb. 9.
Merriam, Edward, et al., trustees. (See Matheson, Andrew A., assignor.)
Merrow, Joseph M., assignor to The Merrow Machine Company, Hartford, Conn. Shell-stitch machine. 1,572,550; Feb. 9.
Merrow Machine Company, The. (See Merrow, Joseph M., assignor.)
Mershon, Ralph D., New York, N. Y. Electrolytic apparatus and operating same. 1,572,403; Feb. 9.
Mershon, Ralph D., New York, N. Y. Protecting condenser parts against corrosion. 1,572,404; Feb. 9.
Mersom, Joseph J., Tacoma, Wash. Electric hair curler. 1,572,551; Feb. 9.
Meunier, Charles, Great Neck, N. Y. Gutter hanger. 1,572,745; Feb. 9.
Meyer, Emil H., Saratoga, Tex. Wire-winding machine. 1,572,067; Feb. 9.
Meyer, Fred, Pekin, Ill. Door opening and closing device. 1,572,218; Feb. 9.
Meyers, William A., Chicago, Ill. Hair waver. 1,572,027; Feb. 9.
Michelin, André J., Paris, France. Compressible safety ring for pneumatic tires. 1,572,746; Feb. 9.
Michelman, Joseph, Boston, Mass. Obtaining pyrrol, pyrrol derivatives, and pyrocoll from animal waste. 1,572,552; Feb. 9.
Middlemiss, Austin O. (See Watson, L., and Middlemiss.)
Miehle Printing Press & Manufacturing Company. (See Elder, Samuel, assignor.)
Mill Devices Company. (See Byrd, Britton E., assignor.)
Miller & Goldsmith. (See Goldsmith, Elmer P., assignor.)
Miller, Henry C. (See Winders, William D., assignor.)
Miller, Henry C., Milwaukee, Wis. Loose-leaf binder. 1,572,553; Feb. 9.
Millspaugh, William H., assignor to The Paper & Textile Machinery Co., Sandusky, Ohio. Forming internal keys on tubes. 1,572,303; Feb. 9.
Milner, Charles E., assignor to Benton & Stone Limited, Birmingham, England. Coupling or connecting device for lubricating apparatus and for like purposes. 1,572,554; Feb. 9.
Minahan, Patrick R., Green Bay, Wis. Heater for automobiles. 1,572,747; Feb. 9.
Miscampbell, Hugh, Duluth, Minn. Limekiln. 1,572,156; Feb. 9.
Mitchell, Joseph S., Chicago, Ill., assignor to Sullivan Machinery Company. Method and apparatus for pressure-testing drill-hole casing. 1,572,748; Feb. 9.
Mohnkern, Ruel E., Oil City, Pa. Elevator of the rigid-yoke type. 1,572,616; Feb. 9.
Moline Implement Company. (See Bechtelheimer, Harry A., assignor.)
Molinelli, John H., West Pittston, Pa. Surgical instrument. 1,571,956; Feb. 9.
Mollengarden, Samuel, assignor to Royal Importing Co., New York, N. Y. Bead wire. 1,572,749; Feb. 9.
Moon, Edward W., Youngstown, N. Y. Combined fixture support and loom fastener. 1,571,957; Feb. 9.
Montgomery, Ward & Co. (See Knapp, Leland G., assignor.)
Moore Pen Company, The. (See Hall, James W., assignor.)
Moran, John M., Seattle, Wash. Radiator shield. 1,572,405; Feb. 9.
Morey, Virgil W., New York, N. Y. Engine. 1,572,500; Feb. 9.
Morehouse, Herbert A., Hastings, Mich. Fencepost. 1,572,668; Feb. 9.
Moreno, Joseph, assignor of one-half to A. Mallner, Los Angeles, Calif. Center support. 1,572,072; Feb. 9.
Morgan, Benjamin H., London, England. Fuel for internal-combustion engines. 1,572,750; Feb. 9.
Morrell, Michael, Brooklyn, assignor to L. Malina, New York, N. Y. Yarn winding. 1,572,157; Feb. 9.
Morris, Edward K., Baltimore, Md. Collapsible folding box. 1,572,406; Feb. 9.
Morton, William B., Beatrice, Nebr. Oilcloth fixture. 1,572,304; Feb. 9.
Motor Safety Indicator, Inc. (See Jackson, Maxey, assignor.)
Motorn Holding Company. (See Cramer, Stanley S., assignor.)
Muchnic, Henry E., Atchison, Kans. Piston and ring construction. 1,572,443; Feb. 9.
Mudd, Garrett W., Chicago, Ill. Machine for turning and stacking the ends of cans. 1,572,219; Feb. 9.
Mudd, Garrett W., Chicago, Ill. Interlacing machine. 1,572,220; Feb. 9.

Mueller, Adolph, trustee. (See Mueller, R. H., and Hathaway, assignors.)
Mueller, Charles P., Wichita, Kans. Combination vase and display rack. 1,572,444; Feb. 9.
Mueller, Max, St. Louis, Mo., assignor to Los Angeles Pressed Brick Company, Los Angeles, Calif. Shaping and trimming attachment for tile-forming machines. 1,572,028; Feb. 9.
Mueller, Robert H., and C. W. Hathaway, assignors to A. Mueller, Decatur, Ill., trustee. Air-operated testing device. 1,571,958; Feb. 9.
Mueller, Robert H., and C. W. Hathaway, assignors to A. Mueller, Decatur, Ill., trustee. Air-operated testing device. 1,572,158; Feb. 9.
Müller, Karl, Detroit, Mich. Reenforced-concrete post. 1,572,669; Feb. 9.
Mulligan, Adele, New York, N. Y. Surgical-instrument support. 1,571,959; Feb. 9.
Mulroney, John E., Chicago, Ill. Paper-cutting machine. 1,572,617; Feb. 9.
Munroe, Trendway B. (See Lathrop, E. C., and Munroe.)
Murphy, Charles P., Cleveland, Ohio. Bolt adapter for lubricating purposes. 1,572,073; Feb. 9.
Mutscher, August E. (See Hubbard, R. C., and Mutscher.)
Myers, Ralph E., East Orange, N. J., assignor to Westinghouse Lamp Company. Incandescent lamp. 1,572,670; Feb. 9.
Myers, Roy A., St. Paul, Minn. Map holder and magnifier. 1,572,671; Feb. 9.
Nakamura, Mitsutaro, Chico, Calif. Figure wheeled toy. 1 572 751; Feb. 9.
Napier Co., The. (See Schuelke, E., and Ross, assignors.)
Nathan, Edwin B., Yonkers, N. Y. Seat cover. 1,572,407; Feb. 9.
National Automatic Tool Company, The. (See Galloway, R. M., and Sudhoff, assignors.)
National Carbon Company. (See Hinckley, Arthur T., assignor.)
National Cash Register Company, The. (See Von Pein, Edward J., assignor.)
National Regulator Company. (See Larson, John M., assignor.)
Needham, John C., assignor to himself and Eversheds & Vignoles, Limited, Chiswick, London, England. Electrical means for indicating at a distance the motion of an apparatus. 1,571,960; Feb. 9.
Nelson, Anders P., Spencer, Iowa. Block-molding machine. 1,572,305; Feb. 9.
Nelson, Fred N., assignor to Safety Boat Co., Seattle, Wash. Boat. 1,572,074; Feb. 9.
Nelson, Gus, Douglas, Ariz. Mounting for conveyer belts. 1,572,555; Feb. 9.
Nelson, Hans P., and G. Davies, assignors of one-third to G. E. Cook, Seattle, Wash. Vehicle body. 1,572,029; Feb. 9.
Nevins, Thomas A., assignor, by mesne assignments, to Hercules Match Corporation, New York, N. Y. Match-making machine. 1,571,961; Feb. 9.
Newman, Morris S. (See Lacks, W., and Newman.)
Newman, Paul A., Germantown, Pa., assignor to Western Electric Company, Incorporated, New York, N. Y. Interrupter. 1,572,673; Feb. 9.
Newmann, John, Brooklyn, N. Y. Engine crank shaft. 1,572 672; Feb. 9.
Newport News Shipbuilding & Dry Dock Company. (See Heard, E. F., and Fitzhugh, assignors.)
Newton, Harold H., Claremont, Calif. Bottle carrier. 1,572,243; Feb. 9.
Nichols, Clifford R., Dallas, Tex. Portable plastic-ware-making machine. 1,572,445; Feb. 9.
Nickels Frank H. (See Painter, William G., assignor.)
Nies, William L. (See Reichel, H., and Nies.)
Nolan, Harry L., Maplewood, Mo. Pump for oil wells. 1,572,618; Feb. 9.
Nordstrom, Sven J., assignor to Merco Nordstrom Valve Company, San Francisco, Calif. Valve. 1,572,030; Feb. 9.
North, George H., Kansas City, Mo. Valve-reseating tool. 1,572,752; Feb. 9.
Northcutt, Florence, Caldwell, Kans. Churn. 1,572,306; Feb. 9.
Northwest Engineering Company. (See Burke, Paul, assignor.)
Norton, Charles H., Brooklyn, N. Y. Spring for wind instruments. 1,572,675; Feb. 9.
Norton Charles L., Boston, Mass. Sanding apparatus for molding machines. 1,572,674; Feb. 9.
Norton, Clayton A. (See Lippert, Aloysius C., assignor.)
Nottingham, William D., Fowlerton, Ind. Device for holding pigs and like animals. 1,572,307; Feb. 9.
Nowosielski, Edward B., Bloomfield, N. J., assignor to Splitdorf Electrical Company Newark, N. J. Condenser. 1,572,244; Feb. 9.
Nutter, Lysle H., Hamburg, Ark. Display cabinet. 1,572,753; Feb. 9.
Nyberg, John G., assignor to Dolan & Bullock, Providence, R. I. Cuff button. 1,572,619; Feb. 9.
Nystrom, Martin, Chicago, Ill., assignor to The Brunswick-Balke-Collender Company, Wilmington, Del. Cabinet for a sound-reproducing machine. Des. 69,406; Feb. 9.
Nystrom, Martin, Chicago, Ill., assignor to The Brunswick-Balke-Collender Company, Wilmington, Del. Cabinet for a sound-reproducing machine. Des. 69,407; Feb. 9.
Nystrom, Martin, Chicago, Ill., assignor to The Brunswick-Balke-Collender Company, Wilmington, Del. Cabinet for a sound-reproducing machine. Des. 69,408; Feb. 9.
Oakley, Frederick T., Pawling, N. Y. Rocking-horse. 1,572,620; Feb. 9.
O'Brien, Jermiah D., Darwin, Minn. Tension gauge for checkrow wires. 1,572,408; Feb. 9.
O'Connell, Joseph, and H. H. Kerr, Kensington Australis. Pasteurizer for cream, milk, or other liquids or semiliquids. 1,572,031; Feb. 9.
Oldham, Frank, Dallas, Tex. Smoking figure. 1,572,409; Feb. 9.
O'Neil, Jeremiah, Oneida, N. Y., assignor, by mesne assignments, to Animal Trap Company of America. Lititz, Pa. Animal trap. 1,572,358; Feb. 9.
Olofson, Carl F. E. (See Lindstrom, N. O., and Olofson.)
Oliver, Albert L., assignor to California Cap Company, Oakland, Calif. Electric blasting cap. 1,572,676; Feb. 9.
Oliver, Omer D., Gary, Ind. Switch stand. 1,572,754; Feb. 9.
Ostrander, Stanley J. (See Unruh, Albert E., assignor.)
Oswald, Alfred E., Bogota, N. J., assignor to Underwood Typewriter Company, New York, N. Y. Exhibition device. 1,572,501; Feb. 9.
Ott, Earl M., Cleveland, Ohio. Clothesline holder. 1,572,755; Feb. 9.
Ottenheimer, Reuben E., Baltimore, Md. Refrigerated case. 1,572,855; Feb. 9.
Overton, William H., Chicago, Ill. Liquid-fuel burner. 1,571,962; Feb. 9.
Owen, William A., Salisbury, N. C. Grate. 1,572,308; Feb. 9.
Owens, Freeman H., New York, N. Y. Motion-picture machine. 1,572,863; Feb. 9.
Pacific R. & H. Chemical Corporation, The. (See Walker, Mark, assignor.)
Pacz, Aladar, Cleveland, Ohio, assignor, by mesne assignments, to Aluminum Company of America. Aluminum alloy. 1,572,502; Feb. 9.
Pacz, Aladar, Cleveland Heights, Ohio, assignor, by mesne assignments, to Aluminum Company of America. Composition of matter. 1,572,503; Feb. 9.
Padden, Patrick W., Toledo, Ohio. Antiglare attachment. 1,571,963; Feb. 9.
Page, Louis A., Providence, R. I. Fishing reel. 1,572,032; Feb. 9.
Paine, Howard S., Chevy Chase, Md., C. F. Walton, jr., Washington, D. C., and V. Birckner, Oxon Hill, Md., dedicated, by mesne assignments, to the citizens of the United States of America. Cane-sugar production. 1,572,359; Feb. 9.
Paine, John A., Richmond, Va. Cane harvester. 1,572,410; Feb. 9.
Painter, William G., assignor of one-half to F. H. Nickels, Big Stone Gap, Va. Syringe aspirator. 1,572,075; Feb. 9.
Paper & Textile Machinery Co., The. (See Millspaugh, William H., assignor.)
Parker, Alonzo B., Sylacauga, Ala. Fire hydrant. 1,572,033; Feb. 9.
Parker, Earl A., and C. W. Massingham, Poplar Bluff, Mo. Flying machine. 1,572,120; Feb. 9.
Parker, Howard, assignor to Brown Company, Berlin, N. H. Suction apparatus. 1,572,847; Feb. 9.
Parker, Hubbard, deceased, Chicago, Ill.; J. C. Parker, executrix. Journal-box bearing. 1,572,121; Feb. 9.
Parker, Jennie C., executrix. (See Parker, Hubbard.)
Parker, Nihl L. (See Frampton, John A., assignor.)
Parker, Russell H., Benton County, Oreg. Ignition-circuit switch. 1,572,446; Feb. 9.
Parkersburg Rig & Reel Company, The. (See Schwemlein, William, assignor.)
Pastorius, James E. (See McPhail, D. S., and Pastorius.)
Paterson, William, London, England. Filtering apparatus. 1,572,076; Feb. 9.
Pathe Cinema, Anciens Etablissements Pathe Freres. (See Gaurint, Pierre S., assignor.)
Patterson, Alexander P., et al. (See Secord, Frederick A., assignor.)
Paulson, Walter H. (See Lathrop, H. D., and Paulson.)
Peale, Rembrandt. (See Peale, Richard, assignor.)
Peale, Richard, assignor to Rembrandt Peale, St. Benedict, Pa. Mining machine. 1,572,556; Feb. 9.
Pearson, William H., and T. J. Kelly, Passaic, N. J., assignors to Brighton Mills. Machine for uniting threads or cords. 1,572,655; Feb. 9.
Pehrson, Adam H., Berg Granbergsdal, Sweden, assignor of one-half to A. P. Pehrson, Kincraig, England. Rotary furnace. 1,572,805; Feb. 9.
Pehrson, Alfred P. (See Pehrson, Adam H., assignor.)
People of the United States, The. (See Smith, L. B., Richmond, and van der Meulen, assignors.)
Perlesz, Hugo, Chicago, Ill., assignor, by mesne assignments, to Zenith Radio Corporation. Mounting for thermionic valves. 1,571,964; Feb. 9.
Perlesz, Hugo, Chicago, Ill., assignor, by mesne assignments, to Zenith Radio Corporation. Electrostatic condenser. 1,572,504; Feb. 9.

Peters, Arthur E., Littleton, Colo., assignor to Ingersoll-Rand Company, Jersey City, N. J. Clutch mechanism for hoist control. 1,572,557; Feb. 9.
Peters, Carl, Sherburn, Minn. Door lock. 1,572,677; Feb. 9.
Peters, Charles H., et al. (See Secord, Frederick A., assignor.)
Peters, Henry. (See Peterson, J., and Peters.)
Petersen, Edward T. (See Foley, William S., assignor.)
Petersen, William H., assignor to Albert Pick & Company, Chicago, Ill. Coffee urn. 1,572,221; Feb. 9.
Peterson, John, and H. Peters, Winamac, Ind. Wheel attachment. 1,572,806; Feb. 9.
Petersson, Ernfrid J., Stockholm, Sweden. Variable power-transmission gears between rotary shafts. 1,572,360; Feb. 9.
Peverley, Ralph St. L., assignor, by mesne assignments, to Structural Gypsum Corporation, New York, N. Y. Building construction. 1,572,078; Feb. 9.
Pick, Albert & Company. (See Peterson, William H., assignor.)
Pick, Rudolph J., jr., Chicago, Ill. Aeroplane brake. 1,572,361; Feb. 9.
Pierce Petroleum Corporation. (See Wadsworth, James M., assignor.)
Pietrie, Joseph, Chicago, Ill. Padlock. 1,572,122; Feb. 9.
Pisenti, John, et al. (See Allec, Henry, assignor.)
Pittsburgh Plate Glass Company. (See Clause, Robert L., assignor.)
Pittsburgh Plate Glass Company. (See Hitchcock, Halbert K., assignor.)
Pittsburgh Plate Glass Company. (See Schneider, Frederick W., assignor.)
Pittsburgh Plate Glass Company. (See Taylor, William H., assignor.)
Platt, Clarence D., Bridgeport, Conn. Electric ground-plug. 1,572,079; Feb. 9.
Plisic, Bartol, Whitehall, Mont. Making butter. 1,572,123; Feb. 9.
Pointon, John E., London, England, assignor to Baker-Perkins Company Incorporated, White Plains, N. Y. Dough-molding machine. 1,572,080; Feb. 9.
Pokorny, Adolph, St. Paul, Minn. Stenciling apparatus. 1,572,081; Feb. 9.
Polson, William F., Buffalo, N. Y. Automobile hood fastener. 1,571,965; Feb. 9.
Pordon, Marino E., Alameda, Calif. Device for preventing loss of liquid by leakage from a valve. 1,572,678; Feb. 9.
Porter, Rudyard, and J. C. Whetzel, assignors to American Sheet and Tin Plate Company, Pittsburgh, Pa. Removal of oxids from ferrous metal. 1,572,848; Feb. 9.
Powell, Albert C., assignor to Western Electric Company, Incorporated, New York, N. Y. Telephone-exchange system. 1,572,679; Feb. 9.
Powell, Winfred T., assignor to The Stromberg-Carlson Telephone Manufacturing Company, Rochester, N. Y. Telephone-switching system. 1,572,222; Feb. 9.
Powell, Winfred T., assignor to The Stromberg-Carlson Telephone Manufacturing Company, Rochester, N. Y. Automatic telephone system. 1,572,223; Feb. 9.
Powell, Winfred T., assignor to The Stromberg-Carlson Telephone Manufacturing Company, Rochester, N. Y. Long-distance telephone system. 1,572,224; Feb. 9.
Power, Robert E., Los Angeles, Calif. Lip-stick holder. Des. 69,409; Feb. 9.
Powers Accounting Machine Corporation. (See Lasker, William W., assignor.)
Preisser, George A., Denver, Colo. Air intake. 1,572,558; Feb. 9.
Prest-O-Lite Company, The. (See Benner, Raymond C., assignor.)
Presto-O-Lite Company. (See Weir, Helen G., assignor.)
Price, Archie P., Covington, Ind. Gasoline gauge. 1,572,807; Feb. 9.
Price, Jacob L., assignor to Bendix Brake Company, Chicago, Ill. Brake backing plate. 1,572,680; Feb. 9.
Proctor and Schwartz, Incorporated. (See Ayres, E. B., and Hurxthal, assignors.)
Proctor and Schwartz, Incorporated. (See Ayres, Elwood B., assignor.)
Providence Stock Company. (See Harrison, George D., assignor.)
Purnell, Enoch, et al. (See Purnell, Lemuel H., assignor.)
Purnell, John H. (See Simons, P. W., Purnell, and Carr.)
Purnell, Lemuel H., Chicago, assignor of one-half to H. G. Goelitz and one-half to E. Purnell, Oak Park, Ill. Machine for making pipe elbows. 1,572,559; Feb. 9.
Quinn, Cornelius J., Winfield Junction, N. Y. Steam purifier and drier. 1,572,245; Feb. 9.
Quisling, Sverre, Madison, Wis. Closure for containers. 1,572,808; Feb. 9.
Race, Arthur L., Boston, assignor of one-half to W. M. Kimball, Northampton, Mass. Door handle. 1,572,034; Feb. 9.
Ramge, William, assignor to Simon W. Farber, Inc., Brooklyn, N. Y. Teapot cover. 1,572,082; Feb. 9.
Rand, James H., jr., Tonawanda, N. Y. Card-index device. 1,572,035; Feb. 9.
Rapisardi, Alfio, Boston, Mass. Brush. 1,572,362; Feb. 9.
Rappaport, Jacob A., assignor to Reliance Fireproof Door Company, Brooklyn, N. Y. Sill for windows and the like. 1,572,309; Feb. 9.
Rarick, John J., Utica, N. Y. Machine for recharging magnetos and batteries. 1,572,560; Feb. 9.
Rarig, Walter A., Oakland, Calif. Oiling device. 1,572,681; Feb. 2.
Rasmussen, Chester A. (See Trout, W. A., and Butler, assignors.)
Ratcliff, Charles F., North Finchley, London, and D. Macadie, Palmer's Green, London, England. Machine for sorting documents. 1,572,809; Feb. 9.
Raube, William C., Schenectady, N. Y., assignor to General Electric Company. Motor-control system. 1,572,682; Feb. 9.
Ray, Arthur J., assignor, by mesne assignments, to Automatic Electric Inc., Chicago, Ill. Telephone trunk circuit. 1,571,966; Feb. 9.
Ray, Thomas, Siegas, New Brunswick, Canada. Rail jack. 1,572,810; Feb. 9.
Rayfield, Charles L., assignor to Beneke Manufacturing Company, Chicago, Ill. Carburetor. 1,572,036; Feb. 9.
Rayfield, Charles L., assignor to Beneke Manufacturing Company, Chicago, Ill. Carburetor. 1,572,037; Feb. 9.
Raymond, John D., Detroit, Mich. Screw-cap retainer and guide. 1,572,505; Feb. 9.
Re, Enrico, Camden, N. J. Tire-filling apparatus. 1,572,811; Feb. 9.
Read, Harry S., Ithaca, assignor to Western Electric Company, Incorporated, New York, N. Y. Amplifier circuits. 1,572,083; Feb. 9.
Red Cross Manufacturing Co., The. Bartlemay, Arlie, assignor.)
Rees, Edmund S. G., Wolverhampton, England. Propulsion and maneuvering of ships and aircraft. 1,572,812; Feb. 9.
Reeves, Samuel V., Haddonfield, N. J. Combination hot-water stove. 1,572,683; Feb. 9.
Regan Safety Devices Company, The. (See Shaver, A. G., and Kendall, assignors.)
Regar, Howard S., Norristown, Pa. Knitted hosiery. 1,572,084; Feb. 9.
Regnault, Henri. (See Chevalier, J. M. A., Bourcet, and Regnault.)
Reichel, Hugo, and W. L. Nies, Chicago, Ill. Ice-cream cutter. 1,572,363; Feb. 9.
Reinheimer, Harry S., Lehighton, Pa. Antiglare shield. 1,572,038; Feb. 9.
Reliance Fireproof Door Company. (See Rappaport, Jacob A., assignor.)
Renne, Ulysses S., Fort Calhoun, Nebr. Controlling rein. 1,572,506; Feb. 9.
Reynolds, George W. (See Smith, Henry L., assignor.)
Reynolds, Joseph S. (See Rhodes, John A., assignor.)
Reyrolle, A., & Company, Limited. (See Secretan, Harold F., assignor.)
Rex Manufacturing Company. (See Hull, Matthew R., assignor.)
Rhodes, John A., assignor of one-half to J. S. Reynolds, Atlanta, Ga. Powder sprayer. 1,572,684; Feb. 9.
Richard, Mark R., assignor to C. J. Dorrance, Chicago, Ill. Electrical apparatus. 1,572,039; Feb. 9.
Richardson Company, The. (See Fisher, Harry C., assignor.)
Richmond, Edward A. (See Smith, L. B., Richmond, and van der Meulen.)
Ricks, Fred. (See Roberts, W. T. B., and Ricks.)
Riddell, William A., assignor to Eastman Kodak Company, Rochester, N. Y. Shutter for panoramic cameras. 1,572,246; Feb. 9.
Rioux, Alfred C., Claresholm, Alberta, Canada. Oil-supply-indicating device for automobile engines. 1,572,310; Feb. 9.
Risden, Charles W., Hollywood, Calif. Valve. 1,572,085; Feb. 9.
Rist, Edward T., Oelwein, Iowa. Boiler furnace. 1,572,086; Feb. 9.
Ritter Dental Manufacturing Company. (See May, Adam J., assignor.)
Ritz Woller, Oliver C., Chicago, Ill. Combined light and license-plate holder. Des. 69,410; Feb. 9.
Ritz Woller, Oliver C., Chicago, Ill. Automobile signal lamp. Des. 69,411; Feb. 9.
Robbins, William H., Springfield, assignor to The Williams Company, London, Ohio. Steel-wool machine. 1,572,160; Feb. 9.
Robert, Florent E., assignor to Stewart-Warner Speedometer Corporation, Chicago, Ill. Air valve for fuel-mixture conduits. 1,572,507; Feb. 9.
Roberts, John Q. (See Colley, George F., assignor.)
Roberts, Louie D. (See Baldridge, A. G., and Roberts.)
Roberts Printing Company, The. (See Koehrman, Mathias G., assignor.)
Roberts, William T. B., and F. Ricks, Leicester, England, assignors to United Shoe Machinery Corporation, Paterson, N. J. Stamping mechanism for evening and grading machines. 1,571,967; Feb. 9.
Roby, Harry L., Barnesville, Ohio. Cigar-making machinery. 1,571,968; Feb. 9.
Rockgas Products Company. (See Kerr, Arthur N., assignor.)
Rockwell, Byrd C., St. Joseph, Mo. Manufacturing veneered lumber. 1,572,247; Feb. 9.

Rockwood Sprinkler Company of Massachusetts. (See Carlson, Hjalmar G., assignor.)
Roehmholdt, Paul L., assignor to Irving Engineering Sales Company, Buffalo, N. Y. Locking device for slidable rods. 1,572,087; Feb. 9.
Roettges, Frederick, assignor to H. Hilfman, New York, N. Y. Chandelier or the like. Des. 69,412; Feb. 9.
Rogers, John F., Cleveland Heights, assignor to The Wellman-Seaver-Morgan Company, Cleveland, Ohio. Gas producer. 1,572,040; Feb. 9.
Rogers, John F., Cleveland Heights, assignor to The Wellman-Seaver-Morgan Company, Cleveland, Ohio. Gas producer. 1,572,041; Feb. 9.
Romerill, Frederick W., Raymond, Alberta, Canada. Auxiliary air inlet. 1,572,311; Feb. 9.
Rose, Ernest M., assignor of one-half to C. H. McCormick, Dulce, N. Mex. Nailing frame. 1,572,364; Feb. 9.
Rose, George F., Hyndsville, N. Y. Typewriter construction. 1,572,159; Feb. 9.
Rose, Richard C., Osceola, Ark. Automobile four-wheel drive. 1,572,561; Feb. 9.
Rosenbaum, Norbert, New York, N. Y. Slipper. Des. 69,413; Feb. 9.
Rosenthal, Morris G., assignor of one-half to F. E. Klein, Cincinnati, Ohio. Tag-mounting machine. 1,572,813; Feb. 9.
Ross, Julius. (See Schuelke, E., and Ross.)
Rotter, Max, Milwaukee, Wis., assignor to Busch-Sulzer Bros.-Diesel Engine Company, St. Louis, Mo. Internal-combustion engine. 1,572,365; Feb. 9.
Royal Importing Co. (See Mollengarden, Samuel, assignor.)
Ruess, Royce A. (See Halsey, Edward S., assignor.)
Ruprecht, Charles C., Orlando, Fla. Combined irrigating and frost-protecting system. 1,571,969; Feb. 9.
Russell, Thomas C., Chicago, Ill. Hair-straightening iron. 1,572,161; Feb. 9.
Ryan Car Company, The. (See Jackson, John A., assignor.)
Ryan, William J., Gary, Ind. Transmission. 1,572,312; Feb. 9.
Ryther, George D., assignor to Ryther & Pringle Co., Carthage, N. Y. Material-shredding machine. 1,572,366; Feb. 9.
Ryther & Pringle Co. (See Ryther, George D., assignor.)
Sabell, Augusta A., administratrix. (See Sabell, Charles.)
Sabell, Charles, deceased, Jersey City, N. J.; Augusta A. Sabell, administratrix. Pea-shelling machine. 1,572,867; Feb. 9.
Safety Boat Co. (See Nelson, Fred N., assignor.)
Safion, Herman A., New York, N. Y. Lighting-fixture canopy. Des. 69,414; Feb. 9.
Safion, Herman A., New York, N. Y. Lighting-fixture plate. Des. 69,415; Feb. 9.
Sanderson, Frank M., Swampscott, Mass., assignor to General Electric Company. Tapping machine. 1,572,685; Feb. 9.
Sanderson, Howard, Baldwin, N. Y., assignor to E. David, New York, N. Y. Fertilizer. 1,571,970; Feb. 9.
Sarat, Joseph, St. Louis, Mo. Hosiery protector. 1,572,313; Feb. 9.
Sarber, Emery N., Brighouse, Lulu Island, British Columbia, Canada. Direction indicator. 1,572,314; Feb. 9.
Sargent & Company. (See Shaw, John H., assignor.)
Scheinker, Ilja, Vienna, Austria. Duplicating machine. 1,571,971; Feb. 9.
Schellberg, Oscar B., New York, N. Y. Portable apparatus for use in proctotherapy. 1,572,043; Feb. 9.
Schertz, Joseph L., St. Louis, Mo. Combined sink and dish washer. 1,572,686; Feb. 9.
Schettler, Gustav A., Leeds, England, assignor to The Turner Tanning Machinery Company, Peabody, Mass. Tensioning device for endless-belt members. 1,571,972; Feb. 9.
Schmelz, Henry, Willard, N. Y. Automatic regulating device for heating systems. 1,572,687; Feb. 9.
Schmidt, Fred, Chicago, Ill., assignor to Major Engineering Corporation. Internal-combustion engine. 1,572,508; Feb. 9.
Schmidt, Henry F. (See Trotter, H. R., and Schmidt.)
Schmitt, Conrad, Milwaukee, Wis. Illuminating fixture. Des. 69,416; Feb. 9.
Schneider, Frederick W., Baltimore, Md., assignor to Pittsburgh Plate Glass Company. Pneumatic paint-brush. 1,572,509; Feb. 9.
Schneider, Hermann. (See Straub, F., and Schneider.)
Schneiderman, William, New York, N. Y. Detergent composition. 1,572,814; Feb. 9.
Schoeppler, Walter B., New York, N. Y. Three-circuit coupler. 1,572,688; Feb. 9.
Scholl, Edward, assignor to D. W. Griffith, Incorporated, New York, N. Y. Mask set for multiple exposures in moving-picture cameras and process of making same. 1,572,315; Feb. 9.
Scholl, William M., Chicago, Ill. Arch support. 1,572,162; Feb. 9.
Schroeder, Anton, St. Paul, Minn. Candle lighter and snuffer. 1,572,316; Feb. 9.
Schroeder, Walter F., Detroit, Mich. Locating chart for vehicles. 1,572,447; Feb. 9.
Schuelke, Emil, and J. Ross, assignors to The Napier Co., Meriden, Conn. Powder holder. 1,572,562; Feb. 9.
Schulte, Henry J., Anaheim, Calif. Nonskidding device for vehicles. 1,572,689; Feb. 9.

Schultz, Rudolf G., and O. L. Hendren, Columbus, Nebr., deceased; said Schultz assignor to said Hendren; M. Hendren, administratrix. Combined luggage carrier and bumper. 1,572,815; Feb. 9.
Schwarz, Leo, Stendal, Germany. Rotating printing machine. 1,572,044; Feb. 9.
Schweizer, Bernard M., Nashville, Tenn. Comb. 1,572,411; Feb. 9.
Schwemlein, William, assignor to The Parkersburg Rig & Reel Company, Parkersburg, W. Va. Closure member. 1,572,816; Feb. 9.
Scott, Allen C., Omaha, Nebr. Shipping container. 1,572,367; Feb. 9.
Scott, John L., et al. (See Bowles, Wallace, assignor.)
Scott, Philip L., Three Oaks, Mich., assignor to Super Diesel Tractor Corporation, La Porte, Ind. Pump. 1,572,045; Feb. 9.
Scovill Manufacturing Company. (See Bennett, Morris H., assignor.)
Scovill Manufacturing Company. (See Hyde, Burdon P., assignor.)
Sorabic, Carl, Urbana, Ohio. Sound amplifier. 1,572,317; Feb. 9.
Scully, Alexander D., New York, N. Y. Mechanical thigh-corset-locking device for artificial limbs. 1,572,318; Feb. 9.
Scully, Alexander D., New York, N. Y. Mechanical ankle-movement device for artificial limbs. 1,572,319; Feb. 9.
Secord, Frederick A., Portland, Me., assignor of one-third to C. H. Peters and one-third to A. P. Patterson, St. John, New Brunswick. Drying apparatus. 1,572,849; Feb. 9.
Secretan, Harold F., Pelaw-on-Tyne, assignor to A. Reyrolle & Company Limited, Hebburn-on-Tyne, Durham, England. Electric wall plug. 1,572,563; Feb. 9.
See, Alonzo B. (See Lindstrom, N. O., and Olofson, assignors.)
Seelert, Frederick W., Minneapolis, Minn. Piston ring. 1,572,690; Feb. 9.
Seigle, Adolphe A. F. M., Paris, France. Apparatus for transforming and distilling hydrocarbons and the like. 1,572,691; Feb. 9.
Seller, Adam J., Freeport, Ill. Impression-making tool. 1,572,046; Feb. 9.
Seitz, Thomas, Morganville, Kans. Angle bar for railway rails. 1,572,368; Feb. 9.
Semple, Charles E., jr., Youngstown, Ohio. Guard for phonograph reproducers. 1,572,088; Feb. 9.
Shaffer, Glenn A., and F. H. Wirtz, Green Bay, Wis. Machine for interfolding paper. 1,572,817; Feb. 9.
Shaver, Archibald G., Chicago, Ill., and A. B. Kendall, Niagara Falls, assignors to The Regan Safety Devices Company, Inc., New York, N. Y. Train-control system. 1,572,564; Feb. 9.
Shaw, John H., assignor to Sargent & Company, New Haven, Conn. Lock for gear-shift levers and the like. 1,572,320; Feb. 9.
Shaw, John K., Minneapolis, Minn. Making board from bagasse and analogous fibers. 1,572,565; Feb. 9.
Shelton, Harry J., St. Louis, Mo. Grinder and pulverizer. 1,572,692; Feb. 9.
Shephard, Walter S., Balham, London, England. Inductance coil for use in wireless telegraphy and telephony. 1,572,047; Feb. 9.
Shepherd, Harold F., Reno, Nevada. Apparatus for delivering measured charges of fluid. 1,572,163; Feb. 9.
Shepherd, Harold F., assignor to The Kent-Owens Machine Company, Toledo, Ohio. Charge-delivering device for explosive engines. 1,572,164; Feb. 9.
Sheppard, Samuel E., and L. W. Eberlin, assignors to Eastman Kodak Company, Rochester, N. Y. Reducing the viscosity characteristics of nitrocellulose. 1,572,248; Feb. 9.
Sheppard, Samuel E., and L. W. Eberlin, assignors to Eastman Kodak Company, Rochester, N. Y. Reducing the viscosity characteristics of nitrocellulosic materials. 1,572,249; Feb. 9.
Shivell, Homer J., and K. W. Koeniger, Kingsport, Tenn., assignors to Grant Leather Corporation. Leather belt and producing same. 1,571,973; Feb. 9.
Shyrock, Charles, Galena, Kans. Safety device for railway switches. 1,572,089; Feb. 9.
Sidebotham, Melvin H. ((See La Bombard, L. E., and Sidebotham.)
Siegfried, Eugene G., assignor of one-half to A. W. Vogt, Lincoln, Nebr. Manifold heater. 1,572,621; Feb. 9.
Siemens, Friedrich C., Berlin, Germany. Reheating furnace. 1,572,566; Feb. 9.
Siemens & Halske Aktiengesellschaft. (See Horn, Ernst, assignor.)
Siemens & Halske Aktiengesellschaft. (See Horn, E., and Langer, assignors.)
Simons, Philip W., J. H. Purnell, and H. L. Carr, Hastings, Mich.; said Purnell and said Carr assignors to said Simons. Combined harrow and float or clod crushers. 1,571,974; Feb. 9.
Simons, Venning D., Chicago, Ill. Process and apparatus for removing water and air from paper-machine driers. 1,572,448; Feb. 9.
Simplex Heater Company. (See Hall, Albert L., assignor.)
Sinclair, Daniel, assignor to J. J. Sinclair, New York, N. Y. Extension pedal tread. 1,572,369; Feb. 9.
Sinclair, Jessie J. (See Sinclair, Daniel, assignor.)

Skorka, Michael, Budapest, Hungary. Roller skate. 1,572,567; Feb. 9.
Slaiger, Henry, North Attleboro, assignor to D. F. Briggs Company, Attleboro, Mass. Vanity case. 1,572,850; Feb. 9.
Slater, Mabel H., New York, N. Y. Doll's head. 1,572,321; Feb. 9.
Sledge, Henry N., Jersey City, N. J. Lock mechanism. 1,572,449; Feb. 9.
Smith and Dwyer Manufacturing Company. (See Smith, Earl A., assignor.)
Smith, Arthur E., assignor to C. A. Smith, Pittsburg, Kans. Method of and means for preparing medicinal and anaesthetic solutions. 1,572,322; Feb. 9.
Smith, Arthur E., assignor to C. A. Smith, Pittsburg, Kans. Medicinal and anæsthetic package. 1,572 323; Feb. 9.
Smith, Arthur E., assignor to C. A. Smith, Pittsburg, Kans. Medicinal and anæsthetic package. 1,572,324; Feb. 9.
Smith, Charles W. (See Budd, Selden J., assignor.)
Smith Chimes Clock Company, The. (See Smith, George L., assignor.)
Smith, Clarence S., assignor to The Blue Bird Products Company, Kansas City, Mo. Vending machine. 1,572,090; Feb. 9.
Smith, Claude A. (See Smith, Arthur E., assignor.)
Smith, Earl A. (See Dwyer, Daniel I., assignor.)
Smith, Earl A., assignor to Smith and Dwyer Manufacturing Company, Dayton, Ohio. Toy airplane. 1,572,166; Feb. 9.
Smith, Earl G., and A. B. Combs, Portland, Oreg. Valve-facing machine. 1,572,165; Feb. 9.
Smith, Edgar L., Los Angeles, Calif. Auto parking device. 1,572,250; Feb. 9.
Smith, Frank E., Scottdale, Pa. Drive mechanism. 1,572,518; Feb. 9.
Smith, Franklin E. (See Maglathlin, Horace B., assignor.)
Smith, George L., Fort Wayne, Ind., assignor to The Smith Chimes Clock Company. Chimes-striking mechanism. 1,572,167; Feb. 9.
Smith, Harold E., Cleveland Heights, Ohio. Cooking apparatus. 1,572,168; Feb. 9.
Smith, Harry W., Conimicut, R. I., assignor to Whiting & Davis Company. Machine for making link mesh. 1,572,693; Feb. 9.
Smith, Henry I., Gainesville, assignor of one-half to G. W. Reynolds, Rock Glen, N. Y. Automatic clutch control for motor vehicles. 1,572,370; Feb. 9.
Smith, Jasper A. (See Buvinger, G. A., Warner, and Smith.)
Smith, Jesse A. B., Stamford, Conn., assignor to Underwood Typewriter Company, New York, N. Y. Typewriting machine. 1,572,622; Feb. 9.
Smith, Lawrence F., assignor of one-half to W. B. De Coursey, Hazard, Ky. Rerailer. 1,572,092; Feb. 9.
Smith, Loren B., E. A. Richmond, Riverton, and P. A. van der Meulen, New Brunswick, N. J., assignors, by mesne assignments, to the people of the United States. Attractant for insects, particularly for the Japanese beetle. 1,572,568; Feb. 9.
Smith, Ralph H., Brooklyn, N. Y. Extension arm for pulley lines. 1,572,819; Feb. 9.
Smith, Seybert J., Chadwick, Ill. Counter guard. 1,572,091; Feb. 9.
Smith, William A., Detroit, Mich., assignor to Chicago Pneumatic Tool Company, New York, N. Y. Combined throttle and governor for pneumatic tools. 1,572,371; Feb. 9.
Smith, William E., Jackson, Miss. Piston. 1,572,325; Feb. 9.
Smythe, Edwin H., Evanston, Ill., and S. B. Williams, Jr., Brooklyn, N. Y., assignors to Western Electric Company, Incorporated, New York, N. Y. High-frequency-wave signaling and communicating system. 1,572,756; Feb. 9.
Societe Chimique des Usines du Rhone. (See Altwegg, J., and Chermette, assignors.)
Société d'Etudes Chimiques pour l'Industrie. (See Breslauer, J., and Goudet, assignors.)
Societe of Chemical Industry in Basle. (See Straub, F., and Schneider, assignors.)
Société R. Guyot & Cie. (See Guyot, Henri R., assignor.)
Souder, Harvey S. (See Jobson, William P., assignor.)
Spalsbury, Charles B., assignor to Johnson, Stephens & Shinkle Shoe Company, St. Louis, Mo. Making boots and shoes. 1,572,042; Feb. 9.
Speare's, Alden, Sons Co., The. (See Howe, William C., assignor.)
Specialty Automatic Machine Company. (See La Bombard, L. E., and Sidebotham, assignors.)
Speed-O Muitiple Valve Lifter Corporation. (See Wood, Louis M., assignor.)
Spellman, Herbert W. (See Johnson, J. E., and Spellman.)
Spencer, Charley O. (See Spencer, Earnest F. and C. O.)
Spencer, Earnest F. and C. O., Commerce, Okla. Drill-pulling jack. 1,572,048; Feb. 9.
Spencer, Roy G., Seattle, Wash. Toy railway. 1,572,569; Feb. 9.
Spiitdorf Electrical Company. (See McKeown, Samuel C., assignor.)
Splitdorf Electrical Company. (See Nowosielski, Edward B., assignor.)
Sporer, Anton W., Manitowoc, Wis. Adjustable curvature form. 1,572,820; Feb. 9.
Spray, Lester E., Wilkinsburg, Pa., assignor to The Union Switch & Signal Company, Swissvale, Pa. Railway signaling system. 1,572,570; Feb. 9.
Spreen, Charles C., assignor, by mesne assignments, to Kelvinator Corporation, Detroit, Mich. Universal brine-tank support. 1,572,851; Feb. 9.
Staggers, William F., Mannington, W. Va. Antiskid device. 1,572,821; Feb. 9.
Staley, Samuel S., Reading, Pa. Screen for automobile lamps. 1,572,623; Feb. 9.
Standard Varnish Works. (See Beausejour, Reme A., assignor.)
Starr, Frank F., assignor to Delco-Light Company, Dayton, Ohio. Battery-charging system. 1,572,251; Feb. 9.
Stebler, Fred, Riverside, Calif. Bearing. 1,572,093; Feb. 9.
Stedman, Vane M. (See Hazlett, Walter H., assignor.)
Stephenson, Samuel E., Atlanta, Ga. Hydraulic ram. 1,572,822; Feb. 9.
Stephenson, Wilfred H., San Antonio, Tex. Filling device for filling tanks. 1,572,049; Feb. 9.
Stewart-Warner Speedometer Corporation. (See Robert, Florent E., assignor.)
Stewart, William J., Clinton, Iowa. Gate for poultry-feeding batteries. 1,572,050; Feb. 9.
Stierheim, Francis A., Pittsburgh, Pa. Hack-saw frame. 1,572,823; Feb. 9.
Stinnes, Zeche M. (See Weindel, Anton, assignor.)
Stone, Andrew H., Kansas City, Mo. Extension table. 1,572,571; Feb. 9.
Stone, Walter. (See Magor, R. A., and Stone.)
Straight, Halver R., Adel, Iowa. Drier kiln. 1,572,326; Feb. 9.
Straight, Halver R., Adel, Iowa. Continuous kiln. 1,572,327; Feb. 9.
Straka, John, Chicago, Ill. Safety razor. 1,572,572; Feb. 9.
Straub, Fritz, Basel, and H. Schneider, Riehen, near Basel, Switzerland, assignors to the Firm Societe of Chemical Industry in Basle, Basel, Switzerland. Azodyestuffs containing zinc and making same. 1,572,573; Feb. 9.
Stromberg-Carlson Telephone Manufacturing Company, The. (See Powell, Winfred T., assignor.)
Stromborg, Oscar, Los Angeles, Calif. Device for protecting structures against earthquake damage. 1,572,574; Feb. 9.
Structural Gypsum Corporation. (See Peverley, Ralph St. L., assignor.)
Studebaker Corporation, The. (See Woodside, W. P., and Dawe, assignors.)
Sudhoff, Alfred G. (See Galloway, R. M., and Sudhoff.)
Sullivan, Joseph F., New York, N. Y. Motor vehicle. 1,572,051; Feb. 9.
Sullivan Machinery Company. (See Gartin, Elmer G., assignor.)
Sullivan Machinery Company. (See Lee, Frank M., assignor.)
Sullivan Machinery Company. (See Mitchell, Joseph S., assignor.)
Super Diesel Tractor Corporation. (See Scott, Philip L., assignor.)
Swartwout, Everett W., White Plains, N. Y. Steam-engine-valve gear. 1,572,372; Feb. 9.
Swebilius, Carl G., assignor, by mesne assignments, to The Marlin Firearms Corporation, New Haven, Conn. Firearm. 1,571,975; Feb. 9.
Swebilius, Carl G., assignor, by mesne assignments, to The Marlin Firearms Corporation, New Haven, Conn. Automatic rifle. 1,572,450; Feb. 9.
Swett, Charles E., West Roxbury, Mass., assignor to United States Envelope Company, Springfield, Mass. Making transparent paper. 1,571,976; Feb. 9.
Swift & Company. (See Bermond, Lester W., assignor.)
Swift & Company. (See Flinn, Paul A., assignor.)
Taft, George F., et al. (See Gillis, Charles R., assignor.)
Talbot, Howard H., assignor of one-half to L. A. Woodard, Wooster, Ohio. Apparatus for cutting helical bevel teeth. 1,572,624; Feb. 9.
Tatge, John, White City, Kans. Scraper. 1,572,824; Feb. 9.
Taylor Companies. (See Hodgkinson, Edwin, assignor.)
Taylor, George A., Muncie, Ind. Circuit-control means. 1,572,169; Feb. 9.
Taylor, James W., San Antonio, Tex. Pumping apparatus. 1,572 329; Feb. 9.
Taylor, James W., San Antonio, Tex. Pumping apparatus. 1,572,330; Feb. 9.
Taylor, James W., San Antonio, Tex. Pumping apparatus. 1,572,331; Feb. 9.
Taylor, James W., San Antonio, Tex. Pumping apparatus. 1,572,332; Feb. 9.
Taylor, James W., San Antonio, Tex. Pumping apparatus. 1,572,333; Feb. 9.
Taylor, William, Leicester, England. Optical instrument. 1,572 575; Feb. 9.
Taylor, William C., assignor to Corning Glass Works, Corning, N. Y. Glass. 1,572,625; Feb. 9.
Taylor, William H., assignor to E. and T. Fairbanks and Company, St. Johnsbury, Vt. Platform scale. 1 572,328; Feb. 9.

Taylor, William H., Ford City, Pa. assignor to Pittsburgh Plate Glass Company. Apparatus for finishing reflector blanks. 1,572,451; Feb. 9.
Tessier, Julien, assignor to Eastman Kodak Company, Rochester, N. Y. Motion-picture apparatus. 1,572,252; Feb. 9.
Thermal Industrial and Chemical (T. I. C.) Research Company Limited. (See Duckham, Arthur M., assignor.)
Thermo Electric Battery Company. (See Hermann, Otto, assignor.)
Thomas, Adolph A., New York, N. Y. Telephone receiver. 1,572,452; Feb. 9.
Thomas Day Company. (See Kestell, Philip, assignor.)
Thomas, James B., Blairstown, Mo. Transmission. 1,572,576; Feb. 9.
Thomas, James F., Windsor, Ontario, Canada. Power-generating mechanism. 1,572,577; Feb. 9.
Thomas, James F. Montreal, Quebec, Canada. Power-generating mechanism. 1,572,578; Feb. 9.
Thompson, Errol M., assignor to Thompson-Field Company, Inc., Brockton, Mass. Shoe-filler apparatus. 1,572,694; Feb. 9.
Thompson-Field Company. (See Thompson, Errol M., assignor.)
Thompson, George L., Memphis, Tenn. Railway-switch stand. 1,572 579; Feb. 9.
Thompson, Harry. (See Burgess, L. G., and Thompson.)
Tilson, Donald H., Badin, N. C., assignor to Aluminum Company of America, Pittsburgh, Pa. Starting electrolytic cells. 1,572,253; Feb. 9.
Timken Roller Bearing Company, The. (See Vanderbeek, Herbert, assignor.)
Tinker, Frank, Sutton Coldfield, England. Apparatus for the production of gasoline. 1,572,626; Feb. 9.
Todhunter, William H., Picher, Okla. Tool. 1,572,094; Feb. 9.
Toledo Milling Machine Company, The. (See Waite, Lorenzo E., assignor.)
Tornés, Joaquin R., Ada, Ohio. Game. 1,572,254; Feb. 9.
Trotter, Henry R., Swarthmore, and H. F. Schmidt, Lansdowne, Pa., assignors to Westinghouse Electric & Manufacturing Company. Fluid-pressure governor. 1,571,977; Feb. 9.
Trout, William A., and C. R. Butler, assignors of one-third to C. A. Rasmussen, Long Beach, Calif. Casing head. 1,572,052; Feb. 9.
Troutman, Frank E., and C. H. Christie, Butler, Pa. Method and apparatus for casting plate glass. 1,572,580; Feb. 9.
Troutman, Frank E., and C. H. Christie, Butler, Pa. Casting plate glass. 1,572 581; Feb. 9.
Trudeau, John F. (See Heitman, E., and Trudeau.)
Trumbull Electric Mfg. Company, The. (See Leppert, Henry E., assignor.)
Truscon Steel Company. (See Kane, Thomas H., assignors.)
Tuñez, Amable S., Easton, Pa., assignor of one-half to M. Levin, Philadelphia, Pa. Window sash. Re16,261; Feb. 9.
Tunstall, Harry, Fairhaven, assignor to Alsatian Machine Works, Limited, Boston, Mass. Waste-delivery means. 1,571,978; Feb. 9.
Tunstall, Harry, Fairhaven, assignor to Alsatian Machine Works, Limited, Boston, Mass. Sliding-bar top-comb frame. 1,571,979; Feb. 9.
Turner Tanning Machinery Company, The. (See Schettler, Gustav A., assignor.)
Twombly, Willard L., New York, N. Y., assignor, by mesne assignments, to The Wilcolator Company, Newark, N. J. Gasoline engine. 1,571,980; Feb. 9.
Tytus, John B., assignor to The American Rolling Mill Company, Middletown, Ohio. Pull back table. 1,572,582; Feb. 9.
Tytus, John B., assignor to The American Rolling Mill Company, Middletown, Ohio. Sheet-pickling method. 1,572,583; Feb. 9.
Uhl, Henry W., Freeport, N. Y. Driving means for electrical igniters. 1,572,255; Feb. 9.
Underwood Typewriter Company. (See Helmond, William F., assignor.)
Underwood Typewriter Company. (See Kurowski, Alfred G. F., assignor.)
Underwood Typewriter Company. (See Oswald, Alfred E., assignor.)
Underwood Typewriter Company. (See Smith, Jesse A. B., assignor.)
Underwood Typewriter Company. (See Urban, Max R., assignor.)
Union Switch & Signal Company, The. (See McCann, Ronald A., assignor.)
Union Switch & Signal Company, The. (See Spray, Lester E., assignor.)
United Cigarette Machine Co. (See Koerner, Ewald, assignor.)
United Shoe Machinery Corporation. (See Fowler, Alfred B., assignor.)
United Shoe Machinery Corporation. (See Furber, Frederick M., assignor.)
United Shoe Machinery Corporation. (See Jacques, George W., assignor.)
United Shoe Machinery Corporation. (See Knowlton, Cutler D., assignor.)
United Shoe Machinery Corporation. (See Roberts, W. T. B., and Ricks, assignors.)
United Shoe Machinery Corporation. (See Winkley, Erastus E., assignor.)
United States Envelope Company. (See Swett, Charles E., assignor.)
United States Hat Machinery Corporation. (See Chudoba, Frank F., assignor.)
United States Stoneware Company. (See Chamberlain, John J., assignor.)
Unrub, Albert E., assignor of one-half to S. J. Ostrander, Salem, Oreg. Printer's quoin. 1,572,825; Feb. 9.
Urban, Max R., Elizabeth, N. J., assignor to Underwood Typewriting Company, New York, N. Y. Typewriting machine. 1,572,334; Feb. 9.
Utica Duxbak Corporation. (See Conover, W. E., and Bush, assignors.)
Vail, George I., Cleveland, Ohio. Device for affording protection against the elements. 1,571,981; Feb. 9.
Vallier, Orvis W., assignor to J. B. Wise Incorporated, Watertown, N. Y. Attachment for sink faucets. 1,572,412; Feb. 9.
Van Amburg, Otto H., and L. A. Kempton, Bridgeport, Conn., assignors to General Electric Company. Electric switch. 1,572,695; Feb. 9.
Van Buren, John, Brooklyn, assignor to American Chicle Company, New York, N. Y. Wrapping machine. 1,572,256; Feb. 9.
Van Buren, John, Brooklyn, N. Y., assignor to American Chicle Company, New York, N. Y. Packaging machine 1,572,257; Feb. 9.
Vanderbeek, Herbert, assignor to The Timken Roller Bearing Company, Canton, Ohio. Roller bearing. 1,572,453; Feb. 9.
Vanderkamp, John, assignor to The Van Toy Company, Cleveland, Ohio. Sound-reproducing machine. 1,572,696; Feb. 9.
Van der Meulen, Peter A. (See Smith, L. B., Richmond, and van der Meulen.)
Van der Pyl, Edward, Holden, Mass. Shock absorber. 1,572,095; Feb. 9.
Van Toy Company, The. (See Vanderkamp, John, assignor.)
Van Valkenburg, Freeman, Kington, N. Y. Toy vehicle. 1,572,335; Feb. 9.
Vastola, Charles A., Waterbury, Conn. Cabinet for phonograph records. 1,572,454; Feb. 9.
Veetmeier, George, Milwaukee, Wis. Lamp. Des. 69,417; Feb. 9.
Vends Ads Corp. (See Chandler, Daniel L., assignor.)
Vestal, Merton I. (See Fournier, E. E., and Vestal.)
Villard, Richard H., Atlanta, Ga. Compressed rubber and air cushion for tires. 1,572,053; Feb. 9.
Villaret, Gustave E., Leonia, N. J., assignor to H. Hilfman, New York, N. Y. Chandelier or the like. Des. 69,418; Feb. 9.
Virgin, William H., New Orleans, La. Combined abdominal supporter and trousers-suspending device. 1,572,826; Feb. 9.
Vogt, August W. (See Siegfried, Eugene G., assignor.)
Vogt, Erich, and L. Kirchhof, Bergisch-Gladbach, Germany. Smelting or heating furnace with firing of coal dust. 1,572,336; Feb. 9.
Vogt, Wilhelm, Melide, Switzerland. Direction indicator for motor vehicles. 1,572,413; Feb. 9.
Von Hagel, William H., Baltimore, Md. Oil burner. 1,572,697; Feb. 9.
Von Pein, Edward J., assignor to The National Cash Register Company, Dayton, Ohio. Cash register. 1,572,054; Feb. 9.
Wachter, Josef T., West Hoboken, N. J. Film holder. 1,572,337; Feb. 9.
Wadsworth, James M., Fort Worth, Tex., assignor to Pierce Petroleum Corporation, New York, N. Y. Method and apparatus for distilling oil. 1,572,584; Feb. 9.
Wagley, Hugh F., Mineral Wells, Tex. Douche table. 1,572,096; Feb. 9.
Wagner, Walter, Chicago, Ill. Electrically-operated sealing means for vacuum bottles. 1,572,827; Feb. 9.
Waite, Lorenzo E., assignor to The Toledo Milling Machine Company, Toledo, Ohio. Liquid dispenser. 1,572,338; Feb. 9.
Waite, Norman S., et al. (See Gillis, Charles P., assignor.)
Walker, Mark, Los Angeles, assignor to The Pacific R. & H. Chemical Corporation, El Monte, Calif. Purification of hydrocyanic acid. 1,571,982; Feb. 9.
Wallis, Henry E., Chicago, Ill., assignor of one-third to A. G. Bush, Davenport, Iowa. Vertical steam boiler and water heater. 1,572,373; Feb. 9.
Walsh, Edward A. (See Walsh, Edward Y. and E. A.)
Walsh, Edward Y. and E. A., Eccles, England. Truck for tramway vehicles. 1,572,339; Fezb. 9.
Walsh, Joseph H., Boston, Mass., assignor to Johns-Manville, Incorporated, New York, N. Y. Apparatus for use in stretching and drying textile fabrics. 1,572,585; Feb. 9.
Walter, Albert U., Baltimore, Md. Horn button attachment. 1,572,828; Feb. 9.
Walters, Nils P., Fort Madison, Iowa. Time piece. 1,572,097; Feb. 9.

Walton, Charles F., jr. (See Paine, H. S., Walton, and Birckner.)
Ward, M. A. (See Brewer, John W., assignor.)
Warner, Clarence. (See Buvinger, G. A., Warner, and Smith.)
Warren, Ernest, Peoria, Ill. Brake-lining rack. 1,572,340; Feb. 9.
Warren, Harry R., Wabuska, assignor to Warren Seed Cleaning Company, Reno, Nev. Method and apparatus for cleaning, separating, and grading seeds and other bodies. 1,572,055; Feb. 9.
Warren Seed Cleaning Company. (See Warren, Harry R., assignor).
Waterbury Clock Co. (See Horn, Ernest H., assignor.)
Watrous, Clifford M., East Hampton, Conn., assignor to Gong Bell Manufacturing Company. Toy telephone transmitter. 1,572,852; Feb. 9.
Watson, Lawrence, and A. O. Middlemiss, Vancouver, Wash. Tree jack. 1,572,856; Feb. 9.
Wayne Tank & Pump Company. (See Huston, Dwight W., assignor.)
Weber, Herman G., Marinette, Wis., assignor of one-half to American Lakes Paper Company, Chicago, Ill. Paper-bag machine. 1,571,983; Feb. 9.
Weber, Herman G., Appleton, Wis., assignor of one-half to American Lakes Paper Company, Chicago, Ill. Paper-bag machine. 1,571,984; Feb. 9.
Weber, Karl A., Los Angeles, Calif. Machine for grinding glass plates. 1,571,985; Feb. 9.
Weber, Mathias J., assignor to Continental Scale Works, Chicago, Ill. Weighing scale. 1,572,627; Feb. 9.
Wedge, Utley, Paoli, Pa. Air blower of the caguiardelle type. 1,572,628; Feb. 9.
Weeks, Robert A., Wisconsin Rapids, Wis. Trailer coupling. 1,572,056; Feb. 9.
Weesner, Carl W. (See Grafton, H. T., and Weesner.)
Weesner, Carl W. (See Grafton, H. T., Weesner, and Hoffman.)
Weindel, Anton, assignor to Z. M. Stinnes, Essen-Ruhr, Germany. Purification of crude ammoniacal liquors. 1,571,986; Feb. 9.
Weinfeld, Charles, et al., executors. (See Herskovitz, Max.)
Weir, Helen G., Newark, N. J., assignor to The Prest-O-Lite Company, Inc. Composition for storage-battery electrodes and making the same. 1,572,586; Feb. 9.
Weir, James W. (See Black, J. C., and Weir.)
Weiss, Benjamin, New York, N. Y. Automatic drip-pan alarm. 1,572,057; Feb. 9.
Welch, John R., deceased, Muncie, Ind. assignor to V. M. Welch, executrix. Metal wheel spoke. 1,572,170; Feb. 9.
Welch, Viola M., executrix. (See Welch, John R., assignor.)
Wellen, Henry, New York, N. Y. Tray for cups or similar articles. Des. 69,419; Feb. 9.
Wellman-Seaver-Morgan Company The. (See Rogers, John F., assignor.)
Welte-Mignon Corporation. (See Bockisch, Heinrich, assignor.)
Welton, Park E., Akron, Ohio. Making fuel briquettes. 1,572,629; Feb. 9.
Western Electric Company. (See Clark, Edgar H., assignor.)
Western Electric Company. (See Harrison, Henry C., assignor.)
Western Electric Company. (See Hendry, William F., assignor.)
Western Electric Company. (See Houskeeper, William G., assignor.)
Western Electric Company. (See Kelly, Mervin J., assignor.)
Western Electric Company. (See Newman, Paul A., assignor.)
Western Electric Company. (See Powell, Albert C., assignor.)
Western Electric Company. (See Read, Harry S., assignor.)
Western Electric Company. (See Smythe, E. H., and Williams, assignors.)
Western Electric Company. (See Williams, Samuel B., assignor.)
Western Wheeled Scraper Company. (See Falkner, Benjamin H., assignor.)
Westinghouse Air Brake Company, The. (See Cass, Christopher P., assignor.)
Westinghouse Air Brake Company, The. (See Farmer, Clyde C., assignor.)
Westinghouse Air Brake Company, The. (See Wildin, George W., assignor.)
Westinghouse Electric & Manufacturing Company. (See Trotter, H. R., and Schmidt, assignors.)
Westinghouse, Henry H., New York N. Y. Antislipping starting device for steam locomotives. 1,572,171; Feb. 9.
Westinghouse Lamp Company. (See Myers, Ralph E., assignor.)
Westinghouse Lamp Company. (See Whitmore, J. B., and Ferguson, assignor.)
Weston, William S., Dallas, Tex. Anticreeper for railway rails. 1,572,455; Feb. 9.
Wetzel, Peter A., Springfield, Ill. Filing-cabinet drawer. 1,572,172; Feb. 9.
Whetzel, Joshua C. (See Porter, R., and Whetzel.)
White, Hugh T., Dallas, Tex. Gear-shift control. 1,572,829; Feb. 9.
Whiteside, Robert E., assignor to H. Bielfeldt, Los Angeles, Calif. Sand-box and playhouse. 1,572,630; Feb. 9.
Whiting & Davis Company. (See Smith, Harry W., assignor.)
Whitmore, James B., and J. E. Ferguson, Bloomfield, N. J., assignors to Westinghouse Lamp Company. Sealing-in machine for tipless lamps. 1,572,631; Feb. 9.
Wicke, A. C., Manufacturing Company. (See Wicke, Charles E., assignor.)
Wicke, Charles E., Mount Vernon, assignor to A. C. Wicke Manufacturing Company, New York, N. Y. Display case. 1,572,456; Feb. 9.
Wicks, Zeno W., Fort Worth, Tex., assignor to Worthington Pump and Machinery Corporation, New York, N. Y. Compressor or pump. 1,572,632; Feb. 9.
Wiedman, George P., North Tonawanda, N. Y. Automobile body. Des. 69,420; Feb. 9.
Wieland, Charles F., and E. Jansen, San Francisco, Calif.; said Jansen assignor to said Wieland. Pipe-wrapping machine. 1,572,258; Feb. 9.
Wietzel, Rudolf, assignor to Badische Anilin- & Soda-Fabrik, Ludwigshafen-on-the-Rhine, Germany. Manufacture and production of alkyl esters. 1,572,698; Feb. 9.
Wiggins, Fred, Louisville, Ky. Fly poisoner. 1,572,098; Feb. 9.
Wilbert, Harry E., Harrisburg, Pa. Snow scooping and melting apparatus. 1,572,414; Feb. 9.
Wilcolator Company, The. (See Twombly, Willard I., assignor.)
Wildin, George W., Pittsburgh, assignor to The Westinghouse Air Brake Company, Wilmerding, Pa. Train-speed-control device. 1,572,173; Feb. 9.
Willcox, Arthur L., Savannah, Ga. Time book. 1,572,341; Feb. 9.
Williams Company, The. (See Robbins, William H., assignor.)
Williams, Frank L. (See Williams, John L. and F. L.)
Williams, John L. and F. L., Wakita, Okla. Grease cup. 1,572,415; Feb. 9.
Williams, Samuel B., jr. (See Smythe, E. H., and Williams.)
Williams, Samuel B., Brooklyn, assignor to Western Electric Company, Incorporated, New York, N. Y. Telephone system. 1,572,587; Feb. 9.
Williamsport Building Products Co. (See Frosell, Oscar, assignor.)
Wiltsey, Charles E., East Orange, N. J. Making pipe filters. 1,572,342; Feb. 9.
Winders, William D., Columbus, Ohio, assignor to H. C. Miller, Milwaukee, Wis. Loose-leaf binder. 1,572,588; Feb. 9.
Winkley, Erastus E., Lynn, Mass., assignor to United Shoe Machinery Corporation, Paterson, N. J. Machine for operating upon stock. 1,571,987; Feb. 9.
Winter, William J., and F. M. Holmes, Denver, Colo. Foot accelerator for automobiles. 1,572,457; Feb. 9.
Winters, Frederick V., New York, N. Y. Spark plug. 1,572,058; Feb. 9.
Winthrop Chemical Company. (See Calisen, Jürgen, assignor.)
Wirthwein, Albert, Milwaukee, Wis. Photographic-printing device. 1,572,699; Feb. 9.
Wirtz, Franklin H. (See Shaffer, G. A., and Wirtz.)
Wise, J. B., Incorporated. (See Vallier, Orvis W., assignor.)
Witherow Steel Company. (See Witherow, William P., assignor.)
Witherow, William P., Pittsburgh, Pa., assignor to Witherow Steel Company. Die-rolled blank and method and apparatus for making the same. 1,572,343; Feb. 9.
Wolff, Edwin C., Philadelphia, Pa. Fixture stand. 1,572,344; Feb. 9.
Wolk, Raymond, St. Louis, Mo. Reel. 1,572,174; Feb. 9.
Wollensak, Andrew, assignor to Wollensak Optical Company, Rochester, N. Y. Photographic shutter. 1,572,345; Feb. 9.
Wollensak Optical Company. (See Wollensak, Andrew, assignor.)
Wood, Louis M., assignor to Speed-O Multiple Valve Lifter Corporation, New York, N. Y. Valve-spring-lifting mechanism. 1,572,059; Feb. 9.
Woodard, Louis A. (See Talbot, Howard H., assignor.)
Woodcraft Company, The. (See Allemeier, Albert W., assignor.)
Woods, John A. (See Woods, Lorenzo D., assignor.)
Woods, Lorenzo D., assignor of one-half to J. A. Woods, Cambridge, Iowa. Device for feeding moisture to banana stalks. 1,572,259; Feb. 9.
Woodside, William P., and C. N. Dawe, Detroit, Mich., assignors to The Studebaker Corporation, South Bend, Ind. Alloy steel. 1,572,458; Feb. 9.
Woodward, Arthur H., assignor to International Register Co., Chicago, Ill. Service cabinet. 1,571,988; Feb. 9.
Worthington Pump and Machinery Corporation. (See Wicks, Zeno W., assignor.)

Wright Manufacturing Company. (See Dotzert, Jacob, assignor.)
Wright, Wallace C., Brookfield, N. H., and D. E. Harding, Arlington, assignors to Harding Engineering Company, East Boston, Mass. Hide-carrying horse and truck. 1,572,260; Feb. 9.
Wuesthoff, Maximillian W., San Francisco, Calif. Spout for bath and lavatory fixtures. Des. 69,421; Feb. 9.
Yarnall, William W., Harrisburg, Pa. Shock-absorbing spring and snubber. 1,572,060; Feb. 9.
Yetter, Edward J., Denver, Colo. Expansion joint strip. 1,572,261; Feb. 9.
Young, Franz W., Everett, Mass. Air heater for internal-combustion engines. 1,572,416; Feb. 9.
Young, William M., Oakland, Calif. Tree-light holder. 1,572,700; Feb. 9.
Zenith Radio Corporation. (See Perlesz, Hugo, assignor.)
Zimmermann, Paul G., Keyport, N. J., assignor to Aeromarine Plane & Motor Company, New York, N. Y. Aerofoil. 1,571,989; Feb. 9.
Zlock, Edward J., assignor to Burson Knitting Company, Rockford, Ill. Finishing stockings. 1,572,061; Feb. 9.
Zug, Ray, Los Angeles, Calif. Combined bridge-lamp bracket and smoking set. Des. 69,422; Feb. 9.

ALPHABETICAL LIST OF INVENTIONS

FOR WHICH

PATENTS WERE ISSUED ON THE 9TH DAY OF FEBRUARY, 1926.

NOTE.—Arranged in accordance with the first significant character or word of the name (in accordance with city and telephone directory practice). **Includes patents, reissues, and designs.**

Abdominal supporter and trousers-suspending device, Combined. W. H. Virgin. 1,572,826; Feb. 9.
Abrading machine. A. B. Fowler. 1,571,936; Feb. 9.
Abrader, Reciprocating. C. D. Knowlton. 1,571,953; Feb. 9.
Acid, Purification of hydrocyanic. M. Walker. 1,571,982; Feb. 9.
Adjustable pipe hanger. C. J. Branch. 1,572,636; Feb. 9.
Aerofoil. P. G. Zimmermann. 1,571,999; Feb. 9.
Aeroplane. J. Ciccolanni. 1,572,767; Feb. 9.
Aeroplane brake. R. J. Pick, jr. 1,572,361; Feb. 9.
Aeroplanes, Brake for. H. E. Baughman. 1,572,834; Feb. 9.
Air blower of the Cagniardelle type. U. Wedge. 1,572,628; Feb. 9.
Air inlet, Auxiliary. F. W. Romeril. 1,572,311; Feb. 9.
Air intake. G. A. Preisser. 1,572,558; Feb. 9.
Air-operated testing device. R. H. Mueller and C. W. Hathaway. 1,571,958; Feb. 9.
Alarm: *See*—
  Drip-pan alarm.
Alcohols from halogenated aldehydes, Production of. H. Meerwein. 1,572,742; Feb. 9.
Aliphatic-aromatic ketones with polyalcohols, Manufacture of condensation products of compound. J. Altwegg and E. F. Chermette. 1,572,176; Feb. 9.
Alkyl esters, Manufacture and production of. R. Wietzel. 1,572,698; Feb. 9.
Alloy. J. H. L. De Bats. 1,572,593; Feb. 9.
Alloy. R. L. Johnston. 1,572,357; Feb. 9.
Alloy, Aluminum. R. L. Johnston, R. S. Archer, and Z. Jeffries. 1,572,489–90; Feb. 9.
Alloy, Aluminum. A. Pacz. 1,572,502; Feb. 9.
Alloy, Aluminum-copper. Z. Jeffries and R. S. Archer. 1,572,487; Feb. 9.
Alloy, Aluminum-silicon. Z. Jeffries and R. S. Archer. 1,572,488; Feb. 9.
Alloy and making the same, Nickel. P. D. Merica. 1,572,744; Feb. 9.
Alloy, Metallic. E. R. Crosby. 1,572,382; Feb. 9.
Alloy steel. W. P. Woodside and C. N. Dawe. 1,572,458; Feb. 9.
Alloys, Making castings of aluminum-silicon. R. S. Archer and J. D. Edwards. 1,572,459; Feb. 9.
Amplifier circuits. H. S. Read. 1,572,083; Feb. 9.
Animal trap. J. O'Neil. 1,572,358; Feb. 9.
Annealing iron articles. H. T. Grafton and C. W. Weesner. 1,572,600; Feb. 9.
Antiglare attachment. P. W. Padden. 1,571,963; Feb. 9.
Antiglare shield. H. S. Reinheimer. 1,572,038; Feb. 9.
Antiskid device. W. F. Staggers. 1,572,821; Feb. 9.
Arch support. W. M. Scholl. 1,572,162; Feb. 9.
Ash receptacle. W. C. Hislop. 1,572,480; Feb. 9.
Attractant for insects, particularly for the Japanese beetle. L. B. Smith, E. A. Richmond, and P. A. van der Meulen. 1,572,568; Feb. 9.
Auto parking device. E. L. Smith. 1,572,250; Feb. 9.
Auto parking system. J. L. Lynch. 1,572,664; Feb. 9.
Automobile body. G. P. Wiedman. Des. 69,420; Feb. 9.
Automobile engines, Oil-supply-indicating device for. A. C. Rioux. 1,572,310; Feb. 9.
Automobile fender and guard. E. A. Banschbach. 1,572,460; Feb. 9.
Automobile four-wheel drive. R. C. Rose. 1,572,561; Feb. 9.
Automobile hood fastener. W. F. Polson. 1,571,965; Feb. 9.
Automobile pedals, Neutral-position detector for. G. Cook. 1,572,186; Feb. 9.
Automobile radiator cap. S. Faith. Des. 69,385; Feb. 9.
Automobile tops, Joint-masking means for demountable. M. R. Hull. 1,572,290; Feb. 9.
Automobile wheel rim. W. Bowles. 1,572,101; Feb. 9.
Automobiles, Auxiliary charge-forming device for. I. Cowles. 1,572,381; Feb. 9.
Automobiles, Foot accelerator for. W. J. Winter and F. M. Holmes. 1,572,457; Feb. 9.
Automobiles, Heater for. P. R. Minahan. 1,572,747; Feb. 9.
Azodyestuffs containing zinc and process of and making same. F. Straub and H. Schneider. 1,572,573; Feb. 9.
Baby crawler. N. M. Elton. 1,572,273; Feb. 9.

Bacon hanger. L. W. Bermond. 1,572,178; Feb. 9.
Bacon-skewer block. P. A. Flinn. 1,572,198; Feb. 9.
Bag: *See*—
  Laundry bag.
Bag frame. W. T. Goldsmith. Des. 69,388–9; Feb. 9.
Ball: *See*—
  Golf practice ball.
Ball carrier. F. O. B. Dennys. 1,572,383; Feb. 9.
Balloon. J. F. Cooper. 1,572,187; Feb. 9.
Banana stalks, Device for feeding moisture to. L. D. Woods. 1,572,259; Feb. 9.
Bathing fixture, Combination. E. J. Ewing. 1,572,275; Feb. 9.
Bathing pool. W. Bintz. 1,572,463; Feb. 9.
Batteries, Gate for poultry-feeding. W. J. Stewart. 1,572,050; Feb. 9.
Battery-charging system. F. F. Starr. 1,572,251; Feb. 9.
Battery positive electrodes and making same, Composition for storage-. R. C. Benner. 1,572,512; Feb. 9.
Bead wire. S. Mollengarden. 1,572,749; Feb. 9.
Bearing. F. Stebler. 1,572,093; Feb. 9.
Bearing cap. E. Heitman and J. F. Trudeau. 1,572,287; Feb. 9.
Bearing, Roller. C. H. Hughes. 1,572,606; Feb. 9.
Bearing, Roller. J. Keller, sr. 1,572,725; Feb. 9.
Bearing, Roller. D. S. McPhail and J. E. Pastorius. 1,572,736; Feb. 9.
Bearing, Roller. H. Vanderbeek. 1,572,453; Feb. 9.
Beet topper. A. A. Matheson. 1,572,490; Feb. 9.
Beet-toppers' knives, Holder for. W. Hogan. 1,572,289; Feb. 9.
Belt and producing same, Leather. H. J. Shivell and K. W. Koeniger. 1,571,973; Feb. 9.
Belt members, Tensioning device for endless. G. A. Schettler. 1,571,972; Feb. 9.
Belts, Mounting for conveyer. G. Nelson. 1,572,555; Feb. 9.
Belts on pulleys, Device for placing. F. Andrews. 1,572,830; Feb. 9.
Beverage cooler and dispenser. W. McLaughlin. 1,572,242; Feb. 9.
Beverages, Preparation of aerated. O. A. Elias. 1,572,111; Feb. 9.
Binder, loose-leaf. W. D. Winders. 1,572,588; Feb. 9.
Bit: *See*—
  Core drill bit. Drill bit.
Blank feeder. L. E. La Bombard and M. H. Sidebotham. 1,572,438; Feb. 9.
Blank-feeding machines, Stop mechanism for. S. C. Grunlee. 1,572,007; Feb. 9.
Blasting cap, Electric. A. L. Oliver. 1,572,676; Feb. 9.
Block: *See*—
  Bacon-skewer block.
Block-molding machine. A. P. Nelson. 1,572,305; Feb. 9.
Block-signal system. F. Grünig. 1,572,137; Feb. 9.
Board: *See*—
  Divider board. Drawing board.
Board from bagasse and analogous fibers, Making. J. K Shaw. 1,572,565; Feb. 9.
Board joiner. C. J. Elschen. 1,572,780; Feb. 9.
Boat. F. N. Nelson. 1,572,074; Feb. 9.
Boiler and water heater, Vertical steam. H. E. Wallis. 1,572,373; Feb. 9.
Boiler furnace. E. T. Rist. 1,572,086; Feb. 9.
Bolt adapter for lubricating purposes. C. P. Murphy. 1,572,073; Feb. 9.
Bolt, Intake-connecting. C. Bjorklund. 1,572,464; Feb. 9.
Bolt lock. G. F. Colley. 1,572,770; Feb. 9.
Bomb. A. M. King. 1,572,435; Feb. 9.
Bomb casing. A. M. King. 1,572,436; Feb. 9.
Book stamp. M. G. Koehrman. 1,572,392; Feb. 9.
Book, Time. A. L. Willcox. 1,572,341; Feb. 9.
Booth, Waiting-station. B. D. Haeussler. Des. 69,392; Feb. 9.
Boots and shoes, Making. C. B. Spalsbury. 1,572,042; Feb. 9.
Bottle. C. A. Jones. Des. 69,397; Feb. 9.
Bottle. M. I. Katz. Des. 69,398; Feb. 9.
Bottle-capping device. E. M. Letts. 1,572,543; Feb. 9.
Bottle carrier. H. H. Newton. 1,572,243; Feb. 9.

Bottle support, Milk. W. J. Langstroth. 1,572,152; Feb. 9.
Box: *See*—
  Cardboard box. Millinery box.
  Collapsible box. Sound box.
  Folding box. Vanity box.
Box and wagon, Novelty. H. and E. Hildebrandt. 1,572,141; Feb. 9.
Box-making machine. W. V. Hart. 1,572,718; Feb. 9.
Bracelets, End connecter for. G. D. Harrison. 1,572,717; Feb. 9.
Bracket: *See*—
  Window-shade bracket.
Bracket. H. M. Kofsky. 1,572,295; Feb. 9.
Braiding machine. O. A. Frederickson. 1,572,712–3; Feb. 9.
Brake: *See*—
  Aeroplane brake. Vacuum brake.
  Load brake.
Brake. N. S. Lincoln. 1,572,862; Feb. 9.
Brake backing plate. J. L. Price. 1,572,680; Feb. 9.
Brake-lining rack. E. Warren. 1,572,340; Feb. 9.
Branding machine, Pressure. W. C. Krause. 1,572,494; Feb. 9.
Brine-tank support, Universal. C. C. Spreen. 1,572,851; Feb. 9.
Brush. A. Rapisardi. 1,572,362; Feb. 9.
Budding tool. J. R. Donnelly. 1,572,191; Feb. 9.
Building construction. R. St. L. Peverley. 1,572,078; Feb. 9.
Bumper. F. J. Laher. 1,572,118; Feb. 9.
Bumper and bracket therefor. C. P. Heide. 1,572,603; Feb. 9.
Bumper attaching and supporting means. W. E. Dunston. 1,572,594–5; Feb. 9.
Bumper attaching and supporting means. W. E. Dunston. 1,572,597; Feb. 9.
Bumper supporting means. W. E. Dunston. 1,572,596; Feb. 9.
Burner: *See*—
  Liquid-fuel burner. Water-heater burner.
  Oil burner.
Burner construction. G. Baker. 1,572,833; Feb. 9.
Butter, Making. B. Plisic. 1,572,123; Feb. 9.
Button attachment, Horn. A. U. Walter. 1,572,828; Feb. 9.
Button, Ornamental. A. I. Lewis. 1,572,803; Feb. 9.
Button, Separable cuff. B. F. Baker. 1,572,511; Feb. 9.
Cabinet for a sound-reproducing machine. M. Nystrom. Des. 69,406–8; Feb. 9.
Cabinet, Service. A. H. Woodward. 1,571,988; Feb. 9.
Calculating apparatus. P. E. Fagerholm. 1,572,520; Feb. 9.
Calculator. R. W. Mallder. 1,572,547; Feb. 9.
Camera handle and latch. F. W. Brehm and G. W. Adams. 1,572,267; Feb. 9.
Camera obscura. C. W. Frederick. 1,572,236; Feb. 9.
Cameras and process of making the same, Mask set for multiple exposures in moving-pictures. E. Scholl. 1,572,315; Feb. 9.
Cameras, Shutter for panoramic. W. A. Riddell. 1,572,246; Feb. 9.
Can machine. T. F. Casey. 1,572,514; Feb. 9.
Cans, Machine for turning and stacking the ends of. G. W. Mudd. 1,572,219; Feb. 9.
Candle lighter and snuffer. A. Schroeder. 1,572,316; Feb. 9.
Candy-cutting machine. P. B. Laskey. 1,572,071; Feb. 9.
Car-dumping apparatus. R. W. Kaltenbach. 1,572,654; Feb. 9.
Carburetor. C. L. Rayfield. 1,572,036–7; Feb. 9.
Card. W. M. Fryc. 1,571,937; Feb. 9.
Cardboard box. L. Binder. 1,572,125; Feb. 9.
Carrier: *See*—
  Ball carrier. Bottle carrier.
Case: *See*—
  Display case. Refrigerator case.
Cash register. E. J. Von Pein. 1,572,054; Feb. 9.
Casing head. N. P. Krebs. 1,572,394; Feb. 9.
Casing head. W. A. Trout and C. R. Butler. 1,572,052; Feb. 9.
Casings, Mold for making shrink-head. F. H. Chapin. 1,572,706; Feb. 9.
Casings, Molding shrink-head. F. H. Chapin. 1,572,705; Feb. 9.
Casting plate glass. F. E. Troutman and C. H. Christie. 1,572,581; Feb. 9.
Casting plate glass, Method and apparatus for. F. E. Troutman and C. H. Christie. 1,572,580; Feb. 9.
Cellulose-acetate film composition. S. J. Carroll. 1,572,232; Feb. 9.
Cement-bag cleaner. C. R. Mattern. 1,572,739; Feb. 9.
Cement-block machine. C. R. Harry. 1,572,602; Feb. 9.
Center support. J. Moreno. 1,572,072; Feb. 9.
Centrifugal separator. W. Birchall. 1,572,419–20; Feb. 9.
Centrifugal separator. W. C. Laughlin. 1,572,612; Feb. 9.
Centrifugal separator. F. W. McEntire. 1,572,299; Feb. 9.
Ceramic material and to a ceramic material made therefrom, Batch for making. F. M. and F. J. Locke. 1,572,730; Feb. 9.
Chair seat. E. T. Breen. 1,572,378; Feb. 9.
Chandelier or the like. F. Roettges. Des. 69,412; Feb. 9.
Chandelier or the like. G. E. Villaret. Des. 69,418; Feb. 9.
Chimes-striking mechanism. G. L. Smith. 1,572,167; Feb. 9.
Chlor-derivatives of methane, Producing. C. B. Carter and A. E. Coxe. 1,572,513; Feb. 9.
Churn. F. Northcutt. 1,572,306; Feb. 9.
Cigar-making machinery. H. L. Roby. 1,571,968; Feb. 9.
Cigarette machines, Cut-off knife for. E. Koerner. 1,572,393; Feb. 9.
Cinematographic views, Apparatus for taking. P. S. Gauriat. 1,572,648; Feb. 9.
Circuit-control means. G. A. Taylor. 1,462,169; Feb. 9.
Circuit coupler, Three-. W. B. Schoeppler. 1,572,688; Feb. 9.
Cleaner: *See*—
  Well sand cleaner.
Closure member. W. Schwemlein. 1,572,816; Feb. 9.
Clothesline holder. E. M. Ott. 1,572,755; Feb. 9.
Clothesline reel. B. Knatvold. 1,572,151; Feb. 9.
Clothes wringer. R. J. Anderson. 1,572,758; Feb. 9.
Clothes wringer. R. J. Anderson. 1,572,759; Feb. 9.
Clutch mechanism. P. Burke. 1,572,227; Feb. 9.
Clutch-operating means. P. Burke. 1,572,225; Feb. 9.
Clutch-operating mechanism. P. Burke. 1,572,226; Feb. 9.
Clutch pedal. J. S. Croxford. 1,572,774; Feb. 9.
Coal and method of testing, Container for testing. W. J. Klaiber. 1,572,391; Feb. 9.
Coat, Sportsman's hunting. W. E. Conover and B. D. Bush. 1,572,517; Feb. 9.
Coating machine. D. E. Harding. 1,572,205; Feb. 9.
Coffee urn. W. H. Petersen. 1,572,221; Feb. 9.
Collapsible box. A. Gordon. 1,572,788; Feb. 9.
Collapsible tube. W. C. Huntoon, jr. 1,572,208; Feb. 9.
Coloring mineral matter. H. C. Fisher. 1,572,425; Feb. 9.
Comb: *See*—
  Fountain comb.
Comb. B. M. Schweizer. 1,572,411; Feb. 9.
Comb frame, Sliding-bar top-. H. Tunstall. 1,571,979; Feb. 9.
Compasses, Azimuth reader for magnetic. C. G. Guy. 1,572,528; Feb. 9.
Composition of matter. A. Pacz. 1,572,503; Feb. 9.
Compressor or pump. Z. W. Wicks. 1,572,632; Feb. 9.
Concrete post, Reenforced. K. Müller. 1,572,669; Feb. 9.
Condenser. M. J. Lide. 1,572,660; Feb. 9.
Condenser. E. B. Nowosielski. 1,572,244; Feb. 9.
Condenser, Electrostatic. H. Perlesz. 1,572,504; Feb. 9.
Condenser parts against corrosion, Protecting. R. D. Mershon. 1,572,404; Feb. 9.
Container. O. A. Heppes. 1,572,140; Feb. 9.
Container pack. C. L. Lynch. 1,572,731; Feb. 9.
Containers, Closure for. S. Quisling. 1,572,808; Feb. 9.
Cooking apparatus. H. E. Smith. 1,462,168; Feb. 9.
Core drill bit, Rotary-. J. R. Chamberlin. 1,572,349; Feb. 9.
Corn-popping machine. S. S. Kingery. 1,572,437; Feb. 9.
Corset confiner. E. S. Coleman. 1,571,998; Feb. 9.
Counter guard. S. J. Smith. 1,572,091; Feb. 9.
Coupling: *See*—
  Hose coupling. Trailer coupling.
Coupling device. W. H. Grote. 1,572,355; Feb. 9.
Crucibles and the like, Refractory lining for. F. C. Frary. 1,572,475; Feb. 9.
Crusher: *See*—
  Harrow and float or clod crusher.
Cuff button. J. G. Nyberg. 1,572,619; Feb. 9.
Cup: *See*—
  Grease cup.
Curtain support. G. A. Efford and N. S. Erickson. 1,572,845; Feb. 9.
Curvature form, Adjustable. A. W. Sporer. 1,572,820; Feb. 9.
Cutter: *See*—
  Hair cutter. Ice-cream cutter.
Cylinder of an internal-combustion engine, Means for observing the working conditions of the. H. Chapman. 1,572,423; Feb. 9.
Cylinders, Attaching copper fins to cast-iron. C. P. Grimes. 1,572,428; Feb. 9.
Damper regulator, Lock for. J. Alsfasser. 1,571,990; Feb. 9.
Debarker. C. P. and A. Glee. 1,572,787; Feb. 9.
Dental attachment, Bucco-lingual. A. Gueft-Grinberg. 1,571,942; Feb. 9.
Dental floss reel. F. G. Dresser. 1,572,707; Feb. 9.
Detector circuit. J. Herman. 1,572,010; Feb. 9.
Detergent composition. W. Schneiderman. 1,572,814; Feb. 9.
Diazo compound, Solid stable. F. Günther and F. Lange. 1,572,715; Feb. 9.
Die holder. W. B. Bronander. 1,571,929; Feb. 9.
Die-rolled blank and method and apparatus for making the same. W. P. Witherow. 1,572,343; Feb. 9.
Direction indicator. E. N. Sarber. 1,572,314; Feb. 9.
Dish or similar article. W. D. Haviland. Des. 69,393; Feb. 9.
Disk transmission mechanism, Apron. F. B. Cockburn. 1,572,107; Feb. 9.

Dispensing device. H. and E. D. Betts. 1,572,837; Feb. 9.
Display cabinet. L. H. Nutter. 1,572,753; Feb. 9.
Display case. V. J. Grither, jr. 1,572,429; Feb. 9.
Display case. C. E. Wicke. 1,572,456; Feb. 9.
Display case, Illuminated. J. W. Hall. 1,572,793; Feb. 9.
Dissolving apparatus. H. D. Lathrop and W. H. Paulson. 1,572,023; Feb. 9.
Distillation, Destructive. F. C. Atkinson. 1,572,510; Feb. 9.
Divider board. R. Jones. 1,572,146; Feb. 9.
Documents, Machine for sorting. C. F. Ratcliff. 1,572,809; Feb. 9.
Doll's head. M. H. Slater. 1,572,321; Feb. 9.
Door. S. M. Casey. 1,572,184; Feb. 9.
Door. J. Dart. 1,572,641; Feb. 9.

Medicinal and anæsthetic package. A. E. Smith. 1,572,323–4; Feb. 9.
Medicinal and anæsthetic solutions, Preparing. A. E. Smith. 1,572,322; Feb. 9.
Memorandum pad. L. L. Henry. Des. 69,395; Feb. 9.
Metallurgical process. W. E. Greenawalt. 1,572,114–5; Feb. 9.
Method and centrifugal separator for separating solids from liquids. W. C. Laughlin. 1,572,611; Feb. 9.
Millinery box, Collapsible. J. Kramer and A. H. Israel. 1,572,296; Feb. 9.
Mine drill. R. E. Booker. 1,572,067; Feb. 9.
Mining machine. R. E. Booker. 1,572,066; Feb. 9.
Mining machine. R. Peale. 1,572,556; Feb. 9.
Mixing machine. J. J. Babka. 1,571,926; Feb. 9.
Molding machines, Sanding apparatus for. C. L. Norton. 1,572,674; Feb. 9.
Molten metal, Method of and mold and appliance for the continuous transfer of. F. B. McKune. 1,572,865; Feb. 9.
Mop-cleaning device. W. Braunsdorf. 1,572,402; Feb. 9.
Motor-control system. W. C. Raube. 1,572,682; Feb. 9.
Motor-vehicle signal. H. C. Hachmuth. 1,572,138; Feb. 9.
Muffler. F. J. Herdle. 1,572,116; Feb. 9.
Muscular development, Testing. F. S. Engel. 1,572,193; Feb. 9.
Musical instrument. F. C. Bender. 1,572,418; Feb. 9.
Musical instrument, Automatic. H. Bockisch. 1,572,857; Feb. 9.
Nailing frame. E. M. Rose. 1,572,364; Feb. 9.
Nonskidding device for vehicles. H. J. Schulte. 1,572,689; Feb. 9.
Object-dispensing machine. M. T. Ash. 1,572,263; Feb. 9.
Oil burner. C. A. Diehl. 1,572,470; Feb. 9.
Oil burner. R. Dougherty. 1,572,778; Feb. 9.
Oil burner. F. S. Egloff. 1,572,598; Feb. 9.
Oil burner. W. H. von Hagel. 1,572,697; Feb. 9.
Oil burner, Hydrocarbon-. H. W. Jaeger. 1,572,653; Feb. 9.
Oil cloth fixture. W. B. Morton. 1,572,304; Feb. 9.
Oil, Method and apparatus for distilling. J. M. Wadsworth. 1,572,584; Feb. 9.
Oiling device. W. A. Rarig. 1,572,681; Feb. 9.
Oils, Manufacturing lubricating. J. C. Black and J. W. Weir. 1,572,465; Feb. 9.
Optical device. R. R. Arnau. 1,572,760; Feb. 9.
Optical instrument. W. Taylor. 1,572,575; Feb. 9.
Ore-treating furnace, Continuous. W. P. Jobson. 1,572,291; Feb. 9.
Ores, Treating mixed lead-zinc sulphide. N. C. Christensen. 1,572,268; Feb. 9.
Ornamentation, Method of. J. J. Carow. 1,572,348; Feb. 9.
Oven. K. B. Fiske. 1,572,783; Feb. 9.
Oxids from ferrous metal, Removal of. R. Porter and J. C. Whetzel. 1,572,848; Feb. 9.
Packaging machine. J. Van Buren. 1,572,257; Feb. 9.
Paddle stitcher. C. Meilinger. 1,572,216; Feb. 9.
Padlock. J. Pietrie. 1,572,122; Feb. 9.
Paintbrush, Pneumatic. F. W. Schneider. 1,572,509; Feb. 9.
Paper-bag machine. H. G. Weber. 1,571,983; Feb. 9.
Paper-bag machine. H. G. Weber. 1,571,984; Feb. 9.
Paper, Composition of ingredients and process for deinking. G. Hammond. 1,572,479; Feb. 9.
Paper cutter. C. H. Blaisdell. Des. 69,380; Feb. 9.
Paper-cutting machine. J. E. Mulroney. 1,572,617; Feb. 9.
Paper fastener. J. A. Elias. 1,572,192; Feb. 9.
Paper feed. C. E. Carpenter. 1,572,704; Feb. 9.
Paper-machine driers, Process and apparatus for removing water and air from. V. D. Simons. 1,572,448; Feb. 9.
Paper, Machine for interfolding. G. A. Shaffer and F. H. Wirtz. 1,572,817; Feb. 9.
Paper-making machine. G. F. McClay and H. V. Haight. 1,572,498; Feb. 9.
Paper-making machines, Suction box for. J. G. Jones. 1,572,238; Feb. 9.
Paper, Making transparent. C. E. Swett. 1,571,976; Feb. 9.
Paper, Reclaiming used. G. Hammond. 1,572,478; Feb. 9.
Paper, Safety. H. W. Hetherington. Des. 69,396; Feb. 9.
Paper-seasoning machine. H. E. Ewalt. 1,572,352; Feb. 9.
Paper-supporting carriage and guiding means. W. W. Lasker. 1,571,955; Feb. 9.
Parchment motto and greeting card and making the same. G. E. Buzza. 1,572,180; Feb. 9.
Pasteurizer for cream, milk, or other liquids or semi-liquids. J. O'Connell and H. H. Kerr. 1,572,031; Feb. 9.
Paving block and the like. E. Clark and D. T. Gilmartin, jr. 1,572,854; Feb. 9.
Paving machine, Brick or block. M. E. Crowell. 1,572,188; Feb. 9.
Pea-shelling machine. C. Sabell. 1,572,867; Feb. 9.
Pedal tread, Extension. D. Sinclair. 1,572,369; Feb. 9.
Pencil, Magazine-fed. A. Fleming. 1,572,133; Feb. 9.
Penstock structure. H. L. Doolittle. 1,572,471; Feb. 9.
Percolator, Rotary. E. Larrey. 1,572,861; Feb. 9.
Perforating-machine attachment. C. D. Highland. 1,572,720; Feb. 9.
Perforating machine, Lanston monotype. W. J. Gribbin. 1,572,136; Feb. 9.
Perfume container. C. L. Marcus. Des. 69,403; Feb. 9.
Pharmaceutical product. J. Callsen. 1,572,768; Feb. 9.
Phonograph records, Cabinet for. C. A. Vastola. 1,572,454; Feb. 9.
Phonograph reproducers, Guard for. C. E. Semple, jr. 1,572,088; Feb. 9.
Phosphates, Manufacture of alkali-metal. C. M. Hoff. 1,572,846; Feb. 9.
Photographic-printing device. A. Wirthwein. 1,572,699; Feb. 9.
Photographic-printing machines, Resilient-type-disk numbering stamp for. B. D. Chamberlin. 1,572,233; Feb. 9.
Photographic shutter. A. Wollensak. 1,572,345; Feb. 9.
Photometer. H. Lux. 1,572,544; Feb. 9.
Piano, Supertransposing. E. W. Bachmeyer. 1,572,841; Feb. 9.
Pickling. H. S. Marsh and R. S. Cochran. 1,572,155; Feb. 9.
Picture apparatus, Motion-. J. Tessler. 1,572,252; Feb. 9.
Picture machine, Motion-. F. H. Owens. 1,572,863; Feb. 9.

Piezo-electric-crystal apparatus. A. Crossley. 1,572,773; Feb. 9.
Pigs and like animals, Device for holding. W. D. Nottingham. 1,572,307; Feb. 9.
Pipe elbows, Machine for making. L. H. Purnell. 1,572,559; Feb. 9.
Pipe filters, Making. C. E. Wiltsey. 1,572,342; Feb. 9.
Pipe hoist. L. O. Hanson. 1,572,286; Feb. 9.
Pipe-wrapping machine. C. F. Wieland and E. Jansen. 1,572,258; Feb. 9.
Piston. W. E. Smith. 1,572,325; Feb. 9.
Piston and ring construction. H. E. Muchnic. 1,572,443; Feb. 9.
Piston ring. F. W. Seelert. 1,572,690; Feb. 9.
Piston-ring compressor. C. R. Gillis. 1,572,135; Feb. 9.
Piston-ring compressor. P. C. Kearney. 1,572,801; Feb. 9.
Pitting or coring fruit, Apparatus for. A. L. Duncan. Re16,259; Feb. 9.
Planimeter. L. Larrazabal y Fernandez. 1,572,132; Feb. 9.
Plastic and producing same. O. Frosell. 1,572,714; Feb. 9.
Plastic-ware-making machine, Portable. C. R. Nichols. 1,572,445; Feb. 9.
Plate or similar article. W. D. Haviland. Des. 69,394; Feb. 9.
Plow frame, Convertible. F. W. Boman. 1,571,995; Feb. 9.
Plug, Attachment. S. McClatchie. 1,572,119; Feb. 9.
Polish, Furniture. J. Johansen. 1,572,021; Feb. 9.
Post: *See*—
Concrete post.
Powder holder. E. Schuelke and J. Ross. 1,572,562; Feb. 9.
Power baling machine. J. Hansen. 1,572,716; Feb. 9.
Power farming apparatus. H. A. Bechtelheimer. 1,572,462; Feb. 9.
Power-generating mechanism. J. F. Thomas. 1,572,577–8; Feb. 9.
Power generator, Pneumatic. S. S. Cramer. 1,572,269; Feb. 9.
Power-operated door. F. O. DeCarle. 1,572,108; Feb. 9.
Power press. J. E. Johnson and H. W. Spellman. 1,572,724; Feb. 9.
Power system. P. Burke. 1,572,229; Feb. 9.
Power-transmission mechanism. A. Bartlemay. 1,572,264; Feb. 9.
Press: *See*—
Power press.
Press. J. J. Chamberlain. 1,572,843; Feb. 9.
Printer's quoin. A. E. Unrub. 1,572,825; Feb. 9.
Printing machine, Rotating. L. Schwarz. 1,572,044; Feb. 9.
Printing plates, Production of aluminum. L. J. Hertlin. 1,572,012; Feb. 9.
Printing presser, Gripper mechanism of. O. Finkhaus. 1,572,710; Feb. 9.
Proctotherapy, Portable apparatus for use in. O. B. Schellberg. 1,572,043; Feb. 9.
Protection against the elements, Device for affording. G. I. Vail. 1,571,981; Feb. 9.
Pruner. E. McKenney. 1,572,546; Feb. 9.
Pruning device. F. H. Blodgett. 1,572,100; Feb. 9.
Pruning implement. J. H. Foote. 1,572,426; Feb. 9.
Pull-back table. J. B. Tytus. 1,572,582; Feb. 9.
Pulley lines, Extension arm for. R. H. Smith. 1,572,819; Feb. 9.
Pulp, Production of. L. Bradley and E. P. McKeefe. 1,572,840; Feb. 9.
Pump. P. L. Scott. 1,572,045; Feb. 9.
Pump and drill, Combination sand. S. R. Evans and S. W. Collins. 1,572,274; Feb. 9.
Pump for liquids or gases, Rotary. S. Maroger. 1,572,738; Feb. 9.
Pump for oil wells. H. L. Nolan. 1,572,618; Feb. 9.
Pumping apparatus. G. A. Buvinger, C. Warner, and J. A. Smith. 1,572,231; Feb. 9.
Pumping apparatus. J. W. Taylor. 1,572,329–33; Feb. 9.
Pumps, Illuminating sign for gasoline. D. W. Huston. 1,572,016; Feb. 9.
Pumps, Trap for oil-well. D. C. King. 1,572,022; Feb. 9.
Puzzle and poetic-puzzle blocks, Poetic. M. C. Jones. 1,572,433; Feb. 9.
Pyrrol, pyrrol derivatives, and pyrocoll from animal waste, Obtaining. J. Michelman. 1,572,552; Feb. 9.
Rack: *See*—
Brake-lining rack.
Vase and display rack.
Radiator. H. Kurtzner. 1,572,657; Feb. 9.
Radiator cap. A. C. Lippert. Des. 69,402; Feb. 9.
Radiator casing. D. W Day. Des. 69,384; Feb 9.
Radiator shield. J. M. Moran. 1,572,405; Feb. 9.
Radiator with removable elements. H. R. Guyot. 1,572,792; Feb. 9.
Radiocondenser. C. Horton. 1,572,604; Feb. 9.
Rail jack. T. Ray. 1,572,810; Feb. 9.
Rail-supporting device. J. W. Brewer. 1,572,127; Feb. 9.
Railway-crossing signal. L. Frasier and C. C. Hiner. 1,572,280; Feb. 9.
Railway rails, Angle bar for. T. Seitz. 1,572,368; Feb. 9.
Railway rails, Anticreeper for. W. S. Weston. 1,572,455; Feb. 9.
Railway signaling system. L. E. Spray. 1,572,570; Feb. 9.
Railway-switch stand. G. L. Thompson. 1,572,579; Feb. 9.
Railway switches, Safety device for. C. Shryock. 1,572,089; Feb. 9.
Railway-track construction. H. Etheridge. 1,572,131; Feb. 9.
Railway tracks, Safety mechanism for. J. H. Chestnut, jr. 1,572,765; Feb. 9.
Railway-traffic-controlling apparatus. R. A. McCann. 1,572,545; Feb. 9.
Razor-blade cutting and scraping tool. A. M. Brown. 1,572,702; Feb. 9.
Razor, Safety. J. Straka. 1,572,572; Feb. 9.
Recording instrument. E. Hodgkinson. 1,572,207; Feb. 9.

Stock, Machine for operating upon. E. E. Winkley. 1,571,987; Feb. 9.
Stockings, Finishing. E. J. Zlock. 1,572,061; Feb. 9.
Stove, Combination hot-water. S. V. Reeves. 1,572,683; Feb. 9.
Stove, Gas. W. C. Lindemann. 1,572,661; Feb. 9.
Stove-leg lock. R. Fleming. 1,572,003; Feb. 9.
Stove plate, Auxiliary. E. J. Golden. 1,572,113; Feb. 9.
Stretcher. C. McCammack. 1,572,732; Feb. 9.
Structures against earthquake damage, Device for protecting. O. Stromborg. 1,572,574; Feb. 9.
Sucker-rod elevator. W. F. Cornelius. 1,572,234; Feb. 9.
Sucker-rod elevator. L. F. Davis. 1,572,235; Feb. 9.
Suction apparatus. H. Parker. 1,572,847; Feb. 9.
Sugar-cane mills, metal-rolling mills and the like, Spring-relieving gear for rolls of. C. McNeil. 1,572,735; Feb. 9.
Sugar production, Cane-. H. S. Paine, C. F. Walton, jr., and V. Birckner. 1,572,359; Feb. 9.
Suitcase, Reenforced. M. and H. W. Axelman. 1,572,868; Feb. 9.
Supporting fixture. A. J. May. 1,572,215; Feb. 9.
Surface covering. G. Kolenski. 1,579,070; Feb. 9.
Surgical instrument. J. H. Molinelli. 1,571,956; Feb. 9.
Surgical-instrument support. A. Mulligan. 1,571,959; Feb. 9.
Sweaters, Pocket for. A. Kaiser. 1,572,434; Feb. 9.
Switch: *See*—
Circuit switch. Telephone switch.
Electric switch.
Switch. E. H. Jacobs. 1,572,209; Feb. 9.
Switch handle. H. O. Engstrom. 1,572,130; Feb. 9.
Switch stand. O. D. Oliver. 1,572,754; Feb. 9.
Syringe aspirator. W. G. Painter. 1,572,075; Feb. 9.
Table: *See*—
Douche table. Foldable table.
Extension table. Pull-back table.
Tag-mounting machine. M. G. Rosenthal. 1,572,813; Feb. 9.
Tandem motor power unit. J. M. Finley. 1,572,522; Feb. 9.
Tanks, Filling device for filling. W. H. Stephenson. 1,572,049; Feb. 9.
Tapping machine. F. M. Sanderson. 1,572,685; Feb. 9.
Tapping trough, slag sweeper or skimmer. F. B. McKune. 1,572,864; Feb. 9.
Teapot cover. W. Ramge. 1,572,082; Feb. 9.
Telegraph circuits. F. H. Fay. 1,572,782; Feb. 9.
Telegraph circuit. F. H. Fox. 1,572,785; Feb. 9.
Telephone-exchange system. A. C. Powell. 1,572,679; Feb. 9.
Telephone receiver. A. A. Thomas. 1,572,452; Feb. 9.
Telephone ringing system. R. S. Bailey. 1,571,991; Feb. 9.
Telephone switch. E. H. Clark. 1,572,380; Feb. 9.
Telephone-switching system. W. T. Powell. 1,572,222; Feb. 9.
Telephone system. E. Horn. 1,572,860; Feb. 9.
Telephone system. E. Horn and M. Langer. 1,572,859; Feb. 9.
Telephone system. S. B. Williams. 1,572,587; Feb. 9.
Telephone system, Automatic. W. T. Powell. 1,572,223; Feb. 9.
Telephone system, Long-distance. W. T. Powell. 1,572,224; Feb. 9.
Telephone trunk circuit. A. J. Ray. 1,571,966; Feb. 9.
Tennis racket. N. Lawrence. 1,572,542; Feb. 9.
Tension gauge for check-row wires. J. D. O'Brien. 1,572,408; Feb. 9.
Testing device, Air-operated. R. H. Mueller and C. W. Hathaway. 1,572,158; Feb. 9.
Textile fabric. W. C. Korzinek. Des. 69,399; Feb. 9.
Textile fabric. O. Krause. Des. 69,400; Feb. 9.
Textile fabrics, Apparatus for use in stretching and drying. J. H. Walsh. 1,572,585; Feb. 9.
Textile fibers in skein form, Apparatus for the continuous treatment of. J. Brandwood. 1,572,637; Feb. 9.
Thermoelectric element. O. Hermann. 1,572,117; Feb. 9.
Threads or cords, Machine for uniting. W. H. Pearson and T. J. Kelly. 1,572,655; Feb. 9.
Throttle and governor for pneumatic tools, Combined. W. A. Smith. 1,572,371; Feb. 9.
Tile-forming machines, Shaping and trimming attachment for. M. Mueller. 1,572,028; Feb. 9.
Timepiece. N. P. Walters. 1,572,097; Feb. 9.
Timed feeder. L. E. La Bombard and M. H. Sidebotham. 1,572,439; Feb. 9.
Timepiece. E. H. Horn. 1,572,485; Feb. 9.
Timer. E. E. Fournier and M. I. Vestal. 1,572,199; Feb. 9.
Tire-building machine. W. H. Hermann. 1,572,011; Feb. 9.
Tire-filling apparatus. E. Re. 1,572,811; Feb. 9.
Tires and the like, Splicing unvulcanized rubber tubes for automobile. W. L. Fairchild. 1,572,276; Feb. 9.
Tires, Compressed rubber and air cushion for. R. H. Villard. 1,572,053; Feb. 9.
Tires, Compressible safety ring for pneumatic. A. J. Michelin. 1,572,746; Feb. 9.
Tires, Mold for manufacturing. H. M. Lambert. 1,572,440; Feb. 9.
Tool. W. H. Todhunter. 1,572,094; Feb. 9.
Toothbrush. L. M. Davis. 1,571,999; Feb. 9.
Towrope. C. A. Connelly. 1,572,771; Feb. 9.
Toy. G. W. Ferguson. 1,572,473; Feb. 9.
Toy airplane. D. I. Dwyer. 1,572,270; Feb. 9.
Toy airplane. E. A. Smith. 1,462,166; Feb. 9.

Toy, Child's coaster. S. S. Griffin. 1,572,789; Feb. 9.
Toy, Dancing. A. G. Baldridge and L. D. Roberts. 1,572,124; Feb. 9.
Toy, Figure wheeled. M. Nakamura. 1,572,751; Feb. 9.
Toy, Mechanical. L. S. Gunderman. 1,572,356; Feb. 9.
Toy, Mechanical. L. S. Gunderman. 1,572,649; Feb. 9.
Toy railway. R. G. Spencer. 1,572,569; Feb. 9.
Toy telephone transmitter. C. M. Watrous. 1,572,852; Feb. 9.
Toy vehicle. F. Van Valkenburg. 1,572,335; Feb. 9.
Toys, Building construction for. J. M. A. Larkin. 1,572,659; Feb. 9.
Track-aligning jack. F. Hackmann. 1,572,477; Feb. 9.
Track shifting and raising machine. B. H. Falkner. 1,572,643; Feb. 9.
Trailer coupling. R. A. Weeks. 1,572,056; Feb. 9.
Train-control system. A. G. Shaver and A. B. Kendall. 1,572,564; Feb. 9.
Train-signaling system. W. Kannenberg. 1,572,800; Feb. 9.
Train-speed-control device. G. W. Wildin. 1,572,173; Feb. 9.
Transfer spout. F. B. McKune. 1,572,866; Feb. 9.
Transmission. W. J. Ryan. 1,572,312; Feb. 9.
Transmission. J. B. Thomas. 1,572,576; Feb. 9.
Transmission and brake bands, Lining for. H. J. Mead. 1,572,301; Feb. 9.
Transmission-housing cover, Locking a. C. L. Johnson. 1,572,145; Feb. 9.
Transmission lock. R. Huff. 1,571,949; Feb. 9.
Trap: *See*—
Animal trap. Game trap.
Tray for cups or similar articles. H. Wellen. Des. 69,419; Feb. 9.
Tray, Portable candy. R. S. Meredith. 1,572,743; Feb. 9.
Tree jack. L. Watson and A. O. Middlemiss. 1,572,856; Feb. 9.
Tree-light holder. W. M. Young. 1,572,700; Feb. 9.
Trimming for wearing apparel. M. Ladin. Des. 69,401; Feb. 9.
Trough, Feed. J. Holer. 1,572,483; Feb. 9.
Truck for tramway vehicles. E. Y. and E. A. Walsh. 1,572,339; Feb. 9.
Trucks, Side bearing for car. A. Christianson. 1,572,128; Feb. 9.
Tube: *See*—
Vacuum tube.
Tumbler or similar article. G. S. Bryce. Des. 69,383; Feb. 9.
Tunnel and method of building and submerging. J. C. Meen. 1,572,741; Feb. 9.
Typewriter construction. G. F. Rose. 1,572,159; Feb. 9.
Typewriters, Finger guide for. B. F. Ellsworth. 1,572,385; Feb. 9.
Typewriting machine. W. F. Helmond. 1,571,946; Feb. 9.
Typewriting machine. W. F. Helmond. 1,572,139; Feb. 9.
Typewriting machine. A. G. F. Kurowski. 1,572,396; Feb. 9.
Typewriting machine. J. A. B. Smith. 1,572,622; Feb. 9.
Typewriting machine. M. R. Urban. 1,572,334; Feb. 9.
Vacuum bottles, Electrically-operated sealing means for. W. Wagner. 1,572,827; Feb. 9.
Vacuum brake. N. H. Gilman. 1,572,526; Feb. 9.
Vacuum tube. W. F. Hendry. 1,572,530; Feb. 9.
Vacuum tube W. G. Houskeeper. 1,572,721; Feb. 9.
Valve. S. J. Nordstrom. 1,572,030; Feb. 9.
Valve. C. W. Risden. 1,572,085; Feb. 9.
Valve, Automatic drain. C. P. Cass. 1,572,185; Feb. 9.
Valve, Auxiliary intake air. L. R. Blades. 1,572,842; Feb. 9.
Valve-facing machine. E. G. Smith and A. B. Combs. 1,462,165; Feb. 9.
Valve for fuel-mixture conduits, Air. F. E. Robert. 1,572,567; Feb. 9.
Valve for rock drills. L. C. Bayles. 1,571,993; Feb. 9.
Valve gear, Steam-engine-. E. W. Swartwout. 1,572,372; Feb. 9.
Valve lifter. A. L. Mathwig. 1,572,402; Feb. 9.
Valve, Liquid-flow-regulating. M. De Lin. 1,572,469; Feb. 9.
Valve-reseating tool. G. H. North. 1,572,752; Feb. 9.
Valve-spring-lifting mechanism. L. M. Wood. 1,572,059; Feb. 9.
Valve, Throttle. L. C. Bayles. 1,571,992; Feb. 9.
Valves, Mounting for thermionic. H. Perlesz. 1,571,964; Feb. 9.
Vanity box, Loose-powder. B. P. Hyde. 1,572,652; Feb. 9.
Vanity case. H. Slaiger. 1,572,850; Feb. 9.
Vapor and preventing condensation and for ventilation, eliminating. C. J. Heuser. 1,572,288; Feb. 9.
Vase and display rack, Combination. C. P. Mueller. 1,572,444; Feb. 9.
Vehicle body. H. P. Nelson and G. Davies. 1,572,029; Feb. 9.
Vehicle, Motor. J. F. Sullivan. 1,572,051; Feb. 9.
Vehicles, Automatic clutch control for motor. H. I. Smith. 1,572,370; Feb. 9.
Vehicles, Direction indicator for motor. W. Vogt. 1,572,413; Feb. 9.
Vehicles, Locating chart for. W. F. Schroeder. 1,572,447; Feb. 9.
Vehicles, Side closure for motor. B. Edwards. 1,572,271; Feb. 9.
Vehicles, Traffic signal for motor. A. Marrett. 1,572,442; Feb. 9.
Vending machine. D. L. Chandler. 1,572,422; Feb. 9.
Vending machine. D. L. Chandler. 1,572,422; Feb. 9.
Vending machine. C. S. Smith. 1,572,090; Feb. 9.
Viscosity characteristics of nitrocellulosic materials, Reducing the. S. E. Sheppard and L. W. Eberlin. 1,572,249; Feb. 9.
Viscosity characteristics of nitrocellulose, Reducing the. L. E. Branchen. 1,572,266; Feb. 9.
Viscosity characteristics of nitrocellulose, Reducing the. S. E. Sheppard and L. W. Eberlin. 1,572,248; Feb. 9.
Vise. A. F. Florence. 1,572,279; Feb. 9.
Visor and automatic flash light, Combined. J. A. Kolibas. 1,572,210; Feb. 9.
Wall plug, Electric. H. F. Secretan. 1,572,563; Feb. 9.
Walls, Capping for stucco. L. I. Braddock. 1,571,996; Feb. 9.
Washer: *See*—
Sink and dish washer.
Waste-delivery means. H. Tunstall. 1,571,978; Feb. 9.
Watches, Winding-up and hand-setting mechanism in. H. Colomb. 1,572,516; Feb. 9.
Water-heater burner. A. L. Hall. 1,572,203; Feb. 9.
Water heater, Electric. G. R. Blakesley. 1,572,466; Feb. 9.
Wave signaling and communicating system, High-frequency. E. H. Smythe and S. B. Williams, jr. 1,572,756; Feb. 9.
Wax from mineral-oil distillates, Separating. S. H. Hall and C. H. Hapgood. 1,571,943; Feb. 9.
Weaving frame. E. V. Meehan. 1,572,549; Feb. 9.
Weigher, Crown-block string. W. H. Hazlett. 1,572,719; Feb. 9.
Weighing device. W. Langerak. 1,572,658; Feb. 9.
Welding, Method of and apparatus for electric. R. Mattice. 1,572,740; Feb. 9.
Well-casing hook, Spring. L. H. Keim. 1,572,390; Feb. 9.
Well sand cleaner, Oil. J. B. Clark. 1,572,769; Feb. 9.
Wheel: *See*—
Removable wheel. Spring wheel.
Wheel attachment. J. Peterson and H. Peters. 1,572,806; Feb. 9.
Wheelbarrow. F. Henkel. 1,572,531; Feb. 9.
Wheel spoke, Metal. J. R. Welch. 1,572,170; Feb. 9.
Wind instruments, Spring for. C. H. Norton. 1,572,675; Feb. 9.
Windmill. W. J. Klecker. 1,572,493; Feb. 9.
Windshield. G. E. Goddard. 1,571,941; Feb. 9.
Winding machine. E. J. Abbott. 1,571,925; Feb. 9.
Window casing. S. A. Menczer. 1,572,217; Feb. 9.
Window channel. E. M. Guillaume. 1,572,284; Feb. 9.
Window glass, Mounting for. M. Fuller. 1,572,427; Feb. 9.
Window jack. E. F. Gamber. 1,572,646; Feb. 9.
Window regulator. R. W. and G. W. Bostwick. 1,572,265; Feb. 9.
Window-regulator lock. R. W. Bostwick. 1,572,635; Feb. 9.
Window sash. A. S. Tuñez. Re16,261; Feb. 9.
Window scaffold or seat. U. A. Carr. 1,572,592; Feb. 9.
Window screen. E. P. Garner. 1,572,786; Feb. 9.
Window, Vertically-slidable inwardly-swinging. O. L. Dautrick. 1,572,775; Feb. 9.
Windows and the like, Sill for. J. A. Rappaport. 1,572,309; Feb. 9.
Wire gauge. A. L. Godwin and P. Anderson. 1,572,353; Feb. 9.
Wire-mesh machine. T. H. Kane. 1,572,491; Feb. 9.
Wire-winding machine. E. H. Meyer. 1,572,667; Feb. 9.
Wireless telegraphy and telephony, Inductance coil for use in. W. S. Shephard. 1,572,047; Feb. 9.
Wireless telegraphy, Limiting the effect of static or other disturbances in. J. H. Hammond, jr. 1,572,204; Feb. 9.
Wood chips, Process and apparatus for cooking. J. T. Jaeger. 1,572,723; Feb. 9.
Woodturning machine. M. B. Jackson. 1,572,535; Feb. 9.
Woodworking machine. W. R. Hirt. 1,572,797; Feb. 9.
Wrapping machine. J. Van Buren. 1,572,256; Feb. 9.
Wrench. J. A. Frampton. 1,572,525; Feb. 9.
Wringer: *See*—
Clothes wringer.
Wringer. W. A. Frantz. 1,572,201; Feb. 9.
Wringer mechanism. A. J. Dremel. 1,572,002; Feb. 9.
Wrist-pin connection. D. Head. 1,572,795; Feb. 9.
Yarn winding. M. Morrell. 1,572,157; Feb. 9.
Yarns, Manufacturing colored. W. J. Kerwin, jr. 1,572,148; Feb. 9.
Yarns, Steaming device for. P. Ceasar. 1,571,930; Feb. 9.
Yeast-nutrient solutions and of manufacturing yeast therefrom, Preparing. R. L. Corby and R. Glasgow. 1,571,932; Feb. 9.

CLASSIFICATION OF PATENTS

ISSUED FEBRUARY 9, 1926.

NOTE.—First number—class, second number—subclass, third number—patent number.

1— 2.3: 1,572,017
1,572,018
2— 26: 1,571,998
41: 1,572,826
78: 1,572,099
94: 1,572,517
3— 2: 1,572,318
6: 1,572,319
4— 148: 1,572,275
172: 1,572,463
5— 21: 1,572,375
191: 1,572,241
8— 5: 1,572,061
19: 1,572,637
10— 1: 1,572,064
139: 1,572,685
12— 142: 1,572,042
15— 20: 1,572,739
128: 1,572,362
142: 1,572,102
176: 1,571,999
17— 1: 1,572,198
44: 1,572,178
18— 1: 1,752,694
5.3: 1,571,929
16: 1,572,724
42: 1,572,440
55: 1,572,714
19— 30: 1,572,662
32: 1,572,663
116: 1,571,978
118: 1,571,979
139: 1,572,014
145: 1,572,148
20— 35: 1,572,184
49: R. 16,261
1,572,775
52: 1,572,486
71: 1,572,763
22— 79: 1,572,866
204: 1,572,428
1,572,865
213: 1,572,459
23— 151: 1,571,982
196: 1,571,986
267: 1,572,023
24— 77: 1,572,717
90: 1,572,803
110: 1,572,511
1,572,619
133: 1,572,755
153: 1,572,192
157: 1,572,518
237: 1,572,347
25— 30: 1,572,445
41: 1,572,305
1,572,602
73: 1,572,843
104: 1,572,028
116: 1,572,674
121: 1,572,706
131: 1,572,780
142: 1,572,327
155: 1,572,705
28— 4: 1,572,220
6: 1,572,424
59: 1,571,930
29— 1: 1,572,160
33: 1,572,667
85: 1,572,279
86.3: 1,572,059
1,572,402
86.4: 1,572,135
1,572,801
156: 1,572,303
30— 1: 1,572,644
1,572,791
9: 1,572,702
11: 1,572,100
1,572,546
12: 1,572,154
1,572,572
31— 89: 1,572,123
32— 12: 1,571,942
33— 9: 1,572,835
27: 1,572,237
34: 1,572,421

33— 57: 1,572,294
72: 1,572,528
122: 1,572,132
127: 1,572,753
